The United States census of manufactures, 1927, reported 1,624 establishments (1,742 in 1925) with 83,415 employees (88,058) earning $79,673,477 ($79,762,794) and a product valued at $638,361,215 ($710,050,100). The leading industry was petroleum refining, with 12 establishments with 5,093 employees earning $8,186,966 with an output valued at $138,249,752 ($166,611,627). The four sugar refineries, with 2,069 employees earning $1,867,371 had an output valued at $82,574,116 ($82,950,288); the 278 lumber, timber and planing mills with 33,987 employees earning $29,221,856 had an output valued at $95,763,391.

Foreign trade through the port of New Orleans is large, totalling in 1928, exports $321,432,140; imports, $211,609,997.

Louisiana ranked sixth in value of exports in 1928, $235,467,286; and in 1927 $229,304,962.

Louisiana, in 1920, had the highest percentage, 21.9, of illiteracy in the country; the percentage for native whites being 11.4; for foreign born whites, 21.9; and for Negroes, 38.5. The percentage of illiterates of school age (10 to 15) decreased from 24.5 in 1910 to 14.1 in 1920. Expenditure for public schools in 1926 was $19,741,168.

There were in 1921, 355,000 enrolled in the public schools of a population of more than 1,800,000, divided, two-thirds white and one-third Negro. Much of the population retains the original French blood, and considerable numbers the mixture of French and Spanish, which produced the Creoles. About 6,000 attend the colleges and universities, of which Tulane University (3,000 students), and the Louisiana State University (1,700) are the leaders.

New Orleans, the chief city, is a welcome resort for tourists in the winter, having picturesqueness and the flavor of olden times, the annual Mardi Gras being the principal attraction. Much through passenger traffic flows through New Orleans to and from the Pacific Coast, railway and steamer facilities being well supplied.

MAINE.

Area, square miles . . . . . 33,040 . . . . . 38th in rank
Population, 1920 . . . . . 768,014 . . . . . 35th in rank
Population, 1928 (est.) . . . . 795,000 . . . . 24.0 to sq. m.
Wealth, 1923 (Census est.) $2,006,631,000

Maine, in New England, northeasternmost State, is bounded on the north by Quebec, Canada, on the east by New Brunswick, Canada, and the Atlantic Ocean, on the south by the Atlantic, and on the west by New Hampshire and Quebec.

It is naturally heavily wooded, mostly with coniferous trees, is of broken topography, rising to mountainous elevations in the northwest, Mount Katahdin, 5,273 feet, the highest, and slopes in broken form toward the coast, which is rugged, tortuous, picturesque and indented with many harbors.

Its waters abound in fish, its forests in wild animals, and it has a climate rather intensely cold in winter but beneficent in summer. It has 2,465 lakes and twice as many rivers and streams comprising one-tenth of its surface. The coastline is 2,486 miles long. It has 1,300 wooded islands, one Mount Desert of 60,000 acres, on which is Lafayette National Park and a notable summer colony.

Agriculture, lumbering, manufacturing, quarrying and fisheries are the chief industries.

Of the 20,000,000 total land acres, about one-third is farming area, of which about two-thirds is improved. Potatoes form the leading crop, the 1920 census showing 25,531,000 bushels worth $52,339,000. Hay is a large crop, and all vegetables and considerable small fruits are produced. The value of all crops, 1920 census, was $100,152,324. Livestock and dairy products add to the wealth, the milk production coming in part to supply New York City.

In granite output it ranks third, Vermont and Massachusetts exceeding; it is first in feldspar.

Lumber is the principal manufacturing product, the cut, Census of 1920, being 650,000,000 feet, white pine, spruce for wood pulp, hemlock, balsam, birch, cedar, oak, maple, beech, ash, and basswood or linden. The paper pulp mills produce $70,000,000 annually, and along the rivers are many water power motived textile, tanning, oilcloth, boots and shoes, canning, flour and machinery works.

The United States census of manufactures, 1927, reported 1,426 establishments (1,500 in 1925) with 68,142 employees (73,849) earning $74,212,035 ($79,777,217) and a product valued at $372,093,447 ($371,849,483). The leading industry was paper and pulp with 51 mills with 11,884 employees earning $16,140,077 and the product valued at $128,875,248. The 44 boot and shoe factories with 9,740 employees earning $9,044,294 had an output valued at $36,663,037 ($38,113,599); the 17 cotton goods mills with 10,195 employees earning $9,781,130 had an output valued at $34,414,143 ($41,128,496); the 50 woolen goods mills with 6,140 employees earning $7,525,452 had an output valued at $30,024,987 ($40,002,293); the 9 worsted goods mills with 4,244 employees earning 4,642,346 had an output valued at $21,849,221 ($24,920,845).

Transport by water is mostly coastwise, although there is some foreign. The railroad mileage, 1927, was 2,228.

Maine is distinctively a pleasure resort, summer bringing many thousands of tourists and residents for the season, and the fall many hunters. Luxurious hotels are maintained, and there are many private lodges and summer homes, while many artists go to paint the beauties of the Maine landscape and coastline.

Portland, the chief port, has a large steamer tourist traffic, as well as extensive freight tonnage by water and by rail.

Illiteracy percentage is 3.3, that of native whites 1.6, and of foreign-born 11.1. Public schools enroll about 170,000, and higher educational institutions rank well, notably Bowdoin College, the University of Maine, Colby and Bates.

MARYLAND.

Area, square miles ..... *12,327* ..... *41st in rank*
Population, 1920 ..... *1,449,661* ..... *28th in rank*
Population, 1928 (est.) ..... *1,616,000* ..... *131.1 to sq. m.*
Wealth, 1923 (Census est.) *$3,990,750,000*

Maryland, a South Atlantic border State between the North and South, is bounded on the north by Pennsylvania, on the east by Delaware and the Atlantic Ocean, on the south and west by Virginia and West Virginia. It is penetrated from the south by Chesapeake Bay, a wide arm of the Atlantic, and an important channel of water-borne commerce which has made Baltimore a great seaport. The Potomac River flows along the south western boundary, also important in commerce. The topography is varied, low and flat in the portions toward the ocean, and rising to mountain levels in the western sections, Great Backbone Mountain, 3,400 feet, the highest. The State is distinctly separated by the bay into Eastern and Western shore parts, each having social and industrial individuality. The climate is warm, with mild, humid winters.

The Census of 1920 showed $109,683,574 as the value of the crops, principally corn, tobacco, wheat, oats, hay, fruits of all kinds grown in the south temperate zone, vegetables being produced heavily for the markets of the larger cities as far north as New York. Products are varied and profitable on account of the proximity of big city markets.

The mine output of coal in 1928 was 2,780,000 short tons. Pig-iron production in 1928 was 950,000 long tons; and in 1927, 845,564 tons.

The United States census of manufactures, 1927, reported 3,205 establishments (3,179 in 1925) with 126,700 employees (125,761) earning $141,902,797 ($138,560,496) and a product valued at $943,410,896 ($925,688,028). The leading industry was the manufacture of men's clothing, 211 shops making men's clothing with 8,816 employees earning $8,339,204 had a product valued at $39,915,726 ($57,705,043); 86 shops making women's outer clothing had an output valued at $16,022,165; 31 shops making men's furnishing goods, $15,330,929; four straw hat factories, $4,700,746; and 49 shirt factories, $8,622,936. The 40 slaughtering and meat packing houses (wholesale) had an output valued at $35,166,219 ($38,425,638); the 20 tinware shops with 4,319 employees earning $4,265,855 had an output valued at $33,195,975.

Transportation is highly developed, water and rail. Railroad mileage, 1927, was 1,448 Baltimore is one of the country's principal ports, and is growing in importance much faster than the Nation's whole volume increases. Water traffic coastwise is very heavy, and several substantial steamer lines also ply between Baltimore and foreign ports. Much of the product of the South comes through Baltimore, and that port gets a large share of the tonnage of the North and West. In 1928 the value of its exports was $98,645,488, and of imports $107,939,608; and in 1927, exports, $100,613,787, imports, $106,848,262.

Baltimore, on July 1, 1928, by estimate of the Census Bureau, had a population of 830,400. Its area was increased to 91 square miles on Jan. 1, 1919, by the annexation of 60 square miles of territory, which brought an increase of over 100,000 population and of $124,884,455 in assessed valuation.

The population is 17.9 per cent. Negro, and the percentage of illiteracy for the whole State is 5.6. The swiftness with which educational advantages for the masses is sweeping away illiteracy is shown by the figure of 5.6 for 1920, compared with 7.2 in 1910. In the schools were more than 250,000, and the higher institutions are celebrated. Johns Hopkins University, at Baltimore, is not excelled in any State or country for scholarship and breadth of scientific attainment. To its hospital go patients from all parts of the world to consult eminent specialists. There are other well-known higher institutions, Goucher College one of them. Expenditure for public schools in 1926 was $21,665,229.

At Annapolis is the famous United States Naval Academy (see Index therefor).

Along artistic lines there is high development, principal centres being Peabody Institute for Education in Music, the Maryland Institute School of Art and Design, Walter's Art Gallery, and others.

Wealth, 1923 (Census est.) *$12,980,839,000*

Massachusetts, one of the Thirteen Original States, lies in New England, bounded on the north by Vermont and New Hampshire, on the east by Massachusetts Bay and the Atlantic Ocean, on the south by Rhode Island, Connecticut and the Atlantic, and on the west by Rhode Island and New York. The highest elevations are in the Berkshires in the west, about 2,500 feet maximum, and now a great summer resort of wealthy city dwellers.

It was naturally wooded in all portions, but retains only a fraction of the original forest wealth, which consisted of all trees which grow in the temperate zone, coniferous and hardwood.

Massachusetts has grown into a first place in industry and has greatly developed its water power. The capitalization of its manufacturing establishments, which include practically all lines of industry, exceeds $3,000,000,000.

The United States census of manufactures, 1927, reported 10,037 establishments (10,027 in 1925) with 578,068 employees (591,438) earning $705,929,549 ($716,155,593) and a product valued at $3,317,851,888 ($3,405,672,159). The leading industry was the manufacture of cotton goods with 200 mills with 93,413 employees earning $90,574,225 and the product valued at $294,890,790 ($345,864,097). The 469 boot and shoe factories (other than rubber), with 55,986 employees earning $65,282,193 had an output valued at $237,516,655 ($240,943,504); the 122 electrical machinery shops with 24,759 employees earning $33,903,793 had an output valued at $139,348,725 ($147,056,901); the 64 rubber goods establishments (other than boots and shoes), with 10,364 employees earning $13,298,241 had an output valued at $97,717,724 ($108,594,705); the 496 foundries and machine shops with 19,898 employees earning $30,059,274 had an output valued at $94,149,409 ($90,638,434); the 80 paper mills with 82,027 employees earning $15,607,992 had an output valued at $91,095,083 ($90,126,831); the 99 woolen mills with 15,923 employees earning $19,818,612 had an output valued at $73,740,314 ($93,079,965); the 75 worsted mills with 35,141 employees earning $38,666,775 had an output valued at $195,095,492 ($216,448,325); the 1,022 printing and publishing houses with 14,382 employee earning $25,482,123 had an output valued at $131,975,238; the 40 slaughtering and meat packing establishments (wholesale), with 3,191 employees earning $4,127,491 had an output valued at $58,796,506; the 115 tanneries with 10,768 employees earning $14,587,638 had an output valued at $77,649,547.

The State has abundant rail and coastwise shipping facilities; there were 2,071 miles of railroads in 1927, and 2,804 of electric lines. From the earliest generations, the New England States have been efficient in ocean-going shipping, and Massachusetts not less than any.

Massachusetts is the second densest populated State. The dense industrial and residential development is indicated by the 94.8 per cent. of urban population, which leaves agriculture, once dominant,

reduced to 32,001 farms averaging 77.9 acres, value of all crops in the 1920 census being $53,700,925, taken from farm property valued at $300,471,743. In value, hay was the leading crop, tobacco next with $6,419,000, and potatoes with $6,000,000, others being wheat, corn, oats, rye, buckwheat, apples, maple sugar, and small fruits, cranberries abounding in the lands along the coast.

It is the leading fisheries State of New England, $11,000,000 of catch being reported in 1920. Boston is greatest fishing port in the country.

Mineral products consist chiefly of quarry outputs.

No State is further advanced in primary and higher educational facilities, although, owing to recent heavy influx of industrial foreigners, the percentage of illiteracy is not low at 4.7. Native whites show 4-10ths of 1 per cent., foreigners, 12.8, and Negroes, 6.8.

Of the 3,852,356 of population, 1,077,534 are foreign-born, of which 262,021 are Canadians, 117,037 Italian, 163,171 Irish, 92,034 Russian, and the others from all foreign lands, census of 1920.

Enrolment in the schools was 618,828; normal schools number 11, and the list of higher institutions is long and impressive, the greatest proportioned to population in the country. These include Harvard University, Massachusetts Institute of Technology, the State Agricultural, Amherst, Tufts, Williams, Clark, Worcester Polytechnic, Boston University, Holy Cross and Boston College. Institutions for women include Wellesley, Smith, Radcliffe, an offshoot of Harvard, and Mount Holyoke Colleges; Simmons, Lasell and Auburndale.

The colony in pre-Revolutionary times was the centre of republic-making in the North, perhaps in the country, the Boston Tea Party, which signalized the revolt against "taxation without representation" by the mother country, England, taking place on the Boston waterfront.

As with all New England, the State is a great summer resort, the North Shore above Boston being the resort of summerers and many artists, and the long hooklike Cape Cod and the adjacent islands attract thousands. At Provincetown, at the tip of the Cape, the Mayflower made its first landing, moving next to Plymouth.

MICHIGAN.

Area, square miles.....57,980.....22d in rank
Population, 1920.....3,668,412.....7th in rank
Population, 1928 (est.)....4,591,000....79.1 to sq. m.
Wealth, 1923 (Census est.).....$11,404,861,000

Michigan, lying along the Canadian border, is divided by Lake Michigan into two parts: the northern peninsula has on the north Lake Superior, and on the south Wisconsin; the southern peninsula has Lake Michigan on the west, Lake Huron, Ontario, Canada, and Lake Erie on the east, and Indiana and Ohio on the south. The interests of the northern peninsula are mostly copper and timber. In the southern there are also minerals and timber, but manufacturing has grown to chief importance.

The State is mostly flat and sandy, with large areas of cut-over timberlands, mostly coniferous, with rugged topography in the north. The State, the Federal Government and large private enterprises are now making great efforts for the reforestation of the land.

No State has greater water boundary lines proportioned to area; transport naturally is great by that means. Rail facilities are abundant, lines having sought the heavy tonnage of the recently developed industries. Railroad lines mileage, 1927, was 8,349, and the great Sault Ste. Marie Ship Canal, between Lakes Huron and Superior, accommodates more tonnage than the Suez Canal or any other like canal. In 1927 the American canal alone sent through 83,354,064 short tons of freight valued at $1,131,653,158, of which much is iron ore from Minnesota and copper from Michigan, vast supplies of grains, flour and timber, and coal and supplies for the Northwest.

The tonnage passing through the Detroit river connecting Lake Huron with Lake Erie in 1927 was 97,188,281 valued at $1,319,816,856.

Of the world's output of 4,800,321 motor cars in 1925, 3,131,524 were produced in Michigan. Total output since the industry began to flourish there is approximately 24,000,000 to Dec. 31, 1926. There are 54 motor car factories, each with an output over $1,000,000 a year, chief of which are the works of Henry Ford at Detroit, from which in June, 1926 came the 15,000,000th car, besides farm tractors at Dearborn, nearby, and steel and other mills operated by the Fords. Besides the Ford cheap car, Detroit makes some of the finest built in the world.

The United States census of manufactures, 1927, reported 5,800 establishments (5,598 in 1925) with 488,856 employees (508,573) earning $760,602,319 ($792,213,944) and a product valued at $4,244,941,132 ($4,372,996,324). The leading industry was the manufacture of automobiles, 43 plants with 114,023 employees earning $206,017,066 and the product valued at $1,664,727,963 ($1,520,296,128), and 117 factories manufacturing automobile bodies and parts with 95,435 employees earning $158,030,985 and the product valued at $568,700,760 ($921,901,337). The 513 foundries and machine shops with 35,736 employees earning $53,951,123 had an output valued at $178,048,457 ($162,545,298); the 22 engine, turbine and water wheel shops with 14,981 employees earning $23,118,918 had an output valued at $103,133,150 ($95,932,026); the 174 furniture factories with 21,337 employees earning $28,612,181 had an output valued at $94,220,740 ($99,130,108); the 761 printing and publishing establishments with 8,420 employees earning $15,199,351 had an output valued at $82,154,386; the 42 paper mills with 11,382 employees earning $15,323,895 had an output valued at $95,798,872 ($91,149,648); the 45 slaughtering and meat packing houses (wholesale), with 1,935 employees earning $2,861,488 had an output valued at $53,142,114 ($53,932,676); the 252 lumber and planing mill products establishments with 16,972 employees earning $19,842,408 had an output valued at $64,495,845 ($98,090,601); the 29 stove and range foundries with 4,589 employees earning $7,329,047 had an output valued at $36,226,480 ($37,405,828); the 86 brass, bronze, etc. products plants with 7,717 employees earning $11,715,589 had an output valued at $61,743,049 ($65,594,415); the 60 electrical machinery shops with 4,379 employees earning $5,977,053 had an output valued at $36,623,319 ($34,643,466). The 533 bakeries had an output valued at $55,022,915. The 280 dairies an output valued at $33,562,576 ($49,300,693); and 16 beet sugar plants an output valued at $14,441,318 ($22,981,153).

Michigan ranks third in the value of exports originating in the state, $367,253,146 in 1928 and $326,879,584 in 1927.

Production in 1928 of iron ore was 13,676,984 long tons (15,075,079 in 1927); of copper, 179,104,311 pounds (195,135,199 in 1927); of coal, 565,000 short tons (757,000 in 1927); and of salt, 1927, 2,271,460 short tons.

Agriculture adds annually, Census of 1920, $404,347,810 for all crops, potato production the third largest with a $32,000,000 crop. Sugar beet output is heavy, and all temperate zone crops are raised.

In shipbuilding it ranks seventh among the States. Fisheries catch annually 50,000,000 pounds.

There are more than 6,000 smaller lakes, where fishing and summer sports attract many. Apple production is fourth highest, and the State claims leadership in small fruits. Corn yields about $50,000,000.

Educationally, Michigan has its great State University at Ann Arbor, which was first to admit women matriculates, the oldest agricultural college in the country, many normal schools, and a public school system that enrolls 670,000; it has a literacy percentage of 3; native white, 7-10ths of 1 per cent., and foreign-born, 9.9.

A law enacted May 23, 1929 makes the sterilization of feeble-minded and other mentally defective persons mandatory on a Court order.

Detroit, by the Census of 1920, had 993,739, showing an increase of 527,978—113 per cent.—in the decade. The population, on July 1, 1928, by census estimate, was 1,378,900, and the approximate population of Greater Detroit is 1,500,000. The percentage of foreigners is large.

Beautifully situated along many waterways, it bids successfully for metropolitan repute and constantly attracts newcomers from home and abroad. In summer time, the Mackinac Islands, Belle Island, Ausable and St. Mary's River are popular resorts.

MINNESOTA.

Area, square miles.....84,682.....11th in rank
Population, 1920.....2,387,125.....17th in rank
Population, 1928 (est.)...2,732,000....32.1 to sq. m.
Wealth, 1923 (Census est.).....$8,547,918,000

Minnesota, a West North Central State, on the Canadian border line, is bounded on the north by Manitoba, and Ontario, on the east by Lake Superior and Wisconsin, on the south by Iowa, and on the west by the Dakotas. The Mississippi River rises in Minnesota. It is a State of widely variant natural resources and rapidly developing wealth, is in general a tableland of rolling, timbered prairies excepting in the western parts where timber is scarce, and of rugged character in the northeast, where immense deposits of ore, high-grade Bessemer prevailing, supply the steel concerns of Illinois, Pennsylvania and Ohio. Its climate is not ex-

cessively warm in summer, and is cold in winter time. There are about 10,000 lakes, many exceedingly beautiful, that abound in fish, and are the resort of pleasure-seekers in the summer.

Agriculturally, the State is rich, with $506,020,233 as the value of all crops reported by the 1920 census; it has 178,478 farms with a total acreage of 30,221,758; a billion feet of lumber cut, mostly white pine; 34,593,000 tons of iron ore, worth $128,377,174, being 61 per cent. of the national production, shipped eastward by steamers on the Great Lakes.

The United States census of manufactures, 1927, reported 3,886 establishments (3,881 in 1925) with 98,833 employees (100,514) earning $123,619,231 ($123,655,793) and a product valued at $1,066,727,215 ($1,099,687,515). The leading industry was flour and grain mill products with 115 mills with 4,617 employees earning $4,951,743 and having product valued at $185,140,950 ($215,637,578). The 12 slaughtering and meat packing houses (wholesale), with 6,159 employees earning $8,262,955 had an output valued at $173,785,796 ($182,555,429). The 871 dairies had an output valued at $130,436,949 ($123,450,850); the 606 printing and publishing establishments an output valued at $44,566,472; and the 16 paper and wood pulp mills an output valued at $28,469,444 ($20,320,392).

The iron ore output in 1927 was 35,563,177 long tons, valued at $87,935,099; and in 1928, 37,564,005 tons.

By adaptation, fruits have been made to thrive, until the crop is large of all kinds grown in the north temperate zone; while corn, in earlier years scarcely known, has by the same process been brought to high value.

The 1920 census reported the crop at 118,000,000 bushels; wheat, once the chief crop, 37,710,000; oats, 90,000,000; with generous yields of all other cereals.

Twenty-five years ago Minnesota ranked third in lumber output, but has fallen to eleventh place, although there remains an estimated 21,000,000,000 feet of spruce in the forests, which is very valuable for paper woodpulp in these years of diminishing supply. 80 per cent. of the cut is white pine, which also is rapidly disappearing.

Railroad mileage, 1928, was 8,827.

Minnesota has been especially fortunate in the heavy inflow of those European racial migrations from the northern countries whence come good farmers, Scandinavians in the majority, but with almost as many Germans; both nationalities settled in more or less clannish sections, but all helped to develop the State with great thrift and industry.

In illiteracy the State is among the lowest, only 1.8 per cent. being unable to read and write, against an average of 6 per cent. for the United States. The State claims one of the most efficient systems for popular education, with enrolment of about 550,000 in all institutions out of a population of 2,387,125. The University of Minnesota, with about 12,000 students, ranks among the greatest of the country, and a score of smaller colleges including Hamline University, St. Thomas, Macalester, Carleton, are scattered through the State.

The grain trade control in Minneapolis is second only to that of the Chicago Board of Trade; and the water and rail shipping from and to Duluth, at the head of the Great Lakes, on Lake Superior's western end, is immense in ores, coal, cereals, and general freight. The Great Northern Railway Company maintains a fleet that traverses the lakes, and initiates shipments to and from all parts of the world via the lake route.

In the carrying of iron ores, the United States Steel Corporation, which owns mines and railways in the northern ore region, has developed a fleet of monster carriers and a system of prevention of waste time not excelled by any transport agency in the world. Shipment of iron ore exceeds 40,000,000 tons a year.

MISSISSIPPI.

Area, square miles . . . . . *46,865* . . . . . *31st in rank*
Population, 1920 . . . . . *1,790,618* . . . . . *23d in rank*
Wealth, 1923 (Census est.) *$2,177,690,000*

Mississippi, one of the States of the East South Central group, is bounded on the north by Tennessee, on the east by Alabama, on the south by Louisiana and the Gulf of Mexico, and on the west by Louisiana and Arkansas; the Mississippi River is the western boundary line. It is hilly but not rugged, and in general slopes downward to the great river and the Gulf shore. The climate and production are sub-tropical. The density of population in 1920 was 38.1 to the square mile.

Agriculture is its chief interest. The 1920 census gave the value of all crops as $336,267,156, corn and cotton the main production. As a cotton state it has yielded second place to Oklahoma. It produced in 1928 1,474,875 bales from 4,029,000 acres.

Other crops are rice, sugar cane, oats, wheat, hay, peanuts, potatoes, and every character of fruit grown in its zone. Apples, plums, pears, apricots, melons, strawberries, peaches, and grapes grown in the western parts, with oranges, lemons, figs and olives in the Gulf coast sections. Nuts are abundant.

Dairying is increasing in importance.

The United States census of manufactures, 1927, reported 1,333 establishments (1,705 in 1925) with 50,569 employees (55,171) earning $40,734,359 ($41,231,045) and a product valued at $196,640,742 ($200,453,028). The leading industry, lumber, timber and planing mill products, with 575 mills with 31,394 employees earning $24,940,948 had an output valued at $86,887,700 ($110,390,744). The 44 cottonseed (oil, cake and meal) plants with 2,238 employees earning $1,596,395 had an output valued at $27,978,008 ($25,215,846). There were 14 cotton mills with 159,746 spindles and 5,037 looms employing 2,822 hands and with a product valued at $6,563,051.

The forest wealth is very great. Of the total of 33,000,000 acres, about 11,000,000 is forested, yellow pine chiefly. There is much of the fast disappearing hardwood. Lumber cut in 1927 was 2,556,612 M. ft.

Transport is supplied by the rail lines and by the Mississippi River, on which traffic, lessening in the recent era of rapid rail development, is growing again to great relative importance.

Railroad mileage, 1928, was 4,348.

The old plantation life prevails as unchanged as in any Southern State, with spacious mansion houses and large estates, the homes of the old-time aristocracy of the age of the Southern cavalier.

The rate of illiteracy is high—17.2 per cent. on the average—owing to the large number of Negroes, who are 52.2 per cent. of the whole population. Native whites showed, Census of 1920, only 3.6 per cent. illiterate, but the Negroes 29.3. Rapid progress in popular education is being made, the illiteracy percentage in 1910 having been 22.4. Expenditure for public schools in 1926 was $12,599,596.

Public school enrolment is about 600,000, more than half of which is colored.

The state has the University of Mississippi (1,000 students) and 13 other colleges, 1,000 consolidated high schools, and 52 agricultural high schools.

Mississippi has the lowest death rate and the highest birthrate in the South and ranks third in the registration area.

MISSOURI.

Area, square miles . . . . . *69,420* . . . . . *18th in rank*
Population, 1920 . . . . . *3,404,055* . . . . . *9th in rank*
Population, 1928 (est.) . . . . . *3,523,000* . . . . *50.7 to sq. m.*
Wealth, 1923 (Census est.) *$9,981,409,000*

Missouri, a West North Central border State, is bounded on the north by Iowa, on the east by Illinois, Kentucky and Tennessee, on the south by Arkansas, and on the west by Oklahoma, Kansas and Nebraska.

The Mississippi River forms the entire eastern boundary line for 500 miles, and the Missouri River the northern half of the western line, cutting then through the State to confluence with the Mississippi at St. Louis. In all it has nearly 1,000 miles of navigable waterways.

Its topography is varied—upland table in the north and west, the Ozark Mountains in the centre and south, with low-lying river bottom areas in the extreme southeast. Its climate is a compromise between the north temperate and sub-tropical.

Economically, it partakes of the characteristics of both North and South, is strong agriculturally and industrially, and foremost in education. Farms number 263,004 with 34,774,679 acres. All crops in 1920 were valued at $559,047,854.

The United States census of manufactures, 1927, reported 5,422 establishments (5,100 in 1925) with 195,378 employees (194,682) earning $230,017,241 ($230,427,696) and a product valued at $1,665,173,463 ($1,602,849,724). The leading industry was slaughtering and meat packing (wholesale), with 45 establishments with 5,605 employees earning $7,140,378 with an output valued at $168,359,556 ($175,392,412). The 68 boot and shoe (other than rubber) factories with 24,277 employees earning $22,874,378 had an output valued at $136,998,386 ($129,327,761); the 864 printing establishments with 9,423 employees earning $16,389,486 had an output valued at $77,398,298; the 248 foundry and machine shops with 7,558 employees earning $10,736,553 had

an output valued at $44,328,592; the 52 electrical shops, for machinery, apparatus and supplies, with 6,791 employees earning $8,575,253 had an output valued at $43,371,941 ($39,130,533). The output of the 226 flour and feed millsw as valued at $117,833,395, and of the butter and cheese factories, $35,023,808.

The lead output in 1927 was 198,760 tons; zinc 18,737 tons; and coal, 3,064,000 tons (3,400,000 tons in 1928).

The forty-mile circle of which St. Louis is the business and banking centre has a population of 1,246,000. St. Louis is noted for its botanical garden, zoo, parks and Municipal Open-Air Theatre (seating 9,267), and the city voters recently approved a bond issue of $87,372,500 for city developments. Twenty-one main trunk lines furnish railroad transportation.

St. Louis is the gateway for north and south travel as well as of freight traffic, and many tourists stop there en route. A feature is the famous bridge across the Mississippi, which is said to accommodate more freight cars than any other in the world. River traffic is immense, to and from New Orleans and intermediate points.

Agriculturally, it is a great State. There is a total of about 44,000,000 acres in all, of which the 1920 census assigns to farms 34,774,000, with more than 24,000,000 improved. The corn crop in 1928 was 181,540,000 bushels, wheat 19,194,000, oats 44,968,000, and tobacco, 4,750,000 pounds. The crop of cotton, mostly in the southeast, was 146,909 bales on 334,000 acres.

In livestock the Missouri mule, which is facetiously said to have won the war, has always been used much locally and exported to all States and foreign countries. The number in 1928 was 313,000.

Railroad mileage, 1928, 8,067.

With 4.8 per cent. of negro population, the average of illiteracy for the State is 3 per cent. for all classes; native white percentage, 2; and foreign-born, 9.6.

Although the native-born whites are 88.2 per cent., and foreign-born whites only 7, the influx of Germans in the revolutionary times of their native land in the last century left a large proportion of persons of that blood, especially in St. Louis to this day, those now being practically all natives. They have been noted for thrift.

The schools enroll about 750,000 of a population of 3,404,055 by the 1920 census. The State University at Columbia, and St. Louis University and Washington University at St. Louis, twelve colleges and seven normal schools are the higher institutions. Expenditure for public schools in 1926 was $53,217,104.

The legislature in 1929 enacted a state budget system and voted a $75,000,000 bond system.

MONTANA.

Area, square miles.....146,997.....3d in rank
Population, 1920.....548,889.....39th in rank
Population, 1925 (est.)...646,806.....4.4 to sq. m.
Wealth, 1923 (Census est.).....$2,223,189,000

Montana, a Mountain State, is bounded on the north by Canada, on the east by North and South Dakota, on the south by Wyoming and Idaho, and on the west by Idaho.

The Rocky Mountain range crosses the State in the west, with the Bitter Root range at the extreme western side, the country east of the Rockies sloping off into vast plains and smaller valleys between smaller hill elevations. Its rivers of note are the Missouri, up which crude boat navigation has passed for generations; the Yellowstone, Madison and Bitter Root. Of the 50,000,000 acres, the forests of about 30,000,000 acres are, with other areas, ranges for livestock grazing.

The United States census of manufactures, 1927, reported 565 establishments (606 in 1925) with 14,242 employees (14,777) earning $20,915,203 ($21,078,039) and the product valued at $203,503,250 ($205,474,257). The smelter output was about $125,000,000, and gave employment to about 3,500 men. Lumber mills had an output valued at $10,464,150; and flour mills, $14,789,731.

The value of all crops as returned by the census of 1920 was $69,975,000; the wool and sheep were next in value, and cattle third with $28,000,000. Dairy and poultry products were valued at $38,000,000.

Irrigation, by Federal Government and private initiative, has been highly developed, resulting in the production of large quantities of the standard fruits, orchard and small, of the temperate zone, the State, although far north and high in elevation, being especially suited to that activity, largest development being in the Bitter Root, Missoula and Flathead regions. Wheat, oats, flaxseed, barley, rye, corn, hay, potatoes and sugar beets are produced.

Montana has a stumpage of more than 58,000,000,000 feet of timber, of which much is the increasingly valuable white pine; other kinds are larch, spruce, cedar, Douglas fir, white fir, lodge-pole pine, valuable for telegraph poles, hemlock and yellow pine.

The mineral resources are very great. The 1925 census gave $79,261,284 as the value of coal and metals. Copper production in 1928 was 251,046,415 pounds, in 1927, 255,208,853 pounds, and in 1926, 255,372,862 pounds, the State being third to Arizona and Utah. About 25,000 tons of high grade manganese ore is produced yearly.

Coal output in 1927 was 3,205,000 short tons and the fields underlie about 20 of the whole State area. All of the metals and minerals are found in vast abundance, large fortunes having been made by organized mineral industry.

The State is second in silver output (in 1928, $6,248,780; 1927, $6,696,137; 1926, $7,471,936; 1925, $8,923,002; 1924, $8,840,118) and in zinc; seventh in gold (in 1927, $1,159,200; 1926, $1,192,900; 1925, $1,769,900; 1924, $1,924,300) and first in semi-precious stones. The petroleum output in 1926 was 5,048,000 barrels. Valuable process minerals are graphite, gypsum and tungsten.

A million potential horsepower is available in the waters, of which almost one-third has been developed. Immense reservoirs have been constructed on the Madison and Missouri Rivers to give dependable water supplies.

Railroad mileage, 1928 was 5,094.

Montana is low in illiteracy—2.3 per cent.—that of native whites being only 3-10ths of 1 per cent. Public school enrolment, 1920 census, was 122,000 of a population of 548,000, and there are four well-equipped colleges and normal schools.

Scenically, Montana is not surpassed. Its lofty mountains are rugged and picturesque, and travel by rail or automobile takes one through beautiful and grand places. Glacier National Park, on the line between the United States and Canada, is one of the most wonderful public preserves in the world.

NEBRASKA.

Area, square miles.....77,520....15th in rank
Population, 1920.....1,296,372.....31st in rank
Population, 1928 (est.)...1,408,000.....18.1 to sq. m.
Wealth, 1923 (Census est.).....$5,320,075,000

Nebraska, a West North Central State, is bounded on the north by South Dakota and Iowa, on the east by Iowa and Missouri, on the south by Kansas and Colorado, and on the west by Colorado and Wyoming. The Missouri forms the eastern boundary.

Typical of the American western plains States, its lands form a vast inclined plane sloping eastward to the Missouri River bottoms. No point rises more than 5,300 feet above sea level, while the average elevation is about 2,000. Its climate is typically north temperate, its products likewise including almost every species appropriate to this latitude. In the east rainfall is sufficient for crops with little irrigation. In the west, irrigation is resorted to, and grows in importance. The livestock industry is second to agriculture in primary wealth producing, Nebraska supplying very much of the Nation's meat, and packing a large portion of it in the stockyards at Omaha. In this industry it has taken third rank from New York State.

Of the 55,000,000 acres in the State, 42,225,475 are included in 124,417 farms (Census of 1920), with 24,587,000 improved. The corn crop was 184,000,000 bushels, fourth in rank; wheat, 60,000,000, ranking third, and large quantities of oats, barley, rye, potatoes, buckwheat, flax, cloverseed and sorghum syrup, and sugar beets to some extent. Fruit raising is not extensive.

Nebraska is not rich in mineral wealth. In the west potash lies in considerable quantity in solvent form in several lakes, from which in the war about 61,000 tons, 45 per cent. of the relatively low United States production, was taken.

Manufactures relate chiefly to the utilization of soil products and center in Omaha, one of the greatest rail traffic centers in the United States.

The United States census of manufactures, 1927, reported 1,277 establishments (1,303 in 1925) with 26,110 employees (27,108) earning $34,296,241 ($35,936,371) and a product valued at $420,296,190 ($442,083,752). The chief industry was slaughtering and meat packing (wholesale), with 14 plants with 5,949 employees earning $8,021,980 and the output valued at $183,271,414 ($198,020,335). The 73 dairies had an output valued at $44,740,330 ($38,873,667); and the 115 flour mills an output valued at $30,302,843 ($29,155,490).

Railroad mileage, 1927, was 6,189.

The University of Nebraska has 10,000 students; the state has 16 colleges and normal schools.

Percentage of illiteracy is exceedingly low at 1.4; that of native whites being 4-10ths of 1 per cent.

although the percentage of foreign-born whites is 14.8. More than 300,000 attend the public schools of a population of 1,300,000.

The State has no bonded indebtedness.

NEVADA.

Area, square miles ..... *110,690* ..... *6th in rank*
Population, 1920 ..... *77,407* ..... *49th in rank*
Wealth, 1923 (Census est.) *$541,716,000*

Nevada, least populous of all States, less even than the District of Columbia, is of the mountain group in Western United States, bounded on the north by Oregon and Idaho, on the east by Utah and Arizona, on the south and west by California.

It is mountainous, and much of the high tablelands is arid or semi-arid. Irrigation is developing to large importance. The Federal Government has a project to reclaim 160,000 acres, which when comdlete will add not less than $20,000,000 to the annual crops. Agriculture is not varied, owing hitherto to lack of water, but as irrigation advances, diversification of products proceeds. Live stock interests are relatively large.

With only 77,407 persons indicated by the Census of 1920 (.7 to the square mile), there are 2,357,000 acres in farm areas, with 595,000 improved. The value of all crops, Census of 1920, was $13,980,000, and of the mineral output $48,528,000.

The output of gold in 1927 was $3,089,300; and in 1926 $3,532,400; silver in 1927 $3,046,434, and in 1926, $4,024,940; and copper in 1927, 118,298,342 pounds, and in 1928, 159,332,977 pounds. Lead, zinc, iron, quicksilver, tungsten, sulphur, graphite, borax, gypsum and quarry stones are produced also.

The forest area is more than 5,300,000 acres, of which 4,971,335 are set aside as national forests.

The United States census of manufactures, 1927, reported 116 establishments (102 in 1925) with 2,419 employees (2,670) earning $3,915,185 ($4,473,555) and a product valued at $26,815,907 ($21,626,668). The chief industry is copper melting.

Railroad mileage, 1927, was 2,137.

Illiteracy percentage was 5.9, of which native whites showed only 4-10ths of 1 per cent. Schools for popular education are well provided, with about 15,000 enrolled.

Nevada by law inflicts the death penalty by lethal gas, a spray of liquid hydrocyanic gas being turned into the stone death chamber. It is declared to have proved instantaneous and painless.

Reno has earned a reputation as a "divorce mill." In 1925 806 divorces were granted by her courts to 491 wives and 315 husbands; 530 children were affected. The legislature in 1927 made it possible to gain a residence in the State in three months and in 1928, 2,103 divorces (1,603 in 1927) and 38 marriage annulments were granted in Reno, and 2,977 marriages were performed In the whole state 2,529 divorces were granted in 1928, 1,953 in 1927 and 648 in 1926. The number of weddings increased from 2,398 in 1927 to 4,168 in 1929 due to a change in 1927 in the marriage laws of California where the state now requires three days notice before the issuance of a marriage license.

NEW HAMPSHIRE.

Area, square miles ..... *9,341* ..... *43d in rank*
Population, 1920 ..... *443,083* ..... *41st in rank*
Population, 1928 (est.) ..... *466,000* ..... *48.8 to sq. m.*
Wealth, 1923 (Census est.) *$1,347,135,000*

New Hampshire, the Granite State of New England, is bounded on the north by Canada, on the east by Maine and the Atlantic Ocean, on the south by Massachusetts, and on the west by Vermont. It was one of the Original Thirteen States.

Its northern parts are rugged, reaching in the White Mountains the highest elevations of the Northeastern United States (Mount Washington, 6,293 feet). There are 86 mountain peaks in an area of 1,270 square miles. Toward the sea, it is more level and agricultural and industrial by utilization of river water power. In the state are 600 lakes.

The United States census of manufactures, 1927, reported 1,028 establishments (1,038 in 1925) with 65,482 employees (66,658) earning $72,803,397 ($71,725,465) and the product valued at $327,528,366 ($327,400,651). The chief industry, cotton goods manufacturing, with 17 factories with 14,722 employees earning $15,142,435 and the output valued at $57,721,546 ($57,868,732). The 63 boot and shoe factories (other than rubber) with 12,114 employees earning $12,151,051 had an output valued at $49,853,099 ($52,631,681); the 31 paper and pulp mills with 5,021 employees earning $6,268,400 had an output valued at $43,161,852 ($37,060,624).

Railroad mileage, 1927, was 1,234.

New Hampshire has in all 5,779,000 acres, of which in farm lands there are 1,441,111 cultivated. Hay is the chief crop, followed by corn, potatoes, oats, and apples, with relatively large dairy output, milk being shipped to the New York market. The value of all crops in 1920 was $23,509,000.

The State has 4.4 per cent. of illiterates; native whites having 7-10ths per cent. and foreign-born 15.4. Public school enrolment was 70,000. Dartmouth College, at Hanover, is the leading educational institution, from which many eminent men have come, among them Daniel Webster. There are four other higher institutions.

The White Mountains are par exellence a summer resort for persons from all parts of the United States. A modern system of automobile highways is maintained, ribbing the mountains.

The Waterville-Notch with 6,000 acres of primeval Spruce was in 1928 added to the White Mountain National Forest now covering 435,000 acres; and the "Great Stone Face" in Profile Notch bought for a State park.

NEW JERSEY.

Area, square miles ..... *8,224* ..... *45th in rank*
Population, 1920 ..... *3,155,900* ..... *10th in rank*
Population, 1928 (est.) ..... *3,821,000* ..... *464.6 to sq. m.*
Wealth, 1923 (Census est.) *$11,794,189,000*

New Jersey, one of the Original Thirteen States, is in the Middle Atlantic region. It is bounded on the north by New York and Pennsylvania, on the east by the Atlantic Ocean and New York, on the south by the Atlantic and Delaware Bay and on the western side by Delaware Bay and Pennsylvania. It is mostly low and flat, having hilly development in the northern end, where an extensive State park has been set aside.

New Jersey has extensive water navigation facilities, with Delaware Bay and the Delaware River along its western side, the Atlantic on the east and the valuable facilities of New York harbor and branches on the northeast.

The State grades sixth in industrial strength, production being exceedingly varied, and, although the greater part is in Newark, it is well diffused in all parts. As a consequence, railway facilities are highly developed, and especially in the northern parts the electric railway lines are unusually extensive.

Economically and to a degree politically, New Jersey and New York City have common interests. Very many New Jerseyites work or transact business in the greater city, transit facilities being afforded by ferries and tunnels (or tubes) under the Hudson (or North) River.

Railroad mileage, 1927, was 2,292.

The United States census of manufactures, 1927, reported 8,312 establishments (8,204 in 1925) with 408,093 employees (425,377) earning $570,308,502 ($576,235,826) and a product valued at $3,417,450,248 ($3,539,181,253). The chief industry, petroleum refining, with 10 refineries with 8,360 employees earning $14,316,996 had an output valued at $273,341,828 ($297,288,102). The three copper smelters with 3,145 employees earning $5,071,547 had an output valued at $210,201,789 ($224,039,089); the 137 shops manufacturing electrical machinery, apparatus and supplies, with 22,734 employees earning $31,083,557 had an output valued at $173,932,303 ($151,471,610); the 819 silk factories with 24,482 employees earning $33,476,420 had an output valued at $163,967,060 ($190,712,394); the 170 factories for dyeing and finishing textiles with 19,470 employees earning $26,904,610 had an output valued at $91,732,052 ($92,442,884); the 346 foundries and machine shops with 19,303 employees earning $30,198,001 had an output valued at $112,966,808 ($110,202,345); the 95 chemical plants with 10,347 employees earning $15,882,798 had an output valued at $115,370,137 ($122,699,406); the 87 paint and varnish factories with 4,403 employees earning $6,648,097 had an output valued at $74,555,420; the 57 factories for manufacture of motor vehicles and parts with 6,701 employees earning $11,394,557 had an output valued at $92,326,677 ($132,168,456); the 16 worsted mills with 8,777 employees earning $10,731,246 had an output valued at $47,781,728 ($78,982,704); the 17 iron and steel works and rolling mills with 7,557 employees earning $10,852,455 had an output valued at $43,512,683 ($49,054,929).

The output of the 58 canneries was valued at $61,405,429; of the 38 meat packing houses, $77,537,055; of the 38 soap and perfume factories, $54,503,325; of the 57 tanneries, $42,961,937; of the 17 gold and silver refineries, $31,662,362; and of the 138 jewelry factories, $19,860,120.

New Jersey was seventh in rank in value of exports in 1928, $221,530,869; and sixth in 1927, $232,779,892, yielding place to Louisiana.

Its agriculture is affected most vitally by the proximity of the immense markets of the greater city and the fact that 78.7 per cent. of the popula-

tion is urban. Market gardening has advanced to large magnitude, very many foreigners, especially Italians, having gone out to work in that line. The 1920 census gave $87,484,000 as the value of all crops. The total land area of the State is 5,779,840 acres, with 1,441,000 cultivated. Corn, wheat, oats, potatoes of both kinds, rye, buckwheat and hay are the chief crops. Fruits are extensively grown, the cranberry marshes supplying about one quart for each of the population of New York City, and the same of strawberries. The peach and apple crops are always important.

New Jersey produces minerals abundantly—iron ore, and about one-fourth of the Nation's supply of magnetite, zinc and much clay products.

The educational institutions are important: Princeton University at Princeton is one of the country's foremost colleges. Rutgers College, New Brunswick, and Stevens Institute of Technology at Hoboken are well known, and there are five other colleges of prominence. More than 700,000 are enrolled in the schools, percentage of illiteracy being: Census of 1920, 5.1; native white, 6-10ths of 1 per cent.; foreign-born, 15.3. In Passaic, Bergen, Union and Middlesex Counties the proportion of foreign-born is 25 to 35 per cent.

Atlantic City, three-fourths of the way down the eastern coast, is one of the great seashore resorts in the country, Cape May and Asbury Park are others. The entire coast is replete with charm.

NEW MEXICO.

Area, square miles . . . . . *122,634* . . . . . *4th in rank*
Population, 1920 . . . . . *360,350* . . . . . *44th in rank*
Population, 1923 (est.) . . . . . *396,000* . . . . . *3.2 to sq. m.*
Wealth, 1923 (Census est.) *$851,336,000*

New Mexico, of the Mountain (southeast) group, is bounded on the north by Colorado, on the east by Texas, on the south by Texas and Mexico, and on the west by Arizona. The Rocky Mountains run north and south through the centre; the eastern part is of the flatter tableland of which Texas forms also a part, and in the south are bare, sterile, desolate peaks surrounded by arid and semi-arid plains and deserts of which the mirage is an interesting phenomenon. The central western portion has drainage by the Rio Grande River, and the Pecos River flows through the eastern districts.

The climate is dry, stimulating, with annual rainfall of from 12 to 16 inches in different localities, and with 100 degrees of heat not infrequent in summer, the mean for the year being about 50.

In 1920 the agricultural output was $40,619,000 and mineral $45,000,000. The manufacturing output, 1927 census, was $20,182,672.

The gold output in 1927 was $539,500; in 1926, $415,600; silver, 1927, $428,016; in 1926, $309,900; copper 1927, 79,761,222 pounds; in 1926, 82,848,096 pounds; lead in 1926, 3,480 short tons; zinc, 1926, 12,052 short tons; and petroleum 1927, 1,203,000 barrels, 1926, 1,666,000 barrels.

A unique feature of tillage is the production from dry farming, a modern scientific process, causing otherwise dry, almost arid lands to yield. There are more than 945,000 acres included in irrigation projects, with 550,000 actually under water. The 29,845 farms averaged 840 acres, and the chief crops are hay, corn, wheat, oats, barley, rye, kaffir, milo, all the vegetables, potatoes, cotton (123,000 acres in 1928) broom corn, sugar beets, the fruit industry being extensive.

Railroad mileage, 1927, was 2,998.

The state has 21,181 Indians on Government reservations (4,697,224 acres in 1920 with a valuation of $21,916,965 and income of $2,196,417); and 13,414 of Mexican parentage.

There are 18 Indian pueblos with a population of 10,565, an increase of 22 per cent. in twenty years.

Many go to the State for wintering, and artists have lately resorted there for the painting of Indian and old Spanish types and the things that remain from the aged Aztec civilization. Albuquerque, Santa Fe, Las Vegas and other cities are popularly sought by the tourists and artists and writers, who are provided with excellent travel facilities.

Students find deep interest in the history of the areas which once were the bed of a great inland salt sea, in which were deposited all the basic salts found in the ocean waters, and which are expected to yield later rich mineral wealth for fertilization of lands and chemical uses.

NEW YORK.

Area, square miles . . . . . *49,204* . . . . . *29th in rank*
Population, 1920 . . . . . *10,385,277* . . . . . *1st in rank*
Pop., 1925 (State Census) *11,162,151* . . . . . *226.8 to sq. m.*
Population, 1923 (est.) . . *11,550,000* . . *234.7 to sq. m.*
Wealth, 1923 (Census est.) *$37,035,262,000*

New York, the Empire State, since 1820 the most populous in the Union, is bounded on the north and west by Lake Erie, Lake Ontario, Ontario and Quebec, Canada; on the east by Vermont, Massachusetts and Connecticut; and on the south by the Atlantic Ocean, New Jersey and Pennsylvania.

Its sea front consists of the southern shore of Long Island, Staten Island, and the entrance into New York Harbor, one of the greatest in the world, and the chief port of the United States, into and out from which moves the greater part of the national commerce, foreign and domestic, passenger and freight. Long Island Sound, a wide arm of the Atlantic, which separates Long Island from Connecticut on the north, is navigable for deep sea craft. The Hudson River carries heavy ship tonnage northward from New York Harbor 150 miles to Albany. There is now a 27-foot channel as far as Hudson which is being extended to Albany. Large steamers and sailing craft also ply the two Great Lakes, and the St. Lawrence River, which forms part of the northwestern boundary. On the northern part of the eastern boundary line is Lake Champlain, 100 miles long, a historic waterway bearing much commerce and drained by the Richelieu into the St. Lawrence River at Sorel. New York Harbor also includes the shores of New Jersey. (See Index for Port of New York authority.)

New York has about 800 miles of navigable ocean, lake and river waterways, the State being penetrated by the New York State Barge Canal (Erie), through which there is capacity for the passage annually of 20,000,000 tons of freight. The canal also connects with Lake Champlain, so that inland tonnage may move between New York City, Buffalo, about 500 miles northwestward on Lake Erie; Oswego, on Lake Ontario, the ports on Lake Champlain northward so far as Rouse's Point at the Canadian border, and on into the St. Lawrence River; besides to several interior New York State points on other minor canal routes.

The Adirondack Mountains (first land to appear in the United States) occupy the northeast part of the State, and are dotted with beautiful lakes and rivers. In the east the Catskill Mountains, made famous by Washington Irving's story of "Rip Van Winkle," line the western bank of the Hudson. Across from New York City the Hudson's banks take the form of lofty rock palisades, beautifully conformed and colored, and on the edge of which is a spacious Interstate Park set aside by the States of New York and New Jersey. All of New York is marked with scores of lakes and smaller rivers navigable for pleasure craft. The drainage from the crest west from Utica is in four directions—southeastward into the Atlantic Ocean; northward into Lake Ontario at Oswego, and southward into the rivers that flow into Delaware and Chesapeake bays and into the Alleghany-Ohio-Mississippi.

The area of the Forest Preserve was 2,078,993 acres on Sept. 30, 1927.

The 49,204 square miles of area, equivalent to 31,490,560 acres, contains 1,550 square miles, or 992,000 acres, of inland waterways, leaving a net land surface of 47,654 square miles, or 30,498,560 acres. The chief economic interests are the national and international financial community of New York City, the foreign commerce in New York Harbor, now the heaviest in the world; the large manufacturing, and the rich agricultural resources.

The number of farms in 1925, by the Federal Census, was 188,754 (193,195 in 1920, which was a decrease of 10.4% in the decade). The acreage was 19,270,259, of which the crop land was 9,088,291 acres, and pasture land 7,402,578. Horses, in 1925, numbered 446,747 (536,171 in 1920); and milch cows, 1,373,447 (1,481,918 in 1920).

The 1920 census gave $417,046,864 as the value of all farm crops, to which the greater part of the 17.3 per cent. of rural population gave direct or contributory attention. Only California exceeded New York in production of hay and grapes, New York's grapes being from 30,677,555 vines, and the hay weighing 928,874 tons, Kansas coming next.

Literally everything characteristic of the temperate zone is produced in fruits, vegetables, grains and forage crops. New York led all States with 2,778,761 pear trees of bearing age, Michigan being next. In apple trees of bearing age, New York led the country, although Washington, with less trees, harvested more bushels. In acreage of small fruits, New York was second only to Michigan; and only California had larger acreage devoted to vegetables produced for sale. The State was second to Vermont in output of maple sugar, and led all the States excepting Maine in production of potatoes.

Only Pennsylvania led New York in quantity of buckwheat grown; in wool New York with Pennsylvania led all Northeastern States. In the value of dairy products, New York was easily second in the country; while in value of livestock products of farms, New York led. In pure-bred sheep on farms, New York was surpassed by only seven States,

while in pure-bred cattle New York was second only to Iowa.

Mineral resources are considerable, but in rank the State is below many others. Some iron ore, 767,743 long tons valued at $2,906,055 in 1928 is mined in the Lake Champlain region; petroleum (2,573,000 barrels in 1928) is produced near the Pennsylvania border, also natural gas. Graphite is produced, also the baser minerals for building and manufacturing purposes. The output of salt in Onondaga County, fringing Lake Ontario (in 1927 1,964,080 tons), has been a large industry. Value of the total mineral output for 1926 was $112,016,262 (in 1925, $102,035,557).

In manufacturing, commerce and finance, the figures are very large. More than one-half the export and import shipments of the United States pass through the Port of New York, to organize which into an economic and non-wasteful commercial agency the sovereign State of New York has created the Port of New York Authority, to work co-ordinately with a similar body created by the sovereign State of New Jersey, to the end that commerce flow be more facile. (See Index for details.)

The number of vessels entering the Port of New York in the fiscal year 1928-29 was 5,194 of 23,778,259 tons; of these 1,550 vessels of 5,703,054 tons, were American. The value of imports exclusive of bullion in 1928 was $1,949,982,707; and of exports, $1,769,684,571; and in 1927, imports $2,042,783,288; exports, $1,726,110,117.

The value of exports originating in the State of New York in 1928 was $861,578,924; in 1927, $769,766,896; in 1926, $761,249,789; and in 1925, $810,416,054.

Railroad mileage, 1927, was 8,373.

The commerce flowing through the New York State Barge Canals, and through the ports of Buffalo and Oswego, in 1928 totaled 3,089,998 tons, and includes very heavy haulage of grains grown in the Middle West, destined for European ports.

New York State in 1927-28 paid Federal income taxes amounting to $646,604,323 and in 1928–29, $744,781,797, nearly 25% of the whole amount collected.

Total resources of all financial and banking institutions, State and National, those subject to supervision by State and Federal authorities, in New York State on Jan. 1, 1929, were $16,307,848,273; deposits totalled $12,263,137,527. The Federal Reserve Bank of New York City transacts about one-third of the total business done by the Federal Reserve System of the United States.

Total resources of savings banks of the State were $4,964,126,464; of 141 trust companies, $7,732,733,668; and of 313 savings and loan associations, $401,460,686.

Population figures of the 1920 census of New York State show the presence of large representation of every civilized people on the globe, divided: 65.8 per cent. of native parentage; 13.9 of foreign parentage; 8.1 of mixed parentage, and 11.2 of foreign-born. About fifteen times as many Jews as are in Palestine live in the State (the total in New York City being 1,643,000), and almost as many Italians as in Rome. Germans numbered 295,650, and Irish 284,747, with 135,305 English.

The State Census of 1925 returned 9,667,956 citizens and 1,494,195 aliens in the State and 4,750,330 citizens and 1,123,026 aliens in New York City (total, 5,873,356). Returns for other cities were: Buffalo, 538,016; Rochester, 316,786; Syracuse, 182,003; Albany, 117,820; Yonkers, 113,647; and Utica, 101,604. The State has sixty cities with a total population of 8,505,563.

New York's Indian population numbered 5,503 in 1920, of which 4,458 live on seven reservations, the largest 50 square miles, being the Allegany reservation in Cattaraugus County; the next largest Cattaraugus, 21,680 acres. The Senecas form the most numerous tribe with 2,485 members. Many of the Indians have attained a high state of civilization, are intelligent and are good business men. Their tribal rights are regulated by treaties and statutes, and their Peacemakers' Courts work satisfactorily.

The percentage of illiteracy was reported at 5.1; native white, ½ of 1 per cent.; foreign-born, 14.2; Negroes, who have increased rapidly since the late war, 2.9 per cent.

During 1928 the public expenditure for public schools (including teachers' wages, debt service and capital outlay) was $324,405,895. The number of teachers was 68,716, of children of school age, 3,472,435, and of average daily attendance 1,768,364.

Nearly 2,000,000 attend the educational institutions, pr mary and higher, under control of the Board of Regents of the University of the State of New York (which see), and some of the most famous colleges and universities in the country are in New York State, among them Columbia University, with 36,688 resident students in 1928–29, the New York University, the College of the City of New York, Cornell University, Syracuse University, the University of Rochester, Hamilton College, Union University, Colgate University, Buffalo University, St. Lawrence University, Hobart College, College of St. Francis, Fordham University, Rensselaer Polytechnic Institute, and scores of special schools which are suited to every requirement in letters, science, engineering, finance, economics, sociology and art. Of the latter there are many of acknowledged merit, New York City being one of the art centres of the world.

At West Point, on the Hudson above New York, is the Military Academy of the United States Army, in a location famed for beauty. (See Index.)

Under the Medical Practice Act passed in 1926 New York is the first state to register qualified medical practitioners having proved requisite academical and medical education. The first annual roster issued May 12, 1927, contained the names of 16,098 medical practitioners, 321 osteopaths and 88 physio-therapists.

The interests of the Empire State are so varied along other lines that no listing is attempted here. More than 200,000 transient travellers enter the greater city daily, so it is estimated; and to Niagara Falls, near Buffalo, many more than 1,000,000 go each year. The Adirondacks and the Catskills have each summer hundreds of thousands of tourists and campers, the other lakes their tens of thousands. Safe waters on Long Island Sound are used by many yacht clubs, and the ocean beaches daily have large throngs.

(Detailed statistics follow under the classification of New York State: consult Index.)

The United States cens us of manufactures, 1927, which reported 36,650 establishments (33,392 in 1925), with 1,072,284 employees (1,066,198) earning $1,661,378,086 ($1,533,888,975), and a product valued at $9,400,061,376 ($8,968,262,479).

The leading industry in value of output was the manufacture of clothing: Women's (outer) $1,163,589,568 ($1,025,648,160) from 5,494 establishments with 90,004 employees earning $146,096,825, and men's (outer) $443,639,188 ($470,033,681) from 1,785 establishments with 49,523 employees earning $73,547,369. Fur goods output valued at $244,941,302 ($197,437,970); corsets, $27,605,595 ($25,505,993); hats and hat materials of all kinds, $60,185,333 ($61,411,622); millinery, $133,961,262 ($197,328,664); skirts, $91,887,722 ($94,610,733); leather gloves, $23,850,506 ($19,707,861); men's collars, $12,339,152 ($26,161,244); boots and shoes, other than rubber, $190,936,330 ($191,375,288); and men's furnishing goods, $71,895,573 ($50,052,350), indicate the value of kindred products.

Printing and publishing is second in importance, the output of newspapers and periodicals being $390,815,941 ($358,009,036), 1,266 establishments having 18,726 employees earning $44,579,716; book and job, $241,840,111 ($190,295,541) with 2,341 establishments with 30,836 employees earning $241,840,111); and music, $9,255,496 ($8,977,031). The value of paper and pulp produced was $157,146,475 ($141,396,762); and of lithography, $37,386,367 ($35,634,338).

New York is third in importance among the States in the textile industry, cotton goods output, $34,782,012 ($39,332,185); silk manufactures, $100,447,466 ($112,156,313; (woolen goods, $13,368,908 ($14,929,710); worsted goods, $17,675,747 ($17,103,763). In knit goods it is first with $159,818,016 ($183,223,931) with 577 factories with 31,825 employees earning $33,953,021.

New York State is fourth in rank in the value of slaughter-house and meat packing products (wholesale), $244,150,680 ($233,901,277); the output of butter, cheese and condensed and evaporated milk is valued at $51,271,725 ($56,469,557); flour and feed, $166,971,274 ($151,599,561); cane sugar refining, $155,217,848 ($164,515,037); cigars and cigarettes, $93,267,526 ($122,613,390); ice cream, $41,751,468 ($36,878,140); confectionery, $62,108,480 ($64,472,109); chocolate and cocoa, $31,325,904 ($25,406,861).

New York was fifth in the value of products of steel (being exceeded by Pennsylvania, Ohio, Indiana and Illinois). The output of 27 steel works and rolling mills with 15,400 employees earning $24,930,532 was $112,859,480 ($107,059,150); of other foundry and machine shop products, $253,074,968 ($257,655,999), and of electrical machinery, $243,209,371 ($239,262,117); and motor vehicles and parts, $278,945,668 ($261,445,894). It might be noted that the value of the output of perfumery, cosmetics and toilet preparations was $83,494,619 ($53,116,191); of soap, $41,611,115 ($37,586,241); of patent medicines, $50,132,237 ($49,949,662; of beverages, $38,400,200 ($39,830,002); of chewing gum, $23,202,132 ($19,994,622); of flavoring extracts, $20,023,202 ($16,822,713); of jewelry, $55,664,655 ($59,506,569);

of pianos, $28,431,507 ($38,031,499); of pocketbooks and card cases, $42,802,339 ($31,564,687).

New York City is the largest manufacturing city in the country, the value of its products in 1927 being $5,722,071,259 ($5,324,413,612 in 1925). Wages paid increased from $344,648,136 in 1925 to $904,646,427 in 1927; the number of employees from 538,845 to 552,507; and the number of manufacturing plants from 23,714 to 27,062; the latter figure is 14% of the number in the nation, and 73% of the number in the State. Of the value of products in 1927 given above the borough of Manhattan furnished $3,813,495,044; the borough of Brooklyn, $1,081,923; the borough of Queens, $479,945,459; the borough of the Bronx, $155,245,385; and the borough of Richmond, $87,927,620.

NORTH CAROLINA.

Area, square miles ..... *52,426* ..... *27th in rank*
Population, 1920 ..... *2,559,123* ..... *14th in rank*
Population, 1928 (est.) ..... *2,938,000* ..... *57.0 to sq. m.*
Wealth, 1923 (Census est.) *$4,543,110,000*

North Carolina, a South Atlantic State, of the Original Thirteen, is bounded on the north by Virginia, on the east by the Atlantic Ocean, on the south by the Atlantic, South Carolina and Georgia, and on the west by South Carolina and Tennessee. Physically, it is divisible into three distinct parts—a sloping sandy coastal plain from the low-lying 300-mile sea line on the east, a tableland in the central portion, and a mountainous western one-third running into the Appalachian range, Mt. Mitchell, 6,711 ft., the maximum. The climate grades from sub-tropical in the east, to milder on the tableland and relatively cool and stimulating in the mountains.

There are many islands off the northern half of the coastline, with Pamlico Sound and its tortuous shores affording many inlets and potential harbors, a favorite resort for hunters. Cape Hatteras, the easternmost point, with its shoals, is feared by mariners as especially stormy and dangerous.

Of the 35,000,000 acres in the State, originally about 11,000,000 were forested, chiefly with yellow pine, of which it is estimated that 15,000,000,000 feet remain on about half a million acres. The annual lumber cut is about 1,000,000,000 feet, the market being largely in the North, considerable coming to New York coastwise in vessels.

Agriculture's principal crops, Census of 1920, were valued at $503,229,000. Farms numbered 269,763 with 20,021,736 acres, of which 8,198,409 were improved. In cotton production the State ranked eighth in 1928 with 836,474 bales from 1,860,000 acres. The production in 1926 was 1,212,819 bales from 1,985,000 acres. The reduction in 1928 was due to very heavy weevil damage.

North Carolina was the first tobacco State in 1928, producing 475,230,000 pounds valued at $87,918,000 from 730,000 acres. It produced 199,500 pounds of peanuts in 1928 valued at $9,776,000 from 210,000 acres; also large crops of corn, wheat, rye, potatoes and fruits are grown.

In minerals, the State ranks first in production of mica, and there is much magnetic iron ore, and some lead, zinc, copper, gold, silver, corundum, tin, feldspar, talc and graphite.

North Carolina has developed into an important manufacturing State. It is second only to Massachusetts in the production of cotton goods, its mills in 1928 numbering 429 in operation, with 6,132,564 spindles and 88,051 active looms, and consuming 1,596,564 bales of cotton.

The United States census of manufactures, 1927, reported 2,984 establishments (2,614 in 1925) with 204,590 employees (182,234) earning $158,394,434 ($134,237,097) and a product valued at $1,154,646,612 ($1,050,434,117). The chief industry was the manufacture of cigars and cigarettes, with 14 factories with 14,081 employees earning $11,582,745 and an output valued at $392,050,130 ($312,736,113). The 374 cotton goods mills with 95,786 employees earning $66,149,690 had an output valued at $310,299,138 ($316,068,931); the 128 knitting mills with 17,427 employees earning $11,961,326 had an output valued at $61,365,806 ($44,300,819); the 143 furniture factories with 14,821 employees earning $12,417,590 had an output valued at $53,551,220 ($51,208,238); and the 597 establishments for lumber and timber products with 18,403 employees earning $12,933,467 had an output valued at $38,764,039 ($54,062,615).

Railroad mileage, 1927, was 5,347.

Over 99 per cent. of the population are native born Americans.

The Negro constitutes 31.6 per cent. of the population, Census of 1920, and the State percentage of illiteracy is 13.1, having been 18.5 in 1910. Illiteracy of native whites is 6.8. Public school enrolment is 725,000, with compulsory instruction.

The chief higher institutions are the State University, Chapel Hill, Duke University, Durham (formerly Trinity College, enriched by a $15,000,000 gift from James B. Duke in 1925), and the Agricultural College, West Raleigh. Expenditure for public schools in 1926 was $34,691,669.

North Carolina adopted the budget system in 1925 (effective July 1), making the Governor the real financial head of the State.

A striking feature has been the very large migration of residents of the mountains to the cotton mill towns, where they remain as operatives, whole families accepting employment, including children.

Asheville is the chief resort, being popular in the winter; its golf course is one of the most famous in the country.

NORTH DAKOTA.

Area, square miles ..... *70,837* ..... *16th in ran*
Population, 1920 ..... *646,872* ..... *36th in ran*
Pop., 1925 (State Census) ..... *641,192* ..... *9.0 to sq. m.*
Wealth, 1923 (Census est.) *$2,467,772,000*

North Dakota, in the West North Central group, formed part of the original territory of Dakota, is bounded on the north by Canada, on the east by Minnesota, on the south by South Dakota, and on the west by Montana. It is drained in the southeastern one-third by the Missouri River, and in the northeast by the Red River, which stream is the line between North Dakota and Minnesota, and the valley of which, an old lake bed, is exceedingly fertile. "Number One Northern Hard" wheat originated there, and is a premium grade of that cereal. The surface in the eastern two-thirds is a vast rolling plain, once with scant rainfall, but now, since cultivation advanced westward, having precipitation enough for the large crops produced.

Agriculture is easily the chief interest, with the value of all crops reported in the 1920 census at $301,782,000, against $57,374,000 for all manufactured products, and that mostly of flour and other grain products consumed locally.

Every cereal and other crop known to the north temperate zone is produced, wheat being the principal crop, 61,540,000 bushels reported in the 1920 census, grown on about 9,000,000 acres, worth $147,696,000; rye, barley and corn being also extensively produced, and the total value of all cereals given at $215,764,000. Hay is raised heavily, more than 4,000,000 tons, worth $56,000,000. On 650,000 acres, 2,972,000 bushels of flaxseed were raised, highest production in the country, the value being $1,000,000.

Much of the grain and practically all of the forage crops are for local feeding to livestock, that industry being very important. More than 2,300,000 domestic animals were reported by the 1920 census. In the State were 77,690 farms with an acreage of 36,214,751, of which 24,563,178 were improved.

The United States census of manufactures, 1927, reported 307 establishments (320 in 1925) with 3,260 employees (3,261) earning $4,808,122 ($4,574,698) and a product valued at $47,003,022 ($44,631,516). The 42 dairies had an output valued at $15,460,469; and the 27 flour mills, $11,042,358.

A vast proportion of the western part is underlaid by brown or low-grade coal, which is produced not extensively and only for local domestic consumption, the State depending on the mines of other States for supply. Production 1928, 1,828,000 tons.

Railroad mileage, 1927, was 5,277.

North Dakota, with total population of 646,872, Census of 1920, had 131,590 or 27.1 per cent. of foreign-born whites. The percentage of illiteracy is very low at 2.1; native white, 4-10ths of 1 per cent.; foreign-born white, 5.6. Foreign-born whites in order of numbers were Norwegian, Canadian, Russian and German.

North Dakota has been the theatre of several advanced social and economic experiments, the State under the leadership of the Non-Partisan League, entering basic business enterprises, including banking, and co-operative grain elevators.

The recreation for outsiders is the big hunting in the west and on the prairies for game birds, the prairie chicken predominant, and the lakes and rivers abounding in geese and ducks.

OHIO.

Area, square miles ..... *41,040* ..... *35th in rank*
Population, 1920 ..... *5,759,394* ..... *4th in rank*
Population, 1928 (est.) ..... *6,826,000* ..... *166.3 to sq. m.*
Wealth, 1923 (Census est.) ..... *$18,48 ,552,000*

Ohio, an East North Central State, is bounded on the north by Michigan and Lake Erie, on the east by Pennsylvania and West Virginia, on the south by West Virginia and Kentucky, and on the

west by Indiana. It has no considerable elevations, being highest in the centre, and sloping in each direction to the lake on the north and to the Ohio River, a great traffic route, on the southern boundary line. Its climate is characteristic of the north temperate zone, with abundant rainfall.

Ohio has navigable waterways for the 430 miles of the Ohio, the 230 miles of lake frontage, and 100 miles up the Muskingum River in the southeast. It sends much tonnage down the Ohio. Rail transport is very heavy in all directions. Railroad mileage, 1928, was 8,831.

Manufacturing, mining and oil are the chief interests. The iron and steel ore and reduction and machinery industries lead all others, with 29,649,245 tons of ore received at the Lake Erie port of Cleveland, heaviest handler of ore in the world. Cleveland, Youngstown, Canton, Steubenville and Middletown are the principal iron and steel working points. Manufacturing is very extensive in other lines. Of the 264 industries classified by the Census of 1923, Ohio has considerable production in all but forty-six, ranking first in eighteen of them, and second in iron and steel products. The output of pig iron in 1928 was 9,266,936 long tons,valued at $156,883,186.

The United States census of manufactures, 1927, reported 10,961 establishments (11,131 in 1925) with 669,097 employees (676,661) earning $968,181,165 ($975,738,405) and a product valued at $5,230,323,268 ($5,345,592,745). The leading industry was the manufacture of iron and steel with 86 steel works and rolling mills with 81,562 employees earning $143,947,323 and the output valued at $672,201,290 ($789,542,038), and 28 blast furnaces with 6,496 employees earning $11,553,615 and the output valued at $159,719,253 ($178,722,017). The 38 factories for the manufacture of rubber tires and inner tubes with 51,780 employees earning $82,260,053 had an output valued at $565,074,244 ($556,262,424); the 176 plants for motor vehicles and parts with 38,899 employees earning $62,349,328 had an output valued at $441,472,642 ($514,775,843); the 851 foundries and machine shops with 53,202 employees earning $80,916,217 had an output valued at $323,648,909 ($345,222,837); the 206 electrical plants, for machinery, apparatus and supplies, with 24,423 employees earning $32,386,890 had an output valued at $188,763,978 ($181,351,409); and the 96 structural iron works with 7,964 employees earning $12,666,274 had an output valued at $52,918,317 ($52,630,751). The 1,251 printing and publishing plants with 19,155 employees earning $32,137,699 had an output valued at $175,659,959. The 120 slaughtering and meat packing houses (wholesale) had an output valued at $137,081,128 ($128,777,955); the 148 factories making men's clothing had an output valued at $64,615,217 ($78,001,683); and the 48 boot and shoe factories an output valued at $53,289,298 ($51,546,890). The 132 steam railroad construction and repair-shops with 28,432 employees earning $46,904,135 had an output valued at $86,609,324.

The 162 dairies had an output valued at $43,627,464 ($53,065,098). The 58 paper and pulp mills had an output valued at $75,219,293 ($75,923,880); the 104 paint and varnish factories an output valued at $60,453,960; and the 12 petroleum refineries an output valued at $52,892,071 ($63,296901). Pottery and clay products totaled $93,056,596. Ohio was tenth in rank in value of exports in 1928, $196,518,388; and in 1927, $186,091,545.

The State ranks sixth in mineral wealth extracted, 45,000,000 tons of bituminous coal were lifted in 1920 by 50,000 miners who received more than $48,000,000 in wages. Output in 1926 was 27,872,488 short tons in 1927, owing to the strike, 15,800,000 tons; and in 1928, 15,095,000 tons.

Its mineral wealth includes coal, iron, glass sand, clays, salt, petroleum, natural gas, limestone, sandone, gypsum,, lime, mineral waters, some potash and pyrite.

Oil production is very great, especially in the Lima district, the output in 1928 being 7,000,000 barrels; 1927, 7,520,000. The output of natural gas in 1926 was 47,363,000 M. cubic feet valued at $25,403,000.

The output of automobiles in the Toledo and Cleveland districts is second only to that of Detroit, mostly of medium or higher grades.

But the agricultural wealth also is great, value of all crops and livestock sold being as reported in the 1920 census $904,400,000, which was exceeded by only four other States. Principal crops are cereals, hay, potatoes, tobacco, vegetables, sugar beets, and all products of the zone. Corn totalled 149,844,000 bushels; oats, 46,000,000; hay, 7,600,000 tons; tobacco, 64,420,000 pounds; and canning of fruits and vegetables was extensive, the fruits being those of the north temperate zone, the 1920 report showing the value of the output more than $19,000,000. Number of farms, 256,695, with acreage of 23,515,888.

Much high-bred livestock is raised, and the meat packing industry is highly developed.

Illiteracy is low at 2.8 per cent.; native white, 9-10ths of 1 per cent.; foreign-born, 12.6, and Negro, 8.1. Foreign-born number 12.5 per cent. of the population, and are in the industrial centres chiefly, although throughout the agricultural districts the German native-born element is numerous, having come when the revolutionary movement broke out in Germany in the last century.

The State has very many institutions of higher education, the Ohio State University at Columbus, the capital, leading with 13,000 students, others being Cincinnati University, 4,000; Western Reserve University at Cleveland, 5,000; Ohio Wesleyan University at Delaware, 1,900; Oberlin at Oberlin, 1,850; and eight others with about 4,000 attendance. Public school enrolment is more than 1,000,000.

Ohio is distinguished among the States for the tenseness of its political life. It is regarded as a politically pivotal State, and has given the United States five Presidents, all native born, while two others, elected as residents of other States, were born in Ohio.

OKLAHOMA.

Area, square miles ..... *70,057* ..... *17th in rank*
Population, 1920 ..... *2,028,283* ..... *21st in rank*
Population, 1928 (est.) ..... *2,426,000* ... *34.6 to sq. m.*
Wealth, 1923 (Census est.) *$3,993,524,000*

Oklahoma, in the West South Central group originally set apart for Indian reservations, and formerly known as Indian Territory, is bounded on the north by Kansas, on the east by Arkansas and Missouri, on the south by Texas, and on the west by Texas, a small panhandle strip also touching New Mexico and Colorado. It was the home of five Indian tribes—Cherokees, Creeks, Choctaws, Chickasaws and Seminoles, whose descendants remain as a large part of the present population, numbering 119,255 in 1920, holding 19,551,890 acres with a valuation of $320,496,333 and an income of $39,393,608.

Oklahoma is mostly a vast plain of rolling, fertile prairies, rising in the west to maximum elevations of 4,000 feet, one being 4,700 feet, with mountains in the south central and southwestern portions. It has a fair share of forested area, yellow pine predominating, with about 200,000,000 feet the normal annual cut, and 4,800,000,000 feet of timber standing. It has a healthful climate, rather warm in summer, with good precipitation for watering the large areas of agricultural lands, agriculture, raising of livestock and immense oil production being the main interests. The State ranked second in mineral production in 1927.

The 1920 census gave $522,565,000 as the value of all crops, cotton, 1,006,242 bales, ranking the State fourth; corn, 74,000,000 bushels; wheat, 52,640,000; oats, 49,500,000; and heavy production of other cereals and the basic vegetables with all fruits of the temperate zone abounding.

Dry farming is practiced extensively in the western portions. Farms number 191,788, with acreage of 31,951,934. Cotton production in 1928 was 1,204,625 bales from 4,243,000 acres; in 1927 (the flood year) 1,037,141 bales from 3,601,000 acres; and in 1926, 1,772,784 bales from 4,676,000 acres. The reduction due to the boll weevil in 1928 was 26%, and in 1927 31% from a full yield per acre.

It is only twenty years since oil was discovered in Oklahoma, yet it has risen to the first rank as a producer. The 1928 figures on production were 249,558,000 barrels, and in 1927, 277,274,000 barrels. Much of the oil land is owned by persons formerly in moderate circumstances. Indians, wards of the Nation, received $36,659,810 in royalties in 1923 from oil and gas leases on their lands, their oil bonuses ranging from 12½% to 20% on a total production of 53,914,477 barrels. The field is like that of Texas. Of natural gas 326,864,000 M. cubic feet valued at $21,508,000 was produced in 1927.

The United States census of manufactures, 1927, reported 1,373 establishments (1,274 in 1925) with 27,932 employees (26,163) earning $35,785,266 ($34,035,813) and the product valued at $371,718,409 ($400,291,825). The leading industry, petroleum refining, with 46 refineries with 5,207 employees earning $7,749,884 had an output valued at $153,278,576 ($182,007,298). The 64 flour mills had an output valued at $25,950,079; and the 45 cottonseed oil, cake and meal factories had an output valued at $20,295,804. Zinc smelters and refineries had an output valued at $15,207,105.

Zinc production was 272,567 short tons valued at $40,885,050 in 1926, and lead 69,704 tons valued at $11,152,640; and coal, 3,050,000 tons.

Railroad mileage, 1928, was 6,802.

The percentage of illiteracy is 3.8; native whites 2.3; Negroes, 12.4; and foreign-born whites, 14; Negroes being about 10 per cent. of the whole.

The public school enrolment is about 600,000 with several promising higher institutions. Expenditure for public schools in 1926 was $28,999,229.

OREGON.

Area, square miles.....96,699.....9th in rank
Population, 1920.....783,389.....34th in rank
Population, 1928 (est.).....902,000.....9.3 to sq. m.
Wealth, 1923 (Census est.).....$3,419,459,000

Oregon, of the Pacific (northwest) group, is bounded on the north by Washington, on the east by Idaho, on the south by California and Nevada and on the west by the Pacific Ocean.

It has every character of climate and soil and production known to the temperate zone, the lands ranging from the heavily vegetated coast areas where rainfall is abundant, to the large stretches of semi-arid lands of the southeastern parts, with a touch here and there of almost desert, although negligible in extent.

The coast climate is salutary, never very cold, and seldom very hot. That of the eastern portion, east from the Cascade Mountains, is drier and often colder.

It has very important navigation facilities—the Columbia River flowing into the Pacific with a width at the mouth of up to 14 miles, the river carrying tonnage along the whole of the 400 miles of its seaward course from the Idaho line; and the Snake, running along the northern half of the eastern boundary, already conveying much traffic and being susceptible of greater development.

Into Oregon pour the products of "The Inland Empire," a region comprising 250,000 square miles in Eastern Oregon, Eastern Washington and Northern Idaho, the Columbia being the waterway outlet, and the railways following the water grades from the Empire through the Columbia River Gorge to Portland, the "Rose City," which is actually on the Willamette River, ten miles from the Columbia, but economically on the Columbia.

The products of that Inland Empire are most varied, as are those of Oregon, which are very large fruit production, immense salmon fisheries, most extensive cereal production, and timber from forests that are the most extensive of any American State. It being estimated that the standing timber is 500,000,000,000 board feet.

The part of Oregon west from the Cascade Mountain range, which has peak elevations up to 12,000 feet, is slashed north and south by the Coast Range, very aged ridge now eroded to lower levels. The whole of the western one-third of the State has abundant rainfall, the average precipitation at Portland being about that of Chicago or New York.

Oregon has almost one-half of more than one trillion feet of timber standing in the three Coast States, Oregon, Washington, and California. Some of the trees are more than 300 feet high. In the southwest are found forests of the redwoods, with at least 20 other varieties of timber in abundance, some of it excellent for furniture manufacture, which is a considerable industry. The cut of timber is the third in the United States, Washington and Louisiana exceeding. The lumber is shipped to all foreign markets, more than a billion feet comes by the Panama Canal to the Atlantic Coast, and much is distributed by rail to the Middle West.

The fruit industry is among the most important in the country. Especially in apples the world calls for Oregon products, and the varieties of fruit grown include also peaches, pears, prunes—ranked the best known—apricots, plums, etc. Hood River, Medford, The Dalles and other towns are the centres of highly developed fruit raising.

In agriculture, development has been rapid, there being about 1,000,000 acres under water, and more than 2,000,000 included in irrigation projects, Federal and private. The lands not needing irrigation, which are very extensive, produce richly. The 1920 census returned $131,884,000 as the value of all crops; wheat, about 20,000,000 bushels; more than 2,100,000 tons of alfalfa; hops, 4,783,000 pounds; and more than 8,000,000 bushels of oats. Farms number 50,206, with 13,542,318 acres.

In livestock the State is productive. The wool clip was 16,000,000 pounds, and $17,000,000 was realized from dairy products. The Coast States are especially fine for dairying.

Although undeveloped as yet, there are all the basic minerals in Oregon. Gold, silver and copper are mined, with also stores of lead, oil, quicksilver, chromic iron ore, platinum, and all the clays.

The United States census of manufactures, 1927, reported 1,779 establishments (1907 in 1925) with 61,401 employees (59,563) earning $75,716,972 ($78,190,094) and a product valued at $342,852,371 ($352,763,595). The 414 lumber products mills and planing mills, with 36,284 employees earning $43,014,973 had an output valued at $121,941,142 ($130,496,672). The 49 flour mills had an output valued at $21,201,405; the 118 dairies, $15,843,494; the 12 paper and pulp mills, $20,002,341; and the 17 meat packing houses, $15,310,566.

The salmon fisheries centering in Astoria, at the mouth of the Columbia, are among the world's greatest, the pack in 1926 being 346,200 cases (426,200 cases in 1925).

Railroad mileage, in 1928, was 3,362.

In illiteracy Oregon ranks with Iowa, Nebraska and Idaho as the lowest in the country, the percentage being 1.5, that of native-born 4-10ths of 1 per cent. There are several colleges, the State University at Eugene, the celebrated Agricultural College at Corvallis, with about 4,000 students, Reed Institute at Portland, and others.

Oregon initiated the national movement for direct primaries, the initiative and referendum, and the recall, and adopted Prohibition independently of the national amendment.

Its great Columbia Highway, unexcelled for scenic beauty, running up the river from Portland; Mt. Hood and other lofty mountains, and the unique Crater Lake, are points of tourist interest.

PENNSYLVANIA.

Area, square miles.....45,126.....32d in rank
Population, 1920.....8,720,017.....2d in rank
Population, 1928 (est.)...9,854,000...218.3 to sq. m.
Wealth, 1923 (Census est.).....$28,833,745,000

Pennsylvania, of the Middle Atlantic group, is bounded on the north by Lake Erie and New York, on the east by New York and New Jersey, on the south by Delaware, Maryland and West Virginia, and on the west by West Virginia and Ohio. It is one of the Thirteen Original States.

It is of varied topography, like most Atlantic States, having leveler lands to the east, and rising to higher altitudes to the westward. The Appalachian range traverses the central part from northeast to southwest, a higher mountain region being in the extreme west, and another lower plane running down to the shores of Lake Erie. It has rivers important in navigation—the Susquehanna, the Delaware and the Allegheny and the Monongahela, which unite at Pittsburgh to form the Ohio.

Pennsylvania easily ranks first of the States in mineral production, the value of its output in 1926, $1,055,766,077, being 17% of the total for the country. It is second to New York only in the value of its industrial output, $6,715,563,455, in 1927.

The output of petroleum in 1928 was 9,876,000 barrels (in 1927, 9,596,000); natural gas in 1926, 107,089,000 M. cubic feet valued at $50,040,000; bituminous coal, 1928, 124,720,000 short tons, 1927, 131,007,000 tons; anthracite coal, 1928, 74,552,312 tons, (1927, 80,652,000 tons); and coke, 1927, 16,647,264 short tons (1926, 21,922,976 tons valued at $96,318,119).

The State has built its industries largely on these basic elements. It produced nearly half the steel of the country, shipping it to all parts of the world. Its production in pig iron in 1927 was 11,145,334 long tons and in 1928, 12,289,455 tons. Pittsburgh is the centre of the greatest metal production ever attained in one locality. Its supplies of iron ore come mostly from Minnesota, and its operations have made more millionaires than any other single industrial centre in the country. It was there that the late Andrew Carnegie built up his fortune, developing new steel making processes. The perfected tonnage from Pittsburgh is the heaviest, excepting at New York and Chicago. Electrical goods and equipment are made in Pittsburgh in large quantity.

The United States census of manufactures, 1927, reported 17,314 establishments (17,298 in 1925) with 987,414 employees (999,460) earning $1,315,993,319 ($1,324,481,001) and a product valued at $6,715,563,455 ($6,901,762,098). The 165 steel works and rolling mills with 137,568 employees earning $223,629,312 had an output valued at $1,012,297,366 ($1,086,935,222), and the 33 blast furnaces with 8,330 employees earning $14,018,331 had an output valued at $244,501,253 ($275,526,857). The 490 silk mills with 59,608 employees earning $57,661,075 had an output valued at $306,524,028 ($329,121,498); the 107 cotton goods mills with 12,160 employees earning $17,060,128 had an output valued at $75,001,362 ($79,116,369); the 67 worsted mills with 10,546 employees earning $11,491,549 had an output $63,790,023 ($82,682,258); the 79 woolen mills with 6,718 employees earning $8,106,544 had an output valued at $41,832,191 ($46,466,746); and the 487 knit goods mills with 51,967 employees earning $63,393,860 had an output valued at $234,166,337 ($230,069,530).

The 888 foundries and machine shops with 53,801 employees earning $78,037,139 had an output valued at $303,116,526 ($307,693,851); the 136 shops making electrical machinery, apparatus and supplies with 37,020 employees earning $52,415,303 had an output valued at $247,442,426 (236,843,492); the 1,645 printing and publishing plants with 24,647 employees earning $41,225,240 had an output valued at $255,-333,000 ($175,472,647); the 171 steam railroad construction and repair shops with 56,784 employees earning $88,837,030 had an output valued at $193,-988,387; and the 48 petroleum refineries with 9,126 employees earning $14,185,370 had an output valued at $186,568,769 ($189,839,486). The 1,900 bakeries with 22,385 employees earning $29,-849,988 had an output valued at $164,863,331; the 152 slaughtering and meat packing hcuses, wholesale, with 5,443 employees earning $8,179,992 had an output valued at $131,473,427 ($128,347,290); the 67 tanneries with 9,305 employees earning $11,696,-717 had an output valued at $101,814,881 ($87,-383,057); the 460 cigar and cigarette factories with 30,028 employees earning $22,575,034 had an output valued at $124,324,967 ($123,474,097); and the 419 men's clothing factories with 17,378 employees earning $20,176,368 had an output valued at $97,338,993 ($101,336,738). The 127 structural iron works with 10,687 employees earning $16,357,499 had an output valued at $90,711,633 ($96,836,624); the 3 cane sugar refineries with 1,987 employees earning $3,293,-706 had an output valued at $95,684,436 ($104,047,-877); the 72 glass factories with 18,205 employees earning $22,636,627 had an output valued at $78,-670,803; the 68 paper and pulp mills with 8,891 employees earning $12,809,214 had an output valued at $88,429,947; and the 100 factories making motor vehicles and parts with 11,791 employees earning $17,935,238 had an output valued at $88,561,658. The 395 factories making women's clothing with 11,-730 employees earning $11,219,404 had an output valued at $60,359,462 ($52,411,298); and the 145 factories for dyeing and finishing textiles with 8,902 employees earning $11,497,742 had an output valued at $54,491,269.

Pennsylvania was the fifth state in value of its exports of merchandise, in 1928, $292,087,241.

The principal port is Philadelphia, which receives and sends to all world ports. It was the capital of the United States, 1790 to 1800.

Scranton is the greatest hard coal centre of the country, and makes much steel.

Erie on Lake Erie is the lake port.

Railroad mileage, 1927, was 11,338.

Pennsylvania produced, Census of 1920, more than $500,000,000 of crops. The region around Reading, Lancaster and York, with English names, is the seat of the famous German (Pennsylvania Dutch) agricultural development, perhaps not equaled in any other section of the United States.

Production is varied in all parts of the State: the cereals, forage crops, fruits, and all that the temperate zone raises. The crops are spread evenly through the whole list, with large diversification and consequent steadiness of prosperity. Tobacco raised was 43,560,000 pounds from 33,000 acres in 1926. The State has 202,250 farms, with a total acreage of 17,657,513.

In educational facilities the State ranks high. The principal higher educational institutions are the University of Pennsylvania at Philadelphia, the Pennsylvania State College, the University of Pittsburgh, and the Carnegie Institute of Technology at Pittsburgh, Lafayette College, Lehigh University at Bethlehem, Temple University, Bucknell University, Dickinson College, Alleghany College, Duquesne College, Grove City College, Pennsylvania College, and Swarthmore College, there being three colleges for women, at Bryn Mawr, Pittsburgh and Chambersburg.

Public school enrolment exceeds 1,600,000, and the rate of illiteracy is 4.6 per cent.; native white, 8-10ths of 1 per cent.; foreign-born, 18.9; Negro, 6.1. Of the total of 8,720,017 persons, the native white population is 80.8 per cent.; foreign, 18.8. In the industrial districts reside the bulk of the foreigners, the Census of 1920 showing in all 1,387,850, of which 120,194 were German, 90,666 Irish, 122,755 Austrian, 222,764 Italian, 161,124 Russian, 171,380 Hungarian, the Slavic strain being numerous. The urban population is 63.3 per cent.

The Legislature in 1923 enacted a law to establish a system of old-age pensions, the maximum rate to be one dollar a day, the applicant to be over sixty, a citizen and resident of the State for over fifteen years. For a preparatory survey $25,000 was appropriated, and it is estimated the full operation of the law may require an expenditure of $10,000,000 yearly.

In the mountains are many popular summer resorts, with many fine country seats developed by the wealthy from old farm estates.

RHODE ISLAND.

Area, square miles . . . . . 1,248 . . . . . 48th in rank
Population, 1920 . . . . . 604,397 . . . . . 38th in rank
Pop., 1925 (State Census) . . 679,260 . . . . . 544.2 to sq. m.
Population, 1928 (est.) . . . . . 716,000 . . . 573.7 to sq. m.
Wealth, 1923 (Census est.) $1,924,326,000

Rhode Island, smallest of States, of the Original Thirteen, and in New England, is bounded on the north and east by Massachusetts, on the south by the Atlantic Ocean and on the west by Connecticut. Only 1,060 square miles of it is land. With 573.7 per square mile, it is the most densely populated State. It exceeds all others in per capita industrial output; it is 97.5 per cent. urban, and exerts influence out of all proportion to size and population.

The United States census of manufactures, 1927, reported 1,497 establishments (1,595 in 1925) with 120,009 employees (120,346) earning $138,895,884 ($138,125,781) and a product valued at $592,232,647 ($621,919,637). The 71 worsted goodsmills with 21,-114 employees earning $22,338,332 had an output valued at $118,310,113 ($125,503,602); the 66 cotton goods mills with 26,203 employees earning $27,586,-550 had an output valued at $90,053,620 ($107,708,-169); the 24 woolen goods mills with 3,275 employees earning $4,161,577 had an output valued at $19,-256,063 ($21,141,962); the 21 knit goods mills with 1,636 employees earning $1,782,583 had an output valued at $10,724,483 ($10,605,476); and the 62 mills for dyeing and finishing textiles with 9,590 employees earning $11,521,344 had an output valued at $44,-979,389 ($47,163,824). The 188 jewelry factories with 7,826 employees earning $8,696,059 had an output valued at $35,451,319 ($31,616,003); the 31 silk mills with 6,500 employees earning $7,853,236 had an output valued at $32,511,106 ($34,855,263); and the 41 shops making textile machinery and parts with 3,425 employees earning $4,765,669 had an output valued at $15,390,008 ($17,508,719).

The first cotton spinning works of this country were established in Pawtucket in the eighteenth century. Providence, Woonsocket, and Pawtucket are the chief centres of industry.

Rhode Island in the election of 1928 adopted amendments to its constitution abolishing the surviving property qualifications for voters, changing the SenatorialSystem(in practically giving Providence four Senators instead of one), and substituting biennial for annual sessions of the legislature.

Although so small in all ways, yet the agriculture output by the 2.5 per cent. of rural population, Census of 1920, was $5,340,378, and included about everything produced in the temperate zone.

Rhode Island has but 4,083 farms, with 331,600 acres, having lost 25 per cent. in a decade.

A large traffic, coastwise and foreign, passes through Providence, as well as heavy passenger travel, rail and water. Railroad mileage, 1927, was 196.

Newport, on Narragansett Bay, has been for decades the most famous of America's watering places. Palatial summer homes were built by the socially prominent of the past one or two generations, embellished by every art of architect and landscape gardener.

The State enjoys extensive educational facilities, with Brown University and Rhode Island College of Education at Providence as the best known. Public school enrolment is 95,000.

The percentage of illiteracy is 6.5; native white, 7-10ths of 1 per cent.; foreign-born, 16.5. Foreign-born are 28.7 per cent. of the population, numbering 173,499—English, 25,782; Scotch, 22,253; Canadian, 36,400; Italian, 32,241.

SOUTH CAROLINA.

Area, square miles . . . . . 30,989 . . . . . 39th in rank
Population, 1920 . . . . . 1,683,724 . . . . . 26th in rank
Population, 1928 (est.) . . . 1,864,000 . . . . 60.1 to sq. m.
Wealth, 1923 (Census est.) $2,404,845,000

South Carolina, in the South Atlantic group, of the Original Thirteen States, is bounded on the north by North Carolina, on the southeast by the Atlantic Ocean, on the southwest by Georgia. Its topography is, like that of North Carolina, mountainous, 3,500 feet the maximum, in the western part, a plateau in the central strip, and low-lying and sandy toward the 200-mile seafront.

The climate westward is comparatively cool, in the central part medium, and nearer the coast subtropical and humid.

The coast is indented with several harbors, Charleston having the most important one, and

being a prominent coastwise and foreign shipping port, cotton a principal outgo to Europe.

Agriculture easily leads in production, with $437,121,000 as the value of all crops, Census of 1920. Of the 192,693 farms of 12,426,675 acres, Negroes cultivated more than half, and owned very many. In 1928, 726,039 bales of cotton were produced from 2,361,000 acres. The sea island cotton grown is the finest grade produced in the country.

All of the cereals peanuts, tobacco, in which it ranks sixth, with 82,288,000 pounds from 148,000 acres in 1928, sugar cane, and all the vegetables are produced in profusion. Fruits are abundant, of temperate zone and sub-tropical varieties.

Naturally, about half the area was forested, yellow pine predominating, with much hardwood, but the lumbering has been so extensive that the forested area is reduced to about 1,000,000 acres, the cut in 1927 being 817,016 M. board feet. About 14.000,000 M. board feet of pine remains standing.

In cotton mill spindles, 5,472,398, and looms, 128,109, in its 207 mills (1928), the State is second only to Massachusetts and North Carolina. Much labor is supplied by mountain families who were induced to migrate to the lower levels by the higher incomes offered, the industrial development having been peculiar to the Southern cotton-mill States in the building of towns owned entirely by the companies. Much child labor is employed.

The United States census of manufactures, 1927, reported 1,059 establishments (1,134 in 1925) with 108,992 employees (100,144) earning $74,477,866 ($67,061,783) and a product valued at $358,334,205 ($370,283,045). The 163 cotton goods mills with 75,069 employees earning $49,383,478 had an output valued at $231,272,599 ($373,359,810); the 261 lumber and planing mill products plants with 15,508 employees earning $16,082,145 had an output valued at $29,614,204 ($35,662,159).

Railroad mileage, 1928, was 3,790.

About 400,000 are enrolled in the public schools, 200,000 being colored, who form 55.2 per cent. of the population, the State percentage of illiteracy being 18.1 against 25.7 in 1910. That of native whites is 6.5, of foreign-born white, 6.2, and of Negro, 29.3. Expenditure for public schools in 1926 was $16,058,366.

The University of South Carolina at Columbia is the leading higher educational institution, Clemson Agricultural College being next. Clemson in 1898 opened the first textile school in the United States, which has achieved much in training technical mill workers and foremen.

SOUTH DAKOTA.

Area, square miles ..... *77,615* ..... *14th in rank*
Population, 1920 ..... *636,547* ..... *37th in rank*
Pop. 1925 (State Census) ... *681,550* ..... *8.9 to sq. m.*
Population, 1928 (est.) ..... *704,000* ..... *9.0 to sq. m.*
Wealth, 1923 (Census est.) *$2,925,968,000*

South Dakota, West North Central, lower portion of the former Territory of Dakota, is bounded on the north by North Dakota, on the east by Minnesota and Iowa, on the south by Nebraska, and on the west by Wyoming and Montana. Its climate is that of the temperate zone northern latitudes, cold in winter and pleasant in summer. Before cultivation of the soil was extensive, it lacked rainfall; but precipitation swept westward as tillage advanced, until it now has normally abundant watering.

The highest elevations are in the Black Hills (Harney Peak 7,240 feet), and up-thrust of granite rich with minerals coincident geologically with the Rocky Mountains. From the Homestake mine at Lead more than two hundred million dollars in gold has been taken. Harney and Black Hills National Forests cover 1,134,167 acres, nearly surrounding Custer State Park, containing Game Lodge where Pres. Coolidge established the Summer White House in 1927. The remainder of the State is a vast rolling prairie, falling off to lower levels in the northeast, which drains into the Mississippi River and into the Red River of the North. The major part of the State is drained by the Missouri River, which cleaves the State through the centre north and south. There are several minor drainage basins, feeding the larger rivers, with a succession of fertile valleys, highly productive, and a fair area of forests, yellow pine, spruce and others, 1,100,000 acres being under forest cover.

About 120,000 acres are irrigated, with about 200,000 acres normally in the irrigable sections.

It is claimed that more than 90 per cent. of the total area is arable. Of the 50,000,000 total acreage, 34,636,491 is in farmlands, with about 18,199,250 improved, farms numbering, Census of 1920, 74,637, crops being valued at $321,202,000.

Corn leads with 91,200,000 bushels; wheat, 30,175,000; oats, 53,650,000; barley, 19,250,000, and all the other cereals. Only the hardier fruits are grown.

The Census of 1920 shows livestock shipped valued at $154,631,000; dairy, fruit, poultry and other things, $50,000,000; the total revenues from all sources of wealth produced being $400,000,000, or about $600 per capita.

The United States census of manufactures, 1927, reported 472 establishments (502 in 1925) with 5,551 employees (5,107) earning $6,785,893 ($6,171,739) and a product valued at $83,001,163 ($62,701,600). The 81 dairies had an output valued at $15,868,381.

Mineral wealth is practically all in the Black Hills, where gold mined ranks the State second in in 1928, $6,575,000 (in 1927, $6,670,400; in 1926, $5,932,000; in 1925, $5,962,800; in 1924, $6,135,000). Silver, lead and baser minerals also abound. There is coal and lignite in the northwestern parts not yet accessible to transport.

Railroad mileage, 1927, was 4,245.

Of the population, 84 per cent. is rural; 100,628 is foreign-born, of which 16,000 were Norwegian. and 15,000 German.

Illiteracy is 1.7 per cent.; native white, 4-10ths of 1 per cent. About 100,000 attend the schools.

A feature is the large area in Indian reservations—the Rosebud, Cheyenne River, Pine Ridge, and the Lower Brule. The Indians numbered in 1920, 23,010; they engage in agriculture and livestock husbandry, occupy 6,685,734 acres, valued at $63,265,900 and have an income of $4,331,940.

TENNESSEE.

Area, square miles ..... *42,022* ..... *34th in rank*
Population, 1920 ..... *2,337,885* ..... *19th in rank*
Population, 1928 (est.) ... *2,502,000* .... *59.5 to sq. m.*
Wealth, 1923 (Census est.) *$4,228,251,000*

Tennessee, in the East South Central group, is bounded on the north by Kentucky and Virginia, on the east by North Carolina, on the south by Mississippi, Alabama, Georgia and North Carolina, and on the west by Arkansas and Missouri.

The eastern parts are in the Great Smoky Mountains, the surface sloping toward the west, first to an elevated tableland, then to the bottoms of the Mississippi River, which skirts the western border. It has the Tennessee River, which sweeps into Alabama from the northeast and returns to flow north through Tennessee and Kentucky into the Ohio.

The forests cover about 30,000 squate miles, and yield half a billion feet of lumber—oak, yellow pine, gum, yellow poplar, hemlock and chestnut.

The 1920 census showed $318,285,000 as the value of all crops, which include all things grown in the temperate zone, shading off to the almost subtropical in the south.

In 1928, 429,284 bales of cotton were produced from 1,107,000 acres; its tobacco crop that year was 88,549,000 pounds. All cereals and vegetables are grown. There are 252,774 farms with a total of 19,510,856 acres.

Coal production in 1928 was 5,680,000 short tons; coke, 200,000 short tons; iron ore, 130,000 long tons; pig iron, 110,837 long tons; copper, 16,374,261 pounds; petroleum, 47,000 barrels; phosphate rock, 577,095 long tons.

The United States census of manufactures, 1927, reported 2,098 establishments (2,157 in 1925) with 114,968 employees (107,570) earning $101,197,846 ($95,201,301) and an output valued at $614,040,524 ($600,026,232). The 344 mills for lumber and planing products with 15,621 employees earning $12,589,963 had an output valued at $61,140,482 ($61,614,340); the 21 cotton goods mills with 7,211 employees earning $4,777,869 had an output valued at $21,956,617 ($23,706,355); and the 59 knit goods mills with 16,542 employees earning $10,436,628 had an output valued at $44,559,667 ($44,006,467).

Railroad mileage, 1928, was 4,063.

Tennessee is almost wholly American in population—foreign-born whites being 7-10ths of 1 per cent. Negroes are 19.3, and the percentage of illiteracy is 10.3 for the State; native white, 7.3; Negro, 22.4. Expenditure for public schools in 1924 was $16,832,000.

Attending school were 630,000 persons. The main higher educational institutions are the University of Chattanooga, University of Tennessee at Knoxville, Fisk University, Vanderbilt University, and the George Peabody College for Teachers at Nashville, Cumberland University at Lebanon, the University of the South at Sewanee, Union University at Jackson, and the Southwestern Presbyterian University at Memphis.

The Tennessee Mountains, like those of Kentucky, are beautiful, delightful summer resorts. Lookout Mountain, scene of a celebrated battle in the Civil War, is the object of chief interest at Chattanooga.

The suburbs of Chattanooga (except Alton Park) by vote have joined the city. The consolidation going into effect Oct. 1, 1929. The population of Greater Chattanooga was locally estimated at 135,000.

TEXAS.

Area, square miles ..... *265,896* ..... *1st in rank*
Population, 1920 ..... *4,663,228* ..... *5th in rank*
Population, 1928 (est.) ..... *5,487,000* ..... *20.6 to sq. m.*
Wealth, 1923 (Census est.) *$9,850,888,000*

Texas, of the West South Central group, up to 1836 part of Mexico, then an independent republic, becoming one of the United States on Dec. 29, 1845, is bounded on the north by New Mexico and Oklahoma, on the east by Oklahoma, Arkansas, Louisiana and the Gulf of Mexico, on the south by the Gulf and Mexico, and on the west by Mexico and New Mexico. It is the largest State, embracing over 8% of the area of the whole country. Its extreme length is 760 miles and extreme breadth 620.

In the western part it is mountainous, the "Staked Plains" lying in the northwest, a great prairie in the central portion, and a lower lying region nearer to the Gulf. Western Texas is mostly without forestation, but in the east formerly there was a large wooded area, nearly 8,000,000 acres, materially reduced by extensive lumbering, the normal annual cut being more than 1,500,000,000 feet, mostly yellow pine.

Texas is easily the first cotton State; in 1928, 5,109,939 bales were produced from 17,743,000 acres; and in 1927, 4,356,277 bales from 16,176,000 acres. Cotton shipments through Texas ports in 1928 were: Galveston, 2,248,000 bales; Houston, 1,968,000 bales; Corpus Christi, 200,000 bales; Texas City, 50,000 bales, and Beaumont, 7,000 bales.

That census reports Texas the only State in which the total of all crops exceeded a billion dollars—$1,071,542,103,—the total return from crops, fruits, livestock, lumber and oil and other minerals being more than $1,500,000,000.

The farmland area was 114,020,621 acres, in 436,033 separate farms, of which 31,227,503 were improved acres, the value of all farm property being more than $4,400,000,000. There are about 2,000,000 acres irrigable, and 600,000 acres irrigated.

The corn crop in 1928, 99,162,000 bushels from 4,722,000 acres; wheat, 22,176,000 bushels from 2,016,000 acres; and oats, 35,751,000 bushels from 1,402,000 acres; potatoes, white and sweet, 10,775,000 bushels from 148,000 acres; and rice, 7,308,000 bushels from 174,000 acres; and peanuts, 109,200,000 pounds from 168,000 acres.

The fruit production ranges from the varieties which are grown in the temperate zone to the semi-tropical kinds, and the pecan nut is a large crop.

The 13,500,000 domestic animals bring immense sums annually, the wool clip alone being from 15,000,000 to 20,000,000 pounds, with very heavy returns from cattle, horses, pigs and sheep, which range on the vast mid-western prairies, some of the ranches being of several hundred thousand acres. It leads the country in the cattle breeding industry.

Texas was fourth rank in value of mineral products in 1927, $374,503,000; and in 1926 $420,586,730. The petroleum output in 1928 was 256,888,000 barrels; in 1927, 213,768,000 barrels; in 1926, 166,916,000 barrels; and in 1925 144,648,000 barrels. Natural gas output in 1926 was 175,392,000 M. cubic feet valued at $28,165,000 and in 1927, 254,063 M. cubic feet.

Oil is found all the way from the northwest to the southeast on the Gulf, the field there being somewhat concurrent with that of Mexico. In the north and northwest, the formation runs with that of Oklahoma and Kansas, the content being rich.

The Texas gas wells in the Dallas-Fort Worth district are the chief source of the supply of helium gas now used in the giant airship Los Angeles.

Texas produces over 99 per cent. of all the sulphur in the United States—1,409,240 tons valued at $23,000,000 in 1925, 1,890,000 in 1926, 2,111,000 in 1927, and 1,981,873 in 1928.

In 1928, 895,000 tons of coal were mined, and asphalt and pottery clay were important products, as also all the base minerals, silver, lead, quicksilver and copper being naturally present and somewhat developed as to production.

In the northwest the bed of a former inland salt sea contains the salts that appear in all sea waters, and the University of Texas at Austin and the United States Geological Survey have announced the discovery of potash, the work of proving the extent thereof being now in progress.

The United States census of manufactures, 1927, reported 4,065 establishments (3,603 in 1925) with 116,763 employees (106,772) earning $130,408,661 ($116,353,580) and an output valued at $1,206,579,962 ($1,237,674,838). The 62 petroleum refineries with 13,726 employees earning $19,683,149 had an output valued at $429,501,524 ($488,181,732). The 24 slaughtering and meat packing houses (wholesale), had an output valued at $84,585,133 ($79,208,777); the 175 cottonseed oil and meal factories an output valued at $78,324,499 ($86,387,983); the 276 lumber and planing mills an output valued at $55,254,573 ($60,675,779).

Texas took first place in merchandise exports away from New York in 1924, her total amounting to $737,218,927, by a margin of $5,614,625. She lost it however in 1925, for although her shipments reached $758,665,052, New York's increased to $810,416,054. In 1926 the totals were New York, $761,249,789; Texas, $648,991,954; in 1927, New York, $764,766,896; Texas, $647,026,141; and in 1928, New York $861,578,624; Texas, $817,002,082. Her land and water ports in 1928 handled exports valued at $834,100,000, an increase of $153,600,000 over the previous years.

From Galveston, the chief seaport, the value of the exports for the district in 1928 was $682,313,418, (in 1927, $554,892,962). Of this $320,254,826 came from Houston. This city where seventeen railroads converge, has, since 1919, become an important shipping port, though fifty miles from the sea, through the widening and deepening to thirty-foot channel of the Buffalo Bayou and San Jacinto River, completed in August, 1925, at a total cost of $20,000,000, including the Municipal Terminals with fourteen wharves. Through the Beaumont-Port Arthur ship channel are exported huge quantities of petroleum products and the district has developed into a great industrial centre.

Texas now leads in railroad mileage, having 16,909 in 1928.

Public school enrolment is about 1,125,000 for a population of 4,663,228 reported in the 1920 census. The University of Texas at Austin is well known, and has authority in many lines of research, especially in geology. There are a dozen other well established higher institutions. Expenditure for public schools in 1926 was $65,128,019.

The percentage of illiteracy was reported at 8.3; native white, 3; Negro, 17.8; foreign-born white, 33.8. The 249,652 Mexicans are the largest body of foreigners, communication across the international boundary line being in peace time constant and extensive.

UTAH.

Area, square miles ..... *84,990* ..... *10th in rank*
Population, 1920 ..... *449,396* ..... *40th in rank*
Population, 1928 (est.) ..... *531,000* ..... *6.0 to sq. m.*
Wealth, 1923 (Census est.) *$1,535,477,000*

Utah, of the Mountain group of the Far West, is bounded on the north by Idaho and Wyoming, on the east by Wyoming and Colorado, on the south by Arizona, and on the west by Nevada. It has several mountain ranges, which attain up to 12,000 feet elevation (the highest peak, Kings Mountain, 13,498 feet), the greater part of the State being a plateau 6,000 feet above sea level. The rivers are useful only for irrigation, more than 1,300,000 acres being under water. The Great Salt Lake, salt being 20 per cent. of the fluid content, is in the northwest part, altitude 4,218 feet, and has no known outlet. The climate is dry, stimulating and wholesome, warm in summer, rather cold in winter, and the sky so clear that no cloud specks it on 300 days a year.

The value of all crops in the Census of 1920 was $57,890,000, of which hay and forage led, with $24,583,000, mostly alfalfa. All the temperate zone cereals are produced. There are 25,662 farms, with 5,050,410 acres.

The fruit production ranges from temperate to sub-tropical zone varieties, which latter grow in the southern tier of counties.

The wool clip in the 1920 census was 11,690,239 pounds.

Mineral resources are most varied, including gold, silver, lead, manganese, copper, gypsum, petroleum, sulphur, zinc, salt and coal. The total value of mineral output in 1926 was $98,985,218.

More than 13,000 square miles of land contain workable coal, the supply being estimated at 196,458,000,000 tons. The output in 1928 was 4,810,000 tons.

Production of uranium and vanadium, especially valuable, is the second in the Union.

Semi-precious stones are taken in large quantities, and a high grade of marble and onyx for building is quarried.

The State ranked second in production of copper in 1928 and 1927, the output in 1928 being 298,375,465 pounds, and in 1927, 267,705,397 pounds. Utah is the leading producer of silver; the value in 1928 being $10,383,350, in 1927, $10,973,581 and in 1926, $12,440,084. Gold output in 1927 was $4,124,400; and in 1926, $3,758,800.

The United States census of manufactures, 1927, reported 556 establishments (517 in 1925) with 13,585 employees (15,077) earning $16,688,574 ($18,199,536) and an output valued at $163,118,376 ($177,224,538). The three smelters and refineries for lead with 1,573 employees earning $2,231,576 had an output valued at $34,513,685 ($45,482,711). The figures for the copper refineries were not available. The 65 flour mills had an output valued at $10,104,127; the nine slaughtering and meat packing houses, $7,071,743; and the 30 canneries $6,349,806.

Railroad mileage, 1928, was 2,194.

Illiteracy is low, at 1.9 per cent.; native whites three-tenths of 1 per cent., foreign-born 6.3, there being 56,455 of foreign birth, English most numerous. About 100,000 attend the schools, and higher educational institutions are becoming numerous and well established.

The distinguishing feature is the Mormon Church, the Latter Day Saints, as they call themselves, numbering three-fourths of all church membership. The Mormons came originally to Utah from the Midwest, being driven out by persecution, and journeyed to the territory when it was almost completely a wilderness, subduing it and building a social formation based on the domination of the Mormon Apostles and Bishops, with close interrelationship between church and government, the tithing system being adopted.

Salt Lake City, the capital, has several celebrated structures built by the church, among them the great Tabernacle and the Temple.

The "Great American Desert" lies in the northwestern corner of Utah, reaching over into Nevada.

VERMONT.

Area, square miles.....9,564.....*42d in rank*
Population, 1920.....352,428.....*45th in rank*
Wealth, 1923 (Census est.).....*$842,040,000*

Vermont, a New England State, is bounded on the north by Canada, on the east by New Hampshire, on the south by Massachusetts, and on the west by New York. Lake Champlain, more than 100 miles long, marks the western boundary line. The Green and Latonic Mountains run north and south through the State. The climate, like its topography, is rugged and characteristic of the north. Population is 36.8 to the square mile.

The 1920 census gives $47,999,600 as the value of all crops, and $168,159,000 as the value of all manufactures. Vermont has the largest value of dairy products per capita in the Union, the value being returned as $27,152,954, and it leads all States in the production of maple sugar. Agricultural production takes a wide range, including even tobacco, and covers all the cereals suitable to the zone, with considerable fruits, apples predominating. There are 29,075 farms, with 4,235,811 acres.

Known as "The Green Mountain State," its chief mineral wealth is in its quarries, leading all States in output of granite and marble.

The United States census of manufactures, 1927, reported 880 establishments (951 in 1925) with 26,241 employees (27,563) earning $32,305,433 ($32,326,006) and an output valued at $134,029,978 ($138,269,861). The 203 quarries with 5,208 employees earning $8,411,063 had an output valued at $21,317,503. The 70 dairies' output was valued at $6,036,403; the woolen goods mills at $10,939,729 ($14,327,688); and the 18 paper and pulp mills at $9,751,433.

Railroad mileage, 1927, was 1,057.

Vermont is a popular resort in the summertime for persons from all Eastern cities, the mountain scenery being beautiful, and a system of roads being now in process of building up to modern standards. The shores of Lake Champlain for 100 miles afford excellent boating.

Disastrous floods beginning Nov. 3, 1927, caused damage estimated at $30,000,000, railroad beds, highways and bridges suffering greatly.

The illiteracy percentage is 3; native whites 1.5, and foreign-born 11.3. Of the total population of 352,428 reported in the 1920 census, foreign-born numbered 44,526; Canadians, 24,868.

The University of Vermont, Middlebury College and Norwich University are the leading institutions of learning.

VIRGINIA.

Area, square miles.....42,627.....*33d in rank*
Population, 1920.....2,309,187.....*20th in rank*
Population, 1928 (est.).....2,575,000.....*60.4 to sq. m.*
Wealth, 1923 (Census est.).....*$4,891,570,000*

Virginia, one of the South Atlantic and one of the Thirteen Original States, is bounded on the north by West Virginia and Maryland, on the east by Maryland and the Atlantic Ocean, on the south by North Carolina and Tennessee, and on the west by West Virginia and Kentucky. Part of its original territory was taken in 1863, during the Civil War, to form West Virginia. On its eastern side, the great waterway, Chesapeake Bay, cleaves the State, cutting off a small portion between which and the main portion is the entrance past the Capes to the bay, and there are many rivers which flow into the bay, with navigation up the James, the York, the Rappahannock and the Potomac.

The topography is varied, beginning with the low lying lands along the coast, known as Tidewater Virginia, rising to an extensive tableland in the central part, and finding mountain elevations up to 5,700 feet in the west. In the northwestern corner is the rich Shenandoah Valley. The Potomac River bounds the State on the north, making off from the bay. The mountains are the Alleghanies, the Shenandoahs and the Blue Ridge. The climate is as varied as the topography, characteristic in each portion, cool in the higher elevations and rather warm in the lower.

Virginia is an agricultural State, the total value of all crops being reported by the census of 1920 as $292,824,260 with 186,242 farms totalling 18,561,112 acres. The State is third in rank in tobacco production, 111,600,000 pounds from 186,000 acres valued at $19,180,000 in 1928. Culture by the whites began soon after the settlement of Jamestown, 1608. The wheat crop, 1928, was 9,758,000 bushels and the corn crop 45,155,000 bushels. The peanut crop was 141,960,000 pounds valued at $6,672,000.

Cotton production in 1928 was 43,711 bales from 79,000 acres, a yield of 265 pounds per acre.

Live stock husbandry has been in late years emphasized especially, effort being exerted to bring in pure blood strains. Much of the progress in this line is due to the incoming of many Northerners, who have taken over rural estates to obtain the social advantage of the delightful country life of the Old Dominion State, which was of the flower of the old time era of the cavaliers.

The United States census of manufactures, 1927, reported 2,432 establishments (2,552 in 1925), with 114,918 employees (112,126) earning $110,377,945 ($105,880,765), and the product valued at $671,346,808 ($589,235,865). The 15 cigar and cigarette factories with 6,762 employees earning $4,812,071 had an output valued at $126,888,241; and chewing and smoking tobacco and snuff output, $17,978,456. The 27 cotton goods mills with 8,426 employees earning $7,057,919 had an output valued at $27,295,233 ($30,295,320). The 17 paper and pulp mills had an output valued at $30,725,679; the 412 lumber and planing mills an output valued at $29,603,874; and the 25 shipbuilding plants an output valued at $21,513,738.

Virginia ranks as the tenth state in value of exports in 1928, $142,504,115, and in 1927 $136,416,741.

Virginia has national shrines in Mt. Vernon, the home of Washington, in Monticello, the home of Jefferson, and, notably, the Arlington National Cemetery. Famous among watering places today as well as in ante-bellum days are the Hot Springs and the healing baths with the Homestead Hotel as the center of all the year round social activity.

The constitutional amendments adopted by the people June 19, 1928, permitted a complete reorganization of the State Government as planned by Gov. Harry F. Byrd based on a seven-months scientific survey by the National Institute of Public Administration. Of 100 boards, commissions and departments, more than 30 were abolished and the rest were reorganized and concentrated in 14 units of which 11 are responsible to the Governor. Gov. Byrd announced that at the end of the first year or reorganized government Virginia had a cash balance of $12,107,737, and an actual surplus of $2,596,181 in March, 1928, as compared to a deficit of $1,368,004 in March 1926, without any increase in the tax rates.

Cotton goods especially are becoming great in volume, the mills having about 690,000 spindles, Virginia using much more raw cotton than it produces. The lumber cut averages about 800,000,000 feet, and is unusually varied, including yellow pine, oak, gum, hemlock, cypress, chestnut, yellow poplar, cedar, tupelo, basswood, hickory and walnut.

Mineral output includes coal, 12,330,000 tons in 1928; iron ore, 27,970 tons (66,897 tons in 1927); pig iron, 63,175 tons; also copper, lead, zinc and large supplies of building materials.

Railroad mileage, in 1928, was 4,714.

In Hampton Roads the United States maintains a great navy yard, as the principal rendezvous of the navy, utilizing the James River as its chief anchorage.

In Newport News, on the James River, an ex-

tensive shipbuilding plant constructs vessels of many types, including warships of heaviest tonnage.

Fortress Monroe, on the peninsula between the James River and Chesapeake Bay, has strong, modern fortifications, commanding the waterways.

The illiteracy percentage is 11.2, Census of 1920; native whites, 5.9; foreign-born 7.1; and Negro 23.5. The Negro constitutes 29.9 per cent. of the population, having fallen from 32.6 per cent. in 1910. The U. S. Bureau of Education reported on Dec. 25, 1925, that the number of adult illiterates had been reduced one-half within five years.

In higher educational institutions Virginia ranks among the foremost States, having such well-known establishments as the University of Virginia, founded by Thomas Jefferson, at Charlottesville, from which many men famous in history have been graduated; Washington and Lee University at Lexington; William and Mary College, the second oldest in the country, at Williamsburg; Virginia Polytechnic at Blacksburg; Virginia Military Institute at Lexington; Hampden-Sidney College at Hampden-Sidney, and Hampton Normal School at Hampton, the first well developed school for Negroes established in the South. More than 500,000 attend the public schools. Expenditure for public schools in 1926 was $21,755,438; and in 1927 $29,352,822.

The "Old Dominion," first in population of the States until 1820, prides itself on its Revolutionary heroes, its eight Federal Presidents, (including Harrison, Taylor and Wilson, born in Virginia but elected from other states) and its social prestige. It was the theatre of the decisive campaign in which the Civil War ended with the surrender at Appomattox of Gen. Robert E. Lee, head of the Confederate armies.

Old Surrender Field at Yorktown where 7,000 British troops under Lord Cornwallis laid down their arms Oct. 19, 1781, was bought in July 1928, for preservation, by the Corporation backed by John D. Rockefeller, Jr., which is restoring Williamsburg, the Colonial Capital.

WASHINGTON.

Area, square miles ..... *69,127* ..... *19th in rank*
Population, 1920 ..... *1,356,621* ..... *20th in rank*
Population, 1928 (est.) ..... *1,837,000* ..... *22.9 to sq. m.*
Wealth, 1923 (Census est.) *$5,122,405,000*

Washington, of the Pacific (Northwest) group, is bounded on the north by British Columbia, on the east by Idaho, on the south by Oregon, and on the west by the Pacific Ocean. It has the Columbia River as southern boundary line for 300 miles from the west, and many streams of importance, mostly for irrigation uses, with the Snake River in its eastern reaches. In the northwestern third of the State the great Puget Sound, with tortuous shores and innumerable harbors, on which Seattle, Tacoma, Everett, Olympia and other important cities are situated, is a great commercial centre. It is the nearest American gateway to the ports of Asia, handles the bulk of the shipping to and from Alaska and has a heavy trade coastwise via the Panama Canal.

The seaborne trade of Seattle in 1928, was valued at: Foreign, imports, $229,096,631; exports, $150,816,338. It is the principal landing port of the Northern Pacific fisheries, 333,057,742 pounds (83% being salmon and halibut) were landed in 1928. It is the terminus of the cable to Seward, Alaska. The salmon pack of Washington in 1928 was 497,400 cases valued at $5,023,996.

Seattle claims to be the healthiest city in the United States. Its growth has been great, and the Census Bureau estimated its population as of July 1, 1928 as 383,200.

The Cascade Mountains cut the western third from the State's area, with the usual lower mountain range nearer to the ocean shores. A dozen peaks, snowcapped, rise in the west. Mt. Rainier or Mt. Tacoma (according to which city you may be in at the moment) is a beautiful attraction with its 14,408 feet of height, now a national park, and the Olympic range in the northwest is surpassingly beautiful.

Standing timber is about 330,000,000,000 feet; Douglas fir, yellow pine, white pine, spruce, larch, cedar and other trees abound. Normally, the State cuts more than 4,000,000,000 feet, leading all the States, and shipping the product all over the world, much coming to the North Atlantic States, via the Panama Canal, and going by rail to the Central West, while Washington shingles are used throughout the whole northern half of the country.

Agriculture is developing rapidly. All crops reported in the 1920 census were valued at $227,212,000, and included all the cereals, vegetables, forage crops, and the fruit production is famous, the irrigated sections all the way from the south to the very border of Canada being prolific and yielding products demanded in all Eastern fruit markets. Every variety known to the temperate zone is produced; the fruit and nut crop, 1920 census, was worth $51,662,000, apples alone being worth $38,823,000. There are 66,288 farms of 13,244,720 acres.

The geology is the same as that of Oregon—arid and semi-arid lands in the east, interspersed with fertile portions, and west of the Cascades the rainfall ranges from 20 to 80 inches with a resultant profusion of vegetation.

The Great Northern Railway completed Jan. 12, 1929 a 7¾ mile tunnel through the Cascade Mountains, an expenditure of about $14,000,000, and completed the electrification of 75 miles of mainland track through the Cascades between Wenatchee and Skykowish, Wash., at the expense of $11,000,000.

The Spokane country produces one-ninth of the nation's wheat crop, one-fifth of the apple crop; also 35% of the nation's lead and 30% of the nation's magnesite, as well as much silver, gold and zinc. It has also one-fifth of the nation's total water-power resources and on the Spokane River seven plants have an installed capacity of 185,215 h.p.

East of the Cascades most of the wheat is grown, the crop being 41,837,000 bushels, with many sheep, cattle and horses. The livestock interest is mostly in the east, where the great ranges are, with mild winter in the valleys, with winter grazing.

The United States census of manufactures, 1927, reported 3,344 establishments (3,216 in 1925), with 104,468 employees (105,893) earning $145,930,930 ($146,244,608), and a product valued at $677,913,579 ($659,339,836). The 658 factories making lumber and planing mill products with 58,809 employees earning $83,280,771 had an output valued at $257,093,567 ($273,545,537). The 58 flour mills had an output valued at $44,904,285; the 36 meat packing houses an output valued at $32,816,654; and the 100 dairies an output valued at $17,168,070.

All the basic minerals are present, coal output in 1928, being 2,184,000 tons.

Railroad mileage, 1927, was 5,559.

In illiteracy, the State has a percentage of 1.7; native white, 3-10ths of 1 per cent.; foreign-born, 4.7. Foreign-born number 250,055, being 18.4 per cent. of the population, of which Japanese and Chinese are numerous.

About 300,000 attend the public schools, and the University of Washington at Seattle, and the State College at Pullman, for science and agriculture, with several well established colleges, provide ample higher educational facilities.

The shores of Puget Sound are very popular as summer resorts, with many hotels and cottage colonies, while steamer tourist travel to the Orient and to and from Alaska is extensive.

WEST VIRGINIA.

Area, square miles ..... *24,170* ..... *40th in rank*
Population, 1920 ..... *1,463,701* ..... *27th in rank*
Population, 1928 (est.) ..... *1,724,000* ..... *72.0 to sq. m.*
Wealth, 1923 (Census est.) *$4,677,919,000*

West Virginia, of the South Atlantic group, was set off during the Civil War from Virginia. It is bounded on the north by Ohio and Pennsylvania; on the east by Pennsylvania, Maryland and Virginia, on the south by Virginia and Kentucky, and on the west by Kentucky and Ohio.

It is essentially mountainous, the Appalachian range having several spurs therein. Its western parts drain into the Ohio River, and its eastern portions down the Potomac River to the Atlantic Ocean. The mountains are in the east. The climate is moderate, and between the north and south extremes.

Mining is the leading industry, the value of the total product in 1926 being $395,941,940. The State ranks second in the production of coal with an output of 132,600,000 tons in 1928 and 145,122,000 tons in 1927, much of it fine steaming coal from the Pocahontas field. The petroleum output in 1928 was 5,704,000 barrels; natural gas 162,375,000 M. cubic feet (in 1927). The pig iron product, 1928, was 645,028 long tons.

West Virginia produces more hardwood than any other State, excepting Arkansas, and has vast timber wealth, including yellow poplar, birch, ash, oak, spruce, hemlock and walnut.

Its agriculture is not so important, total value of all crops reported in the 1920 census being $96,537,000, the leading crops being corn, hay, tobacco, potatoes, and fruits of all kinds suitable to the zone. Farms number 87,289, with 9,569,790 acres.

The State ranks sixth in the steel works and rolling mill industry and among the first in the production of glass and glassware.

The United States census of manufactures, 1927, reported 1,313 establishments (1,395 in 1925), with 77,330 employees (80,700) earning $103,431,224 ($105,892,102), and a product valued at $455,216,-551 ($470,821,582). The 16 iron and steel works and rolling mills with 11,688 employees earning $20,909,-028 had an output valued at $87,872,862 ($92,565,-227); the 41 steam railroad car construction and repair shops with 11,578 employees earning $16,674,250 had an output valued at $33,604,644; the 149 lumber and planing mills with 8,488 employees earning $10,-424,519 had an output valued at $28,647,484 ($35,-035,041). The five petroleum refineries had an output valued at $14,827,454; the 48 glass factories valued at $44,161,122. The nine meat packing houses, an output valued at $12,357,524. Leather p oducts were valued at $13,290,872; and pottery at $11,433,071.

The State's new Water Power Act, passed in 1929, permits the export sale of hydro-electric power outside the state, provides for development by license for fifty year terms with limited power of continuation and right of recapture, and gives the Public Service Commission power to regulate rates. It is expected to hasten the development of the State's very large potential hydro-electric power.

Its transport by water is abundantly served with the Ohio River on the west. Railroad mileage, 1928, was 4,080.

Its illiteracy percentage is 6.4; native white, 4.6; Negro, 15.3; and foreign-born, 24. Negroes are 5.9 per cent. of the population, and foreign-born 4.2. Public school enrolment was reported at 360,000, and there are many colleges, church denominational schools being numerous; industrial schools also.

Expenditure for public schools in 1926 was $26,-235,479.

In recent years many Northerners have gone to the State to take country homes in the mountains. White Sulphur Springs in the eastern part is one of the most celebrated pleasure resorts, popular socially, and with a famous golf course.

WISCONSIN.

Area, square miles.....56,066.....25th in rank
Population, 1920.....2,632,067.....13th in rank
Population, 1928 (est.)...2,953,000....52.7 to sq. m.
Wealth, 1923 (Census est.).....$7,866,081,000

Wisconsin, of the East North Central group, is bounded on the north by Lake Superior and Michigan, on the east by Michigan and Lake Michigan, on the south by Illinois, Iowa and Minnesota, and on the west by Iowa and Minnesota. The Mississippi River forms the southern half of the western boundary line. It has the characteristic climate of the northern tier of States, cold in winter and pleasant in summer, dry and stimulating.

Everything grown in the north temperate zone is produced, in grains, vegetables and fruits, agriculture being especially well diversified—corn, wheat, rye, barley, hay, flaxseed, potatoes, sugar beets, with considerable quantities of tobacco for cigar wrappers, hops, peas, sorghum and maple syrup. More peas are canned than in any other State, and more hemp raised. The grape production is very large, as is the output also of cranberries, apples, cherries and plums. Wisconsin was, in 1927, the leading State in the combined value of the butter, cheese and condensed milk industries, $213,256,081 from 2,601 establishments employing 5,403 hands to earned $7,385,800. There are 189,295 farms, with a total of 22,148,223 acres.

The value of all crops in 1920 was returned by the census as $445,347,868.

Manufactures include the most lumber cut in the Great Lakes region. The State has the most creameries of any State, refines much beet sugar, makes much woodwork and implement products, considerable pig iron output, ranks fifth in zinc production, fourth in iron ore output, the valuable hematite kind chiefly, and the fisheries on the lakes are highly productive, the whitefish being highly valued.

The United States census of manufactures, 1927, reported 7,473 establishments (7,262 in 1925) with 247,722 employees (247,341) earning $322,697,105 ($314,883,011) and a product valued at $1,973,653,-261 ($1,859,243,930). The 58 factories of making motor vehicles and parts with 19,990 employees earning $31,099,462 had an output valued at $265,-143,993 ($215,347,961); the 84 paper and pulp mills with 13,136 employees earning $16,418,354 had an output valued at $125,050,600 ($97,779,601); the 324 foundries and machine shops with 21,081 employees earning $31,888,882 had an output valued at $127,-357,554 ($125,063,220); the 277 lumber and planing mills with 20,964 employees earning $23,076,376 had an output valued at $75,163,405 ($89,306,150); the 18 factories making engines, turbines and water wheels with 8,982 employees earning $15,240,802 had an output valued at $62,549,223 ($53,174,241); the 116 furniture factories with 11,103 employees earning $14,345,703 had an output valued at $49,150,009 ($53,915,692); and the four factories making rubber tires and inner tubes with 3,699 employees earning $5,288,911 had an output valued at $43,823,143 ($46,271,447).

The 2601 dairy plants produced butter valued at $77,037,218; cheese, $82,515,023; and condensed and evaporated milk, $58,703,840. The meat packing product was valued at $75,793,912. The product of the printing and publishing industry was valued at $41,329,510; that of the knit goods at $55,838,366; and that of boot and shoe factories at $57,315,000.

The story of Wisconsin forests, as of all of the Lake States, is tragic. Naturally, almost the entire State was covered with pine, hemlock, and the invaluable hardwoods. Lumbering proceeded without regard to conservation, until more than 8,000,-000,000 feet were cut annually; production on account of the exhaustion of the supply then falling off, until the 1920 census reported the cut as 1,275,-000,000 feet, with an estimated stand remaining of about 2,500,000,000 feet. There are therefore enormous areas of now useless cut-over forest lands, with comparatively scattered timber tracts left.

Superior, at the head of Lake Superior, opposite Duluth, is the main terminus of the Great Northern Railway, and has great ore, lumber, wheat and coal dockage, with considerable manufacturing of iron products. The iron ore mined in 1928 amounted to 1,394,371 long tons.

Railroad mileage, 1927, was 7,500.

Of the 2,632,067 population shown by the 1920 census, the number of foreign-born was 460,128, or 17.5 per cent., Germans numbering 151,250. Milwaukee, on July 1, 1926, by Census Bureau estimate, had 517,600 population.

The percentage of illiteracy was 2.4, against 3.2 in 1910. The native white illiteracy in 1920 was 7-10ths of 1 per cent.; foreign-born, 8.4; Negro, 4.1.

The University of Wisconsin at Madison is especially far advanced in sociologic research, domestic science and the practical arts. The 1928 matriculation was 8,800. There are many colleges and smaller schools.

Wisconsin has no bonded indebtedness.

WYOMING.

Area, square miles.....97,914.....8th in rank
Population, 1920.....194,402.....48th in rank
Pop. 1925 (State Census)...206,381.....2.1 to sq. m.
Population, 1928 (est.).....247,000 .....2.5 to sq.m.
Wealth, 1923 (Census est.).....$976,239,000

Wyoming, a Mountain Group State, is bounded on the north by Montana, on the east by South Dakota and Nebraska, on the south by Colorado and Utah, and on the west by Utah, Idaho and Montana. It is a lofty region, its mean elevation about 6,000 feet—a broad plateau traversed by the Rocky Mountains, highest point of which is Mt. Gannett, 13,785 feet. Topography is varied.

Its waters flow in all directions, drainage by the Green River to the southwest, by the Yellowstone and Snake Rivers to the northwest, by the Big Horn to the north, and by the North Platte, Sweetwater and Laramie Rivers to the southeast, none of them navigable. The river waters are however valuable for irrigation, more than 1,200,000 acres being actually under irrigation, and an area of nearly 2,700,000 acres being included in irrigation projects which are under construction.

The climate is that of the rarefied air of high elevations, and is salutary, with severe winters and pleasant summers, moisture precipitation being low at about 12 inches mean annually.

With less than 200,000 population reported in the 1920 census more than $50,000,000 was assigned as the value of all crops, hay the leader, mostly alfalfa, and corn, potatoes, oats, wheat, rye and barley also produced.

Stock raising is the most important industry, sheep husbandry being the second in rank in the United States, the wool clip reported at 33,000,000 pounds in 1920. Farms by that census numbered 15,748, with 11,809,351 acres.

Wyoming has extensive mineral resources, though largely undeveloped, the value of the product in 1926 being $78,988,066. The coal production in 1928 was 6,486,000 short tons; petroleum, 1928, 21,415,000 barrels; 1927, 21,146,000 barrels and natural gas (1926), 46,567,000 M. cubic feet.

The census of manufactures, 1927, with 229 establishments (224 in 1925) with 5,577 employees (6,333) earning $9,066,022 ($10,526,253) and the product valued at $85,368,360 ($107,984,752). The 15 petroleum refineries with 1,612 employees earning

$3,249,634 had an output valued at $60,834,758, ($83,911,353).

Railroad mileage, 1927, was 1,992.

The 1920 census reported the percentage of illiteracy as 2.1; native white, 3-10ths of 1 per cent.; foreign-born, 9. There were 25,255 foreign-born, mostly from Europe.

Casper, the centre of the oil industry, is the largest city in the State, with a population, July 1, 1925, of 23,288.

The 1920 school enrolment was 47,553 The University of Wyoming at Laramie has 1,000 students.

The Yellowstone National Park in the northwest corner is one of the world's most famous resorts for the tourist; its giant geysers, waterfalls and high coloration of the rugged gnarled rocks attract heavy travel from all parts of the country and from foreign lands.

The ranch life retains much of the old time flavor of the West, and many Easterners go there to enjoy it. The annual cowboy roundup at Cheyenne attracts many.

ALASKA, TERRITORY OF

AREA, 586,400 square miles (including the Aleutian Islands).

POPULATION, Census of 1920, 55,036 (27,883 whites, 27,153 Indians and Eskimos). Males, 34,539; females, 20,497. 1924 (est.), 60,000.

CAPITAL, Juneau, population, 1920, 3,058.

Governor, George A. Parks, 1925-29, appointed, June, 1925, reappointed, 1929-1933, June, 1929.

Consuls maintained at Juneau and Nome by Norway; at Nome by Russia (Consul General); at Skagway by Great Britain and Sweden.

Alaska occupies the northwestern part of the North American Continent. It is bounded on the north by the Arctic Ocean, on the west by the Arctic and Bering Sea, on the south by the North Pacific Ocean and on the east by Canada. From the southwestern corner the Aleutian Islands stretch out westward 1,200 miles to longitude 172° E. Cape Wrangell, facing Siberia. Bering Strait, 54 miles wide, separates Cape Prince of Wales from Asia. The "Panhandle" runs southeast 600 miles along the Pacific to Dixon Inlet, which is about 700 miles from the northwestern corner of the United States, and includes all the islands, the boundary with Canada along the mountain crests being fixed by arbitration in 1903, international survey completed, 1913. Lower Alaska has a population of 12,000 whites and 5,000 natives.

Alaska is mountainous with high plateaus; the coast range extends through the southern part, the chief peaks being Mt. St. Elias (alt. 18,024 ft.), Mt. Wrangell (14,005 ft.) and further inland Mt. McKinley (20,300 ft.), the highest peak on the North American Continent. There are more than twenty active volcanoes, notably Mt. Katmai, now with the "valley of 10,000 smokes" a national monument. Mt. Katmai, which had been dormant, suddenly blew the top of its head off June 6, 1912—one of the greatest eruptions in history. The mountains and the Sitka district are densely timbered, mainly coniferous, but the islands are treeless. The most notable glaciers are the Muir, Malaspina and Seward. The Yukon is the chief river, 1,765 miles long, navigable for about 1,200 miles. The length of the coast line is about 4,750 miles, including islands 26,364 miles. There are many excellent harbors, one, Dutch Harbor, Unalaska Island, being of great naval importance.

Attu, the last of Aleutians, the volcanic, mountainous, treeless islands that stretch in a 1,200-mile arc to the Asiatic coast, is the westernmost point of the American Continent, in the same longitude as New Zealand, and 2,700 miles from Washington State. In summer the sun is just setting in Attu when it is rising in Maine.

Away from the south coast the country back of the barrier of mountain ranges is a great inland plateau rolling gently north. It is inhabited chiefly by huge herds of reindeer guarded by their native owners. Fairbanks, in the same latitude as Iceland, is, with Tanana, the centre of a growing agricultural region.

There is great diversity in climate. In the interior a temperature of 60° below zero in winter is not unusual, with a temperature of 90° in the summer, but on the coast, owing to the Japanese Current, the thermometer rarely falls below zero in the winter with a maximum of about 80° in the summer. Rain there is abundant. All the hardier vegetables and the cereals, except corn, thrive during the short summer with its long hours of sunlight. Of the 378,165,760 acres, the Census of 1920 reported 90,652 in 364 farms, 5,836 acres only being under cultivation. In the country tributary to the Government railroad it is estimated that 1,296,000 acres are suitable for farming without costly drainage. There are 65,000,000 acres suitable for grazing.

Mt. McKinley National Park contains 2,645 square miles, and is a vast wilderness game preserve of great natural beauty. The mountain rises 17,000 feet above the timber line. A 75-mile road through the park will be finished in 1931.

Alaska has vast forests along the coasts, of which 21,392,000 acres are in forest reservations from which the total cut in 1925 was 57,500,000 board feet. The horse power capacity of surveyed undeveloped water power sites is 475,000.

The country is a paradise for big game, protected under a law approved by the President, Jan. 13, 1925, administered by a Game Commission of five Alaskans, C. T. Gardner of Juneau, Chairman, under the jurisdiction of the Secretary of Agriculture. The legislature appropriated $30,000 in 1929 to start a campaign to exterminate coyotes and wolves. A buffalo range was also established.

Reindeer were introduced from Lapland and from Siberia to insure the support of the Eskimos by the Government, which brought in 1,280 head between 1892 and 1902. These increased under careful handling to 22,107 in 1910, 92,933 in 1920 (valued at $2,238,562) and 322,000 in 1928. About 240,000 are owned by natives. Reindeer meat exported to the United States increased in value from $53,000 in 1924 to $127,898 in 1926-27 (fiscal year), and to $153,723 in 1928-29. The shipment in pounds was 989,904 in 1926-27; 760,624 in 1927-28, and 1,318,453 in 1928-29. In Northern and Western Alaska there are about 400,000 square miles of treeless region, worthless for agriculture but capable of furnishing pasturage for 10,000,000 reindeer.

There are about 275 blue fox ranches stocked with 36,000 foxes. The investment exceeds $6,850,000; there are also about ninety fur farmers raising foxes, mink and marten in pens.

The value of land fur and skins shipped from Alaska during 1924 was $1,657,448; 1925, $2,381,471; 1926, $2,359,639; 1927, $4,266,000; 1928, $4,650,000.

The killing of seals on the Pribilof Islands was brought under control in 1910, and pelagic sealing prohibited by treaty in 1911. The seal herds have increased from 215,000 to 871,513 in 1928. In 1919-20, 30,198 dressed sealskins, valued at $1,509,600, were shipped to the United States. The shipment for 1920-21 was 24,889, valued at $995,660; for 1921-22, 26,293, valued at $1,005,175; for 1922-23, 30,172, valued at $924,340; for 1923-24, 22,540, valued at $581,430; for 1924-25, 25,395, valued at $713,276; for 1926, 22,131 valued at $749,734; in 1927, 25,969 valued at $508,000; and in 1928, 31,829 valued at $631,000.

Fishing is the most important industry, about 800 vessels being engaged in it, and on them and in the canneries 31,100 men were employed in 1928. The total investment in 1926 was $74,557,522, with a product valued at $54,669,882. The investment in the salmon cannery industry alone was $60,535,550. The total number of salmon taken in 1926 was 96,907,627; in 1925, 64,246,391; in 1924, 79,477,600; in 1923, 77,442,311; and in 1922, 72,370,400.

The salmon pack, reduced to cases of forty-eight pounds each, for seven years was:

Year.	Cases.	Pounds.	Value.
1922	4,501,562	216,074,976	$29,787,193
1923	4,843,574	232,491,587	30,514,286
1924	5,294,915	252,151,920	33,007,135
1925	4,459,937	214,076,976	31,989,531
1926	6,652,882	319,338,336	46,080,004
1927	3,572,100	171,461,000	30,016,000
1928	6,083,700	292,027,000	45,383,885

The output of marketable fish products in 1928 was 414,366,000 pounds valued at $54,553,000; in 1927 289,431,000 pounds valued at $40,163,000.

Since the discovery of gold at Juneau in 1880 (the great Klondike rush through Skagway into Canadian territory and the Upper Yukon began in 1896) up to January, 1928. Alaska has produced $366,031,098 of gold, nearly two-thirds of it from placer mines. Copper and silver produced bring the total yield up to $572,368,000. The United States Geological Survey estimates the value of the placer gold reserve to be at least $360,000,000, this in addition to gold in veins that could not be estimated. U. S. Navy tests show the Alaska coal, of which there are large deposits, equal in steaming value to Pocahontas coal. Output was 104,360 tons in 1927 from eight mines.

Oil of high grade is found in the Katalla field on Controller Bay.

The value of the mineral output in 1927 was 14,404,000; in 1926 $17,658,000; in 1925, $18,286,320; 1924, $17,457,333; 1923, $20,330,643; 1922, $19,506,365; 1921, $17,004,124; and in 1920, $23,303,751. The gold, silver and copper output for seven years was:

Year (Calendar).	Gold. *Dollars.*	Silver. *Dollars.*	Copper. *Dollars.*
1922	7,422,367	729,945	12,630,335
1923	5,985,314	668,012	10,526,655
1924	6,285,724	531,671	9,703,721
1925	6,630,281	484,592	10,487452
1926	6,722,000	441,451	9,489,000
1927	5,927,000	356,000	7,250,000
1928	6,834,200	284,812	5,371,000

Congress, in 1914, authorized the building of a railroad not to exceed 1,000 miles in length. The line is in operation from Seward to Fairbanks, 469 miles; with spurs to coal mines that bring the total up to 543 miles. The cost at wartime prices exceeded $56,000,000. The complete system was put in operation in 1923. Total railroad mileage, 1927, was 801. Tourist travel by four steamship lines in 1926 totaled 32,699.

Aviation development has made accessible in a few hours places that could only have been reached by dog sled in six weeks or two months travel of great hardship. In a three-years service, commercial airplanes covered 300,000 miles of flying and transported 1,000 passengers and 30,000 pounds of freight without loss or injury. The Legislature has caused to be laid out 44 landing fields.

The Territory in 1928 had 1,533 miles of wagon roads, 1,086 miles of sled roads, and 6,671 miles of trails. In the fiscal year 1927-28, $1,042,000 was spent on maintenance, and $1,150,000 on new construction, including Federal appropriation.

The Territory on June 30, 1928, had four national banks with a total capital of $275,000; surplus and undivided profits, $206,090, and deposits, $4,515,504; and thirteen territorial banks with a total capital of $640,000; surplus and undivided profits, $544,869, and deposits, $7,587,949.

Alaska, then sparsely colonized by Russian trappers and Indian traders, was bought from Russia by Secretary W. H. Seward, by the treaty of March 30, 1867, for $7,200,000. It was made a Territory by the act of Aug. 24, 1912, which gave it a Legislature elected by direct vote and a Governor, appointed for four years by the President. Congress reserves the right to legislation on certain subjects.

To facilitate the administration of the Territory, on the authority of a bill passed by Congress, February 10, 1927, these ex-officio commissioners were appointed: By the Secretary of the Interior, Gov. George A. Parks; by the Secretary of Commerce, Dennis Winn; by the Secretary of Agriculture, Charles H. Flory; all have wide powers to take decisive action without referring matters to Washington.

The receipts and expenses of the Territory for the last fiscal years, ending June 30, was:

Year.	Receipts.	Expenditures
1921	$563,474	$680,312
1922	625,476	606,465
1923	752,811	822,245
1924	976,753	858,550
1925	1,034,849	1,044,577
1926	1,756,696	1,400,073

The Territory has no funded debt.

Alaska's commerce with the United States for the last nine fiscal years, ending June 30, was:

Fiscal Year.	Exports to U. S.	Imports From U. S.	Gold Shipments
1919-20	$66,498,871	$33,998,462	$8,793,085
1920-21	54,126,718	27,333,972	7,072,114
1921-22	36,775,870	23,625,161	6,881,020
1922-23	52,984,275	29,981,604	7,496,319
1923-24	53,821,239	31,719,251	6,183,241
1924-25	55,440,645	33,692,369	5,602,217
1925-26	55,347,982	31,692,477	5,432,525
1926-27	72,388,691	32,059,812	6,239,772
1927-28	49,864,910	33,395,456	6,024,854
1928-29	69,431,963	31,793,213	.....

There entered the ports of Alaska in 1928, 1,462 vessels in the foreign trade (not counting vessels from Continental United States).

HAWAII, TERRITORY OF

AREA, 6,406 square miles (Hawaii, 4,016 square miles; Oahu, 598; Maui, 728; Kauai, 547; Molokai, 261; Lanai, 140; Niihau, 97; Kahoolawe, 69, Molokini, 2.7).

POPULATION, Census of 1920, 255,912 (estimated for July 1, 1928, 348,767; American Citizens, 228,226; aliens, 120,491).

CAPITAL, Honolulu, population (Census of 1920), 83,327, estimated, July 1, 1928, 113,000, other city, Hilo, 10,431. (Estimated July 1, 1928, 12,850).

Governor, Lawrence M. Judd (1929-1933) assumed office July 5, 1929.

Consuls are maintained at Honolulu by Belgium, Brazil, Chili, China, Cuba, Denmark, France, Great Britain, Haiti, Italy, Japan (Consul General), Latvia, Mexico, The Netherlands, Norway, Panama, Peru, Portugal, *Consul General*; Spain and Sweden.

The Hawaiian Islands—the crossroads of the Pacific—are twenty in number, of which nine are inhabited, lying in the North Pacific Ocean in longitude 154° 40′—160° 30′ west, latitude 22° 16′—18° 55′ north, and more than 2,000 miles from the nearest mainland. The group extends for 390 miles from northwest to southeast. San Francisco is distant from Honolulu 2,418 miles; Panama, 5,395; Seattle, 2,774; Sydney, N. S. W., 4,424; Auckland, N. Z., 3,800; Manila, 5,475; Hongkong, 5,593; Yokohama, 3,915; and New York (via the Panama Canal), 6,723.

The islands are mountainous and volcanic in origin, filled with extinct craters, Haleakala on Maui being the largest in the world. On the Island of Hawaii is Mauna Kea (altitude 13,823 feet), quiescent, and Mauna Loa (altitude 13,765 feet), active. Sixteen miles east of the latter is the largest active volcano in the world, Kilauea (altitude 4,400 feet) with its "pit of eternal fire"; a wonderful feature of the Hawaiian National Park. It was in eruption in February and September, 1923.

The islands are clothed with luxuriant tropical vegetation; with abundant rainfall and cooled by the prevailing northeast trade winds, the climate is perpetual summer without enervating heat. The higher elevations of the mountains are covered with forests, and 820,000 acres are set apart as a forest reserve. The soil is very fertile and all tropical and sub-tropical fruits and vegetables are grown. The farms number (1920) 5,284, valued at $151,129,085, with 2,702,245 acres, of which 435,242 were improved and 599,531 in woodlands. Of the 5,284 farmers 892 were white (627 owners), 679 Hawaiian (546 owners), 3,098 Japanese (188 owners, 11 managers, and 2,899 tenants), and 560 Chinese (56 owners, 7 managers, and 497 tanants). In 1928 29,571,845 pounds of rice were produced and 6,750,000 pounds of coffee; 86 farms reported (1920) 1,407 breadfruit trees that produced a crop of 101,268 breadfruit. Banana cultivation has been pushed, 183,500 bunches being produced in 1928.

There are 135,000 head of cattle valued at $3,500,000; over $10,000,000 is invested in ranching.

The total area of public lands June 30, 1928, was 1,593,097 acres, of which 70,385 are agricultural, 620,696 pasture, and 598,576 forest reserves.

The largest industry of the islands is the growing of sugar cane and the production of raw sugar. The sugar produced in 1928 was about 994,000 short tons. The output in 1927 was 820,509 short tons from 127,417 acres, about 6.377 short tons per acre. About 70,000 acres are irrigated and produce an average of 7.81 tons an acre. The yield per acre is larger than any other country. The employees on the sugar plantations, about 45,000 in number, of many nationalities, receive house, fuel, water and medical attendance free and are paid a basic monthly wage and a bonus, which varies with the price of sugar. In 1920 the minimum basic wage was $20, and the bonus, extraordinarily large, was 276 per cent. of the wage. For 1921 the bonus was $30. For sanitation, housing and welfare for five years 1922-26, the Hawaiian Sugar Planters Association expended $12,217,600.

The 1923 sugar crop was 545,606 short tons; for 1924, 701,443 tons valued at $80,000,000 or an average of $112 a ton; for 1925, 776,072 tons, valued at $85,000,000 and for 1926, 787,246 tons.

Hawaii's sugar exports to the United States for nine years were as follows:

Fiscal Year.	Pounds.	Value.
1920-21	977,738,902	$93,631,635
1921-22	1,191,624,620	45,108,885
1922-23	1,195,078,906	68,585,641
1923-24	1,171,388,032	74,520,948
1924-25	1,353,120,285	71,468,115
1925-26	1,752,775,846	68,770,308
1926-27	1,363,986,946	60,689,730
1927-28	1,647,586,759	70,045,080
1928-29	1,772,277,875	65,814,749

The second largest industry is the growing and canning of pineapples. The product increased 1094 per cent. in the 1909-1919 decade, and in 1920 143,473,536 two-pound cans valued at approximately $31,000,000 were produced. About 49,500 acres are under cultivation. Hawaii's shipments of canned pineapple for nine years are valued at $29,745,818 for 1920-21; $18,737,405 for 1921-22; $22,321,588 for 1922-23; $28,247,410 for 1923-24; $30,218,983 for 1924-25; $34,529,291 in 1925-26 (432,434,855 pounds); $35,403,305 in 1926-27 (410,570,332 pounds); $37,459,781 in 1927-28 (473,138,831 pounds); and $35,048,108 in 1928-29 (433,196,266 pounds). The capital investment exceeds $30,000,000; cannery employees number 5,000, and field employees 6,000.

Hawaii's imports from the United States were chiefly iron and steel manufactures, mineral oil, breadstuffs, meat and dairy products, lumber, textiles, etc., fertilizers, automobiles, rubber goods, leather and paper.

Honolulu, on the Island of Oahu, is the capital and chief commercial city and port of the islands. It has a fine natural harbor, which needs improvement and development. Its needs have been neglected by Congress, which alone can appropriate the money for them. In the twenty-five years that Hawaii has been an organized territory of the United States it has paid $117,095,205 into the Federal Treasury. In 1927-28 it paid $6,244,382 internal revenue taxes of which $6,112,482 were income taxes and exceeded the income taxes paid by 16 of the States. Customs receipts were $1,881,787. The Territory does not receive for local appropriations one cent of the money collected in customs and internal revenue.

In the fiscal year 1927-28, 8,051 commercial vessels with a gross tonnage of 7,052,907 docked at Honolulu. These figures include inter-island shipping.

The wharves of Hawaii have been maintained and improved by direct taxation and public improvement loans paid by citizens of the Territory amounting to millions of dollars. Since 1901 the Territory has expended $25,000,000 in the construction of main highways.

The Legislature of the Territory in 1923 passed an act called the Hawaiian Bill of Rights reviewing historical details of the admission of the Republic of Hawaii by annexation as an integral part of the United States and asserting its rights as such.

Congress after a hearing passed an act (Public Law 35—Sixty-eighth Congress) declaring the Territory of Hawaii, beginning July 1, 1924, entitled to share in appropriations under the Federal Highway Act, the Sheppard-Towner Maternity Act, the Vocational Education Act and the Vocational Rehabilitation Act under the same terms and conditions as any of the several States, and also extending the Federal Farm Loan Act to the Territory.

The Federal Government maintains its largest army post on the islands with quarters for a division of 30,000 men at Schofield Barracks and the subsidiary forts. The Navy Department has a large base at Pearl Harbor with drydock, opened Aug. 31, 1919. There are also a large aviation field and a powerful radio station.

Hawaii has an excellent system of roads, 1,479 miles, and in Honolulu much concrete construction is used. There are 372 miles of steam railroads, besides about 625 miles on the sugar plantations.

The native population of Hawaii at the time of the discovery has been estimated at about 200,000. With civilization it has dwindled and the race seems destined to disappear through intermarriage with other stocks rather than by deaths.

The population of Hawaii by races is:

Race.	1910.	1920.	1925.
Hawaiian	26,041	23,723	21,145
Caucasian-Hawaiian	8,772	11,072	13,837
Asiatic-Hawaiian	3,734	6,955	8,345
Caucasian:Portuguese	22,301	27,002	27,470
Porto Rican	4,890	5,602	6,352
Spanish	1,990	2,430	1,946
Other Caucasian	14,867	19,708	18,786
Chinese	21,674	23,507	24,851
Japanese	79,675	109,274	128,068
Korean	4,533	4,950	5,956
Filipino	2,361	21,031	49,335
Negro	695	348	430
All other	376	310	
Total	191,909	255,912	306,551

The total for 1925 does not include the U. S. Army and Navy forces amounting to about 15,500. But 360 of the other Caucasians were aliens. Of the Chinese 11,776 were aliens and 13,075 citizens. Of the Japanese, 57,208 were aliens and 70,860 were citizens. Of the Koreans, 3,040 were aliens and 2,916 citizens. Of the Portuguese, 3,552 were aliens and 23,918 citizens. Of the Spanish, 799 were aliens and 1,147 citizens. Of the Filipinos, 11,776 were aliens and 13,075 citizens.

The registered voters by race, in 1926, were: Hawaiian and part-Hawaiian, 17,763; American and European, 15,540; Japanese, 3,092; Chinese, 2,906; others, 1,268; total, 40,569. The votes cast in the election for Delegate to Congress in 1928 was Huston (Rep.) 18,160; Jarrett (Dem.) 16,372.

The death rate in 1924-25 was 12.74; in 1925-26, 12.44; in 1926-27, 11.87; and in 1927-28, 11.7. The birth rate in 1924-25 was 41.57; in 1925-26, 38.08; in 1926-27, 37.16; and in 1927-28, 33.84.

Hawaii came under the influence of American missionaries in 1820, and a large proportion of the natives embraced the Christian faith. The impetus given to education was great, and elementary education has always been free. The language in general use in the schools is English. The Japanese have many so-called Buddhist schools, which their children attend in addition to the American schools. Of the 48,730 children in the public schools (1923) 16,548 attended also these alien language schools; of this number 16,178 were American born and potential citizens. The Legislature in 1921 passed a law providing for State supervision of these schools, which was declared unconstitutional by the United States Supreme Court, February 21, 1927.

The school plants, both public and private, are of very high order. School enrolment in 1927-28 was 66,434 in the public schools (of whom 52% were Japanese); 9,497 in private schools and 1,550 in the State supported University of Hawaii. The expenditure on education, 1927-28, was $5,741,788.

The Bishop Museum at Honolulu is a scientific institution of the first order devoted especially to the preservation of the life of the native Hawaiians and to the study of the ethnology of Polynesia.

Pan-Pacific conferences on vital matters have been promoted during the last five years with great success; and the islands are yearly welcoming increasing numbers of tourists (16,762 in 1926), being well favored with steamship communication. Tourist expenditure in the fiscal year 1927-28 was estimated at $10,000,000. Tourists numbered 17,451.

The Hawaiian Islands were discovered by Capt. Cook in 1778, and there he met his death on his second visit in 1779. King Kamehameha brought the islands under one rule in 1791. The rule of his dynasty, which became a constitutional monarchy in 1840, ended when a revolution drove Queen Liliuokalani from the throne in 1893. An attempt to secure annexation to the United States failing, a republic was proclaimed July 4, 1894. On the outbreak of the Spanish-American War a treaty of annexation was negotiated, ratified by the Hawaiian Senate, and consummated by a joint resolution of Congress, July 7, 1898. Hawaii was created a Territory and its government provided for by the organic act of April 30, 1900.

The chief executive officer of the Territory of Hawaii is the Governor, who is appointed by the President with the approval of the Senate for a four-year term, and who must be a resident of the islands in order to be eligible for appointment. The Territorial Secretary is appointed in the same manner, but the heads of the Territorial departments are appointed by the Governor, with the approval of the Territorial Senate.

The Legislature of Hawaii consists of the Senate of 15 members, elected for four-year terms; and the House of Representatives, of 30 members, elected for two-year terms. The Delegate to Congress is elected every two years, and has floor privileges in the House, but no vote.

The judiciary consists of a Supreme Court, four Circuit Courts and numerous District Courts. The Justices of the Supreme Court and Circuit Courts are appointed by the President, with the approval of the United States Senate.

Hawaii's commerce with the United States is as follows:

Fiscal Year.	Exports to U. S.	Imports From U. S.
1919-20	$142,246,003	$59,261,621
1920-21	127,692,879	77,324,114
1921-22	68,335,075	51,581,621
1922-23	96,159,742	60,795,799
1923-24	107,043,812	71,011,469
1924-25	100,512,336	72,987,494
1925-26	108,699,192	71,785,581
1926-27	101,778,769	77,433,301
1927-28	113,547,157	78,592,165
1928-29	106,385,497	82,498,612

Hawaiian trade with foreign countries was:

Fiscal Year.	Exports.	Imports.
1926-27	$2,066,720	$10,255,000
1927-28	2,195,426	9,505,177
1928-29	2,524,459	10,267,503

The total bonded debt on June 30, 1928, was $28,528,000. The assessed value of real and personal property on June 30, 1928 was $390,598,491. Territorial taxes collected totalled $14,884,100.

	Receipts.	Expenditures.
1922-23	$11,220,855	$11,862,820
1923-24	13,077,072	13,107,373
1924-25	14,022,467	13,790,482
1925-26	10,511,000	8,815,000
1926-27	10,454,628	12,293,000
1927-28	11,749,009	12,708,585

Commercial banks deposits, June 30, 1928 amounted to $48,931,630; and savings deposits to $31,278,434.

Dependencies of the United States.

THE PHILIPPINE ISLANDS.

AREA, 114,400 square miles.

POPULATION, Census of 1918, 10,314,310; estimated, Dec. 31, 1927, 12,353,800; 1.08 to square mile.

CAPITAL, Manila (Luzon), pop. 1918, 285,306, estimated by Board of Health for July 1, 1927, 320,394 (summer capital Baguio, pop. 5,462); other cities, Cebu, pop. 65,300; Albay (Legaspi), pop. 53,105; Iloilo (Panay), pop. 47,808; Batangas (Luzon), pop. 41,182; Ormoc (Leyte), pop. 38,247; Laoag (Ilocos Norte), 38,294; Baybay (Leyte), pop. 36,934.

Governor General, Col. Dwight F. Davis, assumed office at Manila July 8, 1929.

Consuls General maintained at Manila by Belgium, China, Great Britain, Japan, The Netherlands, Nicaragua, and Spain. *Consuls* maintained at Manila by Argentina, Chile, Costa Rica, Czechoslovakia, Denmark, France, Germany, Italy, Liberia, Mexico, Norway, Panama, Paraguay, Peru, Portugal, Sweden, Switzerland and Venezuela; at Cebu and at Iloilo by Great Britain, The Netherlands, Norway and Spain; and at Zamboanga by Great Britain.

The Philippine Islands, the largest island group in the Malay Archipelago, were discovered by Magellan in 1521 and conquered by Spain in 1542; they were ceded to the United States by the Treaty of Paris (Dec. 10, 1898) following the Spanish-American War. Admiral Dewey had destroyed the Spanish fleet in Manila Bay, May 1, 1898, and Major Gen. Wesley Merritt had captured the City of Manila on Aug. 13, 1898.

The land area of the islands lies between 21° 10′ and 4° 40′ north latitude and between 116° 40′ and 126° 34′ east longitude. There are 7,083 islands extending 1,152 statute miles from north to south and 682 miles from east to west. Of this number 462 have an area of 1 square mile or over; 2,441 are named and 4,642 unnamed. The largest, Luzon, contains 40,814 square miles, and Mindanao, the next, 36,906. Panay has 4,448; Cebu, 1,695; Palawan, 4,500; Mindoro, 3,794; Bohol, 1,534; Masbate, 1,255. Between and about lie the other groups, including the Sulu or Jolo Islands in the south, the Babuyanes and Batanes in the north, the Catanduanes in the east, Culion in the west. Population by the Census of 1918 was 10,314,310, of which all but about 66,000 were Filipinos. There were 5,776 Americans, 43,802 Chinese, 7,806 Japanese, 3,945 Spanish, 1,148 Britons, 286 Germans, 182 French, 125 Swiss. In Manila in 1918 there were 3,124 Americans. The census returned 879,811 who could read Spanish. About 4,000,000 read or understand English. Spanish is by Filipino law an official language until 1930. Eight distinct languages and 87 dialects are spoken. The death rate in 1923 was 17.5; in 1924, 20.43; in 1925, 18.11; in 1926, 20.38; and in 1927, 20.65 per thousand.

The archipelago has a coast line of 11,444 statute miles, which exceeds that of the entire United States. There are 21 fine harbors and 8 landlocked straits, the principal being Manila, Subic, Batangas, Tayabas and Hondagua, Iligan, Illana, Nasipit, Sibuguey, Sarangani Bays; the Gulfs of Lingayen, Ragay, Lagonoy and Davao, and the San Bernardino, San Juanico, Surigao and Basilan Straits and the Verde Passage. Manila Bay, with an area of 770 square miles and a circumference of 120, is the finest in the entire Far East. It is a roadstead in all parts of which vessels can anchor, but a breakwater has been constructed for vessels to shelter behind in bad weather. Manila, Cebu, Iloilo, Zamboanga Jolo and Davao, Legaspi are the ports of entry.

The extensive mountain system of the Philippines belongs to the succession of volcanic ranges of the Pacific system of the world's surface. There are 20 more or less active volcanoes. Mount Apo (Apo means master), 9,610 feet, in Mindanao; Mayan Volcano, 7,943 feet, in Albay; Taal, 984 feet, in Batangas; Canlaon, 7,995 feet, in Negros; Banajao, or Majayjay, 7,144 feet, are the most famous of these. Other high mountains are Pulog, 9,580 feet; Halcon, 8,481 feet; Malingdang, 8,560 feet; Santo Tomas, 7,400 feet. Between the mountains, stored with minerals, in the center, and the sea lie great, fertile, well watered tropical plains.

Nearly all the principal islands have important river systems. In Luzon are the Rio Grande de Cagayan, 220 miles long, which drains 16,000 square miles of territory; the Rio Grande de Pampanga, emptying into Manila Bay through a dozen mouths; the Agno, the Abra, Bued, and the more familiar Pasig. The Rio Grande de Mindanao, 330 miles long, is the largest in the islands, and the Agusan, also in Mindanao, the third in size. Mindoro has 60 rivers and Samar 26.

November, December, January and February are the temperate months. The mean average temperature at this season is about 77° to 79° Fahrenheit. In April, May and June, the hot months, the mean average is between 83° and 84°. In the other months it is about 80°. The nights are seldom unpleasantly hot even in the hot season, and a temperature of 100° is a rarity in Manila. The mountain regions of the north are cool as September in the temperate zone. There are two seasons, the rainy and the dry. The rains are heaviest in July, August and September; lightest in February and March. The lowest average rainfall for the past twelve years for the whole archipelago was 60.73 inches in the driest region, the highest 125.68 in the wettest. Manila's average was 75.46.

A typhoon devastated the Visayan Island group in November '1928, destroying crops and property valued at $25,000,000 and causing an agricultural loss for the next two years estimated at an equal figure. The dead exceeded 500, and 25,000 houses were totally or partly destroyed. The necessary relief including employment on public works was provided by the Insular Government and the Red Cross.

THE JONES ACT.

The preamble of the Jones act, passed by the United States Congress and approved Aug. 29, 1916, declared that "it has always been the purpose of the people of the United States to withdraw their sovereignty over the Philippine Islands and to recognize their independence as soon as a stable government can be established therein." On assuming office in March, 1921, President Harding sent Major Gen. Leonard Wood and W. Cameron Forbes (Governor General 1909–13) to the Philippines to make a complete survey of conditions. In their report they recommended among other things "that the present general status of the Philippine Islands continue until the people have had time to absorb and thoroughly master the powers already in their hands" and "that under no circumstances should the American Government permit to be established in the Philippine Islands a situation which would leave the United States in a position of responsibility without authority."

The Jones act of 1916 abolished the Philippine Commission under which the islands had been governed under the act of July 1, 1902. It substituted as the Upper House of the Legislature a Senate composed of 24 members, and instead of the Assembly, a House of Representatives of 91 members, elected triennially. The Governor General, who remains as the head of the Islands, is appointed by the President. All the Cabinet heads, except the Secretary of Public Instruction, are Filipinos. Senators are elected for six years. Two Resident Commissioners to the United States are elected by the Legislature.

The Philippine Archipelago is divided into 38 provinces, 11 special provinces and 2 chartered cities. The chief executive of a regular province is the Provincial Governor, who is an elective official. He, together with two other elective members, form the provincial board which constitutes the legislative branch of the provincial government. In the special provinces, with the exception of Palawan and Batanes, the Provincial Governors are appointed officials.

Of the 24 Senators only two—those from the Twelfth District, which is composed of the Mountain Province, the City of Baguio, the Province of Nueva Vizcaya and the Department of Mindanao and Sulu—are appointed by the Governor General; all the others are elected by popular vote; as are also the 91 Representatives, excepting the nine who represent the Mountain Province, the Province of Nueva Vizcaya and the Departments of Mindanao and Sulu.

"Filipinos have the rights and privileges of American citizens without the obligations," to quote Pres. Coolidge's veto message. "They pay no Federal taxes, are exempt from the exclusion provisions of our immigration laws, do not pay for the defence or diplomatic services.

"They are represented in the United States by their own chosen representatives, who are paid by the United States. In the islands the officials of the municipalities are exclusively Filipinos, as are the officials of the fully organized provinces. In the central Government the Legislature is made up entirely of Filipinos, and possesses powers which no Legislature has in this country. The lower judicial officers are all Filipinos.

"The Judges of first instance, with but two exceptions, are Filipinos, and of the Justices of the Supreme Court four of the nine are Filipinos. The Chief Justice is a Filipino. Of the heads of the executive departments, six in number, five are Filipinos. The Attorney General is a Filipino. Prosecuting Attorneys throughout the Island are Filipinos.

"The personnel of the bureaus of civil service, treasury and commerce and industry is entirely Filipino, and of the Bureau of Customs and Bureau of Posts is more than 99½% Filipino. The American officials are but 1½% of total in the Government."

On Dec. 31, 1927, there were 484 Americans and 19,165 Filipinos connected with the Government.

On Aug. 9, 1928, the Insular legislature passed and the Governor General approved a bill providing for technical advisers and civilian assistants to the Governor General. It carried an annual appropriation of 250,000 pesos ($125,000). On Aug. 30, 1928, Governor General Stimson by executive order created an advisory Council of State consisting of the Governor General, the President of the Senate Manuel Querzon, Speaker of the House Manuel Roxas, majority floor leaders of the Senate, Sergio Osmena, and of the House Mr. Broines, and the heads of the six executive departments.

The government of the towns is practically autonomous, the officials being elected by the qualified voters of the municipality and serving for three years. The officials consist of a President, Vice President, Treasurer, Secretary and Councillors, the latter varying in number according to population. Local municipal government has been instituted in about 893 municipalities and 296 municipal districts.

The administration of justice in the Philippines is intrusted to the Supreme Court, the Courts of First Instance, the Municipal Court of the City of Manila and the Courts of the Justices of the Peace.

The strength of the Philippine Constabulary, Dec. 31 1927 was 399 officers and 6,132 enlisted men divided into 133 companies and 1 artillery platoon, occupying 162 stations strategically placed for the preservation of law and order and loyalty and obedience to sovereign authority. The commander is Brig.-Gen. C. E. Nathorst, appointed Jan. 2, 1927. The cost of maintenance for the year 1926 was $2,552,664.

There are 99 school districts in the Islands. Among the special Government institutions are the Normal School, the School of Arts and Trades, the Nautical School, and the Central Luzon Agricultural School. There are provincial trade schools. In 1927 there were 1,099,306 pupils in the 7,348 public schools, with 294 American and 25,206 Filipino teachers. There are 655 private schools with 86,695 pupils and 2,823 teachers. The State supported University of the Philippines in 1926-27 had 7,002 students, and the Dominican University of Santo Tomas (founded 1611) about 800.

The insular expense for education rose from $2,000,000 in 1903 to $12,712,217 in 1925. For 1927 the legislature appropriated $1,754,250 for school construction.

The dominant religion is Roman Catholic.

AGRICULTURE AND COMMERCE.

The acreage (estimated) is: Under cultivation 9,143,000; grass or open land, 13,678,000; forests, 46,518,000. There are 73,000,000 acres of public lands. Approximately 2,568,000 are engaged in agriculture. In 1926 over $25,250,000 worth of food stuffs, of which $15,250,000 represented agricultural products, were imported. The total estimated value of the nine principal food crops in 1927 was $254,439,000, 90% of the total value of all agricultural products that year. This crop production for 1927 (excluding magner, cacao and coffee) was:

Crop production in 1927 was:

Rice	49,946,400 Cav.	1,807,060 hect.
Sugar	10,999,660 Pic	237,350 hect.
Coconuts	1,798,519,000 Nuts	95,434,520 trees
Hamp, Abaca	2,731,630 Pic.	480,150 hect.
Corn	8,384,710 Cav.	561,430 hect.
Tobacco	1,091,660 Quin.	83,970 hect.

(Hectare = 2.471 acres; cavan = 43 kilos; picul = 140 lbs.; quintal = 101.4 lbs.)

Quantity and value of chief exports were:

	1927	1928
Sugar	$50,076,777	$47,542,940
Hemp	29,687,129	26,593,106
Coconut Oil	24,840,683	23,489,173
Copra	19,155,741	22,542,341
Tobacco Products	8,908,666	8,571,437
Embroideries	4,003,476	4,396,237
Desiccated Coconut	2,840,286	3,723,586

Estimate of livestock in 1925 was; Carabaos, 1,769,000; cattle, 914,000; horses and mules, 298,000; hogs, 8,811,000; goats, 1,349,000; sheep, 345,000.

Experts of the United States Department of Agriculture reported in May, 1924, that vast tracts of land are well adapted to the cultivation of rubber with a potential production of 70,000 tons yearly. Estimates of land suitable for cultivation of rubber vary from 1,500,000 to 2,000,000, but adequate labor does not seem available.

Under the act of 1919 any citizen of the Philippine Islands or of the United States over the age of 18 years, or the head of a family who does not own more than 59 acres of land in the Philippines may enter a homestead of not exceeding 59 acres of agricultural land of the public domain. Total homestead fee, $10. Any citizen of lawful age of the Philippine Islands or of the United States, and any corporation or association of which at least 61 per centum of the capital stock or of any interest in said capital stock belongs wholly to citizens of the Philippine Islands or of the United States, may purchase any tract of public agricultural land not exceeding 144 hectares (355 acres) in the case of an individual and 1,024 hectares (approximately 1,530 acres) as a corporation or association.

During 1928, 1,146 vessels with net tonnage of 4,325,243 in the foreign trade entered the ports of the Islands. Of these, 232 were American; 412 British; 144 German; 137 Japanese; 76 Dutch; 66 Norwegian; and 50 Philippine.

There are approximately 792 miles of railroads and 5,800 miles of public roads. The Manila Railroad Company has been taken over from the British owners by the Government. Silver, lead, zinc, copper, iron, coal, petroleum, asbestos and manganese are mined, as well as clay, marble, salt, etc. The islands are rich in mineral resources, but these are as yet undeveloped.

It is estimated that there are 58 square miles of coal fields containing lignite and some high grade

bituminous. In 1925, 47,912 metric tons of coal was produced.

The output of gold in the Philippines in 1926 was: $1,993,300 ($1,843,200 in 1925), and from 1907 to 1925, inclusive, $19,144,735.

The assessed value of taxable real property Dec. 31, 1927 was $832,023,816, and of non-taxable property, $160,440,244.

Revenues in 1928 were $42,607,284 ($41,751,504 in 1928); expenditures $39,813,403 ($42,095,149 in 1928); net unappropriated cash surplus, $6,589,634. The net bonded indebtedness (including bonds of provinces and municipalities) on Dec. 31, 1928 was $87,618,500, for which there were accumulated sinking funds amounting to over $21,500,000. The resources of all Manila banks July 27, 1929 totaled 245,000,000 pesos.

American investments in the Islands as of Jan. 1, 1929 were estimated at $15,725,000.

PORTO RICO.

AREA, 3,435 square miles.

POPULATION, Census of 1922, 1,346,623; 392.14 to square mile. Estimated, June 30, 1926, 1,422,000; 411 to square mile.

CAPITAL, San Juan, population, 88,922; other cities, Ponce, 75,416; Mayaguez, 43,147.

Governor, Col. Theodore Roosevelt, Jr., appointed Sept. 9, 1929.

Consuls maintained at San Juan by Argentina, Austria, Belgium, Bolivia, Brazil, Chile, Colombia, Cuba, Denmark, Dominican Republic, France, Germany, Great Britain, Guatemala, Haiti, Hungary, Italy, Japan, Mexico, The Netherlands, Norway, Panama, Paraguay, Portugal, Spain, Sweden, Serbia, Uruguay and Venezuela.

Porto Rico is the fourth largest of the Greater Antilles, with the Atlantic Ocean on the north and the Caribbean Sea on the south. Santo Domingo is about 45 miles to the west, and St. Thomas 40 miles to the east. The Island of Culebra, population 839, and Vieques, population 12,264, to the east, form part of the territory. It is 95 miles long (from east to west) and 35 miles wide, with a coast line of about 345 miles. The best harbors are at San Juan and Ponce. Through the middle of the island, from east to west, runs a range of mountains with an altitude of 1,500 to 3,750 feet, cultivable to the summits. The soil is extremely fertile and largely under cultivation. The lower lands to the north are well watered, but irrigation is needed in the south; an extensive system has been constructed by the Government. Sugar, pineapples, oranges, grapefruit, tobacco and coffee are the chief exports. Sugar production under modern methods increased from 35,000 tons in 1899 to 400,000 tons in 1924, 447,570 tons in 1925; 659,283 tons in 1926 (with 29,073,075 gallons of molasses), 629,000 tons in 1927 and 749,000 tons in 1928.

The hurricane of September 13 and 14, 1928, killed 271 and injured more than 3,000. One-third of the people were left destitute and the American Red Cross helped rebuild 50,000 homes and cared for 50,000 farmers who lost heavily, especially on their tobacco crops and their coffee and fruit crops, which will require five years for replacement. Over a third of the coconut trees were destroyed and it will require seven years for replacement. Congress appropriated in December $6,100,000 for immediate relief of the Island, in addition to the $2,750,000 expended by the Red Cross.

Coffee production for export in 1926-27 was 19,356,904 pounds valued at $5,748,877, and in 1927-28, 7,838,104 pounds valued at $2,596,583. Tobacco production for 1927-28 was 22,000,000 pounds and the amount exported was valued at $20,777,937; and in 1926-27, 50,000,000 pounds with exports valued at $24,860,072.

Livestock in 1925 numbered 143,777 cattle, including 52,701 work cattle and 91,076 others; 25,050 horses, mules and donkeys; and 1,442 other animals.

Mineral production is underdeveloped. The climate is the most healthful of the Western Hemisphere in the tropics.

The Legislature in April 1929 extended the franchise to women over 21 who can read and write.

Porto Rico was discovered and named by Columbus in 1493. Ponce de Leon conquered it for Spain in 1509-11. It was conquered by Major Gen. Miles in the Spanish-American War and ceded to the United States by the Treaty of Paris, Dec. 10, 1898. It is administered under the Organic Act of Porto Rico, March 2, 1917 (as amended to March 4, 1927) which also granted American citizenship to Porto Ricans, and granted manhood suffrage. The Governor is appointed by the President. The Legislature—a Senate of 19 members and a House of Representatives of 39—is elected for four years by direct vote. There are six executive departments: Justice, Finance, Interior, Education, Agriculture and Labor, and Health. The President appoints, upon confirmation by the Senate, the Attorney General and Commissioner of Education. The Governor, subject to confirmation by the Insular Senate, appoints the four remaining department heads. The Justices of the Supreme Court are appointed by the President by and with the advice and consent of the Senate. The six heads of departments form the Executive Council. The island elects a Resident Commissioner at Washington with a voice but no vote in the House of Representatives, for a term of four years.

The island makes its own tax laws and retains all local revenues including customs, income tax and internal revenue which, in territories, go to the Federal Government.

The distribution of the population in 1925 according to color was: white, 1,074,191, colored 324,605. Education has been compulsory and free since 1899, when the percentage of illiteracy was 83; at present it is probably below 40. In 1899, 8 per cent. of the children between five and seventeen attended school. In 1928, 220,940 students were enrolled. The University of Porto Rico in 1927-28 had 3,404 students. English and Spanish are spoken. The Roman Catholic religion is dominant.

During 1927, 23,543 workers left Porto Rico for the United States of which 14,553 returned.

A great improvement has been made in economic and social conditions during the last decade. The death rate in 1927-28, 24.76.

In 1927 there entered the ports 1,166 vessels with total capacity of 1,124,000 registered tonnage engaged in foreign trade. There were 346 miles of railroads in 1925, and nearly 1,000 hard-surfaced highways.

The receipts for the fiscal year 1927-28 were $12,446,219, and expenditures $10,350,575, of which $4,016,777 was for education; to which the municipalities added $1,505,576.

The budget for 1923-24 was balanced at $12,459.704; for 1924-25 at $11,735,000; for 1925-26, $10,417,390; for 1926-27, $10,790,000; for 1927-28-$10,440.957; and for 1928-29, $11.000.000.

The total bonded indebtedness, Oct. 4, 1928, was $43,453,900; valuation of real and personal property, as of June 30, 1928, amounted to $341,370,654.

THE CANAL ZONE.

AREA, 549 square miles, including land and water.

POPULATION, (Civil) Census of 1928, 28,002.

Governor, Col. Harry Burgess, U. S. A., assumed office Oct. 16, 1928.

The Canal Zone is a strip of land extending five miles on either side of the axis of the Panama Canal but not including the cities of Panama or Colon, which remain in the Republic of Panama. The port at the Caribbean entrance, formerly a part of Colon, is Cristobal; and that at the Pacific entrance Balboa, while to the east of Panama is the residential town of Ancon, with hotel and hospital.

The strip of land was granted to the United States by Panama by the treaty of Feb. 26, 1904, the compensation being $10,000,000, with annual payments of $250,000 in addition. No private individuals are allowed to acquire land.

The Canal Zone is a military reservation and is administered by the War Department; is fortified and occupied by a garrison in addition to the civilian employees of the Canal and railroad.

The Canal Zone, including its territorial waters within three miles of shore, was declared on Feb. 18, 1929 by President Coolidge in an executive order to be a "military airspace reservation." The field of commercial aviation was thrown open to Americans and foreigners on equal terms while safeguarding all military requirements of the canal. Aircraft other than military must enter by prescribed routes, land at designated airports, submit to customs inspection and carry clearance papers. All fliers must obtain permission from the Secretary of State to enter the Canal Zone. Carrying munitions of war is prohibited and photographing any of the defenses can be done only by express permission of the governor.

Canal traffic for the fiscal year 1927-28 exceeded the previous high record set in 1926-27. Commercial transits totaled 6,456 as against 5,475, and tolls aggregated $26,944,499.77 as against $24,228,830.11. In 1928-29 commercial transits totaled 6,413 but tolls amounted to $27,127,389. The daily average was 17.57 as compared with 17.63 the previous year. American ships numbered 2,700; British, 1,783; German, 402; Norwegian, 340; Japanese, 155; Dutch, 149; and Swedish, 144.

From the opening of the Canal to commerce, Aug. 15, 1914, to Aug. 15, 1929, fifteen years, 54,021 commercial vessels passed through, carrying 249,777,467 long tons of cargo and paying $223,751,682 in tolls. Of the cost of the Canal $113,000,000 was charged to national defense and the balance, $275,000,000, represents the cost of the commercial plant. The excess of total earnings over total operating expenses in fifteen years is approximately $119,000,000. Interest on investment is not taken into consideration, in this surplus but a fixed annual charge of $350,000 for amortization of the fixed property of the canal having an estimated life of 100 years, and one of $635,000 for depreciation at 2 per cent per annum on property having an estimated life of less than 100 years have been made. In addition the expenses include the further charge of $750,000 yearly for depreciation of canal equipment.

Congress in 1928 authorized the building of a great dam on the Chagres river at Alhajuela estimated to cost about $12,000,000 and to require about five years for construction. The dam will be 170 feet high and will create a reservoir covering 22 square miles with a storage capacity of 22,000,000,000 cubic feet of water.

VIRGIN ISLANDS OF THE U. S.

AREA, 133 square miles.

POPULATION, Census 1917, 26,051 (St. Croix 14,901, St. Thomas 10,191, and St. John 959). White, 1,922; black, 19,523; mulatto, 4,563.

An informal enumeration taken in 1927 shows a decrease in population—St. Croix 11,118, St. Thomas 8,826 and St. John 784—total 20,728. This decrease in population is due principally to free entry into continental United States where opportunities are great for more lucrative employment. Nearly 95% of the people are wholly or partly Negro.

CAPITAL, St. Thomas (Island of St. Thomas), population, 7,747.

Governor, Capt. Waldo Evans, U. S. N., retired (1927).

Consuls maintained at St. Thomas by Belgium, Brazil, Chili, Colombia, Cuba, Denmark, Dominican Republic, France, Great Britain, Haiti, Italy, Mexico, Netherlands, Norway, Panama, Peru, Portugal, Spain, Sweden, Uruguay and Venezuela.

The Virgin Islands of the United States, formerly the Danish West Indies, were bought for $25,000,000 by the United States from Denmark, in a treaty proclaimed Jan. 25, 1917. The group consists of three islands, St. Thomas, St. Croix and St. John, with about fifty smaller ones, mostly uninhabited.

Columbus discovered this group on his second voyage, 1494, and, it is said, amazed at the number, feared that he would not have enough saints' names to go around, so he put them under the sacred patronage of the eleven thousand martyred virgins of St. Ursula.

St. Thomas Island has the principal harbor of the Virgin group—St. Thomas Harbor—on which the town of St. Thomas, formerly known as Charlotte Amalie, is situated. It is about forty miles east of Fajardo, the nearest port on the Island of Porto Rico, and seventy miles from San Juan, the principal city and port of Porto Rico. St. Thomas lies south, 20° east and 1,442 miles distant from New York City. Although St. Croix is a considerable distance from other islands of the group, all may be encompassed within a circle whose radius is twenty-five miles. The language is English.

The status of the natives of the island is that of citizens of the United States, citizenship having been conferred on them by the Act of February 25, 1927.

The United States prohibition ruined the St. Croix rum trade, and depressed greatly the bay rum industry. The commerce of the port of St. Thomas has suffered severely since 1914.

Under the Act of Congress of March 3, 1917, all military, civil and judicial powers necessary to govern the islands were vested in a Governor, to be exercised in such manner as the President shall direct. The Governor is appointed by the President of the United States, by and with the advice and consent of the Senate. The Danish Code of Laws, dated April 6, 1906, commonly known as the Colonial Law of 1906, remains in force so far as compatible.

The islands comprise two municipalities, that of St. Thomas and St. John, with a legislative council, called the Colonial Council, of eleven members elected by popular vote and four appointed by the Governor; and that of St. Croix, with a membership of thirteen and five respectively.

St. Thomas has one of the finest harbors in the West Indies and is an important coaling and oil fueling station. The Naval Station, St. Thomas, under the command of the Governor, who is also Commandant of the Naval Station, has a powerful radio equipment. There is also a Naval Radio Station on the Island of St. Croix.

Education is compulsory.

Trade with the United States was:

Fiscal Year.	Imports.	Exports.
1921-22	$1,836,567	$754,729
1922-23	1,564,342	743,463
1923-24	1,762,061	397,031
1924-25	1,616,468	595,375
1925-26	1,901,724	1,177,943
1926-27	1,773,530	616,856
1927-28	2,257,553	1,233,839
1928-29	2,370,487	922,554

AMERICAN SAMOA

AREA, 75 square miles.

POPULATION, (1928), 8,903, including Swain's Island.

CAPITAL, Pago Pago (Isl. of Tutuila), population (1926) 611.

Governor, Captain S. V. Graham, U. S. N.

American Samoa, composed of the Islands of Tutuila, Aunuu, Ofu, Olosega and Tau, and the uninhabited coral atoll of Rose Island, became a possession of the United States by virtue of the tripartite treaty with Great Britain and Germany in November, 1899, accepted by the United States Feb. 13, 1900.

By acts of April 10, 1900, and July 16, 1904 the chiefs of the Islands agreed to cede all sovereignty to the United States, but it was not until Feb. 1929, that Congress passed a resolution accepting the cession and establishing its possession. It has been and is by executive order of President McKinley under control of the Navy Department for a naval station.

Swain's Island was made part of American Samoa by resolution of the 68th Congress. The flag was hoisted and sovereignty proclaimed over the island on May 13, 1925. In 1927 there were 81 people on the island.

Pago Pago is the most valuable harbor in the South Pacific and possibly in the entire Pacific Ocean. It was ceded in 1872 by the native King to the United States for a naval and coaling station. American Samoa is extremely valuable in its relation to the expansion of American trade in the Pacific.

American Samoa is 4,160 miles from San Francisco, 2,263 miles from Hawaii, 1,580 miles from Auckland, 2,354 miles from Sydney and 4,200 miles from Manila. The natives can all read and write and are all Christians of different denominations. They are of the highest type of the Polynesian race and are greatly on the increase due to the laws forbidding foreigners buying their land.

All of the land on the islands is privately owned. Under the American Commandant-Governor there is a native Governor in each of the three political divisions. The native Governors appoint the County Chiefs, who appoint the Village Chiefs.

New laws and changes in existing laws are proclaimed by the Governor but usually on recommendation of the annual fono, or general meeting of delegates. The public health is carefully looked after by the Naval Hospital at Pago Pago and its two branches.

The chief product of the soil is cocoanut (the dried kernel is called copra). The average crop is 1,200 tons. Other fruits are grown, but not exported.

Trade with the United States was:

Fiscal Year	Imports	Exports
1926-27	$222,114	$48,916
1927-28	99,524	98,612
1928-29	111,837	162,800

GUAM.

AREA, 206 square miles.

POPULATION (1926), 16,938, including naval establishment.

CAPITAL, Agana population (est.), 10,000, (1927).

Governor, Comm. Willis W. Bradley, Jr., U. S. N., assumed command June 11, 1929.

The Island of Guam, the largest of the Marianas, was ceded to the United States by Spain by Article 2 of the Treaty of Paris, Dec. 10, 1898. It lies between latitudes 13° 13″ and 13° 39′ north and longitudes 144° 37′ and 144° 58′ east. It is 30 miles long and 4 to 8½ miles wide. Distance from Manila, 1,506 miles; from San Francisco, 5,053 miles. The inhabitants call themselves Chamorros, but the present generation are a mixed race, with the Malay strain predominating. Their language, a Polynesian tongue, is also called Chamorro. About 10 per cent. speak English. Instruction in the English language is compulsory in the public schools. Guam is under the Navy Department, as a naval station. The Governor is a naval officer, commissioned by the President. A marine barracks, naval hospital and station ship are maintained. The Commercial Pacific Cable Company has a cable station in Guam, and cables from Manila, Yokohama, Midway and Yap Islands are landed here. There is a powerful Government radio station here. The port of entry is Apra, which is closed to foreign vessels, except by permit from the United States Government. Apra is commodious, but unimproved.

Trade with the United States was:

Fiscal Year	Imports	Exports
1926-27	$182,750	$110,464
1927-28	280,225	130,153
1928-29	393,983	79,681

WAKE AND THE MIDWAY ISLANDS.

The United States flag was hoisted over Wake Island on July 4, 1898, by Gen. F. V. Greene, commanding Second Detachment Philippine expedition. It is a small island in the direct route from Hawaii to Hongkong, about 2,000 miles from the first and 3,000 miles from the second. Its area is about 1 square mile.

The Midway Islands, owned by the United States, are a group in the North Pacific, 1,200 miles northwest of the Hawaiian Islands. A relay cable station of the Commercial Cable Company is established there. The area of the group is 28 square miles.

The Midway Islands are under the jurisdiction of the Navy Department.

THE LINCOLN MEMORIAL AT WASHINGTON.

The Lincoln Memorial in West Potomac Park, Washington, D. C., erected by authority of Congress, was designed by Henry Bacon, a New York architect, and was dedicated May 30, 1922. The cost was $3,000,000.

The sub-foundations consist of 122 concrete piers formed in steel cylinders driven to bed rock, which lies at a depth of 44 to 65 feet.

The superstructure is 201 feet 10 inches long by 132 feet wide at the outside of the bottom step of the stylobate course; it is 181 feet long by 111 feet 2 inches wide along a line running through the centre of the columns of the colonnade; it is 155 feet 6 inches long by 85 feet 8 inches wide along the outside of the wall of the building; it is 146 feet 6 inches long by 62 feet wide on the interior.

It is 57 feet from the floor of the Memorial Hall to the bronze beams of the ceiling.

There are 38 columns in the colonnade, including the two which stand in the entrance. These columns, 36 of which represent the number of States when Lincoln died, are 44 feet from the bottom joint to the top of the cap and are composed of 11 drums each, excluding the cap. Each column is 7 feet in diameter at the base, and is set with an entasis toward the building.

The interior columns are 5 feet 6 inches in diameter at the base and are 50 feet high from the floor to the top of the cap.

The height of the building from the top of the foundations to the top of the attic is 79 feet 10 inches. The height from bed rock to the top of the structure is therefore 79 feet 10 inches, plus 45 feet (the height of the upper foundation) plus the depth to bed rock (which varies from 44 feet, to 65 feet), making an aggregate height of from 169 to 192 feet.

The building is constructed of marble, granite, limestone, brick and concrete.

The foundations and floor slabs are of concrete, most of which is reinforced.

The exterior of the building is of Colorado Yule Marble from quarries in the Rocky Mountains 300 miles west of Denver. Some of the stones are of unusual size, weighing over 23 tons each. There are about 208,000 cubic feet of this material in the building.

The steps, platforms and check blocks are of Pink Milford Granite from Massachusetts.

The interior walls, columns and ceiling lintels are of Indiana limestone. There are about 43,506 cubic feet of this material in the building.

The interior floor, which is 2 inches thick, and the wall base are of Tennessee marble.

The ceiling consists of bronze beams with rectangular openings in which are placed slabs about 1 inch thick of marble from Alabama. These admit the light from overhead, through the glass skylight which covers the building.

The decorative carving upon the stone work was done by Ernest C. Bairstow of Washington, D. C.

The statue of Lincoln, by Daniel Chester French, sculptor, is executed in white marble. It is a seated figure upon an oblong pedestal about 10 feet high, 17 feet from front to back, by 16 feet wide. The plinth between the pedestal and the bottom of the seat is 1 foot 7 inches thick. The statue is 19 feet high from the top of the plinth to the top of the head. The extreme width of the statue (including the drapery over the chair) is 19 feet.

Behind the statue are these words: "In this temple, as in the hearts of the people for whom he saved the Union, the memory of Abraham Lincoln is enshrined forever."

The decorations, by Jules Guerin, are on canvas, each piece of which weighs 600 pounds and cost $400. About 150 pounds of paint are on each canvas, which is 60 feet long and 12 feet wide. The figures are 8½ feet high.

There are about 48 figures in the two panels. Almost as many models as figures were used. The head of Mr. Bacon, the architect, appears in the decoration on the north wall, the fourth figure in the group at the left of the Angel.

The decorations are weather-proof, the paint being mixed with white wax and kerosene. The wax hardens but does not allow the paint to crack the chemical. Chemically, it is similar to the wax found in the tombs of the Kings of Egypt, which is still pliable. The decorations are affixed to the wall with a mixture of white lead and Venetian varnish.

The decorations are not intended to tell a story, much being left to the spectator's imagination. In general terms the decorations on the south wall represent emancipation of a race; the subordinate groups represent Civilization and Progress. The decoration on the north wall represents Reunion and Progress in the arts and sciences.

On the walls are the Gettysburg speech and Lincoln's second inaugural address.

ORIGIN OF THE NAMES OF THE STATES AND TERRITORIES.

ALABAMA—Alibama was the Indian name of a tribe in Southern Alabama—a Mushhogean tribe of the Creek Confederacy. Alibamu is from the Choctaw words alba aya mule, meaning "I open or clear the thicket."

ALASKA—From "Al-ay-es-ka," a native Eskimo or Innuit word, meaning Great Country.

ARIZONA—From "Arizonac" ("Ari" small and "Zonac" spring) so-called by the Papago and Pima Indians, says State Historian Geo. H. Kelly (1927); and adds: "This state was called Arizona by the Spaniards as early as 1736." A simpler derivation is that given by Prof. John C. Van Dyke in "The Desert", page 208,—clipped from "Arida-Zona" meaning the "dry belt."

ARKANSAS—(Official pronunciation is ar-kan-saw), Algonkin name of the Quapaw Indians.

CALIFORNIA—Bestowed by the Spanish Conquistores, being the name of an imaginary island, very near an earthly paradise, in "Las Serges de Esplandian," a romance of chivalry written in the last decade of the 15th century.

COLORADO—Spanish, meaning red.

COLUMBIA, DISTRICT OF—A poetical adoption of the name of Columbus; applied to the territory in 1791 by the Federal Commissioners who laid it out.

CONNECTICUT—Indian, "Quonecktacut," Long River or River of Pines.

DELAWARE—Named after Lord De La War, of England, Governor of Virginia, who entered the Bay in 1610.

FLORIDA—Spanish words, "Pascua Florida," Feast of Flowers (Easter Sunday), on which day it is said to have been named, in 1513, by Juan Ponce de Leon.

GEORGIA—Named after King George II. of England.

HAWAII—English spelling of Owhyhee, where Capt. Cook was killed by the natives in 1779.

IDAHO—Indian words, "Edah hoe," Light on the Mountains.

ILLINOIS—Indian word, by some translated "The River of Men." A form of the word Iliniwek. "Ilini" meant "man," "iw" meant "is," and "ek" was a plural signification.

INDIANA—Named after Indians, State of Indians.

IOWA—The Ioways, or Alaouez, or Alaouas were a Sioux tribe. The word means "sleepy ones." They called themselves "Pahoja," gray snow.

KANSAS—Name of a tribe of the Sioux; the "People of the South Wind."

KENTUCKY—From Wyandot (Iroquoian) name "Ken-tah-teh," meaning to-morrow, or Land of To-morrow.

LOUISIANA—Named by the Mississippi River navigator Robert de la Salle, in 1682, after King Louis XIV. of France.

MAINE—From Maine, an ancient province of France, south of Normandy, owned by Queen Henrietta Maria of England, wife of King Charles I.

MARYLAND—Named in honor of the foregoing, Queen Henrietta Marie.

MASSACHUSETTS—An Algonkin Indian name from Massachu-es-et, meaning "great-hill-small place," indicating a place at or about the big little hills.

MICHIGAN—The Mishigamaw or Mishawiguma were Indians. The word means "big lake" and was applied to Lake Michigan. "Michi" meant "great," and "gama" meant "water."

MINNESOTA—2 Sioux words—"sky-colored water."

MISSISSIPPI—Indian words "Sipu," Algonquin word for river; "Maesi," fish—Fish-River.

MISSOURI—The Missouri were Sioux of that name.

MONTANA—Spanish for mountainous; used now by Peruvians as a name for their Andean districts.

NEBRASKA—An Omaha Indian name for the "wide river," Platte.

NEVADA—A Spanish word, meaning "snow clad."

NEW HAMPSHIRE—Named, in 1629, after the County of Hampshire, England, by the patentee, Capt. John Mason of the Plymouth Council.

NEW JERSEY—In 1664 the Duke of York, of England, granted to Lord John Berkeley and Sir George Carteret a patent or deed to the present boundaries to be called Nova Caesaria, or New Jersey. Caesarea, or Caesaria, was the ancient name of the Island of Jersey of which Carteret had been administrator.

NEW MEXICO—Mexico is a word derived from the Aztec word "mexitli," title of their national war god.

NEW YORK—So called in honor of the Duke of York (1664), who got the patent from his brother, King Charles II. of England, and sent an expedition and took possession of New Netherlands.

NORTH CAROLINA—The Carolinas were originally named, it is said, in honor of King Charles IX. of France by Jean Ribault, whose expedition (1562) was financed by Admiral Coligny. "Carolus" is the Latin word for Charles. In 1663, King Charles II. granted a patent to the land under the name of Carolina.

NORTH DAKOTA—"Dakota" means "alliance of friends," and is a Sioux Indian word. Koda in Santee dialect and Koia in Teton dialect are the root words.

OHIO—Iroquois name, denoting great.

OKLAHOMA—Choctaw word for "red people."

OREGON—The Oregon State Librarian, Cornelia Marvin, says various origins of the name have been suggested as follows: *Origanum*, a wild sage found on the coast; *Orejon*, or Oregones, a Spanish name for big-eared (Indian) men; Orgon, a river in Chinese Tartary; *Oyer-un-gen*, a Shoshone Indian word for "place of plenty;" *Awa aqua*, Spanish word meaning gently falling waters: *Ouragan*, a French word for hurricanes; *Wau-re-gan*, an Algonkin word for "beautiful water."

PENNSYLVANIA—Was named in honor of Admiral William Penn, the father of William Penn, the founder of the province. William Penn, the Friend, received a charter in 1681 from Charles II of Great Britain for land in America that was given the name of "Pensilvania" (Penn's Woods) by the King. The name "Pensilvania" was used for many years by William Penn and his sons, Thomas and Richard, to designate the province. The grant was made in settlement of a debt of 16,000 pounds which King Charles and the British Government owed Admiral Penn. The charter was granted March 4, 1681, and by an act of the General Assembly of 1927, that day is officially set apart as Pennsylvania Day in the Commonwealth.

PHILIPPINES—Spanish. "Islas Filipinas," discovered in 1521 by Magellan, whom the natives killed in a skirmish; named in honor of King Philip II. of Spain by a colonizing expedition from Mexico.

PORTO RICO—From the Spanish "Puerto Rico," Rich Port.

RHODE ISLAND—"Isles of Rhodes" was the name, chosen by the General Court of the colony, in 1644. The name of one of the islands had been Aquedneck. The name of Providence Plantations then gradually lapsed.

SOUTH CAROLINA—(See North Carolina).

SOUTH DAKOTA—(See North Dakota).

TENNESSEE—Called, from 1784 to 1788, the State of Franklin, or Frankland. "Tennese" was the Indian name for the chief town of the Cherokees, which was on the Little Tennessee River.

TEXAS—According to Elizabeth H. West, State Librarian at Austin, "Texas is an Indian word meaning Friends or Allies. So far as I know, it has not an Aztec origin. It applied, originally, in the Indian usage to the Indian tribes about the early Spanish missions around Eastern."

UTAH—Named after the Utes, an Indian tribe.

VERMONT—From Verd and Mont, two French words meaning Green Mountains. The name is said to have been bestowed by Samuel de Champlain.

VIRGINIA—Named in honor of Elizabeth, daughter of Henry VIII., sometimes called by her courtiers the "Virgin Queen" of England. The name was bestowed by one of the courtiers, Sir Walter Raleigh, who fitted out the expedition of discovery in 1584.

WASHINGTON—Named after George Washington. When the bill creating the Territory of Columbia was introduced in the 32nd Congress, second session, the name was changed in the bill to Washington because of the existence of the District of Columbia.

WEST VIRGINIA—(See Virginia).

WISCONSIN—An Indian name which, according to Reuben Gold Thwaites, was originally spelled "Ouiscousin" by the French missionaries and in old French-American documents; also was spelled "Misconsing," "Ouisconching," "Ouiskonsing." The Yankee settlers spelled it "Wiskonsan," then "Wiskonsin;" but Congress changed it to "Wisconsin."

WYOMING—The word was taken from Wyoming Valley, Pennsylvania, rendered famous from Campbell's poem, "Gertrude of Wyoming." The word means "mountains and valleys alternating."

MOTTOES OF THE STATES OF THE UNION.

The motto of the **United States**, adopted by act of Congress, June 20, 1782, is: E Pluribus Unum (Many in One).

The mottoes of the States of the Union are as follows, the date following the name, where given, being that of the adoption of the seal:

Alabama—Dec. 29, 1868, Here We Rest.
Arizona—1863, Ditat Deus (God Enriches).
Arkansas—May 3, 1864, Regnant Populi (The People Rule).
California—Eureka (I Have Found It).
Colorado—1861, Nil Sine Numine (Nothing Without God).
Connecticut—Oct., 1842, Qui Transtulit Sustinet (He Who Transplanted Still Sustains).
Delaware—Liberty and Independence.
District of Columbia—Justitia Omnibus (Justice to All).
Florida—1846, In God We Trust.
Georgia—Dec. 5, 1799, Wisdom, Justice, Moderation.
Idaho—March 5, 1886, Esto Perpetua (May It Last Forever).
Illinois—Aug. 26, 1818, State Sovereignty—National Union.
Iowa—Feb. 25, 1847, Our Liberties We Prize, and Our Rights We Will Maintain.
Kansas—Jan. 29, 1861, Ad Astra per Aspera (To the Stars Through Difficulties).
Kentucky—Dec. 20, 1792, United We Stand, Divided We Fall.
Louisiana—Union, Justice, and Confidence.
Maine—Jan. 9, 1820, Dirigo (I direct).
Maryland—Aug. 12, 1648, Fatti Maschii Parole Femine (Manly Deeds and Womanly Words). Scuto Bonae Voluntatis Tuae Coronasti nos (With the Shield of Thy Good-Will Thou Hast Covered Us).
Massachusetts—Dec. 13, 1780, Ense Petit Placidam sub Libertate Quietem (With the Sword She Seeks Quiet Peace Under Liberty).
Michigan—1835, Si Quaeris Peninsulam Amoenam Circumspice (If Thou Seekest a Beautiful Peninsula, Behold It Here).
Minnesota—1858, Etoile du Nord (The Star of the North).
Mississippi—Feb. 7, 1894, Virtute et Armis (By Valor and Arms).
Missouri—Jan. 11, 1822, Salus Populi Suprema Lex Esto (Welfare of People Is the Supreme Law).
Montana—May 24, 1864, Oro y Plata (Gold and Silver).
Nebraska—March 1, 1867, Equality Before the Law.
Nevada—Feb. 24, 1866, All for Our Country.
New Jersey—Oct. ?, 1776, Liberty and Prosperity.
New Mexico—Sept. 9, 1850, Crescit Eundo (It Grows as It Goes).
New York—1809, Excelsior (Higher).
North Carolina—1893, Esse Quam Videri (To Be Rather Than to Seem).
North Dakota—Liberty and Union, Now and Forever, One and Inseparable.
Ohio—April 6, 1866, Imperium in Imperio (An Empire Within an Empire).
Oklahoma—Labor Omnia Vincit (Labor Conquers All Things).
Oregon—1857, Alis Volat Propriis (She Flies With Her Own Wings).
Pennsylvania—March 2, 1809, Virtue, Liberty, and Independence.
Rhode Island—1664, Hope.
South Carolina—Animis Opibusque Parati (Prepared in Spirit and Wealth). Dum Spiro, Spero (While I Breathe I Hope).
South Dakota—Under God the People Rule.
Tennessee—1796, Agriculture, Commerce.
Utah—Industry.
Vermont—Sept., 1866, Freedom and Unity.
Virginia—Oct., 1779, Sic Semper Tyrannis (Thus Always to Tyrants).
Washington—1853, Al-ki (By and By).
West Virginia—Sept. 26, 1863, Montani Semper Liberi (Mountaineers Always Freemen).
Wisconsin—Forward.
Wyoming—1868, Cedant Arma Togae (Let Arms Yield to the Gown).
Indiana, New Hampshire, and **Texas** have no motto.

The Massachusetts "Mayflower" (*Epigaea repens*) is also known as Trailing Arbutus, or Ground Laurel. It belongs to the *Heath* family of plants.

From time to time Congress has been asked to adopt a national flower, but has taken no step to that end.

DIMENSIONS AND AREA OF THE UNITED STATES (CONTINENTAL).

The gross area of the United States is 3,026,789 square miles. The land area amounts to 2,973,774 square miles, and the water area—exclusive of the area in the Great Lakes, the Atlantic, the Pacific, and the Gulf of Mexico, within the three-mile limit—amounts to 53,015 square miles.

The southernmost point of the mainland is Cape Sable, Fla., which is in latitude 25° 07′ and longitude 81° 05′. The extreme southern point of Texas is in latitude 25° 50′ and longitude 97° 24′.

A small portion of Northern Minnesota at longitude 95° 09′ extends northward to latitude 49° 23′.

The easternmost point of the United States is West Quoddy Head, near Eastport, Me., in longitude 66° 57′ and latitude 44° 49′; the westernmost point is Cape Alava, Wash., in latitude 48° 10′, which extends into the Pacific Ocean to longitude 124° 44′.

From the southernmost point in Texas due north to the forty-ninth parallel, the boundary between the United States and Canada, the distance is 1,598 miles. From West Quoddy Head due west to the Pacific Ocean the distance is 2,807 miles. The shortest distance from the Atlantic to the Pacific across the United States is between points near Brunswick, Ga., and San Diego, Cal., 2,103 miles.

The length of the Canadian boundary line from the Atlantic to the Pacific is 3,986.5 miles. The length of the Mexican boundary from the Gulf to the Pacific is 1,744 miles.

The average elevation of Delaware is only 60 feet above sea level, according to the United States Geological Survey, less than that of any other State in the Union.

COAST LINE OF THE UNITED STATES.

(By the U. S. Coast and Geodetic Survey.)

General Coast Line—The figures under this heading give the length in statute miles of the general outline of the seacoast. The measurements were made with a unit measure of 30 minutes of latitude on charts as near the scale of 1-1,200,000 as possible.

Tidal Shore Line, Unit Measure 3 Statute Miles—The figures under this heading give the length in statute miles of the shore line on tidal waters to points where such waters narrow to a width of 3 statute miles.

The Panama Canal Zone—Islands outside the 3 nautical mile zone were not included.

UNITED STATES FRIGATE CONSTITUTION.

One of the three first ships of the American Navy. Launched 1797 at Boston, Mass., for services against the Algerian pirates.

In 1798-99 suppressed French privateering in the West Indies.

Bombarded the forts of Tripoli and helped throw off the yoke of the Barbary States, to whom the United States had been paying annual tribute.

Renowned for her victories during the War of 1812 over the Guerriere, Java, Cyane, Levant and Pictou, which had the effect of sustaining the morale of the country.

Earned the nickname of "Old Ironsides" in the historic fight with the Guerriere when the enemy's cannon balls rebounded from her oaken hull.

Her famous commanders were Preble, Hull, Decatur, Bainbridge, Stewart and Dewey.

Her first flag was fashioned by Betsy Ross and the copper in her hull was wrought at the foundry of Paul Revere.

Has maintained American rights on every ocean and sailed 500,000 miles in her 84 years of active service.

New York State Statistics.

The Almanac presents in the following pages tables and other detailed data relating to the State of New York.

POPULATION OF CITIES IN N. Y. STATE—1925, 1920.

MANUFACTURES IN NEW YORK STATE 1849-1927.

(Data are revised and are by the United States Census Bureau.)

The State of New York has ranked first since 1904 in value of manufactured products, its nearest competitors being Pennsylvania, Illinois, Ohio, Michigan, New Jersey, Massachusetts, California, and Indiana. Below is given a survey covering the years, 1849-1927.

COMPARATIVE SUMMARY.

Year.	No. Estab.	No. Wage Earners.	Horse Power.	Wages in the Year.	Cost of Materials.	Value of Products.	Capital
				Dollars.	*Dollars.*	*Dollars.*	*Dollars.*
1849....	23,553	199,349		49,131,000	134,655,674	237,597,249	99,904,405
1859....	22,624	230,112		65,446,759	214,813,061	378,870,939	172,895,652
1869....	36,206	351,800	334,363	142,466,758	452,065,452	785,194,651	366,994,320
1879....	42,739	531,533	454,143	198,634,029	679,612,545	1,080,696,596	514,246,575
1889....	65,840	752,066	776,820	370,380,559	871,264,085	1,711,577,671	1,130,161,195
1899....	78,658	849,056	1,181,369	408,855,652	1,143,791,776	2,175,726,900	1,651,210,220

The figures for the above years include data for "hand and neighborhood industries," such as blacksmithing, carpentry, shoe repairing, tailoring, dressmaking, etc. Those were the "sweatshop" days.

The figures for the years in the table below exclude such items, taking in only the larger plants.

Year.	No. Estab.	No. Wage Earners.	Horsepower.	Wages in the Year.	Cost of Materials.	Value of Products.	Capital
1899....	35,957	726,909	1,099,931	337,323,585	1,018,377,186	1,871,830,872	1,523,502,651
1904....	37,194	856,947	1,516,592	430,014,851	1,348,603,286	2,488,345,579	2,031,459,515
1909....	44,935	1,003,981	1,997,662	557,230,839	1,856,904,342	3,369,490,192	2,779,496,814
1914....	48,203	1,057,857	2,356,655	631,042,011	2,108,607,361	3,814,661,114	3,334,277,526

WORKMEN'S COMPENSATION IN NEW YORK STATE.

The Workmen's Compensation Law of New York covers any organization, regardless of whether or not it is carried on for pecuniary gain, if there are 4 or more workmen or operatives. This includes religious, charitable, and fraternal bodies.

It expressly excludes farm laborers and domestic servants.

An amendment of 1929 specifically exempts teachers, ministers, and other non-manual workers for a religious, charitable, or educational corporation.

All State employees are entitled to compensation.

Railroad employees injured in interstate commerce are excluded by the Federal Employers' Liability Act.

Masters and crews of vessels on navigable waters are excluded by the Admiralty jurisdiction of the Federal courts. Longshoremen and other maritime workers if injured on docks are protected by the compensation law, but if injured upon navigable waters, including dry docks, compensation is paid under the Federal "Longshoremen's and Harbor Workers' Compensation Act," approved March 4, 1927. Masters and crews, and workers engaged in unloading or repairing, are excluded from compensation if the vessel on which accident occurs is under eighteen tons net.

The injured employee or others must give written notice of the accident to the employer and the Department of Labor within thirty days and must file claim for compensation within a year.

The accident must not be due to the injured employee's wilful intent to injure himself or another or solely to his intoxication.

The employer is entitled to select the physician or hospital or to consent to the employee's selection; otherwise the employee is liable for the fees.

The compensation of a disabled employee is two-thirds of his weekly wages, but not to exceed $25 in cases of total disability, whether temporary or permanent, or $20 in case of partial disability or be less than $8, except that the compensation is the same as the wages when the wages are less than $8.

In death cases awards are made to dependents in accordance with a schedule provided therefor. The total amount of such benefits must not exceed two-thirds of the average weekly wage of the deceased based on maximum earnings of $150 a month.

All awards draw interest in 30 days after the making thereof.

The only situation where the carrier can absolutely debar award by objecting to the failure to file a claim will be when the first hearing is not held until a year or more after the accident.

Compensation (other than death) benefits granted by the law:

Permanent total disability—two-thirds of the average weekly wage for period of disability.

Permanent partial disability—two-thirds of the average weekly wage for periods specified in a schedule arranged by parts of the body, ranging from 15 weeks for loss of little finger to 312 weeks for an arm. In case of protracted temporary total disabilities in connection therewith, the injured is compensated in addition for the length of the temporary total disability in excess of periods stated in a schedule.

Temporary total disability—two-thirds of the average weekly wage for the period of disability, but not to exceed $5,000.

Occupational disease—two-thirds of the average weekly wage during the period of disability.

Waiting period—the first seven days' disability are not compensated unless the disability exceeds forty-nine days.

The first payment of compensation becomes due on the fourteenth day of disability and if the case is not controverted, payment of compensation must begin on or before the eighteenth day after disability or within eight days after the employer first has knowledge of the accident. A notice of controversy must be filed on or before the eighteenth day of disability.

Failure to pay an instalment of compensation within eighteen days after it is due, carries with it an additional 10 per cent. of the compensation which accrues to the injured workman.

Minors under 18 years of age who are employed in violation of the Labor Law are entitled to double compensation.

A total of 521,624 industrial accidents occurred in this State in 1928, as against 484,573 in 1927. Of the accidents, 325,423 were in New York City.

Industrial accidents cost nearly $80,000,000 a year in this State, including $29,000,000 in compensation paid.

What are called *compensatable* industrial accidents in New York State totaled 93,565 in the year ended June 30, 1928, as against 98,984 in 1927, and 99,673 (peak) in 1926.

Of the 93,565 compensatable accidents, 2,152 occurred to employees under 18 years of age, and 7,031 to persons 18 to 20 years of age.

NEW YORK STATE INSURANCE FUND.

The State Insurance Fund was created by the Legislature in 1914 to furnish workmen's compensation insurance to the employers of New York State at net cost. The Fund is self-supporting, using no money raised by taxation. It is subject to examination by the State Insurance Department.

The Fund home office is at 432 Fourth Avenue, New York City. It has district offices in Albany, Syracuse, Rochester and Buffalo.

The Fund is administered by the State Industrial Commissioner, with an Advisory Committee of policyholders appointed by the Governor to assist him.

The Fund has paid dividends of 15% for the last eight years to its general group policyholders. Its total expense is approximately 17% of its written premiums.

There were 22,954 employers, with 300,000 workers insured in the Fund as of Dec. 1, 1928.

Premiums written from 1914 to 1927 inclusive amounted to $48,248,195; premiums written in 1928 were $8,346,122, and more than $3,000,000 was paid to injured employees, or to relatives of those who were killed.

The financial statement of the Fund as of December 31, 1928 follows:

Assets—Bonds—market value, $12,143,157; other and total admitted assets, $16,336,347.

Liabilities, Reserves and Surplus—Reserve for losses, $10,107,925; other and total liabilities and reserves, $14,034,272.

Surplus, $2,302,075. Total liabilities, reserves and surplus, $16,336,347.

MINERALS AND MINING IN NEW YORK STATE.

The mines and quarries of New York State, according to the New York State Museum, yield materials valued at more than $113,000,000 a year in their first marketable forms.

The State has no gold, silver or coal deposits, but is a leading producer of such materials as gypsum, salt, limestone, clay wares, cement and abrasives, and contains important resources of iron ore, petroleum, natural gas, and other ores and minerals.

Iron ore has been mined and smelted since about 1750. The deposits are widely distributed; magnetite is obtained in the Adirondacks and Hudson Highlands, hematite in the Clinton belt of the central and western countries, limonite in Dutchess and Columbia counties. The production of ore is reported as worth $3,103,312. The manufacture of iron and steel is very important.

Zinc ore occurs in St. Lawrence, Orange, Ulster and Sullivan counties, but the first named is the main producer. The output has a value of $756,150.

Petroleum and natural gas represent a value of $11,799,000 and have gained in importance recently although the industries were started more than 50 years ago. Allegany and Cattaraugus counties account for most of the oil output; natural gas occurs in several additional counties.

Gypsum in recent years has come into wide use for building purposes, and in the mining and manufacture of this material New York leads all other States. The principal enterprises are in Erie, Genesee and Monroe counties. The mine output is reported as 1,723,460 short tons, with a value for the materials at points of origin of $16,794,589.

Salt is produced to the amount of 14,297,000 barrels valued at $6,564,829. Both rock salt and evaporated salt are obtained, the former being used extensively by refrigeration plants, chemical works, and for purposes that do not require a refined grade. It is mined from shafts that reach the salt beds at depths between 1,000 and 2,000 feet.

The production of salt by brine evaporation has been in progress in the central part of the State since about 1790 and was practised by traders among the Indians on a limited scale long before that time. The salt resources are the basis of a large chemical manufacture in alkalis and bleaching powders, also chlorine.

The salt beds are inexhaustible, having an areal spread of nearly 10,000 square miles.

Cement manufacture, in which local clays and limestones are utilized, has had a rapid growth, as the State is probably the largest consumer of this material in the entire country. The works are mostly centered in the Hudson valley below Albany, but there are plants also in Warren, Schoharie, Tompkins, Onondaga and Erie counties. The output of 8,535,862 barrels valued at $14,864,066, will show substantial gains in future years.

Clay and clay manufactures inclusive of brick, tile, terra cotta and pottery are valued at nearly $30,000,000. Supplies of clays suitable for common wares are widespread. Building materials represent the main items of manufacture, although pottery, which requires high-grade clays that are obtained from outside of the State, is produced successfully.

The quarry stones include granite and marble in the Adirondacks and Hudson Highlands, and a varied assortment of limestones and sandstones from other regions. Trap for crushed stone is obtained in Rockland county. The total products have a value of about $15,000,000.

The mines of talc in St. Lawrence county are the largest in the country, with an annual product of 83,231 short tons valued at $1,030,075.

Other mineral materials obtained in New York State are garnet, diatomaceous earth, quartz and emery for abrasive purposes, feldspar, pyrite, slate, millstones, molding sand, and building sand and gravel.

ALTITUDES OF PLACES IN NEW YORK STATE.

(Revised in 1924 by the State Geologist; places on tidewater not named.)

NEW YORK STATE MOUNTAIN PEAKS.

(Revised in 1927 by U. S. Geological Survey. Figures show feet above mean sea level.)

Adirondacks—The principal mountain group in the Empire State, occupying an area of 5,000 square miles. They cover all or large parts of Clinton, Essex, Franklin, and Hamilton counties, with smaller parts of several adjoining counties.

Catskills—They cover an area of 1,000 square miles, principally in Greene, Ulster, Sullivan, and Delaware counties.

CHIEF ADIRONDACK PEAKS.

AUTO ACCIDENTS IN 1928 IN NEW YORK STATE.

(Data Compiled by Charles A. Harnett, Motor Vehicle Bureau Commissioner.)

The total number of persons killed was 2,582 in 1928 as against 2,420 in 1927.

Of those killed in 1928, children under 5 yrs. numbered 119; 5–14 yrs., 477; 15-54 yrs., 1,663.

Pedestrians killed in 1928 by collision with autos totaled 1,538; wounded, 45,789.

The number of persons injured by autos but not fatally in 1928 was 99,302, as against 85,862 in 1927.

Of the 108,216 autos involved in 1928 in accidents 73,706 were in apparent good condition.

Persons killed in auto accidents in 1928 at Railroad crossings numbered 101.

During 1928 there were 2,115,178 motor vehicles registered in N. Y. State as compared with 1,961,107 in 1927.

In 1928 licenses were issued to 1,836,968 operators and 757,188 chauffeurs.

A tax of 2 cents a gallon on gasoline or other motor fuel, went into effect in New York State on May 1, 1929. Of the revenue thus derived, 75 per cent is used by the State for road building and upkeep; 5 per cent goes to New York City; 20 per cent is distributed among the counties outside greater New York.

In New York State a marriage may be solemnized by a leader of the Ethical Culture Society of Manhattan or Brooklyn.

All persons under 21 years of age who wish to marry must file notice with the license officials 5 days in advance, and they must present certificates or other evidence of date of birth, before receiving the license. They can be married at the City Chapel, New York City, only by a judge of a court of record.

Dissolution of marriage on ground of absence—A party to a marriage may present to the Supreme Court a duly verified petition showing that the husband or wife of such party has absented himself or herself for five successive years then last past without being known to such party to be living.

Marriages under sixteen years of age. Any marriage in which the man is under the age of sixteen years or in which the woman is under the age of fourteen years is hereby prohibited. Any town or city clerk who shall knowingly issue a marriage license to any man actually under the age of sixteen years or to any woman actually under the age of 14 years, shall be guilty of a misemeanor and on conviction thereof shall be fined in the sum of one hundred dollars for each and every offense.

In New York State, also, it is required, under a 1929 law that a woman who is 14 but not 16 years of age, must have the consent of a judge of the Children's Court in her jurisdiction (in addition to consent of parent or guardian) before she can marry.

Another amendment legalizes a **written contract of marriage** signed by both parties and at least two witnesses who shall subscribe the same, stating the place of residence of each of the parties and witnesses and the date and place of marriage, and acknowledged by the parties and witnesses in the manner required for the acknowledgment of a conveyance of real estate to entitle the same to be recorded, provided, however, that all of such contracts of marriage must in order to be valid be acknowledged before a judge of a court of record.

Such contract shall be recorded within thirty days after its execution in the office of the State Department of Health, and a copy thereof shall be filed within thirty days after its execution in the office of the clerk of the county in which the marriage was solemnized.

Another amendment requires town or city clerks, before issuing a license, to get from each of the parties a statement in the following words: "I have not to my knowledge been infected with any venereal disease, or if I have been so infected within five years I have had a laboratory test within that period which shows that I am now free from infection from any such disease."

By another amendment, marriages may be solemnized by "a justice or judge of a court of record, or of a municipal court, a police justice of a village, or a justice of the peace; except that justices of the peace in cities which contain more than 150,000 and less than 1,000,000 inhabitants, shall have no power to solemnize marriages."

By the law of March 26, 1928, **incurable insanity** is ground for annulment of marriage in New York State if it exists for 5 years or longer.

WOMEN WHO HAVE BEEN EXECUTED IN N. Y. STATE.

Mrs. Margaret Houghteling was the first woman to hang. That was in Hudson in 1817, six weeks after indictment for killing her child. She swore her innocence, and several years later another woman confessed on her deathbed, that she, not Mrs. Houghteling, had murdered the child.

Mrs. Elizabeth Van Valkenburg poisoned her husband, and was hanged at Johnstown, in 1846.

Mrs. Alice Runkle was hanged at Whitesboro in 1849, for poisoning her husband.

Mrs. Ann Hoag was hanged at Poughkeepsie in 1852, for poisoning her husband.

Mrs. Roxalanna Druse killed her husband and was hanged in February, 1887.

Mrs. Martha Place, a Brooklyn housewife, was accused of murdering her stepdaughter February 8, 1898. She was arrested, confessed, was convicted, was denied a new trial and went to the chair March 20, 1899, the first woman so to die in this state.

Mrs. James D. Farmer, wife of a farmer, for the murder of Mrs. Sarah Brennan in an up-state county, was executed in Auburn prison March 20, 1909.

Mrs. Ruth Brown Snyder, and her lover, Henry Judd Gray, were executed at Sing Sing Prison, Jan. 12, 1928, for the murder of the woman's husband, Albert Snyder, who was found beaten to death in their home, Queens Village, L. I., early on Mar. 20, 1927.

NEW YORK STATE PENAL INSTITUTIONS.

State Prisons—*Auburn*, at Auburn, Cayuga County; *Clinton*, at Dannemora, Clinton County; *Great Meadow*, at Comstock, Washington County; *Sing Sing*, at Ossining, Westchester County.

On March 17, 1928, the inmates of the four State prisons totaled 5,999, distributed as to employment as follows: industries, 2,699; maintenance, 2,023; construction, 294; road work, 41; in hospital or idle on doctor's orders, 670; musicians, 82; schools, 110; discipline, 47; under observation, 14; in death cells, 11; at court or on escape, 8.

State Institutions for Criminal Insane—*Matteawan State Hospital*, at Beacon, Dutchess County; *Dannemora State Hospital*, at Dannemora, Clinton County.

State Institution for Defective Delinquents, at Napanoch, Ulster County.

State Reformatories—*Elmira Reformatory*, at Elmira, Chemung County; *State Reformatory for Women*, at Bedford Hills, Westchester County; *State Training School for Women*, at Albion, Orleans County. The Elmira Reformatory receives, from the courts, sentenced male criminals not under 16 nor over 30 years of age who are convicted of or who plead guilty to a felony for the first time.

The **House of Refuge**, on Randall's Islands, New York City, is a private corporation, but is under State supervision.

The State hospitals for the (non-criminal) insane are located at *Binghamton*, in Broome County; at *Brooklyn*, in Kings County; at *Buffalo*, in Erie County; at *Central Islip*, in Suffolk County, L. I.; at *Gowanda* (homeopathic), in Cattaraugus County; at *Poughkeepsie*, in Dutchess County; at *Kings Park*, in Suffolk County, L. I.; at *Ward's Island*, in N. Y. County; at *Middletown* (homeopathic), in Orange County; at *Rochester*, in Monroe County; at *Ogdensburg*, in St. Lawrence County; at *Utica*, in Oneida County; at *Wingdale*, in Dutchess County, and at *Willard*, in Seneca County.

The State Hospitals for the criminal insane are at *Beacon* (Matteawan), in Dutchess County; and at *Dannemora*, in Clinton County.

THE NEW YORK STATE CANAL SYSTEM.

(Erie Canal opened in 1825; canal system made free in 1882)

The canal system of the State consists of the Erie Canal; the Champlain Canal; the Oswego Canal; the Cayuga-Seneca Canal; Cayuga Lake Inlet, at Ithaca; the Glens Falls Feeder, and the lakes, reservoirs, feeders, harbor basins and terminal docks connected therewith.

What is commonly known as the Barge Canal includes the improved Erie, Champlain, Oswego and Cayuga-Seneca Canals. They took the place of the old canals which had been in existence since 1825.

The Erie Barge Canal is the main waterway and extends across the State from Troy to Buffalo. Officially, the route commences at Congress Street, Troy, and follows the line of the Hudson River to Waterford, where the westward turn is made. From Waterford the line of the Mohawk River, canalized, is generally followed to a point beyond Little Falls. Westerly from this point the new channel follows the route of the old canal in part, but passes the northerly outskirts of the City of Utica on a new line, thence to the south of Rome and then into and across Oneida Lake. Passing out of Oneida Lake the Oneida River is used to its junction with the Seneca River at Three River Point; thence through the Seneca River to and through the Clyde River to a point east of Lyons; thence following the old canal, deepened and enlarged, to a point beyond Pittsford. Here the channel leaves the old route, crossing the Genesee River about a mile south of Rochester on a pool created by the construction of a dam, joining the line of the old canal a few miles westerly, and continuing thence in the former channel, deepened and widened, to and through Tonawanda Creek, where the Niagara River is entered and followed to Lake Erie, at Buffalo.

The Cayuga-Seneca Barge Canal extends in a southerly direction from the Erie Barge Canal at a point near Montezuma. The Cayuga branch follows the valley of the Seneca River to Cayuga Lake; thence through Cayuga Lake to the Cayuga Lake Inlet at Ithaca. The Seneca branch follows the Seneca River in a westerly direction from the Cayuga branch near the foot of Cayuga Lake, and connects with Seneca Lake near Geneva; thence through Seneca Lake to Watkins, to Montour Falls.

The width of the Barge Canal channel varies according to the section traversed. Through canalized rivers and lakes the channel is at least 200 feet wide. Through rock cuts in land lines a minimum bottom width of 94 feet has been provided, and through earth sections the minimum width of the bottom of the channel is 75 feet. The locks of the Barge Canal are uniform in size. The inside dimensions of the lock chambers are 310 feet in length and 45 feet in width and are capable of passing a barge 300 feet long, and 42 feet wide. A depth of water of 12 feet over the mitre sills has been provided. Clearance under fixed bridges spanning the channel is 15½ feet at normal water.

Total mileage in canalized ribers and lakes, 382.

In the City of New York there are eight terminals as follows:

At Piers 5 and 6, East River, and at the foot of West 53d Street, on the Hudson River, in Manhattan; at Mott Haven (138th Street, Harlem River) in the Bronx; on the East River, at the foot of North Jane Street, Long Island City; at Flushing and at the foot of Broadway, Hallett's Cove, Queens; and at the foot of Columbia Street, Gowanus Bay; at Dupont Street, Greenpoint, Brooklyn.

A grain elevator of 2,000,000 bushels capacity, providing every modern facility, has been erected by the State at the Gowanus Bay Terminal.

A similar structure of 1,000,000 bushels capacity has been completed by the State at Oswego, on Lake Ontario.

Total cost of the canals to date is about $175,000,000.

The canals are owned by the State and are under the jurisdiction of the Superintendent of Public Works, under the supervision of the Commissioner of Canals and Waterways. Navigation is free. The main office of the Superintendent of Public Works is at 353 Broadway, Albany. Branch offices are at Pier 6, East River, N. Y. City, and in Utica, Syracuse, Rochester and Buffalo.

In 1928 a cargo of Oregon wheat that had come through the Panama Canal went through the Barge Canal from New York City to Buffalo.

COUNTY SEATS IN NEW YORK STATE.

Following is a list of the County seats in the State of New York which are the headquarters of the courts and other official institutions:

County.	County Seat.	County.	County Seat.	County.	County Seat.
Albany	Albany.	Herkimer	Herkimer.	Richmond	St. George.
Allegany	Belmont.	Jefferson	Watertown.	Rockland	New City.
Bronx	Bronx Boro NYC	Kings	Brooklyn Boro.	St. Lawrence	Canton.
Broome	Binghamton.	Lewis	Lowville.	Saratoga	Ballston Spa.
Cattaraugus	Little Valley.	Livingston	Geneseo.	Schenectady	Schenectady.
Cayuga	Auburn.	Madison	Wampsville.	Schoharie	Schoharie.
Chautauqua	Mayville.	Monroe	Rochester.	Schuyler	Watkins Glen.
Chemung	Elmira.	Montgomery	Fonda.	Seneca	Waterloo.
Chenango	Norwich.	Nassau	Mineola.	Steuben	Bath.
Clinton	Plattsburg.	New York	Manhattan Boro.	Suffolk	Riverhead.
Columbia	Hudson.	Niagara	Lockport.	Sullivan	Monticello.
Cortland	Cortland.	Oneida	Utica.	Tioga	Owego.
Delaware	Delhi.	Onondaga	Syracuse.	Tompkins	Ithaca.
Dutchess	Poughkeepsie.	Ontario	Canandalgua.	Ulster	Kingston.
Erie	Buffalo.	Orange	Goshen.	Warren	Lake George.
Essex	Elizabethtown.	Orleans	Albion.	Washington	Hudson Falls.
Franklin	Malone.	Oswego	Oswego.	Wayne	Lyons.
Fulton	Johnstown.	Otsego	Cooperstown.	Westchester	White Plains.
Genesee	Batavia.	Putnam	Carmel.	Wyoming	Warsaw.
Greene	Catskill.	Queens	Jamaica.	Yates	Penn Yan.
Hamilton	Lake Pleasant.	Rensselaer	Troy.		

There were in 1920 in New York 932 towns, 59 cities, and 47 incorporated villages. Long Beach became a city in 1922.

Cities of the 1st class in New York State are of over 175,000 inhabitants; 2d class, from 50,000 to 175,000; 3d class, under 50,000.

St. George became the county seat of Richmond County in January, 1920.

1908 figures cover only five months, because the excise year was changed so as to begin Oct. 1 instead of May 1. Figures for 1917 and later cover years ended June 30.

The bootleggers now get most of the excise revenues, which they split with the U. S. Internal Revenue when they make—if they do so make—their income tax returns.

NEW YORK STATE BANKING STATISTICS.

(The figures, which are official, and cover only institutions with State Charters, are as of June 29, 1929.)

Resources.	Banks (236).	Trust Cos. (144).	Liabilities.	State Banks.	Trust Cos.
	Dollars.	*Dollars.*		*Dollars.*	*Dollars.*

Policies include only *ordinary*; assets include *admitted*; liabilities do not include capital and surplus.

The table covers the operations inside and outside the state of all companies doing business in the State.

Industrial policies in force, as of Dec. 31, 1928, numbered 71,971,497 covering insurance for $14,206,989,776; group policies, 14,833, for $7,351,548,312 premium income from casualty or miscellaneous insurance in 1928 was over $759,000,000; total premium income, $2,654,396,938; total insurance in force on N. Y. State inhabitants, $17,075,969,985.

THE NEW YORK STATE FOREST PRESERVE.

New York State's Forest Preserve was established in 1885.

The State has an actual investment of nearly $15,000,000 in the Forest Preserve, of which $12,000,000 has been spent for direct payment of lands purchased or appropriated and $3,000,000 for land taken on tax sales.

The area of the Forest Preserve in both the Adirondack and Catskill Mountains on Sep. 30, 1928, aggregated 2,109,097 acres, of which 1,941,404 acres are in the Adirondack Preserve, and 167,693 acres are in the Catskill Preserve.

Jurisdiction over the Forest Preserve is exercised by the Conservation Department, which has charge also of the State Reservation at Saratoga Springs, the State-owned islands in Lake George, the St. Lawrence Reservation, and the John Brown Farm in the town of North Elba, Essex County, and all places formerly under the jurisdiction of the State Council of Parks.

Five forest tree nurseries are maintained with a capacity of 125,000,000 trees; with an annual output put of 40,000,000 trees. More than 20,000 acres were reforested in 1928. Trees are sold to private landowners and given to municipalities and State Institutions.

The total number of plantations in the state up to the beginning of 1929 was 19,198, made up of more than 160,000,000 trees. There were, in Franklin County, 21,164,725 plantation trees; in Essex, 11,826,736; Lewis, 10,258,650; Saratoga 7,498,550; St. Lawrence, 6,077,700; Oneida, 5,669,150; Warren, 5,229,320; Westchester, 4,886,300; Otsego 4,591,735; Orange, 4,551,875; Herkimer, 4,519,150; Hamilton, 4,517,100.

Beaver, which had become extinct, were introduced to the Adirondacks in 1905 and have since spread over other sections of the woods. They have also been introduced in the Catskills.

The compilation of the amount of game taken by licensed hunters in the State in 1926, made up from figures returned upon the stubs of hunting licenses, shows a total weight of game birds and such quadrupeds as are used for food such as rabbits, hares, deer and squirrels, taken in 31 of the 62 counties, was 2,174,748 lbs.

Returns from hunters for the remaining counties increased this to approximately four million pounds. The value of the game, if commercialized, would be, roughly, $3,500,000. There are over 500,000 hunters.

In the 31 counties there were killed 295,687 skunks, minks, muskrats and other fur bearers, the value of whose raw fur is figured at $688,440.53. The total value of game as food, together with the value of the fur collections for the year 1926, gives a total value of wild life taken by licensed hunters at more than $4,600,000.

The State maintains 4 game bird farms. In 1928, a total of 16,459 live birds and 148,920 eggs was distributed to farmers and sportsmen throughout the State and 4,000 young hen pheasants were retained at the farms for breeding purposes.

The number of deer killed in this State in 1928 was 7,029, an increase of 628 over 1927.

The State Conservation Department is made up of the following divisions: (1) Lands and Forests; (2) Fish and Game; (3) Water Power and Control; (4) Saratoga Springs; (5) Parks.

The Division of Parks takes over the State Council of Parks, the State Reservation at Niagara, Palisades Interstate Park, and the Allegany, Finger Lakes, Long Island, Taconic, and Central State Parks; Letchworth Park, so far as it was under control of the American Scenic and Historic Preservation Society; and Washington's Headquarters and other shrines.

The area of the Evangeline State Park in Louisiana is unknown. The acreage in New Hampshire does not include Mount Madison. The Redfoot State Park in Tennessee is (June, 1929) in process of acquisition. In Aug., 1929, a 2,000-acre addition in Putnam County, to the Taconic (N. Y.) State Park, was given by Dr. Ernest Fahnestock.

GEOLOGICAL HISTORY OF THE EMPIRE STATE.

(By the late John M. Clarke, State Geologist.)

THE geological history of New York can be traced back to the Precambrian era, the oldest recognizable in the rocks of the earth.

These earliest rocks known are the Grenville metamorphosed sediments (gneisses, marble, etc.).

They are exposed in the Adirondacks and the Hudson Highlands. They prove that in Grenville time Northern, Eastern, and probably Southwestern N. Y. was under the water.

After the deposition of the Grenville sediments igneous activity took place on a large scale and huge masses of molten rock (granite, anorthosite, gabbro, syenite) were pushed into the sediments from below.

Some time after the whole Adirondack region was subjected to enormous pressure and intensely folded, and then the great mass of Grenville sediments was upraised well above the sea.

At the beginning of Cambrian time, when organic life becomes first recognizable in the State, only the eastern margin was submerged, but toward the end (Potsdam time) the sea covered the whole region except the central and northwestern Adirondacks.

In the long Ordovician period, during which the Beekmantown, Chazy, Black River and Trenton limestones and the Utica, Frankfort and Lorraine shales and sandstones were deposited, the State was most of the time submerged under the Ordovician sea, except for the Adirondack island.

Toward the end of that period, however, the Green and Taconic Mountains arose along the eastern border of the State and practically all of Northern, Central, Eastern and Northeastern New York became dry land.

In the following Silurian period were deposited the Medina and Oneida sandstone and conglomerate, the Clinton shale, sandstone, limestone and iron ore, the Rochester shale, the Lockport and Guelph dolomites, the Salina shales, salt and waterlime, etc.

During the early part of this period the sea had spread over only Central and Western New York, while during the late Silurian it had extended over the State west and east of the Adirondack region.

The strata of the next or Devonian era comprise the whole Catskill and southwestern plateau provinces and cover more than a third of the State. These rocks abound in fossils and show that the sea continued to cover at least the southern half.

The sea of the Carboniferous period hardly came over the boundary of the State from Pennsylvania.

At the end of Paleozoic time New York, except for a small area at the mouth of the Hudson, was raised during the Appalachian revolution well above the sea, never to be invaded again until the end of the glacial period.

During the long Mesozoic period New York was dry land; in Triassic time considerable volcanic activity prevailed in Southeastern New York, when sheets of lava (the trap of the Palisades) were forced into nonmarine Triassic beds.

During the next, or Jurassic, period the State was above the sea and actively eroded, but in the following Cretaceous period Staten and Long Islands disappeared under the sea.

At the end of this period the State, which had been eroded nearly to a plain, was uplifted 2,000-3,000 feet.

After this time in the Tertiary period the present drainage and relief of the State were developed in its major features.

Finally came the glacial period, which enriched the State with thousands of lakes and waterfalls.

It ended with the Champlain subsidence, during which the sea came for the last time into New York, into the Champlain Basin and Hudson Valley.

A recent elevation has again drained these regions.

The Hudson River is one of the most ancient rivers of the continent and flows over rocks which have been frequently and heavily faulted.

UNIVERSITY OF THE STATE OF NEW YORK.

Regents of the university, with years when terms expire: 1934—Chester S. Lord, *Chancellor*, Brooklyn; 1939—William L. Thompson, Troy; 1937—Mrs. Flora G. Pratt, Glen Cove; 1940—Walter Guest Kellogg, Ogdensburg; 1932—James Byrne, New York; 1931—Thomas J. Mangan, Binghamton; 1933—William J. Wallin, Yonkers; 1935—William Bondy, New York; 1930—William P. Baker, Syracuse; 1941—Robert W. Higbie, Jamaica; 1938—Roland B. Woodward, Rochester.

President of the University and Commissioner of Education—Frank P. Graves.

Deputy Commissioner and Counsel—Ernest E. Cole.

Assistant Commissioner for Higher and Professional Education—James Sullivan.

Assistant Commissioner for Secondary Education—George M. Wiley.

Assistant Commissioner for Elementary Education—J. Cayce Morrison.

Assistant Commissioner for Vocational and Extension Education—Lewis A. Wilson.

Assistant Commissioner for Finance—A. D. Simpson.

Director of State Library—James I. Wyer.

Director of Science and State Museum—Charles C. Adams.

Directors of Divisions—Administration, Lloyd L. Cheney; Archives and History, Alexander C. Flick; Attendance, Charles L. Mosher; Examinations and Inspections; Avery W. Skinner; Law, Irwin Esmond; Educational Research, Warren W. Coxe; Health and Physical Education, F. R. Rogers; Library Extension, Frank L. Tolman; School Buildings and Grounds, J. H. Hixson; Visual Instruction, Alfred W. Abrams; Motion Picture, James Wingate; teacher training, Herman J. Magee.

PUBLIC SCHOOLS IN THE EMPIRE STATE.

(Data by the New York State Department of Education.)

1928	3,472,435	1,768,364	70,849	162,183,334	57,267,253	324,405,895	671,255,016

Children of school age in 1890-1895 meant 5-21 years; (1896-1927) 5-18 years; (1928) under 18 years.

The total number of children who attended school at anytime in 1925 was 1,951,160.

The figures as to the number of teachers do not include about 5,000 (4,719 in 1925) part-time instructors.

Figures as to wages include all teachers, part-time and full-time.

Figures as to yearly expenditures for new schools, sites, etc., include all capital outlay, 1924 and since, but do not include repairs and replacements.

Total yearly expenses include debt service and capital outlay.

According to the census of 1920 there were, then, 425,022 *illiterate persons* 10 years of age and over in the State of New York, "illiterate" meaning unable to write. Of this number 16,150 were *native whites* of native parentage, 12,256 were of *foreign or mixed parentage*, and 389,603 were of *foreign birth*. The number of illiterate *Negroes* was 5,032. In the total population 10 years of age and over the *percentage of illiteracy* was 5.1, which showed a diminution since 1910, when it was 5.5.

The percentage of illiteracy in the total population of New York City 10 years of age and over is 6.2, which shows a slight decrease since 1910, when it was 6.7. For the native white the percentage is 0.3, for the foreign-born white, 13.3, and for the Negro, 2.1.

NEW YORK STATE MUSEUM.

The State Museum is a part of the Education Department of the University of the State of New York. The collections are arranged on the upper floors of the State Education Building, opposite the Capitol, at Albany. The collections are open free on every weekday, and on Sundays, Oct. 1 to May 1.

Hall of Geology and Mineralogy. Special exhibits in geology illustrate various industries dependent upon the geological resources, such as clays, sands, limestone, salt, gypsum, building stone, oil and graphite.

Hall of Paleontology. This hall includes vertebrates and invertebrates. The exhibits of trilobites and eurypterids are of unusual scientific interest. The wax restorations of very ancient extinct marine life in New York show the general appearance of these animals on the sea bottom. The Gilboa fossil forest shows three layers or horizons of tree trunks representing as many forests that flourished in ancient Devonian time, perhaps 100,000,000 years ago, and were successively buried under the sea after intervening elevations of the country. These trunks belong to the oldest known forests in the world.

Hall of Zoology. The animals of New York are exhibited in this hall, the larger mammals in habitat groups and the smaller mammals, birds, fishes, reptiles and mollusks in extensive series of well-mounted specimens. The mounted series of domestic poultry, including the domestic fowl, turkeys, pigeons, peacock, ducks, geese and pheasants is extensive. The collection of birds' eggs is one of the most complete in America. This section also contains a representative series of insects.

State Herbarium. The State Herbarium contains over 100,000 specimens, mostly of New York plants, and has a large collection of fungi. A special exhibit of wax models illustrates the common edible and poisonous fungi.

Halls of Archaeology and Ethnology. The former illustrates the implements used by the Iroquois Indians, such as flint arrow and spear heads, axes, pipes, pottery and various articles used for adornment. In the latter, besides specimens of clothing, games are illustrated, in addition to the life-sized groups of Indians.

In all these groups there are painted backgrounds which represent a New York scene. The caste used in these six groups were made from living people selected from several Indian reservations.

The State Museum conducts geologic and physiographic surveys of its natural resources and their relation to its industries, also a natural history survey of the plants and animals, including insects, and acts as a general bureau of information.

NEW YORK STATE GOVERNMENT.

(The four elective officers were chosen in November, 1928. Terms expire Dec. 31, 1930.)

Governor—Franklin D. Roosevelt, Dem., Hyde Park. $25,000 and Executive Mansion.
Secretary to the Governor—Guernsey T. Cross, Callicoon. $12,000.
Lieutenant Governor—Herbert H. Lehman, Dem., New York City. $10,000
Comptroller—Morris S. Tremaine, Dem., Buffalo. $12,000.
Attorney General—Hamilton Ward, Rep., Buffalo, N. Y. $12,000.

Commissioner of Taxation and Finance—Thomas M. Lynch, Poughkeepsie, $12,000.
Secretary of State—Edward J. Flynn, New York City. $12,000.
Superintendent of Public Works—Frederick Stuart Greene, Rensselaer. $12,000.
Commissioner of Agriculture and Markets—Berne A. Pyrke, Crown Point. $12,000.
Industrial Commissioner—Frances Perkins, New York City. $12,000.
Commissioner of Education—Frank Pierrepont Graves, Brooklyn. $15,000.
Commissioner of Health—Matthias Nicoll, Jr., Albany. $12,000.
Commissioner of Mental Hygiene—Frederick W. Parsons, Buffalo. $12,000.
Director of State Charities—Charles H. Johnson, Brooklyn. $10,000.
Commissioner of Correction—Raymond F. C. Kieb, Beacon. $12,000.
Public Service Commission—William A. Prendergast, Chairman. $15,000.
Superintendent of Banks—Joseph A. Broderick. $12,000.
Superintendent of Insurance—Albert Conway, New York City. $12,000.
Civil Service Commission—Mrs. Chas. Bennett Smith, President. $9,000.

NEW YORK STATE JUDICIARY.

Terms of Judges end Dec. 31 of year named.

Salaries—Chief Judge of the Court of Appeals, $22,500; Associate Judges, $22,000 each; Justices of the Supreme Court, $22,500 in New York City; $15,000 in rest of state.

COURT OF APPEALS.

Chief Judge—Benjamin N. Cardozo, New York City (1940); *Associate Judges*—Cuthbert W. Pound, Lockport (1930); Frederick E. Crane, Brooklyn (1934); Irving Lehman, New York City (1937); Irving G. Hubbs, Pulaski (1940); Harry T. Kellogg, Valcour (1939); John F. O'Brien, New York City (1941).

JUSTICES OF THE SUPREME COURT.

The full term is 14 years, ending at the close of Dec. 31 of the year after election; but the term also ends automatically at the close of Dec. 31 of the year in which a Justice reaches 70, which is the age of retirement from the bench.

Following are the Supreme Court Justices, by judicial districts; terms end Dec. 31 of year named:

First District (Manhattan and The Bronx; residence in Manhattan unless otherwise indicated)—Edward R. Finch (1943); George V. Mullan (1930); Richard H. Mitchell, Bronx (1930); John V. McAvoy (1931); Nathan Bijur (1932); John Ford (1932); Victor J. Dowling (1932); Richard P. Lydon (1932); Thomas W. Churchill (1932); Edward J. Gavegan (1933); Philip J. McCook (1933); Francis Martin, Bronx (1934); James O'Malley (1934); Isidor Wasservogel (1934); William H. Black (1936); Edward J. McGoldrick (1936); Joseph M. Proskauer (1937); Salvatore A. Cotillo (1937); Peter A. Hatting, Bronx (1937); Phoenix Ingraham (1937); Edward J. Glennon, Bronx (1937); Aaron J. Levy (1937); John L. Walsh (1939); Ernest E. L. Hammer, Bronx (1939); Louis A. Valente (1939); Curtis A. Peters (1940); Joseph M. Callahan, Bronx (1940); Alfred Frankenthaler (1940); Henry L. Sherman (1940); Alfred H. Townley (1941); Peter Schmuck (1942); Albert Cohn, Bronx (1943); John E. McGeehan, Bronx (1943); William T. Collins (1943); Irwin Untermyer (1943).

Second District (Counties of Kings, Nassau, Queens, Richmond and Suffolk; residence, Brooklyn, unless otherwise indicated)—James C. Cropsey (1930); Edward Lazansky (1931); Lewis L. Fawcett (1931); Leander B. Faber, Jamaica (1932); Norman S. Dike (1932); Isaac M. Kapper (1934); Selah B. Strong, Setauket (1934); John MacCrate (1934); Mitchell May (1935); Townsend Scudder, Glen Head (1935); Harry E. Lewis (1935); William F. Hagarty (1936); William B. Carswell (1936); Edward Riegelmann (1938); Charles J. Druhan (1939); James A. Dunne (1939); Burt Jay Humphrey, Long Island City (1939); John B. Johnston (1941); Edward J. Byrne (1942); Charles J. Dodd (1934).

Third District (Counties of Albany, Columbia, Greene, Rensselaer, Schoharie, Sullivan and Ulster)—Charles E. Nichols, Cobleskill (1930); Gilbert D. B. Hasbrouck, Kingston (1930); Harold J. Hinman, Albany (1932); Ellis J. Staley, Albany (1935); Pierce H. Russell, Troy (1939); Sydney F. Foster, Liberty (1942); Daniel V. McNamee, Hudson (1943).

Fourth District (Counties of Clinton, Essex, Franklin, Fulton, Hamilton, Montgomery, St. Lawrence, Saratoga, Schenectady, Warren and Washington)—Edward C. Whitmyer, Schenectady (1931); Charles Van Kirk, Greenwich (1932); John C. Crapser, Massena (1935); Christopher J. Heffernan, Amsterdam (1939); O. Byron Brewster, Elizabethtown (1941); Erskine C. Rogers (1942).

Fifth District (Counties of Herkimer, Jefferson, Lewis, Oneida, Onondaga and Oswego)—Jerome L. Cheney, Syracuse (1933); Edgar S. K. Merrell, Lowville (1935); Ernest I. Edgcomb, Syracuse (1936); Leonard C. Crouch, Syracuse (1936); Edward N. Smith, Watertown (1937); Clayton I. Miller, Pulaski (1938); William F. Dowling, Utica (1940); Edmund H. Lewis, Syracuse (1943).

Sixth District (Counties of Broome, Chemung, Chenango, Cortland, Delaware, Madison, Otsego, Schuyler, Tioga and Tompkins)—Abraham L. Kellogg, Oneonta (1930); Joseph D. Senn, Oneida (1930); James P. Hill, Norwich (1937); Leon C. Rhodes, Binghamton (1937), Rowland L. Davis, Cortland (1942); Ely W. Personius, Elmira (1943).

Seventh District (Counties of Cayuga, Livingston, Monroe, Ontario, Seneca, Steuben, Wayne and Yates)—Robert F. Thompson, Canandaigua (1930); Adolph J. Rodenbeck, Rochester (1930); Adelbert P. Rich, Auburn (1930); Benjamin B. Cunningham, Rochester (1933); Willis K. Gillette, Rochester (1936); Edwin C. Smith, Bath (1940); Marsh N. Taylor, Rochester (1941); Clyde W. Knapp, Lyons (1941).

Eighth District (Counties of Allegany, Cattaraugus, Chautauqua, Erie, Genesee, Niagara, Orleans and Wyoming)—Charles B. Sears, Buffalo (1931); Alonzo G. Hinkley, Buffalo (1933); George E. Pierce, Buffalo (1933); Edward R. O'Malley, Buffalo (1933); Harley N. Crosby, Falconer (1935); Clinton T. Horton, Buffalo (1935); Thomas H. Noonan, Buffalo (1935); James E. Norton, Warsaw (1936); Harry L. Taylor, Buffalo (1936); George A. Larkin, Olean (1937); Samuel J. Harris, Buffalo (1938); Almon W. Lytle, Buffalo (1938); Bernard B. Ackerman, Belmont (1939); Clarence MacGregor, Buffalo (1942).

Ninth District (Counties of Dutchess, Orange, Putnam, Rockland and Westchester)—Frank L. Young, White Plains (1930); Joseph Morschauser, Poughkeepsie (1933); Arthur S. Tompkins, Nyack (1934); George H. Taylor, Jr., White Plains (1936); J. Addison Young, New Rochelle (1936); William F. Bleakley, Yonkers (1941); Graham Witschief, Newburgh (1943).

APPELLATE DIVISION JUSTICES.

The Governor designates the Supreme Court Justices who constitute the Appellate Division for five years, and the presiding justice for the balance of his term, and may also make temporary designations when the need is certified to him. Each justice receives $2,000 and the presiding justice $2,500 per year additionally. These justices by departments are:

First Department, consisting of the First Judicial District:

Victor J. Dowling, Presiding Justice; Edgar S. K. Merrell, Edward R. Finch, John V. McAvoy, Francis Martin, James O'Malley, and Joseph M. Proskauer, Associate Judges.

Second Department, consisting of the Second and Ninth Judicial Districts:

Edward Lazansky, Presiding Justice; Adelbert P. Rich, J. Addison Young, Isaac M. Kapper, William F. Hagarty, William B. Carswell, and Townsend Scudder, Associate Justices.

Third Department, consisting of the Third, Fourth and Sixth Judicial Districts:

Charles C. Van Kirk, Presiding Justice; Harold J. Hinman, Rowland L. Davis, Edward C. Whitmyer, James P. Hill, and Gilbert D. B. Hasbrouck, Associate Justices.

Fourth Department, consisting of the Fifth, Seventh, and Eighth Judicial Districts:

Charles B. Sears, Presiding Justice; Leonard C. Crouch, Harry L. Taylor, Ernest I. Edgcomb, Robert F. Thompson, and Harley N. Crosby, Associate Justices.

NEW YORK STATE LEGISLATURE, 1930.

(Meets each year first Wednesday in January; members receive $2,500 salary.)

SENATE ELECTED IN 1928 TO SERVE IN 1929-30.

1—G. L. Thompson, R., Kings P'k.
2—S. F. Burkard, D., Queens.
3—A. J. Kennedy, D., Whitestone.
4—Philip M. Kleinfeld, D., B'klyn.
5—Daniel F. Farrell, D., B'klyn.
6—M. H. Evans, D., Brooklyn.
7—Jno. A. Hastings, D., B'klyn.
8—Wm. L. Love, D., Brooklyn.
9—..... B'klyn.
10—Jere F. Twomey, D., B'klyn.
11—James J. Crawford, D., B'klyn
12—E. F. Quinn, D., Manhattan.
13—Thos. F. Burchill, D., Man'h'n.
14—Bernard Downing, D., Man'h'n.
15—John L. Buckley, D., Man'h'n.
16—T. I. Sheridan, D., Man'h'n.
17—S. H. Hofstadter, R., Manhattan
18—Martin J. Kennedy, D., Man.
19—D. T. O'Brien, D., Manhat'n.
20—A. S. Feld, D., Manhattan.
21—Hy. G. Schackno, D., Bronx.
22—Benj. Antin, D., Bronx.
23—John J. Dunnigan, D., Bronx.
24—H. J. Palmer, D., R'bank, S. I.
25—W. W. Westall, R., White Pl'ns.
26—S. C. Mastick, R., Pleasantv'le
27—Caleb H. Baumes, R., Newb'g.
28—J. G. Webb, R., Hyde Park.
29—A. H. Wicks, R., Kingston.
30—Wm. T. Byrne, D., Loudonv'le.
31—John F. Williams, R., Troy.
32—Thos. C. Brown, R., Sch'tady.
33—H. E. H. Brereton, R., Bolton.
34—W. T. Thayer, R., Chateaugay.
35—Henry I. Patrie, R., Dolgeville.
36—Henry D. Williams, R., Utica.
37—Perley A. Pitcher, R., Watert'n
38—Geo. R. Fearon, R., Syracuse.
39—J. W. Gates, R., Chittenango.
40—..... Binghamton.
41—F. A. Frost, R., Watkins Glen.
42—Chas. J. Hewitt, R., Locke.
43—L. F. Wheatley, R., Hornell.
44—John Knight, R., Arcade.
45—Cosmo Cilano, R., Rochester
46—Fred'k. J. Slater, R., Gruce.
47—W. W. Campbell, R., Lockp't.
48—Wm. J. Hickey, R., Buffalo.
49—S. J. Wojtkowiak, D., Buffalo.
50—Nelson W. Cheney, R., Eden.
51—L. G. Kirkland, R. Randolph.

Recapitulation—Republicans, 26; Democrats, 24; 1 vacancy; total 51.

ASSEMBLY ELECTED IN 1928 TO SERVE IN 1929.

Albany—J. H. Cahill, D., 30 Mereline Ave., J. P. Hayes, D., 735 Broadway; Rudolph Rouller; D., Cohoes.

Allegany—H. E. Goodrich, R., Richburg.

Bronx—(1) N. J. Eberhard, D., 300 E. 162d St.; (2) W. F. Smith, D., 314 E. 140th St.; (3) Julius S. Berg, D., 327 Manida St.; (4) Herman M. Albert, D., 1064 Cauldwell Ave.; (5) Harry A. Samberg, D., 940 Simpson St.; (6) C. C. McGrath, D., 1436 Parker St.; (7) John F. Reidy, D., 610 E. 182d St.; (8) J. A. Devany, Jr., D., 2308 University Ave.

Broome—(1) Edmund B. Jenks, R., Whitney Point; (2) Forman E. Whitcomb, R., Endicott.

Cattaraugus—James W. Watson, R., New Albion.

Cayuga—C. D. Van Alstine, R., Weedsport.

Chautauqua—(1) H. E. V. Porter, R. Jamestown; (2) Joseph A. McGinnies, R., Ripley.

Chemung—G. A. Turner, R. Horseheads.

Chenango—Bert Lord, R., Afton.

Clinton—C. D. Munsil, R., Ellenburgh.

Columbia—Henry M. James, R., Hudson.

Cortland—Irving F. Rice, R., Cortland.

Delaware—James R. Stevenson, R., Hobart.

Dutchess—(1) Howard N. Allen, R., Pawling; (2) John M. Hackett, R., Poughkeepsie.

Erie (Buffalo, unless otherwise noted)—(1) C. J. Gimbrone, R., 524 Niagara St.; (2) Wm. L. Marcy, Jr., 28 Penhurst Park; (3) Frank X. Bernhardt, R., 76 Goodell St.; (4) A. J. Canney, D., 41 Marvin St.; (5) Ansley B. Borkowski, R., 76 Fisher St.; (6) H. W. Dickey, R., 315 Riley St.; (7) Arthur L. Swartz, R., Kenmore; (8) R. F. Piper, R., Hamburg.

Essex—Fred L. Porter, R., Crown Point.

Franklin—James E. Latour, R., Saranac Lake.

Fulton-Hamilton—E. Hutchinson, R., Green Lake.

Genesee—Charles P. Miller, R., South Byron.

Greene—Ellis W. Bentley, R., Windham.

Herkimer—Wm. J. Thistlethwaite, R., Old Forge.

Jefferson—J. W. Cornaire, R., Cape Vincent.

Kings—(1) C. W. Hawkins, D., 417 Pacific St.; (2) A. D. Schanzer, D., 1669 Kimbell St., M. Beach; (3) M. J. Gillen, D., 806 Hicks St.; (4) Geo. E. Dennen, D., 82 Clermont Ave.; (5) J. J. Cooney, D., 238 Sumpter St.; (6) J. J. Schwartzwald, D., 666 Willoughby Ave.; (7) John J. Howard, D., 453 55th St.; (8) Luke O'Reilly, 244 Carrol St.; (9) D. McNamara, Jr., 152-84th St.; (10) W. C. McCreery, D. 217 Prospect Place; (11) Edward J. Coughlin, D., 241 Adelphi St.; (12) E. S. Moran jr., D., 568 5th St.; (13) William Breitenbach D., 167 Ten Eyck St.; (14) J. P. Nathanson, D., 181 Havemeyer St.; (15) E. P. Doyle, D., 639 Humboldt St.; (16) Maurice Z. Bungard, D., Sea Gate, L. I.; (17) G. W. Stewart, D., 39 McDonough St.; (18) Irwin Steingut, D., 639 Eastern Parkway; (19) Jerome G. Ambro, D., 14 Suydam St.; (20) Frank A. Miller, D., 1227 Hancock St.; (21) J. A. Esquirol, D., 67 St. Pauls Pl.; (22) J. H. Livingston, D., 67 Bullwer Place; (23) A. M. Cohen, D., 550 Saratoga Ave.

Lewis—Edward Sheldon, R., Lowville, R.F.D. 5.

Livingston—A. G. Stockweather, R., Hunt.

Madison—A. A. Hartshorn, R., Hamilton.

Monroe—(1) T. G. Searle, R., 100 Southern Blvd., Brighton; (2) H. J. McKay, R., 220 Culver Road, Rochester; (3) Haskell H. Marks, R., 13 Cumberland St.; (4) Richard L. Saunders, 194 Selye Terrace; (5) W. Ray Austin, R., Spencerport.

Montgomery—Rufus Richtmyer, R., Fultonville.

Nassau—(1) Edwin W. Wallace, R., Rockville Centre; (2) Edwin R. Lynde, R., Massapequa.

New York—(1) Peter J. Hamill, D., 34 Dominick St.; (2) M. E. Theodore, D., 209 Grand St.; (3) Sylvester A. Dineen, D., 429 W. 34th St.; (4) Samuel Mandelbaum, D., 1 Scammel St.; (5) Frank A. Carlin, D., 639 10th Ave.; (6) L. J. Lefkowitz, R., 432 E. Houston St.; (7) S. S) Streit, D., 440 Columbus Ave.; (8) Henry O. Kahan, D., 170 2d Ave.; (9) Ira H. Holley, D., 215 W. 90th St.; (10) Langdon W. Post., D., 290 Park Ave.; (11) P. H. Sullivan, D., 149 Manhattan Ave.; (12) John A. Byrnes, D., 242 E. 19th St.; (13) H. Broderick, D., 414 W. 121st St.; (14) J. T. Higgins, D., 252 E. 61st St.; (15) Abbot L. Moffat, R., 51 E. 90th St.; (16) ———————— D., 305 E., 87th St.; (17) Meyer Alterman, D., 1274 Fifth Ave.; (18) V. H. Auleta, D., 163 E. 116th St.; (19) F. E. Rivers, D., 39 W. 128th St.; (20) Louis A. Cuvillier, D., 40 E. 126th St.; (21) Lamar Perkinds, R., 136 W. 139th St.; (22) B. B. Mittler, D., 640 W. 153d St.; (23) A. A. Falk, D., 261 Seaman Ave.

Niagara — (1) Fayette E. Pease, R., R.F.D., 7 Lockport; (2) Roy Hewitt, Lewiston.

Oneida—(1) C. J. Peters, R., 724 Rutgers St., Utica.; (2) Russell G. Dunmore, R., New Hartford; (3) W. W. Abbot, R., 704 Elm St., Rome.

Onondaga—(1) Horace M. Stone, R., Marcellus;. (2) Willis H. Sargent, R., 311 Summit Ave., Syracuse; (3) Richard B. Smith, R., 411 Elm St., Syracuse.

Ontario—Robert A. Catchpole, R., Geneva.

Orange—(1) DeWitt C. Dominick, R., Walden; (2) Alexander G. Hall, R., Highland Mills.

Orleans—Frank H. Lattin, R., Albion.

Oswego—Victor C. Lewis, R., Fulton.

Otsego—Frank M. Smith, R., Springfield Center.

Putnam—D. Mallory Stephens, R., Brewster.

Queens—(1) John O'Rourke, D., 2122-28th St., Astoria; (2) F. B. Hendel, D., Middle Village; (3) P. T. Farrell, D., 105-17 Lyon Ave., E. Elmhurst; (4) J. D. Nunan, D., 325 Grosvenor St., Douglaston; (5) Maurice Fitzgerald, D., Ozone Park; (6) F. L. Zimmermann, D., 8614-86th St., Woodhaven.

Rensselaer—(1) M. F. Breen, D., Troy; (2) Maurice Whitney, Berlin

Richmond—(1) F. A. Hannigan, D., 70 Bement Ave., West Brighton; (2) William L. Vaughan, D., Tottenville.

Rockland—Fred R. Horne, Jr., D., Nanuet.

St. Lawrence—(1) Mrs. Rhoda F. Graves, R.; Gouverneur; (2) Walter L. Pratt, R., Massena.

Saratoga—Burton D. Esmond, R., Ballston Spa.

Schenectady—(1) Charles W. Merriam, R., Schenectady; (2) W. W. Wemple, Jr., R., 1069 Wendell Ave., Schenectady.

Schoharie—Kenneth H. Fake, R., Cobleskill.

Schuyler—Jacob W. Winters, R., Watkins Glen.

Seneca—J. D. Pollard, R., Seneca Falls.

Steuben—(1) Wilson Messer, R., Corning; (2) James T. Foody, R., Hornell.

Suffolk—(1) John G. Downs, R., Cutchogue; (2) Hamilton F. Potter, R., Smithtown Branch.

Sullivan—J. Maxwell Knapp, R., Hurleyville.

Tioga—Frank G. Miller, R., Apalachin.

Tompkins—James R. Robinson, R., Ithaca.

Ulster—Millard Davis, R., Kerbonkson.

Warren—Paul L. Boyce, R., Glens Falls.

Washington—H. A. Bartholomew, R. Whitehall.

Wayne—Harry A. Tellier, R. North Rose.

Wyoming—J. R. Hanley, R., Perry.

Yates—Edwin C. Nutt, R., Penn Yan., R. D. No. 10.

Recapitulation—Democrats, 64, Republicans, 86; total, 150.

GOVERNORS OF THE STATE OF NEW YORK.

(The Official List, from the Legislative Manual.)

First Dutch Period.

Adriaen Jorisszen Tienpoint, Director	1623
Cornelis Jacobzen Mey, Director	1624
William Verhulst, Director	1625
Peter Minuit, Director Gen.	May 4, 1626
Bastiaen Jansz Krol, Director Gen.	March 1632
Wouter Van Twiller, Director Gen.	April 1633
William Kieft, Director Gen.	March 28, 1638
Petrus Stuyvesant, Director Gen.	May 11, 1647

NOTES ON THE FIRST DUTCH PERIOD.

Under Dutch rule the powers of government, civil and ecclesiastical, were vested in the Director of the West India Company and his Council.

Krol had been Director and Commissary at Fort Orange.

First English Period.

Richard Nicolls, Gov.	Sept.(N.S.) 8, 1664
Francis Lovelace, Gov.	August 17, 1668

Second Dutch Period.

Cornelis Evertse & War Council	Aug.(N.S.) 12, 1673
Anthony Colve, Gov. Gen.	Sept.(N.S.) 19, 1673

Second English Period (Early Colonial).

Edmond Andros, Gov.	Nov.(N.S.) 10, 1674
Anthony Brockholls, Lieut.-Gov.	November 16, 1677
Sir Edmond Andros, Gov.	August 7, 1678
Anthony Brockholls, Gov.	Jan. (N.S.) 13, 1681
Thomas Dongan, Gov.	August 27, 1683
Sir Edmond Andros, Gov.	August 11, 1688
Francis Nicholson, Lieut.-Gov.	October 9, 1688
Jacob Leisler, Lieut.-Gov.	June 3, 1689
Henry Sloughter, Gov.	March 19, 1691
Richard Ingoldesby, Commander-in-Chief	July 26, 1691
Benjamin Fletcher, Gov.	August 30, 1692
Earl of Bellomont, Gov.	April 2, 1698
John Nanfan, Lieut.-Gov.	May 16, 1699
Earl of Bellomont, Gov.	July 24, 1700
Provincial Council	March 5 to May 19, 1701
John Nanfan, Lieut.-Gov.	May 19, 1701
Lord Cornbury, Gov.	May 3, 1702
Lord Lovelace, Gov.	December 18, 1708
Peter Schuyler, Pres. of Council	May 6, 1709
Richard Ingoldesby, Lieut.-Gov.	May 9, 1709
Gerardus Beekman, Pres. of Council	April 10, 1710
Robert Hunter, Gov.	June 14, 1710
Peter Schuyler, Pres. of Council	July 21, 1719
William Burnet, Gov.	September 17, 1720
John Montgomerie, Gov.	April 15, 1728
Rip Van Dam, Pres. of Council	July 1, 1731
William Cosby, Gov.	August 1, 1732
George Clarke, Pres. of Council	March 10, 1736
George Clarke, Lieut.-Gov.	October 30, 1736
George Clinton, Gov.	September 22, 1743

NOTES ON THE SECOND ENGLISH PERIOD.

Andros was Governor of New England, New York and New Jersey.

The Earl of Bellomont died March 5, 1701.

Before 1709 the administration of government, when the offices of Governor and Lieutenant-Governor were vacant, was vested in the Council, the right to preside being lodged in the eldest Councilor.

From 1702 to 1738 New York and New Jersey had a joint executive, and Lord Cornbury was the first joint incumbent.

John West, seventh Lord De La Warr, was appointed Governor in June, 1737, and resigned the title in September, 1737; but he never came to this country or qualified for the office.

Third English Period (Pre-Revolutionary).

Sir Danvers Osborne, Gov.	October 10, 1753
James De Lancey, Lieut.-Gov.	October 12, 1753
Sir Charles Hardy, Gov.	September 3, 1755
James De Lancey, Lieut.-Gov.	June 3, 1757
Cadwallader Colden, Pres. of Council	August 4, 1760
Cadwallader Colden, Lieut.-Gov.	August 8, 1761
Robert Monckton, Gov.	October 26, 1761
Cadwallader Colden, Lieut.-Gov.	November 18, 1761
Robert Monckton, Gov.	June 14, 1762
Cadwallader Colden, Lieut.-Gov.	June 28, 1763
Sir Henry Moore, Gov.	November 13, 1765
Cadwallader Colden, Lieut.-Gov.	September 12, 1769
Earl of Dunmore, Gov.	October 19, 1770
William Tryon, Gov.	July 9, 1771
Cadwallader Colden, Lieut.-Gov.	April 7, 1774
William Tryon, Gov.	June 26, 1775
James Robertson, Gov.	March 23, 1780
Andrew Elliott, Lieut.-Gov.	April 17, 1783

NOTES ON THE THIRD ENGLISH PERIOD.

Sir Danvers Osborne received his appointment as Governor of New York (in England), on August 1, 1753. He then sailed for America, arriving at the port of New York on October 7, 1753. He published his Commission as Governor and took the oath of office on October 10, 1753 (Wednesday).

On Friday, October 12, 1753, at 7 o'clock in the morning he was found in the garden of Mr. Murray, at whose house he was staying, strangled in his handkerchief, having committed suicide in a fit of insanity.

The above information is contained in a letter written by Lieut.-Gov. James De Lancey to the Lords of Trade, dated October 15, 1753.

Robertson and Elliott were Military Governors during the Revolutionary War, but were not recognized by the State of New York.

Government by the Provincial Congress.

Peter Van Brugh Livingston	May 23, 1775
Nathaniel Woodhull, Pres. *pro tem.*	August 28, 1775
Abraham Yates jr., Pres. *pro tem.*	November 2, 1775
Nathaniel Woodhull	December 6, 1775
John Haring, Pres. *pro tem.*	December 16, 1775
Nathaniel Woodhull	February 12, 1776
John Haring, Pres. *pro tem.*	June 19, 1776
Nathaniel Woodhull	July 9, 1776
Abraham Yates jr., Pres. *pro tem.*	August 10, 1776
Abraham Yates jr.	August 28, 1776
Peter R. Livingston	September 26, 1776
Abraham Ten Broeck	March 6, 1777
William Smith, Pres. *pro tem.*	April 9, 1777
Pierre Van Cortlandt, Vice-Pres.	April 11, 1777
Leonard Gansevoort, Pres. *pro tem.*	April 18, 1777
Pierre Van Cortlandt, Vice-Pres.	April 21, 1777
Abraham Ten Broeck	April 28, 1777
Pierre Van Cortlandt, Pres. Council Safety	May 14, 1777

State.

NAME.	Residence.	Elected.
George Clinton	Ulster Co.	July 9, 1777
John Jay	New York City	April, 1795
George Clinton	Ulster Co.	April, 1801

Charles S. Whitman	New York City	Nov. 3, 1914
Alfred E. Smith	New York City	Nov. 5, 1918
Nathan L. Miller	Syracuse	Nov. 2, 1920
Alfred E. Smith	New York City	Nov. 7, 1922
F. D. Roosevelt	Hyde Park	Nov. 6, 1928

NOTES ON THE STATE PERIOD.

The Constitution of 1777 did not specify the time when the Governor should enter on the duties of his office. Gov. Clinton was declared elected July 9, and qualified on July 30. On the thirteenth day of February, 1787, an act was passed for regulating elections, which provided that the Governor and Lieutenant-Governor should enter on the

duties of their respective offices on the 1st of July after their election.

Taylor (1817) was Lieutenant-Governor and became acting Governor.

The Constitution of 1821 provided that the Governor and Lieutenant-Governor should, after the year 1823, take office on Jan. 1.

Pitcher (1828) was Lieutenant-Governor and became acting Governor.

Throop (1829) was Lieutenant-Governor and became Governor upon the resignation of Van Buren. He was elected, November, 1830, for a full term.

Cleveland (1882) resigned Jan. 6, 1885, to become President of the United States, and Hill, the Lieutenant-Governor, succeeded him as Governor, and was elected Nov. 6, 1885, for a full term.

Hughes (1906) resigned as Governor, Oct. 6, 1910, to become a Justice of the Supreme Court of the United States, and was succeeded as Governor by Lieutenant-Governor Horace White.

Glynn (1913) was Lieutenant-Governor and became Governor, Oct. 17, 1913, when Sulzer, who was impeached, was removed from office.

POWERS AND DUTIES OF THE GOVERNOR.

The following is the oath prescribed by law for the Governor of the State of New York on assuming office.

"I do solemnly swear, that I will support the Constitution of the United States and the Constitution of the State of New York, and that I will faithfully discharge the duties of the office of Governor, according to the best of my ability.

"And I do further solemnly swear, that I have not directly or indirectly paid, offered or promised to pay, contributed, or offered or promised to contribute, any money or other valuable thing as a consideration or reward for the giving or withholding a vote at the election at which I was elected to said office, and have not made any promise to influence the giving or withholding any such vote."

The executive power is vested in the Governor in accordance with the provisions of the Constitution and of the statutes.

The Governor is Commander-in-Chief of the military and naval forces of the State.

He acts as ex-officio member of various boards and commissions.

He is required to communicate by message to the Legislature at every session the condition of the State, and to recommend such matters to it as he may judge expedient.

He may convene the Legislature, or the Senate only, on extraordinary occasions.

The Governor shall cause to be kept in the Executive Chamber journals of the daily transactions of his office, files of all official records, together with statements of all applications for pardon, commutation or other executive clemency, and of his action thereon.

He is required to transact all necessary business with the officers of government, civil and military.

He shall expedite all such measures as may be resolved upon by the Legislature, and shall take care that the laws are faithfully executed.

The power to veto any bill passed by the Legislature is vested in the Governor.

The term of office of the Governor is two years, and he receives an annual salary of $25,000, and the use of a furnished executive residence.

He is authorized to appoint a counsel, a secretary, a military secretary, and such clerks and other assistants as may be necessary.

The Privy Seal is the Arms of the State surrounded by the inscription "State of New York—Executive Privy Seal."

UNITED STATES SENATORS FROM NEW YORK STATE, 1789-1926.

The State was not represented in the first session of the first Congress, which began at New York, April 6, 1789, and adjourned Sept. 29, 1789. The second session began at New York Jan. 4, 1790.

Name.	Residence.	Pol.	When Elected
Philip Schuyler	Albany	Fed.	1789, July 16

Robert A. Van Wyck was the first mayor of Greater New York, formed by the consolidation of the several counties into five boroughs of a united municipality, effective Jan. 1, 1898.

New York County became Manhattan Borough, Kings County became Brooklyn Borough; and that part of New York County just north of the Harlem River (the upper slice of which had been taken from Westchester County) became Bronx Borough; Queens County became Queens Borough; and Richmond County (Staten Island) became Richmond Borough.

The several county boards of supervisors were merged into a common Board of Aldermen.

The Board of Aldermen has since become (under the so-called Home Rule Act) the Lower Branch of the Municipal Assembly, whose Upper Branch was then made to consist of the Board of Estimate and Apportionment.

These two bodies constitute the local legislature, coinciding in power with the Select and Common Councils in Philadelphia and some other cities.

NEW YORK ZOOLOGICAL PARK (BRONX ZOO).

The New York Zoological Park (bounded on the East by the Boston Post Road, on the west by Southern Boulevard, on the north by Fordham Road, and on the south by E. 182d St.) was founded in 1895 by the New York Zoological Society, a scientific corporation. The park was formally opened Nov. 8, 1899.

The grounds, many of the buildings, and an annual maintenance fund are provided by the city. The remainder of the buildings and the animal collections are furnished by the society, which is also charged with the direct management of the park.

The Zoological Park is free to the public on all days of the week except Mondays and Thursdays. Should Monday or Thursday fall on a legal holiday, admission to the Zoological Park is free. The opening and closing hours are 10 A. M. until one-half hour before sunset. On pay days admission for adults is 25 cents, and for children under twelve years, 15 cents. The park embraces 264 acres, with 35 acres of water.

The principal buildings are the Elephant, Lion Primate, Zebra, Large Bird, Reptile, Antelope, Ostrich and Small Mammal Houses, and the Aquatic Bird House. The principal open-air inclosures are the Bear Dens, Flying Cage, Pheasant Aviary, the Eagle and Vulture Aviary, Wolf and Fox Dens, Burrowing Rodent Quarters, Beaver Pond, Duck Aviary, Wild Fowl Pond and Mountain Sheep Hill.

On May 25, 1922, the National Collection of Leads and Horns was dedicated and opened to the public.

THE ZONING LAW.

The Board of Estimate enacted the zoning resolution in 1916.

The height districts run from one-quarter to two and one-half times the width of the street.

The area allowances run from 100 per cent. in A districts to 25 per cent. in F districts.

The resolution is not retroactive; buildings and uses in existence prior to July 25, 1916, are not affected.

As many exceptional situations exist, the City Charter provides that a board of appeals can, after a hearing and in accordance with prescribed rules, vary the strict letter of the law regarding particular permits. Its decisions are subject to court review.

The Board of Estimate and Apportionment requires that petitioners for local changes must represent at least 50 per cent of the area to be changed. Changes which are more clearly in the interest of the general public can only be initiated by the President of a Borough, or by the Chief Engineer of the Board of Estimate and Apportionment.

By the zoning plan, the city is divided into three classes of districts—1, residence; 2, business; 3 unrestricted.

In a residence district no building shall be erected other than a building, with its usual accessories, arranged, intended or designed exclusively for one or more of the following specified uses: (1) Dwellings, which shall include dwellings for one or more families and boarding houses and also hotels which have thirty or more sleeping rooms. (2) Clubs, excepting clubs the chief activity of which is a service customarily carried on as a business.

(3) Churches; (4) Schools, libraries, public museums, court houses, fire houses and police stations; (5) Philanthropic or eleemosynary uses or institutions, other than correctional institutions.

(6) Hospitals and sanitariums; (7) Railroad passenger stations; (8) Farming, truck gardening, nurseries or green houses.

In a residence district no building or premises shall be used for any use other than a use above specified for which buildings may be erected and for the accessory uses customarily incident thereto. The term accessory use shall not include a business nor shall it include any building or use not located on the same lot with the building or use to which it is accessoy.

A private garage for more than five motor vehicles shall not be deemed an accessory use.

In a business district no building or premises shall be used, and no building shall be erected, which is arranged, intended or designed to be used for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; but car barns or places of amusement shall not be excluded.

PIERS, DOCKS AND WATER-FRONT TERMINALS.

(Data Assembled by Michael Cosgrove, Commissioner of Docks.)

The Department of Docks of the City of New York is charged with the construction, care and maintenance of its waterfront. Created sixty years ago, it has made improvements, having a value of over $250,000,000, and the present administration has plans under way calling for the expenditure of an additional hundred million.

Total length of shore front, 578 miles; number of piers—public and private, 722; piers owned by the City of New York, 277; piers privately owned, 409; piers owned by the United States Government, 27; piers owned by the State of New York, 9.

Piers in Manhattan number 244; in the Bronx, 60; in Brooklyn, 197; in Queens, 80; in Richmond, 141.

Piers on the East River total 196, of which 93 are on the Manhattan front, 3 are on Ward's Island, 3 on Randall's Island, 11 in the Bronx, 62 in Brooklyn, 5 in the Wallabout Basin, and 19 in Queens.

There are 65 piers on the Harlem River, of which 49 are in the Bronx, and 16 are in Manhattan.

In Newtown Creek there are 3 piers in Queens and 1 in Brooklyn.

Recreation Piers—*in Manhattan:* Upper deck of Pier 10, foot of Albany Street, North River; Pier 43, foot of Borrow Street, North River; West 50th Street, North River; West 129th Street, North River; East 3rd Street, East River; Pier 30, East of Market Slip, East River; East 112th Street, Harlem River. *Brooklyn.* North Second Street; State Street.

Barge Canal Piers—*Manhattan,* Pier 93; North River, at West 53rd Street; Piers 5 and 6, East River, at Coenties Slip; East 135th-138th Streets, Harlem River, Bronx. *Brooklyn,* Pier between Columbia and Henry Streets, Brooklyn; Pier between Eage and DuPont Streets, Brooklyn; Pier between Queensboro Bridge and Horsell Street, East River, Queens; Pier between Broadway and Cornelia Street, Queens; Pier between Harper Avenue and Delovale Street, Flushing.

All of the Barge Canal piers are owned by the State of New York.

The principal piers are located on the North River, along the westerly shore front of the lower end of Manhattan Island.

The water alongside the pier is called the slip.

The City has control of all the water inside the pierhead line.

Some idea of its value and the value of New York City waterfront property may be obtained from the fact that the City collects annually over $7,000,000 as rental for the piers and bulkhead it owns. The revenue for 1928 was $7,725,479.96, while the expenditure for maintenance was only $1,600,000.

The highest rental, $300,000 a year, is received for Pier 86, North River; with Pier 84 next at $270,000. Both piers are leased to the United American Lines.

In Jamaica Bay, the entrance to which is a mile or so east of the entrance to the main harbor of New York, the City has a sub-harbor which will provide over fifty per cent. additional dockage for ocean steamships.

Over ten million dollars have already been expended in widening and deepening channels to accommodate large vessels, a minimum depth of 30 feet at low tide being provided in the main channel.

The City-owned land already created by this progress in Jamaica Bay has a value of over fifteen million dollars. Part of this new made land is being converted by the City into an Airport, Floyd Bennett Field, the first City-owned airport here.

The piers at Staten Island, built towards the close of the World War, are about 1,200 feet long, and are of the finest type of modern construction.

FERRIES IN NEW YORK CITY.

MUNICIPAL.

East River—

Astoria—From E. 92d St and Ave. A, Manhattan, to Astoria Ave. and Mill St., Astoria, Queens.

College Point—From foot of Sound View Ave., Clason's Point, Bronx, to 1st Ave., College Point, Queens

Grand St.—From Grand and East Sts., Manhattan, to Broadway and Kent Ave., Brooklyn.

Greenpoint—From E. 23rd St., Manhattan to Greenpoint Ave., Brooklyn.

Atlantic Ave.—From South St., Manhattan, to Atlantic Ave. and Furman St., Brooklyn.

Hamilton Ave.—From South St., South Ferry, Manhattan, to Hamilton Ave. and Sackett St., Brooklyn.

Jamaica Bay—Rockaway—From Flatbush Ave., Brooklyn, to Beach 169th St., Rockaway, Queens.

New York Bay—St. George-Staten Island—From Whitehall St., South Ferry, Manhattan, and from 39th St., South Brooklyn, to St. George, Staten Island. 39th St., Brooklyn—From South St., South Ferry, Manhattan, to foot of 39th St., Brooklyn.

PRIVATELY OWNED.

East River—Atlantic Ave., Brooklyn, to Exchange Place, Jersey City (Penn. R. R.)

A regular ferry between the foot of E. 34th St., Manhattan, and Borden Ave., Long Island City, was opened in 1927. This route was operated for many years by the Long Island Railroad, but had been closed for a long time.

Hudson River—Liberty St. to Communipaw, J. C. (Central R. R. of N. J.); Cortlandt St. to Exchange Pl., J. C. (Penn. R. R.); Cortlandt St. to Weehawken (West Shore R. R.); Barclay St. to Newark St., Hoboken (Lackawanna R. R.); Chambers St. to Pavonia Ave., J. C. (Erie R. R.); Desbrosses St. to Exchange Pl., J. C. (Penn. R. R.); Christopher St. to Newark St., Hoboken (Lackawanna R. R.); W. 23d St. to 14th St., Hoboken (Lackawanna R. R.); W. 23d St. to Newark St.-Hoboken (Lackawanna R. R.); W. 23d St. to Communipaw, J. C. (Central R. R. of N. J.); W. 23d St. to Pavonia Ave., J. C. (Erie R. R.); W. 23d St., to 16th St., West N. Y.; W. 42d St. to Weehawken (West Shore R. R.); W. 42d St. to West New York (West Shore R. R.); W. 130th St. to Edgewater, N. J.; Dyckman St. to Englewood Landing, N. J. (Palisades Park).

Staten Island (non-municipal)—St. George, S. I. to 69th St., Bay Ridge, B'klyn.; Port Richmond, S. I. to Bayonne, N. J.; Holland Hook, S. I., to Elizabethport, N. J.; Linoleumville, S. I., to Carteret, N. J.; Tottenville, S. I., to Perth Amboy, N. J.

Crossing New York Bay—Battery Park to Governor's Island (U. S. Army); Battery Park to Ellis Island (U. S Dept. of Commerce); Battery Park to Liberty Island.

Departmental Ferries—E. 16th St. to Hart's Island (Dept. of Health); E. 26th St. to Blackwell's (Welfare) Isl., Riker's Isl., and Hart's Isl. (Dept. of Correction); E. 26th St. to Blackwell's Isl. and Randall's Isl. (Dept. of Pub. Welfare); E. 86th St. to Blackwell's Isl. (Dept. of Pub. Welfare); E. 116th St. to Ward's Isl. (N. Y. State Hosp. Bd.); E. 125th St. to Randall's Isl. (Children's Hosp.) (Dept. of Pub. Welfare); E. 125th St. to Randall's Isl. (House of Refuge), N. Y. State Reformatory; E. 132d St. to No. Brother Isl. (Dept. of Health); Fordham St., City Island, to Hart's Island (Depts. of Correction and Public Welfare).

THE NEW YORK COMMUNITY TRUST.

The New York Community Trust, 149 Broadway, New York City, was established in 1923 for the administration of trust funds dedicated to public charitable uses. By the adoption of a common Resolution and Declaration of Trust twenty-three banks and trust companies in New York City and Westchester County act as trustees of such funds and disburse the income from them under the authorization of a central distribution committee. This Committee of eleven members is appointed in part by the trustee banking institutions, and in part by such public sources as the Senior Judge of the U. S. Circuit Court of Appeals, the Mayor of New York, and the Presidents of the Academy of Medicine, the Chamber of Commerce, the Association of the Bar and the Brooklyn Institute of Arts and Sciences. This Committee is empowered to amend the purposes for which funds are given, in the event that it becomes impossible to carry out literally a donor's wishes.

During 1929 the capital funds of the Community Trust passed $6,000,000. Distributions totaled $120,534. The Westchester Welfare Foundation, affiliated with the New York Community Trust, has principal funds of $156,000.

Members of the Distribution Committee are: John G. Agar, Mrs. August Belmont, Homer Folks, Ernest Iselin, Clarence H. Kelsey, Morgan J. O'Brien, James H. Post, Dr. George David Stewart, Felix M. Warburg and Thomas Williams, Chairman.

Clarence H. Kelsey is Chairman of the Trustees Committee, V. Everit Macy is Chairman of the Westchester Advisory Committee and Ralph Hayes is Executive Director of the Trust.

CHIEF PARKS IN THE CITY OF NEW YORK.

(Acreage of each park is shown in black face figures.)

MANHATTAN.

Battery, foot of Broadway, **19.**
Bryant, 6th Ave. and W. 42d St., **4.**
Carl Schurz, between Ave. B and East River, E. 84th St. to E. 89th St., **12½.**
Central, W. 59th St. to W. 110th St., and 5th Ave. to 8th Ave., **843.**
Chelsea, 27th St. and 9th Ave., **3.**
City Hall, Broadway, Park Row and Chambers St., **8½.**
Colonial, 145th to 155th St., Bradhurst Ave. to Edgecombe Ave., **12¾.**
Columbus, Mulberry and Bayard Sts., **2¼.**

Conference House, Tottenville, **1.**
New Springville, **163.**
Crooke's Point, **700.**
Richmond Hill, **587.**
Silver Lake, Richmond Turnpike and Forest Ave., **214.**
Willowbrook, **106.**
Wolfe Pond, **227.**

OLD NAMES FOR THE STATES.

If the United States were to adopt the recent European practice of reviving old place names such as Oslo for Christiania, Nidaros for Trondjhem, Helsinki for Helsingfors, Warszawa for Warsaw, and Praha for Prague, the roster of the 48 States would vary in many cases, says a bulletin from the Washington, D. C. headquarters of the National Geographic Society.

Nineteen States have different original Indian names they could go back to: Alibamu, Arizonac, Quonoktacut, E-dah-hoe, Illini, Ayuhba (Iowa), Kanza, Massawadschuasch (Massachusetts), Mishigamaw (Michigan) Missisipi, Missiuri, Ohionhilo, Tanasee, Texia, Ute, Mishkonsing, Mcheuwomink (Wyoming), Arkansea.

Restoration of old names would require Delaware to revert to De La Warr, the name selected in honor of Lord De La Warr. New York was named for the Duke of York, but if origins were to be pushed back as far as possible the Empire State must revive the old English form, becoming New Eurewic.

Revival of an historic name, such as that of Lwow for Lemberg in Poland, would restore Vert Mont in honor of the French, Roode Eylandt in respect to Dutch explorers, and Orejones, as a compliment to Spanish Conquistadores.

Illinois serves as an example of States whose present names are pitfalls to the unwary. Persons not familiar with the French adoption of the original Indian tribe name, pronounce the last syllable noise."

George Washington, it is said, called the Illinois country Black Island because he thought the French spelled it Ile Noir.

PRINCIPAL CLUBS IN NEW YORK CITY.

(The date of organization is in parentheses; other figures, where given, are of membership.)

Advertising (1914), 23 Park Ave.; 2,250; Pres., James W. Brown; Sec. J. R. Bolton.
Aldine (1889), 200 Fifth Ave.; 600; Chairman of House Committee, Joseph E. Kean; Sec., Herbert G. Frankel.
Alpha Delta Phi (1832), 136 W. 44th St.; 15,731; Sec., W. Earl Smith.
Amherst (1923), 273 Lexington Ave.; 1,200; Pres., F. P. Smith; Sec., W. H. Griffin.
Arkwright (1893), 320 Broadway; 850; Pres., Kit S. Warner; Sec., Robert Schmidt.
Army and Navy Club of America (1885), 30-32 W. 44th St.; 2,415; Pres., Col. Franklin Q. Brown; Sec., Capt. William C. Tremaine.
Authors (1882), 48 W. 76th St.; abt. 250; address communications to the secretary.
Automobile Club of America (1899), 12 E. 53rd St.; 7,000; Pres., Dave H. Morris; Sec., Elmer Thompson.
Bankers (1915), Equitable Bldg., 120 Broadway; 3,200; Pres., A. H. Wiggin; Sec., A. C. Andrews.
Barnard (1894), 221 W. 57th St.; 265; Pres., Dr. James Barlet; Sec., Miss Louise Tibbetts.
Block Hall, Inc. (1927), 23 So. William St.; 1,000; Pres., Gresham Ennis; Sec., Reese D. Alsop.
Brook (1903), 111 E. 54th St.; 350; Pres., Percy R. Pyne, 2d; Sec., F. S. Allen.
Brooklyn Engineers (1896), 117 Remsen St., Brooklyn; 500; Sec., George A. Dorfman.
Calumet (1879), 12 W. 56th St.; 500; Pres., Wm. A. Greer; Sec., John B. Kane.
Camera (1884), 121 W. 68th St.; 225; Pres., J. Henry McKinley; Sec., H. S. Grinleese.
Catholic (1871), 120 Central Park South; 800; Pres., Victor F. Ridder; Sec., H. Howard Dausch.
Century Association (1847), 7 W. 43d St.; 1,451; Sec., A. D. Noyes.
Chemists (1898), 52 E. 41st St.; 1,714; Pres., Dr. L. V. Redman; Sec., Robert T. Baldwin.
City (1892), 55 W. 44th St.; 1,600; Civic Dir., H. W. Marsh; Sec., William F. Howes.
City Athletic (1908), 50 W. 54th St.; 1,000; Sec., Carl W. Stern.
Colony (1903), 564 Park Ave.; 2,162; Pres., Mrs. James A. Burden; Sec., Mrs. Hamilton Fish Armstrong.
Columbia (1901), 4 W. 43d St.; 2,564; Pres., Knowlton Durham; Sec., Ward Melville.
Cornell (1889), 245 Madison Ave.; 2,000; Pres., James J. Clarke; Sec., Andrew E. Tuck.
Crescent Athletic (1884), 129 Pierrepont St., Brooklyn; 2,700; Pres., James C. Cropsey; Sec., A. S. Hart.
Dartmouth (1926), 24 E. 38th St.; 1,200; Pres., D. B. O'Connor; Sec., Malcolm G. Rollins.
Delta Kappa Epsilon (1884), 5 E. 51st St.; 14,000; Pres., John S. Wickham; Sec., James Anderson.
Engineers (1888), 32 W. 40th St.; 2,400; Sec., Douglas I. McKay.
Explorers (1905), 544 Cathedral Parkway; 600; Pres., George H. Heye; Sec., George N. Pindar.
Friars, Inc. (1904), 110 W. 48th St.; 1,350; Abbot, George M. Cohan; Sec., William D. Weinberger.
Grolier (1884), 47 E. 60th St.; 528; Pres. Lucius Wilmerding; Sec., Frederick Coykendall.
Hamilton (1882), 146 Remsen St., Brooklyn; 450; Pres., George Hewlett; Sec., Dr. Clarence R. Hyde.
Hardware (1892), 253 Broadway; 600; Pres., Charles H. Krueger; Sec., Harold S. Graham.
Harmonie (1867), 4 E. 60th St.; 850; Pres., George B. Bernheim; Sec., Isaac H. Levy.
Harvard (1865), 27 W. 44th St.; 6,255; Pres., Thomas W. Lamont; Sec., William G. Wendell.
Jockey (1894), 250 Park Ave.; 50; Chmn., F. K. Sturgis; Ass't Sec., Algernon Daingerfield.
Knickerbocker (1871), 807 Fifth Ave.; 700; Pres., W. Butler Duncan; Sec., R. L. Redmond.
Lambs (1874), 130 W. 44th St.; 1,700; Shepherd, Fritz Williams; Sec., Edwin Milton Royle.
Lawyers (1887), 115 Broadway; 1,300; Pres., Alfred W. Kiddle; Sec., Albert E. Hadlock.
Level (1920), 253 W. 73d St.; 3,000; Sublime Leveler, Peter Schmuck; Sec., A. R. Sasserath.
Lotos (1870), 110 W. 57th St.; 1,536; Pres., Dr. Nicholas Murray Butler; Sec., James F. Allen.
Machinery (1907), 50 Church St.; abt. 1,300; address communications to the secretary.
Manhattan (1865), Madison Square; 1,019; Pres., John Godfrey Saxe; Sec., Albert Tilt.
Manhattan Single Tax (1889), 1860 Broadway; 500; Pres., James R. Brown; Sec., Walter Fairchild.
Marquette (1912), Hotel Plaza; 1,000; Pres., Ambrose O'Connell.
Masonic (1896), 71 W. 23d St.; 500; Pres., William Klingenstein; Sec., Henry J. Grupe.
Metropolis (1879), 105 W. 57th St.; 700; Pres., Joseph E. Gilbert; Sec., Milton J. Greenebaum.
Metropolitan (1891), 1 E. 60th St.; 1,445; Pres., George E. Roosevelt; Sec., Oliver G. Jennings.
Montauk (1889), 25 Eighth Ave., Brooklyn; 600; Pres., William H. English; Sec., Arthur E. Beggs.
National Arts (1898), 15 Gramercy Park; 1,500; Pres., John G. Agar; Sec., John Clyde Oswald.
National Democratic (1852), 233 Madison Ave.; 1,700; Pres., George J. Atwell; Sec., Eugene J. Sullivan.
National Republican (1879), 54 W. 40th St.; 2,000; Pres., Richard W. Lawrence; Sec., Loran T. Hostetler.
Navy (1917), 93-95 Park Ave.; Navy, Marine Corps & Coast Guard; Pres., R. A. C. Smith; Ass't Sec., Wm. A. Ross.
Newspaper (1922), 136 W. 42d St.; 700; Pres., Louis W. Fahr; Sec., Charles R. Barth.
New York (1845), 20 W. 40th St.; 600; Pres., Herbert D. Lounsbury; Sec., Alfred H. Appell.
New York Athletic (1868), 180 Central Park South; 8,500; Pres., William Kennelly; Sec., Andrew J. Kerwin.
New York Fraternity Clubs, 22 E. 38th St.; In this building these Greek Letter Clubs have established themselves with club rooms or offices: Alpha Chi Rho, Alpha Tau Omega, Beta Theta Pi, Chi Phi, Chi Psi, Delta Chi, Delta Phi, Delta Tau Delta, Delta Upsilon, Kappa Alpha, Kappa Sigma, Phi Delta Theta, Phi Kappa Psi, Phi Kappa Sigma, Phi Sigma Kappa, Pi Kappa Alpha, Sigma Alpha Epsilon, Sigma Chi, Sigma Nu, Theta Chi, Theta Xi.
New York Yacht (1884), 37 W. 44th St.; Commodore, Vincent Astor; Sec., George A. Cormack.
Nippon (1905), 161 W. 93d St.; 350; Sec., T. Matsuda.
Pen and Brush (1892), 16 E. 10th St.; 300; Pres., Miss Ida M. Tarbell; Sec., Mrs. Stafford.
Pennsylvania (1894), 35 E. 50th St., abt. 1,000; Pres., Wm. McClellan; Sec., John Scott Lansill.
Phi Gamma Delta (1886), 106 W. 56th St.; 1,500; Pres., James B. Cauthers; Sec., Rolf T. Michelsen.
Players (1888), 16 Gramercy Park; 1,000; Pres., Walter Hampden; Sec., Henry W. Lanier.
Press (1872), 21 Spruce St.; Pres., Irving Pinover; Sec., Caleb H. Redfern.
Princeton (1899), 39 E. 39th St.; 4,000; Chmn: House Committee, S. G. Etherington; Sec., L. G. Payson.
Progress (1864), 1 W. 88th St.; 600; Pres., William Hecht; Sec., Edgar H. Bauman.
Psi Upsilon (1887), 273 Lexington Ave.; 600; Pres., Charles H. Dayton; Sec., C. A. Lockard, Jr.
Racquet and Tennis (1875), 370 Park Ave.; 2,214; Pres., Ford Huntington; Sec., Sherman Day.
Railroad (1872), 26 Cortlandt St.; 2,063; Exec. Sec., Douglas I. McKay.
St. Nicholas (1875), 39 E. 51st St.; 325; Pres., George Fred Hurd; Sec., William Henry Walling.
Salmagundi (1871), 47 Fifth Ave.; 930; Pres., Bruce Crane; Corr. Sec., H. L. Sparks.
Soldiers and Sailors (1922), 283 Lexington Ave.; 200 committee members; Pres., Mrs. Francis Rogers; Sec., Miss Martha R. White.
Technology (1893), 22 E. 38th St.; Pres., Richard H. Ranger; Sec., Alfred Glassett.
Theta Delta Chi (1869), 30 W. 52d St.; 8,980; Pres., William F. Love; Sec., Norman Hackett.
Turf and Field (1895), 250 Park Ave.; 900; Pres., Henry W. Bull; Sec., H. A. Buck.
Turn Verein (1850), 1253 Lexington Ave.; 750; Pres., Bernard W. Weiler; Sec., Walter H. Klose.
Union (1836), 1 E. 51st St.; 1,418; Pres., Dallas B. Pratt; Sec., Charles K. Beekman.
Union League (1863), 1 E. 39th St.; 1,800; Pres., Alfred E. Marling; Sec., Liston L. Lewis.
University (1865), 1 W. 54th St.; 4,215; Pres., George W. Wickersham; Sec., A. I. Henderson.
Uptown (1919), 17 E. 42d St.; 800; Pres., John H. Towne; Sec., John G. Livingston.
Vatel (1916), 104 W. 47th St.; 1,500; Man., Auguste Grillon.
West Side (1888), 270 W. 84th St.; 200; Pres., Charles P. Rogers; Sec., Henry S. DeVault; Man., Robert Miller.
Whitehall (1910), 17 Battery Place; 1,000; Pres., Edwin J. Beinecke; Sec., Albert E. Hadlock.
Williams (1913), 24 E. 39th St.; abt. 1,700; address communications to the secretary.

GRANT'S TOMB.

The monumental tomb of Gen. Ulysses S. Grant, which overlooks the Hudson River, at Riverside Drive and 123d St., Manhattan, was built by popular subscription at a cost of $600,000. The architect was John H. Duncan, who died in Oct., 1929.

The tomb, 150 feet high and 90 feet square, is surmounted by a circular cupola and pyramidal top. The exterior is of granite from Maine and New Hampshire quarries.

Ground was broken April 27 (Grant's birthday), 1891; the cornerstone was laid April 27, 1892; the body was removed from the temporary tomb April 17, 1897, and placed in the Mausoleum; the dedication ceremonies were held April 27, 1897.

The Tomb is open from 9.00 A. M. to 5.00 P. M., or sundown. Admission free at all times.

There are two sarcophagi, one containing the body of Gen. U. S. Grant, the other that of his wife, Julia Dent Grant. These are of Montello Wisconsin granite, a form of red porphyry.

The body was encased in three coffins, one being copper; the exterior one of oak. The sarcophagi was made of such size that it received all the coffins intact.

There are two reliquaries opening from the main hall, in which there are battle flags, portraits and other articles of historical interest appertaining to Gen. Grant.

Gen. Grant was born April 27, 1822; and he died July 23, 1885, at Mt. McGregor, Saratoga, N. Y.

ALTITUDES IN NEW YORK CITY.

The highest natural elevation of land in the City of New York—430 feet—is on top of Todt (Toad or Iron) Hill, Staten Island. This hill rises from the Richmond Road at Garretson's station on the rapid transit railway, and overlooks New Dorp and the Moravian Cemetery, where the Vanderbilts lie buried. This is the highest point on the Atlantic Coast south of Maine.

The highest natural altitude in Manhattan—267 feet 9 inches—is near the site of old Fort Washington, a little west of Fort Washington Avenue, approximately 900 feet north of W. 181st St. The hill at Inwood rises to a height of 232 feet 9 inches. Other elevations in Manhattan above sea level, expressed in feet and decimals thereof, are: Custom House, 17.06; Bowling Green, 21.75; Pine St. and Broadway, 40.78; Municipal Building, 41.61; City Hall, 44.74; Astor Place, 43.01; Union Square, 45.73; Columbus Circle, 86.64; Central Park, near W. 93d St., 114.14; Amsterdam Ave., at Trinity Cemetery, 148.73; Audubon Ave., at W. 174th St., 185.92; Wadsworth Ave., near W. 182d St., 188.33; High Bridge water tower, at the street level, 203.25.

The highest natural elevation in the Bronx—284 feet 6 inches—is on the hill bounded by Iselin Ave., Highland Ave., and W. 250th St., Riverdale Hill. Other Bronx altitudes are: Jerome Ave., near E. 233d St., 210.73; Jerome and Mosholu Aves., Van Cortlandt Park, 193.39; Riverdale Ave. and Spuyten Duyvil Parkway, 178.49; Grand Boulevard and Concourse, and E. 199th St., 148.64; Hall of Fame Terrace, at University Ave., 170.32; Poe Park, E. 192d St., 140.22; east approach to Washington Bridge, at University and Aqueduct Aves., 141.63.

The highest natural elevation in Brooklyn—210 feet—is in Greenwood Cemetery, near the 9th Ave. entrance. Other Brooklyn altitudes are: Base of the Museum on Eastern Parkway, at Washington Ave., 163.44; 9th Ave. (Prospect Park West), 32 feet south of 14th St., 155.34; Prospect Park West and 5th St., 162.16; Union St., Plaza, at Flatbush Ave., 146.29; 59th St. and 5th Ave., 116.96.

The highest elevation in Queens Borough—266.48 feet—is on Little Neck Hill, 800 feet east of Little Neck Road and 435 feet south of 61st Ave.

SUBURBAN ALTITUDES.

Westchester County (feet above mean sea level)—Buttermilk Hill, 743; Chappaqua Hill, 739; Dickerson Hill, 810; Gallows Hill, 443; Indian Hill, 677; Jacobs Hill, 600; Kisco, Mt., 620; Prospect Hill, 460; Salt Hill, 745; Sarles Hill, 725; Spitzenberg Hill, 545.

Nassau County—Harbor Hill, 391; Manhasset Hill, 120.

Suffolk County—Dix Hills, 340; Half Hallow Hills, 240; High Hill, 320; Jacobs Hill, 160; Mannetto Hills, 320; Mattituck Hills, 178; Oregon Hills, 100; Shinnecock Hills, 75; Sinai, Mt., 100; Whale Hill, 100.

Rockland County—Dunderberg, 865; High Tor, 832; Hook Mt., 790; Letterrock Mt., 1,220; Ramapo Mts., 1,260; Rider Hill, 620; Table Rock, 940; the Timp, 1,100; Torne, 1,140; Union Hill, 620.

SUBWAY TRACK ELEVATIONS.

The highest track elevation (altitude above Mean High Water at base of rail) on the New York Subways under operation is 133.5 feet at the Brooklyn Museum Station of the I.R.T. Eastern Parkway Line at Eastern Parkway and Washington Avenue.

On the new city subways under construction, there is a point still higher, 161.2 feet, on the Washington Heights Line at Washington Avenue and 175th Street.

The lowest track elevation (depth below Mean High Water at base of rail) is 113.12 feet under the East Channel of the East River on the 60th Street River Tunnels of the B.M.T. Broadway—7th Ave.—60th St.—Queens Line.

In the following list of subway track elevations, in feet, a minus (−) sign indicates below mean high water.

I.R.T. West Side Line—Cortlandt St., — 9.6; Chambers St., — 10.0; 14th St., — 3.4; Pennsylvania Station, 17.5; Times Square, 22.4; Columbus Circle, 58.7; 72nd St., 55.4; 96th St., 54.3; 190th St. & St. Nicholas Ave., 44.0.

2¼ "	E. 9th St.	4½ "	E. 54th St.				

Every twenty blocks above Houston Street measure one mile.

The distance across the city: At Battery Place is ½ mile; Fulton Street is ¾ mile; Chambers Street is 1 mile; Grand Street is 2½ miles; Houston Street is 2⅝ miles; Fourteenth Street is 2⅝ miles; Twenty-third Street is 2⅝ miles; Inwood is ¾ mile.

From Twenty-third Street northward to One Hundred and Twenty-fifth Street the width of the island averages from 2 to 2¼ miles.

The so-called short blocks in the city are mostly 200 feet long. Under this rule the average depth of a building lot is 100 feet.

The old-time standard width of a lot was 25 feet in Manhattan; the standard width in the other boroughs was, and is, 20 feet.

Manhattan and Bronx—Croton water was introduced in 1842. Water from the Bronx River was introduced in 1854, and from the Byram in 1896. The Croton watershed furnishes about one-third of the present supply for Manhattan and Bronx, the rest being supplied from the Catskill system.

The Catskill supply, introduced in 1917, is obtained from the Schoharie and Esopus watersheds in the Catskills.

The Schoharie watershed lies north of the Esopus, in the heart and higher section of the Catskill Mountains. The flow of Schoharie Creek is intercepted by the completed new Gilboa dam which forms the Schoharie reservoir with a capacity of 20,000,000,000 gallons.

The Ashokan reservoir lies 14 miles west of the Hudson at Kingston, N. Y., and 92 miles from the northern city boundary. It has an available storage capacity of 130,400,000,000 gallons.

It is conservatively estimated that even during a series of extraordinarily dry years, at least 585 million gallons of water daily can be drawn from the combined Schoharie and Esopus watersheds, and from the Bronx and Byram watersheds 15 million gallons daily, making the safe yield of the Catskill system at least 600 million gallons daily.

The Croton watershed, 22 miles north of the city line, has an area of 375 square miles and a safe yield of 336,000,000 gallons daily.

Brooklyn—The Esopus watershed together with the old Brooklyn system furnish the entire supply for the Borough of Brooklyn, with the exception of the Twenty-ninth Ward, which is supplied by the Flatbush Water Works Company.

Queens—The city supplies only the First, Second and Third Wards in the Borough of Queens. The Esopus watershed furnishes about 70 per cent of the supply to these wards.

Richmond—The Borough of Richmond is supplied from the Esopus watershed, supplemented by a small amount from local wells at one or more of the pumping stations, which yield about 8,000,000 gallons daily. Silver Lake reservoir, the terminal reservoir for the Catskill system, is located in this borough.

The total cost of the completed Catskill system will be about $187,500,000, of which $27,000,000 is for the Schoharie works.

Kensico reservoir, east of the Hudson and 30 miles from the City Hall, contains enough Catskill water to supply New York several months, if husbanded.

Hill View reservoir is located in the City of Yonkers, just north of the New York City line and 15 miles south of Kensico reservoir. Its function is to equalize the difference between the use of water in the city as it varies from hour to hour and the steady flow in the aqueduct.

The Hudson River is crossed by a tunnel wholly in granite rock, at a depth of 1,114 feet below sea level, between a shaft at Storm King Mountain on the west bank and another shaft on the east side of the river at Breakneck Mountain.

At the Ashokan reservoir, and also at Kensico reservoir, aerators have been built. The aerators are substantially alike and are great fountain basins, approximately 500 feet long by 250 feet wide, each containing about 1,600 nozzles, through which jets of water are thrown vertically into the air, permitting thorough admixture of oxygen from the atmosphere and removal of undesirable gases and other matters causing tastes and odors.

Within the screen chambers downstream from Ashokan and Kensico reservoirs and in the Hill View downtake chamber chlorine is introduced into the water flowing in the aqueduct for the destruction of germ life. The gas is delivered at the chambers compressed to a liquid state in steel containers. Chlorine is used to insure the practical sterilization of the water before it goes to the city and is wholly neutralized or dissipated before the water reaches the distribution pipes.

From Hill View reservoir Catskill water is delivered into the five boroughs by a circular tunnel in solid rock reducing in diameter from 15 to 14, 13, 12, and 11 feet. The total length of the tunnel is eighteen miles. From two terminal shafts in Brooklyn steel and cast iron pipe lines extend into Queens and Richmond. One 36-inch and one 42-inch flexible-jointed cast iron pipe, buried in trenches in the harbor bottom, have been laid across the Narrows to the Staten Island shore,

WATER CONSUMPTION IN NEW YORK CITY—GALLONS (AVERAGE) PER DAY.

Year.	Manhattan and Bronx.	Brooklyn.	Queens.	Richmond.	Private Cos., All Boroughs.	Total, incl. Private Cos.
1910	331,000,000	143,100,000	12,600,000	8,900,000	32,900,000	528,500,000

1920	466,200,000	187,200,000	18,100,000	18,400,000	45,000,000	734,900,000
1921	462,300,000	186,600,000	18,000,000	17,800,000	46,600,000	731,300,000
1922	453,100,000	205,600,000	26,400,000	18,200,000*	39,200,000	742,500,000
1923	465,600,000	205,600,000	32,100,000	20,000,000	38,300,000	761,600,000
1924	468,200,000	207,900,000	40,300,000	21,900,000	41,900,000	780,200,000
1925	492,900,000	233,900,000	45,900,000	21,700,000	45,200,000	839,600,000
1926	511,400,000	229,100,000	50,700,000	23,300,000	48,800,000	863,300,000
1927	515,400,000	226,100,000	53,100,000	22,000,000	51,500,000	868,100,000
1928	509,300,000	228,300,000	67,200,000	21,500,000	52,000,000	873,300,000

whence a 48-inch cast iron pipe and a 66-inch steel pipe extend to the Silver Lake reservoir, holding 435,000,000 gallons. The total length of the delivery system is about 56 miles. The tunnel is at depths of 200 to 750 feet below the street surface, thus avoiding interference with streets, buildings, subways, sewers and pipes.

The cost of the portions of the Catskill aqueduct within the city limits, including the tunnel, pipe lines, appurtenances and Silver Lake reservoir, is about $37,000,000.

The terminal Silver Lake reservoir for the Catskill water system, located on Staten Island, is about 2,400 feet long and 1,500 feet wide. It holds 435,000,000 gallons, and is 228 feet above tidewater.

In order to improve and safeguard the delivery of the present Catskill supply within the city, a new city tunnel is in course of construction under four contracts which were awarded on Oct. 5, 1928. The estimated cost will be about $42,692,567.

It will extend from Hill View reservoir through the borough of The Bronx, under the East river near Riker's Island and into the borough of Queens and thence into the borough of Brooklyn, where a connection with the present city tunnel will be effected.

FIRE PROTECTION.

High Pressure Fire Service System—The high pressure fire service system in Manhattan is bounded by Thirty-fourth Street, Madison Avenue, Twenty-fourth Street, Lexington Avenue, Fourteenth Street, Third Avenue, Bowery, Houston Street, East River, Battery, North River. There are two pumping stations—Gansevoort and West Streets, and Oliver and South Streets. Each station has six electrically driven centrifugal pumps. Either fresh or salt water may be used. Each pump can deliver 3,000 gallons a minute. The combined capacity of the two stations is equal to about fifty fire engines.

In Brooklyn there are two high pressure fire service systems. The one for the business and manufacturing districts is bounded by the Navy Yard, St. Edward's Street, St. Felix Street, Fort Greene Place, Fifth Avenue, Twenty-fourth Street, Fourth Avenue, Thirty-ninth Street and the water front, covering an area of 4.8 miles. The supply is furnished by two stations, one located at the foot of Joralemon Street, and the reserve at Willoughby and St. Edward's Streets. Both draw their supply from the Ridgewood mains. The main station is connected to the East River.

The Coney Island high pressure system protects an area of 470 acres. The pumping station is located at West 12th Street and Coney Creek.

STEPS IN BROOKLYN'S GROWTH.

(From the Brooklyn Daily Eagle Almanac of 1911)

1623—Brooklyn settled by Europeans in neighborhood of 19th Ward (Wallabout).
1645—Gravesent received a Dutch charter.
1646—Brooklyn organized as a village, June 12.
1652—A colony established in Flatbush.
1653—Flatbush, including New Lots, and Brooklyn received a Dutch charter.
1654—New Utrecht received a Dutch charter.
1660—Bushwick received patent.
1661—Bushwick organized as a town.
1665—Brooklyn received an English charter.
1665—Flatbush, including New Lots, received an English charter.
1665—Flatlands received an English charter.
1788—Brooklyn, Flatbush, including New Lots, New Utrecht, Gravesend, Flatlands and Bushwick organized as towns by the State, March 7.
1801—Brooklyn organized as a village, April 2. The records show that Brooklyn was referred to as a town as early as 1642.
1801—Brooklyn incorporated as a fire district, April 2. There was a fire district in Brooklyn in 1785.
1816—Brooklyn village incorporated.
1826—Village of Brooklyn divided into five districts (not wards).
1827—Williamsburgh incorporated as a village, April 14.
1834—April 8, Brooklyn incorporated as a city.
1834—Second Ward organized (original ward).
1834—Fourth and Ninth wards organized. They were original wards.
1840—Williamsburgh organized as a town from Bushwick.
1850—Tenth Ward organized from old Sixth, March 23. The Eleventh Ward, created at same time, being taken from old Seventh.
1851—Williamsburgh incorporated as a city, April 7.
1852—New Lots organized from Flatbush, February 12.
1855—Brooklyn, Williamsburgh and Bushwick consolidated by Act of April 17, 1854, which went into effect January 1, 1855.
1856—The 19th Ward was created and taken from the old 7th Ward.
1863—The 20th Ward was created and taken from the 11th Ward.
1868—The 21st Ward was created and taken from the old 9th Ward. The 22d Ward was created and taken from the 8th Ward.
1873—The 1st Ward of Brooklyn was reorganized under the charter of this year by adding to it the old 3d Ward. Both these were original wards formed in 1834. The new 3d Ward was taken from the 10th Ward. The 23d, 24th and 25th Wards were created by the charter of 1873 and taken from the old 9th Ward.
1886—The town of New Lots, the present 26th Ward, was added to Brooklyn.
1892—The present 27th and 28th Wards were created and taken from the old 18th Ward.
1896—Jan. 1. Towns of Flatbush, New Utrecht, Gravesend and Flatlands consolidated with Brooklyn and became respectively the 29th, 30th, 31st and 32d Wards, making Kings County and Brooklyn coterminous.
1898—Jan. 1. Brooklyn consolidated with New York, Richmond and Queens Counties, to make the "Greater New York."

PUBLIC SCHOOLS IN NEW YORK CITY.

(Board of Education Headquarters, Park Ave. and 59th St.)

There are 680 public schools in the City of New York, excluding night schools. They are classified as follows: Elementary and Junior High schools, 619, high schools, 38; training schools for teachers, 3, industrial high schools, 5, compulsory continuation schools, 15.

Of the elementary schools, 142 are in Manhattan, 86 are in the Bronx, 214 in Brooklyn, 132 in Queens, 45 in Richmond. (July 1929.)

All high schools offering a four years' general course prepare for college.

A candidate for college admission should be careful to select as elective the subjects required by the particular college which he expects to enter.

Graduates of this course may earn the academic and State college entrance diplomas.

They may also compete for the State scholarships and for the various scholarships offered by many of the leading colleges.

HIGH AND TRAINING SCHOOLS.

MANHATTAN.

New York Training School for Teachers, Hugo Newman, Principal. W. 135th St. and Convent Ave.

High School of Commerce (boys), 155 W. 65th St. Edward J. McNamara, Principal.

George Washington High School (girls and boys), 192d St. and Audubon Ave., Arthur A. Boylan, Principal.

Haaren High School (girls and boys), 10th Ave., 58th and 59th Sts.

Julia Richman High School (girls), Second Ave., E. 67th and 68th Sts., Michael H. Lucey, Principal.

Wadleigh High School (girls), 215 W. 114th St., Stuart H. Rowe, Principal.

Washington Irving High School (girls), 40 Irving Place, Edward C. Zabriskie, Principal.

Stuyvesant High School (boys), 345 E. 15th St. Ernest R. von Nardroff, Principal.

Textile High School (girls and boys), 60 W. 13th St., William H. Dooley, Principal.

Seward Park Junior and Senior High School (girls and boys), 39 Hester St., Robert B. Brodie, Principal.

BRONX.

Morris High School (girls and boys), 166th St. near Third Ave., Elmer E. Bogart, Principal.

Evander Childs High School (girls and boys), 120 E. 184th St., Henry I. Norr, Principal.

Theodore Roosevelt High School (girls and boys), E. Fordham Rd. and Washington Ave., William R. Hayward, Principal.

James Monroe High School (girls and boys), 172d St. and Boynton Ave., Henry E. Hein, Principal.

DeWitt Clinton High School, Mosholu Parkway between Gaynor and Sedgwick Avenues, A. Mortimer Clark, Principal.

Walton Junior and Senior High School (girls), 141st St. and Brook Ave., Mary A. Conlon, Principal.

BROOKLYN.

Maxwell Training School for Teachers, Park Place, west of Nostrand Ave., Fred'k L. Holtz, Principal.

Girls' High School, Nostrand Ave., Halsey and Macon Sts., William L. Felter, Principal.

Girls' Commercial High School, Classon Ave. and Union St., Mrs. Evelyn W. Allan, Principal.

Boys' High School, Marcy and Putnam Aves., Eugene A. Colligan, Principal.

Manual Training High School (girls and boys), Seventh Ave. and Fourth St., Horace M. Snyder, Principal.

Erasmus Hall High School (girls and boys), Flatbush Ave. between Church and Snyder Aves., J. Herbert Low, Principal.

Alexander Hamilton High School of Commerce (boys), Bergen St. and Albany Ave., Gilbert J. Raynor, Principal.

Eastern District High School (girls and boys), Marcy Ave. and Rodney St., William T. Vlymen, Principal.

Bushwick High School (girls and boys), Irving Ave. and Madison St., Milo F. McDonald, Principal.

Bay Ridge High School (girls), Fourth Ave. and 67th St., Kate E. Turner, Principal.

New Utrecht High School (girls and boys), 79th St. and 16th Ave., Harry A. Potter, Principal.

Thomas Jefferson High School (girls and boys), Dumont and Pennsylvania Aves., Elias Lieberman, Principal.

Brooklyn Technical High School (boys), Flatbush Ave. Extension and Concord St., Albert L. Colston, Principal.

James Madison High School (girls and boys), Quentin Rd. and East 25th Street.

Franklin K. Lane Junior Senior High School (girls and boys), Evergreen Ave. and Eldert St., Charles E. Springmeyer, Principal.

QUEENS.

Jamaica Training School for Teachers, Parsons and Gilman Aves., Maurice Rogalin, Principal.

Bryant High School (girls and boys), Wilbur Ave. and Academy St., Long Island City, James P. Warren, Principal.

Jamaica High School (girls and boys), 168th Street and Gothic Drive, Charles H. Vosburgh, Principal.

Newtown High School (girls and boys), Chicago Ave. and Gerry St., Elmhurst, James D. Dillingham, Principal.

Far Rockaway High School (girls and boys), Beach 25th St., Sanford J. Ellsworth, Principal.

Richmond Hill High School (girls and boys), 114th St. and 89th Ave., Matthew L. Dann, Principal.

Flushing High School (girls and boys), Northern Blvd. and Union St., Arthur L. Janes, Principal.

RICHMOND.

Curtis High School (girls and boys), Hamilton Ave. and St. Marks Place, New Brighton, John M. Avent, Principal.

Tottenville High School (girls and boys), Summit Avenue, Nathan J. Lowe, Principal.

Port Richmond High School, Innis St. and St. Joseph Ave., Port Richmond, William Halloran, Principal.

CONTINUATION SCHOOLS.

MANHATTAN.

East Side, Hester and Chrystie Sts. (P. S. 7).

West Side, 208 West 13th St., between 7th and 8th Aves. Has employment bureau.

Central Commercial, 725 Broadway (at Waverly Place).

Central Building Trades, 215 E. 21st St., between 2d and 3d Aves.

Central Printing Trades, 240 West 40th St. Has employment bureau.

Central Needle Trades, 128 W. 31st St.

East Side, Oliver, Oak and James Sts. Has employment bureau.

Harlem, Girls' (P. S. 66), 415 E. 88th St. Has employment bureau.

THE BRONX.

Bronx, 157th St. and 3d Ave.

BROOKLYN.

Brooklyn Girls', Third Ave., State and Schermerhorn Sts. Has employment bureau.

Brooklyn Boys', 11 Bond St. Has employment bureau.

East New York, 2416 Atlantic Ave. Has employment bureau.

Williamsburg, South 4th St., near Havemeyer St. Has employment bureau.

QUEENS.

Queens 47th Ave. and 37th St., Long Island City. Has employment bureau.

Jamaica, 170th St. and Jamaica Ave., Jamaica (P. S. 49.) Has employment bureau.

RICHMOND.

Staten Island, Housman Ave., and La Salle St., Elm Park. Has employment bureau.

INDUSTRIAL HIGH SCHOOLS.

Manhattan—(Boys), 138 Street, west of 5th Avenue, Charles J. Pickett, Principal.

Murray Hill, (Boys), 237 East 37th Street. Charles Harper, Principal.

Manhattan Trade School, (Girls), 127 East 22nd Street, Florence M. Marshall, Principal.

Bronx—(Girls), College Avenue and 145th Street; Margaret Burke, teacher in charge.

Brooklyn—(Boys), Jay and Nassau Streets; James H. Allen, Principal.

EDUCATION STATISTICS, NEW YORK CITY.

Public school graduates (June, 1929), numbered 30,765 boys and 33,612 girls.

Of these, 20,186 boys and 21,609 girls were elementary school graduates; 10,502 finished at the junior high schools; 10,770, at the secondary schools; 165 completed the 3-yr. high school course; 31 closed their 2-yr. industrial course, and 1,114 graduated at training schools.

The total register of all day schools on September 30, 1929 was 1,056,465, of which 789,228 were in the elementary schools, 93,391 in the junior high schools, 163,799 in the high schools, 4,024 in the training schools for teachers, 368 in the parental school, 5,236 in the industrial high schools and 419 in the Stater Island Continuation and Vocational School.

The number of pupils on short time in September, 1929, was 38,546 in the elementary schools, 1,229 in the junior high schools, 31,298 in the high schools—a total of 71,073.

Women teachers cannot be dismissed from the public schools of New York City because they marry.

The first free public school in Brooklyn was opened July 4, 1661, with Carl Debevoise as teacher. It was on the south side of Fulton St., near Hoyt St.

Of 414,544 New York City public school children examined in 1928, by the Education officials, 33,918 had defective vision; 101,562 had defective teeth 127,572 suffered from tonsil-adenoid troubles; 56,433 showed malnutrition; 5,116 had bad hearts; 371 had pulmonary defects; and 2,610 walked with web feet.

NEW YORK CITY PENSION LAW.

The New York City Pension Law provides that all employees, except those in exempt and non-competitive classes, entering the city service after Oct. 1, 1920, shall become members of the retirement system, and all present city employees may become members by filing with the Board of Estimate and Apportionment a statement waiving all present or prospective benefits in other city retirement systems. The Board of Estimate and Apportionment has charge of all funds and of the entire system; the Comptroller is the custodian of the several funds, which are (1) Annuity savings funds, (2) Annuity reserve fund, (3) Contingent reserve fund, (4) Pension reserve fund, (5) Pension fund.

Teachers, policemen, firemen and street-cleaners do not enter into this system, as they have their own.

Among the provisions of this law are life insurance protection equal to the last twelve months' pay of the employee, disability insurance protection of from one-quarter to one-half of the salary any time after completing ten years of service and paying, as long as the disability continues, a three-quarter pay pension if the employee is disabled in the performance of duty, a half-pay pension to the dependents with return in cash of all contributions at 4 per cent per annum if the employee is killed in the performance of duty, retirement on demand after the ages of fifty-eight, fifty-nine and sixty, on a benefit proportioned to length of service and amount of compensation.

The city pays for all of these benefits except one-half of the cost of service or superannuation retirement benefit on account of service during membership in the fund. The city also pays the entire cost of the benefits allowed by reason of service rendered prior to Oct. 1, 1920. The amount of the salary paid into the pension fund is from 3.85 to 8.30 per cent.

100,000 ON CITY PAY ROLL.

There are approximately 131,000 regular or occasional officials and employees in the service of the City of New York. Salaries and wages in a year exceed $190,000,000.

Under Chapter 788 of the Laws of 1928—Provision is made for retirement of the member at age 55 or therefore if said member has elected to contribute at a rate necessary to allow retirement at said age. Any present employee member had to make the decision of electing to contribute at a new higher rate prior to Oct. 1, 1928; any future member may so elect at the time he becomes a member.

ASSETS IN THE RETIREMENT FUNDS, (DECEMBER 31, 1928.)

(Figures in parentheses show number of pensioners on the rolls on Dec. 31, 1928.)

Actuarial Funds—New York City Employees' Retirement System (1,192), $47,330,895.88; Teacher's Retirement System (2,546), $51,798,480.94; Board of Education Retirement System (145), $3,783,673.90; Hunter College Retirement System (24), $515,578.50.

Departmental Funds—Police Pension Fund (6233), $412,419.73; Fire Department Relief Fund (3,591), $852,447.85; Department of Street Cleaning Relief and Pension Fund (2,208), $469,800.71; Health Department Pension Fund (357), $118,152.94.

Miscellaneous Funds—Grady Law (171); Civil War Veterans' Act, (Pensions Paid by appropriation only) (54); Supreme Court (38), None; General Sessions (15), $82,837.61; County Court of Kings County (o) $40,989.29.

HALL OF REMEMBRANCE OF AMERICAN ARTISTS.

Distinct from the Hall of Fame but under the aegis of the University is the Hall of Remembrance of American Artists, a collection of busts of American painters and sculptors which decorate the rotunda of the Gould Memorial Library.

The Hall is the idea of a New York artist, W. Francklyn Paris.

Ten of the sixteen busts are in place: Carroll Beckwith, by George T. Brewster; George Inness, by Scott Hartley; Clinton Ogilvie, by Paul Bartlett; Frank Duveneck, by Charles Grafly; Walter Shirlaw, by Paul Bartlett; Augustus St. Gaudens, by John Flanagan; J. Q. A. Ward, by J. Q. A. Ward; William M. Chase, by Albin Polasek; Henry K. Brown, by Henry K. Bush-Brown.

Busts of James McNeill Whistler, by Edmond Quinn, and of S. F. B. Morse (a bronze copy of the original by Horatio Greenough) were installed in May, 1928.

The memorials to architects and workers in the decorative arts will occupy spaces in the alcoves.

A beginning has been made in the bronze doors at the entrance of the library building which are a memorial to Stanford White, architect, whose firm designed the Hall of Fame and the buildings of the university.

These doors contain medallions contributed by nine noted sculptors.

CITY OF NEW YORK BONDED DEBT.

As of Jan. 1.	Funded Debt (Corp. Stock, Notes, and Assess. B'ds).	Sinking Fund Holdings (Bonds).	Net Funded Debt (Column 1, Less Column 2).	Other Debt (General Fund Bonds).	Other Debt (Special Revenue Bonds).	Other Debt (Revenue Bonds and Bills).	Interest on City Debt.

The Board of Estimate, late in Oct. 1929, stated the 1930 budget at $564,773,252.

WHEN TO PAY CITY TAXES.

Jan. 1—City water rates due. Pay before April and avoid 5% penalty.

Mar. 31—Last day to pay city water rates. 5% penalty added April 1. City tax bills can be obtained on application by mail. Send stamped envelope to Receiver of Taxes.

May 1—First half of real estate tax and all personal property taxes due. Second half real estate tax may be paid (provided first half is paid) and a discount will be allowed thereon from date of payment to November 1 at the rate of 4% a year.

May 31—Last day to pay personal property tax in full and first half real estate tax without penalty. 7% per annum added from May 1 on and after June 1.

June 30—10% additional penalty if City water rates are not paid by today. Proceedings to review determination of Tax Commissioners to reduce valuations must be begun before July 1.

Aug. 15—Last day to pay personal property tax before it is placed in the hands of the Marshal for collection.

Oct. 1—Tax books showing real and personal property assessments for next year open for inspection.

Nov. 1—Second half of real estate tax due.

Nov. 15—Last day to file application for reduction of real estate valuation.

Nov. 30—Last day to pay second half of real estate tax without penalty. 7% per annum added from November 1 on and after December 1. Appeals to reduce personal property assessments must be filed before December 1.

NEW YORK GENERAL POST OFFICE.

The New York General Post Office, with jurisdiction over Manhattan and the Bronx, covers the two city blocks, 31st Street to 33rd Street, Eighth Avenue to Ninth Avenue. The main entrance is on Eighth Avenue. *Postmaster*—John J. Kiely. *Assistants*—Thomas B. Randles and Charles Lubin. In this building are located the Postal Inspectors, Railway Mail Service, and all the general offices.

There are nearly 23 miles of pneumatic tubes in operation, performing almost continuous service throughout the entire day. About 5,000,000 letters are transported daily in this way.

Has 59 classified stations and 255 contract stations; employs 19,000 people.

Receives, delivers and despatches 17,000,000 pieces of ordinary mail, and 160,000 pieces of registered mail, and receives and despatches 75,000 insured and C. O. D. parcel-post packages daily.

Weighs and despatches 600,000 pounds of newspapers and periodicals daily at pound rates.

Collects $260,000 in postage daily.

Issues money orders for $81,000,000 annually; and pays money orders for $168,000,000 annually; has on deposit in postal savings $22,000,000; and has 85,000 postal-savings depositors.

Postal receipts for year ended June 30, 1929, $78,715,196.65.

Mail deliveries—Manhattan Borough, 4 to 6 Bronx Borough, 2 to 4; Suburban, 2.

Mail collections—Manhattan Borough, 8 to 27; Bronx Borough, 5 to 12; Suburban, 3 to 5.

The old General Post Office, now called the City Hall Station, covers the triangular block bounded by Broadway, Park Row and Mail Street.

The Hudson Terminal Station, No. 30 Church Street, was re-established February 12, 1923.

The Grand Central Station, Lexington Avenue and 45th Street, handles the mail over the N. Y. Central and New Haven Railroads, in addition to local business in that district.

The Foreign Section is located in the Varick Street Station, between Beach and Laight Streets.

BROOKLYN GENERAL POST OFFICE.

The Brooklyn General Post Office is bounded by Washington, Tillary, Adams, and Johnson Streets. Part of the building is in process of demolition, (Nov. 1929), and a new building will be erected.

Meantime, for a year or so, temporary quarters will be maintained on Jay Street between Sands and High Streets.

The financial sections, and provision for the acceptance of parcel-post in retail quantities, will be maintained at the old building.

The carriers' section serving the business area downtown Brooklyn also will be continued in the old building.

The executive offices and the handling of the mails will be maintained in the temporary quarters.

Postmaster—Albert Firmin ($8,000); *Assistant Postmaster* (Finance)—Peter J. Cleary; *Assistant Postmaster* (Mails)—John A. T. Carrougher; *Superintendent of Mails*—John A. Brennan; *Assistant Superintendent of Mails* (Outgoing)—John F. McKnight; *Assistant Superintendent of Mails* (Incoming)— Andrew J. Tarpey.

Stations of the Brooklyn Office, 31; Contract Stations, 293.

Receipts for last fiscal year, $9,026,255.53.

Number of Employees, approximately 4,000; average daily cancellations, 852,844; value of money orders issued and paid, year ending June 30, 1929, $64,458,965.

GOVERNMENT OF HUDSON COUNTY, N. J.

MAYORS (COMMISSION GOVERNMENT)

MAYOR.

Jersey City, Frank Hague.
Hoboken, Gustav Bach.
Bayonne, Dr. Bert Daly.
Union City, Wm. Rannenberg.
West New York, Frank Effert.
Weehawken, Emil Grauert.
Secaucus, John J. Kane.
Guttenberg, Paul Schnyder.
North Bergen, Charles Morris.
Harrison, Matthew O'Brien.
Kearney, Arthur H. Jones.
East Newark, John A. Reynolds.

Bach's term as mayor of Hoboken, expires in April, 1930, when he becomes County Clerk, to which office he was elected in Nov., 1929.

JERSEY CITY.

Officials—Frank Hague, Mayor, and Director of Public Affairs; William B. Quinn, Director of Revenue and Finance; Michael I. Fagen, Director of Streets and Public Improvements; John Beggans, Director of Public Safety; Arthur Potterton, Director of Parks and Public Property.

HOBOKEN.

Officials—Gustave Bach, Mayor, and Director, Public Affairs; Joseph A. Clark, Director, Streets and Public Improvements; M. F. Kearins, Director, Parks and Public Property; William H. Gilfert Director, Revenue and Finance; Bernard N. McFeely Director of Public Safety.

BAYONNE.

Officials—Dr. Bert Daly, Mayor, and Director, Public Safety; George E. Keenan, Director, Revenue and Finance; Lucius F. Donohue, Director, Parks and Public Property; Joseph Minton, Director of Public Works; W. Homer Axford, Director, Public Affairs.

JUDGES AND OTHER COUNTY OFFICIALS

Judges, Supreme Court, Emmanuel Kalisch; Circuit Court, Frank L Cleary, and Henry E. Ackerson, Jr.; Common Pleas, Charles M. Egan, Robert V Kinkead and Daniel O'Regan; Juvenile Court, Thomas F. Meaney, Sheriff, William V. O'Driscoll; Surrogate, James F. Norton; Register, Charles F. X. O'Brien; County Clerk, Gustav Bach—McGovern's term expires in April, 1930, Bach was elected to take his place. Prosecutor, John J. Drewen.

Supervisor, John F. O'Neill.

BOARD OF CHOSEN FREEHOLDERS.

CIVIL SERVICE RULES IN THE CITY OF NEW YORK.

(The total number of city employees in 1929, including the Civil Service, exceeded 131,000, as against 116,000 in 1926.)

Under the White Civil Service Law, Chapter 370, Laws of 1899, April 19, the rules apply to all positions in the service of the City of New York except officers elected by the people, all legislative officers and employees, heads of any department, or superintendents, principals, or teachers in a public school, academy, or college.

The Unclassified Service includes elective officers; the officers and employees of the Board of Aldermen; members of the Board of Elections; the head, or heads, of any department of the City Government; or any person appointed by name in any statute.

The Classified Service is divided into four classes; namely:

Exempt Class—The Exempt Class includes the deputies of principal executive officers authorized by law to act generally for and in place of their principals: one secretary of each officer, board, and commission authorized by law to appoint a secretary; one clerk and one deputy clerk, if authorized by law, of each court, and one clerk of each elective judicial officer. In addition thereto there may be included in the Exempt Class all other subordinate offices for the filling of which competitive or non-competitive examination may be found to be not practicable.

Non-Competitive Class—Includes all those positions of a minor nature, in the city institutions or elsewhere, that it is not practicable to fill through competitive examination.

Labor Class—Includes all unskilled laborers and such skilled laborers as are not included in the competitive or non-competitive classes.

Competitive Class—Includes all positions in the Classified Service (excepting those in the Exempt, Non-Competitive or the Labor Class) for which it is practicable to determine the merit and fitness of the applicant by competitive examination.

Vacancies in the Exempt Class may be filled without examination, appointments being made by the Mayor or other official having jurisdiction over the department where the vacancy exists.

Positions in the Non-Competitive Class are filled as a result of the examinations held by the department where the person is to be employed.

Filing Applications for Positions in Competitive Class—Applications for positions in the Competitive Class will be issued and received only for the position or positions advertised, and only during the period specified by the commission in such advertisement. Advertisements for the various examinations appear in the prominent daily papers and in the *City Record*. The *City Record* is on file in the reading room of any of the city libraries.

All applications for an examination must be on a prescribed form addressed to the "Secretary of the Municipal Civil Service Commission."

Application blanks will be mailed upon request provided a self-addressed stamped envelope or sufficient postage is inclosed to cover the mailing.

Applicants must be citizens of the United States and residents of the State of New York. The requirement as to residence may be waived by the commission, but only with the proviso that applicants become residents of the State of New York prior to the date of their appointment.

Applicants for patrolmen must have resided within the State of New York at least one (1) year prior to the date of appointment.

The prescribed application form filled out in the applicant's handwriting sets forth the following:

The applicant's name, age, residence, statement regarding citizenship or naturalization, statement regarding arrests or previous service in a City Department, if any, and also the certificate for citizens whose residences or places of business are within the City of New York.

In examinations for positions requiring previous experience, applicants must fill in and file with their application an experience paper.

Applications for positions in the Labor Class are issued daily, and are received only for the positions advertised.

Applicants for all positions in the Competitive and the Labor Classes are required to take a medical and physical examination.

Applicants for Labor Class positions that require previous training or experience must take an oral, or practical test; no written examination is given to applicants.

In general, no examination shall extend beyond five hours without intermission, and no questions given out at any session, to any candidate, shall be allowed to be answered at another session.

The headquarters of the Commission are in the Municipal Building.

The following municipal departments and offices come under jurisdiction of Civil Service rules:

Accounts, Com. of
Armory, Board of.
Art Commission.
Assessors, Board of.
Bellevue and Allied Hospitals.
Board of Ambulance Service.
Board of Inebriety.
Board of Water Supply.
Borough President in each Borough, Office of the.
Buildings, Bureau of.
Child Welfare, Board of.
City Chamberlain.
City Record, Supervisor of the.
Civil Service Commission.
College of the City of New York.
Correction, Dept of.
Court, City.
Court, City Magistrate.
Court, Municipal.
Court of Special Sessions.
Docks and Ferries, Dept. of.
Education, Dept. of.
Elections, Board of.
Estimate and Apportionment, Board of.
Finance Dept.
Fire Dept.
Health Dept.
Hospitals.
Hunter College.
Law Dept.
Licenses, Dept. of.
Mayor's Office.
Medical Examiners
Normal College.
Parks, Dept. of.
Parole Commission.
Plant and Structures.
Plumbers, Examining Board of.
Police Dept.
Public Welfare, Dept. of.
Public Works Bureau.
Purchase, Dept. of.
Revision of Assessments, Board of.
Sinking Fund Commission.
Standards and Appeals, Board of.
Street Cleaning, Dept. of.
Taxes and Assessm'ts, Dept. of.
Tenement House Dept.
Transportation Commission.
Water Supply, Gas, and Electricity, Dept. of.
Weights and Measures.

Inspectors of Elections and Poll Clerks are not subject to competitive examination.
The minimum height of firemen has been reduced one inch, from 5 ft. 7 in. to 5 ft. 6 in.

THE FLAG OF THE CITY OF NEW YORK.

In the year 1915 the Mayor appointed a committee to commemorate the two hundred and fiftieth anniversary of the installation of the first Mayor and Board of Aldermen of the City of New York on June 24, 1665.

At that time the official city flag was adopted.

This flag really tells the story of the origin and early history of the city—founded by the Dutch in 1626 as "New Amsterdam." It was renamed New York in 1664 and a year later, on June 24, 1665, the municipal government was formally transferred to the Mayor and Board of Aldermen of the City of New York, as successors in office of the Burgomasters and Schepens of the City of New Amsterdam.

The colors in the flag are Dutch—blue, white and orange—the same which floated over the Island of Manhattan more than 300 years ago. The colors are exact, a pure indigo blue in use in 1626, and the distinctive color of the Prince of Orange.

The Arms are English, representing the reign of the Duke of York, and the crest is a spread eagle, distinctly American.

The Mayor has an official flag, the same in design as the flag of the City, except that upon the middle or white bar there are above the design of the seal, in a semi-circle, five blue five-pointed stars, typifying the five boroughs of the City; the dimensions of the flag are 33 inches by 44 inches.

The borough flag of Queens (2 blue, 1 white, stripe with wampum belt) was unfurled on Oct. 14, 1929

THE POLICE AND FIRE DEPARTMENTS.

(Officially revised as of Sept. 23, 1929. Headquarters, Grand, Broome and Centre Sts.)

Some advice to New Yorkers in Emergencies—Call or dial the teleohone operator and say: "I want a Policeman"—"I want to report a fire"—"I want an ambulance."

If you have to leave the telephone before the desired station answers tell the operator where help is required.

Emergency phone calls are free.

The police force of the City of New York consists of 1 Chief Inspector ($8,000); 8 Deputy Chief Inspectors ($5,800); Commanding Officer, Detective Bureau ($5,400); 22 Deputy Inspectors ($5,000); 24 other Inspectors ($5,400); 1 Chief Surgeon ($6,800); 1 Deputy Chief Surgeon ($4,790); 22 other Surgeons ($4,790); 1 Superintendent of Telegraph ($5,300); 1 Assistant Superintendent of Telegraph ($3,800); 100 Captains ($4,500); 570 Lieutenants ($3,500); 1,027 Sergeants ($3,000); 15,853 Patrolmen ($1,769 to $2,500); 95 Policewomen ($1,769 to $2,500); 30 Patrolwomen ($1,769 to $2,500); 7 Chaplains ($1,830).

In Nov., 1929, the people voted to pay first-grade patrolmen and firemen not less than $3,000 a year.

Members of the police force may be retired on one-half rate of compensation after service of twenty-five years, or after twenty years' service upon certificate of police surgeons of permanent disability.

Note—The figures in parentheses show number of cases reported to the police. Figures for murder or manslaughter, 1900-1915, include all classes of homicide, but those for 1920 do not include persons killed in the Wall Street explosion. Detailed data for 1908 are not available.

(FIRE DEPARTMENT HEADQUARTERS, MUNICIPAL BUILDING.)

The New York City uniformed Fire Department, headquarters in the Municipal Building, consists of 6,544 men: A chief ($12,500); 29 deputy chiefs ($5,500 to $7,500,) 86 battalion chiefs ($4,490); 9 medical officers ($4,490), 4 chaplains ($1,830); 336 captains ($3,700); 529 lieutenants ($3,200); 24 pilots ($3,000); 129 engineers of steamers ($2,920); 14 marine engineers ($2,700); and 5,388 firemen.

First-grade men are to get not less than $3,000 a year.

Twenty years' service retirement on half-pay upon application.

There are 232 engine companies in the City, and 122 hook and ladder companies.

NEW YORK CITY PENAL AND CORRECTIONARY INSTITUTIONS.

New York County Penitentiary, Welfare Island. It receives male prisoners from the five boroughs; normal capacity, 1,370 prisoners. One wing is set apart for those sentenced to the Workhouse.

Self-committed drug addicts and court cases are also received in the institution.

Correction Hospital (formerly the Workhouse), Welfare Island. This houses women sentenced to the Penitentiary and Workhouse in the north wing.

Women's Farm Colony, Greycourt, Orange County. Inmates committed to the Penitentiary, and the Workhouse, on Welfare (Blackwell's) Island, who are found physically fit, are transferred to this institution.

The Municipal Farm. Riker's Island. Only men physically fit are sent to this institution, from the Penitentiary, and the Workhouse, on Welfare Island, for construction work.

The Reformatory Prison, Hart's Island. Here are the aged and crippled and those unable to work; boys unfit for assignment to the New York City Reformatory at New Hampton; active cases of tuberculosis, and men assigned to work in the industries.

New York City Reformatory for Male Misdemeanants, New Hampton, Orange County. This is a model institution, where misdemeanants between the ages of sixteen and thirty are confined.

There are three city prisons for the detention of court cases—the City Prison, Manhattan (known as the *Tombs*), the City Prison, Brooklyn (referred to at times as the *Raymond Street Jail*), and the City Prison, Queens, at Long Island City.

Harlem Prison is now known as the *Women's Detention Prison.* No women are imprisoned at the *Tombs.*

Under a new law in this State, effective July 1, 1929, the Code of Criminal Procedure is amended to provide that a prosecution for a felony, other than murder must be commenced within five years, and for a misdemeanor, within two years after its commission. The time a defendant is absent from the State under a false name shall not be a part of the time limited.

Prosecution is commenced when an information is laid before a magistrate charging the commission of a crime, or when an indictment is presented by the grand jury.

The filing of an information or finding of an indictment stops the running of the statute of limitation until the case has been settled on its merits. When an indictment is set aside or dismissed, the time during which prosecution was pending shall not be computed as part of limitation.

ARRAIGNMENTS IN MAGISTRATES' COURTS IN NEW YORK CITY.

Larceny arraignments 1903, 1905 cover only Manhattan and Bronx; same as to intoxication arraignments, 1903-1908.

JURY DUTY IN THE CITY OF NEW YORK.

To be qualified to serve, a person must not be less than 21 nor more than 70 years of age, and he must be a male citizen of the United States, and a resident of the County of New York; and he is a resident within the meaning of the jury law if he dwells or lodges here the greater part of the time between the first day of October and the last day of June. He must be the owner, in his own right, of real or personal property of the value of $250; or the husband of a woman who is the owner, in her own right, of real or personal property of that value. He must also be in the possession of his natural faculties, and not be infirm or decrepit; intelligent, of good character, and able to read and write the English language understandingly.

THE FOLLOWING ARE EXEMPT.

A clergyman, minister of any religion officiating as such and not following any other calling. A practicing physician, surgeon, surgeon-dentist, or veterinary surgeon not following any other calling, and a licensed pharmaceutist or pharmacist, or a duly licensed embalmer, while actually engaged in his profession as a means of livelihood. A duly registered optometrist actually engaged in his profession as a means of livelihood. An attorney or counsellor-at-law regularly engaged in the practice of law as a means of livelihood. A professor or teacher in a college, academy, or public school, not following any other calling. Editor, editorial writer, or reporter of a daily newspaper or press association regularly employed as such and not following any other vocation. The holder of an office under the United States, or the State, or City or County of New York, whose official duties, at the time, prevent his attendance as a juror. A consul of a foreign nation. A captain, engineer, or other officer actually employed upon a vessel making regular trips; a licensed pilot, actually following that calling. A superintendent, conductor, or engineer employed by a railroad company other than a street railroad company, or a telegraph operator employed by a press association or telegraph company who is actually doing duty in an office or along the railroad or telegraph line of the company or association by which he is employed. Honorably discharged volunteer firemen. Active and honorably discharged militiamen and active members of the Old Guard. A duly licensed engineer of steam boilers actually employed as such. Inspectors, poll clerks, and ballot clerks, or a person who is physically incapable. Grand, Sheriff's, Special, and Municipal Court Jurors.

ROUTES, MILEAGE AND COST OF NEW SUBWAYS.

The mileage of the routes and tracks and the estimated cost of the second step of the city's new rapid transit system, including new routes, extensions to existing lines and parts of existing lines to be recaptured are, as announced in October, 1929:

	Route Miles.	Track Miles.	Estimated Cost.
MANHATTAN.			
Water St., New Bowery and Chrystie St. Line—From Pine to Houston St.; 2 tracks to Chambers, 4 tracks to Houston	1.34	4.68	$11,300,000
Second Ave. Line—Houston St. to Harlem River; 4 tracks to 61st St., 6 tracks to 125th St., 4 tracks to Harlem River	6.55	32.84	87,600,000

NEW YORK CITY'S RAPID TRANSIT SYSTEM.

HORSE, CABLE AND ELECTRIC STREET CARS

Horse cars were first used in New York City by the Harlem Railroad on Nov. 14, 1832, to run on tracks in Fourth Ave. between Prince St. and Fourteenth St.; changed to steam a few years later. About 1852 the horse cars were improved and these lines were increased until, in 1864, there were twelve in operation.

The first cable cars were installed on the 125th St. and the Amsterdam Ave. lines of the Third Ave. Rail Road Co. in August, 1885.

In March, 1893, the Metropolitan St. Railway Co. constructed its first underground-current street railway on 116th St.

The Third Ave. Co. changed to underground current in 1900.

Brooklyn ran its first trolley on the Second Avenue line over the Brooklyn City Railway, in 1891, May 22.

INTERBOROUGH SUBWAY'S CHRONOLOGY.

The first subway contract was awarded on Jan. 15. 1900, and work was begun on March 24, by breaking ground at the City Hall. The municipality agreed to pay $35,000,000 for construction, and $2,750,000 for terminals, station sites, and other purposes. This was the initial Interborough tube.

This original subway, built by John B. McDonald and financed by August Belmont and associates, was opened and operated in 1904—from the Brooklyn Bridge to 145th St., and Broadway (via Park Row, Elm and Centre Sts., 4th Ave., 42nd St., and Broadway), on Oct. 27; to 157th St. and Broadway, on Nov. 12; to 145th St. and Lenox Ave., on Nov. 23; and over the Westchester Ave. branch, from 3rd Ave. to West Farms, on Nov. 26; through the Harlem River tunnel, to 180th St., on July 10, 1905.

The extension south on Park Row to Fulton St. was opened and operated in 1905, on Jan. 16; to Wall St. on June 12; to Bowling Green, on July 10; to South Ferry, on July 10.

The extension on Broadway to 221st St. was operated on March 12, 1906; to 230th St. and Broadway, on Jan. 27, 1907; to 242nd St. and Broadway, on Aug. 1, 1908.

The trains south on Broadway were opened and operated from Bowling Green, through the original East River tunnel, to Borough Hall, Brooklyn, on Jan. 9, 1908; to Atlantic Ave., Brooklyn, on May 1, 1908; to Utica Ave., via Eastern Parkway, Brooklyn, on Aug. 23, 1920; to Flatbush and Nostrand Aves., Brooklyn, on Aug. 23, 1920; from Utica Ave. to Junius St., Brooklyn, on Nov. 22, 1920; from Junius St. to Pennsylvania Ave., Brooklyn, on Dec. 24, 1920; from Pennsylvania Ave. to New Lots Ave., Brooklyn (shuttle service), on Oct. 16, 1922; through service to New Lots Ave., on Oct. 31, 1924. Express service on Eastern Parkway began on Nov. 4, 1925.

The so-called Lexington Ave. branch of the Interborough was opened and operated from 149th St. and Mott Ave., to Kingsbridge Road and Jerome Ave., on June 2, 1917; shuttle service between Kingsbridge Road and Woodlawn began on April 15, 1918; from 167th St. and Jerome Ave., and the Grand Central Station, via Lexington Ave., on July 17, 1918; on Pelham Bay Park branch, to Hunts Point Ave., on Jan. 7, 1919; and to Pelham Bay Park, on Dec. 20, 1920.

The Seventh Ave. branch was opened from 42nd St. (Times Sq.) to the Pennsylvania Station, at 33rd St., on June 3, 1917; extended south to South Ferry, with branch to Wall and William Sts., on July 1, 1918; through the Clark St. tube under the East River and to Borough Hall, Brooklyn, and Atlantic Ave., Brooklyn, on April 15, 1919.

The Corona branch, via Queensboro Bridge, was opened from Queensborough Plaza to Alburtis Ave., on April 21, 1917; to 111th St., on Oct. 13, 1925; to Willetts Point Boulevard, on May 7, 1927; to Main St., Flushing, on Jan. 2, 1928.

The Astoria branch, via Queensboro Bridge, was opened from Queensborough Plaza to Ditmas Ave., on Feb. 1, 1917.

The Queensborough was opened from 42nd St. and Lexington Ave. through the Belmont tube under the East River to Jackson Ave., Long Island City., on June 22, 1915; to Hunters Point Ave., on Feb. 15, 1916; to Queensborough Plaza, on Nov. 5, 1916; extended from Grand Central Station to 5th Ave., on Mch. 22, 1926; to 41st St. and 7th Ave., on Mch. 14, 1927.

The White Plains branch was operated from 177th St. to E. 219th St., on Mch. 3, 1917; to E. 238th St., on Mch. 31, 1917; to E. 241st St., on Dec. 13, 1920.

INDEPENDENT, INTERBOROUGH AND B.M.T. SUBWAYS.

There are now two subway systems in operation throughout the city, those of the Interborough Rapid Transit Co., and of the Brooklyn-Manhattan Transit Corp. (the old Brooklyn Rapid Transit Co.).

An independent subway system is being constructed under the auspices of the Board of Transportation, which was created by the Legislature in 1924.

INDEPENDENT SUBWAY SYSTEM.

Manhattan Trunk Lines—From 215th Street and Harlem River where power house, repair shops and storage yards are located, down Broadway to the vicinity of Dyckman Street, southwesterly to 193d Street and Overlook Terrace; down Ft. Washington Avenue to 174th Street.

Thence southeasterly to Broadway and 173rd Street, down Broadway to St. Nicholas Avenue, down St. Nicholas Avenue to Eighth Avenue and 122nd Street, down Eighth Avenue and into Central Park West, along the Park wall, skirting Columbus Circle, down Eighth Avenue again to 53rd Street, where it joins the Long Island City-Queens Boulevard Line.

From 53d Street the trunk lines go down Sixth and Eighth Avenues to a junction at Sixth Avenue, Carmine Street and Houston Street, where the lower East Side link extends through Houston Street toward the Bowery and on eastward to Essex Street, to Rutgers Street and the East River.

From the junction of Sixth Avenue and Carmine Street the line continues down the Sixth Avenue extension, which will be one of the approaches to the Holland Tunnel.

Crossing over to Lispenard and Church Streets it continues southerly to Fulton Street, turning eastward to the East River to Cranberry Street, Brooklyn.

Brooklyn Lines—The first Brooklyn line is being constructed under the river from Fulton Street, Manhattan, into Cranberry Street, proceeding through High Street, to Jay Street, to Smith Street, Ninth Street to Prospect Park West, where tracks branch.

The south tube was "holed through," under the river, on May 15, 1929, and the north tube several weeks afterward. These tunnels are 9,000 feet long, from a point under St. Paul's (P. E.) Chapel, Broadway and Fulton St., Manhattan, to a point under Jay and Nassau Sts., Brooklyn. The tubes cost about $22,000,000.

The express tracks pass under the westerly corner of Prospect Park and private right of way, and the local tracks turn southwest along Prospect Park West to Prospect Avenue, thence southeasterly along Prospect Avenue to a junction with the express tracks at Terrace Place and Prospect Avenue, thence southerly along Prospect Avenue to Greenwood Avenue, thence southwest through private right of way to Gravesend Avenue at about Albemarle Road, thence southerly along Gravesend Avenue to join with the existing Culver Line to Coney Island.

Another line will enter Brooklyn through Jay Street by way of a tunnel from the foot of Rutgers Street in Manhattan. Ultimately the Smith Street-South Brooklyn line will go into Manhattan by the Rutgers Street tunnel under the East River, but the Fulton Street Tunnel is being constructed first, and temporarily both the South Brooklyn trains and the Central Brooklyn trains will run over that route into Jay Street, where both lines will have two joint stations and transfer facilities.

At the intersection of Schermerhorn and Smith Streets one line will turn easterly into Schermerhorn Street and out across the Central District of Brooklyn through Lafayette Avenue to Marcy Avenue, then across private right of way to Union Ave., thence across Union Avenue, through McCarren Park, Manhattan Avenue, Vernon Avenue, to a connection at Jackson Avenue with the Queens-Jamaica line.

Fulton Street-Brooklyn Line—Another new route in Brooklyn is under construction in Fulton Street, running from the junction of Lafayette Avenue and Ft. Greene Place, along Fulton Street to Alabama Avenue, a distance of four miles. The first two contracts for the construction of this line were executed in April, 1929.

When the projected lines are in operation, Brooklyn will be divided into transit zones each about a mile in width. On the westerly side is the Fourth

Avenue Line, then easterly is the West End Line, the Sea Beach Line, the Culver Line, the Brighton Beach Line, the Nostrand Avenue Line, the Utica Avenue Line and the Canarsie Line. East and west will be the Eastern Parkway Line and the Lafayette Avenue or Atlantic Avenue Lines.

Bronx-Concourse Line—From a connection with the Washington Heights Line at St. Nicholas Avenue and 148th Street, under St. Nicholas Place to the Harlem River at 157th Street, under the river to Jerome Avenue and 161st Street, under 161st Street to the Concourse and under the Concourse to Mosholu Parkway. Thence the line turns easterly through Van Cortlandt Avenue to 205th Street, to Webster Avenue. It is planned to extend it under Bronx Park, via Burke Ave. to the Boston Post Road thence toward the Eastchester section of the Bronx.

The **Queens-Jamaica Line** is under construction as far as Union Turnpike and Queens Blvd. from Long Island City junction with the 53rd Street tunnel to Manhattan and the Brooklyn crosstown line. The Queens-Jamaica line extends from Long Island City via Jackson Avenue, Steinway Avenue, Broadway, Queens Boulevard, 137th Street, Hillside Avenue to 178th Street.

The **14th Street-Eastern District** subway constructed by the Board of Transportation from Montrose Avenue in Williamsburg to the elevated railroad connection at Broadway, East New York, was opened for service in 1928. The Board of Transportation is now (Sept. 1929) finishing the construction of an extension in 14th Street, Manhattan, from 6th Avenue to 8th Avenue, where passengers can transfer to the City's new 8th Avenue trunk line.

The Fourteenth Street-Eastern Line was put in operation on June 24, 1924, between 14th Street and Sixth Avenue, Manhattan, and Bushwick and Montrose Avenues, Brooklyn, via a tube under the East River.

INTERBOROUGH SUBWAYS.

There are two of these systems, the east side and the west side, with cross connections in Manhattan, Brooklyn and Queens.

The west side system starts on an elevated structure at Livonia and New Lots Avenues, East New York (Brooklyn), goes on Livonia Avenue to Saratoga Avenue, then turns into the Eastern Parkway, where it becomes a subway. It runs through the Eastern Parkway to Flatbush Avenue, at Eighth Avenue, thence down Flatbush Avenue to Fulton Street, through Fulton Street to Clark Street, through Clark Street and under the East River to William Street, Manhattan; through William Street to Fulton Street; thence west to West Broadway; to Hudson Street; to Seventh Avenue; to Broadway; to St. Nicholas Avenue; to Amsterdam Avenue; to Broadway, to 242d Street, at Van Cortlandt Park.

Another branch of the west side system starts at Flatbush and Nostrand Avenues, Brooklyn, and runs in a subway through Nostrand Avenue to the Eastern Parkway, where it joins the other branch. Through trains run in both branches over the entire west side system.

At 96th Street and Broadway, the west side system has a branch (part of the original Interborough subway) that extends under Central Park to Lenox Avenue, to 145th Street, thence under the Harlem River to 149th Street, where it joins the east side trunk line on Westchester Avenue and the Southern Boulevard. Just south of Bronx Park, an extension, on an elevated structure, branches off and goes along White Plains Road to 241st Street, Mount Vernon. This extension also is used by Third Avenue "L" trains, north of Gun Hill Road.

The west side-east side systems have an elevated extension on Jerome Avenue extending north from Mott Avenue and 149th Street, up through Fordham and Bedford Park to a point between Van Cortlandt Park and Woodlawn Cemetery, ending at about 242d Street. This extension is also used by Sixth Avenue and Ninth Avenue "L" trains north of 162d Street.

The east side system starts at Flatbush and Atlantic Avenues (Long Island R. R. Terminal), Brooklyn, goes under Flatbush Avenue to Fulton Street; to Joralemon Street; thence under the East River to Battery Park, Manhattan; thence under Broadway, to Park Row; to the Brooklyn Bridge; to Lafayette Street, to Fourth Avenue; to 42d Street (Grand Central Station); to Lexington Avenue; to 130th Street; thence under the Harlem River to Mott Avenue to 149th Street, where it emerges onto an elevated structure; to Westchester Avenue; to the Southern Boulevard; to the southern part of Bronx Park (Bronx Zoo).

An extension of the east side system starts at Mott Avenue and 138th Street and goes through 138th Street to the Southern Boulevard; to Whitlock Avenue to Westchester Avenue, and through Old Westchester Village to the Eastern Boulevard, at the west side of Pelham Bay Park.

The Queensboro Branch of the Interborough subway system starts at 42d Street and Eighth Ave. (Times Square), and uses the Belmont tubes under the East River at 42d Street to Long Island City, there emerging onto an elevated structure and going to the Queensboro Bridge Plaza.

There it splits into two elevated branches, one going through Ravenswood, on Second Avenue, to Ditmars Avenue, Astoria; the other going on Queens Boulevard (Greenpoint Avenue), to Roosevelt Avenue, to Willets Point Boulevard and thence over Flushing Creek Bridge to Main Street, Flushing, to which service was extended on January 21, 1928.

The Second Avenue, Manhattan "L" trains operate over the Astoria Branch and over the Flushing Branch to Willets Point Boulevard.

Both Queensboro line branches from Queensboro Plaza station eastward are also used for B.-M. T. train service.

BROOKLYN-MANHATTAN TRANSIT CORPORATION CHRONOLOGY.

The Centre St. Loop subway was operated between the Manhattan Bridge and the Chambers St. Station under the Municipal Building, on Aug. 4, 1913.

The Fourth Ave. subway (using the Loop) was opened from Chambers St., via Manhattan Bridge, to 4th Ave. and 65th St., Brooklyn, and thence over the Sea Beach route to Coney Island, on June 22, 1915; opened on 4th Ave., Brooklyn, from 65th St. to 86th St., on Jan. 15, 1916; to 95th St., Ft. Hamilton, on Oct. 31, 1925.

The Broadway subway was opened and operated from the Chambers St. Station in the Municipal Building to 14th St., on Sep. 4, 1917; north to Times Square and south to Rector St., on Jan. 5, 1918; from Times Square north to 57th St. and 7th Ave., on July 10, 1919; from 57th St. and 7th Ave. to 60th St. and Lexington Ave., on Aug. 31, 1919.

Trains operated on Aug. 1, 1920, from 4th Ave. and Willoughby St., Brooklyn, through the East River tubes, from Montague St., Brooklyn, to Rector St., Manhattan; and from 60th St. and Lexington Ave., Manhattan, to Queensboro Plaza, Long Island City.

The B. M. T. subway extension from 4th Ave., Brooklyn, at Atlantic Ave., to Malbone St., at Prospect Park, via Flatbush Ave., was opened and operated on Aug. 1, 1920.

The 14th St.-Eastern District subway, via a tube under the East River, was operated on June 30, 1924, from Montrose Ave. and Grand St., Williamsburgh (Brooklyn) to 14th St. and 6th Ave., Manhattan, extended, on July 14, 1928, from Montrose Ave., Brooklyn, to Broadway Junction, Brooklyn.

The Jamaica Ave., Brooklyn "L" line of the B. M T. was extended from Cypress Hills (East N. Y.) to Richmond Hill (111th St.-Greenwood Ave.) on May 28, 1917; and thence to Jamaica, on July 3, 1918.

The Liberty Ave., Brooklyn, extension of the Fulton St. "L" was operated on Sept. 25, 1915.

The New Utrecht Ave., Brooklyn, "L" extension of the 4th Ave. subway, was operated on June 24, 1916; extended to Coney Island, on July 20, 1917.

There are three B.-M. T. subways: The Fourth Avenue line with its branches, the Broadway line in Manhattan, and the Queensboro line from Manhattan into the Borough of Queens.

The Fourth Avenue route starts at Fourth Avenue and 95th Street, Bay Ridge, and runs along Fourth Avenue to Flatbush Avenue, to the Manhattan Bridge; re-entering a subway in Canal Street, Manhattan; continuing west to Broadway, where it joins the Broadway tubes of the same system.

The Broadway line starts at Flatbush Avenue and Malbone Street (Empire Boulevard), where it is operated as a part of the B.-M. T. Brighton line; goes along Flatbush Avenue to Fourth and Atlantic Avenues, where connections exist with the Fourth Avenue line; thence via Flatbush Avenue and Willoughby Street to Borough Hall, to Fulton Street, to Montague Street; thence under the East River to Whitehall Street, Manhattan; under Trinity Place, Church Street, Broadway and Seventh Avenue to 59th Street.

A branch extends under 59th and 60th Streets and by tunnel under the East River to connect with the Queens lines at Queensboro Bridge Plaza.

CHRONOLOGY OF THE "L" LINES IN MANHATTAN AND BRONX.

The first elevated or "L" road in Manhattan was on Greenwich St., between Battery Place and Cortlandt St., where a trial train was run on Friday, July 3, 1868. John Stevens, of Hoboken, had proposed an elevated structure as far back as 1832.

The Greenwich St. line, thereafter known as the 9th Ave. "L," was operated from Battery Place to 29th St., on Feb. 14, 1870; via 9th Ave. to 34th St., on July 30, 1873; to 42nd St., on Nov. 1, 1875; to 61st St., on Jan. 18, 1876. The line was extended south, from Battery Place to South Ferry, on April 15, 1877. At first, the road ran on the east side of Greenwich St., and on the west side of 9th Ave. The double tracking was operated in May, 1880. The route was operated, electrified, on June 25, 1903. Third-track express service was inaugurated on Jan. 17 1916, and the 6th Ave. "L" was linked up with the 9th Ave. for a through service from Battery Park to Sedgwick Ave , on March 1, 1918; to 167th St. and Jerome Ave., on July 1, 1918; to Kingsbridge Road and Jerome Ave., on July 17, 1918· to Woodlawn Road, on Jan. 2, 1919.

The 6th Ave. "L" was operated from Rector St. to 58th St., on June 5, 1879; to 53rd St. and 8th Ave., on Feb. 25, 1879; to 81st St. and Columbus Ave., on June 9, 1879; to 104th St. and Columbus Ave., on June 21, 1879; to 125th St. and 8th Ave., on Sept. 17, 1879; north to 135th St., on Sept. 27, 1879; to 155th St., on Dec. 1, 1879. The line was opened between Rector St. and South Ferry, on Nov. 1, 1881. The line was electrified on April 15, 1903. Third-track service was inaugurated on Jan. 17, 1916. The through service to Woodlawn began on May 16, 1917.

The Third Ave. "L" was opened from South Ferry to 42nd St. (Grand Central Station), on Aug. 26, 1878; north to 67th St., on Sept. 16, 1878; to 89th St., on Dec. 9, 1878; to 129th St. (Harlem River), on Jan. 1, 1879; through service from South Ferry to Bronx Park, and from City Hall to 177th St., on Sept. 24, 1896. The route was operated, electrified, on Aug. 18, 1902. The third-track service began on Jan. 17, 1916. The City Hall branch, between there and Chatham Square, was opened on Mch. 17, 1879.

The 34th St. branch "L" was opened on July 1, 1880, and was closed permanently in 1929 and ordered removed by the city authorities.

The Bronx division of the 3rd Ave.-2nd Ave. "L" Lines was operated from 129th St. to 133rd St., on May 17, 1886; to 143rd St., on May 23, 1886; to Mott Haven, on Nov. 25, 1886; to 138th St., on Jan. 23, 1887; to 149th St., on June 16, 1887· to 156th St., on July 1, 1887; to 161st St., on Aug. 17, 1887; to 169th St., on Sept. 2, 1888· to 177th St., on July 20, 1891; to Bronx Park, on May 21, 1902.

The 42nd St. branch "L" was opened on Aug. 26, 1878, and was closed on Dec. 6, 1923.

The 2nd Ave. "L" was opened, South Ferry to 65th St., on March 1, 1880; to 127th St., on Aug. 16, 1880; to 129th St., on May 17, 1886. The line was operated, electrified, on Sept. 10, 1902; and it was operated, third-tracked, on Jan. 17, 1916.

There are four elevated roads in these two boroughs, all operated by the Interborough.

Second Avenue "L" starts at South Ferry, Battery Park, runs north to Pearl Street and New Bowery to the Bowery; to Division Street; to Allen Street; First Avenue to 23d Street; to Second Avenue; to 129th Street, where it merges with the Third Avenue "L." Some trains operate to Freeman Street on the Westchester Branch of the subway via Third Avenue and the Bergen Street cut-off. Some trains operate over the Queensboro Bridge to Astoria and Corona.

Third Avenue "L" starts at Park Row (old Chatham Street) and the Brooklyn Bridge, and runs on Park Row to the Bowery, at Chatham Square, where it bends into the Bowery; to Third Avenue; to 129th Street, where it crosses the Harlem River, and continues north through Willis and Melrose Avenues, to Third Avenue, the Bronx; thence past Crotona and Bronx Parks to Williamsbridge, at White Plains and Gun Hill Roads, and Mt. Vernon via the White Plains Road Elevated extension of the subway.

At 149th Street, the "L" connects with the Interborough subway elevated line that runs on Westchester Avenue, the Southern Boulevard, and White Plains Road to Mt. Vernon.

Ninth Avenue "L" starts at South Ferry, Battery Park, and runs north through the park to Greenwich Street; to West 14th Street and Ninth Avenue; on Ninth Avenue to 53d Street, where it merges with the Sixth Avenue "L," and the two roads jointly continue on Ninth (Columbus) Avenue to 110th Street; to Eighth Avenue; to 155th Street, where the road crosses the Harlem River, bearing east, connecting with the Yonkers branch of the N. Y. Central R. R. at Sedgwick Avenue, and continuing east to Jerome Avenue.

Sixth Avenue "L" starts at South Ferry, Battery Park, and runs north through the park to Church Street; to Park Place; to West Broadway; to West Third Street; to Sixth Avenue; to West 53d Street; to Ninth Avenue, where it merges with the Ninth Avenue "L."

"L" LINES IN BROOKLYN AND QUEENS.

The Culver line to Coney Island operates from Park Row via Brooklyn Bridge, Adams Street, Myrtle Avenue, Hudson Avenue, Flatbush Avenue, Fifth Avenue, 38th Street cut, and thence via a new structure, principally on Gravesend Avenue, to Coney Island.

The Myrtle Avenue "L" runs from Park Row and Brooklyn Bridge, to Metropolitan Avenue, via the bridge, Adams Street, Myrtle Avenue, and private right of way, to Metropolitan Avenue, Ridgewood.

The Fulton Street "L" runs from Park Row via the Brooklyn Bridge along Fulton Street to East New York, and thence via Pitkin and Liberty Avenues to Lefferts Avenue, Richmond Hill.

The Lexington Avenue "L" runs from Park Row via the Brooklyn Bridge to Jamaica, via Myrtle and Lexington Avenues, Broadway, and Jamaica Avenue.

The Broadway "L" runs from Chambers Street, Manhattan, via Center Street loop, Williamsburg Bridge, Broadway to East New York and Canarsie.

The Fifth Avenue "L" runs from Park Row, Brooklyn Bridge to Bay Ridge at 65th St., via Fulton Street, Flatbush Avenue, Fifth Avenue, Thirty-Sixth Street, where it connects with the Culver route.

HUDSON RIVER TUBES.

The **Pennsylvania Railroad** by means of twin tubes extending under Manhattan at 33d Street, connects the Pennsylvania Terminal at Seventh Avenue with Long Island City, enabling through all-rail passenger and freight traffic between New England and the South and West.

Westward, two tracks in brick and concrete tunnel structure for a length of 1,000 feet continued under Hudson River to Weehawken, N. J., in two tubes of cast iron, lined with reinforced concrete, 23 feet external diameter, 21 feet 2 inches internal diameter for a length of 6,100 feet; thence in two tunnels through rock of Hudson River Palisades for a length of 6,300 feet to portal in New Jersey. Trains westwards run to Manhattan Transfer, Newark, N. J., without a stop.

Eastward—from above-mentioned station four tracks, Manhattan crosstown lines, under 32nd and 33rd Streets to First Avenue, in a twin tunnel structure under each of these streets at a depth of about 60 feet, to crown of same, and for a length of 5,700 feet. These four tracks are continued under the East River and Long Island City in four separate tubes, of same character and dimensions as above-mentioned westwards, for a length to their portals of 7,800 feet.

The total length tunnel route (including station) Long Island portals to New Jersey portals is 5.60 miles; the total length of route-track in tunnels only is 15.30 miles. Engineering work started 1902, construction started 1904 and was completed 1910. Operation, electrically, low tension, third rail, began November, 1910.

There are two sets of **Hudson and Manhattan** Railroad Co. tubes under the Hudson River, one connecting Montgomery Street, Jersey City, with the Hudson Terminal Station at Fulton-Cortlandt-Church Streets, Manhattan; the other connecting the Hudson tubes in Jersey City-Hoboken with Christopher Street, Manhattan.

The main trunk-line tubes of the system run from Montgomery Street, Jersey City, to Park Place, Newark, emerging to the surface on Jersey City Heights, and connecting on the meadows with the Pennsylvania Railroad, at a surface station called Manhattan Transfer.

In New Jersey, one set of tubes parallels the Hudson River, linking up the Pennsylvania, Erie, and Lackawanna railroad passenger stations, so that travelers may go to or from their stations to downtown or uptown Manhattan.

In Manhattan, the Hudson tubes connect Christopher Street with Broadway and 33d Street by way of Sixth Avenue.

SUBURBAN TRAVEL.

Operation of the Holland vehicular tunnel and the Staten Island-New Jersey bridges, according to the Transit Commission, caused a reduction of 2,072,046 persons in the total passenger traffic to and from New York City over railroad and ferry lines in 1928.

In 1927 this two-way traffic count disclosed that 364,376,293 persons were thus transported. In 1928, the total dropped to 362,304,247.

Tabulations by Holland showed that 8,744,674 vehicles passed through in 1928. Of these 6,836,822 were passenger automobiles, 232,092 were buses and 21,102 motorcycles.

Of the 362,304,247 passengers entering and leaving the city in 1928, the Transit Commission report declared, 273,512,925 were classified as commuters using ferry and railroad routes. The figures are for two-way traffic.

Taken on a daily basis, computing 340 full traffic days to the year, the figures show that 535,848 passengers a day used the railroads and ferries to and from the city, 402,225 being commuters and 133,623 daily visitors. In 1927 the commuter tota was estimated at 537,231 and the daily visitor count as 134,582.

Railroad passenger travel to and from the city showed an increase in 1928 over 1927, but the ferry total dropped 3,246,881. In 1928 the total ferry two-way traffic was 101,561,476 persons, while in 1927 the total was 104,808,357.

The figures exclude municipal and other ferries operating entirely within the city limits. In 1928 the municipal ferries carried 35,273,675 passengers and 3,330,150 vehicles.

The 1928 traffic figures for three terminals were: Grand Central Station, 47,549,408; Pennsylvania Station, 60,906,252; Hudson & Manhattan, 108,942,647.

The Long Island Railroad's traffic in and out of Pennsylvania Station was more than the Pennsylvania Railroad's own traffic in and out of the same station, the totals being 48,540,920 as against 11,218,287.

There are many daily railway commuters who come and go to and from New York City from and to fairly distant places—Philadelphia, 200, for example. Hartford, Conn.; New Haven, Conn.; Poughkeepsie, N. Y.; Dover, N. J.; Greenport, and the Huntingtons, L. I.; Trenton, N. J.; Asbury Park, N. J., are other instances.

The New York, Westchester & Boston Lines, in 1928, carried 14,053,188 passengers, of which number, 3,291,300 fares represented commuters.

INCOME AND EXPENDITURES OF STREET RAILWAY COMPANIES.

(Excludes Hudson and Manhattan Railroad Company, italics show *deficit.*)

TUNNELS IN OPERATION IN AND ABOUT NEW YORK CITY.

Holland Vehicular—Twin tubes under the Hudson (North) River, 9,250 feet in length, from Canal Street, Manhattan, to Twelfth Street, Jersey City. Opened to commercial traffic at 12.01 a.m., Nov. 13, 1927. Each tube is of 29 ft. 6 in. external diameter, with interior roadway width of 20 feet and clearance height of 13 ft. 6 in. The tunnel was built to accommodate 46,000 vehicles a day. On the first day it handled over 52,000. There are narrow sidewalks for the tube police. The total traffic for 1928 was 8,744,674 vehicles, and the maximum day in that year totaled 48,004 vehicles. On May 12, 1929, the tunnel was used by 52,178 vehicles. Work started Oct. 12, 1920.

Pennsylvania Railroad System—Tunnels under Hudson River extend from Pennsylvania Railroad Station, New York, to Weehawken, N. J. There is no station at Weehawken; the electric trains from the Pennsylvania Station run to Manhattan Transfer, near Newark, N. J. without a stop. Work started April 1, 1904; completed in 1910. Two tubes of cast iron rings, 23 feet outside diameter and 21 feet 2 inches inside diameter; subaqueous portion 6,118 feet long. The Hudson tubes were put in service on Nov. 27, 1910, at which time the road was electrified between Long Island City and Manhattan Transfer. Electrification had been in progress since 1903.

Manhattan crosstown tunnels from the Pennsylvania Railroad Station, mentioned above, across New York under 32d and 33d Sts. to First Ave. Started July, 1905, completed in 1910. There are two tunnels, each with two tracks. The tunnels are built of concrete with the crown about 60 feet below the surface of the street.

East River tunnels connect with the crosstown tunnels and extend under the East River to Long Island City. Started September, 1904; completed in 1910. Four separate tubes with rings 23 feet outside diameter, each tube from the Manhattan shaft to the Long Island City shaft, 3,900 feet long. The tunnels under Manhattan and the East River were opened to Long Island traffic on Sep. 8, 1910.

New York Central Railroad System—Park Ave. Tunnel. The original tunnel was completed in 1837. It was a two-track tunnel and only extended under the "96th St. Hill." The railroad at that time terminated in the vicinity of City Hall. In 1872, the railroad was four-tracked, the four tracks being covered over from 56th St. north to the old tunnel at the "96th St. Hill." There was a two-track tunnel in the center and a single-track tunnel on either side. The length of the tunnel was approximately 10,000 feet. From 56th to 67th Sts., and from 71st to 80th Sts., the construction consisted of brick piers and stone retaining walls with I beam roof. From 67th to 71th Sts., and from 80th to 96th Sts., the construction consisted of brick arches, stone and brick piers, and stone walls. The minimum dimensions of the center tunnel were approximately 25 ft. wide x 15 ft. 6 in. high for I beam construction and 25 ft. wide x 17 ft. high for brick arch construction. The minimum dimensions of the side tunnels were 13ft. wide x 15 ft. 6 in. high for I beam construction and 16 ft. wide x 16 ft. 6 in. high for brick arch construction. Going north to 86th St., there was an adverse grade of 1.03% and then a slight down-grade to the north portal. The tunnel is substantially the same to date excepting the vents. Between 57th and 86th Sts., all the vents have been closed but two in each block. These have been reduced in area to 10 ft. x 12 ft., due to the City widening Park Avenue because of increased traffic.

St. Mary's Tunnel—It is on the Port Morris Branch and two straight tracks on a level grade pass through the tunnel under St. Mary's Park, the Bronx. The tunnel was built in 1904 and extended from 149th St. to Jackson Ave., a distance of about 1,800 feet. Two types of construction were used. A flat roof composed of I beams and concrete, resting on concrete walls and an arched roof tunnel of concrete. For the flat roof type, the dimensions were 26 ft. wide and 16 ft. high and for the arched roof type, the dimensions were 26 ft. wide and a center height of 21 ft. The tunnel is practically the same to date.

There are tunnels at Ossining (800 ft.); at Oscawana (215 ft.); at Ft. Montgomery (348 ft.); at Garrison (500 ft.); under Breakneck Mt., at Storm King (540 ft.); at New Hamburg (785 ft.); 2 miles north of Rhinecliff (227 ft.); at Haverstraw (1,678 ft.); at Ft. Montgomery, River Division (816 ft.); under West Point parade grounds (2,740 ft.); at Newburgh (458 ft.); and at Kingston (403 ft.).

Hudson and Manhattan Railroad System—North tunnels under the Hudson River from Jersey City to Morton St., New York. Started November, 1874; the first in New York, officially opened February 25, 1908. Two single track tubes, with a minimum inside diameter of 15 feet 3 inches, and approximately 5,700 feet long.

Up-town tunnels connect with north tunnels at Morton St. and extend to Christopher St. thence to Sixth Ave. and up Sixth Ave. to 33d St. Started March, 1904, completed in 1910. Section from Morton to 12th St. shield construction, remainder cut and cover.

South tunnels under Hudson River from Jersey City to the Church St. Terminal Building (Cortlandt, Church and Fulton Sts.), New York. Started May, 1905; opened for traffic July, 1909. Two tubes about 5,950 feet long, with cast iron rings, 16 feet 7 inches outside diameter and 15 feet 3 inches inside diameter.

Tunnels (consisting of two single track tubes) extend from the Hoboken terminal of the Lackawanna Railroad to Washington St., Jersey City, with connections to the north tunnels and to the Erie Railroad Station. At Washington St. a branch runs to the Pennsylvania Railroad Station at Jersey City, where connections are made with the south tunnels. West from Washington St., Jersey City, to a point east of Waldo Ave. is a double-track concrete subway with a center wall dividing the two tracks. West from this latter point the two tracks rise to the surface and extend upon the surface to Journal Square Station, Jersey City, at which point operating connection is made with the tracks of the Pennsylvania Railroad, extending to Manhattan Transfer, Harrison and Park Place, Newark. Work started March, 1906; completed July, 1911. A new and enlarged station at Journal Square has recently been constructed.

Interborough Rapid Transit Tunnel System—The first of its tubes under the East River from the Battery, New York, to Joralemon St., Brooklyn, connecting the New York and Brooklyn subways, was begun April, 1903; trains running January 9, 1908. Two tubes, 6,784 feet long, with a finished inside diameter of 15 feet 6 inches.

Clark Street Tube—These twin-tubes underneath the East River, connecting the Interborough-Seventh Avenue subway in Manhattan with the Fulton Street-Flatbush Avenue subway of the Interborough in Brooklyn, were completed and put in operation in the summer of 1919. They are 5,047 feet long; outside diameter of 17 feet 6 inches; inside diameter 15 feet.

Belmont Tunnel under the East River from 42d St., New York, to Long Island City. Subaqueous portion two single track tubes with cast-iron rings 16 feet 10 inches outside diameter, and a clear inside diameter of 15 feet 6 inches. Through rock a horseshoe shaped concrete section is used and in other places a rectangular double track cross section with reinforced concrete lining. Construction started by New York and Long Island Railroad, July 12, 1905; practically completed January 1, 1908. Train operation began June 22, 1915.

Harlem River Tunnel, Lenox Avenue Line—Connecting Lenox Avenue between 142nd and 143rd Sts., Manhattan, with 149th St. in the Bronx. Two single cast-iron tubes 15 feet inside diameter, with center diaphragm. Tubes 641 feet long. Begun Fall of 1901. Operated July 10, 1905.

Harlem River Tunnel, Lexington Avenue Line—Passes under the Harlem River north of 131st St. Consists of four single-track steel tubes connected in center with diaphragm and concrete reinforcement. Inside diameter 16 feet 6 inches. Length of tube 1,080 feet. Begun March 10, 1913. Completed Nov. 1, 1915. Operated July 17, 1918.

Brooklyn-Manhattan Transit Corp.—Whitehal St., Manhattan, to Montague St., Brooklyn. Length between bulkhead lines 3,900 feet, inside minimum diameter 15 feet, outside minimum diameter 17 feet 2 inches; work begun July, 1914, tunnel opened, Aug. 1, 1920.

Sixtieth Street Tunnel, from Manhattan to Long Island City, length between bulkheads 2,580 feet, minimum diameter inside 15 feet, maximum diameter outside 18 feet; work begun August, 1916, tunnel opened Aug. 1, 1920.

Fourteenth Street-Eastern, from Manhattan to Williamsburg. Length between bulkheads 3,050 feet, minimum diameter inside 15 feet, maximum diameter outside 18 feet; work begun February, 1916, tunnel opened June 30, 1924.

West Shore Railroad Tunnel, WEEHAWKEN, NEW JERSEY—Commenced in 1881, and completed twenty-three months later, at a cost of $525,000. It is double-tracked and the original

length was 3,983 feet. A steel and concrete portal, constructed in 1907 at the east increased its length to 4,273 feet. One-fourth of the tunnel is brick-lined, the remaining portion, unlined. The normal section is 27 feet in width and 19 feet high. 80,500 cubic yards of rock were removed, and five vertical shafts were utilized, giving ten working faces, and average progress of 173 linear feet per month was maintained. The average expenditure per linear foot of lined section was $200, and of unlined section, $110, and equivalent of $7.00 per cubic yard of excavation. The tunnel is a tangent, with the exception of the extended portion of the east end, previously mentioned, at which point the freight and passenger tracks divide. There is a grade of 0.30% toward the east, and 0.34% toward the west, from approximately the centre of the tunnel.

Erie Railroad—Bergen Tunnel through Bergen Hill, Jersey City, constructed during the years 1856 to 1861. As originally constructed it was 4385 feet long but was shortened at both ends at the time the Bergen Archways was constructed and the total length is now 4,162 feet. It is a two-track tunnel 28 feet wide, having a three center arch 21 feet high, partly brick lined. It has been used for freight traffic only since the construction of the Bergen Archways in 1910.

Bergen Archways through Bergen Hill, Jersey City, is parallel to the Bergen Tunnel and was started March 1906 and completed July 1910. It has four four-track tunnels, with open cuts between the tunnels, making the total length of the archways 4,450 feet. Tunnel sections 56 feet wide at bottom and 25 feet 3 inches high.

Otisville Tunnel through the Schunemunk Mountains, Orange County, New York, is a two-track tunnel 30 feet wide between concrete side walls and 25 feet high on the inside of the semi-circular brick arch. Length of tunnel is 5,314 feet and is used for freight traffic only.

N Y., Susquehanna and Western Railroad Tunnel through the Palisades at Edgewater, New Jersey, constructed during the years 1892 to 1894. It is a two-track tunnel partly brick lined, 27 feet wide and 21 feet high to the inside of a semi-elliptical arch. Length is 5,058 feet and is used for freight traffic only.

Lackawanna Railroad Tunnel, through Bergen Hill, Jersey City. Started February 28, 1906; completed February 14, 1909. Parallel to and 24 feet away from old tunnel and of the same length viz., 4,253 feet. New tunnel is double tracked, lined with concrete, having inside dimensions 23 feet high by 30 feet wide.

RAILROAD PASSENGER STATIONS IN MANHATTAN.

Baltimore & Ohio operates its trains in and out of the station of the Central of New Jersey, in Jersey City, with a trainside bus service to and from the Waldorf-Astoria Hotel and the Pershing Square Building (42nd St., opposite Grand Central Terminal) in Manhattan, and Joralemon St., near Court St., Brooklyn.

Central of New Jersey, foot of W. 23d and Liberty Streets; Sandy Hook Route (In Summer), foot of W. 42d and Cedar Streets, also.

Delaware, Lackawanna & Western, foot of Barclay, Christopher and W. 23d Streets.

Erie, foot of Chambers and West 23d Streets.

Hudson Terminal, Cortlandt, Dey, Church and Fulton Streets.

Lehigh Valley (see Pennsylvania).

Long Island, 7th Avenue and 33d Street (Pennsylvania Terminal).

New York Central, 42d Street and 4th Avenue, Grand Central Station; Putnam Division, Grand Central Terminal.

Grand Central Terminal. The work on the present Grand Central Station was begun in July, 1903 and the Station was opened to the public in 1913. The Terminal today comprises practically the area bounded on the south by Forty-second Street, on the west by Madison Avenue, on the north by Fiftieth Street and on the east by Lexington Avenue.

Within this area are the Grand Central Station, the Post Office, the Grand Central Palace, hotels, apartment houses and office buildings, beneath all of which there are two train levels and two subways.

The first train level below the street is practically entirely used for the through trains. It has an area of about 48 acres and there are 42 tracks. The train level below that is used for local commuting service. It has an area of about 31 acres and there are 24 tracks. Including all the tracks on the two levels such as platform, storage, express, mail, running and miscellaneous tracks, there are more than 33 miles of track in the Terminal.

Below the two train levels are the subways for the handling of baggage, mail and express. These subways are at the lowest elevation of any of the Terminal passageways, being between 50 and 60 feet below the street level. Here, all of the baggage, mail and express received and sent out of the Terminal is transferred to and from the individual tracks of the two train levels by means of elevators connecting with the subways.

The main power plant, including heating and electric substation units, is located at Fiftieth Street and serves all the buildings of the Terminal.

Access to most of the Terminal buildings may be had from the station concourse without going above ground as well as passageway to several subway rapid transit routes. Whether a person enters the Station from the street, the subways, the connecting hotels or offices, the movement is a progressive one in which different levels are reached by ramps of easy grade with the ready guidance of legends. The following areas give an idea of the size of the station:—Waiting Rooms, 12,958 sq. ft.; Retiring and Toilet Rooms, 20,025 sq. ft.; Restaurant and accessories, 20,292 sq. ft.; Ticket Offices, 5,258 sq. ft.; Concourses, 80,844 sq. ft.; Baggage Rooms, 57,501 sq. ft.; Baggage Checking Rooms, 2,495 sq. ft.; Parcel Checking Rooms, 5,383 sq. ft.; Cab Stands, 8,530 sq. ft.; and Cab Drives, 16,963 sq. ft.

New York, New Haven & Hartford, 4th Avenue and 42d Street, Grand Central Station.

New York, Ontario & Western, foot of Cortlandt and West 42d Streets.

New York, Susquehanna & Western, foot of Chambers and West 23d Streets.

Pennsylvania, foot of Cortlandt and Desbrosses Streets, 7th Avenue, 31st to 33d Street, and Hudson Terminal (Fulton and Church Streets).

Philadelphia & Reading, foot W. 23d and Liberty Sts.

Staten Island, foot of Whitehall Street, South Ferry.

West Shore, foot Cortlandt and West 42d Streets

COMPOSITION OF NEW YORK CITY POPULATION—1920.

Males, 2,802,638; females, 2,817,410; native white males, 1,703,127; native white females, 1,764,789; foreign-born white males, 1,020,090; foreign-born white females, 971,457, Negro males, 72,351; Negro females, 80,116; total foreign-born, 2,028,160.

Of the foreign-born whites Russia sent 479,797; Italy, 390,832; Ireland, 203,450; Germany, 194,154; Poland, 145,679; Austria, 126,739; England, 71,404; Hungary, 64,393.

Mother tongues—Yiddish and Hebrew, 946,139; English and Celtic, 897,452; Italian, 803,048; Germanic, 702,303; Slavic and Lettic, 486,666.

In 1920 the number of foreign-born whose fathers also were foreign-born, (the so-called first generation), was 1,991,547.

The number of native-born whose parent or parents were born abroad was 2,303,082.

Of those comprising the so-called first generation, 559,225 came from Russia and were mainly Jews; 392,225 came from Italy; 236,838 from Austria; 211,789 from Ireland; 206,645 from Germany; 72,440 from Hungary; 56,436 from England; 34,733 from Roumania; 34,211 from Sweden; 24,291 from Norway; and 22,447 from Scotland.

Foreign-born whites, 21 years and over, 1,797,882, of which 765,264 are naturalized; native whites, 21 years and over, 1,559,549.

Population in gainful occupations—Bronx, 308,204; Brooklyn, 861,913; Manhattan, 1,115,966; Queens, 197,832; Richmond, 47,497; whole city, 2,531,412.

Of the whole population in 1920, single persons numbered 761,197 males and 667,247 females. Married persons numbered 1,143,643 males and 1,115,670 females; widowers, 78,999; widows, 232,991; divorced men, 4,303; divorced women, 6,775.

LONDON AND NEW YORK POPULATION COMPARED.

The name of London is in general use to indicate two very different areas.

The smaller area, the administrative County of London, the area of jurisdiction of the London County Council, covers 117 square miles; the larger area, "Greater London," the combined areas of jurisdiction of the Metropolitan and City Police Forces, and commonly adopted in the consideration of many London problems, covers 693 square miles.

District	Area. Acres.	Population 1921	Population 1911
County of London...	74,816	4,483,249	4,521,685
City of London......	675	13,709	19,657
Central Criminal Court area........	268,356	—	6,610,031
Police area:			
(except City)......	447,626	7,466,492	7,231,701
(incl. City).........	448,301	7,480,201	7,251,358
Metropolitan area (incl. sub.).........	3,045,120	9,610,204	9,201,484

1,728,000 JEWS IN NEW YORK CITY; 4,228,029 IN UNITED STATES.

The Bureau of Jewish Social Research calculates there were 1,835,000 Jews in New York City at the beginning of 1929.

The American Jewish Committee estimates there are 4,228,029 Jews in the United States (excluding those who do not profess the faith), of whom 325,000 are in Chicago, 270,000 in Philadelphia, 90,000 in Boston, 85,000 in Cleveland, 75,000 in Detroit, 68,000 in Baltimore, 65,000 in Los Angeles, 65,000 in Newark, N. J., 53,000 in Pittsburgh, 50,000 in St. Louis.

Five sections of New York City are now more than 50 per cent Jewish in population. These are—the east side of Manhattan south of Fourteenth Street; the southwest corner of the Bronx south of 169th Street and east of Park Avenue; the district around Broadway, Brooklyn, from Gates Avenue to the East River; New Lots, Brooklyn; and Bath Beach, Brooklyn.

Four other sections of the city are more than 30 per cent Jewish in population. They are—Borough Park; the Eastern Parkway section; Flatbush, south of Avenue H, in Brooklyn; and Harlem east of Lenox Avenue and north of Ninety-sixth Street in Manhattan.

The Jewish population runs less than 5 per cent in all Queens, Greenpoint; the west side of Manhattan south of 145th Street; the East Side between Fourteenth and Eighty-sixth Street; and the western edge of Brooklyn north of Sixty-seventh Street and west of Bedford, Franklin and Parkside Avenues.

The lower East Side, the district south of Fourteenth Street and east of the Bowery, still contains the largest section of the Jewish population of the city, but there has been a decrease.

Brooklyn as a whole contains 45 per cent of the Jewish population, while Manhattan houses only 28 per cent, where in 1916 Manhattan contained 46 per cent of all the Jews in the city and Brooklyn only 37 per cent.

The death rate was given as 7.91 per thousand among the Jewish population, against 11.7 among the general population of the city and 13 of the State.

Despite the smaller proportion of deaths among them, the study showed that the Jews were not growing in number as rapidly as the general population. In Brooklyn, the Jewish birth rate was found to be 18 per 1,000, against 22.35 per 1,000 among the general population.

Seventy-five per cent of the Jewish population was found to be less than 45 years of age, compared with 66.7 per cent among the general white population.

1891	7,214	3,150	126	1910	16,940	1,715	36				

From 1873 to 1897, inclusive, figures are for former City of New York plus those for City of Brooklyn; from 1898 figures are for Greater New York.

The rather sharp increase in the number of cases in 1894 probably reflects the introduction of bacteriological diagnosis by cultures.

SUMMARY FOR 1927 BY BOROUGHS.

Borough.	Establishments.	Wage Earners.	Wages in Year.	Cost of Materials.	Value of Products.
	No.	*Aver. No.*	*Dollars.*	*Dollars.*	*Dollars.*
Whole City	27,062	552,507	904,646,427	2,583,834,232	5,722,071,259
Bronx	1,118	21,520	33,507,396	70,637,035	155,245,385
Brooklyn	5,315	147,427	222,323,169	595,585,836	1,185,458,351
Manhattan	19,107	321,880	549,185,751	1,860,978,816	3,813495,044
Queens	1,385	53,994	85,963,177	270,422,271	479,945,459
Richmond	137	7,686	13,666,934	56,210,274	87,927,020

The City of New York leads all other American municipalities in the total value of manufactured products, and also in their variety.

NEW YORK CITY'S CANOPY.

Residents are under an aerial load of 2,200 tons of dirt and dust every day, according to a laboratory analysis of the content of New York's air compiled by Professor H. H. Sheldon of New York University for the Smoke Nuisance Committee, in May, 1929.

In the 341,000,000 cubic feet of atmosphere over the city, the dirt and dust content is formed as follows:

Sixty-five per cent is carbon dust, 15 per cent mineral and ash and 20 per cent germs and septic matter.

The 65 per cent carbon content amounts to 3,000,000 pounds of high volatile fuel.

This is enough to operate the city's electric light and power plants for six hours out of every twenty-four.

It is made up of unconsumed coal, gasoline, motor oil and other fuel, and the combination, according to Sheldon, "has a greater volatile and heat quality than soft coal."

There are also "appreciable" quantities of poisonous carbon monoxide, not to mention sulphur acids "strong enough to eat through linen."

"In sufficient quantities," Prof. Sheldon asserts, "these gases have an effect similar to the chlorin gas used during the World War, though their effect in moderate amounts is solely on the nasal and pulmonary membranes."

The germ content in the city's air consists of about 1,000,000 pounds of bacteria and other organic particles.

These range from the common diplococci and strephlycocci, found on the skin of all humans and responsible for blood poisoning, to "predatory spirochaetae." These, when found, are generally dead.

The germs are kept in constant motion by the traffic, and most city dwellers attain a certain immunity to the more common.

Most illness due to crowded conditions is caused by the rarer germs, Prof. Sheldon said, against which few persons develop a permanent resistance.

INTERNATIONAL HOUSE.

International House was incorporated in 1924; located at Riverside Drive and 124th Street, New York. Harry E. Edmonds, founder and director.

The purpose is improvement of the social, intellectual, spiritual and physical condition of men and women students, without discrimination because of religion, nationality, race, color or sex, and from any land, who are studying in the colleges, universities, and professional schools of the city of New York.

The land, building and furnishings were provided by John D. Rockefeller, Jr.

Affiliation, over 1,500 students from 65 countries. The House accommodates 350 men and 175 women in residence; is not managed for profit, and is self-supporting through student fees and room rents; deficits, if any, met by voluntary contributions.

George W. Wickersham, chairman Board of Governors; Frederick Osborn, chairman Executive Committee; Dave H. Morris Jr., treasurer.

CHIEF MANUFACTURING INDUSTRIES IN EACH BOROUGH.,

The Bureau of the Census is prohibited by law from publishing any statistics which might disclose, exactly or approximately, the data supplied by individual establishments. For this reason it is necessary, in the compilation of city statistics, to include in "All other industries" certain industries which are more important than some of those shown separately. As a rule, statistics are given for each industry represented by three establishments or more.

In some cases, however, a single establishment produced so large a proportion of the combined output of three or more establishments in a particular industry that the figures for the industry could not be given without disclosing approximately the data for the dominant establishment.

These facts should be borne in mind in making use of the city figures; and in particular it must not be assumed that all the industries for which separate figures are given are more important than any of those not shown separately.

NEW YORK CITY'S BIG BRIDGES.

THE TRI-BOROUGH BRIDGE.

The Tri-Borough Bridge, work on which was begun late in 1929, is to cost about $24,600,000, and, will parallel roughly, the present Hell Gate railway span.

The Queens terminal is to be at 2d and Hoyt Aves. The Bronx terminal will be 134th St. and Cypress Ave.

The span over Little Hell Gate will consist of two steel arch spans, each 375 feet in length, with a pier in the center of the waterway.

The span over the Bronx Kills is designed as a fixed bridge that could be made to serve as part of a bascule span if this waterway is made navigable. These stream crossings have been approved by the U. S. Engineers.

The Bronx approach crosses the freight yard of the New Haven Railroad.

The total length of the main bridge will be 13,560 feet.

There will be supporting piers on Randall's Island and on Ward's Island.

The connection from Second Ave. and 125th St. Manhattan, to the main bridge, will be 4,150 feet in length and will provide for six lanes of traffic. The terminal is at Second Ave., between 124th and 126th Sts.—124th St. will be used for east bound bridge traffic and 126th St. for west bound bridge traffic—125th St. can be also utilized, as at present, for both east and west bound traffic. The Manhattan approach passes over First Ave., and there is no crossing of traffic on that Avenue bound to and from the Willis Avenue Bridge.

All except the Hell Gate are municipal-owned bridges.

On the Brooklyn Bridge, 6-car through-train service began on Jan. 27, 1908.

The Queensboro Bridge is held up from link-chains and is of the cantilever type.

The Brooklyn, Williamsburg and Manhattan are suspension bridges. The Hell Gate is a steel-arch span.

HUDSON RIVER BRIDGE (FT. WASHINGTON TO FT. LEE).

Toll bridge of suspension type now being built by The Port of N. Y. Authority across the Hudson River between Ft. Washington Point (178th Street) New York City and Ft. Lee, N. J.

Construction work began May, 1927; work-cables stretched across river on July 9, 1929.

Principal dimensions: Length of main span, 3,500 ft. Length of side spans, 650 ft.

Clearance above mean high water at center of main span, 213 ft. Height of towers above mean high water, 635 ft.

Total width of bridge, 118 ft.

The cables are anchored in solid rock on the New Jersey side and in concrete anchorage block on rock on the New York side.

Capacity: Eight lanes of vehicular traffic, four rapid transit tracks and two sidewalks.

Bridge to be opened for vehicular traffic in 1932 at an estimated cost of $60,000,000.

PORT OF NEW YORK AUTHORITY AND ITS PLANS.

The Port Authority, in October, 1929, announced it had decided to locate the proposed Union Freight Depot on the block bounded by 15th St., 16th St., 8th Ave., and 9th Ave.

Through this station all freight shipped or received below 59th St. in less than carload lots through the eleven railroads that serve Manhattan will clear.

The cost was set at $15,000,000 for the site and building.

Arthur Kill Bridges—The first two were opened to traffic on June 29, 1928.

These are the Outerbridge Crossing, from Perth Amboy, N. J. to Tottenville, Staten Island, and the Goethals Bridge from Elizabeth, N. J., to Howland Hook, Staten Island.

Kill Van Kull Bridge—Ground was broken on Sept. 18, 1928 for the structure to cross from Bayonne, N. J., to Port Richmond, Staten Island. The cost for a high-arch span is estimated at $16,000,000. The bridge is expected to be open for traffic in 1932.

In the case of the Arthur Kill bridges each State advances $2,000,000, a total of $4,000,000, payable in equal installments over a period of five years. The rest of the cost, including interest during construction, will be met from an issue of Port Authority bonds of $14,000,000 already sold.

In aid of the Hudson River Bridge each State will advance $5,000,000, a total of $10,000,000, payable in equal annual installments over a period of five years. The rest of the cost will be met by the sale of Port Authority bonds.

The Port Authority has its headquarters at No. 75 West Street, Manhattan Borough. The Commissioners are: New Jersey, Frank C. Ferguson and Schuyler N. Rice, and William C. Heppenheimer; New York, John F. Galvin, and Howard S. Cullman of New York City, and John F. Murray, of Brooklyn. Mr. Galvin is Chairman of the body and Mr. Ferguson is Vice-Chairman.

Chief Executive Officer, J. E. Ramsey; *Counsel*, Julius Henry Cohen; *Treasurer*, William Leary; *Secretary*, Wilson J. Vance, *Asst. Treasurer*, D. L. Waters; *Auditor*, Marion Rodgers.

THE STATUE OF LIBERTY.

(Created by President Coolidge a National Monument, Oct. 15, 1924.)

The Statue of Liberty on Bedloe's Island, New York Harbor, was first proposed soon after the Franco-German War by a group of prominent Frenchmen, who commissioned one of their number, Frederic August Bartholdi, sculptor (born 1833 died 1904), to do the work. The U. S. Congress, Feb. 22, 1877, authorized President Hayes to set apart a site on the island, which Bartholdi, on a visit, had suggested. A committee was formed in 1874 to raise funds. In France, 180 cities, 40 general councils, many societies, and thousands of people contributed. In the United States, by the aid of The World, $300,000 was raised for the pedestal. The statue cost about $700,000, making the total about $1,000,000.

The Statue weighs 450,000 pounds (225 tons); the bronze alone weighs 200,000 pounds, and is 3-16 of an inch thick; 40 persons can stand in the head, and 12 in the torch; number of steps in statue, from pedestal to head, 161; number of rounds in ladder in uplifted right arm, 54.

The pedestal of the statue is 89 feet in height and 62 feet square at the base.

The head of the Statue was completed for the Paris Exposition, in 1878; the forearm had been sent to America and shown at the Centennial Exposition, Philadelphia, in 1876. Thence it was transferred to Madison Square, New York City, where it remained until 1886. On Oct. 24, 1881, the anniversary of the Battle of Yorktown, all the pieces of the framework and base were put in place at Paris, Levi P. Morton, the American Ambassador, driving the first rivet. The Statue was finished in 1883; on July 4, 1884, M. De Lesseps, President of the French Committee, officially presented the Statue to Ambassador Morton; on Aug. 5, 1884, the cornerstone of the pedestal was laid on Bedloe's Island; late in June, 1885, the French vessel, Isere, from Rouen, France, landed the Statue at New York in 210 packing cases; the work of putting the parts together was begun in May, 1886, and the Statue was unveiled on Oct. 28, 1886.

DIMENSIONS OF THE STATUE.

Tablet, thickness	2	0

An idle young man from the Bronx, on May 13, 1929, jumped from the crown of the statue to the grass plot at the base of the pedestal, and was instantly killed.

The island has been known by five different names. First it was Oyster Island. When Governor Lovelace in 1670 made it an exempted jurisdiction where—

"no warrant of attachment or arrest shall be made of force or served unless it be by ye Governor's Speciall Warrant in Cases of breach of ye peace or Cryminall Mattrs,"

he referred to it as Love Island.

He was giving the exemption at that time to Isaac Bedloe, and from this came the designation of Bedloe's Island.

During the Revolutionary War it was known as Kennedy's Island. Captain Kennedy, commander of the British Naval Station of New York, had bought the property from Mary Smith, a daughter of Bedloe for £100.

In 1750 the island was sold to New York for a pest house site and in 1800 the State gave it to the Federal Government.

It came to be known as Fort Wood in 1841, when adapted as one of the military defenses of the harbor.

The only installation of military value on the island is the radio station, which handles all the traffic for the headquarters of the Second Corps Area at Governor's Island. Next to Arlington, the Fort Wood station is said to be the largest in the United States Army.

The radio operator has a standing "listening-in" assignment. As soon as the United States Government is notified officially of the take-off of a transoceanic flier from a point on the other side of the Atlantic, the operator at Fort Wood gets his instructions to stand by until further orders.

FORT HAMILTON, BROOKLYN.

(From an article in The Recruiting News, Governor's Island)

The first defenses at the entrance to the harbor, commonly called "The Narrows," were erected on the Long Island side about 1651 by Peter Suyvesant, then governor. Three years later the town of New Utrecht, settled by twenty families from Holland, sprang up around these defenses, the beginning of Fort Hamilton.

From that time until the Revolution little is known of the activities at this point.

It is certain, however, that the fortifications were not very strong, for in 1664 an English fleet easily entered the harbor and captured New Amsterdam. This town, retaken by the Dutch nine years later, again became New York when the English resumed control in 1674.

Lord Howe, in command of a British army, seems to have had little resistance when he crossed the Narrows from Staten Island and advanced upon Washington in the Battle of Long Island.

The importance of the Narrows as the key to New York Harbor apparently was not fully appreciated until 1824. At least the newly-born United States did not begin to fortify this strategic point completely until that year, when, on August 25, Lieutenant Talcott, Corps of Engineers, was ordered to the proposed site of Fort Hamilton—the southwest shore of Long Island, five and one half miles south of the Battery of New York City.

The piece of land upon which the post now stands was covered by a deed from the Mayor, Aldermen and Commonality of the City of New York, dated May 30, 1814, conveying about sixty acres of land in New Utrecht. Other tracts of land were deeded or otherwise acquired in the period 1826-1892.

Prior to this, however, a piece of land two acres in area and adjacent to Fort Hamilton was ceded by the New York Legislature to the United States—1807—and owing to its shape was called Fort Diamond. This fort was completed in 1822.

It is now called Fort Lafayette and is on a small island about two hundred yards off shore in the Narrows. During the Civil War several hundred prisoners were confined in it.

The actual construction of the present day Fort Hamilton was begun on April 26, 1825. Captain George Blaney and Lieutenant Mansfield, both of the Engineers Corps, U. S. Army, were superintending engineer and officer in immediate charge respectively.

The cornerstone was laid on the 11th of June, 1825, the fort completed, reported ready for occupancy, and turned over for that purpose on the 10th of July, 1831, by Major De Russy, who had succeeded to the superintendency of the construction.

Fort Hamilton was built of gray granite and intended for defense against attack either by land or water. It belonged to the German system of fortification, being quadrangular in form, its defense consisting of a caponniere flanking the east or principal land front, and bastions which were later added for the purpose of flanking the other three fronts.

In addition there was a water battery facing the Narrows, and two tiers of guns, one mounted in casemates, the other on barbette.

The landward defenses were designed for howitzers mounted in casemates; the water battery to have heavier guns commanding the ship channel.

The old inner fort or redoubt later was used as a Quartermaster storehouse, and, so legend has it, much of its construction was carried on by Captain Robert E. Lee, Corps of Engineers, who commanded Fort Hamilton in 1856. The house occupied by Captain Lee is still used as officers' quarters.

THE HARBOR OF NEW YORK.

(Data, as of June 25, 1929, by courtesy of the Chief of Engineers, U. S. Army.)

New York Bay is the principal entrance to New York City. It is divided into two parts, the Lower Bay and the Upper Bay, by the Narrows, a passage about five-eighths of a mile wide at its narrowest part. The entrance to the Lower Bay is between Sandy Hook on the south and Rockaway Point on the north and is about seven miles wide. The Upper Bay extends from the Narrows to the Battery. The principal entrance channels to the Harbor of New York are the Ambrose Channel and the Main Ship-Bayside-Gedney Channel.

Ambrose Channel, which is the newer and more important channel, was completed April 17, 1914. It has a comparatively straight course in a northwesterly and then northerly direction from deep water in the ocean through the Lower Bay. It is 38,000 feet in length and 2,000 feet in width, and has a depth of 40 feet at mean low water. The mean range of tide is about 4.5 feet.

Main Ship-Bayside-Gedney Channel is the route formerly used by deep-draught vessels. It extends westward past Sandy Hook and then northward through the Lower Bay. It has a depth of 30 feet at mean low water and a nominal width of 1,000 feet.

The **Anchorage Channel**, in the Upper Bay, has been completed to a width of 2,000 feet and depth of 40 feet at mean low water.

Within the harbor there are several channels connecting the different sections. Bay Ridge, Red Hook and Buttermilk Channels lie in Gowanus Bay along the Brooklyn shore of the Upper Bay and form an easterly channel that extends from the Narrows to East River and is separated from the Main Ship Channel by a broad shoal off Gowanus Bay and by Governor's Island. By means of these channels the extensive terminals of the Bush Terminal Co. and of the New York Dock Co., as well as the municipal terminals in South Brooklyn, are directly accessible for large ships and have easy communication with the other sections of the inner harbor.

Bay Ridge Channel has a minimum depth of 35 feet at mean low water for its full width of 1,200 feet, and a through controlling depth of 38 feet for a middle width of about 800 feet. Red Hook Channel has a minimum depth of 35 feet at mean low water for its full width of 1,200 feet and a through controlling depth of 38 feet for a width of 800 feet except at its junction with Buttermilk Channel, where it is but 600 feet wide. The combined length of these channels is about 4.5 miles and the mean range of tide is about 4½ feet. Buttermilk Channel has a controlling depth of 30 feet at mean low water through a channel 600 feet wide. The mean range of tides is about 4.5 feet.

The Hudson (North) River empties into Upper New York Bay at the Battery, the southernmost point of Manhattan Island. The width of the river between established pierhead lines is 3,900 feet at the Battery and gradually decreases to 2,750 feet between Castle Point, N. J., and West 14th Street, New York City, and 2,725 feet opposite West 59th Street, and increasing to 5,400 feet at the northern entrance to Harlem River (Spuyten Duyvil Creek). A channel with a least depth of 40 feet at mean low water is available through the Hudson River on the New York side of the river up to West 61st Street; thence up to about West 96th Street, deep water is found in the centre of the river and thence generally along the eastern shore to the northern boundary of the city. Along the Jersey City waterfront a channel connecting with deep water to the Upper Bay is 30 feet deep at mean low water and 800 feet wide. The depth along the Hoboken waterfront is 40 feet at mean low water for the entire width of the river. Above this along the Weehawken-Edgewater waterfront the channel is 25 feet deep at mean low water, except off the Warner Sugar Co. pier where it is but 21½ feet; the channel is 550 feet wide, connecting with the channel of 40 feet depth in about midstream opposite West 145th Street, New York City. The mean range of tide at the Battery is 4.4 feet.

The East River is a tidal strait about 16 miles long and from 600 to 4,000 feet wide, exclusive of bays and estuaries, and extends from the Battery in New York City to Throggs Neck, at the head of Long Island Sound. The river separates the Boroughs of Manhattan and the Bronx from the Boroughs of Queens and Brooklyn.

Between the Battery and Governor's Island a channel 500 feet wide has a controlling depth of 38 feet at mean low water. The channel of 30 feet depth is about 600 feet wide. Thence to Hell Gate the channel of 40 feet depth is 400 to 1,000 feet wide; through Hell Gate 32 feet deep and 500 feet wide; thence to Long Island Sound at Throggs Neck 35 feet and 700 to 1,000 feet wide; except at Middle Ground off Sunken Meadow, where it is about 325 feet on the east side of the reef and 200 feet wide on the west side. A project is under way for deepening the entire channel to 40 feet from the Upper Bay to the Navy Yard and thence 35 feet to Long Island Sound. The mean range of tide in the East River is 4.4 feet at the Battery, 4 feet at the Brooklyn Navy Yard and 6.6 feet at the east entrance to Hell Gate.

Harlem River and Spuyten Duyvil Creek together form a waterway about 8 miles in length, which extends from the East River to the Hudson River and separates the Borough of Manhattan from the Borough of the Bronx. The East River entrance to the Harlem River is about 8½ miles by water northeast of the Battery, and the Hudson River entrance to Spuyten Duyvil Creek is about 13½ miles by water north of the Battery. The improved channel in Harlem River has been dredged to a width of 150 to 400 feet and a depth of 15 feet at mean low water to High Bridge except at Macombs Dam Bridge, where ledge rock through the west draw (where work is in progress) limits the depth to 12 feet. Rock in the east draw has been removed to project depth. The section between High Bridge and Broadway Bridge is now being deepened to 15 feet at mean low water.

Bronx River is a short and narrow stream that empties into a shallow bay or estuary on the East River at Hunts Point, about 11 miles northeast of the Battery. The navigable portion of the river consists of a channel extending from its mouth to a dam at East 177th Street. This channel is about 2½ miles long and from about 50 to 300 feet wide and has a depth of 10 feet at mean low water and width of 100 feet in the lower section, extending from he East River up to Spofford Street, thence to Westchester Avenue, 9 feet. Above this up to a point 1,700 feet above the bridge the channel is 50 feet wide and 4 feet deep at mean low water; thence to the gas works at East 173d Street the channel is 20 to 30 feet wide and 2 feet deep at mean low water. Above this the depth gradually decreases and the bottom of the river is exposed at low water above a point situated just below the dyeworks at East 177th Street. The mean range of tide in the Bronx River is about 7 feet in the estuary and 6 feet at the dam.

Westchester Creek is a small stream lying wholly within the limits of the City of New York. This stream extends northward from an estuary in the north shore of East River about 14 miles northeast of the Battery. The estuary is about 1 mile long and from 500 to 3,000 feet wide. The channel is 8 feet deep at mean low water and 100 feet wide across the estuary, thence reducing in width to 80 feet, and in the upper portion, above Unionport, it is 60 feet wide. The mean range of tides is 6.8 feet.

East Chester Creek is a shallow stream that empties into East Chester Bay, on the north shore of Long Island Sound, about 12 miles west of the Connecticut State line and about 21 miles northeast of the Battery. The lower two miles of the navigable portion of this stream lie wholly within the limits of the City of New York. The available depth in the channel is 5 feet at mean low water or 12 feet at mean high water up to the Fulton Avenue Bridge; thence to the head of the improvement, about 300 feet above Fulton Avenue it is 4 feet at mean low water.

Flushing Bay is on the north shore of Long Island, about 12 miles from the Battery. The bay is about 1 mile wide and 2 miles long. Flushing Creek, which flows into the head of the bay, is a tidal stream navigable for a distance of about 3.5 miles from its mouth. The length of channel under improvement extends from the East River through the bay and up the creek to the upper Long Island railroad bridge, about five-eighths of a mile above the highway bridge at Jackson Avenue, Flushing, a total length of about 3 miles. The available mean low water depth up to 300 feet north of the bridge at Jackson Avenue is 10 feet, except in a few places along the channel lines; above this to the upper railroad bridge it is 7 feet. The mean range of the tide is about 7.1 feet.

ON THE BROOKLYN SIDE.

Newtown Creek is the inlet of the East River that separates for a distance of about 4 miles the Boroughs of Queens and Brooklyn. Newtown Creek has a width of 150 feet and a mean low water depth of 20 feet up to the wharf of the Brooklyn Union Gas Co., about 3,900 feet above Meeker Ave. Bridge; above this to Metropolitan Avenue the depth is 14 feet and width 125 feet. A channel 20 feet deep has been dredged in Dutch Kills, a tributary entering the creek from the north about one-half mile above Vernon Avenue Bridge. The total length of navigable

DESCRIPTION OF THE HARBOR (Continued.)

channel in the creek is about 5 miles, and in the Kills about one-half mile. The mean range of tide is about 4 feet.

Wallabout Channel is a channel in Wallabout Bay, an inlet of the East River adjacent to the United States Navy Yard in Brooklyn. The channel consists of a waterway extending in a half circle around the inside of the island, known as Cob Dock, and is divided into two parts by a stone causeway connecting the mainland with Cob Dock. The eastern section of the channel is about 2,000 feet long and from 250 to 350 feet wide, and has a depth of about 20 feet at mean low water. At the head of Wallabout Channel are two bodies of navigable water, Kent Avenue Basin and Wallabout Basin, which are 2,200 feet long and 1,300 feet long respectively.

Jamaica Bay is situated on the south shore of Long Island and lies wholly within the limits of the City of New York. It is about 8 miles long and 4 miles wide, and covers an area of approximately 32 square miles. The bay contains numerous small low-lying islands, which reduce the water surface area to about 18½ square miles. The bay is connected with the ocean by a shifting channel over a bar at Rockaway Inlet. The deep water channel through this bar is 400 feet wide and 23 feet deep at mean low water. Under a joint project for improvement by the Federal Government and the City of New York a channel 1000 feet wide and 30 feet deep at mean low water has been dredged from deep water at Barren Island up to Canarsie; thence 500 feet wide and 18 feet deep up to 500 feet northeast of Fresh Creek Basin. The mean tidal range is 4.5 feet. The United States is to provide and maintain the entrance channel and to reimburse the city for dredging the main channel in the bay, while the city is to dredge the other channels within the bay, bulkhead the shores of the bay, and fill in behind the bulkheads.

Newark Bay is a large estuary extending from the confluence of the Passaic and Hackensack Rivers south to Staten Island, a distance of about 6 miles. It is about 1½ miles wide. At Staten Island the bay is connected on the east with Kill van Kull, and on the west with Arthur Kill. The United States project channel through the bay is 30 feet deep, 1,800 feet wide at the entrance, narrowing to 400 feet a short distance above the Central Railroad of New Jersey bridge, thence continuing that width to the confluence of the Passaic and Hackensack River channels. The channel has been completed except at the locality of the Lehigh Valley R.R. bridge and at the bend at Bergen Point at the entrance, where work is in progress. The mean range of tide is 5 feet.

Passaic River is a tidal stream which is navigable for vessels drawing 6 feet of water as far as the City of Passaic, 16 miles above its mouth. In the lower portion of the river the depth of the navigable channel is 20 feet to the Jackson Street bridge at Newark; thence 16 feet deep to the Montclair and Greenwood Lake railroad bridge; thence 6 feet deep to Passaic. A channel 10 feet deep has been authorized between Newark and Passaic but work on it has not been commenced.

Hackensack River is a tidal stream which merges with the Passaic River at the head of Newark Bay; it is navigable to New Milford, 20½ miles from its mouth. At mean low water 30 feet can be carried to the Central Railroad of New Jersey bridge, and thence 22 feet to the Public Service power station at Marion, Jersey City, thence 12 feet to the highway bridge at Little Ferry, 10 feet through the bridge, thence from 10 to 12 feet to the New York-Susquehanna Railroad bridge in Hackensack, and thence quite shoal to New Milford. A Channel 30 feet deep and 300 feet wide has been authorized from the Central Railroad of New Jersey bridge to a point 2,000 feet above the Delaware, Lackawanna and Western Railroad bridge at Marion, Jersey City, and work on that channel is in progress.

Arthur Kill separates Staten Island from New Jersey. It is about 12 miles long. This channel, together with Kill van Kull, forms Staten Island Sound, and, with the lower end of Newark Bay, forms the inland waterway between New York and New Jersey, the boundary between the two States following the centre of the waterway. Vessels drawing 23 feet can be taken at mean low water into Newark Bay via Lower New York Bay, Raritan Bay and Arthur Kill. Vessels drawing 27 feet at mean low water can be taken through Upper New York Bay, Kill van Kull and Arthur Kill to about opposite the mouth of Rahway River. A channel 30 feet deep at mean low water and 400 feet wide is now under construction from Kill van Kull to Perth Amboy, passing south of Shooters Island.

Kill van Kull, a connecting waterway about 3 miles in length, lies along the northern shore of Staten Island and extends from the lower end of Newark Bay to Upper New York Bay. A channel 30 feet deep at mean low water and a minimum width of 400 feet has been constructed by dredging and rock removal through Kill van Kull from Upper New York Bay to within 1 mile of the entrance to Newark Bay. The controlling depth in the undredged portion of the channel in Kill van Kull is 27 feet at mean low water.

Raritan Bay lies at the southern end of Staten Island and forms the western portion of Lower New York Bay. Its greatest length from north to south is about 5 miles and from east to west about 7 miles. The Raritan River empties into the bay at its western end, and the Arthur Kill extends northward from its western end. Vessels enter the bay by way of the Main Ship-Bayside-Gedney Channel. A channel 30 feet deep at mean low water and 400 feet wide has been dredged from deep water northwest of Sandy Hook to Perth Amboy.

Raritan River empties into Raritan Bay at Perth Amboy. At mean low water vessels with a draught of 15 feet can be carried to the Washington Canal at Sayreville, a distance of 6.7 miles; thence 8 feet to New Brunswick, a distance of about 5.3 miles.

Elizabeth River is a small stream that empties into the Arthur Kill near its junction with Newark Bay. The navigable channel in the lower river has a depth of 6 feet at mean low water for half a mile; thence 4.5 feet for half a mile; thence about 1 foot to Broad Street, 1.7 miles.

TIDES AND CURRENTS IN NEW YORK HARBOR.

(Prepared for the Almanac by the U. S. Coast and Geodetic Survey)

At the time of low water at Fort Hamilton, excepting a few small indentations like Gowanus Bay, the current throughout the harbor is ebbing, the water flowing toward Lower Bay. And with the exception of Lower Bay, the tide over the whole harbor is falling.

In the Hudson the current is very nearly at its strength, while the tide is near low water, which is still 1 hour away.

The Harlem is now carrying the water from East River toward the Hudson, the tide being below mean sea level and about 2 hours from its low water.

Upper East River is bringing the water from Long Island Sound toward Hell Gate, while its level is falling rapidly, being now 2 hours after high water.

Through Hell Gate and lower East River, the water is flowing toward Upper Bay at very nearly its strength, which was passed an hour ago, the level of the water being a little below mean sea level and falling rapidly.

At the time of low water at Fort Hamilton the current in Newark Bay has not yet attained its strength.

The waters from Newark Bay are now pouring partly into Arthur Kill, but principally into Kill van Kull, which is carrying them into Upper Bay.

In Upper Bay the current has passed its strength about half an hour previously, but it is still running with a velocity not far from strength and passing on the waters from the Hudson River, East River, and Kill van Kull into the Narrows.

The level of the water in Newark Bay, Kill van Kull, and Upper Bay is still falling, but rather slowly, for low water is less than an hour away.

Low water at Fort Hamilton is coincident with the strength of the ebb current in the Narrows.

The tidal waters which are flowing into Upper Bay through Hudson River, East River, and Kill van Kull, together with the non-tidal waters from a territory having an area of very nearly 15,000 square miles, are now pouring through the Narrows into Lower Bay at the rate of more than three-quarters of a million cubic feet per second.

Arthur Kill, too, is flowing toward Lower Bay, and from Lower Bay the waters now are passing out to sea, although the strength of the current has already passed.

In Arthur Kill the level of the water is falling slowly, low water being half an hour away, but in Lower Bay the water is beginning to rise very slowly, the low water here having occurred a few minutes before this time.

At the time of high water at Fort Hamilton the current is flooding through the whole harbor and, with the exception of Lower Bay, the tide is still rising.

In the latter waterway the tide is earliest and high water occurred a few minutes previously, so that now the level of the water is falling.

FOREIGN COMMERCE OF THE PORT OF NEW YORK.

(Includes actual harbors of New York, Newark and Perth Amboy, and the port of Albany.)

Totals on entrances and clearances do not include vessels that reached and left the United States via other domestic ports.

They cover the New York port district, including Newark and Perth Amboy, but not Albany.

The direct water front of Greater New York extends a distance of more than 3,000,000 linear feet, or approximately 578.4 miles, of which 43.2 miles is in Manhattan; 79.8 in the Bronx; 201.5 in Brooklyn; 196.8 in Queens; and 57.1 in Richmond.

The port water front on the New Jersey side extends 192.93 miles—grand total, 771.33 miles.

At the French port of Marseilles, in 1928, vessels cleared numbered 8,576 (5,382,863 cargo tons); at Havre, 7,768 (2,937,452 cargo tons); at Rouen, 3,477 (6,163,691 cargo tons).

At the German port of Hamburg, in 1928, vessels cleared with 8,116,000 tons of foreign cargo; at Bremen, with 1,469,000 tons

UNITED STATES OFFICERS OF CUSTOMS, PORT OF NEW YORK.

Collector's Office—*Collector*, Philip Elting; *Assistant Collector*, Henry C. Stuart; *Private Secretary*, D. Harry Ralston; *Appointment Clerk*, J. Leslie Robb; *Assistant Custodian*, Joseph M. Morgan; *Solicitor to Collector*, Mark P. Andrews; *Auditor*, Erastus S. Hawkins; *Cashier*, William T. Black. *Supplies and Service Division*, Francis Kaley, Supt.

Deputy Collectors—*Marine Division*, Stephen W. Hamilton; *Entry Division*, William P. Zwinge; *Warehouse Division*, Francis T. Leahy; *Records Division*, O. W. Christian; *Liquidating Division*, Thomas M. Thurston; *Drawback Division*, C. B. Winne; *Information Bureau*, Ernest C. Hawkins.

Surveyor's Office—*Surveyor*, Thomas W. Whittle; *Assistant Surveyor*, Milton P. Jackson.

Comptroller's Office—*Comptroller*, Arthur F. Foran; *Assistant Comptroller*, Thomas J. Skuse.

Appraiser's Office—*Appraiser*, Frederick J. H. Kracke; *Chief Assistant in Charge*, Augustus K. Thomas. *Assistant Appraisers*, Herman W. Beyer, Ferdinand M. Becker, John J. Reed, Henry S. Patten, Michael J. Hart, John Eardley, Alfred O. Dresdner, and Joseph H. Acker.

Chief states of origin of the fruits and vegetables unloaded at New York City in 1928 were, with number of carloads—

Apples—New York, 3,682; Washington, 4,857; Virginia, 1,605; Oregon, 450; California, 416; West Virginia, 355.

Cabbage—New York, 2,226; Florida, 741; South Carolina, 587; Virginia, 556; Texas, 378.

Cantaloupe—Arizona, 1,000; California, 6,443; Colorado, 694; Maryland, 315.

Celery—Florida, 1,859; California, 1,328; New York, 1,164.

Lettuce—California, 4,275; New York, 1,750; Arizona, 1,163; Florida, 821.

Grapefruit—Florida, 2,857; foreign, 1,251.

Oranges—California, 6,688; Florida, 4,259; foreign, 993.

Grapes—California, 13,578; New York, 486; Pennsylvania, 173.

Lemons—California, 1,493; foreign, 2,358.

Onions—Texas, 1,747; Indiana, 1,407; California, 596; Ohio, 614; New York, 469.

Peaches—Georgia, 3,426; North Carolina, 1,169; California, 334; New York, 257; Pennsylvania, 237.

Pears—California, 3,201; Oregon, 1,995; Washington, 868; New York, 558.

Plums and Prunes—California, 627; Idaho, 493; Oregon, 340; New York, 84.

Potatoes—Maine, 8,897; New York, 3,746; Virginia, 2,950; Florida, 1,930; North Carolina, 1,340; South Carolina, 1,129.

Strawberries—North Carolina, 802; Virginia, 358; Louisiana, 299; Florida, 298; Maryland, 138.

Sweet Potatoes—Virginia, 988; Maryland, 419; New Jersey, 371; Delaware, 193.

Tomatoes—Florida, 2,116; foreign, 1,762; California, 948; Mississippi, 746; Tennessee, 471; Maryland, 410.

Watermelons—Florida, 1,203; Georgia, 1,000; South Carolina, 965; North Carolina, 364.

CITY MARKETS.

The new $16,000,000 Bronx Terminal Market, at 151st St. and the Harlem River, was publicly opened in May, 1929.

Washington Market is bounded by Washington, West, Fulton, and Vesey Streets.

West Washington Market is on Thirteenth Ave. at West, Bloomfield and Gansevoort Streets. Facing it is **Gansevoort Open Air Truck Market.**

There are markets under the Williamsburgh, Queensboro and Third Ave. bridges in Manhattan.

Wallabout Market, largest in the United States, is in Brooklyn, bounded by Flushing Ave.; Wallabout Creek, East and Clinton Aves.

BRITISH EMPIRE	13,226,749	446,726,752

(M)—British mandate. The mandates for the Kingdom of the Iraq (area, 143,240 square miles population estimated, 1923, 3,000,000) and Palestine (area, estimated, 9,000 square miles; population, estimated, 1926, 852,268) are not included. (a)—Exclusive of aborigines, estimated, 1923, at 60,000; (c)—Census of April, 1926; (e)—Official estimates 1923-26.

GOVERNMENT OF THE BRITISH EMPIRE.

The British Empire covers about one-fourth (13,226,749 square miles) of the world's habitable land surface; this excludes the Arctic regions. Its population in the aggregate, according to the best obtainable estimates, is some fifteen millions more than one-fourth of the inhabitants of the world—a total of 446,726,752.

This commonwealth of nations, the British Empire, has seven members of the League of Nations: The British Empire, Commonwealth of Australia, Dominion of Canada, India, Dominion of New Zealand, the Union of South Africa, and the Irish Free State.

The Capital of this vast empire is London.

The Statesman's Year Book, 1929, says: The municipal and parliamentary City of London, coinciding with the registration City of London, has an area of 675 acres. The registration County of London (the London for purposes of the census, the registration of births, deaths and marriages and for poor law purposes), coinciding with the administrative county, has an area of 74,850 acres, and nearly coincides with the collective area of the London parliamentary boroughs. The population of registration London, of the "Outer Ring," and of "Greater London" (the area covered by the City and the Metropolitan police), was:

	Area, Acres.	Population, 1921.	Est. 1927.
Registration London	74,850	4,484,523	4,541,000
Outer Ring"	368,599	2,995,678	3,255,353
Greater London"	443,449	7,480,201	7,796,353

Alderman Sir William A. Waterlow, K.B.E. is Lord Mayor for 1929-30.

The Ruling Sovereign is George V., the first of the House of Windsor, whose title is "by the Grace of God of Great Britain and Ireland and of the British Dominions Beyond the Seas, King, Defender of the Faith, Emperor of India." He was born June

3, 1865, the second son of King Edward VII. and Queen Alexandra, daughter of King Christian IX. of Denmark, and he succeeded to the throne on the death of his father May 6, 1910, and was crowned, June 22, 1911. He married, on July 6, 1893, Princess Victoria Mary, born May 26, 1867, daughter of the late H. S. H. Duke of Teck and H. R. H. Princess Mary of Cambridge. They have five living children. *His Heir*, H. R. H. Edward, Prince of Wales, born June 23, 1894; H. R. H. Prince Albert, Duke of York, born Dec. 14, 1895, married in Westminster Abbey, April 7, 1923, Lady Elizabeth Bowes-Lyon (born 1900), daughter of the Earl of Strathmore and Kinghorne (issue, a daughter, Elizabeth Alexandra Mary, born April 21, 1926); H. R. H. Princess Mary, born April 25, 1897, married Viscount Lascelles, K. G., son of the Earl of Harewood, Feb. 28, 1922, and who succeeded to the title on the death of his father, Oct. 6, 1929, (issue, George Henry Hubert, Viscount Lascelles, born Feb. 7, 1923, and the Hon. Gerald David, born Aug. 21, 1924); H. R. H. Prince Henry, born March 31, 1900, created Duke of Gloucester, March 31, 1928; and H. R. H. Prince George, born Dec. 20, 1902.

The serious illness of King George, beginning on Armistice Day, 1928, compelled the appointment by Royal Proclamation of a Council of State on Dec. 5 to exercise many of the powers of the Crown. It consisted of Queen Mary, the Prince of Wales, the Duke of York, the Archbishop of Canterbury, Dr. Lang, the Prime Minister, Stanley Baldwin, and the Lord Chancellor, Lord Havisham. On June 9, 1929, it was reconstituted with the new Prime Minister, Ramsay MacDonald and the new Lord Chancellor, Lord Sankey, replacing their predecessors. The King, during his convalescence, gradually increased his participation in public affairs, and he dissolved the Council of State in November.

The Premier is the Rt. Hon. James Ramsay MacDonald (born Oct. 12, 1866) Labor Premier from Jan. 22, 1924 to Nov. 4, 1924. He took office June 5, 1929, succeeding the Rt. Hon. Stanley Baldwin, who resigned after defeat at the polls May 30, 1929.

The Labor Cabinet—Ramsay MacDonald's second Labor Cabinet, announced June 7, 1929, is as follows, he being leader of the House of Commons with J. H. Thomas as deputy leader, and Lord Parmoor as leader of the House of Lords:

Prime Minister and First Lord of the Treasury, J. Ramsay MacDonald.
Lord Chancellor, Lord Justice Sankey.
Lord President of the Council, Lord Parmoor.
Lord Privy Seal and Deputy Leader of the House of Commons, James Henry Thomas.
Chancellor of the Exchequer, Philip Snowden.
Secretary of State for Foreign Affairs, Arthur Henderson.
Secretary of State for Home Affairs, John Robert Clynes,* Lord Passfield.
Secretary of State for the Colonies and Dominions (Sydney Webb.)*
Secretary of State for War, Tom Shaw*.
Secretary of State for India, Capt. Wedgewood Benn.
Secretary of State for Air, Lord Thomson.*
First Lord of the Admiralty, Albert V. Alexander.
President of the Board of Trade, William Graham.
President of the Board of Education, Sir Charles Phillips Trevelyan.*
Minister of Health, Arthur Greenwood.
Minister of Agriculture and Fisheries, Noel Buxton.*
Minister of Labor, Miss Margaret Bondfield.
First Commissioner of Works, George Lansbury.
Secretary for Scotland, William Adamson.*
Chancellor of the Duchy of Lancaster, Sir Oswald Mosley.
Minister of Transport, Herbert Morrison.

The ministers marked (*) were in the first Labor Cabinet.

In the Ministry, but not in the Cabinet, are:

Postmaster General, H. B. Lees-Smith.
Minister of Pensions, Frederick O. Roberts.
Attorney General, Sir William A. Jowitt.
Solicitor General, J. B. Melville.
Admiralty, Parliamentary and *Financial Secretary*, C. G. Ammon.
Civil Lord of the Admiralty, G. Hall.
Ministry of Agriculture, Parliamentary Secretary, C. Addison.
Air Ministry, Undersecretary of State, F. Montague.
Board of Trade, Parliamentary Secretary, W. R. Smith.
Mines Department, Parliamentary Secretary, Ben Turner.
Ministry of Dominions, Parliamentary Secretary, Arthur Ponsonby.
Colonial Office, Colonial Secretary, W. Lunn.
Board of Education, Parliamentary Secretary, Morgan Jones.
Foreign Office, Undersecretary, H. Dalton.

Treasury, Lords Commissioners, J. Allen Parkinson, Charles Edwards and Alfred Barnes.
Treasury, Financial Secretary, F. W. Pethick-Lawrence.
Home Office, Undersecretary, A. Short.
India Office, Undersecretary, Dr. Drummond Shiels.
Ministry of Labor, Parliamentary Secretary, J. J. Lawson.
Ministry of Transport, Parliamentary Secretary, Lord Russell.
War Office, Undersecretary, Lord De Lawarr.
War Office, Financial Secretary, E. Shinwell.

The First Sea Lord and Chief of the Naval Staff is Admiral of the Fleet Sir Charles E. Madden, Bt.

The Chief of the Imperial General Staff is Field Marshal George F. Milne.

The British Ambassador to the United States is Sir Esme Howard, G. C. M. G., K. C. B., born Sept. 15, 1863, who succeeded Sir Auckland Geddes, March 5, 1924. The selection of Sir Ronald Lindsay to succeed him on his retirement in Feb., 1930, was announced on Nov. 12. The diplomatic affairs of the entire British Empire in the United States are cared for by the Embassy at Washington. The Irish Free State has accredited to Washington a Minister Michael MacWhite, appointed March 14, 1929; Canada one, Vincent Massey, appointed Nov. 10, 1926; and the Union of South Africa one, Eric Hendrick Louw presented his credentials Nov. 5, 1929

The United States Ambassador to Great Britain is Charles G. Dawes, of Evanston, Ill., Vice-President of the United States 1925-29, Brigadier General, A.E.F., First Director, Bureau of the Budget.

Parliament is the legislative governing body for the empire. It consists of two Houses. The House of Lords is made up of the peers of the United Kingdom, to wit: the Royal Dukes, the Archbishops, the Dukes, the Marquises, the Earls, the Viscounts, thirty-six Bishops, and the Barons; also twenty-eight Irish peers elected for life, and sixteen Scotish peers elected for the duration of Parliament. The full membership of the House of Lords consists of about 740 members. There are about thirty women who are peeresses in their own right, but Lord Astor's third attempt to give them seats and votes in the House was defeated 125 to 80 on June 24, 1926. The House of Lords has a limited veto power only in legislation. A peer of the United Kingdom is ineligible to a seat in the House of Commons.

The House of Commons, elected May 30, 1929, and which met June 24, 1929, numbers 615 members elected by direct ballot in the several constituencies for the duration of Parliament. Of this House England has 492 members; Wales, 36; Scotland, 74; and Northern Ireland, 13. Clergymen of the Church of England, ministers of the Church of Scotland and Roman Catholic clergymen are disqualified from sitting as members, also certain Government officers, Sheriffs, and Government contractors. Members of the House of Commons are paid, since 1911, £400 a year.

Future sessions of Parliament will begin in October or November and be prorogued in July.

The Speaker is Capt. the Rt. Hon. Edward Algernon Fitzroy (Conservative) elected June 20, 1928, to succeed the Rt. Hon. J. H. Whitley, (resigned), and re-elected June 24, 1929.

The franchise was extended to women over 25 by the Act of 1918, with certain conditions. Parliament in 1928 extended the franchise to all women over 21, adding about 5,240,000 to the electorate of whom 1,500,000 are women between 21 and 25. The register for the 1929 election contained 25,092,848 names of voters of which 11,865,158 were men and 13,227,690 were women.

The popular vote compared with that of Oct. 29, 1924, was:

	1924.	1929.
Conservative	8,112,811	8,591,052
Labor	5,470,685	8,331,480
Liberal	2,909,122	5,257,536
Independent	106,589	260,711
Communist	41,072	50,614

The register in 1924 carried 21,730,988 names. The total vote recorded, 16,640,279, 76%. Thirty-one seats uncontested represented 1,076,466 voters unrecorded.

The composition of the House of Commons in the last four elections is as follows:

	Nov. 1922.	Dec. 1923.	Oct. 1924.	May 1929.
Laborites	142	192	152	189
Conservatives	347	257	412	260
Liberals	118	158	42	58
Independents	8	8	6	4
Constitutionalists	...	...	3	...
Nationalists	...	...	...	3
Prohibitionists	...	...	...	1

In 1924 the Conservatives won a seat for every 20,000 votes; the Laborites, 1 for every 36,000; and the Liberals, 1 for every 76,000; in 1929 the ratio was: Conservatives, 1 for every 33,000; Laborites, 1 for every 32,000; and Liberals, 1 for every 90,000. More candidates were put in the field than ever before—1,747 in all—599 Conservatives, 569 Laborites, 507 Liberals, and 39 Communists. Seven were returned unopposed, among them two Irish Nationalists, Joseph Devlin and J. S. Harbison from Northern Ireland, and a third Nationalist, T. P. O'Connor, father of the House and a member since 1880, from Liverpool.

Ten women sat in the last Parliament, and 13 of the 68 women candidates won seats in the new Parliament. Seven women were re-elected: Lady Astor, the Duchess of Atholl, and the Countess of Iveagh, Conservatives; and Miss Margaret Bonfield, Mrs. Susan Lawrence, Miss Jennie Lee, and Miss Ellen Wilkinson, Laborites. The new women members are: Miss Megan Lloyd-George, Liberal, (daughter of the former Prime Minister); Lady Cynthia Mosley, (daughter of the late Marquis Curzon, and wife of Sir Oswald Mosley, M. P.); Dr. Marion Phillips, Dr. Ethel Bentham, Mrs. Mary Agnes Hamilton, and Miss E. Picton-Turbervill, Laborites.

The political progress of the Labor Party is summarized in this table for the last nine elections:

General Election.	Seats Contested.	Members Returned.	Labor Vote.
1900	15	2	62,898
1906	50	29	323,195
1910 (Jan.)	78	40	505,690
1910 (Dec.)	56	42	370,802
1918	361	57	2,244,945
1922	414	142	4,236,733
1923	427	192	4,348,379
1924	514	151	5,487,620
1929	569	289	8,331,480

The Independent Labor Party was founded under the chairmanship of J. Keir Hardie, at Bradford, in 1893. At the general election of 1895, twenty-eight candidates contested seats and all were unsuccessful. In 1900, when two members were elected, the membership of the party numbered 375,931, affiliated trade unionists and socialists, the latter numbering 22,861. Three other members were returned to this Parliament in bye-elections. The name Labor Party was taken in 1906.

The Labor Party announced on Feb. 24, 1926, that a plebiscite of its constituent bodies had confirmed by a large majority the Liverpool resolutions excluding Communists from membership in the party.

The Dominions were defined by the Imperial Council of 1926 (See the World Almanac for 1927, pages 177-179) as "autonomous Communities within the British Empire, equal in status, in no way subordinate one to another in any aspect of their domestic or foreign affairs, though united by a common allegiance to the Crown, and freely associated as members of the British Commonwealth of Nations." The Conference further laid down that, as a consequence of this equality of status, the Governor-General of a Dominion "is the representative of the Crown, holding in all essential respects the same position in relation to the administration of public affairs in the Dominion as is held by His Majesty the King in Great Britain," and that "it is the right of the Government of the Dominion to advise the Crown in all matters relating to its own affairs." The Conference also recognized certain treaty-making rights as appertaining to the Dominions.

Up to July, 1925, all sections of the British Empire outside of Great Britain and Ireland were dealt with by the Colonial Office. In that month a new Secretaryship of State, for Dominion Affairs, was created. The Dominions Office was set up, taking over business connected with the self-governing Dominions, the self-governing Colony of Southern Rhodesia, and the South African territories (Basutoland, Bechuanaland Protectorate, and Swaziland), including business relating to the Imperial Conference.

The Colonial Office now deals with the administrative work of the Colonies, Protectorates, and Mandated Territories other than those for which the Dominions Office is responsible.

OWED TO GREAT BRITAIN.

On March 31, 1929, the outstanding British Government loans to the Dominions were:

Australia	£82,790,000
New Zealand	27,244,000
South Africa	9,625,000
Newfoundland	400,000
Trinidad	446,000
Jamaica	53,000
	£120,558,000

The funded Allied war debts were:

Italy	£262,500,000
Roumania	30,950,000
Portugal	23,300,000
Serb-Croat-Sloven Kingdom	32,450,000
Greece	23,100,000
	£372,300,000

Funded relief and reconstruction loans were:

Belgium	£9,000,000
Belgian Congo	3,600,000
Poland	4,484,000
Roumania	2,200,000
Estonia	235,000
Hungary	22,000
Czechoslovakia	125,000
Serb-Croat-Sloven Kingdom	2,038,000
Austria	9,039,000
	£30,743,000

Other funded loans were:

Latvia	£1,269,000
Greece	76,000
Poland	106,000
Czechoslovakia	620,000
Roumania	25,000
Estonia	917,000
Lithunia	90,000
	£3,103,000

The loans that have not yet been funded are:

Allied war debts—Russia	£934,037,000
France*	722,018,000
	£1,656,055,000

Relief and reconstruction loans:

Armenia	£140,000
Armenia (other debt)	1,104,000
	£1,244,000

The total capital amount due Great Britain from other countries detailed above is £2,184,003,000.

*Funding agreement ratified by France but not yet ratified by Great Britain.

1928 Provisional	1,196,940,354	723,427,455	120,352,491	843,779,946	2,040,720,300

Receipts from customs duties on imports for the fiscal year 1928-29 were £118,972,000 (111,620,000 in 1927-28) of which £59,086,000 was from tobacco; £13,912,000 from sugar; £5,740,000 from tea; £6,670,000 from spirits; £4,248,000 from wine; £4,978,000 from beer; £2,077,000 from matches; £709,000 from cocoa; £198,000 from coffee; £643,000 from dried fruits; £2,470,000 from motor cars and motorcycles; £614,000 from clocks and watches; £239,000 from musical instruments; £192,000 from cinematograph films; £4,598,000 from silks and artificial silks; £633,000 from key Industry duties; £290,000 from hops; £230,000 from lace and embroidery; £101,000 from cutlery; £584,000 from gloves; £552,000 from packing and wrapping paper; and £57,000 from translucent pottery.

Excise receipts in 1928-29 total £134,000,000. The chief items were: £38,933,000 from spirits; £70,874,000 from beer; £203,000 from British wine; £355,000 from table waters; £1,491,000 from sugar; £1,888,000 from matches and mechanical lighters; £1,450,000 from silk and artificial silk; £6,033,000 from entertainments; £2,245,000 from betting; £4,439,000 from liquor licenses (duties); £137,000 from liquor licenses (monopoly values); £529,000 from other licenses; £1,394,000 from medicines, etc.; and £367,000 from railway duty.

From April 1, 1920, the direct foreign trade of the Irish Free State has been excluded.

TONNAGE AT BRITAIN'S HOME PORTS.

The net tonnage of the British and foreign vessels in foreign trade that entered and cleared with cargoes at the ports of the United Kingdom during sixteen years was:

Year.	Entered with Cargoes.			Cleared with Cargoes.		
	British.	Foreign.	Total.	British.	Foreign.	Total.
	Tons.	*Tons.*	*Tons.*	*Tons.*	*Tons.*	*Tons.*
1914	28,928,893	14,131,890	43,060,783	32,515,814	23,452,755	55,968,569
1915	22,861,738	10,862,166	33,723,904	20,380,530	19,148,832	39,529,362

1923	33,079,445	18,012,594	51,092,039	42,139,130	28,551,848	70,690,978
1924	36,856,130	18,513,610	55,369,740	41,732,088	23,566,671	65,298,759
1925	34,597,114	17,524,710	52,128,700	37,148,012	20,878,931	58,028,317
1926	43,523,411	20,657,959	64,181,370	33,858,126	13,094,297	46,952,423
1927	40,421,205	20,168,177	60,589,382	42,363,239	21,134,492	63,497,731
1928	40,220,157	20,116,564	60,336,721	43,377,782	21,070,769	64,448,551

United States ships with cargoes entering British ports totaled 486,897 tons in 1918, 1,625,498 tons in 1919, 2,366,123 tons in 1920, 2,750,739 tons in 1921, 2,915,639 tons in 1922, 2,871,137 tons in 1923, 2,746,725 tons in 1924, 2,540,657 tons in 1925, 2,679,629 tons in 1926, 2,797,532 tons in 1927, and 3,210,262 tons in 1928.

As from April 1, 1923, trade between Great Britain and Northern Ireland on the one hand, and ports in the Irish Free State on the other hand, has been regarded as *foreign* trade. From the same date the trade of ports in the Irish Free State with ports outside Great Britain and Ireland ceased to be recorded in the navigation returns of the United Kingdom.

BRITISH PRIME MINISTERS SINCE 1801.

Henry Addington	1801	Lord John Russell	1846	Marquis of Salisbury	1886
William Pitt	1804	Earl of Derby	1852	Mr. Gladstone	1892

Viscount Melbourne	1835	Marquis of Salisbury	1885	Stanley Baldwin	1924
Sir Robert Peel	1841	Mr. Gladstone	1886	J. Ramsay MacDonald	1929

THE UNITED KINGDOM.

AREA, 94,284 square miles; England, 50,874; Wales, 7,466; Scotland, 30,405; Northern Ireland 5,237; Isle of Man, 227; Channel Islands, 75.

POPULATION, census of 1921, 44,147,601: England, 35,678,530; Wales, 2,206,712; Scotland, 4,882,288; Northern Ireland (1926), 1,256,322; Isle of Man, 60,238; Channel Islands, 89,614.

The United Kingdom, or British Isles, lie off the northwest corner of Europe, with the North Atlantic Ocean on the north and west, the North Sea on the east and the English Channel separating it from the mainland on the south. The Straits of Dover, 18 miles wide, divide it from France. The northern end of Scotland lies due west from the southern end of Norway.

The climate of the British Isles is equable, mild and somewhat warmer than that of the continent opposite, because of the Gulf Stream modifying the temperature of the Isles, which is mean at 49 degrees. Rainfall is abundant, averaging 34 inches annually, but is seldom heavy at a given time, so that the precipitation covers longer periods, and fogs often prevail in many parts, "London Fog," holding much soot in suspension, being peculiarly dense at times.

The coastline is tortuous, giving very many harbors for shipping, and numerous rivers up which deep sea craft may go. The northern ends are more rugged than the southern. Peculiar geological features are the chalk formation along the English Channel, the chalk stratum running under the waters of the channel into France; and the same "hardpan" sub-stratum recurring as in many parts of France.

The soil is of varied natural fertility. It is more sterile in the north, notwithstanding the figures show that the Scotch have attained a relatively high per acre production by intensive cultivation. But centuries of tillage have rendered necessary the elaborate and large use of artificial fertilizers.

The prevalent precipitation of moisture, together with the mild climate, has induced profuse growth of vegetation of all sorts. The Isles were naturally covered with forests, which have been largely cut off to accommodate so large a population on so small an area, a total less than the American State of New Mexico, and only about twice that of all New England, with a population of 464.3 to the square mile.

AGRICULTURE A GREAT INDUSTRY.

England, Wales and Scotland (including the Isle of Man) have a total land area of 56,391,000 acres. Distribution of the agricultural land in 1928, in thousands of acres, was:

	Woods, etc.	Grazing	Pasture.	Arable.
England.....	1,697	3,535	13,266	9,473
Wales.....	187	1,643	2,131	635
Scotland.....	852	9,708	1,523	3,133
Isle of Man..	1	35	22	61

Land actually under the plow has decreased steadily,—in 1928 over 1927, 145,700 acres; in 1927, 94,020; in 1926, 4,500; in 1925, 441,552; in 1924, 173,000; in 1923, 129,378; and in 1922, 308,000. There were 803,338 agricultural workers in 1925. The value of produce sold off the farms in 1923 (excluding that consumed in farmers' households) was estimated at £258,750,000. The country imported grain and flour to the value of £97,637,000 in 1928, (£110,969,000 in 1927); and food for animals—£9,186,000 (£8,418,000 in 1927).

The import of wheat alone was about 52,787,000 cwt. from other parts of the Empire and about 50,791,000 cwt. from foreign countries. The great wheat sources were: United States, 23,662,000 cwt.; Canada, 41,006,000 cwt.; Argentina, 24,399,000 cwt.; Australia, 10,233,000 cwt.; and British East India, 1,548,000 cwt.

The production of wheat in Great Britain in 1928 was 5,940,000 quarters from 1,463,000 acres; and in 1927, 6,817,000 quarters from 1,690,000 acres.

The aggregate number of holdings in Great Britain in 1928 was: From one to five acres, 74,456; from five to fifty acres, 185,672; from fifty to 300 acres, 128,384; over 300 acres, 12,383; total, 400,895. Under the Land Settlement Scheme, between December, 1918 and July 31, 1922, 17,511 applicants were provided with small holdings aggregating 247,000 acres. The number of holdings from one to five acres in Scotland was 16,787; and from five to fifty acres, 33,553; total, 50,340; grand total, under fifty acres for Great Britain, 310,468.

The census of farm animals in Great Britain in June, 1928, was: Horses, 1,204,198; cattle, 7,239,781; sheep, 23,968,314; and pigs, 3,166,547. There were in 1927 about 4,000,000 dogs, of which 250,000 were pedigreed.

MANUFACTURING AND TRADE.

Great Britain's strength, however, is largely in manufacturing, mining and trade. Coal, cotton textiles, woolen and worsted tissues, iron and steel, machinery and vehicles (including locomotives and shipping) are the key industries supplying the bulk of the exports. The figures for the exports of these groups for 1926, 1927 and 1928 in thousands of pounds sterling were:

Exports.	1926.	1927.	1928.
Coal.....	19,138	45,531	39,062
Cotton Goods.....	154,343	148,795	145,304
Woolen Goods.....	51,416	56,756	56,897
Other textiles.....	56,021	55,299	58,053
Iron and steel.....	55,077	69,429	66,802
Cutlery, machinery, etc.	66,528	70,654	70,628
Vehicles (incl. ships)...	30,583	35,414	46,965

Raw cotton imports from the United States totalled 1,694,000 bales in 1927; 2,308,000 in 1926; 2,457,000 in 1925 and 1,986,000 in 1924. Exports of cotton cloth aggregated 4,117,683,000 square yards in 1927 as compared with 3,834,482,200 in 1926 and 4,435,617,800 in 1925.

India is still far and away Great Britain's best customer for cotton goods, with China second, Australia third, Egypt fourth and Switzerland fifth, in 1923. Canada, Japan, the United States, Australia and China, in that order, were her best customers for woolen goods.

Great Britain ranked second to the United States in the world's production of pig iron and of steel ingots and castings in 1923, but Germany, which had had that rank in 1922, regained it in 1924. The production of pig iron in 1928 was 6,611,300 tons; in 1927, 7,416,000 tons; in 1926, 2,458,000 tons; in 1925, 6,236,000 tons; in 1924, 7,319,000 tons; in 1923, 7,440,500 tons; in 1922, 4,902,000 tons; and in 1913, 10,260,000 tons. The production of steel in 1928 was 8,525,100 tons; in 1927, 9,097,100 tons; in 1926, 3,596,100 tons; in 1925, 7,518,000 tons; in 1924, 8,250,100 tons; in 1923, 8,481,800 tons; in 1922, 5,881,000 tons; and in 1913, 7,663,900 tons.

The industry was hard hit by the coal strike in 1926. But 5 furnaces were in blast in September and October, 1926. Great recovery was made in 1927; at the end of January, 152 furnaces were in blast compared with 144 January 31, 1926; and 341 open hearth furnaces were lighted compared with 281 in 1926.

Coal mining, after a disastrous year marked by a three months' strike in 1921, showed an improvement in 1924, as seen by these figures, only to suffer further disaster by the strike of 1926:

Year.	Production. *Tons.*	Exported. *Tons.*	Value of Exports.
1920.....	229,532,000	24,931,853	£96,297,614
1921.....	163,500,000	24,660,552	42,951,591
1922.....	252,000,000	64,198,384	72,592,500
1923.....	278,501,000	79,450,000	99,835,646
1924.....	273,260,000	61,651,273	52,067,600
1925.....	248,328,000	50,837,118	50,476,211
1926.....	126,275,521	20,596,372	19,138,000
1927.....	255,264,615	51,149,193	45,530,795
1928.....	241,590,100	50,055,118	30,062,000

Relief given to the coal industry by a reduction of taxation in 1928 is estimated to be about £4,500,000 a year. On June 30, 1929, there were about 170,000 miners out of work.

FOREIGN TRADE.

The volume of Great Britain's re-exports should be noted because of her position as a vast clearing house through which the products of her dominions and colonies (rubber from the East Indies and Malaya, wood from Australia and New Zealand, wheat from Canada and Australia, cotton from Africa and India, gold from Africa) reach the world at large.

Of the imports in 1927, 44 per cent. were of food, drink and tobacco, as against 40 per cent. in the last pre-war year, 1913; 29 per cent. were of raw materials as against 35 per cent. in 1913, and 27 per cent. were of manufactured articles, as against 26 per cent. in 1913.

The value of these imports for the last four years, excluding bullion, in thousands of pounds, was:

Imports.	1925.	1926.	1927.	1928.
Food, etc...	571,613	530,498	538,527	531,913

Total.....	154,411	125,566	122,953	120,352
Grand Total...	2,250,355	2,020,323	2,050,375	2,040,719

The so-called invisible items for 1927 were estimated by the *British Board of Trade* to be: Net income from overseas investment £270,000,000 (£270,000,000 in 1926); net income from shipping; £120,000,000 (£120,000,000 in 1926); commissions, £63,000,000 (£60,000,000 in 1926); other services, £15,000,000 (£15,000,000 in 1926); total, £488,000,000. Deducting this from the excess import charge of £392,000,000 leaves a surplus balance of £96,000,000 as compared with a debit balance of £12,000,000 in 1926. The invisible balances in recent years (000 omitted) are:

	Visible Debit.	Invisible Credit.	Balance.
1927	£392,000	£488,000	+£ 96,000
1926	477,000	465,000	— 12,000
1925	395,000	449,000	+ 54,000
1924	349,000	435,000	+ 86,000
1923	220,000	373,000	+ 153,000
1922	170,000	325,000	+ 155,000
1920	343,000	595,000	+ 252,000
1913	158,000	339,000	+ 181,000
1907	142,000	280,000	+ 138,000

Sir Robert Kindersley, President of the National Savings Committee, estimated that British capital invested abroad as of May 1, 1928 totals £3,990,000,000, an increase of £490,000,000 over 1913; Sir Robert estimated that in 1927 actual new savings in Great Britain amounted to £86,000,000. New foreign and overseas capital issues in 1928 amounted to £143,384,000. New capital issues for domestic purposes totaled £219,135,000.

The prevailing policy of the British Empire for the greater part of the last century has been not to impose trade barriers on entrance of goods into the British Isles or the outlying holdings of the empire. This free trade policy has been modified by certain attached countries, which at times have even imposed import duties on goods from the mother country. And since the World War, under the dislocation of world industry and commerce and the unsettlement of the fiscal affairs of the Allies and their enemy countries, certain preferential arrangements have been made, and some barriers have been erected.

The United States in 1927 supplied 16.4%, £200,353,379, of all British imports, as against 18.4% in 1926, and 18.6% in 1925; and took 6.4% of all British exports in 1927, as against 7.5% in 1926, and 6.7% in 1925. Of total imports the percentage obtained from the British Empire in 1927 was 30.1%; in 1926, 30.3%; and in 1925, 32.5%; while of the total value of exports the percentage that went to the British Empire was 46% in 1927; 48.6% in 1926; and 43.3% in 1925.

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922 (inc. Irish Free St.).	$855,825,991	$356,867,428
1923 (inc. Irish Free St.).	882,321,257	404,071,815
1924 (inc. Irish Free St.).	982,034,509	366,476,902
1925 (exc. Irish Free St.)	1,033,856,369	412,704,535
1926 (exc. Irish Free St.)	972,384,840	383,189,536
1927 (exc. Irish Free St.)	840,058,638	357,930,937
1928 (exc. Irish Free St.)	847,276,661	348,434,661

RAILWAY CONSOLIDATICN.

The railways which had been taken over by the Government during the war were returned to their owners under the Decontrol Act in August, 1921. The Railways Act of 1921 provided for a consolidation of the existing 120 systems into four large geographical systems, to secure uniformity, efficiency and economy of operating conditions. These four groups are:

The Southern Railway Company (Group I), consisting of the London & South Western, the London, Brighton & South Coast, the South Eastern, the London, Chatham & Dover, and the South Eastern & Chatham, as the five amalgamated "constituent" companies that have absorbed fourteen smaller "subsidiary" lines, in total a main-line trackage of 2,200 miles and a capital of £148,000,000; and 90,000 stockholders.

The Great Western Railway Company (Group II), comprising the Great Western, the Alexandra Docks and Railways, Barry, Cambrian, Cardiff, Rhymney and Taff Vale constituents, which have absorbed twenty-eight subsidiary lines, a total main-line trackage of 3,800 miles and capital of £146,894,466, and 135,108 stockholders.

The London, Midland & Scottish Railway Company (Group III), composed of the London & North Western, Midland, Lancashire & Yorkshire, North Staffordshire, Furness, Caledonian, Glasgow & South Western, and Highland constituents amalgamated and absorbing twenty-seven smaller companies, with a total trackage of 7,790 miles and capital of £406,429,175, and 308,028 stockholders; and

The London & North Eastern Railway Company (Group IV), made up of the North Eastern, Great Central, Great Eastern, Great Northern, Hull & Barnsley, North British, and Great Northern of Scotland, seven constituents amalgamated and absorbing twenty-six other subsidiary roads, this group totaling about 6,590 miles of main track, having a capital of £364,871,121, and 252,961 stockholders. The total paid up capital of the four great companies being £1,066,195,762; and the total number of stockholders being 786,097.

Grand total of mileage (1927) is 20,400 miles.

The first and last groups were in operation from Jan. 1, 1923. Consolidation was completed on Oct. 1, 1923. The rolling stock of all lines is in process of modernizing and standardization; larger and more powerful locomotives built, also larger freight cars. New non-stop, long distance runs have been introduced and long runs speeded up. In 1928, 1,196,420,000 passengers were carried, and the freight traffic exceeded 325.4 million tons.

For the four groups an entirely new issue of corporate securities superseded the numerous previous individual issues; instead of some two hundred separate railway stocks on the market, the Stock Exchange now deals in less than forty. In place of some 1,350 railway directors, requiring the expenditure annually of some £200,000 in fees, there are now 102 positions only (21 in the Southern Group 25 in the Western, 28 in the London-Midland, and 28 in the North Eastern for the present).

The act further provided for a periodical revision of the traffic charges through the Railway Rates Tribunal, a permanent board of three "experienced" men, the chairman, a lawyer, one in commercial affairs and the other in the railway business, appointed for seven years. This court has already reclassified merchandise into twenty-one groups. Substantial reductions in freight rates were made in 1922 and passenger fates were cut to first-class 2½d. per mile, and third-class 1¼d. per mile, making a uniform basis of 50 per cent. over the pre-war rates. The act stipulates that charges shall be levied sufficient to provide annual net standard and revenue equivalent to the net revenue of 1913, allowance being made for additional capital outlay. In this way the rate fixing powers of the Tribunal are legally limited. If a surplus developes, 20 per cent. goes to the companies and 80 per cent. must be applied under supervision of the Tribunal to betterments or reduced rates.

The British Railways Rate Tribunal reported their decision on July 1, 1927, to take effect on Jan. 1, 1928. The standard basis of goods freight and of mineral rates is to be 60% above the base rates (pre-war), prevailing Jan. 14, 1920. The present ordinary fares (50% over pre-war rates) of 2½ d. (5 cents) a mile first class, and 1½ d. (3 cents) a mile third class, were authorized as standard. The fixed gross revenue of the four railway groups has been set at £196,632,901, and the standard revenue at £50,057,847. Of the standard revenue, the figures for the four railways are: London Midland & Scottish, £20,326,622; London & North Eastern, £14,787,733; Great Western, £8,312,013; and Southern, £6,631,479. Those standard charges had been provisionally approved on Dec. 31, 1926.

The third major provision of the act aims to give easy and final decision to railway labor matters by a definite procedure from local through to national wages boards. There were 677,148 railway employees March 31, 1928 as against 683,077 in 1927, 689,264 in 1926, and 702,062 in 1925.

During 1928 the railway companies failed to earn the standard revenues fixed by the tribunal by a sum of £9,057,732. The deficiencies were: London, Midland and Scottish, £4,055,801 (20%); London North Eastern, £3,509,914 (25%); Great Western, £1,252,890 (15.5%); and Southern, £237,067 (3.5%). For 1928 the aggregate receipts of the four railways were £194,000,000 (£202,400,000 in 1927); expenditures, £154,100,000 (£160,000,000 in 1927); and net income, £39,900,000 (£41,800,000 in 1927). The operating ratio was 79.4% (79.3% in 1927). Owing to a decline in revenue in 1928, a cut of 2½% in

all wages and salaries was agreed to by the unions; it was estimated to bring a saving of £3,000,000 a year.

USE OF ELECTRICITY.

In 1926 the amount of electricity generated in Great Britain was about 7,000,000,000 kilowatt-hours, of which 5,069,000,000 was sold by public utilities, the balance being required for railroad, tramway, and traction purposes; 69.3% was used for power, while 20.3% was consumed for lighting and domestic purposes. Steam plants produce 98.09% of the power generated, with an average fuel consumption of 2.55 pounds per K.w.h.

The revenue was £40,914,278 in 1924-25. The working expense, including cost of energy purchased, but excluding capital charges, was £23,409,893. The average cost per kilowatt-hour was 1.01 d., and the average revenue per kilowatt-hour was 1.76 d.

The electrical supply district of London covers an area of 737 square miles and has a population exceeding 8,000,000. There are 44 municipal companies and 45 private companies in this district. The kilowatt-hours sold in 1924-25 amounted to 964,924,072, an increase of 14.2% over 1923-24. The revenue amounted to £20,713,154. The generating plant capacity at the end of the year was 843,517 kilowatts, an increase of 12.7% over 1923-24, and the net capital expenditure amounted to £48,201,845.

Great Britain has approximately 10,000,000 homes, of which 1,400,000 or 14% are wired for electricity, as compared with the United States figure of 26,000,000, of which 14,500,000, or 55.8%, are wired for electricity.

The installation of telephones had on Dec. 31, 1927 reached 1,635,000, or one to every 27 inhabitants.

The British Isles have many canals—total mileage 4,673, of which 3,641 are in England and Wales, 194 in Scotland, and 848 in Ireland.

The merchant marine of Great Britain, July 1 1929, included 7,381 steamers of 18,123,887 net tons; 963 motor ships of 1,922,383 net tons; and 389 sailing ships of 120,061 net tons; total, 8,225 ships of 20,166,331 net tons.

In harbor development the United Kingdom has made forward strides. The improvement of the banks of the Tasmee River, which flows through London, has been extensive. Contracts for new docks and improvements at Tilbury, to cost about £4,000,000, were let by the Port of London Authority in July, 1926, to be completed in five years. Shipping using the Port of London in 1927 reached a record tonnage of 52,576,755 net tons.

Tidal gates for the Liverpool docks and piers are not duplicated. They enable the accommodation of deep draught craft regardless of the stages of the tides. A ship canal, 35½ miles long, makes Manchester the third seaport of the Kingdom. Constructed in 1887-94, at a cost of £17,000,000, it accommodates steamers up to 12,550 tons. The merchandise paying toll in 1927 was 6,359,420 tons, a record, and the traffic receipts were £1,576,237.

Southampton is the first passenger port of the kingdom. In 1925, 122,703 left from that port, exceeding Liverpool by 10,000; and arrivals were 76,656, 6,000 more than at Liverpool.

THE TRADE UNIONS.

The coal strike of 1926 began on May 1, was followed by the general strike, May 4-12, and settlement became general by the end of November. (See The World Almanac for 1927, pp. 564-5.) The Trade Unions on Jan. 21, 1927, approved by a majority of 1,745,000 votes, the conduct and the calling off of the general strike by its General Council.

As outcome of the strike was the Conservative Government's Trade Union bill fought over in Parliament for two months in the spring and finally passed by invoking closure for the first time since 1887, on June 25 by a majority of 218. The act, somewhat moderated in debate, establishes as fundamental principles that a general strike is illegal and no man shall be penalized for refusing to take part; that intimidation is illegal, that no man shall be compelled to subscribe to the funds of any particular party unless he so desires; and that civil service employees must give undivided allegiance to the State. Associations of employers were placed on the same basis as labor unions with reference to lockouts, political levies, and other activities of industrial warfare.

Membership in Trades Unions totaled 3,673,144 in 162 organizations at the 60th Trade Union congress Sept. 3, 1929. The number reported at the congress of 1928 was 3,814,842. The high mark was 6,996,000 in 1920. The government group of 13 organizations with 167,916 members in 1927 was reduced to 6 groups with 29,688 members because of withdrawal of Post Office workers and others on account of the Trade Disputes Act of 1927. The congress of 1928 endorsed by a vote of 3,075,000 to 556,000, the policy of industrial cooperation between employers and workmen and instructed its general council to proceed with discussion with Lord Melchett (Sir Alfred Mond) and his colleagues, on all questions of industrial reorganizations and to take steps with the Confederation of Employers' Organizations to establish a National Industrial Council and machinery for the settlement of disputes. The congress of 1929 voted for the continuance of this conference. It also urged resumption of diplomatic relations with Russia, as it would stimulate trade.

The British Trades Union Congress on Sept. 8, 1927 voted, 2,551,000 to 620,000, to sever relations with the Soviet Trade Union so long as the present Soviet attitude and policy were maintained; and declared unalterable opposition to the Trade Union bill.

The Labor party at its conference Oct. 3, 1927, took action in excluding the Communists. The registered membership of the British Communist party in September 1927 was 7,300, having dropped from over 10,000 in 1926. The British Cooperative Societies, numbering about 1,450, with a membership in the Union Congress, June 7, 1927, voted 1,960 to 1,843 to join the Labor party.

THE LIQUOR TRADE.

Great Britain's drink bill in 1926 was £301,300,000 (£315,000,000 in 1925); this included 12,869,000 gallons of whisky (14,010,000 in 1925); 26,600,000 barrels of beer (27,600,000 in 1925); and 16,492,000 gallons of wine (15,840,000 in 1925). The tax on spirits was 72s.6d. per gallon as compared with 14s.9d. before the war. The customs and excise duties in 1926-27 on spirits amounted to £43,531,000, on beer £54,187,000, and on wine £4,331,000. Northern Ireland's drink bill in 1926 was about £5,000,000, a decrease of about £3,000,000 from 1926; and the Irish Free State £16,500,000, a decrease of about £500,000. British exports of spirits in 1926 was 6,516,804 proof gallons; in 1925, 7,360,886, and in 1924, 8,372,986.

Under the Housing Acts of 1919, 1923 and 1924, the number of houses built in England and Wales since the armistice up to March 30, 1929, was 1,274,532, of which 828,792 were built with State assistance and 445,740 without State assistance. The total payments of Exchequer subsidy have been £74,204,633 ($361,376,503). The subsidy for 1928-29 was £10,669,974. The subsidy houses built by private enterprises was discontinued Sept. 30, 1929. In Scotland from 1919 to Dec. 31, 1927, the number of houses built with Government assistance was 69,966 including 2,228 steel houses.

UNEMPLOYMENT AND THE DOLES.

Unemployment continues the great economic and political problem. The number of registered workers is slightly below 12,000,000, covered by the Unemployment Insurance Act. This number does not include agricultural workers, domestic employees, national or local government employees or workers, who receive regularly more than £250 annually. The record of the unemployed (000 omitted) is:

	1924.	1925.	1926.	1927.	1928.	1929
Jan. 31..	1,320	1,237	1,201	1,332	1,199	1,434
April 30.	1,087	1,034	982	1,022	1,171	1,198
June 30	1,049	1,099	1,640	1,005	1,239	1,176
Aug. 31	1,191	1,606	1,550	1,076	1,367	1,190
Oct. 31	1,247	1,295	1,516	1,132	1,375	....

The 1,190,000 unemployed on Aug. 26, 1929 were: Men, 899,000; women, 218,000; boys and girls 73,000.

The Minister of Labor reported that unemployment had varied from 1,936,081 in January, 1922, to a minimum of 978,200 in May 23, 1927, the lowest in fact since 1920. In June 1926, the peak for three years, with 1,669,000 out of work, the miners on strike were not included. The previous peak was June 24, 1921, when 2,044,639 were out of work, of which 1,459,639 were men. The total amount paid in doles by the Government in 1926 was about £13,207,000, and in 1925, was £4,726,310.

The average number of unemployed and approximate payments to them for six years was:

Year (Ending March 31)	Ave. Unemployed.	Approximate Payments.
1920-21	1,130,000	£34,000,000
1921-22	1,750,000	52,850,000
1922-23	1,360,000	41,680,000
1923-24	1,203,000	35,971,000
1924-25	977,000	47,216,500
1925-26	1,046,800	50,201,758
Total Payments		£261,919,258

The total amount paid from the rates in England and Wales in 1925-26 was £31,400,000; and in Scotland £3,678,000. Total £35,078,000.

The total number of persons (excluding lunatics in asylums, those receiving medical relief only, and

casuals, totaling approximately 125,000) in receipt of Poor Law relief (domiciliary and institutional) in England and Wales at the end of June, 1928, was 1,088,000 (1,171,000 in June 1927, and 618,000 in June 1914). This is 277 to the 10,000 of the estimated population.

In 1926 under the workmen's compensation and employers liability acts in seven large groups of industries employing 7,001,795 persons in 2,345 fatal cases £674,611 was paid and in 368,563 non-fatal cases £5,332,310, a total of 370,908 cases and £6,006,921. In 1925 in 3,030 cases £864,726 was paid, and in 473,045, £5,778,204 was paid. The falling off in 1926 was due to the coal stoppage for in mining alone cases fell from 214,405 in 1925 to 131,231 in 1926.

Pension services of all kinds carried in the budget estimates totaled £127,459,000 in 1926-27, and £129,246,000 in 1927-28. Of this war pensions were £63,957,000 in 1926-27 and £61,877,000 in 1927-28; old age pensions, £29,983,000 and £32,746,000, (with £4,000,000 additional in contributory account each year); and State employees, teachers and police, £29,707,000, and £30,623,000. The number of war pensioners on March 31, 1926 was approximately 1,794,000.

OLD AGE PENSIONS.

The total number of pensions payable under the Old Age Pensions Acts March 25, 1927, was 1,031,575 (men, 361,140; women, 670,435). To this must be added 166,132 pensioners under the Widows', Orphans' and Old Age Contributory Pensions Act of 1925, making a total of 1,197,707. Of these, 1,175,259 were payable at the full 10s. rate, and 22,448 at other rates, from 8s. to 1s. a week. The total amount paid in pensions during the year was approximately £29,983,000.

The number of applications for pensions during the year was: contributory, 234,898; non-contributory, 163,377. Claims rejected and pensions revoked during the year totalled 46,235, of which 10,329 were on account of age, 14,316 on account of poor relief, 19,338 on account of means, and 2,252 for other reasons.

The number of non-contributory pensioners of whose death information reached the pensions officers was 117,443.

Old age pensions were introduced into Great Britain by the Earl of Oxford and Asquith when Prime Minister in 1908 and were later extended by Lloyd George in his famous budget as Chancellor of the Exchequer. These pensions ran up to five shillings weekly for persons who had reached the age of seventy and about 1,000,000 pensioners were on the rolls at a cost to the state of about £12,000,000 a year. These pensions were raised until every British subject and resident of the United Kingdom over seventy years of age, under certain qualifications, whose yearly means do not exceed £50 (broadly speaking $250) was entitled to a pension. The weekly amount was ten shillings if the pensioner's yearly means did not exceed £26 5s; above that sum the pension decreased by 2s for every £5 5s until at £47 5s it became 1s a week. On March 31, 1924, there were 916,771 old pensions payable, 326,805 to men and 589,966 to women. The budget carried for old age pensions £23,300,000 in 1923-24, and £24,201,000 in 1924-25. The provisions of the act were greatly expanded by Parliament in 1925 on the initiative of Chancellor of the Exchequer Churchill, who made it a feature of his budget. The new act in effect Jan 4, 1926, applies to all now insured under the National Health Insurance scheme, that is to 70 per cent. of the population of the United Kingdom.

It will provide pensions for widows, orphans and persons after the age of sixty-five. These pensions are to be paid from a fund to which employers and employed alike will contribute four pence extra for men and two pence for women, these contributions rising by stages to seven pence and three and one-half pence.

Widows of all men insured under the new plan dying after 1924, will receive ten shillings weekly for life unless they remarry, the eldest child five shillings and the other children three shillings weekly till they reach the age of fourteen. All restrictions and means of tests on insured persons over seventy will be abolished and the beneficiaries of the new scheme will receive ten shillings weekly after reaching the age of sixty-five.

All domestic servants and agricultural laborers will come under the new plan. The only workers who do not are those earning more than £250 a year or who belong to excepted occupations, such as the police force and civil service, schoolmasters and the like, who have their own scheme of insurance superannuating.

The additional burden on industry is estimated at £10,000,000 yearly, and the amount of the annual pension liability would be capitalized at $3,000,000,000.

COMPULSORY HEALTH INSURANCE.

Compulsory insurance against loss of health and for the prevention and cure of sickness is provided under the National Insurance Acts (1911-1921) under the Ministry of Health. Estimated number insured July, 1920, 15,850,000, of which 10,850,000 were men and 5,000,000 women. The average payments for nine years (1913-21) in England and Wales for sickness benefit was: Men, £3,368,620; women, £1,548,933; for disablement benefit: Men, £840,100; for women, £447,710. Average annual time lost: Men, 9,163,913 weeks; women, 5,212,461 weeks; total, 14,476,000 weeks (or 278,000 years).

British subjects emigrating to British countries from the United Kingdom in 1921 were 130,000; in 1922, 113,000; to foreign countries, in 1921, 43,000; in 1922, 40,000. Under the British Government's overseas settlement plan, which was in operation from April, 1919, to Dec. 21, 1922, 82,196 British ex-service men and women with their children (37,199 men, 21,672 women and 23,325 children) were given free passage to overseas dominions; 34,763 chose Australia; 26,560 Canada; 12,800 New Zealand, and 5,894 South Africa.

Under the Empire Settlement Act which was passed in the middle of 1922, the number of assisted passages granted to emigrants up to Oct. 1, 1928, was 256,232. Of these 140,556 went to Australia, 40,636 to New Zealand; 66,166 to Canada; and 739 to South Africa.

Emigration for the last 3 years to non-European countries was:

	1926.	1927.	1928.
United States	28,740	25,662	22,345
Canada	21,344	52,916	54,709
Australia	32,732	40,991	28,714
New Zealand	11,795	7,841	4,975
South Africa	232	7,572	7,075
India and Ceylon	.....	6,476	6,502

The birth and death-rates in England and Wales for the last six years are:

	1923.	1924.	1925.	1926.	1927.	1928.
Birth rate	19.7	18.8	18.3	17.8	16.6	16.7
Death rate	11.6	12.2	12.2	11.7	12.3	11.7

The expectation of life at birth in Great Britain is now eleven years greater for males and thirteen years greater for females than it was sixty years ago.

The census of 1921 returned 79.3% of the population of England and Wales living in urban districts. The proportion of aliens was 602 per 100,000. The number of Americans living in England was 19,171 (13,637 in 1911). The average number of children for all men was 1.27 each.

The authorized strength of the police force of England and Wales is about 57,000, and in Scotland, 6,500. The strength of the Metropolitan police (London) in 1928 was 19,379. The Commissioner of the Metropolitan Police is Viscount Byng, who took office at Scotland Yard Nov. 7, 1928.

The new Law of Property Act in effect Jan 1, 1926, changes and greatly simplifies the British Law regarding ownership and transfer of real estate. It abolished many ancient tenures and feudal rights and provides only two ways of holding land in England—by free hold and lease hold for a term of years. It abolished all legal distinction between the sexes in land holding and does away with the old rule of primogeniture in the inheritance of land where the owner dies intestate.

EDUCATION.

The most celebrated of British universities are Oxford and Cambridge, each with colleges founded in the thirteenth century, and inextricably intertwined in the fabric of British history. But there are many others in England, London, Durham, Manchester, Birmingham, Liverpool, Leeds, Sheffield, Bristol, and Reading (1926); in Scotland, St. Andrews, Edinburgh, Glasgow and Aberdeen; and one in Wales.

At the sixteen universities there were, in 1927-28, 5,006 professors and 47,666 resident students. Nine colleges exclusively for women had 2,080 students.

For elementary schools the budget for 1927-28 carried £53,258,000, which includes the expenditure in Scotland, and on museums and gallaries; the amounts appropriated in addition by local educations boards in England and Wales alone totaled for 1927-28, £14,490,000 The compulsory school age limit in England and Wales will be raised from 14 years to 15 on April 1, 1931. In 1928 the number of schools (public elementary, special and certified efficient) in England and Wales for elementary education was 20,684, with 5,560,100 pupils and about 165,010 teachers. In Scotland there were 2,903 schools with 664,958 pupils.

A notable event in the year 1929 was the reunion of the Church of Scotland (membership, 760,000) and the United Free Church (membership, 536,380)

into one national church under the first name which was voted by the General Assemblies of the two bodies in Edinburgh on May 24, 1929.

GOLD IN BANK OF ENGLAND.

The £164,500,152 gold holdings of the Bank of England on Aug. 5, 1925, was the largest in the history of the institution. On April 29, 1925, the week in which gold payment was resumed, they stood at £155,742,064. The lowest holdings since then were £143,711,895, on Jan. 20, 1926; and the highest, £176,584,362, on Sept. 13, 1928. Gold exports followed. Before the war the largest amount ever held was £53,634,723, on Jan. 12, 1914.

The statement of the Bank of England for the week ending Oct. 30, 1929, as compared with the corresponding week of one and two years ago, is as follows (000 omitted):

	1927 Total.	1928. Total.	1929. Total.
Gold holdings.....	£151,251	£164,921	£132,142
Reserve in banking dept., gold & notes	34,425	50,167	33,321
Notes in circulation	136,576	134,500	358,819
Public deposits.....	21,346	14,133	14,383
Other deposits.....	100,653	103,523	96,231
Bankers' accounts..	.....	.....	58,106
Other accounts.....	.....	.....	38,125
Govt. securities....	44,610	42,623	68,852
Other securities....	60,673	42,562	26,123
Ratio of Reserve...	28.22%	43.64%	30.12%

On Nov. 29, 1928, the fiduciary currency was amalgamated with Bank of England note issues, adding at that time £234,199,000 to the amount of Bank of England notes outstanding.

The Bank of England has been authorized to issue these notes as a fiduciary issue up to £260,000,000 in excess of its gold holdings and may not exceed this amount without Government sanction; this is in addition to the amount of notes it issues up to the full equivalent of the gold in its issue department.

The Bankers' Clearing House, London, reported that clearings for 1928 totaled £44,204,729,000, an increase of 6.3% over £41,550,541,000 in 1927, which was then a new record.

Savings deposits in the Post Office Savings Bank and in the Trustee Savings Banks on Sept. 1, 1929 totaled approximately £361,600,000, and in addition £360,000,000 in National savings certificates were outstanding.

Great Britain in the year ending March 31, 1929, according to the Commissioners of Internal Revenue, had 543 millionaires (in pounds sterling) whose aggregate income was $278,560,000, averaging more than $500,000 each. Those whose income exceeded $50,000 (ranking with "dollars" millionaires) numbered an additional 8,747, of which 6,424 were in the $50,000 to $100,000 brackets, 2,045 from $100,000 to $200,000, and 278 from $200,000 to $250,000. The gross income reported to the commissioners was £2,904,000,000 ($14,530,000,000), the lowest figure since 1928-19. This was reduced for taxable purposes to £1,300,000,000 ($6,500,000,000) of which the tax gatherers collected £228,000,000 ($1,100,000,000). The total number of individuals with incomes above the exemption limit of £120 ($600) was 4,650,000, more than half of whom were relieved by abatements and allowances, leaving approximately 2,250,000 to pay income taxes for the year.

The rates (local taxation) produced in 1928-29 in Great Britain £41,058,000 for relief of the poor, £40,407,000 for education, £11,173,000 for police, and £95,530,000 for other services.

The budget for 1929-30 (see table) brought in by Winston Churchill, Conservative Chancellor of the Exchequer, abolished the tea duty in existence since Queen Elizabeth's time. The four-pence a pound duty brought the government about £6,000,000, which is an immediate saving to all the people. Rating relief was provided to the extent of $12,000,000 a year for the farmer immediately. The taxes on betting in effect since Nov. 1, 1926, were repealed and a personal license tax of £10 a year put on bookmakers and £40 a year on each telephone in a bookmaker's office. Increase of duties were put on breweries and tobacco manufacturers and excise duties on liquor retailers reduced. The Government allowances for the year to aid highway building were increased by $40,000,000 to $115,000,000.

The new Labor Government on taking office at once negotiated a treaty with Soviet Russia for the resumption of diplomatic relations, assurances being given by Russia that thereupon definite questions, including propaganda and debt and war claims, would be considered. The treaty was ratified by the Soviet Government Oct. 11, but had yet (Nov. 5) to be considered by Parliament.

ARMY, NAVY AND AIR FORCE.

The regular army, exclusive of India, numbered March 31, 1928, 9,259 officers and 138,573 men; (total strength of the cavalry arm, 8,240; of all ranks total 148,232; of Royal artillery, 22,965; of infantry, 78,337). British garrisons in India numbered 59,978. The strength of the territorials in Great Britain, Dec. 1, 1928, was 140,699 of all ranks. The strength of the army reserve was 92,000. The estimates for 1929-30 provided for a maximum personnel of 150,500 officers and men, including British troops in India.

The budget estimate for the Army in 1929-30 was £40,545,000; in 1928-29, £40,050,000; in 1927-28, £44,565,000; in 1926-27, £42,500,000; and in 1925-26, £44,500,000.

The strength of the navy in its chief units, Feb.1, 1929, was: Battleships, 16; battle cruisers, 4; cruisers, 52; airplane carriers, 7; destroyers, 156; and submarines, 52; with 9 cruisers, 20 destroyers, 18 submarines and 1 aircraft carrier building. The battle cruiser Hood, commissioned 1921, is of 41,200 displacement, carries eight 15-inch guns, and has a speed of 31 knots.

Under the terms of the Washington Naval Armament Treaty (see The World Almanac for 1923, pp. 675-85) the British Empire retained 22 capital ships of 580,450 tons displacement. To replace 4, discarded, two new battleships, Nelson and Rodney (35,000 tons, nine 16-in. guns, speed 23 knots), were laid down in 1922 and commissioned in 1927. The subsequent building program was:

1924-25 estimates provided for the construction of five 10,000 ton cruisers and two destroyers, all completed.

1925-26,—four 10,000-ton cruisers, and two others of the same type for the Australian navy (Australia and Canberra) to replace the obsolete cruisers Melbourne and Sydney, all completed.

1926-27,—two 10,000 ton cruisers, one 8,400 ton cruiser, six submarines, two depot and repair ships, all building.

1927-28,—one 8,400 ton cruiser, nine destroyers, six submarines, two mine sweepers, all building.

1928-29,—two 8,000 ton cruisers, nine destroyers, six submarines.

1929-30,—one 10,000 ton cruiser, two 8,300 ton cruisers, one airplane carrier, nine destroyers, one fleet submarine, five submarines, one net layer.

The building of two 10,000 ton cruisers and one 8,000 ton cruiser which were on the program has been held up.

The personnel Jan. 1, 1914 numbered 144,871; and for 1928-29, 98,800, of whom 8,000 were officers.

The budget estimate for the navy for 1929-30 was £55,865,000; for 1928-29, £56,920,000; for 1927-28, £58,140,000 net; for 1926-27, £58,100,000; and for 1925-26, £60,500,000.

The Royal Air Force was created in April, 1918, by the amalgamation of the army and navy wings. At the close of the war, November, 1918, it was composed of 30,122 officers, 263,410 airmen, and 3,300 service airplanes. On March 15, 1924, it was composed of 3,500 officers, 31,500 airmen and 460 first-line airplanes (exclusive of reserve and training machines); 1,000 were added to the personnel in 1925. The strength of the Air Force Mar. 1, 1929, was 73 squadrons (of 12 airplanes each), 65 being regular and 8 auxillary air service. Of these 38 were in England and 22 abroad, while 25 flights (of 6 planes each and equivalent to 9 squadrons) were attached to the Navy. To the Home Defence force were assigned 25 regular and the 8 auxillary squadrons. The personnel was 32,000 exclusive of those serving in India, but including those serving in Iraq, Palestine and Aden.

The budget estimate for 1929-30 was £16,200,000; for 1928-29, £16,050,000; for 1927-28, £15,150,000; for 1926-27, £16,000,000; for 1925-26, £15,531,000; and for 1924-25, £14,511,000. For civil aviation £000,000 was allotted in 1928-29, £464,000 in 1927-28, and £357,000 in 1926-27. The air routes maintained were London-Manchester, London-Amsterdam, London-Paris, London-Brussels-Cologne, and Cairo-Bagdad.

The Croydon airdrome near London occupies 400 acres and as developed by the Air Ministry at a cost of £267,000 in 1928 has become one of the finest and best equipped airports in the world.

NORTHERN IRELAND.

(Ulster.)

AREA, 5,237 square miles.

POPULATION, census of 1926, 1,256,322.

CAPITAL, Belfast, population, 1926, 425,156.

Governor, The Duke of Abercorn, K. G., K. P., (born Nov. 30, 1869); appointed Dec. 11, 1922 for six years; reappointed for six years from Dec. 8, 1928.

Prime Minister, Viscount Craigavon (Sir James Craig), 1921.

Minister of Finance, H. M. Pollock.

Minister of Home Affairs, Sir R. Dawson Bates.

Minister of Education, Viscount Charlemont.

Minister of Labor, J. M. Andrews.

Minister of Agriculture, Sir E. M. Archdale, Bt.
Minister of Commerce, J. Milne Barbour.
Speaker, the Hon. Henry Mulholland.
Secretary to Cabinet, C. H. Blackmore.
Chairman of Senate, Marquis of Dufferin and Ava.

Six of the nine counties of Ulster, the northeast corner of Ireland, constitute Northern Ireland, together with the parliamentary boroughs of Belfast and Londonderry; they are Antrim, Armagh, Down, Londonderry, Fermanagh and Tyrone. The last two returned two Nationalist-Sinn Fein Members of Parliament at the November, 1922, election on a pro-Free State platform by a majority of about 7,000. The elected members did not take their seats in the Imperial Parliament, nor did the nine elected Nationalist members to the Northern Irish Parliament take theirs.

Joseph Devlin, Nationalist, took his seat in the next Parliament and with his colleague was returned to the Imperial Parliament elected in 1929.

In the general election of May 22, 1929, the result was: Unionists (Government), 38; Nationalists, 11; Labor, 1; Independent Unionists, 2.

A separate parliamentary and executive government for Northern Ireland was established in 1920 and "contracted out" of the newly established Irish Free State in December, 1922. The Parliament consists of a Senate of 26, and House of Commons of 52, both elected with power to legislate in local matters except such as are of Imperial concern or specifically reserved to the Imperial Parliament. Northern Ireland returns 13 members to the House of Commons.

The bulk of the taxation is imposed and collected by the Imperial authorities, which makes certain deductions and remits the remainder to the local exchequer; the contribution to the Imperial exchequer being tentatively paid at £7,920,000 a year. Total income and expenditures were:

Year.	Income.	Expend.	Surplus.
1922-23	£16,980,828	£16,948,786	£32,042
1923-24	14,536,857	14,490,079	46,778
1924-25	13,240,000	13,089,000	151,000
1925-26	12,726,000	12,676,000	50,000
1926-27	11,173,000	11,138,000	35,000
1927-28	11,024,000	10,775,000	249,000
1929-30	10,842,000	10,842,000	.....

The census of April, 1926, returned the population of Northern Ireland as 1,256,322, an increase of 0.5 per cent. over 1911. The population of Belfast was 425,156, with 35,288 in its suburban districts. The country is larger than Connecticut by 300 square miles.

The census of 1926 returned: Catholics, 420,428; Presbyterians, 393,374; Protestant Episcopalians, 338,724; Methodists, 49,554; other professions, 54,481.

Emigration in 1926 was 12,844, in 1925, 8,723, and in 1924, 8,000.

Ulster in 1928 had 1,013,877 acres under crops (1,022,915 in 1927). The yield in 1927 was: Oats, 275,758 tons from 309,639 acres; potatoes, 1,057,010 tons from 153,136 acres; turnips, 709,213 tons from 42,330 acres; flax, 4,988 tons from 26,334 acres; and hay, 945,236 tons from 468,403 acres. Flax acreage was increased to 37,786 in 1928, and the yield to approximately 7,500 tons.

The livestock in 1928 was: cattle, 737,866; sheep, 624,503; pigs, 229,125; goats, 51,443; horses, 92,889; mules, 252; and asses, 8,473.

There were 102,446 agricultural holdings exceeding one acre in 1927 in the hands of 100,671 separate occupiers.

Linen and shipbuilding are the chief industries, both controlled in Belfast. The linen factories have 1,000,000 spindles and 40,000 looms, employing 85,000 hands; and the product, linens to the value of £9,800,000, were exported in 1927 (£17,000,000 in 1926). The trade improved greatly in 1928; 12,991 metric tons of flax were imported, and unemployment in the industry which on Dec. 11, 1927 was 20,193, was reduced to 11,951 on Dec. 11, 1928.

The shipyards employ about 30,000 workers, with an output of 250,000 tons a year.

Unemployment was severe in the spring of 1925, being estimated at 54,000. It reached a maximum of 68,300 (25.7%) in December, 1925, and was 52,800 in December, 1926. The situation improved in 1927 and in May the number was 33,200 (12.6%). The number on Aug. 26, 1929 was 34,368.

Drawing old age pensions in 1925 were 15,160 men and 25,514 women; 37,105 drawing 10 shillings a week; total amount of pensions being £1,036,335. In 1927 the total was 42,000.

There are 765 miles of railways. In 1926, there entered the port of Belfast 5,551 vessels of 2,775,478 tonnage.

Gibraltar, the rock at the southernmost point of the Iberian Peninsula, guards the entrance to the Mediterranean. The width of the strait dividing Europe from Africa is fourteen miles. The Rock has been in British possession since 1713. It has been elaborated, tunneled and armed until it is considered impregnable. A large and secure harbor has been constructed at its foot. As a naval base its position is of the greatest strategic importance. The Rock is 2¾ miles long, ¾ of a mile wide and 1,396 feet in height; the area is nearly 2 square miles; a narrow isthmus connects it with the Spanish mainland. Its population, census of 1921, was 18,061 (estimated, fixed civil, population Jan. 1, 1925, 16,177 and 1,268 aliens). The military establishment numbers about 3,500 men. Gibraltar is a Crown Colony and the Governor and Commander-in-Chief, at present Gen. Sir Alexander J. Godley, G. C. B. (1928), exercises all the governmental functions.

Revenue, 1927, £160,031; expenditures, £160,114. Vessels entering the port in 1927 numbered, 4,429 of 6,624,204 tonnage.

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$2,723,024	$8,520
1923	615,131	16,373
1924	906,991	10,245
1925	1,347,724	34,425
1926	1,676,792	30,800
1927	1,449,398	52,867
1928	1,619,349	29,728

Malta, an island 17 miles long by 8 wide and 58 miles due douth of Sicily in the Mediterranean Sea and about 180 miles from the African coast, has had centuries of stormy history. It was annexed to the British Empire in 1814 following the Napoleonic wars and has been greatly strengthened and made into a base for repair and refitment for the British fleet. The harbor of Valetta (population 24,189) has been improved with a breakwater, but it is not large. The area of the island is 92 square miles, and the total area, including the neighboring islands of Gozo and Comino, is 118 square miles. The civil population, estimated 1927, 227,440.

The Governor, Gen. Sir John Du Cane, K. C. B. (1927), has an elected Legislature to care for purely local affairs.

Revenue, 1927-28, £823,128; expenditure, £887,523. Imports, 1927, £4,285,436; exports, £1,006,881. Vessels entring the port of Valletta, 1927, numbered 2,554 of 3,487,704 tons.

Cyprus is an island, third largest in the Mediterranean Sea, forty miles from Asia Minor and sixty from Syria. Its area is 3,584 square miles, and population, estimated Dec. 31, 1923, 324,945. It was administered by England under a convention of June 4, 1878, and was annexed Nov. 5, 1914.

Nicosia is the capital, population, 18,461; other towns, Larnaca, 10,652; Linasol, 11,843.

The island is agricultural, with wheat, barley, vetches, oats, olives, and cotton chief products. Thirty per cent. of the land area is cultivated.

Revenue, 1927, £655,997; expenditures, £615,029; debt, £180,438, for harbors, railroads and irrigation. Imports, 1927, £1,585,306; exports, £1,542,870.

Trade of Malta and Cyprus with the United States was:

Cal. Year.	Imports.	Exports.
1922	$1,492,909	$109,497
1923	1,066,798	122,525
1924	1,259,096	117,546
1925	1,192,228	228,489
1926	1,312,222	194,928
1927	1,112,339	225,943
1928	804,947	121,385

IRISH FREE STATE.

(Saorstat Eireann.)

AREA, 26,592 square miles.
POPULATION, census of 1926, 2,972,802.
CAPITAL, Dublin; population, census of 1926, 316,471; with suburbs, 419,156.

Governor General, James MacNeill. Appointed Dec. 6, 1928.
President of the Executive Council, William T. Cosgrave.
Vice President and Minister for Finance, Ernest Blythe.
Minister for Justice, Fitzgerald Kenny.
Minister for Defense, Desmond Fitzgerald.
Minister for External Affairs, and for Industry and Commerce, Patrick McGilligan.
Minister for Education, J. Marcus O'Sullivan.
Minister for Local Government, Gen. Richard Mulcahy.
Minister for Agriculture, P. J. Hogan.
Parliamentary Secretary for Posts and Telegraphs (in Finance Department), Michael Heffernan.
Minister of Fisheries, Finian Lynch.
Attorney General, John O'Byrne, Jr.

Speaker of Dail, Prof. Michael Hayes.
Chairman of the Senate, Thomas Westropp Bennett.
Minister Plenipotentiary to the United States, Michael MacWhite.
Trade Commissioner and Passport Control Officer, at New York, 1 Broadway, Matthew Murphy

The Irish Free State took its place among the world's commonwealths on Dec. 6, 1922, by proclamation of King George, the swearing in of Timothy M. Healy as Governor General and the meeting of the Parliament (Oireachtas), which succeeded the provisional regime. William T. Cosgrave was chosen President of the Executive Council and named the six Ministers and the thirty nominated Senators. The Union Jack was furled and the Irish tricolor, green, white and orange, raised over the Viceregal Lodge. It was the anniversary of the signing of the Anglo-Irish Treaty. The Constitution had been adopted by the Dail on Oct. 11, and enacted by the Imperial Parliament on Dec. 4. The last British troops, 3,000 men, under the command of Gen. Sir Nevil Macready, handed over the barracks and posts to the Free State soldiers on Dec. 17 and sailed from Dublin for England amid scenes of the greatest good will. (The history of the events leading up to the establishment of the Irish Free State may be found in The World Almanac for 1923, see pages 142-144.) (For the political history of the Irish Free State since 1922, see The World Almanac for 1929, pages 562-564.)

The franchise is extended to both sexes over the age of 21 for election of deputies to the Dail (Lower House). At the general elections of 1927, there were 1,730,426 voters on the list. Elections are determined under a Proportional Representation system. The system is not popular and there are indications that it may be abolished in the near future. The Irish Free State (26 counties) is divided into 28 electoral constituencies, including the two universities, Dublin University and the National University, each of which returns three deputies. The total number of deputies in the Dail is 153.

Seanad Eireann (the Senate) is comprised of citizens who are selected on the ground of special qualifications—service to the nation or special attainments—and numbers sixty senators. A recent Act of the Oireachtas (Irish Congress) has reduced the number of Senators to 40, altered the method of election under which the Senate nominated 20 members and the Dail Eireann 20 members, the election of senators being transferred from the electorate to the Dail and Senate voting conjointly. Previously the Irish Free State was a single electoral area for the election of Senators, the voters confined to those over 30 years. Only 25% of the registered electors voted in the last elections for vacancies in the Senate.

The election June 8, 1927 of the Fifth Dail Eirann returned 46 members of the government party and 44 of the Fianna Fail which had hitherto abstained; but on Aug. 11, De Valera and his followers took the oath, declaring it an empty political formality having no binding significance." A motion of no confidence on a tie vote was decided for the government by the casting vote of the Speaker.

The margin was too small to carry on. Cosgrave dissolved the Dail and forced a new election which, on Sept. 15, returned a sixth Dail Eireann:—

Cumann na nGaedheal (Government)	61
Fianna Fail (De Valera)	57
Independents	12
Labor	13
Independent Labor	1
Farmers	6
National League (Redmondites)	2

Michael Hayes, Ceann Comhairle (Speaker) made up the total of 153 deputies. Neither the Sinn Fein nor the Independent Republicans sought re-election. The session opened Oct. 11, 1927. All the deputies, with one exception, subscribed the roll and took the oath.

President Cosgrave was re-elected President of the Executive Council. Several changes were made in the Cabinet. Ernest Blythe was appointed Vice-President in place of the late Kevin O'Higgins. Desmond Fitzgerald was transferred from External Affairs Department to the Ministry of Defense. Patrick McGilligan became Minister both of External Affairs and the Department of Industry and Commerce. J. J. Walsh, former Minister of Posts and Telegraphs, had resigned previous to the general elections and did not seek re-election to the Dail. His seat in Cork is now filled by President Cosgrave. Instead of a Minister of Posts and Telegraphs, this Ministry was merged in that of the Ministry of Finance, Michael Heffernan, leader of the Farmers, being appointed Secretary of Posts and Telegraphs under Ernest Blythe, Minister of Finance. Economies were thus effected in two Departments by a process of amalgamation which has proved satisfactory.

Thomas A. Smiddy, former Minister at Washington, was sent to London as High Commissioner. Charles Bewley was made Minister to the Vatican.

The government escaped disaster by the slender margin of 151 votes in an electorate of 96,000 when Dr. Thomas O'Higgins, brother of the murdered vice-president, Kevin O'Higgins, won the bye-election for the letter's seat, North Dublin, on March 15, 1929. Its position was greatly strenghtened by decisive bye-election victory on June 9, when Gen. Sean Maceoin, the blacksmith, won Sligo-Leitrim by a majority of 3,977.

A suit brought in the Supreme Court of New York City to settle the ownership of $2,500,000 held by the Harriman National Bank, being the remainder of $8,000,000 subscribed in the United States to a bond issue of the Irish Republic after a two weeks' trial was dismissed by Justice Curtis H. Peters on May 11, 1927. He held that the Irish Republic never existed, therefore the Irish Free State was not its successor, and that the money, less legal fees (which were heavy), should be returned pro rata to the subscribers.

The subscribers numbered 303,000 and claims had been made by 135,000 in Dec. 31, 1928, the final date for receipt. Minister of Finance Blythe announced on July 2, 1929, the policy of the government, when the American courts certify that all the money held by the court has been refunded, to make good to all the subscribers the balance of the sums subscribed.

The Irish Free State consists of the three Southern provinces: Leinster, Munster and Connaught, and three counties: Cavan, Donegal and Monaghan of Ulster. Two of the remaining six counties of Ulster, Fermanagh and Tyrone (population exceeding 200,000), have pro-Free State majorities as shown by the election for members of Parliament on Nov. 15, 1922, when the Nationalists and Sinn Fein candidates were elected over the two Conservatives by a majority of about 7,000. The Free State is about equal in size to the States of New Hampshire, Vermont and Massachusetts.

The census of April, 1926, in Ireland, returned for the Irish Free State a population of 2,972,802, as compared with 3,139,688 in 1911, a loss of 3.7 per cent. The number of males was 1,506,916 and of females 1,456,886 (973 to 1,000). The Northern Ireland census showed a population of 1,256,322 (1,250,219 in 1911, a gain of 0.5 per cent.), making the total for all Ireland 4,229,124. The decrease in population is partly accounted for by the withdrawal of the British troops and their dependents, numbering about 34,000; more than 24,000 killed in the war; about the same number of officers and men who settled abroad after the war, and the more than 8,000 members of the Irish constabulary who have left the country. Commenting on emigration, the report says that in 1921 there were 1,817,457 native-born Irishmen living in foreign countries. This is 43 per cent. of Ireland's population. Of them, 1,037,234 are in the United States, 367,174 in England and Wales, 159,020, in Scotland, 105,033 in Australia, 34,419 in New Zealand, 12,289 in the Union of South Africa, and 8,414 in India. In 1927, 27,148 left the Free State; in 1926, 30,041, of which 26,063 went to the United States; and in 1925, 30,167, 26,416 to the United States.

Provision was made in 1925 for the utilization of the water power of the River Shannon, using Derg Lough, Rea Lough and Allen Lough as reservoirs, with a storage capacity of 827,000,000 cubic meters. The fall is 98 feet. While the plant will ultimately generate 165,000 horsepower and the high tension alternating current will be transmitted to about 200 transformer stations, the first installment is planned to develop 90,000 horsepower.

The Shannon power station will be ready to supply electric current to the whole of the Irish Free State during the winter of 1929-30. The intake gates, which control the passage of water into the canal seven and a half miles long, to the power house, were opened with ceremony by President Cosgrave, on July 22, 1929. The Electricity Supply Board anticipates a consumption of current amounting to 144,000,000 k.w.h. in 1932. The wiring of houses and villages has proceeded rapidly, much of the work being done by the installation department of the Electricity Supply Board. Thousands of houses are being wired on the hire-purchase system.

Expenditures on the Shannon electrification scheme total nearly £5,000,000, including the expenditure for wiring the towns in Leinster Province. The total cost will be approximately £7,000,000. ($35,000,000).

Henry Ford in 1929 removed his entire tractor plant to Cork, where extension of his factories, employing in 1929, 4,000 workers, will furnish capacity for a production of 125,000 a year, doubling the

output. By a rule of the United States Treasury Department, June 11, the American-Irish made tractors may be imported into the United States duty free.

The net output of Irish industry in 1926—that is, the gross value of output less the cost of materials, including light and power—was £24,190,000, on the basis of a total expenditure for salaries and wages of £13,200,000 paid to 107,300 workers.

The gross value of the output of leading industries was: Grain milling, £7,242,756; bread, etc., £4,900,531; sugar, confectionary and jam, £807,857; butter, cheese and margarine, £7,366,089; bacon curing, £5,451,326; brewing, £7,300,365; malting, £655,661; distilling, £288,425; aerated waters and bottling, £2,209,993; tobacco, £5,033,336; clothing and millinery, £1,724,259; boots and shoes, £401,845; hosiery, £238,507; woolen and worsted, £737,336; and linen, cotton, hemp and jute, £442,063.

Dublin showed an increase from 304,802 in 1911 to 316,471 in 1926 for the city; and from 397,957 in 1911 to 419,156 in 1926 for the city, with its four suburban districts. The population of Cork in 1926 is 78,468; of Limerick, 39,690; and of Waterford, 26,646.

The average annual births from 1911 to 1926 were 64,584 (21.1 per 1,000), and deaths, 48,764 (16.0 per 1,000).

Catholics formed 92.6% of the population in 1926, and Protestants of all denominations, 7.4% (220,792, a decline of over 106,456 since 1911).

Trinity College, Dublin, (founded 1591), had in 1928, 1,238 students and the four constituent colleges of the National University of Ireland (founded 1909), at Dublin, Cork, Galway and Maynooth, had 1,168, 494, 250, and 518 students respectively.

The number of schools (1928) was 5,648 with 518,002 pupils and 13,500 teachers. The budget for 1928-29 provided £3,475,832 for elementary education. Secondary schools numbered 284 with 25,510 pupils; cost, 1928-29, £276,400.

The Army, for 1928-29 has been reduced to 750 officers and 9,500 men, for which the budget provides £2,185,167. The police force is a nationally organized government body known as Garda Siochana (Civil Guards). Its strength is 220 officers and 6,994 men for which the budget provides £1,400,288.

The head is Gen. Eion O'Duffy, and the headquarters are in Phoenix Park, Dublin, with 700 substations among the whole county. The uniformed men are unarmed, well trained and respected, and do much government inspection work. Crime is at a low ebb. Mountjoy prison is the only one left in Dublin, and there are only seven in the whole country.

There are 13,000 "pubs," licensed to sell intoxicants, or one to every 230 persons, and the Government is taking steps to cut the number in half.

Agriculture is the chief industry. In 1927 the production was: Wheat, 38,059 tons from 34,466 acres; oats, 667,643 tons from 644,610 acres; barley and bere, 134,886 tons from 120,795 acres; rye, 4,544 tons from 6,056 acres; potatoes, 2,443,175 tons from 364,539 acres; turnips, 3,478,372 tons from 183,213 acres; mangels, 1,617,816 tons from 79,804 acres; sugar beet, 134,257 tons from 17,698 acres; cabbage, 334,294 tons from 30,871 acres; flax, 990 tons from 5,998 acres; and hay, 4,992,373 tons from 2,183,086 acres Farm animals numbered: cattle, 4,047,013; sheep, 3,120,308; pigs, 1,177,737; goats and kids, 185,810; horses, 428,502; mules and jennets, 19,065; and asses, 197,004.

The number of small holdings in Ireland, excluding all Ulster, in 1918 were: Not exceeding 1 acre, 80,929; from 1 to 5 acres, 29,381; from 5 to 10 acres, 37,047; from 10 to 15 acres, 34,443; from 15 to 30 acres, 74,476; from 30 to 50 acres, 44,227; total, 300,503. Holdings of above 50 acres were 77,015, making the grand total of holdings, small and large, 377,518.

The Irish Free State Land Purchase Bill, put before the Dail, May 28, 1923, to enable the Government to acquire, compulsorily from landlords, lands for distribution to tenants and to present holders of uneconomic tracts in congested districts, affects about 70,000 tenants, and requires about $120,000,000 for the operation of its provisions.

The bill provides that rents accruing up to the first gale (rent) day of 1920 shall be remitted. Arrears since that date, however, shall be paid, subject to a discount of 25 per cent. One year's arrears become payable on the passage of the bill.

The passage of the bill continued that process of land distribution which has been in progress since 1870. Between that year and the present about 400,000 tenants have become owners of their holdings. About 70,000 tenancies remain, and these will be converted into proprietorships by the new measure. In addition, the condition of members of the agricultural tenant class now in possession of unproductive holdings will be improved.

The fiscal autonomy of the Irish Free State was completed on April 1, 1923. Then the collection of all duties from taxes was undertaken, a customs system was established, and taxes separate and distinct from those imposed by the British Government were levied.

The budget for fiscal years ending Mar 31, in thousands of pounds sterling, are:

Year.	Revenues.	Expenditures.
1922-23 (actual)	27,863	31,198
1923-24 (actual)	31,415	(a) 42,384
1924-25 (actual)	26,968	29,793
1925-26 (actual)	25,489	28,007
1926-27 (actual)	25,175	28,341
1927-28 (actual)	24,473	31,437
1928-29 (actual)	24,566	29,053
1929-30 (estimated)	24,364	29,540

(a) Of which £10,581,000 was for the army.

The national debt was on March 31, 1929 approximately $144,057,450, or equivalent to $47.50 per capita as compared with $818 for Great Britain, $298 for Australia, and $146 for South Africa.

Following the report of the Commission headed by Dr. Henry Parker Willis, former Secretary of the Federal Reserve Board of New York, appointed in 1926, the Dail passed a Currency Act which became law Aug. 20, 1927. It makes the unit of currency the Saorstat pound = 123.27447 grains of gold 916.6 fine (= the pound sterling), and authorizes the coinage of pound and 10-shilling pieces when bullion is presented. It establishes a currency commission with which is associated share-holding banks. This Commission will issue legal tender notes based on gold, British bank notes, Government short term securities, or sterling balances held abroad, and also will provide for the issue by each share holding bank of consolidated bank notes based on commercial credits, —a maximum of £6,000,000, subject to readjustment every three years.

Great Britain and Northern Ireland supplied about 80 per cent. of the imports and took 96 per cent. of the exports in 1924 and 1925; 80 per cent. of the imports and 90 per cent. of the exports was trade in live animals and in food and drink.

Trade for four years was:

Year.	Imports.	Exports.
1924	£65,811,406	£48,448,395
1925	62,913,230	43,362,921
1926	61,285,941	41,956,712
1927	60,822,032	44,168,118

Trade between the Irish Free State and the United States being largely indirect through British agencies and British ports, official statistics do not reveal the actual figures. The figures given by the United States Department of Commerce for the direct trade are: Imports, 1928, $13,466,631; 1927, $10,882,180; 1926, $16,986,518; 1925, $7,280,334; exports, 1928, $1,723,729; 1927, $1,642,168; 1926, $1,476,397; 1925, $1,268,678.

The policy of the Government has been directed to moderate experimental tariffs, and has established a tariff commission.

The consolidation of the railways comprising 2,077 miles, formerly operated by twenty-six companies, into one operating company known as the Great Southern Railway, was completed early in 1925. The authorized capital (1925) was £44,034,755; gross receipts (1926), £4,344,653; expenditures, £3,895,220. Total railway mileage was 2,668.

Vessels entering the ports in 1927 numbered 13,494 of 9,262,100 tons.

INDIA.

AREA, of British provinces, 1,094,300 square miles; area of protected native states or agencies, 711,032 square miles. Total India, 1,805,332 square miles.

POPULATION, of British provinces, census of 1921, 247,003,293; native states and agencies, 71,882,687; total India, 318,885,980.

CAPITAL, Delhi; population, 304,420.

Viceroy and Governor General, Lord Irwin (E. F. L. Wood), took office April 3, 1925.

India is bounded on the north by Afghanistan and China; on the east by China, Siam and the Bay of Bengal; on the south by the Bay of Bengal, the Indian Ocean and the Arabian Sea; on the west by the Indian Ocean, the Arabian Sea, Persia and Afghanistan. Its territory is as large as that of the United States east of the Rocky Mountain States.

The climate ranges from the extremely hot in the southeast to cooler elevations of the northwest mountains, the whole being tropical in general character.

Approximately 20 per cent. of the area is forested; among the timber products being sandalwood, teak, ironwood, deodar, sissal, satinwood, date palm, cocoanut, sago, banyan and acacia.

The country is essentially agricultural, 70 per cent. of the people living therefrom. By the 1921 figures, there were in all of India, British India and the native states, 318,885,980 persons, of which about 229,045,000 were supported by soil tillage, forestry and livestock husbandry. Agriculture is crude, although improvement of method is being attained through the efforts of the British Department of Agriculture, which maintains staffs of experts to inculcate modernity among the natives. They also teach better ways of caring for domestic animals, and encourage the introduction of high-bred grades.

In 1927 there were 226,012,207 acres in crops and 49,699,603 in fallow, in British India, with 24,667,813 irrigated by canals, 5,565,265 by tanks, 12,006,462 by wells, and 5,545,093 by various other ways. The area irrigated by Government works was 28,100,000 acres. In 1928 the yield was: Rice, 27,972,000 tons from 77,790,000 acres; wheat, 7,762,000 tons from 32,211,000 acres; sugar cane, 3,221,000 tons from 2,954,000 acres; rape and mustard seed, 846,000 tons from 5,931,000 acres; linseed, 351,000 tons from 3,352,000 acres; sesamum, 544,000 tons from 5,445,000 acres; cotton, 5,871,000 bales from 24,722,000 acres; jute, 10,180,000 bales from 3,374,000 acres; tea, 390,919,800 pounds from 752,900 acres; and rubber, 26,042,800 pounds from 151,900,000 acres.

Under the State Forest Department are 251,755 square miles of forests of which 105,285 are reserved. The net revenue in 1929 was 26,431,932 rupees.

Livestock in 1924-25 numbered 120,340,000 oxen, 30,612,000 buffaloes, 23,233,000 sheep, 39,237,000 goats, 1,710,000 horses, 70,000 mules, 1,411,000 donkeys and 505,000 camels.

INDUSTRY, MINING AND COMMERCE

Excluding the Indian States and Government Factories, British India in 1927 had 6,393 industrial establishments subject to the Indian Factories Act, employing 1,268,200 persons. The cotton industry is the most important, there being June 30, 1927, 278 spinning and weaving mills employing 324,600 hands; and in all India 3,702,760 spindles, and 161,952 looms. The cotton mills in the fiscal year 1928-29 produced 648,283,337 pounds of yarn and 1,893,268 yards of cloth; 149,219,080 yards were exported.

Jute mills come next, 90 in number, with 50,354 power looms and employing 339,500 persons; cotton ginning and baling, 2,116 establishments, employing 143,300 persons. Other industries employing 11,000 persons or more are transport, rice mills, engineering, manufacture of arms and ammunition, printing, machinery, foundries, lumber, tea factories, woolen goods, sugar, oil and tobacco.

India has an unusually wide range of minerals. Coal production in 1927 was 22,082,336 long tons (1926, 20,999,167); iron ore, 1,846,735 tons (1926, 1,659,295); manganese ore, 1,129,353 tons (1926, 1,014,928); tungsten ore, 1,150 tons (1926, 1,484); copper matte, 11,872 tons (1926, 11,441); lead, 450,777 tons (1926, 362,910); gold, 384,272 ounces (1926, 384,158); and silver, 6,024,806 ounces (1926, 5,126,088).

India produced 8,300,000 barrels of petroleum in 1928; 7,787,000 in 1927; 8,728,000 in 1926; 8,000,000 in 1925; 8,416,000 in 1924; 8,406,000 in 1923; and 8,529,000 in 1922.

Shipping entering Indian ports in 1927-28 numbered 3,918 vessels of 8,876,840 tons, of which 2,213 of 6,184,868 tons were British.

India had open for traffic on March 31, 1928, 52,886 miles of railway, of which 40,299 were Imperial State lines and 4,988 Indian State lines. The gross earnings of all State owned lines in 1927-28 was $429,860,646. Railway development is not modern, four gauges being employed, preventing the interchange of cars from one line to another. Navigable waterways inland amount to 4,000 miles, and there are about 200,000 miles of highways.

The Sukkur Barrage in the Sind—one of the great irrigation schemes in the world—and the Sutlej Valley irrigation project, in the Punjab have both received the sanction of the Indian Government and the Bombay Legislative Assembly. The Sukkur Barrage will cost £18,500,000 and will be financed by loans aggregating $50,000,000. It provides for an extensive system of canals on both banks of the Indus River to supply perennial irrigation and it is expected that during the next ten years the cotton acreage in the Punjab will be trebled and between two and three million acres will be added to the wheat producing area. The Government will also stimulate sugar-cane production in the Sind.

The total capital cost of Government irrigation works up to 1923-24 was 892,500,000 rupees (1 rupee = $0.3666 at current rates of exchange) and the total value of irrigated crops for that year alone was estimated at 1,400 millions of rupees. The construction of new works continued in 1927-28 in practically all the provinces. The Sutlej system will bring 5,000,000 additional acres under cultivation. The first unit was opened April 12, 1926.

THE BRITISH ARMY IN INDIA.

The British regular forces in India are paid by the Indian Exchequer. The expenditure in 1928-29 was 580,412,000 rupees ($212,779,040.) The strength of the British Army in India in 1927 was 60,223; and of the native army, 167,562. They are organized in brigades and divisions with the native army, the normal proportion being one British battalion to 3 native. In October, 1927, there were 45 British infantry battalions, 127 native; 5 British cavalry regiments, 21 native. The horse (4 batteries), field (44 batteries) and garrison (9 batteries) artillery, the tank corps (8 companies) and Royal Air Force are wholly British. The native army has 19 pack artillery batteries, 24 engineer companies and 24 signal companies. In addition there is an auxiliary force, organized in 1920 for volunteers of British extraction, which numbers 23 infantry battalions, 20 garrison artillery batteries, 11 cavalry regiments, 19 railway battalions, 5 engineer companies and 1 signal service company. Eight regiments in 1923 were wholly officered by Indians as to company or squadron officers.

The creation of a Royal Indian Navy was announced Feb. 9, 1926.

A reorganization of the Indian Government has consolidated the departments under three heads: Commerce; Industries and Labor; Education, Health and Lands, together with a Board of Revenue to shape a definite taxation policy.

TO ADOPT GOLD STANDARD.

The Indian Currency Commission, appointed in August, 1925, to investigate the monetary system of India, recommended Aug. 6, 1926, a gold standard for India with the immediate stabilization of the rupee at its then rate of 1s. 6d., and the creation not later than January, 1929, of a central reserve bank with separate note issue and banking departments, the banking department to hold the reserves of the Bank of India, to carry all the Government's accounts and to handle all oversea remittances of the Government. The profits after deducting dividend payments and reserves, would accrue to the Government. The bank would have for twenty-five years the sole right of the issue of notes.

Opening such a bank has been postponed.

To secure the 1,868 million rupees of the State notes in circulation on Sept. 30, 1928, the Indian Government had a gold reserve of 322 million rupees at home, 29 million abroad, 1,130 million in silver, and 603 million in foreign securities.

The commission did not contemplate the minting and circulation of gold coin but the redemption of notes and silver rupees in gold bullion at the fixed rates; in foreign exchange transactions, the bank would be obligated to buy and sell bills of exchange unreservedly at rates within the gold points for the transfer of bullion between London and India. The date recommended for the institution of the gold standard is set at not later than January, 1931.

With no gold coin in circulation the temptation to melt down one's wealth—so prevalent among the natives—is avoided, and the fact that gold bars could be purchased from the Government at a never-varying rate would do away with the speculative holding and hoarding of gold that now prevails. Gold and securities redeemable in gold are to constitute between 40 and 60 per cent. of the reserves, but never less than 40 per cent. while actual gold would constitute at least 20 per cent., rising to 25 per cent. within ten years. One-half of the gold reserve would be held in India and one-half abroad. The Indian Government received the report with favor.

During 1925 India imported 3,421 tons of silver, valued at $73,263,157, and 10,393,867 fine ounces troy of gold, valued at $220,581,836, approximately 55 per cent. of the world's gold production and 42 per cent. of the world's silver production for that year. The United States was the greatest supplier of gold, providing 34 per cent., and 52 per cent. of the silver.

Bullion imports in 1926 were 4,095,652 fine ounces of gold valued at 233,754,182 rupees (about $84,151,500) and 127,325,739 ounces of silver valued at 212,776,625 rupees (about $76,599,585).

Gold is hoarded in India by all classes of people, as a reserve against famine, and to form a "marriage dot." The wealthy princes have accumulated enormous sums.

The net imports of gold into India 1919-1925 was

$1,031,000,000. In 1906 the hoarded wealth of India stood at $1,800,000,000. In 1925 it was computed at $2,500,000,000, an increase of $700,000,000 in seventeen years. The silver holdings in various forms was estimated at $2,750,000,000.

Recent budgets in rupees and converted into dollars (rupee = $0.3666) are:

First Year.	Revenues.	Expenditures
1925-26	1,306,797,000	1,304,384,000
	($479,071,780)	($478,187,175)
1926-27	1,304,297,000	1,303,766,000
	($478,140,280)	($477,960,600)
1927-28	1,289,600,000	1,252,600,000
	($472,767,360)	($459,203,160)
1928-29	1,253,000,000	1,132,000,000
	($451,080,000)	($407,120,000)
1929-30	1,340,633,000	1,340,633,000
	($491,463,950)	($491,463,950)

The public debt of March 31, 1928 was 9,887,900,000 rupees ($3,624,974,140); about two-thirds is for productive purposes.

Great Britain officially defines British India as that part of the Indian peninsula which is directly under British rule, but the technical delimitation of British India shades off into other areas, where British influence predominates and is virtually complete. The British imperial status was given when Queen Victoria was proclaimed Empress of India in 1876.

GOVERNMENT OF INDIA.

To the Secretary of State for India in the Cabinet at Westminster is intrusted the administration of the Indian Empire. He is assisted by a council of from 8 to 12 members, at least one-half of whom have lived in India. App op.iations of revenues must receive a majority of the votes in Council.

In India there is a legislature consisting of the Governor General and two Chambers, the Council of State (of whom 33 are elected and 27 nominated), and a Legislative Assembly (opened 1921), with 104 elected members and 41 nominated, of whom 26 are to be official members. The president is elected

This legislature has power, subject to certain restrictions, to enact laws for all persons in British India, for all British subjects within other parts of India, and for all native Indian subjects in any othe. parts of the world. The Governor General, after specific consent obtained from the King and Parliament, may enact measures essential to the safety, tranquility or interests of British India, against the wish of the Council or Assembly. The foreign and political department is directly under the Governor-General.

British India is divided into 15 administrations, each under a Governor.

Government there by Britain is declared to be based on the principle which has obtained in other colonies and dominions since the time the United States separated from the mother country—that of advancing the people as far as possible along the pathway toward autonomy and complete self-government. The ultimate objective is said to be that absolute self-government which the Dominion of Canada, the Commonwealth of Australia, the Union of South Africa and other areas have. The backward status of the people has prevented the realization of such an end so far, according to British authoritative statements.

Although the efforts of Britain to introduce better methods have accomplished much and have held loyal a large proportion of the people, there has lately been an arousal of extreme nationalism, with resistance by the agitators and their followers to British rule, taking, under the leadership of Gandhi, the form of non-co-operation.

The Viceroy, Lord Irwin, in an official statement at Delhi, Oct. 31, 1929, reaffirmed pledges made by Edwin Montague, Secretary for India in the Coalition Government in Parliament in 1919, and by Prime Minister Stanley Baldwin, and stated on the authority of the Government that the natural issue of India's constitutional progress is the attainment of a Dominion status." A Statutory Commission headed by Sir John Simon and representing all British political parties has been studying Indian conditions for over two years, but has not (Nov. 1, 1929) completed the task.

There has been much Communistic and Nationalistic agitation. Two bombs were exploded in the Legislative Assembly in Delhi by the "Hindustan Republican Army" on April 8th.

The year 1929 was marked by religious riots which raged in Bombay in February and more than 116 persons were killed and 700 injured.

The Legislative Assembly in September, 1929, by a very large majority, enacted a law introduced by a Hindu member, raising the minimum age for marriage of girls to 14 years and the age of consent to 16.

Women have had the vote in some provinces since 1924.

India had in 1925-26, 613,996 acres under opium; this was reduced to 143,750 acres in 1927. The Government of India on June 11, 1926, announced that it had decided to end opium exports for other than strictly medical purposes by effecting a 10 per cent. reduction in 1927 and continuing that reduction yearly so that the last exports will take place in 1935. The exports will be under a system of direct sales to the Government of the importing country. The revenue from opium in 1924-25 was £3,798,000; in 1925-26, £4,150,000; in 1926-27, £4,331,000; in 1927-28, £2,852,000; and in 1928-29 (estimated) £2,609,000.

POPULATION OF THE CITIES OF INDIA.

The principal cities of above 100,000 inhabitants with their population, by the census of 1921, are:

Town.	Pop.	Town.	Pop.
Calcutta (with suburbs)	1,327,547	Allahabad	157,220
Bombay	1,175,914	Mandalay	148,917
Madras	526,911	Nagpur	145,193
Hyerabad	404,187	Srinagar	141,735
Rangoon	341,962	Madura	138,894
Delhi	304,420	Bareilly	129,459
Lahore	281,781	Meerut	122,609
Ahmedabad	274,007	Trichinopoly	120,422
Lucknow	240,566	Jaipur	120,207
Bangalore	237,496	Patna	119,976
Karachi	216,883	Sholapur	119,581
Cawnpore	216,436	Dacca	119,450
Poona	214,796	Surat	117,434
Benares	198,447	Ajmer	113,512
Agra	185,532	Jubbulpore	108,793
Amritsar	160,218	Peshawar	104,452
		Rawalpindi	101,142

There are also 51 with a population of between 30,000 and 100,000.

The birth rate in British India for 1926 was 34.77; 1925, 33.65; 1924, 34.44; 1923, 35.6; and the death rate 1926, 26.76; 1925, 24.72; 1924, 28.49; 1923, 25.0.

Snakes killed 19,069 persons in 1927 and 57,116 poisonous snakes were killed; tigers killed 1,033 people; wolves, 465; leopards, 218; crocodiles, 140; bears, 78; elephants, 56; jackels, 45; and hyenas, 12. On the other hand, 25,612 wild animals were killed; of these 1,068 were tigers; 4,390 leopards; 2,739 bears; and 2,439 wolves. The government bounties paid amounted to 139,453 rupees.

RELIGIOUS STATISTICS OF INDIA.

(Census of 1921.)

Sects.	Number.
Total population	318,885,980
Hindus	216,734,586
Sikhs	3,238,803
Jains	1,178,596
Buddhists	11,591,268
Parsees	101,778
Mohammedans	68,735,233
Christians	4,754,079
Roman Catholics	1,823,079
Anglicans	533,180
Presbyterians	254,838
Baptists	444,479
Lutherans	240,816
Methodists	208,135
Congregationalists	123,016
Salvationlists	88,922
Syrian (Romo-Syrian)	420,968
Syrian (others)	367,588
Jews	21,778
Animistic	9,774,661
Others, about	18,000

The number of Europeans was 176,031 (males, 125,229; females, 50,802) and of Anglo-Indians, 113,090 (males, 56,668; females, 56,422). The English language is native to 308,071 and 2,500,000 know English.

It is said that there are 45 races, speaking 170 languages, and 2,400 castes and tribes, divided, 217,000,000 Hindus, 68,000,000 descendants of Turanian tribes, 68,000,000 Mohammedans, and there are 700 feudatory states. Each cult, caste and tribe adheres strongly to its religious beliefs and social rules, many of them with fanaticism, especially the Mohammedans, who even in far-off India look quite as faithfully toward Mecca each sundown as do those nearer to the capital of Islam for 1,000 years. The stability of these conditions, touching all classes, is probably the more assured because of all the population only about 11 per cent. is urban.

ILLITERACY IN INDIA.

The following statistics of illiteracy are those of the census of 1921.

BRITISH PROVINCES AND NATIVE STATES IN INDIA.

British Provinces.	Area in Sq.Miles.	Pop., 1921.
Ajmer-Merwara	2,711	495,271
Andamans and Nicobars	3,143	27,086
Assam	53,015	7,606,230
Baluchistan	54,228	420,648
Bengal	76,843	46,695,536

Total Provinces	1,094,300	247,003,293
Total India	1,805,332	318,885,980

Note.—Figures in *italics* are included in the totals just preceding them.

	Able to Read and Write.	Unable to Read and Write.	Total.
Males	19,841,438	142,623,691	162,465,129
Females	2,782,213	150,807,899	153,590,112
Total	22,623,651	293,431,590	316,055,241

In 1924-25 there were in British India 193,627 "recognized" educational institutions with 9,186,411 pupils and 34,602 "unrecognized" with 610,933 scholars. The government expenditures were $31,936,610. There are eight universities.

The problem in India is always how to get enough food for the people—that is, enough to stave off starvation. Famines and scourges are frequent, and obstacles to efficient use of the natural resources are ever present in the conservatism of the people and disinclination to change.

Foreign trade, sea borne, excluding Government stores and Government gold and silver, in rupees, for eight years (ending March 31) was:

	Merchandise.	Gold and Silver.	Total.
Imports.			
1921	335,59,88,412	23,41,64,542	359,01,52,952
1922	266,34,63,422	31,14,96,936	297,49,60,358
1923	232,70,76,893	63,04,40,017	295,75,16,910
1924	227,61,13,390	52,20,27,403	279,81,40,793
1925	246,62,67,175	99,17,79,407	345,80,46,582
1926	226,17,77,961	55,40,31,421	281,58,09,382
1927	231,31,57,813	41,31,45,879	272,63,03,692
1928	249,90,01,719	34,81,60,468	284,71,62,187
Exports.			
1921	258,16,97,051	25,80,14,669	283,97,11,720
1922	245,44,35,012	18,99,32,016	264,43,67,028
1923	314,32,52,598	2,78,13,278	317,10,65,876
1924	362,08,44,876	3,55,40,655	365,63,84,531
1925	398,17,44,498	4,91,37,292	403,08,81,790
1926	385,32,69,476	3,51,68,068	388,84,37,544
1927	309,44,55,843	2,00,35,279	311,44,91,122
1928	328,65,61,600	2,62,46,022	331,28,07,622

The trans-frontier land trade in 1923-24 in rupees was: Imports, 17,77,38,514, exports, 15,72,40,705. Imports from Great Britain in 1927 were £86,349,452; exports to her, £65,912,962; and in 1928, imports, £83,921,000; exports, £64,491,000.

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$30,736,801	$91,151,961
1923	30,249,524	127,978,456
1924	34,900,844	103,276,536
1925	38,281,698	144,503,566
1926	50,012,864	150,929,680
1927	63,296,981	131,002,495
1928	53,698,822	148,931,039

Baluchistan is in the extreme western part of the India Empire, with 54,228 square miles of its total of 134,638 square miles under British authority, and, in 1921, 421,679 of population, practically all Mussulmans or Hindus. It is governed by British Residents under long-standing agreements.

Barren mountains and deserts render it comparatively unimportant economically, with some cereals produced, and little development of any kind. Minerals have been explored, and will some time afford wealth. Foreign trade totals about $1,000,000.

Sikkim is a state of India in the Himalayas, south from Thibet. The area is 2,818 square miles, and population in 1921 was 81,722, composed of Bhutias, Lepchas and Nepalese. It is governed by a Maharajah, H. H. Tashi Namgyal, under a British protectorate.

Cereals, fruits and woolen cloth are the products. The country is undeveloped.

The Andaman Islands, 204 in number, are in the Bay of Bengal, 120 miles from the mainland of Burma. Area is 2,260 square miles, and population 26,833. Timber wealth is large, but the use of the islands for a penal settlement, a self-supporting community of 11,500, is the chief interest. The natives are pygmy jungle-dwellers, experts with spear and arrow, and very savage.

The Nicobar Islands, 75 miles from Andaman Islands, have 635 square miles of area and population of 10,000.

OTHER BRITISH ASIATIC POSSESSIONS.

ADEN, PERIM, SOKOTRA, AND BAHREIN ISLANDS.

Aden, a peninsula on the Arabian coast, is at the southern end of the Red Sea, and has 75 square miles of area, in Aden proper, and 9,080 square miles including protectorate areas. The population, including Perim, in 1922 was 56,571, mostly Mohammedans. It is the principal commercial center for the Arabian peninsula, and the entrepot for the Red Sea markets of Abyssinia, Eritrea and Somaliland. In 1929, imports were valued at $35,757,794—cotton goods, grain, coal, sugar and foods—and exports at $29,551,040—salt, coffee, gum, hides, cotton goods and foods.

Manufacturing is chiefly of cigarettes and salt.

Aden is a free port, an important coaling station and has an excellent harbor. In 1928 merchant vessels numbering 1,575 of 5,707,000 tonnage called there.

Sokotra is an island off the African coast under British protection, and the Kuria Muria Islands, off the Arabian coast—all attached to Aden. Area in all is 1,382 square miles, and population 12,000, mostly engaged in livestock husbandry.

Trade of Aden with the United States was:

Cal. Year.	Imports.	Exports.
1922	$1,728,687	$1,706,264
1923	949 996	2,512,750
1924	470,944	2,185,631
1925	588,971	3,285,838
1926	549,294	2,892,085
1927	587,151	3,060,136
1928	516,591	3,319,860

The Bahrein Islands lie off the Arabian coast, in the Persian Gulf, the total area being 280 square miles, and the population 110,000, mostly Mohammedans. Pearl fishing is the chief interest. The foreign trade in 1926-27 was: Imports, £963,822.

chiefly rice, coffee, sugar, tea, and cotton piece goods; exports, £688,262.

CEYLON.

Governor, Sir H. J. Stanley, K. C. M. G., 1927.

Ceylon is an island as large as the State of West Virginia, off the southern tip of India, in the Indian Ocean, with 25,332 square miles of area and 4,509,544 of population, divided: Buddhists, 2,770,000; Hindus, 982,000; Mohammedans, 302,000; Christians, 444,000. Population on Dec. 31, 1926 was estimated at 5,009,502. Colombo (population, 1921, 244,110) is the chief city.

There are 1,125 miles of Government owned railroads.

Of the total 16,212,000 acres, 3,106,000 are tilled, and 1,000,000 pastureland. Products are cocoanuts, rubber, cinnamon, tea and grains. Tea is the most important, 227,000,000 pounds being exported in 1927, 145,000,000 to the United Kingdom. Rubber exportations in 1927 were 125,063,000 pounds of which 78,985,000 went to the United States. There were 65 plumbago mines working in 1927, and the export was 232,000 cwts. Total imports in 1927 were valued at $150,402,849, exports $160,454 908. The budget for 1926-27 was: Revenue, £8,623,928; expenditure, £8,069,752; debt, Sept. 30, about £12,883,000, all for public works.

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$788,531	$20,210,688
1923	1,560,974	27,948,789
1924	1,588,991	25,325,964
1925	2,385,739	48,158,967
1926	2,588,042	55,805,372
1927	2,674,151	40,846,039
1928	25,409,479	53,900,793

The Maldive Islands are 400 miles west from Ceylon, with 70,000 population, almost all Mohammedans. Cocoanuts, millet, palms, fruit and nuts are the products.

STRAITS SETTLEMENT.

AREA, Singapore Island, 217 square miles; Penang Island, 108 square miles; Wellesley, 280 square miles; Malacca, 840 square miles; Pangkor, 155 square miles; total, 1,600 square miles.

POPULATION, estimated 1924, Singapore, 474,817; Penang, 315,841; Malacca, 170,294; total, 960,952.

CAPITAL, Singapore.

Governor, Sir Hugh C. Clifford, G. C. M. G., March 24, 1927, also *High Commissioner* for the Federated Malay States; *High Commissioner* for Brunei, and *British Agent* for North Borneo and Sarawak.

The Straits Settlement is a Crown Colony, in which Singapore, an island twenty-seven miles long by fourteen wide, area, 217 square miles, is the chief port. Singapore just misses being the southernmost point of Asia by a half-mile water channel. The Johore Causeway has just been completed joining it with the mainland and affording through train service between Bangkok and Singapore. It is at the funnel point of the Strait of Malacca, which extends between the Malay Peninsula and the Island of Sumatra, the great water highway between India and China.

The British House of Commons voted in 1923 to spend £11,000,000 to make it an impregnable naval base. It is already heavily fortified and in strategic position as the Gibraltar and Aden of the Far East. Three of the seven sections of the pontoon dock, which has a lifting capacity of 50,000 tons, were launched at Newcastle in July, 1927. When completed in 1928 it was divided in two and towed to Singapore through the Suez Canal.

The contract for the construction of the new naval dockyard and base to cost about £7,750,000 was let by the admiralty in September 1928. The local government gave the site of 3,000 acres. An airfield of 600 acres will also be constructed.

A hundred years ago the island, owned by the Sultan of Johore on the mainland, was a deserted jungle save for a little fishing village. Sir Stamford Raffles in 1819 obtained it for the East India Company for a small fee and in two years the little trading centre he established had a population of 10,000. Singapore has been developed and maintained as a free port and is now a huge city of over 500,000 population, carrying on trade valued at $1,500,000,000 annually, with a shipping of all sorts amounting to 29,000,000 tons yearly, and is primarily a transshipping point. Its population has been drawn from all Asia, Oceania, the Malay Archipelago, Africa, Europe and America. Chinese predominate, making up one-half the population. Europeans, Americans and Australians number less than 10,000; and there are as many Japanese.

Rubber acreage (1928) was 337,000, and total Malayan production for the year was estimated at 450,000 tons.

The budget for 1929 calls for estimated revenues of 34,099,835 Straits dollars, and expenditures of 39,649,417. The Straits dollar = $0.5678 at par of exchange; average in 1928, $0.5628. In 1928 the revenue was $34,875,727; expenditure, $37,790,163. The public debt Dec. 31, 1927 was $59,257,302.

Imports, 1927, were 1,003,000,000 Straits dollars ($561,680,000 converted at $0.563, the average exchange rate for the year); exports, 1,057,000,000 Straits dollars ($591,920,000). Tin production in the Malay Peninsula in 1927 was 83,773 long tons (76,405 in 1926, 79,082 in 1925, and 80,674 in 1924). The United States took 46,370 tons in 1927, 44,513 tons in 1926 and 45,120 in 1925. Rubber exports from the Straits Settlements in 1927 were valued at £43,536,775; tin at £24,101,106; and pepper at £1,968,301.

There entered the port of Singapore in 1928, 8,705 merchant vessels of 14,693,015 tons; 20,685 native craft of 811,191 tons; and 62 men-of-war of 213,126 tons. Of this, British merchant vessels totaled 6,140,948 tons; Dutch, 3,220,857; Japanese, 1,917,205; French, 1,031,509; German, 786,067; Norwegian, 601,906; and American, 283,881.

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$5,623,206	$93,764,643
1923	7,352,567	153,790,206
1924	7,505,968	148,048,706
1925	11,221,024	313,959,163
1926	13,563,205	383,799,824
1927	13,627,110	277,784,466
1928	11,807,861	204,344,310

The Federated Malay States lie in the Malay Peninsula. They are *Perak*, area, 7,800 square miles; population, census of 1921, 599,055; *Selangor*, 3,156 square miles, population 401,000; *Negri Sembilan*, 2,550 square miles, population 178,762; *Pahang*, 14,000 square miles, population 146,064; total 27,506 square miles, population 1,324,890, of which 853,528 are males and 411,263 females.

Products are cocoanuts, rice, rubber, tapioca, pepper, camphor and nepah palms. The total area under rubber cultivation in 1926 was 1,231,257 acres, and 161,188 metric tons, valued at £34,783,031 were exported. Tin exported in 1926 amounted to 45,946 tons, in 1925 to 45,926 tons; gold output in 1926 was 14,475 ounces; in 1925 14,185 ounces; in 1924, 14,960 ounces.

The revenue, 1927, was 105,404,458 Straits dollars; expenditure, 93,263,915 Straits dollars. Debt, Sept. 30, 1928, 80,185,714 Straits dollars. Imports, 1927, £20,309,979; exports, £39,619,922.

The Unfederated Malay States, area, 23,355 square miles, and estimated population, all Mohammedans, 1921, 1,123,944, are five in number, Johore, Kedah, Perlis, Kelantan and Trengganu, each under a native Sultan and with a British adviser. Rubber is the chief export.

British North Borneo has 31,106 square miles area, with 257,804 population in 1921, chiefly Mohammedans on the seacoast, and aboriginal tribes inland.

Exports are mainly timber, sago, rice, gum and the tropical products.

Revenue, 1927, £454,588; expenditures, £256,440; imports, £1,224,705; exports, £1,978,596.

Brunei has been since 1888 a protected sultanate on the north side of the island of Borneo, between Sarawak and British North Borneo. Its area is about 2,500 square miles, and population, census of 1921, 25,454, of which 35 were Europeans. A British Resident is in control.

Revenue, 1927, £46,916; expenditures, £49,816; debt, £48,883.

Sarawak, the land of the white Rajah, is along the northwest coast of Borneo, between the mountains and the China Sea. Its coast line is 400 miles long and its area 42,000 square miles. Its population is estimated at about 600,000. The chief towns are the capital, Kuching, 23 miles up the Sarawak River, and Sibu, 60 miles up the Rejang River, which is navigable for large steamers. The chief exports are sago, pepper, gold, plantation rubber, gutta percha, gutta jelutong, cutch, petroleum, birds' nests, fish, oil nuts and sugar. The Rajah is H. H. Charles Vyner Brooke, great-nephew of James Brooke, the Englishman to whom the Sultan of Brunei gave the Government in 1842.

The output of petroleum in 1928, was 5,290,000 barrels; in 1927, 4,943,000 barrels; in 1926, 4,942,000 barrels.

Revenue, 1927, 6,243,065 Straits dollars; expenditure, 5,764,318 Straits dollars; no debt; imports, 25,664,546 Straits dollars; exports, 49,786,143 Straits dollars, of which rubber was 15,499,432; benzine, 16,712,282; kerosene, 4,072,574; fuel oil, 3,696,542; and crude oil, 2,835,368.

HONG KONG.

Governor General, Sir Cecil Clementi, K. C. M. G., appointed 1925.

British Hong Kong is a crown colony acquired in 1841, and lies at the mouth of the Canton River 60 miles from Canton. The island, 11 miles long area is 391 square miles, including the new territory, Kowloon, on the mainland. The population in 1923 was estimated at 681,800, non-Chinese being 14,500.

The colony suffered heavily in 1925, 1926 and 1927 in the strike and boycott of the Chinese.

Hong Kong is an important British station of great strategic value, commercially as well as naval.

Hong Kong is the gateway between the east and the west and one of the greatest trans-shipment ports in the world. The movement of shipping in 1923 was the largest in its history. Combined entrances and clearances, including junks and steam launches, totaled 778,222 vessels of 53,402,239 tons. Steamers entering the port numbered 6,321 of 12,979,033 tonnage. Over 65 per cent. of the tonnage was in the foreign trade, nearly one-half of it being British, nearly one-fourth Japanese, and one-tenth American.

Revenue, 1927, £2,134,453; expenditure, £2,084,506; debt about £1,500,000.

Imports in 1925, £43,484,410; in 1924, £75,055,085, and in 1923, £61,954,498; exports in 1925, £40,353,906; in 1924, £70,671,992, and in 1923, £61,372,331.

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$20,934,462	$15,303,632
1923	17,610,143	19,860,716
1924	17,476,124	16,489,838
1925	14,306,456	17,789,033
1926	12,819,076	11,293,111
1927	18,865,892	14,784,979
1928	21,977,505	13,572,895

WEIHAIWEI.

Weihaiwei is the Chinese Province of Shantung, and includes islands and the bay, which were leased in 1898. The area is 285 square miles, and the population was 154,416 in 1921. Under agreement made at the Shantung Settlement at the Washington Conference, January, 1922, Great Britain will restore the territory to China.

Total trade in 1928 was valued at $Mex. 17,650,100. Revenues, 1927-28, were $Mex. 275,946; expenditures, $Mex. 247,506.

UNION OF SOUTH AFRICA.

AREA, 472,347 square miles; divided, Cape of Good Hope, 276,966; Natal, 35,284; Orange Free State, 49,647; the Transvaal, 110,450.

POPULATION, census of 1921, 6,928,580; divided, Cape of Good Hope, 2,782,719; Natal, 1,429,398; Orange Free State, 628,827; the Transvaal, 2,087,636. Estimated Dec. 31, 1923, 7,234,753. Total Europeans, census of 1926, 1,676,000.

CAPITALS, Cape Town (seat of Legislature), population, census of 1921, 207,404; Pretoria (seat of Government), 74,052; other cities, Johannesburg, population, 288,131; Durban, 146,324; Port Elizabeth, 45,927; Kimberley, 39,320; Bloemfontein, 38,865, and six others having more than 10,000 but less than 21,000 whites.

Governor General, the Earl of Athlone, G. C. B., G. C. M. G., term expires December, 1930.

Premier, Gen. J. B. M. Hertzog (External Affairs).

Minister of Native Affairs, E. G. Jansen.

The Union of South Africa, referred to by some Britons as "The flower of British democratic development," includes the former colonies of the Cape of Good Hope and Natal, and the one-time Boer republics, the Transvaal and the Orange Free State. These were all united May 31, 1910, under self-governing privileges. Legislative power rests with a Senate of forty members, each with a £500 property qualification, eight appointed and thirty-two elected; and a House of Assembly of 135 elected members. Voters must be British subjects of European descent.

The Assembly: The general election of June 12, 1929, gave Gen. Hertzog's Nationalist party a clean majority over Gen. Smuts' South African party and the two Labor parties. Representation is: Cape, 53; Natal, 17; Transvaal, 55; Orange Free State, 18.

The Government, to which the British Parliament granted broadest powers, is on a very advanced platform of expression of the people's will. There is an elected provincial council in each state with an administration appointed by the Governor General which deals with local matters.

The government on July 24, 1929, announced plans for sending ministers to Washington, Rome and The Hague. Eric H. Louw, formerly Trade Commissioner to the United States and Canada, and later to London, is expected to be named as Minister. Establishment of an American Legation in Cape Town will follow.

The census of 1921 returned 1,519,488 whites and 5,409,092 colored; 4,697,813 were Bantu natives, 165,731 Asiatics and 545,548 of other races. Of the cities, Johannesburg, Cape Town, Pretoria, Port Elizabeth and East London alone returned a majority of white inhabitants.

The census of 1926 enumerated the European population only, with this result: Cape, 706,137; Natal, 158,916; Transvaal, 608,622; Orange Free State, 202,985; total, 1,676,660, being 10¾% increase since 1921.

The defense force of the Union has been entirely responsible for the military administration since Dec. 1, 1921, and the imperial soldiers have been withdrawn.

The railways owned by the several colonies prior to the Union were, in May, 1919, merged into one system, the South African Railways, under control of the Union Government. The total mileage in operation March 31, 1927, was 12,206. The capital expenditure up to March 31, 1926, was £125,088,377. Gross earnings, 1926-27 amounted to £24,093,347; expenditures, £19,437,177; surplus, £4,656,170. Passengers carried numbered 80,084,249. The mileage of privately owned lines was 691.

There were 76,679 miles of public roads in 1929 (Cape, 32,501; Transvaal, 20,207; Orange Free State, 11,571; Natal, 12,400); and about 40,000 farm roads. The actual mileage of good roads will not exceed 3,000. A systematized Federal Highway plan is under consideration.

The overseas shipping entering the ports in 1927 was 1,321 vessels of 5,267,556 tons; coastwise, 3,780 vessels of 9,698,803 tons.

The output of gold and diamonds from South Africa, from the earliest dates of discovery to Dec. 31, 1927, is given in the following table.

Province.	Gold.	Diamonds.
Cape of Good Hope	£21,947	£194,747,341
Natal	86,311	
Transvaal	961,597,235	48,398,119
Orange Free State		24,367,405
Total	£961,705,493	£267,512,865

The total value of the coal output for the Union up to Dec. 31, 1927, was £76,612,206, chiefly from Natal and the Transvaal; of tin, £6,054,977, chiefly from the Transvaal; and of copper, £25,484,000, chiefly from the Cape, but including, £4,478,016 from the Transvaal. The output of gold in 1928 was about 10,352,000 ounces, valued at £44,074,055 (the highest on record); in 1927, 10,123,491 ounces valued at £43,055,178; in 1926, 9,954,761 ounces, valued at £42,285,139; 9,597,592 ounces valued at £40,767,981 in 1925; and 9,585,040 ounces valued at £44,739,377 in 1924; diamonds, 1928, £12,000,000; 1927, 4,708,038 carats valued at £12,392,308; 1926, 3,217,000 carats valued at £10,692,000; 2,430,128 carats valued at £2,430,128 in 1925; and 2,440,398 valued at £8,033,408 in 1924.

The total mineral output for 1927 was valued at £61,546,801 (£59,084,230 in 1926). The number of natives employed in the mines, March, 1927 was 312,296.

The only uncontrolled sources of diamond production are alluvial fields in the Cape and the Transvaal. The output had never exceeded 200,000 carats in a year, but discoveries in the western part of the Transvaal in 1926 brought the production for that year up to 808,329 carats, valued at £3,983,681. The rush for Grosfontein farm field in Lichtenburg on March 4, 1927, was perhaps the greatest race in history. It was handled by the government mining commissioner and was a complete success. When the flag fell fully 25,000 runners, many trained athletes—some Olympic contenders—started in the three-mile dash to peg claims, while a crowd of about 100,000 looked on. A week before the rush was spoiled and declared illegal because then 12,000 broke away before the signal.

A fabulously rich diamantiferous area was discovered in April 1927, near the mouth of the Orange River in Namaqualand stretching down the South Atlantic Ocean to the Green River. The government has placed it under strict prohibition against prospecting.

A find of platinum in August, 1924, brought a rush to the Lydenburg district. The reef has been opened up and the value of the output was £93,307 in 1926 and £144,191 in 1927.

The agricultural and dairying industries have been well developed for African areas, and such produce is even shipped to the London market.

The Transvaal and Natal have each about 2,000,000 acres suitable for growing cotton. The total yield in 1927 was 11,822,612 pounds (24,936,775 pounds in 1926).

Livestock raising is one of the important industries, and about one-half of all the sheep in Africa, and one-quarter of all the cattle and all the goats, are in South Africa. There are (1926 census), 10,337,174 cattle; 856,040 horses; 126,909 mules; 755,280 donkeys; 103,668 ostriches; 38,858,777 sheep; 7,947,286 goats; 908,964 pigs. 1927: 10,412,466 cattle; 40,109,826 sheep; 7,565,613 goats; 848,272 pigs (horses, mules, donkeys and ostriches not enumerated). The yearly production of cattle hides and calf skins is 700,000, goat and kid skin, 2,500,000, sheep and lamb skins, 8,000,000, most of which is exported. The total in 1927 was valued at £3,786,877. The value of ostrich feathers exported in 1927 was £43,621; in 1926, £71,922; in 1925, £203,076; and 1924, £353,162.

The wool clip for 1928 was about 282,000,000 pounds; for 1927, 240,000,000 pounds, the export reaching 253,866,456 pounds.

Natal produced 13,388,000 tons of coal in 1928; and a sugar crop of 275,000 tons.

Progress is being made in the development of manufacturing to use the country's raw materials under a new protective tariff. The gross value of the industrial output in 1926-27 was £97,872,822. The number of establishments making returns was 7,172. During 1925 there were 1,512,107,260 kilowatts generated (not including what mining power plants used for mining power).

The state primary and secondary schools numbered in 1927, 4,665 for European children with about 336,459 pupils, and 3,501 for non-European children with 304,617 pupils; the number of teachers was 23,121 and the total state expenditure 7,597,672. There were 268 private schools for 18,839 white children, and 421 for 19,455 colored children; and 1,691 teachers. There are 10 universities with 219 professors and 6,460 students, including 370 music students.

The budget for seven years:

Year.	Revenue.	Ordinary Expenditure.	Extraordinary Expenditure.
1923-24	£24,252,888	£24,026,903	£12,229,000
1924-25	25,335,543	24,527,753	12,299,000
1925-26	26,986,778	26,315,220	13,667,000
1926-27	28,577,004	27,361,597	13,291,000
1927-28	29,672,000	27,672,000	13,470,000
1928-29	30,500,000	28,800,000	11,076,000
1929-30	.....	29,950,000	.....

The debt March 31, 1929, was £243,360,000 of which £189,382,079 is classed as productive, providing its sum interest of £8,177,160.

Imports were: 1928, £79,000,000; 1927, £73,955,308; 1926, £73,319,702; 1925, £71,065,433; 1924 £67,705,100; 1923, £57,836,761; 1922, £51,413,450; exports, 1927, £96,418,660; 1926, £80,651,515; 1925, £90,497,818; 1924, £82,107,900; 1923, £78,639,849; 1922, £64,978,524.

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$20,909,824	$8,203,210
1923	28,400,541	13,423,237
1924	36,020,181	7,726,542
1925	46,161,706	9,214,856
1926	51,079,969	19,826,854
1927	52,485,658	8,741,550
1928	57,015,909	9,208,986

South-West Africa, formerly German territory annexed 1884, occupies the Atlantic Coast from the Orange River to Angola. It was conquered by the armed forces of the Union in the World War, and surrendered on July 9, 1915, at Khorab. It is now administered by the Union under a mandate from the League of Nations, dated Dec. 17, 1920. It covers about 322,400 square miles and the native population is estimated at 227,750 with 24,511 (census of 1926) Europeans, between 7,000 and 8,000 of whom are Germans and the rest South African farmers. The native population is estimated at 208,300.

The discovery of a great field in nitrate of soda extending over 10,000 square miles extending from Marienthal beyond the Elephant and Nossob rivers was announced in July, 1929, by Prof. Smeath, of Cape Town University.

On Mt. Brukkaros, 60 miles from Keetmanshoop, is maintained a solar observatory for making accurate variations in the sun's heat by the Smithsonian Institution and the National Geographic Society. In Otjihaene near the Grootfontein railhead in the extreme northeast part of the territory has been discovered the largest known meteor, 10 x 10 x 6 feet and weighing 50 to 70 tons, embedded in a limestone ledge.

It has a very healthful climate, dry and temperate with variety as the country rises to mountainous elevations inland. It is essentially a stock-raising country. There are 1,431 miles of railroads.

The revenue 1927-28 was £631,500, and expenditure £1,117,002 (including £336,990 loan expenditure). The budget in 1928-29 was: Revenue, £748,000; expenditure, £1,194,111 (including £399,350 loan expenditure).

Imports, 1927, £2,490,816; exports, £3,475,561. Diamond exports in 1926 were 683,024 carats valued at £1,863,860; copper exports totaled 54,535 tons.

SOUTH AFRICA.

SOUTHERN RHODESIA.

Governor, Sir Cecil H. Rodwell, K. C. M. G., August 1928.

Premier, H. U. Moffat, (Native Affairs).

Southern Rhodesia lies in the central part of South Africa, extending from the Transvaal Province northward to the Zambesi River, with Portuguese East Africa on the east and Portuguese West Africa and Bechuanaland on the west. It has an area of 148,575 square miles; European population, census of May, 1926, 39,174; native population, estimated, 834,473. The country is rich in gold reefs and other minerals, but has proved to be a rich agricultural country, especially adapted to European settlers.

The legislature of 1927 established a policy of land segregation whereby out of a total of 96,000,000 acres, 48,000,000 is to be reserved for European occupation, 28,000,000 for native ownership, and 17,000,000 reserved for future determination. Acreage under crops 1923 was, European, 244,000; native, 1,273,915. Maize is the largest crop (267,400 acres in 1927); but tobacco attracts most attention, the yield for 1927 was about 17,000,000 pounds of Virginia tobacco, and 180,000 pounds of Turkish tobacco from 30,200 acres.

Fruit trees thrive. Dairy farming is on the increase. Cotton was grown on 62,858 acres in 1925. Stock raising is important, with (1927) 2,353,400 cattle, and 351,600 sheep.

Tle total output of gold from 1890 to Jan. 1, 1928, was £86,611,536. Coal raised in 1927 was 1,001,724 tons; chrome ore, 218,018 tons; and asbestos, 33,176 tons. Value of the mineral output in 1927 was £4,238,257; in 1926, £4,100,592; in 1925, £4,134,260; and in 1924, £4,478,449.

The total mileage of the railways in the two Rhodesias in 1928 was 2,468.

The two Rhodesias, Southern and Northern, have been under the administration of the British South Africa Company, which secured a Royal Charter Oct. 29, 1898.

The Victoria Falls in Southern Rhodesia on the Zambesi River are the greatest natural spectacle in South Africa. They are a mile wide and from 250 to nearly 350 feet high. The river forces itself through a hundred foot outlet into a yawning gorge that winds away for forty miles. The railroad bridge crosses this gorge nearly 400 feet above the water level.

Southern Rhodesia, on Nov. 6, 1922, voted in favor of responsible government and in consequence was formally annexed to the British Empire. A Governor, Cabinet and Legislative Assembly, with limited powers, took the reins of government on Oct. 1, 1923. Women vote.

Revenue, 1927-28 was £2,165,000; expenditures, £2,761,200; net debt, £4,095,000. Imports, 1927, £7,574,000; exports, £7,444,000.

Northern Rhodesia, now has the status of a Crown Colony. It extends from the Zambesi River north to the border of the Congo State and Tanganyika Territory. It has an area of about 291,000 square miles with a permanent European population (1925), of 4,624 and native population estimated at about 1,150,000. The country is mostly high plateau covered with thin forest. Much of it is suitable for farming and grazing. The lead mines yielded in 1927, 5,857 tons valued at £143,127; and copper, 3,290 tons valued at £197,231. The copper district being proved up has a potential production when fully developed of 1,000,000 tons a year. The total value of mineral production in 1927 was £360,337.

Revenue, 1927-28, was £474,683; expenditures, £518,666. Imports, 1927, £2,030,599; exports, £777,890.

Basutoland, with 11,716 square miles, and, by the census of 1921, 498,781 population, of which 1,603 were Europeans, lies in South Africa northeast from the Cape of Good Hope Province on an elevated plateau. It is well watered and has a fine climate. Stock raising is most important. Products are wool, wheat, cereals, with beginning of iron workings and coal production promised. The territory is governed by a resident Commissioner under the High Commissioner for South Africa.

It is in fact a reservation set apart for the natives, who are the most enlightened in South Africa and

have increased from 40,000 to 500,000 in a century. Whites are not permitted to own land in it.

The revenue for 1927-28 was £292,378; expenditures, £283,602. Under the new Native Tax Law every adult male pays £1 5s per annum and if he can afford more than one wife he pays £1 5s per annum for his wives up to a maximum of £3 15s.

Imports, 1927, £842,893; exports, £839,095.

Bechuanaland, area, 275,000 square miles and population, by the census of 1921, 152,983, is in the middle of Southern Africa, between South-West Africa and the Union of South Africa and Rhodesia. It is utterly undeveloped, but cattle growing and agriculture have gained momentum, and the live-stock already totals more than 600,000 head. Gold is mined, the 1926-27 output of both gold and silver being £16,020. It is a protectorate governed by a resident Commissioner.

Swaziland, with 6,678 square miles, and a population, estimated, 1923, of 117,877, lies at the southeast side of the Transvaal, in South Africa, and produces chiefly tobacco, corn, vegetables, sweet potatoes, and livestock. Some gold is yielded. The country is undeveloped. It is governed by a resident Commissioner under the authority of the High Commissioner for South Africa.

The trade of **British South Africa**, other than the Union of South Africa, with the United States for 1928 was: imports, $2,076,723 exports, $60,959.

BRITISH WEST AFRICA.

NIGERIA.

AREA, Protectorate of Northern Nigeria, 276,034 square miles; colony of Southern Nigeria and Protectorate, 91,894 square miles. Total, 367,918 square miles.

POPULATION, census of 1921, Northern Nigeria, 10,259,983; Southern Nigeria, 8,371,459; total, 18,631,442, including about 3,900 Europeans.

CAPITAL, Lagos.

Governor, Sir Graeme Thomson, G. C. M. G., K. C. B.

Nigeria lies in Western Africa, between Cameroon and Dahomey (French) on the Gulf of Guinea. The hinterland stretches back 600 miles to French West Africa. The tin, lead and iron ore industries are old and valuable. Nigeria is now the sixth largest tin producer in the world; production of tin concentrates in 1926 was 8,632 tons. Title is in the crown. Other products are palm oil, rubber, nuts, ivory, hides, livestock, ostrich feathers, drugs and tobacco.

Nigeria is a country, like most of Africa, of vast natural resources, with barely initial exploration done up to this time. The people, as in all Mohammedan countries, are backward, but Europeans with capital have gone in and are bringing resources into play. Slavery was abolished by ordinance in 1917, and slave-dealing suppressed.

Commerce is mostly by the trading stations common to such lands, at which simple manufactures are exchanged for native products. There are (1926) 1,470 miles of railroad.

Revenue, 1927-28, was: £6,304,663; expenditure, £7,086,775; debt, £23,559,209. Imports, 1927, 15,664,637; exports, £16,340,957; chiefly palm kernals, £4,438,886; palm oil, £3,374,550; cotton, £331,086; tin ore, £2,287,327; cocoa, £1,998,679; ground-nuts, £1,629,542, and hides and skins, £651,620.

Cameroon, 31,000 square miles, and 400,000 population, lies between British Nigeria and the French Congo in Western Africa. It is part of the former German colony Kamerun, the eastern and larger part of which went to France (which see). It is a region of fertile soils, and progress is rapid toward building up valuable agricultural production—cloves, vanilla, ginger, pepper and palm oil. Ivory is a large product.

The seat of Government is Buea and the administrator is the Governor of Nigeria. Its area and population are included in those of Southern Nigeria given above.

Gambia, area 4,010 square miles, and population, 1921, 210,530, is an independent West African British crown colony.

The Island of St. Mary on which is Bathurst, the seat of government, at the mouth of the Gambia river, is the Colony. The protectorate consists of only a six-mile wide strip of territory on each side of the river, and extends northeast for 200 miles from the coast as a thin wedge into the French colony Senegal. The river is navigable for ocean-going steamers for a considerable distance at all seasons.

Peanuts formed 95% of the exports in 1926, over 61,000 tons worth £863,000. Imports in 1927 were £956,741; and exports, £999,887, chiefly ground-nuts, £967,941.

The revenue, 1927, was £252,419; expenditure, £277,625.

THE GOLD COAST.

AREA, 91,690 square miles, including area of that part of Togoland under British mandate, 12,600 square miles.

POPULATION, census of 1921, 2,298,413, including Togoland, estimated 350,000. Europeans number 2,206.

CAPITAL, Accra; population, estimated, 38,000.

Governor, Sir Alexander R. Slater, K. C. M. G.

The Gold Coast lies along the Gulf of Guinea for 334 miles. The French Ivory Coast is on the west, and on the east is Togoland, formerly a German colony, and now divided by mandate of the League of Nations between Great Britain and France. The French portion, about 21,100 square miles, is attached for administrative purposes to Dahomey, in the east (which see); and the British, about 12,600 square miles, is administered by the Governor of the Gold Coast.

Under his administration also falls Ashanti, due north of the Gold Coast, and the Northern Territories, due north of Ashanti. These countries have enormous wealth in their forests, and the cultivation of cacao and rubber is being fostered.

There is a Government railway, 168 miles, from Seccondee to Kumasi, and a line from Accra to Kumasi.

Revenue, 1927-28, was: £5,217,639; expenditure, £4,714,947; debt, £11,791,000. Imports, 1927, £13,770,542; exports, £14,350,355. Chief exports, 1927, were: Cocoa, 209,910 tons, £11,727,566; gold bullion 189,571 troy ounces, £727,782; manganese, 369,205 tons, £682,962; diamonds, 460,959 carats, £512,159; kola nuts, 11,487,312 pounds, £191,380; palm kernels, 6,545 tons, £107,079; palm oil, 1,090 tons, £30,227; and rubber, 711,288 pounds, £30,738

SIERRA LEONE.

AREA, of colony, 4,000 square miles; of protectorate, 26,000 square miles; total, 30,000 square miles.

POPULATION of colony, census of 1921, 85,163; Europeans, 1,161; of Protectorate, census of 1921, 1,456,148. Total, 1,541,311.

CAPITAL, Freetown; population, 1921, 44,124.

Governor, Brig. Gen. Sir J. A. Byrne, K. B. E.

Sierra Leone lies on the west coast of Africa for 180 miles, between French Guinea and Liberia. In its capital, Freetown, it has the greatest seaport in West Africa, with an excellent harbor and a naval coaling station. The colony has been in British possession since 1767. The hinterland forms the protectorate, which extends inland about 180 miles.

All slaves, about 250,000 in number, held by natives were declared free on Dec. 31, 1927.

Revenue, 1927, was: £719,637; expenditure, 754,610; debt, £1,729,348. Imports, 1927, were valued at £2,112,024; exports, £1,767,259. Chief exports were palm kernels, 65,436 tons, £1,077,450; palm oil, 3,609 tons, £98,179; kola nuts, 4,462 tons, £268,915.

Tonnage entering and clearing Freetown, 4,058,059.

The trade of all British West Africa with the United States was:

Cal. Year.	Imports.	Exports.
1922	$6,816,284	$11,556,719
1923	8,126,657	17,497,461
1924	8,008,851	12,196,029
1925	10,688,077	17,349,299
1926	9,912,283	19,793,536
1927	13,776,953	23,945,098
1928	13,453,089	22,105,422

BRITISH EAST AFRICA.

Governor, Lieut. Col. Sir Edward Grigg, K. C. V. O., C. M. G., appointed in 1925.

Kenya, crown colony and protectorate, extends from the Indian Ocean northeast to Italian Somaliland, north to Abyssinia, west to Uganda, and south to Tanganyika; its boundaries are the Umba, Juba and Uganda Rivers. Its area is 245,060 square miles and estimated population of about 2,736,500 in 1926. This is exclusive of the territory on the Juba River (34,000 square miles, with 16,000 population), ceded to Italy by treaty of July 19, 1924, and added to Italian Somaliland. It had in 1926 about 12,521 Europeans, chiefly British, 30,583 East Indians and 10,500 Arabs.

In the northeast, stretching across the Equator, there is a tract of 200,000 square miles lying at an elevation of more than 4,000 feet, with a climate like that of California, vast rolling plains, crossed by rivers, dotted with lakes, where cotton and rubber can be grown, and two crops a year of food staples. Experts claim that enough cotton can be grown there to make the British textile industry independent of American supply. It is unexploited, occu-

pied only by roving natives and thronged with wild game. White men can live there in health as nowhere else in Central Africa.

The Europeans of Kenya passed laws reserving the highlands for white settlement, restricting the Indians to the lowlands and less healthy regions. The Indian settlers complained bitterly of the discrimination practiced against them, shutting them out from desired land and demanding political representation according to number, as equal citizens of the empire. The British colonists insisted that Kenya should remain a European colony in which their power should be dominant, and the British Government gave decision in their favor on July 25, 1923, in a Parliamentary paper to the effect that responsible self-government for the colony is out of the question; that the Indian demand for equal franchise cannot be granted, but that the Government is prepared to grant the Indians and Arabs representation on the Legislative Council through the communal system of election; that the elected members of the council shall comprise five Indians, one Arab and eleven Europeans. This leaves the franchise unchanged as regards white settlers. The policy of segregation as between Europeans and Asiatics in townships must be abandoned, but the existing practice of reserving agricultural land in the highlands for British and Europeans must be maintained.

Nairobi, a famous centre for big game hunting, is the capital. A Government railroad runs from Mombasa, on the coast, through Nairobi to Lake Victoria Nyanza, 618 miles.

Revenue, 1927, was: £2,846,110; expenditure, £2,515,115; debt, £10,000,000, chiefly for railroads and public works. Imports were, £7,697,180; exports, £5,397,216, chiefly cotton (mainly Uganda), £1,692,568; coffee, £1,310,701; maize, £505,893; fibres, £472,024; hides and skins, £349,875; and ivory, £65,985.

Tanganyika was formerly German East Africa, and was taken by the British in 1918, the Urundi and Ruanda districts going to Belgium, and the "Kionga Triangle" to Mozambique (Portuguese East Africa). It reaches from the coast to Lake Tanganyika and from Lake Nyassa to Victoria Nyanza. It is administered under a mandate from the League of Nations, by a Governor (D. J. Jardine, acting, since Jan., 1929), with headquarters at Dar-es-Salaam, an attractive German-built city of 30,000, from which the railroad runs to Lake Tanganyika.

The governor, Sir Donald Cameron, in his opening address to the new legislative council in 1926, said: "There is no provision in the Mandate for its termination or transfer. Tanganyika is a part of the British Empire, and will remain so."

The area is 373,494 square miles, and the population, in 1926 was estimated at 4,330 whites and 4,310,000 natives.

Forest wealth is large, and there is much land susceptible of agricultural development for the production of tropical fruits and other foodstuffs. Domestic animals figure in the wealth of the people, who are extremely crude and uncivilized. The total in 1927 was, 4,705,625 cattle, and 4,778,540 sheep and goats.

The western part of Tanganyika is a paradise for big game. There are many huge extinct craters, about 125 in number, west of the gorilla country, Kilimanjaro; that Ngoro Ngoro is surrounded by escarpments 2,000 feet high, is thirty-five miles wide and is crowded with game. Announcement was made in 1923 that it had been bought by Sir Charles Ross, of Scotland, who will protect it as a game preserve.

The revenue in 1927-28 was: £1,904,017; expenditure, £1,707,196; loans for capital improvements from the Imperial Government aggregate £3,135,446, and £2,070,000 additional was raised on the London market in June, 1928.

Imports, 1927, were valued at, £3,672,064; and exports, £3,440,576. Chief exports, 1927, were sisal, 33,012 tons, valued at, £1,160,735; cotton, 88,272 centals, £361,916; coffee, 131,899 dwts., £163,420; ground-nuts 14,147 tons, £238,082; and hides and skins, 55,467 cwts., £236,772. The export of gold was 9,548 troy ounces, £36,203, and diamonds, 18,095 carats, £102,754. In 1927, 464 ocean-going steamers in the foreign trade, of 1,932,219 tons, entered the five ports.

The Uganda Protectorate, in East Africa, has 110,300 square miles, including 16,377 square miles of water, and the population in 1928 was estimated at 3,157,000. The country is well advanced in civilization, 750,000 of the people belonging to the intelligent class. Cotton is the chief product. From 572,800 acres in 1926, 166,600 bales were produced. Since the British took it over there has been expansion of foreign trade by 200 per cent.

Revenue in 1927 was £1,292,306; expenditure, £1,430,976; debt, £1,107,595. Imports, 1927, were £1,819,961; exports, £2,310,260, chiefly cotton and cotton seed, coffee, rubber, hides and skins, and ivory.

For the adornment of the natives of British East Africa, 35,973,084 yards of cotton cloth, valued at £1,599,709, and 87 tons of brass wire, valued at £9,935, were imported in 1924 through Kieya.

The trade of all British East Africa with the United States was:

Cal. Year.	Imports.	Exports.
1922	$1,556,158	$918,209
1923	1,455,287	1,578,491
1924	2,561,522	1,657,249
1925	3,839,779	3,343,909
1926	3,977,063	2,257,733
1927	4,842,691	1,614,399
1928	4,890,471	2,810,216

Nyassaland, formerly known as British Central Africa, is situate on the southern and western shores of Lake Nyassa, and extends as far as Zambesi. It has 37,890 square miles, and by the census of 1926 had a population of 1,656 Europeans and 1,290,885 natives.

Revenue in 1927 was £346,341; expenditure, £266,519; debt, £755,002. Imports, £938,461; exports, £960,869 (tobacco, £780,964, cotton, £45,834 and tea, £56,640).

ZANZIBAR.

Zanzibar is an island of 640 square miles, 23 miles off the eastern coast of Africa, having 196,733 population in 1910. Lord Salisbury, in 1890, traded Heligoland in the North Sea with Germany for it.

It is governed by a Sultan, Seyyid Khalifa ibn Harub, K. C. M. G. (succeeded Dec. 9, 1911), but is administered by a British Resident, A. C. Hollis. The Island of Pemba, thirty miles to the northeast, area 380 square miles, is included in the Government. The total population of the Protectorate, census of 1924, was 216,790.

The people are Mohammedans, and their clove industry yields the bulk of the world's supply, there being, estimated, 48,000 acres, with 4,750,000 trees devoted to that product, the average output of the last 20 seasons being 17,940,000 pounds, and 5,200,000 pounds of clove stems. The copra industry is next, with 55,000 acres, on which 2,500,000 cocoanut trees produce.

Manufactures are pottery, rope, soap, oil, jewelry and mats.

Revenue, 1927, £544,083; expenditures, £642,292. There is no debt. Imports, 1928, 17,677,000 rupees; exports, 14,624,480 rupees. Cloves formed the largest item of export in 1926, being valued at 8,573,000 rupees; and in 1927 at 10,928,913 rupees (rupee equals 36.5 cents.)

Zanzibar, population 35,000, has one of the finest ports in Africa. Ocean-going shipping entered in 1927 numbered 353 vessels of 1,368,609 net tons.

MINOR AFRICAN POSSESSIONS.

Mauritius, an island in the Indian Ocean, 500 miles east from Madagascar, has 720 square miles, and in 1921, 385,074 population, of which 265,884 were Hindus. Port Louis, population 50,308, is the capital and chief seaport.

Revenue, 1926-27, was 14,682,807 rupees; expenditure, 16,461,062 rupees; debt, £1,765,724 mostly for public works. Imports, 1927, were valued at £3,679,042; exports, £3,774,203, mostly sugar, the crop in 1928 being 230,000 metric tons, and in 1927, 217,958 tons.

Seychelles and tributary dependencies include 90 islands of 156 square miles, and a 1925 population of 25,847, estimated, lying in the Indian Ocean near Mauritius. The capital is Victoria, a port with an important coaling station. From 23,000 acres, in 1920, there were 23,000,000 cocoanuts produced, other products being phosphates, mangrove, bark, livestock and fish.

Revenue, 1927, was, £49,134; expenditure, £44,216; debt, £2,805. Imports, 1927, 1,829,710 rupees; exports, 2,159,918 rupees.

Somaliland, a protectorate, with 68,000 square miles, and 347,000 population, all Mohammedans, is in Northeast Africa, on the Gulf of Aden, with Abyssinia to the south and west and Italian Somaliland on the east. The chief town is Berbera, population 30,000, and the products skins, resin, gum, cattle and sheep.

St. Helena, the island made famous by the exile of the Emperor Napoleon, is 1,200 miles off the west coast of Africa, has forty-seven square miles, and, 1921, 3,658 population. Fruits, nuts, timber, flax, lace making (flax the chief) are the industries. It is an important naval coaling station, and, although volcanic and small, has great strategic value.

Revenue, 1927, £20,486 (including Imperial grant of £2,500); expenditure, £16,740. There is no debt, but assets of £8,701. Imports, 1927, £49,678; exports, £34,274.

AUSTRALIA, COMMONWEALTH OF

AREA, 2,974,581 square miles, divided, States: New South Wales, 309,432; Victoria, 87,884; Queensland, 670,500; South Australia, 380,070; West Australia, 975,920; Tasmania, 26,215; territories: Northern Territory, 523,620; Federal Capital Territory, 940.

POPULATION, census of April, 1921, 5,495,734, divided: New South Wales, 2,100,371; Victoria, 1,531,280; Queensland, 755,972; South Australia, 495,160; West Australia, 332,732; Tasmania, 213,780; North Territory, 3,867; Federal Capital Territory, 2,572; full blood aborigines, not enumerated, estimated 60,000. Estimated population, Dec. 31, 1928, 6,336,777 (excluding aborigines).

CAPITAL, Canberra. State capitals: Sydney, New South Wales, population, including suburbs, 1927, 1,101,000; Melbourne, Victoria, 975,160; Brisbane, Queensland, 295,430; Adelaide, South Australia, 327,700; Perth, Western Australia, 191,800; Hobart, Tasmania, 56,200.

Prime Minister, James Henry Scullin, Labor, (Foreign, Industry).

Treasurer, Edward Granville Theodore.

Commissioner-General for the Commonwealth in the United States, Herbert Brookes. *Official Secretary*, D. M. Dow, office, 25 Broadway, New York City. Australian diplomatic interests are represented in Washington by the British Ambassador, and consular interests are cared for by the British Consuls.

Australia, itself a continent, is situated between 10° 41′ and 39° 8′ south latitude, or including Tasmania 43° 39′, and 113° 9′ to 153° 39′ east longtitude in the Pacific Ocean, with the Indian Ocean on the west, and the Southern Ocean on the South. The states of the Commonwealth are: New South Wales, Victoria, Queensland, South Australia, Western Australia, and Tasmania, formerly known as Van Diemen's Land, an island the size of the States of Vermont, New Hampshire and Massachusetts, which lies off the southeast corner of the mainland. The territories are the Northern Territory and the Federal Capital Territory. Altogether the Commonwealth is very nearly as large as Continental United States.

In the east mountains rise to about 7,000 feet altitude. The central portion extends westward in rolling plains until higher elevations are reached along the west coast. The Murray River, rising on the slopes of the mountains, is navigable inland for 2,000 miles. The climate, being in the Southern Hemisphere is temperate in the south, and in the north tropical. The interior portions are subject to high temperature, and in all parts the climate is regarded as healthful, being dry. Australia lies within the zones of the Southeast trades and prevailing westerly winds. The heaviest rains are precipitated along the Pacific slopes to the north of Lat. 30°. The highest coastal rains occur on the northwest coast of Western Australia. The westerly winds, which skirt the southern shore are responsible for the reliable rains over the southwest portion of Western Australia, the southeast areas of South Australia, a great part of Victoria, and the whole of Tasmania.

The development of Australia has been made in 150 years. The Commonwealth was proclaimed on Jan. 1, 1901. Australia is governed on the Federal plan with a Parliament of Senate and House of Representatives. The Commonwealth is one of the important units in the British Empire, with complete self-government similar to that obtaining in the Dominion of Canada. Like Canada, it accedes to Imperial requests voluntarily in all economic matters as well as military and naval, but "with a mind of its own." The loyalty of Australia to the British Empire was shown in the great war, in which her troops served with great distinction across the world on Gallipoli, in Palestine and in France.

A Federal Capital Territory of 940 square miles has been set up between Sydney and Melbourne, seventy miles inland, but connected with a fine landlocked harbor on Jervis Bay by a corridor. A city planned to reflect the finest features of modern cities has been laid out on ground plans designed by Walter Burley Griffin, an American architect. Parliament and Administrative Buildings, as well as a number of dwelling, shopping centres, etc., have been built. The first session of the Commonwealth Parliament at Canberra was opened with state by the Duke of York on May 9, 1927.

Land in Canberra cannot be held in fee simple, the title always resides in the Government. Leases may be obtained (maximum 99 years) by bid at auction and upon payment of the Government rental at 3% on the unimproved capital value of the land as fixed by the final bid. The first sale of leases took place in December, 1924. The first reappraisement of land takes place in 20 years and new reappraisements every 10 years thereafter. Building plans must be approved. A handsome system of parks along the Molongio River with an arboretum and broad boulevards has been planned, and over £5,000,000 expended before the opening of the Parliament buildings.

The registered electors for the House of Representatives numbered 3,266,739 in 1925, and the vote polled was 2,987,200. Under the Compulsory Voting Act, an elector failing to vote without a vaild reason is liable to a fine of $10. Of the men on the register, 91.63% voted; of the women, 91.14%.

A coalition of Nationalists and Country party carried the election of Nov. 14, 1925 with 51 seats to 24 Laborites, and was returned to power at the election of Nov. 17, 1928, with a majority of 13.

Prime Minister Stanley M. Bruce was defeated in the House by one vote following the defection of William M. Hughes, war-time Prime Minister, on his bill to repeal the act providing for the Federal System of Industrial Arbitration. He dissolved the House, and the general election of Oct. 12, 1929, returned: Laborites, 46; Nationalists, 14; Country Party, 10; Independents, 5. Prime Minister Bruce, four other ministers and 13 other members were defeated. J. H. Scullin (Yarra, Vic.), became Prime Minister of the Labor Government.

The Government sought ratification by a national referendum on Sept. 4, 1926, of two amendments to the Constitution, the first to make the Federal Industrial Arbitration Court the final industrial tribunal, with power to overrule every other industrial authority. The second to give the Commonwealth Government the power to provide food and other necessaries whenever the safety of the state is threatened by a strike. Both failed. The Prime Minister carried only two of the states and had to win four in order to amend the Constitution. In the total of votes cast he was in a decided minority.

The Commonwealth Arbitration Court in January, 1927, fixed a minimum wage for adults, even if unskilled; it varies from $22.23 for New South Wales, to $19.80 for Western Australia.

Homes provided by the Australian War Service Homes Commission up to Dec. 31, 1927, totaled 31,772, expenditures amounted to £22,172,600.

Australia's net immigration gain for the year ending December 31, 1927, was 48,924, and for 1928 it was 27,232, 15,705 were males and 11,527 were females. During the years 1923 to 1926 the increases amounted to 37,540; 43,749; 37,357; and 42,220 respectively. On April 8, 1925, an agreement was entered into between the British and Australian Governments under which it is proposed to furnish to the Government of the State loan moneys at a low rate of interest to enable suitable areas of land to be made available for settlement or to enable public works to be carried out to aid in developing settlement. The maximum amount of loan moneys provided for in the agreement is £34,000,000. If full advantage is taken of the proposal 450,000 settlers will be absorbed during a period of ten years. Special concessions are granted to immigrants in regard to cost of transport, financial assistance, etc.

AGRICULTURAL DEVELOPMENT.

Products are not dissimilar to those of the United States. The returns for 1926-27 show 17,772,000 acres under crops, the chief crops and acreage being:

	Acreage.	*Bushels.*	*Yield Per Acre.*
Wheat	11,687,919	160,761,886	13.75
Oats	844,114	12,571,203	14.89
Barley	370,943	6,931,053	(a) 18.30
Maize	286,178	6,970,273	24.36
		Tons.	
Hay	2,699,631	3,487,352	1.32
Potatoes	141,363	379,849	(b) 2.68
Sugar Cane	284,828	5,155,916	15.87

(a) Malting barley; other barley 21.13.
(b) Ordinary sweet potatoes, 3.48.

The wheat yield in 1927-28 was 116,737,082 bushels from 12,263,979 acres.

The figures for 1926-27 show that 220,000 acres of orchards yielded fruit valued at £8,198,000. Exports of fruit were:

	Pounds. 1926-27.	Pounds. 1927-28.	Value. 1928-29.
Fresh fruit	£ 803,260	1,636,000	709,671
Dried fruit	1,647,172	1,601,832	2,300 503

A Dried Fruit Export Control Board has been formed to develop the market in Australian dried fruits, and a selling organization has been established in London for this purpose.

The total forest area is not known, but the various State Governments are aiming at reserving 24,500,000 acres of which 12,137,659 acres are already per-

manently dedicated and 8,082,197 acres are held as temporary timber reserved.

The total mineral output up to the end of 1927 was valued at £1,152,000,000; of this, £626,000,000 was gold. The output of gold, which reached 2,721,000 fine ounces in 1910, has steadily declined; the amount for the last five years being 1923, 712,274; ounces; 1924, 675,937 ounces; 1925, 559,188 ounces; 1928, 521,315 ounces; and for 1927, 508,017 ounces.

The value of the output of the principal minerals in 1927 was: Gold, £2,159,073; silver and lead, £3,773,756; copper, £607,038; tin, £842,430; zinc, £1,178,119; iron, £1,448,641; and coal £12,259,769. The output of pig iron in 1928 was 410,873 tons, and of steel ingots 410,031 tons.

The value of Australian production for the fiscal years, 1926-27 and 1927-28 in thousands of pounds was:

	1926-27.	1927-28.
Agricultural	£98,295	£84,256
Pastoral	111,718	125,068
Dairy, poultry, and bee farming.	46,980	50,261
Forestry and fisheries	12,790	12,181
Mining	24,007	22,983
Manufacturing	153,634	158,562
Total	£447,424	£453,311

The increase in value of product of the manufacturing industries has more than doubled since the last pre-war year. More than one-half of the industrial establishments are in New South Wales. Of the total number of factories in 1926-27—21,579—New South Wales had 8,222 and Victoria, 7,690. The statistics for the years 1924-25 and 1926-27 were:

	1924-25.	1926-27.
Number of factories	20,795	21,579
Number of employees	439,949	467,247
Salaries and wages paid	£81,360,021	£90,575,166
Value of raw materials worked up	£221,993,978	£232,643,518
Total value of output	£380,843,986	£408,692,838
Value of land and buildings	£91,241,907	£103,345,178
Value of plant and machinery	£109,242,900	£116,747,185

Under the stimulus of Government guarantees cotton growing has progressed during recent years, and in 1926-27, 18,800 acres were picked for a production of 9,069,000 pounds of unginned cotton.

The total mileage of Government railways open for traffic in 1926-27 was 25,523. The cost of construction and equipment was £303,785,388. The net earnings on all Government railways in Australia in 1926-27 amounted to £8,601,000 including £27,000 on Federal railways. Two of the States showed losses. There were 968 miles privately owned railroads open for general traffic and 2,176 open for special traffic. The Premiers have adopted 4 feet 8½ inches as the standard gauge on the recommendation of a royal commission, but at June 30, 1928, no action had been taken in regard to a general conversion but some subsidiary lines are being built.

The Commonwealth government has enacted a Federal Aid highway law in which all the states have joined under which the Commonwealth provides four-sevenths where the state provides three-sevenths on the expenditures for construction of approved trunk highways. The Federal Aid grant is a total of £2,000,000 a year. Up to December, 1928, £5,450,000 had been expended.

Invalid and old age pensions allowed by the Commonwealth Government were increased to £52 per annum with a maximum amount allowable of £84.10s. A permanently blind person may receive a pension which will make his income together with his pension equal to £221 per annum or such other amount as is declared to be a basic wage. The number of persons receiving pensions on June 30, 1927, was: invalid, 152,399; old age, 133,234; and war pensions, 259,821. The Commonwealth also grants a maternity allowance under an Act passed on Oct. 10, 1912, and from that date until June 30, 1927, 1,952,640 claims, each for £5, were passed for payment.

There were 10,203 and 1,761 state and private schools respectively, with average attendances of 730,571. There are six universities, one situated in each State capital. Religious freedom is in evidence, 45.04% of the population belong to the Church of England; Roman Catholic, 21.53%; Presbyterian, 12.09%; and Methodist, 12.01%. It is possible that the percentage of Roman Catholics is slightly underestimated.

Military training for all male inhabitants between the ages of eighteen and twenty-six years is compulsory; but the Labor government on Nov. 1, 1929, announced its decision to substitute volunteer military training. The total strength of the land forces as of Aug. 1, 1927, was 53,876, of which number 1,748 were in the permanent army. The strength of the naval forces on Jan. 15, 1928, was 10,662. The Royal Australian Air Force was established on Aug. 13, 1921. The total defence expenditure for the year 1926-27 was £5,658,698, of which £421,132 was expended from loan.

In December, 1920, the Commonwealth Parliament passed the Air Navigation Act, the objects of which were to carry out the provisions of the Convention on Air Navigation, signed in Paris, Oct. 13, 1919, and to apply the principles of the convention not only to international flying, but to internal flying in Australia, and generally to legislate by regulation on the subject matter. A Controller of Aviation was appointed at once to administer the act and regulations. Aerial mail services are in active operation from Perth to Derby on the west coast of Western Australia; from Charleville to Camooweal and Cloncurry to Normanton, Queensland; from Sydney to Adelaide, and from Hay to Broken Hill to Melbourne. Approximately 1,850,000 passenger miles have been flown and 1,300,000 letters carried. The route mileage of the existing subsidized services is 3,292, but when the newly approved lines are in operation this figure will be increased to over 7,000 miles.

The merchant marine of Australia and New Zealand together, July 1, 1929, was 543 steamers of 617,270 net tons, and 60 motorships of 51,483 tons.

BUDGETS AND DEBTS.

The revenue and expenditure of the several states for the fiscal year 1926-27, including railway receipts and expenditure and the public debts of the states on June 30, 1927, were:

State.	Revenue.	Expenditure.	Public Debt.
N. S. Wales.	£44,149,566	£42,690,634	£240,781,363
Victoria	27,128,700	27,744,903	146,404,530
Queensland.	16,147,787	16,490,903	105,734,916
S. Australia.	10,754,897	11,834,947	90,284,162
W. Australia	9,750,833	9,722,588	71,501,913
Tasmania	3,040,220	2,855,077	24,516,688
Total	£111,002,003	£111,339,103	£679,223,572

The premiers of the several States at Melbourne in June, 1927, accepted a proposal for adjusting the financial relationship between the States and the Commonwealth. The Commonwealth takes over the debts of the States, and for a period of 58 years from July 1, 1927, will apply on the service thereof a sum equal to certain fixed payments made by the Commonwealth in 1926-27 to the States. The States are to make up the balance of interest, and both parties are to set up a sinking fund calculated to extinguish the debt in 50-60 years. All future borrowings are to be arranged by the Commonwealth acting through a Federal Loan Council consisting of representatives from each State. A referendum to incorporate it in the Federal Constitution was carried by a large majority Nov. 17, 1928.

A £7,000,000, 5¼% 10-year loan, issued at par by the Commonwealth for the States in June, 1929, was heavily oversubscribed. A £8,000,000 Commonwealth Loan was floated in London earlier in the year.

The total gross debt of the Commonwealth as of March 31, 1928, was £485,400,161, of which £172,730,984 was payable in London; £23,514,435 in New York, and £289,154,742 in Australia. That part classed as war debt was on Dec. 31, 1927, £293,551,287.

Revenue and expenditure (from the Consolidated Revenue Fund) of the Commonwealth for the last seven years were:

Year.	Revenue.	Expenditure.
1922-23	£64,720,635	£63,700,485
1923-24	66,017,203	68,354,624
1924-25	68,854,809	68,336,432
1925-26	72,285,806	75,109,438
1926-27	78,168,235	75,532,638
1927-28	76,670,222	82,120,459
1928-29	63,779,000	66,138,000

The accumulated deficit on June 30, 1929, was £4,988,000

The Commonwealth Bank, founded in 1912 with no capital other than a $50,000 loan from the Commonwealth Treasury, and for all the obligations of which the Commonwealth is responsible, had on June 30, 1927, made profits amounting to £6,031,514 and assets of £139,441,653, inclusive of note issue department. Its notes outstanding amounted to £44,628,226 May 28, 1928, with a gold reserve of £22,560,770, or nearly 51%, the bank having had the right to issue notes since December, 1920.

The principal source of revenue is derived from agriculture and pastoral pursuits. Wool is the chief export, and some of the finest qualities of merino wool, which attract buyers from all parts of the world, are grown in Australia.

The number of sheep on Dec. 31, 1928, was 106,115,000, the highest recorded since 106,421,000 in 1891; flocks having been reduced by drought and

other causes to 53,675,000 in 1902. The wool clip in 1928-29 was estimated at 950,000,000 pounds; that of 1927-28 was 865,000,000 pounds and of 1926-27, 924,000,000 pounds.

The exports of wool in 1928-29 were valued at £55,908,868 for greasy; £5,543,420 for scoured; and £166,957 for tops. In 1927-28, the values were £58,796,318 for greasy (688,844,600 pounds); £6,812,601 for scoured (53,844,900 pounds), and £438,199 for tops. Sheepskins exported in 1928-29 were valued at £4,588,828 and in 1927-28 at £4,453,149.

Exports of frozen beef in 1928-29 were valued at £2,888,287 (in 1927-28, £2,377,967); frozen lamb, £1,423,440 (in 1927-28, £931,120); and of frozen mutton, £742,603 (in 1927-28, £257,386); exports of butter in 1928-29 were valued at £7,543,187 (in 1927-28, £6,905,933); and of wheat in 1928-29, £20,372,624 (in 1927-28, £14,629,899).

Imports are chiefly textiles, petroleum products, machinery, and automobiles and parts.

Imports and exports were:

Fiscal Year.	Imports.	Exports.
1923-4	£140,618,293	£119,487,164
1924-5	157,143,296	162,030,159
1925-6	151,638,178	148,562,209
1926-7	164,716,594	144,895,183
1927-8	147,944,970	143,213,970
1928-9	143,628,033	144,780,175

Great Britain takes the largest portion (about 37%) of Australian exports, then follow France, Japan and the United States. Very heavy exports go from the United States to the Commonwealth. Australia is America's largest foreign market for automobiles.

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$80,520,340	$35,782,464
1923	119,389,076	41,089,001
1924	125,177,672	32,868,121
1925	148,523,955	55,110,266
1926	168,694,795	45,738,549
1927	159,125,666	38,626,656
1928	141,295,271	31,657,750

AUSTRALIAN POSSESSIONS.

Papua, or British New Guinea, is the south-eastern part of the Island of New Guinea north from Australia. Its area is estimated at 90,540 square miles with an estimated native population of 275,000, the people being crude tribes among whom the British are carrying civilizing work. The estimated white population in 1927 was about 1,400. The interior is partially unexplored. Queensland annexed the territory in 1883, and after several shifts control was taken over by the Federal Government of Australia in 1901, and by proclamation of September 1, 1906, it was declared the Territory of Papua. It is administered by Australia which gives it an annual subsidy of £50,000.

Revenue, 1928, £107,052; expenditure, £158,964; imports, £403,561; exports, £350,363.

Territory of New Guinea, formerly German New Guinea, the northwest quarter of the island, was placed after the war by the League of Nations under mandate to Great Britain. It is administered by Australia. It includes the **Bismarck Archipelago,** 13,000 square miles, and the former **German Solomon Islands,** 3,400 square miles. The total area of the mandated territory is about 91,000 square miles, with a native population estimated roughly at 425,000. Revenue 1927-28, was £305,522; expenditure, £280,190; imports, £660,753; exports, £1,079,855.

Norfolk Island. In 1913 the Federal Parliament provided for the taking over of this island as a territory of the Commonwealth and since July 1, 1914 it has been administered by the Department of Home and Territories. The island has an area of 8,528 acres. On June 30, 1927 the population numbered 853. The soil is very fertile and is suitable for the cultivation of citrus fruits, bananas and coffee.

Imports in 1926-27 were valued at £27,900, and exports, £13,600.

Nauru Island, formerly German, was mandated by the League of Nations to the British Empire. Its area is about 8 square miles; population, 1927, 2,163. It has valuable phosphate deposits, and exported 318,185 tons in 1927 and 274,935 in 1926.

NEW ZEALAND, DOMINION OF

AREA, New Zealand proper, 103,285 square miles, divided, North Island and adjacent islets, 44,131; South Islands and adjacent islets, 58,120; Stewart Island and adjacent islets, 662; Chatham Islands, 372. "Outlying" islands, 284; "annexed" islands, 293; grand total, 103,862.

POPULATION, census of April 20, 1926, 1,407,165; by provincial districts, Auckland, 424,925; Taranaki, 65,569; Hawke's Bay, 67,653; Wellington, 273,601; Marlborough, 18,568; Nelson, 50,545; Westland, 15,025; Canterbury, 213,746; Otago, 149,579, Southland, 65,173; to which must be added the Maoris, 62,781. Increase over 1921, 135,501, or 10.66%.

CAPITAL, Wellington; population, census of 1926, 121,324. Chief cities, Auckland, population, 1926, 192,176; Christchurch, 118,408; Dunedin, 85,103.

Governor General, Gen. Sir Charles Fergusson, Bart., G. C. M. G., K. C. B., etc.

Prime Minister, Sir Joseph G Ward, K.C.M.G (Finance, Foreign Affairs), United Party, Dec 1928.

Official Representative of Customs Department in Canada and the United States, W. J. Stevenson, 44 Whitehall St., New York City.

New Zealand lies 1,200 miles east of Australia, in the Pacific Ocean. The group is 1,000 miles long and 180 across at the broadest part, with a coast line of 3,000 miles. It extends north and south from 35° southern latitude to 46°. It consists of two principal islands, North Island (44,131 square miles); and South Island (58,120 square miles), and Stewart Island, (662 square miles). Auckland Islands (about 330 square miles) 200 miles south and uninhabited; Chatham Islands (375 square miles) 536 miles east; the Cook Island group (280 square miles) 1,500 miles northeast, with a population of 13,209 and of which Rarotonga is the largest, and some small uninhabited Islands, are also under the New Zealand flag. New Zealand proper is about the size of New York, Pennsylvania and New Jersey.

The agricultural possibilities are very great, two-thirds of the area being tillable, with 12,500,000 forested. The actual tilled area in 1927 was 18,830,436 acres, of which 16,680,348 were sown to grass; 3,112,892 acres of crown land were open to settlement March 31, 1928. The area of crown lands leased on that date was 18,014,185 acres. Production in 1928 was: Wheat, 9,541,000 bushels from 260,987 acres (7,952,000 bushels from 220,083 acres in 1927); oats, 3,852,000 bushels from 88,223 acres (4,997,000 bushels from 117,326 acres in 1927); barley, 862,000 bushels from 21,091 acres (1,243,000 bushels from 29,886 acres in 1927). The production of wheat was very high, being 36.56 bushels per acre.

The census of livestock in 1928 was: 307,160 horses; 3,530,811 cattle; 27,133,810 sheep; and 586,704 pigs. The wool export in 1927 was 220,500,720 pounds; 1926, 213,154,399 pounds; 1925, 205,726,856 pounds; 1924, 206,189,911 pounds; and 1923, 217,566,091 pounds; (wool exports by fiscal years were: 1928-29, 575,632 bales; 1927-28, 543,712 bales). Frozen meat export in 1927 was 3,364,965 cwt.; (in 1926, 3,034,356 cwt.); butter, 1927, 1,455,539 cwt.; (1926, 1,168,040 cwt.); cheese, 1927, 1,492,792 cwt.; (1926, 1,461,548 cwt.).

The total number of farm holdings was 85,628 holding 43,587,698 acres. The small holdings under 50 acres numbered 29,336 (473,486 acres). Holdings of 640 acres and above numbered 11,290 (33,153,336 acres). There were 55 holdings of over 50,000 acres, with a total of 4,836,928. In 1927 there were 102,335 males and 30,464 females engaged in agricultural, pastoral, and dairying pursuits. The number of immigrants (net) for the year 1927 was 2,428; for 1926, 11,860; for 1925, 12,674; for 1924, 9,222; and for 1923, 6,820.

Manufacturing establishments in 1926-27 numbered 5,088, with 81,904 employees and plants valued at £62,723,125 and products valued at £83,012,503, nearly half food products. The production of coal in 1928 was 2,436,689 tons (1927, 2,366,740 tons) of which 125,093 tons were exported (1927, 143,440 tons). Gold exported in 1927 amounted to £534,639.

The available water power is estimated at a total of 4,076,700 horsepower, of which 3,317,000 is in South Island and mostly located near the deep water sounds of the west coast, with many sites especially suitable for industries. About 70,150 h.p. was in use in 1925. Development is under way in North Island involving an expenditure of £15,000,000 by the state for plant and transmission lines to Auckland.

In 1928 there were 3,180 miles of railways Government-owned, and 117 miles privately owned. The total expenditure for construction on all Government lines up to March 31, 1928 were £58,797,458.

Vessels entering the ports in 1928 numbered 604, with a total tonnage of 2,195,804.

By the law enacted in 1898, and later amended, every person not an alien or an Asiatic who fulfills certain conditions is entitled to a pension of £45.10 a year, reducible by £1 for every £1 by which income exceeds £52. The joint annual income of a married couple in receipt of pensions must not exceed £143 (including pensions). Pensions in force, July, 1928, were: old age, 25,285 (1926, 23,139), annual value £1,061,970 (£994,977); average pension, £42 (£43); widows, 4,160 (3,912), annual value, £312,000

(£307,092); average pension, £75 (£78); war, 20,593 (20,674), annual value, £1,132,615 (£1,116,396); average pension, £55 (£54).

There is no large wealthy class, and none of the really poor in the Dominion; wealth is well distributed, and the purchasing power of the population unusually high, with high living standards. The latest official estimate of the private wealth of New Zealand is £744,609,000, or about £553 ($2,691) per capita. The increase in eleven years was approximately £460,000,000. During 1925 the imports were about $190 per capita, and New Zealand had one automobile for every 14 persons.

In 1927-28 taxation amounted to £11 17s 7d per capita. The lowest since 1919.

Savings bank depositors on March 31, 1926, numbered 758,155, with deposits of £46,948,628, an average of £63 3s 11d. In the five private savings banks the deposits totaled £6,364,383.

Imports are chiefly textiles and clothing, iron, steel and their products, oils, sugar, tobacco, paper and chemicals. Exports were frozen meat, butter, cheese, milk (preserved), wool, and hides and skins.

In 1926 Great Britain supplied 46.6% of the imports and British countries took 87.3% of the exports; the United States supplied 20.5% and took 8.4%.

New Zealand is politically organized along very broadly democratic lines, with tendency to advance rather rapidly in the realm of economic and sociological experiment.

In the national referendum on the licensing issue on Nov. 4, 1925, prohibition received 319,450 votes, national continuance of the present system 299,484, and State purchase and control, 56,043. As none of the issues secured the requisite minimum of half the total votes cast, national continuance is deemed to have been carried. In the election of Aug. 14, 1928, the vote was 374,502 in favor of a continuation of the existing system of licensed sale; 34,376 for state control, and 294,453 for prohibition.

The Defense Act provides for the gradual military training of every male from twelve to twenty-five, with service in the reserve up to thirty. The strength of the permanent force, June, 1926, was 104 officers and 411 of other ranks; there were 28,769 cadets and 22,000 in the reserve.

Its Government is by Legislative Council of thirty-eight appointed members, and a House of Representatives of 80 members elected for three years by adult suffrage. Women have had the vote since 1893.

The general election, Nov. 14, 1928, went heavily against Prime Minister Coates. The United Party lead by Sir Joseph G. Ward, who was Prime Minister in 1905 and 1911, won 27 seats and had the support of 5 Independents, to Reformed party 29 and the Labor party's 19. Sir Joseph Ward formed a government. His policy is to raise a loan of $300,000,000 to provide loans to settlers, and $50,000,000 for completion of the main railway lines and to provide roads for feeders. A £7,000,000 4½% 20-30 year loan was floated at 95 in London in January, 1929.

The Dominion of New Zealand is a member of the League of Nations. Recent budgets are:

Year.	Rev.	Exp.
1921-22	£28,127,007	£28,466,838
1922-23	27,579,443	26,263,760
1923-24	27,960,371	26,148,005
1924-25	28,643,000	27,399,200
1925-26	24,725,762	23,570,083
1926-27	24,266,200	23,986,616
1927-28	25,123,980	24,944,904
1928-29 (estimated)	23,868,250	23,608,104

The total surplus, including that estimated for 1928-29, amounts to £30,506,984.

The debt on Mar. 31, 1928 was £251,396,253, of which 51.38% was incurred for productive purposes, and £71,970,636 was war debt.

Imports and exports were:

Year.	Imports.	Exports.
1922	£35,005,440	£42,726,249
1923	43,486,544	45,967,119
1924	48,528,000	52,472,000
1925	52,456,407	55,262,272
1926	49,889,563	45,275,575
1927	44,782,946	48,496,354
1928	43,320,000	56,200,000

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$19,967,225	$10,435,865
1923	25,282,564	15,573,389
1924	29,306,357	13,524,998
1925	38,362,658	19,733,618
1926	41,574,571	18,826,083
1927	32,517,214	12,670,536
1928	35,969,988	19,224,460

WESTERN SAMOA.
(New Zealand Mandate).

Western Samoa was German Samoa, which included Savali and Upolu, the largest of the Samoan Islands in the Western Pacific, and was occupied by the British on Aug. 29, 1914, immediately on the outbreak of the World War. This territory was assigned as a mandate from the League of Nations to New Zealand under date of Dec. 17, 1920. The Administrator is Col. Stephen Shepherd Allen appointed March 22, 1928.

Savali is forty-eight miles by twenty-five miles and has an area of about 660 square miles. Upolu has an area of about 600 square miles. Both are mountainous, fertile and well watered. The population of the two aggregated by the census of Dec. 31, 1927, 42,865, of which 1,035 were British and 292 Americans.

The revenue for 1927-28 was £126,039, including the annual subsidy of £20,000 from the New Zealand government and also a loan of £30,000 to make up a deficiency in receipts from native taxation. Expenditures totaled £143,422; liabilities, Mar. 31, 1928 on the New Zealand loan account amounted to £147,500, of which £142,500 was for public work. Imports 1927 were valued at £304,369; and exports £335,978.

The chief product is copra, 11,655 tons valued at £242,672 were exported in 1927, and 12,249 tons valued at £275,086 in 1926. In 1927, 59 vessels of 91,417 tons entered and cleared from the port Apia.

BRITISH OCEANIA.

Fiji Islands, 250 in number, area, 7,435 square miles, population, census Dec. 31, 1926, 171,644. Europeans, 4,184; Fijians, 89,401; Indians, 68,733. Its products, tropical fruits, vegetables, sisal, hemp and domestic animals. Forest area in 2,366,000 acres.

The revenue for 1927 was £586,574; expenditures, £534,939; debt, £153,550; imports, £1,223,303; exports, chiefly sugar and copra, £1,997,374.

The Governor, Sir Eyre Hutson, K. C. M. G., is also High Commissioner for the Western Pacific.

Tonga Islands, or Friendly Islands, 390 square miles, with a population, 1927, of 27,048; exports are copra and livestock.

Revenue, 1926-27, £72,562; expenditures, £83,513; imports, 1927, £157,783; exports, £235,391.

The British Solomon Islands is a protectorate, and consists of fifteen large islands and four groups of small islands, with a total area of 14,600 square miles and a population, 1923, of 150,601, of which about 500 are Europeans. The value of the imports, 1927-28 was £261,741, and exports, £386,546, chiefly copra. Revenue, 1927-28 was £75,664, expenditures, £73,993.

Gilbert and Ellice Islands Colony is composed of the Gilbert and Ellice groups which were taken under British Protection in 1892; Ocean Island was annexed in 1900; Union Islands in 1911; Fanning and Washington Islands in 1916, and Christmas Island in 1919. The protectorates were annexed and made a colony, Nov. 12, 1915. The total area is 180 square miles, and the population census of 1921, 34,002.

The revenue 1926-27 was £52,925, and expenditures, £44,869; imports, £113,453; exports, £395,723, chiefly phosphate, 258,775 tons valued at £355,815.

The New Hebrides, area, 5,500 square miles; population about 60,000 are under the joint administration of Great Britain and France. The joint revenue for 1925 was 1,420,614 francs and expenditure 852,748 francs.

Trade of British Oceanica with the United States was:

Cal. Year.	Imports.	Exports.
1922	$388,406	$770,903
1923	440,774	1,000,358
1924	581,496	648,893
1925	1,065,262	624,920
1926	1,424,735	1,453,950
1927	1,155,958	1,146,380
1928	1,508,322	1,188,074

UNITED STATES BOARD OF MEDIATION.

The Board's headquarters are located on the seventh floor of the Earle Building, 13th and E Streets, N. W., Washington, D. C.

Samuel E. Winslow, Chairman; other members: G. Wallace W. Hanger, Edwin P. Morrow, Pat M. Neff, John Williams, John Marrinan; secretary: R. B. Bronson, assistant secretary; Robt. F. Cole Chief, Division of Administration; Chiefs of Technical Divisions, John W. Walsh, Thos. E. Bickers; and George A. Cook.

The Dominion of Canada.

(From data compiled for The World Almanac by R. H. Coats, Dominion Statistician.)

(a) The Royal Canadian Navy in 1921 contained 485 which is included in the total.

Note.—Revised figures are given for 1911 to agree with boundary changes made in 1912. The population of the prairie provinces at the last census, as of June 1, 1926, is given below:

Manitoba	639,056
Saskatchewan	820,738
Alberta	607,599

Of the population in 1921 there were 4,529,945 males and 4,258,538 females; population per square mile, 2.41. The densest average per square mile was 141.47, in Beauharnois, Quebec. Of the males, 2,698,754 were single, 1,698,395 were married, 119,708 were widowed, 3,670 were divorced, and 9,418 were not given. Of the females, 2,378,844 were single, 1,631,761 were married, 236,522 were widowed, 3,731 were divorced, and 7,680 were not given.

Of the total population in 1921 of 8,788,483, 7,321,654 were of British or French origin. There remain 1,466,829, comprehending the following main classes: German, 294,636; Scandinavian, 167,359; Hebrew, 126,196; Dutch, 117,506,; Ukrainian, 106,721; Russian, 100,064; Italian, 66,769; Chinese, 39,587; Japanese, 15,868.

Owing to the Labrador Boundary Award, the area of Canada was reduced by 112,400 square miles—106,970 square miles of land and 5,430 square miles of water.

Figures of capital for the last three years include advances of Dominion Government to Canadian National for operating expenses, interest charges and stock acquired by Dominion Government which at time of acquiring had relatively little value, also cost of constructing Government lines.

The trackage of the Canadian Pacific Railway in 1928 was 20,175. The other principal railways are now, in pursuance of the government policy of nationalization, included in the Canadian National Railway System, which has a trackage (1928) of 27,794 (all tracks) miles.

The imports are of merchandise for home consumption. The exports include foreign as well as domestic produce, the total of foreign for 1929 being $25,186,403. In 1929 the dutiable merchandise in the imports was valued at $821,075,430, the free at $444,603,661. The table does not include gold or (until 1919) silver imports or exports.

Merchandise imports from U. S.—1921, $856,176,820; 1922, $515,958,196; 1923, $540,989,738; 1924, $601,256,447; 1925, $509,780,069; 1926, $608,618,542; 1927, $687,022,521; 1928, $719,436,237; 1929, $868,056,680.

Merchandise (Canadian produce) exports to U. S.—1921, $542,322,967; 1922, $292,588,643; 1923, $369,080,218; 1924, $420,707,544; 1925, $417,417,144; 1926, $474,987,367; 1927, $466,422,789; 1928, $478,003,646; 1929, $500,167,599.

Merchandise imports from United Kingdom—1921, $213,973,562; 1922, $117,135,343; 1923, $141,330,143; 1924, $153,586,690; 1925, $151,083,946; 1926, $163,731,210; 1927, $163,939,065; 1928, $185,895,857; 1929, $194,020,573.

Merchandise exports to United Kingdom—1921, $312,843,871; 1922, $299,361,675; 1923, $379,067,445; 1924, $360,057,782; 1925, $395,843,433; 1926, $508,237,560; 1927, $446,872,551; 1928, $410,691,392; 1929, $429,730,485.

CANADA, DOMINION OF

AREA, 3,684,723 square miles (see tables).

POPULATION, census of 1921, 8,788,483 (see tables). Official estimate June 30, 1929, 9,796,860.

CAPITAL Ottawa; population, 1929, 125,496; other cities, Montreal, population, 1921, 618,506; Toronto, 521,893; Winnipeg, 179,087 (191,356 census of 1926); Vancouver, 117,217; Hamilton, 114,151; Quebec, 95,193; Halifax, 58,372; Victoria, 38,727; Edmonton, 58,821 (65,163, census of 1926); Calgary, 63,305 (65,613 census of 1926); London, 60,959, St. John, 47,166.

Governor General—Right Hon. Viscount Willingdon G. C. S. I., G. C. M. G., G. C. I. E., G. B. E., appointed by the British Crown Aug. 19, 1926, took office Oct. 21, 1926.

Prime Minister and Secretary of State for External Affairs—William Lyon Mackenzie King.

Minister without Portfolio—Raoul Dandurand.

Minister of Justice and Attorney General—Ernest Lapointe.

Minister of Finance—

Minister of the Interior, and of Mines—Charles Stewart.

Minister of Agriculture—William R. Motherwell.

Minister of Health, and of Soldiers' Civil Re-establishment—James H. King.

Minister of Marine and Fisheries—Pierre J. A. Cardin.

Minister of Railways and Canals—Charles A. Dunning.

Minister of Public Works—John C. Elliott.

Solicitor General—Lucien Cannon.

Minister of National Defence—Col. J. L. Ralston.

Postmaster General—Peter J. Veniot.

Minister of Customs and Excise—William D. Euler.

Secretary of State—Fernand Rinfret.

Minister of Trade and Commerce—James Malcolm.

Minister of Immigration and Colonization—Robert Forke.

Minister of Labour—Peter Heenan.

Premier Mackenzie King (Liberal) took office Sept. 25, 1926, his party being returned at the general elections Sept. 14, 1926, when a new House was chosen as follows: Liberals, 118; Conservatives, 91; Liberal-Progressives, 11; United Farmers, Alberta, 11; Progressives, 9; Labor, 3; and Independent, 2.

The boundaries of Canada are: On the east, Baffin Bay, Labrador, the Gulf of St. Lawrence and the Atlantic; on the south, the Gulf of St. Lawrence, the Atlantic, Maine, New Hampshire, Vermont, New York, the St. Lawrence and the Great Lakes, Minnesota, North Dakota, Montana, Idaho, and Washington; and on the West, Alaska and the Pacific Ocean. Canada includes all the Arctic lands

in the area bounded on the east by a line passing midway between Greenland and Baffin, Devon, and Ellesmere Islands to the 60th Meridian of longitude, thence to the pole, and on the west by the 141st meridian longitude (the Alaska boundary) to the pole. Canada has 24,500 miles of coastline. The 3,000 mile boundary between Canada and the United States has been unfortified for more than one hundred years.

Canada has a very varied topography—mountains in the West, then foothills and prairies, the barriers north of Lake Superior, the open lands of Ontario, the rocky Laurentian district in Quebec, with the fertile Eastern Townships to the south of it, and then plains sloping down to sea level in the East; the mountains of New England extend north into Canada, where they attain to practically the same heights as in the United States.

The once common misconception that Canada is almost Arctic has been nearly dispelled. The climate of the southern parts of Canada corresponds to that of the northern States. The mean annual temperature was in 1927, 49.3° at Victoria; 36.0° at Winnipeg; 46.8° at Toronto; 42.1° at Fredericton; and 44.6° Fahrenheit at Yarmouth. These figures show only slight variations from West to East, but the extremes are much greater in the prairie and eastern provinces than in British Columbia.

The St. Lawrence River is navigable to ocean-going vessels for 600 miles, as far as Montreal, which is, by virtue of its Great Lakes connections and its proximity to London and Liverpool, the greatest grain exporting harbor on the continent. Montreal exported 144,988,595 bushels of wheat in the year ended Mar. 31, 1928, Canadian wheat alone amounting to 70,683,183 bushels.

The present facilities of the Port of Montreal comprise approximately 9 miles of deep draft wharf, capable of accommodating 100 large ocean steamers; four modern fireproof grain elevators, with a total storage capacity of 15,162,000 bushels, from which grain can be delivered simultaneously at a maximum rate of 500,000 bushels per hour, while at the same time inland vessels and railway cars can be unloaded at a maximum rate of approximately 300,000 bushels per hour; a cold storage warehouse of 4,628,000 cubic feet capacity, equipped and constructed on the most modern hygienic principles; 28 permanent fireproof two-story transit sheds; and electrified terminal railway system of about 70 miles operated by 100-ton electric locomotives. There were 2,377 arrivals and departures of steam and sailing oceangoing ships the year ending Mar 31, 1928, representing a registered tonnage of 8,224,874.

Canada's merchant marine, July 1, 1928, was: Coast, 502 steamers of 777,736 net tons; 77 motorships, 98,249 tons; 209 sailing ships of 91,685 tons; Great Lakes, 112 steamers of 313,199 tons; 2 motorships of 2,927 tons; and 3 sailing ships of 6,656 tons.

Of the other great rivers, the Mackenzie, flowing into the Arctic Ocean, has a length of 2,525 miles, the Yukon, of 1,765, and the Fraser, of 695. The rivers of Canada have an available force of 18,255,316 horsepower as against approximately 28,000,000 in the United States. The total installed capacity of hydro-electric plants on Dec. 31, 1928 was 5,349,232 horsepower.

NATIONAL WEALTH OF CANADA, 1926.

Provincial Distribution of the national wealth of Canada, with percentage and per capita analyses, 1926:

Provinces.	Estimated Wealth.	Percentage Distribution.	Wealth Per Capita.
Prince Ed. Island..	$145,745,000	0.6	$1,675
Nova Scotia.....	835,748,000	3.1	1,548
New Brunswick....	723,592,000	2.7	1,777
Quebec.....	6,656,108,000	24.9	2,598
Ontario.....	9,130,189,000	34.2	2,902
Manitoba.....	1,889,606,000	7.1	2,957
Saskatchewan.....	2,920,739,000	10.9	3,559
Alberta.....	2,192,067,000	8.2	3,608
British Columbia..	2,185,210,000	8.2	3,844
Yukon.....	12,478,000	0.1	.....
Total Canada.	$26,691,482,000	100.0	$2,482

Canada is the best foreign market ($868,056,680 in the fiscal year 1929 for American produce and manufactures) and has the highest per capita consumption of American goods; it also is the chief source of supplies for the United States, sending over the border $500,167,599 worth of Canadian goods in 1929. The United Kingdom is Canada's second best customer, taking $431,668,957 worth of Canadian goods in 1929.

Capital invested in joint stock companies in Canada, agriculture excepted, Dec. 31, 1924, is as follows:

Canadian capital.....	$2,191,543,867
British capital.....	305,863,275
United States capital.....	1,019,280,743
Other.....	117,500,045
Total.....	$3,634,187,930

Canada's investments abroad Jan. 1, 1928, amounted to about $1,579,000,000, and the net trade balance excluding invisible items was estimated at $141,000,000 in 1928 and $123,000,000 in 1929. Investments of other countries in Canada on Jan. 1, 1928, were estimated at $5,742,000,000, including $3,287,000,000 from the United States and $2,210,000,000 from Great Britain.

The Department of the Interior has under its administration an area exceeding 2,000,000 square miles. Specialized management of the varied natural resources of these territories is furnished through ten major divisions of the department, including the Dominion Lands Branch, Forest Service, National Parks, Water Power and Reclamation Service, Northwest Territories, Topographical, Geodetic, and Boundary Surveys, Dominion Observatories, Natural Resources Intelligence Service, together with the financial and general administrative units. In addition to the direct management of the Federally-controlled territories and resources, the several services of the department provide the necessary facilities for broad national co-operative action, where such is required to promote the efficient development and conservation of the Dominion's natural assets.

There are 3 504,688 square miles land area in Canada, of which, it is estimated, 311,234 square miles carry merchantable timber. An equal area has been burned over and is only now growing up to merchantable size again. Forest resources were estimated in 1929 at 424,637 million board feet of saw material, and 1,122 million cords of pulpwood. The great forests are in the areas of heaviest precipitation, but in the West the heavy rains come in the non-growing winter season, so that 99 per cent. of the western timber is coniferous. For the year 1927 Canada had a lumber production of 4,098,081 thousand board feet, valued at $97,508,786, and a woodpulp production in 1927 of 5,929,456 cords, valued at $70,284,895.

Out of 300,000,000 acres of arable land only 59,351,811 were under field crops in 1928. Agriculture accounted for 8,027,301,000 (1928) of the total wealth of the Dominion and occupies about 2,500,000 persons. The gross value of agricultural production was 1,730,304,000 in 1928 ($1,783,160,000 in 1927).

WHEAT PRODUCTS.

Canada ranks second among the wheat producing countries of the world, and is now the leading wheat exporting country in the world. In 1928 the Canadian production was 566 million bushels, over 60% of the production of the United States, while the preliminary estimate of the 1929 crop is 293,792,000 bushels. The acreage sown exceeded that of 1928 by 1,132,000 acres. Ninety-six per cent. of the Canadian wheat average is in the Prairie Provinces, Manitoba, Saskatchewan and Alberta. Of the other grains, the largest crops are in oats and barley.

Fine fruits are grown in the valleys of British Columbia and in the Niagara district of Ontario. In Nova Scotia and Ontario apples are an important crop.

Dairy product exports during 1929 were: Butter 1,889,200 pounds; cheese, 112,609,200 pounds (nearly all to the United Kingdom); powdered and condensed milk, 25,801,600 pounds; fresh cream, 2,834,354 gallons; fresh milk, 3,753,871 gallons.

Meat exports in 1929 were valued at $19,184,930; in 1926 at $29,408,705.

The production of furs for the 1927-28 season amounted to 3,595,302 pelts, valued at $18,717,035. There were 3,067 fox farms in 1929, value of animals, and pelts sold, $4,736,377.

Canadian fisheries are an immensely valuable resource. The waters are cold, the fish are of the most desirable species, salmon, cod, trout and whitefish, and the extent of the fisheries is very great. The value of the catch for 1928 was $54,000,000.

The importance of Canada's mineral production has been sufficiently shown in the foregoing tables.

Manufactures have increased greatly, both because more Canadian firms are operating and because American firms have set up branches in Canada. The latter movement has been encouraged by the desire to sell in the Canadian market free of duty and to enjoy tariff preferences throughout the British Empire. The industrial census of 1927 shows that there were 22,936 manufacturing establishments in Canada with a capital of $4,337,631,558, employing 618,933 persons and paying $693,932,228 in wages and salaries. The value of the materials used was $1,789,574,604, and the gross value of the product, $3,425,498,540.

The production of motor vehicles during 1928 was 242,054, valued at $149,176,999. The number in 1927 was 179,054. Canada imported from the United States 42,386 passenger cars and 7,319 trucks from April 1, 1928 to March 31, 1929.

Canada has considerable shipping on both ocean fronts. On Dec. 31, 1927, there was a registered tonnage of 1,388,000, and for 1928 seagoing and coastwise clearances of 86,963,348 tons.

Of the railways in Canada, the Canadian Pacific is the great privately owned corporation. The Canadian National Railway System operates practically all other important lines in the Dominion.

Canada has spent large amounts in building good roads in the last five years.

It is estimated that tourists spent over $250,000,000 in Canada in 1928, and about $216,000,000 in 1927.

The wonderful scenery of the Canadian Rockies is at its best in the seven National Parks, where the hunting of game is forbidden. These are the Rocky Mountains Park, around Banff (2,751 square miles, established in 1885), Yoho (476 sq. mi.), Glacier (468 sq. m.), Revelstoke (100 sq. m.), Kootenay (587 sq. m.) and Waterton Lakes, (220 sq. m.), all traversed by the Canadian Pacific Railway, and made accessible to motorists by the highway from Calgary to Vancouver, newly completed except for a 90-mile stretch between Golden and Revelstoke now under construction; and Jasper Park (5,380 sq. m.), reached by the Canadian National Railway. There are also 10 large animal parks and preserves, and the broken lake country of Northern Ontario and Quebec is a paradise for sportsmen and campers.

Canada maintains its own military forces and controls the use of these forces, the same applying to its naval and air forces.

At the Versailles Peace Conference, Canada, Australia, New Zealand, South Africa and India were separately represented within the British Empire delegation. Thereafter each of them became in its own right, side by side with Great Britain, original members of the League of Nations. In the Assembly of the League of Nations they vote quite independently of Great Britain.

Canada in 1926 set up independent diplomatic relations with the United States, appointing Vincent Massey the first minister. William Phillips, formerly Ambassador to Belgium, was made United States minister to Canada.

Canada, like the United States, is a Federation with provincial governments similar on the whole to the State governments of the United States. The Dominion Government, however, possesses the residual powers in legislation.

Since 1858 the Canadian unit of currency has been the gold dollar, of the same weight and fineness as the United States dollar. During and since the World War, 1914-18, the paper dollar was not redeemable in gold but gold payment was resumed on July 1, 1926.

SIXTY YEARS' PROGRESS.

In July, 1927, Canada celebrated the Sixtieth Anniversary of the Confederation. Sixty years ago, Canada had a population of three million; foreign trade amounted to $120,000,000 and during the ten years 1867-77 the wheat crop did not exceed 25,000,000 bushels.

Today, Canadian foreign trade is twenty times as large as at the time of Confederation; manufactured products fifteen times as valuable; the wheat crop sixteen to twenty times as large, and the ratio of increase in other agricultural products even greater. Mining products, which had a value in 1886 of $10,250,000, had a value of $274,989,487 in 1928. Canada stands first in the production of asbestos, nickel and cobalt; third, in gold and silver, and her known coal reserves are exceeded only by those of the United States.

Foreign trade amounted in the fiscal year 1928-29 to $2,654,452,000, and placed Canada fifth among the nations of the world in this respect.

In the West in 1928, the field crop was valued at $682,864,000, and the total value of the field crops of the Dominion amounted to more than $1,125,003,000.

Canada is the most important export market of the United States, taking 18% of the total exports of that country; and the United States, in turn, is the largest market for Canadian goods, taking 37% of the total exports of Canada.

Great Britain is second only to the United States in imports from and exports to Canada. During the last twelve months, Canadian imports from Great Britain had a value of $194,000,000 and exports amounted to $430,000,000.

In the fiscal year of 1921-22, Canada sold $413,000 worth of goods to China and $387,000 to Japan; in 1928-29 the exports to China amounted to $23,687,053, and to Japan $42,099,968.

Within the thirty-eight years between 1890 and 1928, the acreage devoted to wheat crops in Canada has quadrupled. In 1870, the wheat crop amounted to 20 million bushels, in 1900 to 55½ million, and now the average annual crop amounts to more than 400 million bushels. The growth in the production of oats is proportional to that attained in wheat and the barley crop is now about 106 million bushels.

In 1927, the value of dairy products amounted to over $250,000,000, including 178 million pounds of butter and the 138 million pounds of cheese.

The value of Canada's primary forest products in 1927 was $205,631,727. Over two and a half billion cubic feet of standing timber is cut annually. Canada now produces one-third of the total world's newsprint.

According to the first Dominion census in 1870, manufactured products were valued at $221,000,000 on a capital of $78,000,000. In 1878, a general policy of protection was established, followed by a steady industrial expansion. At the end of the nineteenth century, manufactured products were valued at $481,000,000. The value reached a peak of $3,772,000,000 in 1920, and in 1927 the capital invested was $4,337,631,558; and the value of the products was $3,425,498,540. Since the beginning of the present century, the exports of manufactured goods have increased from $99,000,000 to $648,000,000.

Under the provisions of the British North America Act, which created the Dominion of Canada, exclusive authority in matters connected with banking was conferred upon Parliament. At that time there were 28 banks, with combined capital amounting to $31,000,000, total loans to $54,000,000, and total assets to $90,000,000 On Aug. 31, 1929, total assets had reached $3,452,000,000. At the present time, the 11 chartered banks (there have been many amalgamations), have 4,153 branches, of which more than 3,900 are scattered throughout Canada, providing a branch for every 2,500 inhabitants. Canadian banks now have branches in Great Britain, France and Spain, the United States, the West Indies and in all of the principal commercial countries of Latin America.

Within the past five years, good crops have been sold at prices which have enabled the farmer to liquidate a large portion of the debt incurred during the post-war agricultural deflation. Farm prices and industrial wages are high, insuring well distributed buying power. Employment throughout industry is at new high levels, and immigration shows improvement. Recent finds in the mining areas of Northern Ontario and Quebec, and the encouraging discoveries of oil in the West gave promise that the most interesting developments of the immediate future will take place in the mining industry.

NEWFOUNDLAND.

Including Labrador.

AREA, 42,750 square miles, Labrador 120,000 square miles.

POPULATION, estd. 1926, Newfoundland, 262,280; Labrador, 1924, 3,874.

CAPITAL: St. John's: population, 1924, 38,782.

Governor, Sir John Middleton, K.B.E., appointed June, 1928.

Premier, Sir Richard Squires, Nov., 1928.

Newfoundland, at the eastern end of British America, in the Atlantic Ocean, is an island the size of Virginia and a little larger than Cuba. It is separated from Canada by the Straits of Belle Isle, the Gulf of St. Lawrence and Cabot Straits.

Newfoundland is the oldest English Colony. Discovered by John Cabot, June 24th, 1497 (Cape Bonavista), it was, in August, 1583, formally occupied by Sir Humphrey Gilbert, and by the Treaty of Utrecht, 1713, acknowledged to be British. A Governor was appointed in 1728, and in 1855 "responsible government" was accorded to the island. It is administered by an appointed Governor, aided by an Executive Council, with a Legislature of two Houses, the Assembly elected by manhood suffrage. Women were enfranchised in 1925.

Newfoundland has steadfastly refused to join the Dominion of Canada. Labrador is by award of the Privy Council made in 1927 now incorporated in the Colony It has 850 miles of coastline, and is inhabited chiefly by Eskimos engaged in fishing and hunting. It has much timber.

Newfoundland is rugged in topography, and to this and to its rigorous winter climate is doubtless due the stern and peculiarly serious character of its inhabitants, whose avocations are mainly fishing and lumbering. The Colony contributed 11,922 men to the British Armies in the World War, and 3,000 others enlisted in the Canadian Contingent.

By legislative enactment on Aug. 15, 1924, prohibition, in effect since 1915, gave way to a law allowing the purchase of one bottle of spirits a day by any one person and permitting hotels to supply guests with beer and wine.

Besides the foodstuffs producible in that northern latitude, there are resources of minerals which are

not yet much developed, including iron ores, copper and gold. The forests are a great source of revenue. Paper pulp is taken from there to England and the United States.

Premier W. S. Monroe resigned in August 1928, and was succeeded by F. C. Alderdice. A general election was held in October, which resulted in a sweeping victory for Sir Richard Squires and the Opposition.

The export of iron ore in 1927-28 was: To Germany, 919,662 tons; to Nova Scotia, 530,632 tons; to the United Kingdom, 13,750 tons; and to the United States, 78,248 tons. Newsprint paper to a total value of $13,600,000 was shipped in 1927-28, to England, 84,452 tons; to the United States, 98,930 tons; and to other places, 1,570 tons.

The value of the fisheries in 1927-28 was about $15,000,000.

Newfoundland had, in 1928, 934 miles of state-owned railroads, which in the fiscal year ending June 30, 1928, showed a net loss of $446,000. There were 55 miles of private line.

The budget for 1929-30 estimated receipts at $10,956,000 and expenditures at $11,143,000. The revenue for 1927-28 was $9,466,005, and expenditures, $10,740,925. The revenue for 1926-27 was $8,932,426, and expenditures, $10,533,409. The gross public debt, June 30, 1928, was $79,477,479, net debt, $75,720,628.

The Government floated a $6,000,000, 25-year bond issue in June, 1929, in London.

Exports are chiefly dried cod, manufactured paper, iron ore, cod and seal oils.

Foreign trade was heaviest with the United States, Canada second, and Great Britain third in 1927-28. Trade for three years was:

	Imports	Exports
1925-26	$27,552,315	$27,563,211
1926-27	25,813,873	30,839,859
1927-28	27,637,136	33,664,619

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$6,607,118	$2,301,963
1923	8,374,803	2,166,153
1924	9,697,675	2,568,660
1925	9,623,273	3,712,706
1926	8,851,385	9,038,965
1927	8,483,122	9,065,958
1928	9,229,405	9,888,281

BRITISH WEST INDIES.

JAMAICA.

AREA, 4,450 square miles; Turks and Caicos Islands, 224; total, 4,674 square miles.

POPULATION, census of 1921, 858,188 (white, 14,476; colored, 157,223; black, 660,420; East Indian, 18,610; Chinese, 3,696); not stated, 3,693. Turks and Caicos Islands, 1921, 5,612, of which 210 were white. Total, 863,800; estimated, 1926, 936,927.

CAPITAL, Kingston; population, 1921, 62,562. Other cities: Spanish Town, 8,694; Port Antonio, 7,074; Montego Bay, 6,616.

Governor, Sir R. E. Stubbs, K. C. M. G., appointed 1925.

Jamaica is situate in the Caribbean Sea, ninety miles south of Cuba, and is the largest and most valuable of the British West Indies. It is about the size of the State of Connecticut. It has a rather mixed population, West Indians predominating. In 1926 there were 1,108,244 acres cared for, of which 274,418 were tilled, and 833,826 pasture. Products are tropical. Imports from the United States are larger than from any other country, and exports to this country second to those to Britain. There are 210 miles of railroads.

The climate has attractions for winter tourists, and many citizens of this country visit the island. The island figures largely in the history of the Buccaneers of the West Indies before and during the time of Sir Henry Morgan, once its Governor. The old haunt of the pirate, Port Royal, at the entrance of the harbor, was destroyed and sunk under the sea by an earthquake.

In 1927, 1,754 vessels of 3,001,232 tons entered the ports.

Revenue: 1927-28, £2,275,094; expenditures, £1,980,888; debt, £4,922,330

Imports were, in 1927, £6,001,768; in 1926, £5,636,188; in 1925, £5,058,350; in 1924, £4,827,074; in 1923, £5,281,078; exports, in 1927, £4,257,750; in 1926, £3,935,059; in 1925, £3,145,610; in 1924, £3,074,042; in 1923, £4,288,494.

Sugar exports in 1927 were just under 50,000 tons valued at £800,000; and rum, 740,528 gallons. Banana exports amounted to 17,058,319 stems.

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$8,196,249	$7,261,979
1923	8,837,000	6,626,261
1924	7,291,083	6,174,493
1925	8,944,852	8,237,611
1926	8,383,633	9,110,754
1927	8,640,627	9,722,893
1928	8,140,213	7,999,207

BERMUDA.

AREA, 19 square miles.

POPULATION, census of 1921, 20,127 (7,006 white); estimated 1927, 30,814.

CAPITAL, Hamilton; population, 3,000.

Governor, Lieut. Gen. Sir Louis Jean Bols, K.C.B., K.C.M.G., appointed 1927.

Bermuda, a crown colony, is a group of 360 small islands of coral formation, about twenty inhabited, in mid-Atlantic, 677 miles southeast of New York and 580 miles east of North Carolina. To Americans, the main island, capital Hamilton, is a favorite winter resort, fully 30,000 visiting it annually. It ships to New York quantities of Easter lilies, early potatoes and onions. Of its 12,360 acres 4,000 are under cultivation.

The Governor is aided by two Councils and an elected House of Assembly of thirty-six members. The franchise is limited to men owning property valued at $300 a year; in 1918 there were 1,408 electors, of whom 934 were white and 474 colored.

Bermuda is an important naval base with a well equipped dockyard. Food supplies are mostly imported from the United States and Canada.

Revenue, 1927, £290,236; expenditures, £249,420; debt, £70,000. Imports, £1,532,794; exports, £249,958.

Tonnage entering and leaving the port in 1927 totaled 3,041,350 tons.

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$3,280,950	$1,026,031
1923	4,033,572	1,099,075
1924	3,474,817	1,194,600
1925	3,159,947	893,177
1926	3,287,320	1,124,160
1927	3,775,754	1,106,513
1928	3,458,263	944,513

BARBADOS.

AREA, 166 square miles.

POPULATION, census of 1921, 156,312; est'd 1927, 169,385.

CAPITAL, Bridgetown; population, 13,486.

Governor, Sir W. C. F. Robertson, K. C. M. G.; appointed 1925.

Barbados is the most eastern of the Windward Islands, in the West Indies, lying out in the Atlantic at 13° north latitude.

Of the total 106,470 acres, 74,000 are tilled, producing chiefly sugar and cotton. Imports are heaviest from the United States, and exports heaviest to Canada. Tonnage entered and cleared in 1927 totaled 3,775,385. There are twenty-eight miles of narrow gauge railroad.

Revenue, 1927-28, £414,884; expenditures, £481,252; debt, £585,000. Imports, 1927-28, £2,300,108; exports, £1,603,531.

Trade with the United States was:

Cal. Year.	Imports.	Cal. Year.	
1922	$1,541,050	$512,158	
1923	1,519,371	359,264	
1924	1,606,743	206,239	
1925	1,410,511	455,685	
1926	1,592,616	568,683	
1927	1,616,149	495,818	
1928	1,529,965	437,043	

TRINIDAD AND TOBAGO.

AREA, 1,862 square miles. Tobago, 114 square miles.

POPULATION, estimate 1924, 381,753.

CAPITAL, Port au Spain; population, 70,146.

Governor, Sir Horace Archer Byatt, K. C. M. G.

Trinidad, the most southerly of the West Indies, lies off the north coast of South America. Trade is heaviest, both import and export, with the United States. Total area is: Trinidad, 1,191,678 acres, of which 517,538 are cultivated; Tobago, 73,213. Products are mostly asphalt, oil, with derivatives therefrom. The great asphalt lake, 110 acres in extent, on the island is immensely valuable and seems inexhaustible.

The output of crude petroleum in 1928 was 7,750,000 barrels; 5,380,464 in 1927; 4,971,000 in

1926; 4,387,000 in 1925; from about 1,000 wells. The export of asphalt in 1927 was 186,369 metric tons, valued at £464,475, from which the colony derived a revenue of £90,668.

There are 123 miles of railroad in operation.

Port au Spain is one of the finest towns in the West Indies.

Revenue, 1927, £1,686,053; expenditures, £1,497,024; debt, £3,281,854. Imports, £5,082,871; exports, £6,018,864; trans-shipments, £707,152.

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$4,872,198	$4,519,754
1923	4,394,054	5,161,979
1924	3,822,403	4,862,208
1925	4,028,891	5,969,984
1926	4,905,135	8,234,031
1927	5,929,560	7,642,936
1928	4,716,393	9,674,047

THE BAHAMAS.

AREA, 4,404 square miles.

POPULATION, estimate Dec. 31, 1923, 54,886.

CAPITAL, Nassau; population, about 12,000.

Governor, Sir C. W. Orr, K.C.M.G., 1926.

The Bahama Islands number twenty, part of them uninhabited, and are in the Atlantic Ocean, off the coast of America. Nassau, on the Island of New Providence, near the Florida coast, is an attractive winter resort for Americans.

Sponges and sisal are the chief sources of revenue. Fruit growing is being developed. Trade with the United States is three times as heavy as with any other country.

Revenue, 1927-28, £485,319; expenditures, £673,986; debt, £176,230. Imports, 1927, £1,844,932; exports, £483,773.

WINDWARD ISLANDS.

AREA: Grenada, 133 square miles; St. Vincent, 150; St. Lucia, 233; total, 516.

POPULATION, estimate, Dec. 31, 1923, Grenada, 53,847; St. Vincent, 68,086; St. Lucia, 46,744; total, 168,677.

CAPITAL, St. George's, on Grenada Island.

Governor, Sir F. S. James, K. B. E., C. M. G.

The Windward Islands lie at the eastern side of the Caribbean Sea, west from Martinique. They are Grenada and the Grenadines, St. Vincent and St. Lucia. Each has its own local Government.

Products mostly are sugar, cocoa, nutmegs, cotton, mace and fruits.

Total Revenues, 1927, £293,386; total expenditures, £293,377; total debt, £476,711. Imports for all islands, 1927, £816,549; and exports, £865,950.

LEEWARD ISLANDS.

AREA, 648 square miles.

POPULATION, census of 1921, 122,242.

CAPITAL, Antigua.

Governor, Sir Eustace Fiennes, Bart.

The Leeward Islands, of the West Indies, are part of the Lesser Antilles, forming Froude's "Bow of Ulysses." They comprise in one administration five Presidencies, and include the Islands of Antigua, Barbuda, Redonda, St. Christopher, Nevis, Anguilla, Dominica, Montserrat, and the (British) Virgin Islands, with Sombrero, under Commissioners, and all except the latter having their own local Legislature.

Their chief products are sugar, molasses, cocoa and tropical growths. Trade with the United States is growing.

Total revenue, 1927, £379,244; expenditures, £263,697; debts, £246,131. Imports, 1927, £854,816; exports, £662,492.

The trade of the Bahamas, the Windward Islands and the Leeward Islands with the United States was:

Cal. Year.	Imports.	Exports.
1922	$5,974,151	$1,906,114
1923	5,836,372	1,923,206
1924	5,162,364	2,859,061
1925	5,572,096	3,027,739
1926	6,039,528	3,380,163
1927	5,749,839	3,861,740
1928	5,634,557	2,262,446

BRITISH HONDURAS.

AREA, 8,598 square miles.

POPULATION, census of 1921, 45,317.

CAPITAL, Belize, population, 12,660.

Governor, Sir J. A. Burdon, K. B. E., C. M. G.

British Honduras is situate on the Caribbean Sea, south of Yucatan, and produces chiefly tropical fruits, mahogany, logwood, chicle, and cedar, much of which comes to the United States. Of the imports, a considerable trade is with this country and Canada, and comprehends things produced both in this country and Britain.

Revenue, 1927-28 was £222,544; expenditures, £231,684; debt, £155,589. Imports, £944,751; exports, £835,700.

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$1,846,925	$2,220,779
1923	1,817,084	2,227,140
1924	1,835,701	2,154,854
1925	2,162,405	2,834,172
1926	2,568,655	2,845,409
1927	2,060,519	3,748,766
1928	1,837,099	2,830,807

BRITISH GUIANA.

AREA, 89,480 square miles.

POPULATION, census of 1921, 297,691; including 124,900 East Indians; estimated, 1926, 306,844.

CAPITAL, Georgetown; population, 55,490.

Governor, Sir Cecil Hunter Rodwell, K. C. M. G., appointed 1925.

British Guiana is on the north shore of South America, with Venezuela on the west, Dutch Guiana on the east, and Brazil on the south. It is administered by a Governor, assisted by a Court of Policy, seven appointed and eight elected, these with six others constituting the Combined Court that rules.

Areas tilled are 177,000 acres, producing in 1926 sugar cane from 55,673 acres, rice from 49,890 acres, cocoanuts from 29,979 acres, coffee from 6,243 acres, rubber from 2,980 acres. Sugar production in 1926 was 98,152, of which 84,693 tons, valued at £1,260,410, were exported.

The placer gold mining industry is important, the 1926 production being £29,489; total production, 1884-1926, being £9,707,698. The production of diamonds in 1926 was 164,156 carats, valued at £819,816; (value 1901-1926, £5,214,033).

There are 97 miles of railroads and 450 miles of river navigation. In 1926, 3,160 vessels of 1,090,806 tons entered and cleared the ports

Revenue, 1927, £1,068,865; expenditures, £1,481,361; debt, £2,675,270. Imports, £2,470,818; exports, £3,263,420.

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$1,903,079	$809,477
1923	1,703,393	762,066
1924	1,865,236	930,962
1925	2,000,602	950,861
1926	1,881,344	1,206,157
1927	1,501,027	981,186
1928	1,347,914	913,680

FALKLAND ISLANDS AND SOUTH GEORGIA.

AREA, 6,500 square miles, including more than 100 islands, and South Georgia, estimated, 1,000 square miles.

POPULATION, Falkland Island, estimate Dec. 31, 1923, 3,510 (2,540 males, 970 females). South Georgia, 1926, 1,895; only 7 females.

Governor, Arnold W. Hodson, C. M. G.

The Falkland Islands lie 300 miles east from the Strait of Magellan at the southern end of South America. Their main value is in their strategic location, although there are large sheep farms and whaling interests. It was off the Falkland Islands the British war fleet under Admiral Sturdee defeated the troublesome German fleet in the late war, completing the elimination of the naval force of the Central Powers in the South Pacific.

Although Great Britain has held possession of the Islands since 1834, Argentina refuses to renounce her claim of ownership.

Revenue 1926, £281,357; expenditures, £156,054. Assets exceeded liabilities Dec. 31, 1926 by £231,670. Imports £709,246; exports, £4,400,701 (including wool, £214,290, and whale products, £4,101,709).

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1923	$567	$1,272,299
1924	15,876	411,158
1925	3,777	654,510
1926	60,340	104,475
1927	67,187	
1928	79,804	3,182

PROFESSIONAL WEIGHT LIFTING.

Carry—2,250 lbs. carried on back, eight steps, side-stepping, P. J. McCarthy, St. Louis, Aug. 4, 1898.

Back Lift—6,370 lbs. raised by using arms, legs and back, under platform loaded with stone until it was clear of contact with trusses, P. J. McCarthy, St. Louis, Mo., Sept. 17, 1898.

Other Foreign Countries.

AFGHANISTAN, KINGDOM OF

AREA, estimated, 245,000 square miles.
POPULATION, estimated 6,330,500.
CAPITAL, Kabul; population, estimated, 150,000; other cities, Kandahar, population, 31,000, and Herat, 20,000.
Amir, Nadir Kahn, proclaimed Amir Oct. 15, 1229.

Afghanistan occupies a mountainous country in Asia between 61° and 72° east longitude and 29° and 38° 20′ north latitude. Its extreme breadth northeast to southwest is about 700 miles, and from the Herat frontier on the west to the Khyber Pass on the east it is 600 miles. It is bounded on the north by the Turkoman S.S.R. of the U.S.S.R., on the east by British India, on the south by Baluchistan (British India), and on the west by Persia. The elevation is generally over 4,000 feet. There are three great river basins, the Oxus and the Kabul in the northeast, and the Helmund, which runs southwest through the middle of the country. It lacks 20,000 square miles of being as large as Texas.

Towering above Kabul are the Hindo-Kush Mountains, 15,000 and 16,000 feet high and reaching 25,425 feet 100 or 200 miles to the east. Trade to India flows through the famous Khyber Pass from Kabul to Peshawur.

Afghanistan has been called "the land of rocks and stones and sanguinary feuds." Its people are nearly all Mohammedans. The Durani have been the dominant race for 200 years, the Tajiks, aborignes, being cultivators and traders. Along the frontier are warlike and independent tribes of Pathans and others with a fixed habit of raiding across the border and receiving punishment. Disturbances have been frequent. The languages spoken are Pushtu and Persian.

There are many fertile plains and valleys in the mountain, and good irrigation makes available all profitable soil. There are two harvests a year, one of wheat, barley or lentils, and the other of rice, millet, maize and dal. Fruits of the temperate zone are plentiful. Sheep and transport animals are raised. The fat-tailed sheep is native to the country. Its tail is of immense weight and size, formed of masses of fat, a store of nourishment drawn on by the animal in winter. These sheep furnish the Afghans their chief meat diet, and the fat of the tail is a substitute for butter. Wool and skins are the main articles of export, together with fruits, nuts and ghi. The imports are textiles, metals and hardware, leather goods, tea and sugar. Transfrontier trade with India amounts to about $15,000,000 annually, and about $9,000,000 with Russia and Persia. Copper, lead and iron are found.

There are no railroads in the country, but plans have been developing looking toward the building of railroads across the country in the northeast to connect Termez, the rail head of the road from Bokhara, with Peshawur, in British India, via Kabul, and another to connect with the railroad from Merv at its rail head at Kuska, via Herat, in the west, and Kandahar, in the south, to New Chaman and Quetta, in Baluchistan. Merchandise is now transported on camel or pony back along the seven important trade routes. There are no financial institutions. The state yearly revenue is about $10,000,000.

The Government is monarchical and the laws and customs those of Islam. King Amanullah's father was recipient of a subsidy from the British Government, but that was ended by a new treaty signed on Nov. 22, 1921, in which Great Britain recognized the complete independence of Afghanistan, established the frontiers, and withdrew the privilege Afghanistan had enjoyed of importing arms and ammunition through India.

In 1921 Soviet Russia, by treaty which recognized the independence of Bokhara and Khiva, replaced the British subsidy with an annual grant of 1,000,000 gold rubles ($500,000), and the Turks entered into an offensive and defensive alliance with both Russia and Afghanistan. The British then negotiated another treaty with King Amanullah permitting him to import arms through India.

Soviet Russia negotiated treaty of "mutual neutrality and non-aggression" on Aug. 31, 1920.

King Amanullah, who had succeeded his father, assassinated Feb, 20, 1919, made a tour of European capitals in 1928 with his Queen Surrayyi who appeared unveiled. On his return he started many notable reforms, some against Mohammedan practices. Violent opposition from tribesmen and mullahs met this too rapid Westernization. Serious uprisings with much bloodshed broke out in November. A brigand chieftain nicknamed Bacho Sakao (the Waterboy) took a hand and threatened the capital. The king rescinded his reforms by proclamation but it was too late. He abdicated Jan. 14, 1929 in favor of his brother Inayatullah who lasted three days. The usurper declared himself King Habibullah and invested and captured Kabul. King Amanullah and his uncle Nadir Khan fought on bitterly.

The British Legation in February evacuated the Europeans from Kabul by British Royal Air Force planes, some 580 persons being taken in extreme cold and over mountains 12,000 feet high to Peshawur by eight airplanes in about 80 flights. Sir Francis Humphrys, the British Minister, was the last to leave.

Amanullah, his cause hopeless, fled from Kandahar, reaching India May 22 with his queen, Surrayyi, his brother and his wife, and sailed from Bombay for Italy June 22. Nadir Khan kept up the fight and captured Kabul early in October after a series of fierce engagements. Habibullah fled after murdering Amanullah's brother and five other hostages. Nadir Kahn was proclaimed Amir on Oct. 15 and was promptly recognized by Soviet Russia.

The Afghan army was reported to number 100,000 well armed men. Service is compulsory.

ALBANIA, KINGDOM OF

AREA, estimated, 17,374 square miles.
POPULATION, census of 1921, 831,877.
CAPITAL, Tirana; pop., estimated, 12,000; other cities, Durazzo, pop., 5,000; Scutari, pop., 32,000; Elbasan, pop., 13,000; Valona, pop., 7,000.
King, Ahmed Zogu, born 1894, made President by the Assembly Sept. 29, 1925, assumed crown Sept. 1, 1928.
Premier, Kosta Kotta, (Interior), Sept. 4, 1928.

Albania, after centuries of Turkish domination and of contention between its Balkan neighbors and Italy during and after the World War, has had its independence assured under a treaty with Italy, Aug. 2, 1920, and was formally admitted into the League of Nations in January, 1921.

A treaty was signed by Albania and the powers on July 31, 1926, establishing its boundaries as delimited by an International Commission.

A treaty (of Tirana) between Italy and Albania, a compact of mutual support and cooperation, was signed Nov. 27, 1926. It disturbed Europe but especially Jugo-Slavia. A diplomatic break between the two Balkan countries in June 1927 was referred to and settled by the League of Nations.

The country is mountainous, bounded by Jugo-Slavia on the north and east, Greece on the south, and the Adriatic Sea on the west. It is an agricultural and cattle and sheep raising state. There are no railroads, banks or currency and few schools. It is about the size of New Hampshire and Vermont.

The latest census, 1921, returned the population as: Mohammedans, 534,675; Greek Christians, 158,215; Roman Catholics, 88,987; total, 831,877.

Revolution in May and June, 1924, resulted in the overthrow of the Premier, Ahmed Zogu, and the establishment, on June 12, of a nationalist provisional government with Bishop Fan Stylian Noli, former Foreign Minister, at the head. He was educated at Harvard University, 1909-12, and was the head of the Albanian Orthodox Greek Church.

In turn his government was overturned at Christmas time, 1924, by Ahmed Zogu. Bishop Noli fled to Italy. Premier Ahmed Zogu abolished the army, about 8,000 men, had the National Assembly proclaim Albania a republic, and on February 20 ratify an oil exploration grant to the Anglo-Persian Oil Company. A State monopoly on oil sales was, in June 1929, granted to the Italian Company, Agip, for $300,000.

The Assembly elected Ahmed Zogu President of the republic for a seven year term in Jan., 1925, and he assumed that office Sept. 29. A constitution adopted March 2, concentrated great power in the hands of the President, who could name or dismiss Ministers at will. The Senate has 18 members, of which six are appointed by the President. There are 53 Deputies elected for four years. Judges serve during good behavior.

An Assembly elected July-August 1928 amended the Constitution and proclaimed Ahmed Zogu King of the Albanians.

A new civil code patterned after the latest French, Swiss and Italian codes, and replacing the ancient Turko-Arabic civil code, was adopted on April 2, 1929. Heads of families were also ordered to adopt surnames.

The budget for 1927-28 provided for revenues 30,879,800 gold francs, and expenditures 30,838,000 gold francs; and for 1926-27, revenues 23,609,000 gold francs and expenditures 23,103,000 gold francs.

The public debt, 1928, was 70,500,000 gold francs.

The trade of the country, chiefly with Italy (67% of imports in 1926, and 45.8% of exports), converted into dollars was:

Year.	Imports.	Exports.
1924	$3,955,518	$2,389,845
1925	4,208,380	3,112,503
1926	4,800,141	2,309,649

ANDORRA, REPUBLIC OF

AREA, 191 square miles.
POPULATION, 1921, 5,231, scattered in 30 villages.
First Syndic, P. Font-Aremy.

Andorra is a republic in a valley of the Pyrenees under the suzerainty of France and the Spanish Bishop of Urgel. It has enjoyed undisturbed sovereignty since 1278 and was granted a constitution as a republic by Napoleon in 1806. It pays an annual tribute of 1420 francs. It is governed by a Council of 24, elected for 4 years by heads of families in each of the six parishes. The inhabitants speak Catalan and are Roman Catholics. Sheep raising is the chief industry.

Press reports from Paris Oct. 7, 1928, said that a syndicate of Paris and Strasbourg financiers with a capital of $4,500,000 had acquired the mining water power and tobacco growing right, had begun the construction of new roads through the mountain passes, and a connection by rail with Barcelona. It proposes to build a hotel and casino and create a mountain Monte Carlo and health resort.

ARABIA

AREA, estimated, 1,200,000 square miles.
POPULATION, estimated, 7,000,000.

The Arabians occupy a peninsula in the southwest corner of Asia between Palestine on the west, Syria on the north and Mesopotamia on the northeast (an indeterminate line), the Persian Gulf, the Gulf of Oman, the Arabian Sea and the Red Sea, with the exception of Aden, a strongly fortified coaling station of 75 square miles with a protectorate of adjacent territory of 9,000 square miles, pop. 54,923, held by Great Britain. Nearly one-half of Arabia is desert. It is, roughly, as large as that portion of the United States stretching east of California to the Mississippi and north from Texas to the Canadian line. Maps are very deficient. The boundaries of the native states of Arabia are undefined. Turkey, in the treaty of peace, renounced all rights to Arabia. The organization of the native states had been developed under British auspices, the principal rulers (the King of the Hejaz and the Imam of Yemen) being subsidized on condition that they maintain internal peace and place the control of foreign affairs in the hands of British advisers.

THE KINGDOM OF THE HEJAZ AND OF NEJD

King of the Hejaz and Sultan of Nejd, Abdul Aziz ibn Abdul-Rahman al Faisal al Saud, born 1880.
Capital, Riyadh, population 20,000.

The Hejaz lies on the southwestern part of Arabia from the Egyptian line to Asir along the Red Sea. Its area is about 112,500 square miles; population (estimated) about 900,000. The Nejd now includes about 170,000 square miles of the interior and a population of 2,000,000 almost entirely nomad. The dependencies include El Hasa, Katif, Jabal Shammar, El Jauf and the greater part of Asir.

The importance of the Hejaz is due to its possession of the holy cities of Islam, Medina, where the Mosque of the Prophet enshrines the tomb of Mahomet, who died in the city June 7, 632, and Mecca, his birthplace, containing a great mosque sheltering the sacred shrine, the Kaaba, in which is the black stone given by Gabriel to Abraham. As many as 200,000 of the faithful have made the pilgrimage in a year. Medina (pop. 20,000) is 820 miles from Damascus, and is the terminus of the Hejaz railroad. Mecca (pop. 60,000), the capital is 200 miles further south, and is 55 miles from Jeddah (pop. 20,000), the chief port on the Red Sea. The chief product is dates. Some hides, wool and gum are exported.

The Kingdom of the Hejaz was a creation of the World War. Husein ibn Ali, Grand Sheriff of Mecca, cast off his allegiance to the Sultan and proclaimed himself King of the Hejaz in 1916, joining the Allies in the war. The Hejaz was represented at the Peace Conference by Emir Feisal, third son of Husein, now King of the Iraq, and was admitted to the League of Nations in 1920. The King's second son, Emir Abdullah became ruler of Transjordania when that Arab state was set up within the Palestine Mandate.

King Husein had himself proclaimed Caliph of Islam in March 1924. This did not suit Abdul-Aziz es-Saud ibn Saud, Sultan of Nejd, able and warlike leader of the Wahabis, the extreme fanatic austere Moslem zealots. In August, 1924, he invaded Transjordania but was driven back by British air forces. In September he captured Taif, 60 miles east of Mecca, and threatened the Holy City. King Husein abdicated both throne and his claim to the Caliphate on October 3. His eldest son, Emir Ali, succeeded as king, but did not claim the Caliphate. Ibn Saud captured Mecca by assault of Sept 14, King Ali and his forces retreating to Jeddah, the port on the Red Sea. The Wahabis held Mecca, and in December captured Medina. King Ali abdicated and left the Hejaz. Ibn Saud entered Jeddah and on Jan. 11, 1926, in Mecca was proclaimed King of the Hejaz and Sultan of Nejd.

Ibn Saud had been vigorously spreading his authority over the interior of Arabia. In 1920 he had annexed Abha and other parts of Asir. In 1921 he captured and annexed the Amirate of Jebel Shammar and in July, 1922, he had captured the Jauf district and extended his influence up to Wadi Sirhan, so that when he assumed the title of King, his dominions embraced the whole area of desert Arabia. In October, 1925, he concluded an agreement with the British Government fixing the Iraq boundary and consenting to a revision of the northwestern frontier which threw the old Turkish province of Maan with Aqaba into Transjordania. Much friction persists. Insubordination, tribal feuds and an uncontrollable passion for raiding kept Arabia in a turmoil with some heavy fighting in 1929.

The administrative districts number twelve, some being administered by appointed governors and some by local emirs. The products are dates, wheat, barley, fruit, hides, wool, and Arab clocks, besides camels, horses, donkeys and sheep. Exports are insignificant.

Ibn Saud has thirteen surviving sons, the second, Emir Faisal, being Viceroy of Mecca.

THE IMAMATE OF YEMEN

Imam, Yahya Mohammed Hamid ed-Din.

Yemen is in the southwest part of the peninsula between Asir and the British protectorate Aden. Its area is estimated at 75,000 square miles and population 2,500,000. Capital Sanaa (pop. 20,000); chief port Hodeida (pop. 40,000). On the plateau of El Jebel, the most fertile part of Arabia, grain and coffee are grown. Hides and coffee are exported. Mocha, once a flourishing coffee port, no longer counts.

The Imam signed a treaty of friendship and commerce with Soviet Russia, Nov. 1, 1928.

THE SULTANATE OF KUWEIT

Sultan, Ahmed ibn Jobar; succeeded March, 1921.

Kuwelt, area 1,950 square miles, and population estimated at 50,000, extends along the Persian Gulf from Mesopotamia to Nejd. Its capital, Kuweit (pop. 25,000), is an important port on the Persian Gulf, and had been selected as seaport terminal of the German Berlin to Bagdad railroad. Horses, wool, dates and pearls are exported.

The total trade almost wholly with India, Iraq, Persia and the Arab coast was: 1925-26, £694,760; 1926-27, £439,542; and 1927-28, £629,447.

THE SULTANATE OF OMAN

Sultan, Seyyid Taimur ibn Feisal ibn Turki; succeeded his father, 1913.

Oman occupies the southeast portion of the Arabian peninsula with a coast line about 1,000 miles long, extending from El Katar on the Persian Gulf to Ras Sajir on the Arabian Sea. It has an estimated area of 82,000 square miles and a population estimated at 500,000, chiefly Arabs. The nomadic tribes of the interior after seven years of rebellion have completely thrown off the control of the Sultan and by an agreement, October, 1920, have entire home rule and freedom of trade. The Sultan has for years been subsidized by the Government of India, which maintains there a political agent, Major C. C. J. Barrett (1926). The capital is Muscat (pop. estimated, 20,000). The best camels in Arabia are bred in the interior. The chief exports are dates.

Food supplies and textiles are imported. Trade is mostly with India.

The trade of the Hejaz and Arabia with the United States in 1926 was: Imports, $59,818; exports, $1,661,183; in 1927, imports, $399,773; exports, $71,068; in 1928, imports, $322,021; exports, $95,329.

ARGENTINA, REPUBLIC OF

AREA, 1,153,418 square miles.
POPULATION, official estimate, June 12, 1929, 10,904,022.

CAPITAL, Buenos Aires, pop., Census Sept., 1928, 2,042,889; chief cities, Rosario, pop., 265,000; Cordoba, 186,000; La Plata, 161,978; Tucuman, 110,000; Santa Fe, 105,000; Mendoza 58,790; Avellande, 46,277; Bahia Blanca, 87,400.

President, Dr. Hipolito Irigoyen, born 1852. (1928-1934). Inaugurated, Oct. 12, 1928.

Vice President, Dr. Enrico Martinez.

Premier, Elpidio Gonzales (Interior).

Argentina extends from Bolivia 2,300 miles to Cape Horn and from the ridge of the Andes to the South Atlantic, occupying the greater part of southern South America. Its greatest breadth is about 930 miles. In area it is about equal to the eleven Mountain and Pacific States of the United States. It is bounded by Bolivia on the north, Paraguay on the northeast, Brazil, Uruguay and the South Atlantic Ocean on the east and Chile on the west. All boundary disputes have been settled by arbitration.

East of the Andes are great plains, heavily wooded and called the Gran Chaco in the north, and vast treeless pampas, given over to wheat and cattle raising, stretching south down to the plains of Patagonia. Vast tracts of land amounting to 237,768,000 acres are public domain land, opened by the Federal Government to colonization. In the years 1857-1926 the number of immigrants by sea was 5,741,653. Immigration comes principally from Spain and Italy. A law passed in 1919 requires each intending immigrant to produce a certificate of good character and ability to work. Immigrants in 1922 numbered 139,953, of which 58,970 were Italians and 44,738 Spaniards; in 1923, 232,501; in 1924, 160,127; in 1925, 125,365; in 1926, 113,352; and in 1927, 161,518.

Wheat, maize, flax and oats are the principal crops. The sugar and wine industries are making great progress. Sheep, cattle, horses, goats and pigs form the chief wealth on the ranches. Packing houses have been established and the export of frozen beef and mutton and other livestock products has become a great industry.

The livestock census of Dec. 31, 1922, returned 37,064,850 head of cattle, 30,671,841 sheep and 1,436,638 hogs.

Meat consumption in 1924 was 198 pounds per capita, the highest known. Argentina imports goods to the annual value of $80 to $95 per capita.

According to the official figures received by the United States Department of Commerce the slaughter at the Argentine packing houses during 1927, compared with previous years, was as follows:

	1927.	1925.	1924.	1921.
Cattle.	3,233,787	3,322,677	3,808,000	1,625,000
Sheep	4,600,000	4,240,275	4,371,000	3,768,000
Hogs.	.....	100,451	361,665	280,000

The exports of beef in 1928 totalled 515,846 metric tons, (703,089 in 1927); mutton, 78,000 metric tons (83,126 in 1927); and hides, 142,000 metric tons (170,966 in 1927). Argentina supplies more than half the hides imported by the United States.

Production of wheat in 1927-28 was 5,373,942 metric tons on 19,168,800 acres; of maize, 6,455,552 metric tons on 11,805,600 acres; and linseed 2,033,032 metric tons on 7,051,850 acres. In the calendar year 1928 wheat exports totalled 5,327,000 metric tons; corn, 6,430,000 tons; linseed, 1,970,000 tons; and birdseed, 14,000 tons.

Cotton production was 45,165 metric tons from 189,365 acres in 1926-27, and 73,140 tons from 272,528 acres in 1927-28. Sugar output was 474,256 metric tons from 237,500 acres in 1927, and 414,527 tons in 1928. Wine production was 143,091,872 gallons from 280,000 acres.

There is little mining, but 9,100,000 barrels of petroleum were produced from 539 wells in 1928; 8,612,525 in 1927; 7,952,000 in 1926; 6,336,000 in 1925; 4,163,000 in 1924; and 3,399,651 in 1923.

Textiles, oils and chemicals, iron, agricultural implements and machinery, glassware and crockery, and foodstuffs are the principal imports. Manufacturing is on the increase. The value of industrial production in 1928 was estimated officially to be $1,225,000,000 from 61,000 establishments employing 600,000 men.

In 1927 there were entered in all Argentine ports 3,376 steamers, with a tonnage of 11,862,737. The Merchant Marine on July 1, 1928, numbered 292 ships of 287,614 tonnage. Argentina had on January 1, 1928, 24,020 miles of railroads, of which 4,112 are owned by the state; the privately owned railroads are almost entirely in the hands of English companies.

The total receipts of the state-owned railroads in 1926 were 51,387,000 paper pesos and expenses 51,338,000 pesos showing a net profit of 49,000 pesos. Total receipts of all Argentine railways for 1926 were 261,500,000 gold pesos (250,000,000 in 1925), and total expenditures were 184,700,000 (179,300,000 in 1925). Passengers carried totaled 145,000,000 and freight 45,500,000 tons.

For highways $11,000,000 was spent in 1928, half by the Federal Government and half by the provincial governments.

Foreign capital invested (1928) in Argentina amounts to approximately $3,150,000,000, half of which is British and about $484,000,000 American.

Argentina proclaimed its independence of Spain July 9, 1816, and the years until 1852 were years of disturbance and civil war. The Constitution then adopted and under which, somewhat amended, the republic is governed to-day, is modeled closely after that of the United States. There are 14 provinces, with a very high measure of home rule, electing their own Governors and Legislatures, and 10 territories administered by Governors appointed by the President, also a Federal District (Buenos Aires, area 72 square miles), whose Mayor is appointed by the President and who is assisted by a deliberative council elected by the tax-paying inhabitants.

The President of the republic, who must be a Roman Catholic and Argentine by birth, is elected by an Electoral College for a six-year term and is ineligible for re-election. Congress consists of a Senate of 30 members, chosen by a special body of electors for six years, one-third retiring each two years; and a House of Deputies, numbering 158, elected by direct vote for four years, one-half retiring every two years. The Roman Catholic religion is supported by the state, but all creeds are tolerated. Primary education is free, secular and compulsory, but the percentage of illiteracy is still high. In 1926 there were 10,608 primary schools with 45,271 teachers and 1,302,534 pupils. There are national universities at Cordoba, founded in 1613, with 1,603 students in 1920; Buenos Aires, with 10,404 students; La Plata, 2,979, and Rosario. There are also three provincial universities.

Service in the national militia is compulsory, the peace strength of the army being 1,750 officers and 25,600 men, with a reserve of 300,000. The navy consists of two dreadnoughts of 27,940 tons each, mounting twelve 12-inch guns, and refitted in 1924; four armored cruisers and one light cruiser. Parliament in September, 1926, authorized the Government to spend 75,000,000 gold pesos in ten years to modernize the fleet providing for three light cruisers, six destroyers and six submarines.

Argentina withdrew her delegation from the League of Nations in 1920, and, though the League Assembly unanimously requested her return in September, 1928, refused to do so.

Argentina returned to the gold standard on August 26, 1927, by Presidential decree. The gold peso (equals 96.48 cents) had an average exchange value of 92 cents in 1926. Following an abundant harvest and an exceptional export of cereals the peso steadily increased in value, reaching 96.30 cents in March, 1927, and averaging 96.84-48 cents in August—above par. Gold had been accumulated until the Conversion office had 455,663,784 pesos worth on hand as a cover for the note circulation of 1,324,000,000 paper pesos (one paper peso equals 42.44 cents at par of exchange), amounting, that is; to 78%. The gold stock of the Conversion office on April 30, 1928, 498,879,969 gold pesos plus the 20,000,000 gold pesos of the Conversion fund held by the Banco de la Nacion Argentina gave a gold reserve of 84.24% against the note circulation of 1,426,836,341 pesos.

Argentina floated a $20,000,000 5½% 34-year Federal loan at 97 in New York Feb. 3, 1928; a $41,101,000 6% 33-year loan for the Province of Buenos Aires at 96½ in New York March 1, 1928; and a third, $3,396,000 6%, 33-year loan for the City of Buenos Aires at 98½ in New York Jan. 15, 1928.

The funded debt on June 30, 1927, was (in dollars) $1,090,525,643, or about $109 per capita, much of it being incurred for public works and revenue producing properties. The national wealth was estimated by the 1914 census at $14,543,000,000, with government owned property estimated at $1,125,000,000. The floating debt, Dec. 31, 1927, was 408,440,376 pesos.

The budget for 1929, which was unanimously voted by the Chamber, and is the first enacted since 1923, provides for expenditures of 704,131,454 paper pesos.

The budget for 1928 provided for expenditures of 660,000,000 paper pesos, and the issuance of bonds totaling 142,000,000 pesos for consolidating part of the floating debt, and of bonds totaling 140,000,000 pesos for public works. During the last 10 years, 76,450,000 paper pesos have been appropriated for roadways. Revenues in 1927 amounted to 655,568,683 paper pesos and expenditures to 651,934,237 paper pesos.

Imports and exports for eight years in dollars were:

Year.	Imports.	Exports.
1921	$615,950,000	$651,840,000
1922	665,420,000	652,422,000
1923	682,225,426	603,858,543
1924	799,695,500	971,892,210
1925	845,982,628	839,378,753
1926	792,065,600	763,121,600
1927	826,628,650	973,892,735
1928	877,976,000	990 268,000

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$95,542,385	$85,677,952
1923	112,781,892	115,276,307
1924	116,997,569	75,297,795
1925	148,748,606	80,169,993
1926	143,574,682	88,137,205
1927	163,349,682	96,961,236
1928	178,898,648	99,484,924

AUSTRIA, REPUBLIC OF
DIE REPUBLIK OSTERREICH.

AREA, 32,369 square miles.

POPULATION, census of March 7, 1923, 6,526,661.

CAPITAL, Vienna; population, census of Jan. 1, 1925, 1,868,328, of which 1,006,290 were women and 862,038 men (in 1910 it was 2,031,489). Other cities, Graz, population, 152,731; Linz, 101,347; Innsbruck, 56,365; and nine others of more than 10,000.

President, Dr. Wilhelm Miklas, Dec. 9, 1928, term four years.

Chancellor, Johann Schober (Foreign), Sept. 26, 1929.

The Austria of to-day—mere remnant of the former Austrian Empire—is now a republic in Central Europe, with Germany its neighbor to the west and the north, Czechoslovakia on the north and east, Hungary on the east, and Yugo-Slavia and Italy on the south. It is about the size of the four New England States of Vermont, New Hampshire, Massachusetts and Connecticut, and has about 200,000 more inhabitants than the four together

Austria is not only vastly reduced in area and population, but was in an economic plight equalled by few countries in world history. In the pre-war days of Emperor Francis Joseph of the Hapsburg dynasty the Austro-Hungarian Empire had 261,259 square miles and about 51,000,000 population. The Dual Monarchy included Austria proper, with Vienna, one of the brilliant political, commercial, industrial, financial and art centres of the world; Hungary, Transylvania, Czechoslovakia, Polish Galicia, the Trentino, Slavonia, Croatia, Bosnia, Herzegovina, the Banat, territories which gave it access to the Adriatic, and control of practically all the Danube River.

Hungary is an independent kingdom now. All the provinces mentioned have gone and Austria now is made up of these provinces:

Provinces.	Area Sq. M.	Pop. 1923 Census.	Pop. per Sq. M.
Vienna (City and State of).	107	1,863,783	17,419
Burgenland	1,552	286,299	184
Lower Austria	7,451	1,478,697	198
Upper Austria	4,626	873,702	189
Salzburg	2,762	222,731	81
Styria	6,323	977,350	155
Carinthia	3,688	370,432	100
Tyrol	4,882	313,699	64
Vorariberg	1,005	139,968	139
Total	32,396	6,526,661	201

From 1910 to 1920 the population decreased 3.8 per cent., the men decreasing 6.53 per cent. in the war losses. The birth rate in 1926 was 19.2 and in 1925, 20.6; the death rate in 1926 was 14.9; and in 1925, 14.4.

In 1910 the present Austrian territory had 5,979,667 Roman Catholics, the Austrian Empire being the most powerful Catholic unit in Europe. The Catholics were 94.11 per cent. of all; Jews, 2.99 per cent.; and Protestants, 2.60 per cent.

The World War was precipitated by the assassination of the heir presumptive to the throne, the Archduke Franz Ferdinand, by a Serbian in Sarajevo, Bosnia, on June 28, 1914.

Austria was proclaimed a republic on Nov. 12, 1918, the day after the armistice; a National Assembly assumed the Government and appointed a Cabinet. On Feb. 16, 1919, the National Constitutional Assembly, consisting of one Chamber, was elected by the direct vote of all men and women over 21 years of age.

A Constitution was adopted Oct. 1, 1920, which provides for a Parliament of two Houses, a Bundesrat of 46 members, chosen indirectly, and a Nationalrat, elected by direct vote for four years. These two Houses elect a President to serve for four years and eligible to two terms only. All special privileges were abolished. Religious liberty is a fundamental law. School attendance between the ages of 6 and 14 is compulsory. In 1926 there were in the Republic 5,293 public and private elementary schools with 28,757 teachers and 712,275 pupils; 145 secondary schools with 3,593 teachers and 44,513 pupils; and three universities supported by the State—Vienna with 9,500 students; Graz, 2,500; and Innsbruck, 1,500.

Compulsory military service was abolished by the Treaty of St. Germain and the army limited to 30,000; the military budget, 1927, was 79,700,000 schillings.

The army numbered 20,114 in six mixed brigades in 1927. There is no navy.

Austria was forced to seek foreign assistance shortly after it was proclaimed a republic, and the European Allies, and to a large extent the United States, responded by advancing relief and food credits amounting approximately to $72,000,000 during 1919 and 1920. By the fall of 1920 the food credits had been exhausted, and in March, 1921, Austria again sought foreign assistance, this time through the League of Nations. Austria wanted an international loan, but this was refused as its assets were burdened by relief liens and, in addition, by a reparation sum to be fixed by the Reparation Commission as soon as Austria's resources and capacity permitted.

Great Britain in February, 1922, loaned Austria £2,350,000 (approximately $10,440,000 at the then rate of exchange) on the security of the State Gobelins; and France later loaned approximately $1,400,000; Italy, $3,500,000; and Czechoslovakia, $15,000,000. On a third appeal the League of Nations on August 31, 1922 took the situation in hand and formed a rehabilitation plan which was accepted by the Austrian Parliament on Dec. 3, 1922, Dr. Alfred Zimmerman of the Netherlands was made General Commissioner. The League guaranteed an international loan of approximately $126,000,000 in 7% 20-year bonds which was oversubscribed in the United States (allotted $25,000,000), England, Sweden, Holland, Belgium, Czechoslovakia and Switzerland. Far reaching reforms of administration, taxation and the finances were put in effect and a new National Bank set up. The budget was balanced. A new unit of currency, the schilling (equals 10,000 paper crowns) was made the official standard and its rate of exchange stabilized at $0.14084, where it has remained for five years. The success of the rehabilitation permitted the League of Nations to remove its tutelage on June 30, 1926, when Dr. Zimmerman was recalled. The League, however, retained the right to re-establish it by a three-fourths vote of the Council if advisable, and retained also control of the resources to guarantee service of the loan, until June 30, 1928 when Dr. van Toningen of the Netherlands, the last Controller of the League, was recalled from Vienna Of the international Loan over $100,000,000 has been expended on railroad construction, road improvement and other productive capital enterprises, about $14,000,000 remaining on Jan. 1, 1928.

(For details of the Rehabilitation see The World Almanac for 1928, page 590; and for 1927, pages 592, 593.)

Budgets for four years, in schillings, are:

	Revenues.	Expenditures.
1926 (actual)	1,145,446,000	1,177,863,000
1927 (actual)	1,750,400,000	1,750,400,000
1928 (actual)	1,142,000,000	1,015,000,003
1929 (proposed)	1,777,000,000	1,742,000,000

The public debt on Dec. 31, 1928 was 2,363,600,000 schillings ($332,558,000); service on the debt was 151,800,000 schillings.

Circulation on Aug. 31, 1929, was 1,046 million schillings with a cover of 169 million schillings in gold and 614 millions in foreign bills, or 75%. Saving bank deposits exceed a billion schillings.

Unemployment figures were: 38,000 on Sept. 15, 1922; 167,400, Feb. 15, 1923; 76,000, Oct. 15; 176,000, March 15, 1924; 66,000, Aug. 15, 1924; 189,000, Feb. 28, 1925; 223,000, Aug. 15; 224,000, Jan. 30, 1926; 150,981, July 30; 151,000, Oct. 30; 244,257, Feb. 28, 1927; 158,332, May 31; 133,000, Sept. 15; 224,000, Jan. 15, 1928; 173,000, Apr. 15; 115,000, Aug. 15; 256,000, Feb. 15, 1929; 196,000, Apr. 15; 117,000, June 15. Doles paid out in 1925 were estimated at $14,000,000. During 1926 approximately 153,000,000 schillings ($21,800,000) were paid out in doles of which 118,000,000 was contributed by the employers and by the trade unions of equal basis by law, and 26,000,000 was contributed by the Federal Government, 4,800,000 by the Provincial Government, 4,300,000 by the municipalities. The average number of unemployed for the entire year 1926 was 176,000.

At the general election Sunday, April 24, 1927, the anti-Socialist (Government) Coalition won 94 seats to the Socialist 71 on a poll of 3,607,856 votes (90% of the lists). The Socialist vote was 1,536,000,

The Communists polled only 70,000 and failed to win a seat. Mgr. Seibel became Chancellor for the fourth time. He resigned April 3, 1929, causing a government crisis which ended when Dr. Ernst Streerenwitz formed a ministry on May 7. This gave way before the clashing interests of the Heimwehr (Fascist private army) and the Shuetzbund (Socialist private army). Johann Shober, formerly chief of the Vienna police and Chancellor in 1921, asked by a coalition of Pan-German, Agrarian and Christian Socialist parties to head a government, did so on Sept. 26 and maintained order. He presented an extensive constitutional revision program to strengthen the authority of the Central Government.

The City and Province of Vienna, with complete fiscal autonomy, is under control of the Social Democratic Party. The membership of the Socialist controlled Federation of Labor on Dec. 31, 1927, was 772,762, which included 174,991 women. In the City of Vienna the membership of the Socialist party was 387,677 which included 128,658 women. The city is heavily taxed as some capital improvements like housing are paid for on the "pay as you go" principle instead of by the issuance of bonds. The municipal budget for 1929 is $33,000,000. The budget has been balanced since 1920. The funded debt is approximately $400,000,000 including a 6% 25-year bond issue of $30,000,000 floated at 90½ in New York, Dec. 1, 1927. Viennese must also pay their share of the approximately $110,000,000 Federal budget.

Movement for the union of Austria and Germany (the Anschluss issue) has grown steadily in Austria, although union is forbidden under the Versailles Treaty and the protocols of the League of Nations. A judicial system is being worked out parallel with that of Germany and new laws are being made to harmonize with those in Germany. Education is also being made to conform with common standards. An inland postal arrangement is also in operation.

Agriculture on which 30% of the population depend has shown steady improvement since the war. In 1927, 4,762,740 acres were under cultivation. The chief crop yields were: Wheat, 325,495 metric tons from 505,124 acres; rye, 511,220 tons from 947,642 acres; barley, 238,075 tons from 365,617 acres; oats, 438,809 tons from 768,982 acres; potatoes, 2,664,768 tons from 452,913 acres; and turnips, 1,660,647 tons from 131,853 acres. The production of raw sugar in 1926-27 was 79,686 metric tons.

The main industries are the making of machinery, agricultural and industrial, with considerable making of automobiles; textiles, cotton and wool, which are exporting yarns to Germany; leather and fancy goods, which have always had world-wide repute; woodwork, furniture and paper.

The cotton spinning industry had 1,059,872 spindles in operation during 1925, producing 59,759,000 pounds of yarn. 20,889,000 were exported. Cotton looms numbered 14,000.

The pig iron product in 1928 was 457,911 metric tons (457,911 in 1927, and 332,863 in 1926); steel ingots, 635,657 metric tons (551,216 in 1927, and 473,666 in 1926); and rolling mill products, 480,898 metric tons (405,177 in 1927, and 342,953 in 1926).

Lignite production in 1927 was 3,077,229 metric tons; and coal 175,520 tons.

The Austrial Alps and the Danube can furnish, it is estimated, more than 1,700,000 water horsepower. Of this, in November, 1918, 170,000 horsepower had been developed. By Dec. 31, 1927, this had been increased to a turbine capacity of 689,597 horsepower with a maximum annual output of 2,246,100,000 kilowatt-hours.

In 1927 Austria had 4,373 miles of railroads, of which 3,684 were operated by the state. On Dec. 31, 1927, 593 kilometers of the state railroads had been electrified.

Imports and exports in dollars were:

Year.	Imports.	Exports.
1924	$496,000,000	$284,000,000
1925	412,000,000	278,000,000
1926	400,857,000	248,857,000
1927	442,881,000	287,499,000
1928	457,387,560	312,255,510

Trade with the United States for recent years:

Cal. Year.	Imports.	Exports.
1922	$1,626,279	$2,950,910
1923	1,832,512	4,696,852
1924	3,191,912	5,017,783
1925	2,883,592	5,857,969
1926	2,891,481	9,418,687
1927	4,364,146	10,611,063
1928	5,992,744	12,125,719

BELGIUM KINGDOM OF

AREA, 11,752 square miles.

POPULATION, census of Dec. 31, 1928, 7,923,077, including Eupen and Malmedy (pop., 64,542); 674 to the square mile.

CAPITAL, Brussels, pop. Dec. 31, 1927, 211,913 (with suburbs, 815,198). Chief port, Antwerp, pop., 300,175 (with suburbs, 421,988). Important cities, Ghent, pop., 163,207 (with suburbs, 204,105). Liege, pop., 168,823 (with suburbs, 250,187); Bruges, pop., 51,686 (with suburbs, 78,000); Malines, pop., 60,293; Ostend, pop., 44,352; Verviers, pop., 41,417; and Louvain, pop., 40,371.

King of the Belgians, Albert, born April 8, 1875, succeeded his uncle Leopold II. Dec. 17, 1909; Married Oct. 2, 1900, the Duchess Elizabeth of Bavaria. *Heir Apparent,* Prince Leopold, Duke of Brabant, born Nov. 3, 1901; married Nov. 10, 1926, to Princess Astrid (born Nov. 17, 1905), third daughter of Prince Carl, brother of the King of Sweden; to them a daughter Princess Josephine Charlotte was born Oct. 11, 1927. Other children, Prince Charles Theodore, Count of Flanders, born Oct. 10, 1903; Princess Marie Jose, born Aug. 4, 1906, betrothed Oct. 24, 1929 to the Crown Prince of Italy.

Premier, Henri Jaspar (Colonies) Catholic Party May 22, 1926.

Minister for Foreign Affairs, Paul Hymans, Liberal.

Belgium is bounded on the north by the Netherlands, on the east by Germany and Luxemburg, on the south by France, and on the west by the North Sea. It has a frontier of 831 miles and a seaboard of 62 miles. It is not quite as large as the State of Maryland. The Scheldt and the Meuse are the principal rivers. Below Antwerp the Scheldt flows to the North Sea through the Netherlands and the Belgian Government is spending 350,000,000 francs dredging the channel as far as Flushing and improving the port of Antwerp, which has become the greatest port of Continental Europe. The western part is low, level and fertile; the eastern, the tableland of the Ardennes, has a poor soil.

Belgium formed part of the Low Countries from the readjustment of Europe in 1815 following Napoleon's downfall, until Oct. 14, 1830, when following a revolution which broke out Aug. 25, a National Congress proclaimed its independence. The Constitution of 1831 proclaimed it a "Constitutional, representative and hereditary monarchy," and the National Congress elected Prince Leopold of Saxe-Coburg King of the Belgians on June 4 of that year. He died in 1865 and was succeeded by his son, Leopold II., who died in 1909. By the Treaty of London, April 19, 1839, the famous "scrap of paper," separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by Austria, France, Great Britain, the Netherlands, Prussia and Russia. The Germans invaded the Kingdom on Aug. 2, 1914, and held nearly all of Belgium throughout the war, evacuating it immediately after the Armistice. Under the Treaty of Versailles, Eupen and Malmedy and Moresnet were ceded by Germany, adding 382 square miles and 64,520 inhabitants to the kingdom. These cantons were joined to the province of Liege on March 5, 1925.

By July 31, 1928, 1,343,980 out of 1,372,175 war claims entered had been definitely settled, the rest being held in abeyance because claimants were dead or could not be found. Payments in 1928 reached 378,700,000 francs. Ten years after the armistice reconstruction of the war devastated territory was practically completed. About 215,000 acres of ravaged fields were under cultivation, 932 miles of roads had been rebuilt; 766 miles of rails laid on the main lines and 1,300 miles on other lines; and 350 bridges had been constructed. Over 100,000 completely, or partially, destroyed homes and factories had been rebuilt as well as 1,230 public edifices and 400 schoolhouses.

In the reconstruction productive capacity in practically all industries has been largely increased by modernization of plants and scientifically planned extensions; and also in the great development of electrical power.

Belgium claimed 6,500,000,000 gold marks from Germany to make good the worthless paper marks with which the Germans had flooded the country during the occupation. This claim was withdrawn from before the Young Reparations Experts for private settlement which was reached July 13, 1929 at Brussels. It is provided that Germany shall pay Belgium from September 1, 1929 to March 31, 1930, 16,200,000 reichmarks; during the next three years annuities of 21,500,000 marks; during the next eight years annuities of 26,000,000 marks; during the next eight years annuities of 20,100,000 marks and thereafter seventeen annuities of 9,300,000 marks. These payments represent a present capital value of 320,000,000 marks (about $76,800,000) and are unconditional.

The new fireproof Library of the University of Louvain, designed by Whitney Warren of New York in the purest Flemish Renaissance, was dedicated on July 4, 1928. It replaces the one burned by the

Germans in the World War and already houses 750,000 books, 300,000 of which are from Germany as reparation. The cost, $2,000,000, including the endowment, was raised entirely in the United States, and the $80,000 carillon was given by the engineers of America.

Belgium is the most densely populated country in Europe, having 674 inhabitants to the square mile. In the province of Brabant the ratio is 1,216.

The population is divided into two well defined groups, the Flemish and the Walloons. The former, who speak Dutch, are somewhat in the majority, preponderating in Flanders, Limburg and Brabant, including Antwerp. French and Flemish are joint official languages. The Roman Catholic is the religion of the great majority, but complete religious toleration prevails. The state does not interfere with the intimate affairs of the churches and part of the income of the ministers of all denominations is paid from the national treasury.

Belgium has four universities, those of Ghent (1,551 students in 1928) and Liege (2,278) are state institutions, and those of Brussels (1,945) and Louvain (3,551) are free. Attached to them are various technical schools with 3,034 students. There are 134 state high schools, 44 of which are for girls, and many private schools under ecclesiastical control. Schools are supported by local taxation and each commune must have at least one primary school. The percentage of illiteracy has been decreasing rapidly.

The country has 6,420 miles of roads, the majority paved with stone (Belgian blocks), and 1,039 of navigable waterways—rivers and canals. The number of vessels entering Belgian ports in 1927 was 18,684 of 27,825,695 tons. In 1927 at the port of Antwerp there entered 11,418 vessels of 23,490,300 tons; and in 1928, 11,333 of 23,604,634 tons. Inland waterway tonnage exceeds 28,000,000 metric tons annually.

Belgium and Holland signed a convention April 3, 1925, providing the Scheldt shall be closed to war ships in war time but open to all other vessels both in war and peace, thus guaranteeing its free navigation.

The chief imports are wool, cotton, flax, hides, building wood, iron and steel, machinery, coal, chemical products, bitumen, zinc ore, wheat and wine. The chief exports were manufactures of wool, cotton, flax, leather and glassware, iron, steel and zinc products and sugar. The coal, iron and quarry industries are very valuable, as are the glass, textile and sugar, and the lace of Brussels, Malines and Bruges is famous.

The cotton textile industry has expanded from a production of 45,000 metric tons of cotton yarn and 1,518,134 spindles in 1913 to 74,000 metric tons and 2,111,837 spindles in 1928. By the census in 1926 there were 13,082 industrial establishments employing 1,080,331 workers and 96,567 salaried officers.

Production of pig iron from 56 blast furnaces in 1928 was 3,905,320 metric tons (3,751,440 in 1927); and of steel ingots, 3,890,9[illegible] metric tons (3,708,495 in 1927). Production exceeded that of 1913 by about 50%. Zinc production was approximately 207,300 metric tons (201,630 in 1927) exceeding that of 1913, then a record output of 204,220.

Coal output in 1928 was 27,542,780 metric tons in 1928 (27,573,550 in 1927).

In 1926, 1,787,750 hectares (4,415,743 acres), which is 99% as compared with 1913, were cultivated; 696,397 hectares (1,720,100 acres), being 39%, were sown to cereals. Home production can satisfy national needs as to 84% with the exception of wheat, 26%. The forests are carefully cared for.

The Belgian national railway system has a total of about 3,000 miles of track and a capitalization of 10,000 million francs (approximately $278,000,000) of preferred stock nearly half of which is held by the public, and 1,000 million francs ($27,800,000) of common stock, non-transferable, owned by the Government. There is no funded debt.

The Belgian merchant marine on July 1, 1928, consisted of 233 sea vessels of 492,609 gross tons.

Compulsory old age insurance for workers of both sexes earning less than 12,000 francs a year was voted on Dec. 10, 1924. The minimum pension is 720 francs. The charge to the State for 1927 was 213,000,000 francs. For three years unemployment has been negligible.

Parliament consists of a Senate of 120 and a House of Representatives numbering 186, all of whom are directly elected by the people (except 27 Senators who are elected by provincial councils); Senators for 8 years and Representatives for 4. Universal male suffrage with plural voting up to three by property and educational qualification was introduced in 1894. Proportional representation was introduced in 1900. By an emergency measure the present Parliament was elected in 1919 on a one-man-one-vote basis and the law was revised to establish that franchise in 1921.

Parliament must meet annually, in November and must sit for at least forty days. Woman's suffrage was defeated by the Senate, 71 to 56, in August, 1925; and again on April 30, 1929 by a vote of 59 to 34. Yet for the first time a woman, Mlle. Dujardie (Socialist) was elected from Liege to the Chamber of Deputies, in May. Voting is compulsory.

The party strength of the present Parliament elected May 26, 1929 as compared with the last elected in 1925 is:

	Senate.		Deputies.	
Party	1925	1929	1925	1929
Catholics	71	41	78	76
Socialists	59	36	79	70
Liberals	23	13	22	28
Miscellaneous	..	3	8	9

Financial stability was established by drastic and courageous methods in 1926-1927. The paper franc which had fallen to 2.12 cents was stabilized Oct. 25, 1926 at 2.78 cents and has since been maintained at that point unsupported in any way. A new monetary unit the belga (= 5 paper francs = .2021 grams of gold = 7.20 to the dollar = 35 to the £) was established for the foreign trade. (See the World Almanac for 1927, pages 594 and 595; for 1928, page 592; and for 1929, page 590.)

Recent budgets in thousands of francs were:

	Revenue.	Expenditures.
1926, actual	11,346,893	13,076,112
1927, actual	10,599,751	9,533,394
1928, estimated	10,550,464	10,396,469
1929, proposed	11,485,089	10,747,205

The public debt on September 30, 1928 was: External, all funded, 28,321,667,000 francs; internal, funded, 22,188,885,000 francs; floating, 3,533,965,000 francs; total, 54,044,517,000 francs (about $1,502,438,000).

The note circulation of the Banque Nationale on September 5, 1929 was Frs. 13,230,000,000 with a gold reserve of Frs. 5,104,000,000 and a gold exchange reserve of Frs. 2,741,000,000. The ratio of gold reserve was 57.24%.

The City of Antwerp floated a $10,000,000 30-year 5% loan at 94 on the New York market Dec. 15, 1928.

Imports and exports for seven years in paper francs, (000 omitted) are:

Year.	Imports.	Exports.
1922	9,098,007	6,083,118
1923	13,204,780	9,725,054
1924	17,581,108	13,932,504
1925	17,806,000	14,536,000
1926	23,000,226	19,500,942
1927	29,179,537	26,620,738
1928	31,564,000	30,145,000

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$101,529,759	$53,848,160
1923	100,762,303	68,005,401
1924	116,004,850	65,559,231
1925	120,257,911	69,019,037
1926	99,299,398	77,793,008
1927	116,216,009	72,234,129
1928	111,864,679	75,100,431

BELGIAN CONGO.

AREA, 900,654 square miles.

POPULATION, estimated, 1925, 8,500,000. The white population on Jan. 1, 1927, was 18,169, of whom 11,898 were Belgians.

CAPITAL, Leopoldville, formerly called Kinshasa (replaced Boma as capital December, 1921). Provincial capitals, Elizabethville (Katanga), Leopoldville (Congo-Kasai), Coquilhatville (Equator), and Stanleyville (Eastern).

Governor General, Lt. Gen. A. Tilkens, appointed Dec. 27, 1927.

The Congo Free State had its origin in the vision of King Leopold II. of Belgium, who, roused by Stanley's discoveries, realized the great economic possibilities in the development of the vast territory reached by the Congo. The International Association of the Congo, which he founded and largely financed, sent Stanley back in 1879. He founded the first station, Vivi, in February, 1880, and in all twenty-four before he returned in 1884. Leopold pushed the work with the aid of a handful of men, mostly officers, and in 1885 the powers, in convention at Berlin, recognized the association as an independent state under his sovereignty—"the trade of all nations to enjoy complete freedom." The indeterminate boundaries were held to include the basin of the Congo and Lake Tanganyika, with its eastern tributaries. From 1895 the Belgian Government associated itself with this work, opening credits, although Parliament was hostile. The administration of affairs later provoked violent agitation to secure the amelioration of the condition of the natives. The Congo Free State was ceded to Belgium by the treaty of 1907, becoming, by the law of Oct. 18, 1909, Belgian Congo under control of the newly created Ministry of the Colonies.

In territory it is about the size of the fifteen Southern States of the United States. The average mean temperature is 80.6° Fahrenheit, and the average rainfall is 43.27 inches.

King Albert has set apart the Parc National Albert embracing the three volcanoes Visoke, Karissimbi, and Mikeno (Akeley's gorilla country) as a sanctuary for the flora and fauna of Africa. With the Queen he visited Belgian Congo in the summer of 1928.

The park comprises about 800,000 acres. Administration will be in the hands of a commission on which King Albert has already appointed two American scientists, Dr. John D. Merriam, President of the Carnegie Institute, and Dr. Henry Fairfield Osborn, President of the American Museum of Natural History.

Belgian Congo has a short coast line on the South Atlantic at the mouth of the Congo, where is situated the village of Banana on a fine natural harbor. Equatorial French Africa lies to the north and west, and Angola (Portuguese) to the south, beyond which and to the east is North Rhodesia; to the east Tanganyika, now British, but formerly German East Africa, and Uganda (British); to the north it also touches the Soudan. Vast, sunless and well-nigh impenetrable tropical forests fill the upper reaches of the river, covering about 25,000 square miles. The lianas yield 3,000 to 4,000 tons of rubber yearly. The oil-palm is cultivated, and palm kernels and palm oil to the value of 168,021,000 francs were exported in 1926. The export of copal in 1926 amounted to 20,866,410 kilos valued at 39,646,000 francs. Ivory exports amounted to 231,762 kilos, valued at 27,811,000 francs. Coffee, cocoa, rice, cotton and tobacco grow freely. Cattle thrive where there is no tsetse fly.

Cotton cultivation is expanding rapidly; 7,000 tons were grown in 1925-26; and it is expected that about 30,000 tons will be grown annually by 1930.

The chief industry is copper mining in Katanga, where the copper bearing belt is 250 miles long by 25 to 50 miles wide. The output in 1927 was 88,400 metric tons, 80,640 tons in 1926, 89,323 tons in 1925, 85,662 tons in 1924, and 56,479 tons in 1923. The reserves are estimated at 40,000,000 tons. In this district is a large deposit of pitch blende ore from which the factory at Oolen, Belgium, produces about four grams of finished product a month.

Placer mining in Welle produced 5,352 kilograms of gold in 1926, and the diamond output in the Kasai Basin was 1,076,113 carats valued at 75,243,000 francs; and in 1927, 1,020,000 carats.

The Congo is navigable for large vessels for 95 miles to Matadi. A railroad 249 miles long transships freight around the series of falls and rapids to Leopoldville on Stanley Pool. From here the river and its branches are navigable for about 3,750 miles. Railroads have been built around the falls on the upper river, and to connect important points. The total mileage in 1927 was 1,623. There are 7,125 miles of roads, partly suitable for automobiles. At Boma, the former capital, 60 miles up the Congo from its mouth, 198 seagoing vessels of 668,195 tonnage entered in 1927, and at all three ports the number of deep sea vessels entered was 944 of 1,875,856 tonnage.

A motor road now runs from Rejaf, the Nile terminus of navigation from Khartum, to Stanleyville on the Congo, terminus of navigation from Leopoldville on Stanley Pool. The trip on regular service for mail and passengers now takes five days.

Recent ordinary budget estimates were:

Year.	Revenues.	Expend.
1924	francs 182,358,043	177,152,598
1925	francs 146,555,000	137,086,745
1926	francs 315,708,200	320,416,527
1927	francs 316,708,200	406,963,114
1928	francs 521,563,585	521,241,955

Extraordinary expenditures for public works for three years have amounted to 309,310,000 francs. The debt on Dec. 31, 1927 was 1,893,050,983 francs of which 1,770,411,383 francs was funded.

Imports and exports for eight years:

Year.	Imports.	Exports.
1919	francs 85,681,001	204,146,254
1920	francs 237,534,767	315,245,514
1921	francs 276,027,218	217,980,062
1922	francs 268,719,988	294,579,315
1923	francs 390,098,015	552,011,784
1924	francs 489,645,238	477,004,348
1925	francs 876,245,000	628,573,946
1926	francs 1,293,197,000	729,302,000
1927	francs 1,496,359,000	1,055,239,000

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$363,046	$282,265
1923	321,934	973,115
1924	498,159	1,185,560
1925	786,866	1,823,585
1926	1,233,136	1,696,634
1927	728,523	16,014,833
1928	771,175	15,729,008

Ruanda and Urundi, districts formerly in German East Africa, have been ceded to Belgium as mandatory of the League of Nations. The total area is about 20,500 square miles and population of natives estimated at 3,000,000. Both are united administratively with Belgian Congo under a vice-governor at Astrida. The Ruanda plateau is one of Africa's best cattle countries. Several peaks of the Birunga range reach an altitude of 14,000 feet.

BHUTAN, KINGDOM OF

AREA, about 20,000 square miles.
POPULATION, estimated, 250,000.
CAPITAL, Punakha (a strong natural fortress).
Ruler, Maharajah Jik-me Wangchuk, succeeded Aug. 21, 1926.

Bhutan is a semi-independent native state having control of its internal affairs (treaty of 1910), lying on the southern slope of the Himalayas between Thibet on the north and British India on the south, with Sikkam on the west. It is 190 miles long from east to west and 90 miles extreme breadth. The people are Mongolians, the original inhabitants having been subjugated about two centuries ago by Thibetans. Their religion is Buddhism of the Thibetan form. Agriculture and stock raising (sturdy ponies especially) are the chief industries. Trade with India in 1920-21 amounted to £152,200; in 1923-24 to £92,360; and in 1924-25 to £64,900.

Since 1910 the ruler has received a subsidy of 100,000 rupees from the British Government.

BOLIVIA, REPUBLIC OF

AREA, 506,467 square miles; subject to revision on settlement of disputed boundary lines.
POPULATION, official estimate, 1926, 2,952,139.
CAPITAL, Sucre, pop. 16,194; actual seat of government, La Paz, pop., census 1928, 142,549.
President, Dr. Hernando Siles (1926-1930); assumed office Jan. 10, 1926.
Premier, Abel Icurralde, (Foreign).

Bolivia, the only country in South America without a seaport, is bounded by Peru and Chile on the west, Brazil on the north and east, Paraguay on the east and Argentina on the south. It lies across the Andes, and its chief topographical feature is the great central plateau at an altitude of 12,000 feet, over 500 miles long, lying between two great cordilleras having three of the highest peaks in America. Its area equals that of Oregon, California, Nevada, Arizona and New Mexico together. Over 50 per cent. of the population are Indians speaking their own dialects only and 25 per cent. are of mixed blood. The percentage of illiteracy is very high. Farming, grazing and mining are the chief occupations. The chief exports are tin, copper, antimony, bismuth, silver, lead, tungsten, rubber, cocoa, hides and alpaca wool. Under the Spaniards from 1540 to 1750 the mines produced gold to the value of $2,000,000,000. The annual production now is less than $500,000.

An American corporation, the Patino Mine and Enterprises, Consolidated, in which the National Lead Co. is dominant, bought for $30,000,000 in August, 1924, the Llalagua and Uncia mines, thereby securing control of 80 per cent. of the tin production of Bolivia, which is one-quarter of the world's supply.

In 1928, 711,627 tons of ore were mined, and at the smelter from 481,028 tons of high grade ore 17,290 tons of pure tin were extracted worth £133 a ton in the London market.

Export of minerals, in metric tons, for three years was:

	1925	1926	1927
Tin	54,330	53,639	66,624
Lead	36,837	30,911	22,682
Copper	14,659	19,476	23,996
Silver ore	11,343	11,826	5,857
Zinc	6,210	17,561	12,889
Antimony	3,147	7,409	6,718

The value of all mineral exports in 1927 was 117,552,098 bolivianos, and in 1928, 108,003,572 bolivianos.

La Paz is connected by a railroad (264 miles) with Arica on the Pacific. The principal railroad line runs from Antofagasta to La Paz (725 miles).

The Atocha-Villazon railroad, connecting Bolivia with the Argentine railroad system, was completed

in July, 1925. It is 124 miles, entirely between altitudes of 9,500 and 14,000 feet, and cost $10,000,000.

The total railroad mileage in 1925 was 1,491, with 231 miles under construction.

By the constitution of 1880 the President is elected for four years by direct popular vote. All men over twenty-one who can read and write have the vote. Congress is composed of a Senate of 16 elected for six years and a House of Deputies of 70, elected for four years.

(For boundary disputes, see Index.)

The peace strength of the army is 7,400 with reserves of 230,000.

There were 1,647 primary and secondary schools in 1926 with 3,345 teachers and 92,947 pupils.

Bolivia called in Prof. Edwin W. Kemmerer of Princeton in 1927 and accepted his commission's plans for financial and monetary reform enacting them into law in April 1928. The gold standard was reestablished after 14 years and the boliviano stabilized at 36.5 cents, par having been 38.9 and the average rate of exchange in 1927 34.39 cents. The national bank was reorganized and its charter extended for 25 years. It retains a monopoly of note circulation.

The new laws established real estate and income taxes, instituted a modern budget, treasury and accounting control system and reorganized banking. By a contract signed Dec. 14, 1928, E. O. Detlefsen of New York, was made Superintendent General of Banks for at least three years. Joseph T. Byrne assumed on Sept. 10, 1928, the office of American Advisor to the Comptroller General.

A $23,000,000 7% 40-year bond issue was floated in New York at 97½ Sept. 20, 1928, to aid in readjusting the debt which with this issue amounted to approximately $70,600,000. About $110,000,000 American capital was, in 1928, invested in Bolivia.

The budget for 1929 was balanced at 94,950,619 bolivianos (about $34,657,000) and that for 1928 at 51,897,187 bolivianos (about $18,615,000).

Imports and exports in bolivianos were:

Year.	Imports.	Exports.
1922	53,092,129	94,789,561
1923	55,589,506	107,693,862
1924	62,570,410	115,191,409
1925	68,065,121	119,286,370
1926	70,831,469	122,681,291
1927	66,104,672	127,093,926
1928		118,800,000

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$2,602,096	$722,224
1923	3,038,793	2,353,664
1924	4,122,417	84,372
1925	5,083,145	84,461
1926	5,163,292	279,086
1927	4,941,681	217,500
1928	4,950,524	203,927

BRAZIL, UNITED STATES OF

AREA, official estimate, 3,285,319 square miles; some boundaries agreed upon are still undefined.

POPULATION, official estimate, Dec. 31, 1928, 39,163,855. Census of Sept. 1, 1920, 30,635,605. Native born, 29,045,227; Italian born, 558,405, Portuguese, 433,577; Spanish, 219,142; German, 52,870; Japanese, 27,976; U. S., 3,439.

CAPITAL, Rio de Janeiro, pop., 1920, 1,157,873; est. 1929, 2,004,000. Chief cities, Sao Paulo, pop., 1920, 579,033 (1,040,000 est. 1929); Bahia, 283,422 (320,000 est. 1925); Pernambuco, 238,843 (355,871 by Municipal Census of 1925); Para, 236,402; Porto Alegre, 179,263; Niotheroy, 86,238; Curytiba, 78,986; Manaos, 75,704; Bello Horizente, 55,653.

President, Dr. Washington Luis Pereira de Sousa (1926-30), born Oct. 6, 1870, inaugurated Nov. 15, 1926.

Premier, Dr. Octavio Mangabeira (Foreign).

Brazil is the largest state in South America, exceeding the size of continental United States (exclusive of Alaska) by 250,000 square miles. It has a coast line on the Atlantic Ocean of 4,106 miles, and extends 2,691 miles from north to south and 2,500 miles east to west. It is bounded on the north by Colombia, Venezuela, the Guianas and the Atlantic Ocean, on the east by the Atlantic, on the south by Uruguay, Argentina, Paraguay and Bolivia, and on the west by Argentina, Paraguay, Bolivia, Peru and Colombia. The northern half is the great heavily wooded basin of the Amazon (3,854 miles long, the longest river in the world), which rises in the Peruvian Andes, and with its tributaries drains 2,000,000 square miles and empties into the Atlantic at the Equator. It is navigable in Brazil for vessels of deep draft for 2,300 miles; and in all its rivers Brazil possesses 40,000 miles of navigable waterways. Mountain ranges, interspersed with fertile valleys, traverse the eastern and southern states. The majestic falls of the Iguassu, one of the natural wonders of the world, are on the border of Parana, a Southern State.

There are 378 important waterfalls, only 154 of which have been roughly measured, and have a potential force of at least 50,000,000 horsepower. In addition there are a great number having between 6,000 and 50,000 horsepower. About 500,000 h.p. have been developed.

The mineral wealth of Brazil is vast and but little developed. Manganese is exported exclusively to the United States (287,569 tons in 1926 and 249,324 tons in 1927), also the greater part of the world supply of monozite. The gold production is $3,000,000 a year. Coal deposits are extensive but of inferior quality. Production in 1925 was 392,376 metric tons.

But a small part of the rich agricultural land has been brought under cultivation. Four-fifths of the world's coffee supply is grown in the states of Sao Paulo, Rio de Janeiro, Espirite Santo and Minas Geraes. The average annual crop is about 13,225,000 sacks of 132 pounds each. In 1927 there were exported 15,115,000 bags, valued at $304,555,397 or 70% of the total exports; over one-half went to the United States. In 1928 production reached 19,300,000 bags valued at $465,000,000, and 13,881,000 bags were exported. A government statement issued April 10, 1929 said that 10,000,000 bags of coffee were in warehouses.

Of rubber 26,186 tons valued at $12,548,303 were exported in 1927 and 18,688 tons in 1928. Other imports and exports are sacao, tobacco, yerba, leather, hides and meat.

Cotton growing is encouraged by the Government. The area under cotton is about 1,475,000 acres which produced 172,000 tons in 1924-25, 130,421 in 1925-26, 111,097 in 1926-27 and 106,660 tons in 1927-28.

Brazil ranks fourth among cane sugar producing countries with an output in 1927 of 850,565 tons.

Agricultural production in 1928 was officially estimated at $970,900,000.

Manufacturing of all kinds is being fostered. In 1927 there were 357 cotton factories with 2,584,050 spindles and 28,383 looms in operation. The census returns of 1920 showed there were in all 11,338 factories with 365,615 employees, capital of 2,232,814,000 milreis ($502,383,150), and an annual output of 2,989,176,000 milreis ($672,564,600). The vast forests are practically untouched. Stock raising is important. The chief imports are textiles, hardware, machinery, crockery, glassware, etc.

In 1926 there entered the ports of Brazil 24,397 steam vessels, of 35,924,754 tonnage. Brazil on Jan. 1, 1928, had 19,702 miles of railroads in operation. Of this, 11,613 miles were owned by the Federal Government (5,317 of which were Government operated); 4,540 owned by the states and 3,162 miles privately owned. The principal system, the Central Brazil Railway (1,563 miles), is Government owned. The system is joined up with the railroads of Paraguay, Argentina, and Uruguay. Most of the railways showed a deficit in 1924.

Brazil has (1928) 5,161 miles of first class motor roads and 28,291 miles of second class.

British investments in Brazil were estimated in 1926 to aggregate £284,265,268; French, 2,217,561,800 francs; American, (1928) $417,000,000; and other countries about $300,000,000.

Brazil, discovered in 1500 by Cabral, a Portuguese navigator, was developed as a colony of Portugal until the royal house of Braganza, fleeing from Lisbon before Napoleon's army in November, 1807, transferred the seat of Government to Rio de Janeiro in March, 1808. In 1815 Brazil was proclaimed a kingdom, and in 1822 Dom Pedro, son of King John VI., who had been left as Regent on his father's return to Portugal, was crowned Constitutional Emperor and Brazil freed from Portugal. He abdicated in 1831 in favor of his son Dom Pedro II., who was then five years old. Crowned in 1841, he ruled with varying fortune until Nov. 15, 1889, when he was driven from the throne into exile by a revolution which established a republic, the United States of Brazil. The Constitution was adopted July 24, 1891, and is modeled largely on that of the United States. There are 20 states, largely autonomous, one territory (Acre), bought from Bolivia in 1902, and a Federal District. All males over 21 who can read and write have the franchise. The President is elected by direct vote for four years. Congress consists of a Senate of 63 members chosen by direct vote for nine years one-third retiring every three years, and a Chamber of Deputies, of 212 members, elected by direct vote

for three years, representation of the minority being provided for. The Cabinet is responsible to the President only.

Congress in 1916 abolished capital punishment, except under military law.

Immigrants numbered 34,821 in 1922, 86,767 in 1923, 98,125 in 1924, 84,883 in 1925, and 137,171 in 1926; and 101,568 in 1927. Of the latter, 31,236 were Portuguese, 12,487 Italians, 12,186 Lithuanians, 9,084 Japanese, 9,070 Spaniards, and 4,876 Germans. Immigrants in 1928 numbered 82,061 and included 32,582 Portuguese, 11,169 Japanese, and 5,493 Spaniards.

All but 100,000 of the inhabitants are Roman Catholics, but religious toleration is guaranteed. Education is free in the primary grades but not compulsory save in some progressive cities. In recent years, however, great progress has been made. The University of Rio de Janeiro was founded Sept. 7, 1920. Military service is compulsory. The standing army Dec. 31, 1926, numbered 43,015 officers and men with a reserve of 560,000. The navy has two dreadnoughts and in 1918 a personnel of 693 officers and 9,650 men.

Brazil announced in March, 1926, its withdrawal from the League of Nations and refused in May 1928 an invitation to reconsider its decision.

President Pereira de Sousa secured the passage by Congress Dec. 18, 1925, of a currency stabilization law. It declares the milreis (par of exchange $0.3244) to be worth 200 milligrams of gold nine-tenths fine equivalent to $0.11963, being approximately the foreign exchange value of the milreis at that date. The gold milreis was by presidential decree of May 3, 1928, declared to equal 4.567 paper milreis. The Bank of Brazil was authorized to buy and sell foreign exchange for the account of the National Treasury, and the government was authorized to negotiate a loan for the undertaking.

A 6½% stabilization loan of $41,000,000 was floated in New York and £8,500,000 floated in London in October, 1927. Two 6½% bond issues aggregating $60,000,000 were floated in New York in the summer of 1926.

Federal Treasury notes in circulation June 30, 1927, amounted to 1,952,000,000 milreis ($235,000,000), and notes of the Bank of Brazil to 592,000,000 milreis ($71,000,000.) Gold reserve 1,151,081,000 milreis.

The foreign debt, Dec. 31, 1928, amounted to £102,968,592, $152,800,427 and 333,577,086 francs. The consolidated internal debt aggregated 2,392,746 paper contos. The total note circulation on that date was 3,379,025 paper contos, 36.8% secured by gold and the total gold reserve was £30,533,389. The foreign debts of the several states of the union on Oct. 27, 1928, amounted to £46,364,679; 313,621,500 francs, $170,933,500 and 14,240,000 florins. The internal debt totalled $128,030,000 and floating debt approximately $53,000,000.

Recent budgets, which are on a double basis of gold milreis and paper milreis, are here given in contos (1 conto = 1,000 milreis = average $116,90 in 1924, $142.80 in 1925 and $119,63 in 1926).

	Revenues.		Expenditures.	
Year.	Gold.	Paper.	Gold.	Paper.
1925.....	102,891	921,898	87,340	915,133
1926.....	158,039	1,018,139	80,624	1,366,164
1927.....	163,100	1,042,931	87,031	1,365,053
1928.....	182,382	1,254,262	139,116	1,452,152
1929.....	187,897	1,352,644	134,535	1,502,946
1930.....	199,117	1,365,296	134,830	1,609,061

Imports and exports, in dollars at average of exchange, were:

Year.	Imports.	Exports.
1921.....	$217,443,287	$219,871,650
1922.....	213,518,088	301,302,842
1923.....	231,134,786	334,450,880
1924.....	324,570,394	440,442,956
1925.....	406,162,136	483,758,118

1927.....	391,386,225	401,899,849
1928.....	441,763,601	430,899,609

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922.....	$43,246,691	$120,383,028
1923.....	45,583,620	143,233,628
1924.....	65,206,712	179,334,668
1925.....	87,461,021	221,571,803
1926.....	95,449,419	235,307,073
1927.....	88,737,268	203,027,137
1928.....	100,676,439	220,668,450

BULGARIA, KINGDOM OF

AREA, 39,814 square miles.

POPULATION, census of Dec. 31, 1927, 5,596,800; about 85% are of Bulgarian origin.

CAPITAL, Sofia, pop., census of 1927, 213,162; other cities, Philippopolis, pop., 851,88; Warna, 60,761; Ruschuk, 45,672; Silvno, 29,280; Plevna, 29,058; and eleven of more than 15,000 population.

King (sometimes known as Czar), Boris III., born Jan. 30, 1894, succeeded on abdication of his father, Ferdinand, Oct. 3, 1918.

Premier, Andre Liaptcheff (Interior), Jan. 3, 1926.

Bulgaria is bounded on the north by Roumania, on the west by Serbia, on the south by Greece, on the east by the Black Sea, and on the southeast by Turkey. It is about the size of the State of Kentucky.

The Principality of Bulgaria was created by the Treaty of Berlin on July 13, 1878, as an autonomous and tributary principality under the suzerainty of the Sultan of Turkey. Bulgaria declared its independence on Oct. 5, 1908. Eastern Rumelia joined Bulgaria on Sept. 18, 1885, after revolution against the Sultan.

In the first Balkan War, Bulgaria, with Serbia, Greece and Montenegro, fought Turkey, the war ending in the Treaty of London on March 30, 1913, when Turkey ceded to the allied Balkan nations all territory west of the line from Midia on the Black Sea to Enos on the Aegean Sea, and also Crete. The Balkan League broke up soon after the treaty was signed, war breaking out between the allies—the second Balkan War. Roumania intervened and procured an extension (part of the Dobrudja) of her frontier at Bulgaria's expense. Peace came again with the Treaty of Bucharest on July 26, 1913, all signing.

Bulgaria was an ally of the Central Powers in the World War. By the Peace Treaty of Neuilly (Paris) of Nov. 27, 1919, Bulgaria ceded Thrace to Greece and the "Strumnitza Line" and a strip of territory on the northwest to Serbia. The treaty deprived Bulgaria of the Aegean Sea front. The Treaty of Lausanne (1923), giving Thrace to Turkey, fixes the boundary between Bulgaria and Turkey just west of Adrianople.

By an agreement concluded in June, 1924, Greece allows Bulgaria a commercial outlet to the Aegean in the part of Kavala joined to the frontier by a narrow corridor under the supervision of the League of Nations.

(For the overthrow of Alexander Stambuliski in June, 1923, his death and the communist assassinations, the cathedral outrage of April 16, 1925, and its reprisals, see the World Almanac for 1926, page 642.)

In the elections of April, 1923, Stambuliski had won 200 Agrarian seats to his opponent's 32; in the November election, after the coup d'etat, the bourgeois Government received 172 seats to the Agrarians' 39; Communists, 99; Socialists, 30; Radicals, 14, and Liberals, 8.

The election of May 1927 gave the government parties 189 deputies (the premier's party obtaining 171) and the opposition 84 (15 of whom were in exile) including 5 communists and 6 extreme socialists.

Bulgaria's language is Slavonic of Indo-European influence, allied to the Russian. The state church, Orthodox Greek, is governed by a Synod of Bishops, the clergy being paid by the state. For fifty years it has been under ban of excommunication because it wouldn't accept membership in the See of Constantinople, but it was announced Aug. 15, 1929 that after a month of negotiation the several Greek church patriarchs and the Metropolitan of Sofia, Bishop Stephane, had concluded an agreement under which the ban would be canceled at a great church council of all the 500 Eastern Orthodox bishops at Mount Athos in 1930.

Elementary education is obligatory for children from 7 to 14 years of age. The state maintains 5,840 primary and secondary schools, which, together with 1,660 private schools, have 745,000 pupils. There are 48 institutions for special instruction, 118 professional schools, 10 for training teachers and a state university at Sofia with 2,700 students, and a free university with 1,500.

Illiteracy is indicated by the 17.3 per cent. of it in the Bulgarian Army.

Two-thirds of the people are engaged in agriculture. Although lands are held in fee, pastures and woodlands are held in perpetuity by the communes. Small holdings run from one to six acres. Methods are very primitive, although gradually machinery is being brought in.

The cultivated area is 9,290,175 acres of the total of 25,785,000 of the country. Production is low because of crude methods. The annual production of cereals, 2,641,614 tons from 6,109,000 acres (census of 1928), is less than one-half ton to the acre. Wheat production in 1928 was 1,380,000 metric tons (1,146,000 in 1927) and tobacco 23,041,000 pounds (34,800,000 in 1927).

In 1928, 12,100 acres produced 13,725,000 pounds of roses from which 48,997 ounces of attar of roses were distilled.

Coal production in 1928 was 1,412,000 tons, of which all but 175,000 tons were from state mines.

Iron, lead, copper, gold, silver and manganese are found. The production in 1927 was: copper, 10,934 tons (35,536 in 1927); lead 2,229 (11,211 in 1927).

Industry is not much developed. In 1922 there were 1,540 manufacturing establishments employing 63,000. Unemployment has practically disappeared.

Forests cover 7,203,000 acres, or 30 per cent. of the total area—fir, beech, oak and pine.

Exports are tobacco, maize, hides, wheat, barley, petroleum and attar of roses; and textiles, metals, machinery and oils are the chief imports.

Bulgaria had in 1928, 1,854 miles of railroads owned and operated by the state. River navigation having access to the Danube—a great traffic route—is important. In 1925, 2,792 vessels of 1,639,937 tons entered the Black Sea ports, and 6,874 of 1,433,500 tons, the Danube ports.

Earthquakes on April 18, 1928, killed 103, injured 672, totally destroyed 13,800 houses, partially destroyed 18,300, and wrecked 142 towns and villages.

By the Constitution adopted in 1870 and amended in 1893 and 1911, legislative authority is vested in a single chamber, the Sobranje, or National Assembly, of 227 members, elected for four years by universal suffrage. The King must give assent to all laws enacted before they become effective. Executive power is vested in the Council of ten Ministers nominated by the King.

Pre-war Bulgaria's army was composed of 3,900 officers and 56,000 men, with a war mobilization strength of 500,000. The Treaty of Neuilly limits it to 20,000 men, who must be volunteers, obligatory military service having been abolished.

In January, 1924, there went into effect a new tariff prohibiting the import of some 150 articles not of the first necessity.

Turkey, Italy, Greece and Germany were the chief buyers, and the heaviest imports were from Italy, Germany, England, France and Austria.

The amount of reparations to be paid by Bulgaria was fixed in 1923 at 550,000,000 gold francs probably payable in sixty years. The first instalment, 2,500,000 gold francs, was paid Oct. 1, 1923. The bill for the Army of Occupation was fixed on March 23, 1924, at $4,825,000, to be paid in ten annual instalments.

The Governments of Great Britain, France and Italy released Bulgaria from interallied military control Jan. 1, 1926, as she had fulfilled all treaty obligations.

The Council of the League of Nations on March 10, 1928, approved a plan for a Bulgarian stabilization loan of $27,000,000 at 7½% to be used to strengthen the national bank and other banks, meet arrears in the budget and for communications. Of this loan $9,000,000 floated in New York at 97 on Nov. 21, 1928.

The National debt on Sept. 30, 1927 was: External, about $116,709,000; internal, funded, $4,275,000; floating, $34,328,000.

The leva is the unit of currency; its gold par being $0.193; it has been stabilized at about $0.007244 since the summer of 1924.

The bank note circulation on July 31, 1929 was 4,121,000,000 leva. The gold reserve was 1,387,000,000 leva with 1,111,000,000 leva held abroad.

Recent budgets in levas (000 omitted) are

	Revenues	Expenditures
1924-25, actual	7,274,600	6,420,500
1925-26, actual	6,407,800	6,890,800
1926-27, estimated	6,924,200	7,610,900
1927-28, estimated	6,993,100	6,992,900
1928-29, proposed	6,787,000	6,750,000
1929-30, proposed	6,686,000	6,274,000

It is proposed to spend 781 million levas of special funds in 1928-29, and 478 million leva in 1929-30.

Imports and exports for seven years in both levas and dollars, at yearly average of exchange, were:

Year.	Imports.	Exports.
1922	leva 4,037,622,000	4,329,718,000
	$27,791,000	$29,801,000
1923	leva 5,153,784,240	2,896,420,548
	$45,251,000	$31,258,000
1924	leva 5,357,311,000	4,902,266,000
	$40,463,000	$35,693,000
1925	leva 7,291,341,000	5,642,466,000
	$53,217,790	$41,190,100
1926	leva 6,246,000,000	5,617,000,000
	$44,971,200	$40,442,400
1927	leva 6,133,000,000	6,628,000,000

1928	leva 7,041,000,000	6,233,000,000
	$50,695,000	$44,776,000

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$563,519	$1,334,149
1923	613,425	893,911
1924	332,315	1,543,821
1925	301,682	967,533
1926	357,788	1,295,445
1927	467,770	890,596
1928	648,595	714,647

CHILE, REPUBLIC OF

AREA, 281,820 square miles.

POPULATION, census of Aug. 1, 1921, 3,774,485; (estimated, official, May 1, 1929, 4,364,395).

CAPITAL, Santiago, pop. 1929, 620,000; chief port, Valparaiso, pop. 225,242; other cities, Concepcion, pop. 66,074; Antofagasta, 51,531; Iquique, 37,421; Talca, 36,079; Vina del Mar, 33,441; Chillan, 30,881.

President, Gen. Carlos Ibanez, (1927-1932), born 1882, elected May 22, 1927, inaugurated July 21, 1927.

Minister of the Interior, Enrique Bermudoz.

Minister of Foreign Affairs, Manuel Barros Castanon.

Minister of Finance, Rudolfo Jaramillo.

Chile, one of the most energetic and prosperous of the republics of Latin America, with inexhaustible mineral resources, lies on the west coast of South America, occupying the strip of land between the Andes and the South Pacific, from Peru to Diego Ramerez Island 55°59'S., having an extreme length of about 2,620 miles, with a coast line of 2,900 miles. The average breadth north of 40° is 100 miles. Its area is slightly greater than that of the eight South Atlantic States of the United States.

The Andes have many lofty peaks, notably Aconagua (altitude 23,080 feet), on the Chilean-Argentine boundary, the highest peak in the Americas; Corcoputi (22,162 feet), El Muerto (21,227 feet), the Baya (19,993 feet), the Guallatiri (19,882 feet). From 1907 to 1924 there have been 12,694 earthquakes, an average of two daily.

The land in the north part is arid, but two provinces there, Tarapaca and Antofagasta, produced 95 per cent of the world's nitrate supply until the process of obtaining nitrate from the air was made commercially profitable. The production of nitrate in 1920 was 2,606,571 metric tons, valued at $172,800,000, but was stagnant in 1921. The output in 1922 was 1,071,797 metric tons; in 1923, 1,903,527; in 1924, 2,403,427; in 1925, 2,371,000; in 1926, 2,569,000 in 1927, 1,615,111 tons; and in 1928, 3,400,000 tons.

Sales of nitrate in 1927 amounted to 2,288,000 metric tons, and in 1928, 2,878,000 tons. The amount exported in 1927 was 2,385,441 tons. The export tax in 1925 brought a revenue of 255,233,880 pesos.

Chile is the world's second largest producer of copper, the amount in 1928 being 277,419 metric tons and in 1927, 239,325 tons. There are also enormous iron deposits in the Provinces of Atacama and Coquimbo, estimated at a billion tons. Much gold and silver is produced. There are large deposits of coal south of Valparaiso, 1,382,000 tons being mined in 1928, and the resource being estimated at two billion metric tons. The total value of all mineral products for 1928 was $250,000,000.

The census of manufactures 1926 showed an 48% increase in production over 1920, and an increase of 33% in capital invested. The number of plants was 3,075; of employees, 78,499; capital invested, 1,782,958,000 pesos, value of products, 1,471,586,000 pesos; and horse-power employed 369,326 of which 43% was steam, 27% electricity and 23% hydraulic.

Chile has, government statistics show, about 58,994,000 acres classed as agricultural; but of this 20% is said to be sterile, 20% forests, and 53% cultivated and natural pastures. About 273,700 acres are in vineyards and orchards, and 3,342,400 acres devoted to cereals, beans, peas, potatoes and vegetables. Of wheat, 1,967,514 metric tons was produced from 1,459,100 acres in 1926-27, 226,503 tons of barley from 134,138 acres; 120,165 tons of oats from 94,440 acres; 88,074 tons of maize from 56,798 acres; 121,174 tons of beans from 91,977 acres; and 323,177 tons of potatoes from 67,020 acres. The production of wine was 68,774,500 gallons. Cattle in 1926 numbered 1,918,433; sheep, 4,093,872; goats, 357,033; pigs, 246,636; and horses, 323,581.

The population is almost entirely of European origin; there are about 30,000 Araucans (natives) in the Andes and an indeterminate number of nomadic Fuegans in Terra del Fuego.

Education is free, supported by the state, and since 1920 compulsory. In July 1928, 459,777 pupils were enrolled in the public primary schools. A fundamental reform of the educational system is in progress. Plans for 600 new modern schools have been made to cost $7,200,000. The University of Chile (state) at Santiago had 4,502 students in 1920

and the Catholic University 614. There is a university also at Concepcion, and another being organized in Valparaiso. The Roman Catholic Religion is dominant though not maintained by the state since 1925, and all religions are protected.

All able-bodied citizens are liable for service in the state militia. The peace strength of the army is 23,782 with 609,734 in the reserve. In the navy is one dreadnought, the Almirante Latorre (formerly H. B. M. S. Canada), 28,000 tons, mounting ten 14-inch guns; one pre-dreadnought, the Captain Prat, 6,966 tons; two armored cruisers and four protected cruisers; also eleven destroyers and six new submarines. The strength of the navy is 6,000 men. An air force was formed in 1918 under British instruction, with a nucleus of fourteen seaplanes and eighty airplanes bought in Great Britain. Chile is becoming one of the leading purchasers of American airplanes.

Chile was neutral during the World War; on specific invitation she joined the League of Nations Nov. 4, 1919.

Chile has 5,618 miles of railroads, 3,616 being state owned. The state railways showed a profit in 1924 of 5,537,000 pesos; and in 1925 of 8,026,325 pesos. The state owns the longitudinal railroad traversing the republic from north to south for a distance of 2,862 miles; with spurs, its mileage is 3,133. An electric railroad connects Valparaiso and Santiago, 117 miles. In 1926, 1,100 steamers in the foreign trade of 3,206,465 tons entered the ports.

Chile's merchant marine on July 1, 1928, numbered 130 vessels of 170,864 tonnage. A ship subsidy act effective Jan. 14, 1928, carries 2,000,000 annually is to be granted to Chilean navigation companies in proportion to cargo passing through the Panama Canal.

Daniel Guggenheim of New York gave the Chilean Government in 1929 $500,000 for the promotion of civil aviation.

British capital invested in Chile exceeded £100,000,000 in 1925, and American capital invested in 1928 was estimated at $520,000,000, largely for mining and loans. The total wealth of the country on July 1, 1923, was estimated at over $3,327,000,000, equivalent to $855 per capita.

Chile threw off the Spanish yoke in 1810-18, and adopted in 1833 the highly centralized constitution which was replaced by a new greatly liberalized constitution drafted by President Arturo Alessandri and adopted by a tremendous majority in a referendum, Aug. 30, 1925.

The President is elected for six years, the forty-five senators for eight, and the deputies for four, all by direct popular vote. Electors are males over twenty-one who can read and write. Bills may be passed by a two-thirds vote over the President's veto. He appoints the nine Ministers, who are responsible to him.

The years 1924-25 saw many laws enacted in amelioration of labor and social conditions. An income tax law was put into effect, estimated to yield $21,500,000 yearly, and other laws aimed to break the hold of the aristocratic element on the state.

(For the political history of Chile 1924-1927 see The World Almanac for 1928, pages 596-97, and for 1927, page 599. For Tacna-Arica settlement see Index).

Under advice of a commission of American financial experts headed by Prof. Edwin W. Kemmerer of Princeton University, a Central Bank was created by decree Aug. 23, 1926, with a capital of 150,000,000 pesos, which will have the exclusive right to issue paper money convertible to gold, also silver pieces, and which will be the fiscal agent for the Government municipalities, railways and other financial concerns.

The central bank commenced operations on Jan. 11, 1926. The gold and gold exchange held by it on May 17, 1929, amounted to $64,224,000, providing a ratio of gold cover to notes outstanding and deposits of over 98%. The peso has been stable at par of exchange (equals 12.17 cents) for over three years.

The national public debt Dec. 31, 1928, including all guaranteed obligations, amounted to 3,419,754,680 pesos (approximately $410,370,561), of which the foreign debt was 3,100,783,309 pesos (about $372,093,997) and the internal debt 318,971,371 pesos (about $38,276,564). A $45,912,000 6% 33-year refunding loan was floated at 93½ in New York Jan. 28, 1928 for the redemption to issues of 8% dollar bonds and other purposes. A $16,000,000 6% 33-year loan was floated at 94 in New York Sept. 28, 1928 for public works. The City of Santiago sold $4,000,000 7% 21-year bonds on the New York market at 100¼ on Jan. 21, 1928; and the Mortgage Bank of Chile, $20,000,000 6% 33-year bonds guaranteed by the government on the New York market at 95¾ on May 1, 1923.

A $10,000,000 33-year 6% loan was floated at 93½ in New York March 11, 1929; and a $20,000,000 33-year 6% loan for the Mortgage Bank of Chile guaranteed by the Government was floated at 92 in New York June 27, 1929. A United Municipalities loan of $15,000,000 7% was floated in New York in 1929.

The official valuation of state property in 1929 was approximately $650,000,000 and of taxable real estate $1,980,000,000.

Ordinary budgets for the last four years are:

	Revenues	Expenditures
1926, actual Pesos	755,401,152	972,602,852
1927, actual Pesos	909,129,764	905,665,712
1928, actual Pesos	1,021,000,000	982,700,000
1929, estimated Pesos	1,205,000,000	1,160,000,000
1930, estimated Pesos	1,215,000,000	1,165,000,000

A program for public works to cost 1,575,000,000 pesos to be expended from 1928 to 1933 recommended by the President, was adopted by Congress Feb. 13, 1928. For 1928, 246,500,000 pesos was voted to be met by a loan; and for 1929, 225,099,000 pesos.

Foreign trade was:

	Imports.	Exports.
1921	$139,175,414	$158,321,899
1922	86,571,275	121,037,500
1923	120,198,389	196,081,823
1924	132,589,170	242,637,765
1925	146,805,334	228,582,000
1926	156,155,000	199,794,000
1927	103,583,012	205,632,543
1928	142,303,079	239,181,687

Trade with the United States was:

	Imports.	Exports.
1922	$22,464,102	$59,714,457
1923	31,057,952	91,801,355
1924	31,377,819	98,678,618
1925	39,273,692	89,194,286
1926	49,043,193	81,442,281
1927	37,888,715	61,857,438
1928	40,360,605	75,159,582

CHINA, REPUBLIC OF

AREA, 4,277,170 square miles: divided, China proper, 1,532,420; Sinkiang (Eastern Turkestan,) 550,340; Manchuria, 363,610; Mongolia, 1,367,600; Thibet, 463,200.

POPULATION, estimated 1920, for China Proper, 375,000,000; Sinkiang, 2,000,000; Manchuria, 20,000,000; Mongolia, 1,800,000; Thibet, 2,000,000; total for all China, 400,800,000.

Foreigners resident in China, according to the customs authorities in 1926, numbered 346,683, of which 9,401 were Americans, 14,670 British, 74,089 Russians, and 235,339 Japanese. There are 21 Treaty Powers in China.

CAPITAL, Nanking, pop. (estd.) 390,000; old capital, Peking, renamed 1928 Peiping by the Nationalists, pop. police census 1927, 1,297,719; other cities, estimated: Shanghai, 1,539,000; Hankow, 1,500,000; Hangchow, 1,000,000; Canton, 950,000; Tientsin, 839,000; Chungking, 622,000; Changsha, 535,000; Soochow, 500,000; Chingtoo, 400,000; Foochow, 315,000; Tsinan, 300,000; Ningpo, 285,000; Tsingtau, 270,000.

President and Chairman of the State Council, Gen. Chiang Kai-shek, inaugurated Oct. 10, 1928.

Ministers, appointed Oct. 15, 1928:

Foreign Affairs, C. T. Wang.
Finance, T. V. Soong.
Agriculture, Yi Pei-chi.
Industry, H. H. King.
Education, Dr. Chiang Meng-ling.
Railways, Sun Fo.
Interior, Chao Tai-wen.
Communications, Wang Po-chun.
Health, Chou Ming-Yu (M.D. Univ. of Va.).

China, the home of a highly civilized nation when Europeans were still in the bronze age, and with a history reaching back to 2205 B. C., occupies a territory in the eastern part of Asia about one-third larger than continental United States. To the north and northeast lies Siberia; to the west Russian Turkestan: to the southwest and south the well-nigh impassable barrier of the Himalayas forms the Thibetan-Indian frontier. French Indo-China borders it on the south; and the China Sea and Yellow Sea on the east separate it from the Philippines, Formosa (now Japanese), the Japanese Empire and Korea. The country is of rolling topography, rising to high elevations in the north in the Kinghan and Tarbagatai Mountains in Mongolia; the Himalayan and Kwenlun Mountains in the southwest, in Thibet, and the Hinghan Mountains of Manchuria. Its length from north to south is 1,860 miles, and its breadth from east to west is about 1,500 miles.

China Proper—China of the 18 Provinces—occupies the rich fertile southeastern part of the

country, an area nearly twice the size of the United States east of the Mississippi. There the population on the generally accepted estimates has a density of 174 to the square mile. China Proper is one of the best watered countries of the world. From the mountains on the west four great rivers run in general course eastward to the sea, through great alluvial plains stretching for hundreds of miles along the ocean and inland to a depth of 300 miles. These rivers drain four-fifths of the country. The Yangtsekiang, 3,158 miles long, rises in the centre of the high plateau of Thibet, 16,000 feet in altitude. At Pingshenhsien, 1,215 miles from its source, it becomes in part navigable, but with dangerous rapids, to the vicinity of Ichang, 2,193 miles from its source. From Ichang to Hankow it is navigable by small river steamers and from Hankow to its mouth, 595 miles, by sea-going vessels. The Hanho, a tributary from the north at Hankow, is navigable for 600 miles. The Yellow River (Hwangho), 2,700 miles long, and also rising in Thibet, is navigable only in part. It is called "China's Sorrow" because of the devastation it causes in flood time, when it overflows its banks, bursts its dikes and sweeps over the farm lands. In 1898, when a disastrous flood occurred, salt and sand were deposited over an area of 200 square miles, below Lokow, to a depth of 2 to 10 feet, amounting to over sixteen billion cubic feet. The Sikiang, over 1,250 miles long, waters South China, its branches reaching the sea in the Canton delta from Hongkong to the west of Macao. It is navigable for steamers for 200 miles, and for smaller craft for another 100 miles. The Paiho waters the plain of North China, and empties into the Gulf of Chihli at Taku. The Amur River, 2,920 miles long, and navigable for 1,500 miles, which forms the boundary between Manchuria and Siberia; the Yalu, navigable for 600 miles, the boundary between Manchuria and Korea, and the Liao in Manchuria, are also highly important. A network of canals helps to care for the inland navigation.

China's coast line is 2,150 miles long, or with indentations about 5,000. China has 56 so-called treaty ports, 8 voluntarily opened ports, and 25 ports of call. The climate compares favorably with that of countries in similar latitudes.

POPULATION.

The population of China is not a matter of exact census tabulation. The Board of Revenue Census of 1885 returned a population of 377,636,000 exclusive of Manchuria. That of the Board of Interior (Minchenpu) in 1910, a year before the fall of the Manchus, was 331,188,000, inclusive of Manchuria; but this was of families, the multiple for individuals being 5.5. In 1918 the survey of the China Continuation Committee gave an estimate of 440,925,000, and the Chinese Post Office survey of 1924 returned 436,094,953, both exclusive of Mongolia, Sinkiang and Thibet. The compilers regard these figures as probably too high. Former American Minister to China W. W. Rockhill held in his time that the population of China had been greatly overestimated, and quoted the figure for 1885 for the 18 provinces as 306,551,000. It would seem that the population of China Proper, including the 3 Manchurian provinces, is about 400,000,000. Manchuria has increased greatly in population since the building of the railroad and the development of the economic possibilities of the soy bean, from 15,000,000 in 1914 to 22,000,000 in 1924.

The Province of Kiangsu, in which Shanghai is situated, having about 33,700,000 people in 38,600 square miles and 874 to the square mile, is the most densely populated political unit in the world.

Mr. Ta Chen in a monograph "Chinese Migrations, etc.," published July, 1923, by the United States Bureau of Labor Statistics, holds that the population is too great for the arable land of the country, his figures showing 59,223,984 farmers enumerated as cultivators of 269,553,076 acres of land, an average of 4.5 acres to a farm; the average size of the family being 5.5 in China Proper, and 8.3 in Manchuria; 75 per cent. of the native population living on farms. Uncultivated land is estimated at about 160,500,000. Chinese emigration, he holds, arises from pressure of population and gives these figures of the Chinese resident abroad in 1922:

Country.	*Chinese.*	*Country.*	*Chinese.*
Anam	197,300	Java	1,825,700
Australia	35,000	Korea	11,300
Brazil	20,000	Macao	74,500
Burma	134,600	Mexico	3,000
Canada	12,000	Peru	45,000
Cuba	90,000	Philippines	55,212
East Indies	1,023,500	Siam	1,500,000
Europe	1,760	Siberia	37,000
Formosa	2,258,650	Straits Set'lem'ts	432,764
Hawaii	23,507	South Africa	5,000
Hongkong	314,390	Continental U.S.	61,639
Japan	17,700		
		Total	8,179,582

RELIGION AND EDUCATION.

Confucianism, Buddhism and Taoism are the religions of China, although there are also between 5,000,000 and 10,000,000 Moslems in the country, about 1,994,000 Catholics and 618,600 Protestant Christians.

In 1905 there began the new movement toward education of the masses, and since then progress has been marked. While the number of schools, 135,000, and pupils, 4,500,000, is small relative to the total population, the number is growing rapidly. There are seven universities and many technical institutions of learning.

James Y. C. Yen, a graduate of Yale in 1918 and a welfare worker in the Chinese Battalion in the World War, has selected 1,300 Chinese characters that occur most frequently in the vernacular and from them made four cheap text books. From these with a corps of teachers five million laborers and farmers by 1929 had learned to read and write and received the degree of "literate citizen." China is 60% illiterate and the aim of the Nationalist Government is to make literate at least 20,000,000 between the ages of 16 and 20.

AGRICULTURE AND INDUSTRY.

China is essentially agricultural, and intensively so. The average holdings are small, and the implements are crude, but there is much irrigation, crops are rotated, and fruit, cereal and vegetable production is regarded by scientists as relatively efficient, food values having for many years been replaced in the soils regularly. Deforestation of the mountain slopes and hills has resulted in great erosions. Large forests are rare. Bamboo is widely used. The amount of cultivated land is estimated at 341,163,500 acres. Cotton is produced chiefly in the Yangtse-Kiang Valley, the 1927 yield having been estimated by the China Cotton Association as 2,000,000 bales of 500 pounds each. Tea is produced exclusively in the west and south, the tea area being about 520,000 acres. Production is not officially indicated, but exportation declined from 248,757,333 pounds in 1895 to 116,290,133 in 1927, competition of Ceylon and Indian teas and the cessation of Russian purchases in late years being responsible.

The silk industry has flourished for 4,000 years. China is now producing 27 per cent. of the world's supply, having in this century yielded first place to Japan. In 1919 production was valued at $139,624,750. In 1926 China exported to the United States raw silk valued at $43,742,000, and 360,400,000 pounds of pongees, valued at $1'103,000. Wheat, barley, corn, millet, peas and beans are chiefly cultivated in the north, and sugar, indigo and several cereals in the south. Rice, the staple food of the Chinese, is grown in all but three provinces, the average annual production being 3,750,000 tons.

Cotton manufacturing, in the modern sense, began in 1895 when the treaty of Shimonoski gave foreigners the right to import machinery and engage in manufacturing at the treaty ports. China then had six native owned mills, with 133,000 spindles. In 1927 there were in China, 133 mills with 3,581,304 spindles and 25,980 looms; of this 77, with 2,007,094 spindles and 13,146 looms, were Chinese owned; 51 with 1,326,678 spindles and 10,524 looms Japanese owned; and 5 with 247,533 spindles and 2,310 looms British owned. Shanghai is the centre of the industry, having all the British, 32 of the Japanese and 22 of the Chinese mills, being 56 per cent. of the spindles and 72 per cent. of the looms. In 1927 China imported 750,000 bales of raw cotton from America. Besides the thousands of looms in private dwellings, there were 17 silk filatures, 4 woolen mills, 125 modern flour mills, 445 glass factories, and some iron and steel works.

China's 350,000,000 hens, it is estimated, lay 23,250,000,000 eggs annually, of which 1,182,000,000 are exported in the shell; 36,812,000 pounds of frozen eggs also are exported and 57,642,000 pounds of egg yolk and albumin; export value, $25,000,000.

Practically all of the 18 provinces of China Proper and 3 in Manchuria contain immense stores of coal, China being one of the world's chief coal countries. The known fields cover 133,500 acres, annual production running now at about 16,000,000 tons, of which 10,000,000 is from modern mines.

Iron ores are abundant near the anthracite coal fields of Shansi, where, it is asserted, is the oldest iron industry in the world; and in Chihli, Shantung and Manchuria. There is estimated to be in China 677,000,000 tons of the ore, annual production being about 1,500,000, of which nearly two-thirds are smelted in China.

Of tungsten ore 5,872 long tons were exported in 1925. Exports of antimony in 1926 amounted

to 15,739 long tons, and in 1927, 17,232 tons, of which the United States took over 80%.

Petroleum also is abundant, but the industry has not been developed. American oil interests have done much exploration there, and driven many wells, most of which are not active. Copper ore abounds, the Yunnan deposits being of the world's richest. Tin, antimony, gold, silver, lead, mercury, tungsten, bismuth and molybdenum are also present.

The chief exports of China are silk, beans and products, tea, skins and furs, cotton, sesame seed, tin, cereals, medicines, peanuts and peanut oil, animals, wool, antimony and copper.

The first railway was opened in 1876. At present there are nominally 7,500 miles, excluding 2,564 miles in Manchuria. Transportation has been much interrupted and interfered with by the demands of the military and the roadbeds and rolling stock have greatly deteriorated. The railroads in 1928 were practically useless for commercial transport. About 1,000 miles of highways were constructed in the four northern provinces under the auspices of the American Red Cross, as a means of finding useful employment for famine sufferers. The Nationalist Government has drawn up a very ambitious road build.ng program.

In 1927, 106,588 steamers of 112,000,000 tons entered and cleared Chinese ports in the carrying trade. The total value of the foreign trade in 1926 was 1,988,516,000 Haikwan taels (approximately $1,511,272,000).

THE REVOLUTION.

China was one of the most ancient monarchies in the world when revolution against the rule of the Manchu imperial line broke out on Oct. 10, 1911, drove the baby Emperor Pu Yi from the throne, and declared China a republic, under a provisional government and president and two-house legislative body was set up in Peking. The Central Government was not powerful enough to enforce its will on the military governors (Tuchuns) of the provinces. Parliament failed to function up to late in 1923 owing to the disturbed state of the country but did convene in Peking in October 1923 and on the 15th day of the month elected Gen. Tsao Kun president to succeed Li Yuan-hung who had resigned on June 14, 1923. A new constitution was promulgated that proved to be as lightly regarded as that discarded.

Civil war broke out anew in September 1924, in the south. As before, Dr. Sun Yat-sen, the Cantonese reformer, was the inspiring leader of the Nationalists. On Oct. 23, 1924, Gen. Tsao Kun the president was deposed and Marshal Tuan Chi-jiu assumed the office of Chief Executive. The powers recognized the provisional government in December, 1924. Dr. Sun Yat-sen went to Peking to join hands with the new government but he was very ill and died there March 12, 1925.

The rivalries of the military leaders persisted and unrest took a serious form. Trouble was fomented in the south by Bolshevist propaganda and aid, strikes and anti-foreign outbreaks, and boycotts became epidemic in Shantung, Shanghai, Canton and the interior cities. In Manchuria Gen. Chang Tso-lin maintained order.

The Kuomingtang (Nationalist political organization) built on the foundation Dr. Sun Yat-sen laid, strengthened its grip on Southern China in 1926-27, but the Communists of the party, led by the Russian adviser, Michael Borodin who was sent from Moscow and financed by that city, with Eugene Chen as foreign minister, set up a government frankly of the left in Hankow. If not fomented by them—a disputed matter—at least unrestrained mobs including uniformed soldiers raided the foreign concessions, notably at Nanking in March 24-27, 1927, but were beaten back at Shanghai. Missionaries and traders were evacuated from the entire Yangtse-Kiyang valley under cover of river gunboats. The powers sent troops and warships to protect their nationals. By April 10 there were 172 foreign naval vessels in Chinese waters and about 44,000 foreign soldiers on Chinese soil.

The *Army and Navy Journal* published on April 23, 1927, an estimate that there were 610,000 Chinese under arms. It credited Marshal Chang Tso-lin in the north with an army of 350,000 men at least half well trained; Gen. Feng Yu-hsiang in the west with 120,000; Gen. Chiang Kai-shek the Nationalist Commander-in-Chief in the south with 90,000, and Marshall Wu Pei-fu in the neutral Central China with 50,000.

The southern military leader, Gen. Chiang Kai-shek, who was Chief of Staff to Dr. Sun Yat-sen in February 1923, gained notable successes on the field until a split developed in the Kuomingtang over communism. He definitely defied the Bolshevist wing. The moderates set up a government at Nanking in April and by the end of July had forced out Euguene Chen, Borodin and the Bolshevics, but Gen. Chiang lost prestige after a defeat, resigned and retired to Japan, gaining time to plan his final coup.

The Chinese war lords got together in Peking for a conference but it was unproductive. Marshal Chang Tsao-lin, ruler of Manchuria, who had the strongest army, on June 18 declared himself Generalissimo of the Forces for the Suppression of Communism and set up a military government in Peking. Gen. Feng Yu-hsiang regarded as under the influence of Moscow, joined the southerners in July and so did Gen. Yan Hsi-shau of Chansi. The Southerners repulsed a raid by Marshal Chang's troops on Sept. 5, and fought a successful battle near Peking only to be in turn badly defeated in October by Marshal Chang who remained in possession of Peking.

A shift in the fortunes of war came when the Nationalist army started north in the spring of 1928 again under command of Gen. Chiang Kai-shek. The march was marred May 3 and 4 by a serious clash with the Japanese troops at Tsinan-fu where 6,000 were stationed with 4,000 more at Tsing-tao guarding Japanese Nationals and property. There was severe fighting with loss of life. The situation was finally gotten in hand and the Southern troops went on to Peking. After negotiations Marshal Chang evacuated the city—June 3-9—and removed his troops by rail to Manchuria. He was assassinated (June 4) on the way with his chief general by a bomb dropped on his car from a railroad bridge near Mukden. His son, Gen. Chang Hsueh-liang was chosen to succeed to the rule of Manchuria. He has shown a disposition to work in harmony with the Nationalists who left in undisputed possession there.

The Nationalists took possession of Peking with an orderly army and without looting. They proclaimed its abandonment as capital and renamed the city Peiping (Northern Peace). By the capture of Tientsin a few days later their control of North China was complete.

The Central Executive Committee of the Kuomingtang, numbering 35 of the leaders military and civil, held its fifth plenary session in Nanking Aug. 1-15, 1928. Holding that the military phase of the revolution had been accomplished by the capture of Peking, the committee turned to the work of reorganizing the government which had gone through many vicissitudes and changes in personnel. The committee adopted a budget system; plans for reorganizing the army, disbanding unneeded troops, carrying out a soldier labor policy and unifying the military system with compulsory service; plans for adopting and enforcing scientific taxation, unifying the national railroads, and encouraging roadbuilding; and the preparation of a new constitution. The Committee abolished the division of political councils, concentrated authority in a central government and divided the government into five departments: administrative, judicial, legislative, examina.n and supervisory. A new Central Political Council of 15 to direct all was set up which included Gen. Chiang Kai-shek, its president, Sun Fi, son of Dr. Sun Yat-sen, Marshal Feng Yu-hsiang, Gen. Yen Hsu-shan, Dr. C. T. Wang, head of the judicial department, Gen. Chang Hsueh-liang the ruler of Manchuria, Li Chung-seu, governor of Hankow, and Li Chai-san, commander of Canton.

Gen. Chiang Kai-shek was chosen President of the Chinese National Government and was inaugurated on Oct. 10, 1928, the 17th anniversary of the outbreak of the revolution and celebrated as Chinese Independence Day. The new Constitution was brought into legal force on Oct. 15 when a measure governing and defining the functions of the executive bodies was formally adopted by the Central Political Council. The measure set up ten ministries and various committees.

Regulations were promulgated establishing the National Bank of the Chinese Republic, capitalized at 20,000,000 Yuan dollars (approximately $9,200,000), and authorized to issue convertible bills, mint coins, and direct the flotation of foreign and domestic loans. Its head office will be at Shanghai, with the present Minister of Finance designated as director general of the bank. Announcement was also made of a proposed 30,000,000 Yuan dollar (approximately $13,800,000) 8% currency loan at 98, redeemable in seven years, and secured on the German Boxer indemnity.

The Nationalist Foreign Minister, Dr. C. T. Wang on Oct. 19 addressed a note to the Treaty Powers demanding their immediate relinquishment of extra-territorial rights. The earliest treaty stipulating this right was signed in 1689 by Russia and China. Subsequent treaties between Great Britain and China provided for consular jurisdiction over British subjects. In 1844 the principle of extraterritoriality was further laid down in a treaty between the United

States and China and this principle was inserted in the treaties of the other Powers. Mixed courts were established in consequence. Germany and Austria-Hungary lost their extraterritorial rights in 1917 subsequently, Bolivia, Chile and Persia renounced consular jurisdiction and in 1924 the Russian Soviet government also agreed to relinquish the rights of extraterritoriality. Italy, Belgium, Spain, Denmark and Portugal during 1929 also signed treaties for the abolishment of extraterritoriality on Jan. 1, 1930.

Commercial treaties concluded between China and Great Britain, the United States and Japan contain a clause declaring willingness to give every assistance to the reform of China's judicial system and to relinquish extra territorial rights when satisfied that the state of the Chinese laws and their administration and other considerations warrant it.

An agreement for the settlement of the Nanking incident of March, 1927, was arrived at March 30, 1928, between the United States Government represented by Minister J. V. A. MacMurray, and the Nanking Nationalist Government represented by Huang Fu, then Foreign Minister. An apology was given, and full compensation for personal injuries and material damage promised, this to be determined by a mixed commission. Similar settlements were later agreed to by China and Great Britain (Aug. 9); China and France (Oct. 16); and China and Japan (May 2, 1929). After signing, Japan began evacuation of Shantung.

A treaty was signed by the United States and China on July 25, 1928, granting China "complete national tariff autonomy."

The International Customs Conference appointed in connection with the two nine-power treaties negotiated at the Washington Arms Conference of 1921-22 (see The World Almanac for 1923) met in Peking Oct. 26, 1925, and began a survey of the subject, but the conference was a complete failure owing to the chaotic condition of public affairs in China.

The Nationalist Government has denounced the commercial treaties existing between China and France, Italy and Spain, and seeks to conclude new treaties. A similar denunciation of the commercial treaty with Japan was reported on July 20, the date on which the last extension of that treaty expired. This denunciation Japan refused to accept declaring it illegal under the terms of that treaty, though willing to negotiate a new treaty.

CLASH WITH SOVIET RUSSIA.

The year 1928 began with promise of stabilization of the Nationalist government. Manchuria had on Dec. 29, 1928 accepted the authority of Nanking without reserve. The personal rivalries of the military leaders, however, persisted. A rebellion in Hankow and Kwangsi was quelled in April. Marshal Feng, the so-called "Christian General," who had been made Minister of War and vice president of the council, broke with the government in May and went back to Honan where he was credited with having 200,000 troops loyal to him. He joined hands with Gen. Yen Hsi-shan tuchun of Shansi who was in opposition to the Nanking government. The report on Oct. 15 that Feng had been placed under arrest by Gen. Yen amazed the government and the situation had not been clarified by Oct. 20.

On May 27 the Chinese authorities raided the Soviet Consulate at Harbin in Manchuria and announced they had found documents proving that the consulate had been intriguing with and assisting Chinese communists seeking to overthrow the government.

Using this evidence the Nanking government "dismissed" the Russian officials of the jointly managed Chinese Eastern Railway on July 10 and replaced them with Chinese. The Soviet government protested and sent an ultimatum on July 13 and proposed a conference on that and on all relative questions. Diplomatic notes followed, the Soviet government on July 18 broke off diplomatic relations and suspended all railway communications. The situation for many days was very critical. War seemed inevitable and the powers individually made representations to the two governments based on the Pact of Paris urging a peaceful settlement. Both governments disclaimed war plans and ultimately accepted Germany's good offices.

Troops had been massed along the frontiers on both sides and many raids, some with heavy casualties, kept the situation tense. The presence of armed White Russians in Manchuria was a threat of grave danger.

The Chinese Eastern Railway, forms a short cut through Manchuria for the Trans Siberian Railway, saving 568 miles. It was a joint enterprise of Russia and China constructed by Russia under an agreement signed September 8, 1896 which placed Russians in charge of all technical and administrative departments and practically of the general management, though this was under a board of directors composed equally of Russians and Chinese. Following readjustments after the war and Russian revolution, this agreement was reestablished May 31, 1924. The railway was completed in June, 1903 at a cost in excess of $200,000,000. With the later extensions the mileage is about 1,078. Operating revenues in 1927 were approximately $29,897,898, other revenues, $89,250; operating expenses, $20,054,233, other expenses, $1,931,368.

(See chronology for developments).

(For the record of events of the Revolution, see the World Almanac for 1924, 1925, 1926, 1927, 1928 and 1929, articles on China.)

FINANCIAL.

There is "unparalleled currency confusion," says an authority. The customs unit is the Haikwan tael (= 1⅓ oz. of silver) which varies in gold par value from 67.08 cents in Shanghai to 74.86 in Takus average rate of exchange in 1928 was 70.74 cents, in 1927 69.18 cents, in 1926 76.24 cents, and in 1925 83.74 cents.

The rate of exchange for the Shanghai tael on Oct. 10, 1929 was 54.53 cents and the Tientsin tael 57.25 cents. The Mexican dollar (= $0.391 in Oct. 10, 1929), is used in all treaty ports.

The revised import tariff was made effective Feb. 1, 1929. It was drawn up in accordance with the agreement of the powers at the Washington Conference of 1921-22 and is designed to assure the Chinese Government an effective 5 per cent. revenue on the value of goods imported.

China's foreign trade is but one-fiftieth of that of the United States per capita. The United States furnished in 1926, 16.4% of her imports and took 17.4% of her exports; the percentage in 1925 was 14.8 and 18.4.

The chief sources of revenue are from customs, taxes and from the Salt Gabelle, both under foreign control. Maritime customs collections in 1928 amounted to 82,332,000 Haikwan taels; in 1927 to 68,781,876; and in 1926 to 80,435,962. The Salt Gabelle revenue in 1927 amounted to 57,907,000 silver dollars; and in 1926 to 64,287,000 silver dollars.

Finance Minister Soong on Jan. 13 estimated the revenues for 1928 at $457,000,000, and the expenditures at $507,000,000, with 41% of the gross revenues allotted to military expenditures.

Dr. Edwin W. Kemmerer of Princeton University, on invitation of the Chinese Minister of Finance, arrived in Shanghai on February 9, 1929 at the head of the American Commission of Financial Advisers to the Chinese Government, composed of thirty experts. Their task is to draft plans for reorganizing the finances, budget, debt, taxation, currency, banking, and railroad operations and finance. China is the eleventh country to call in Dr. Kemmerer to reorganize its financial problems. The task is expected to take a year and result in a new series of laws and new governmental systems of administration.

Interest and amortization of foreign loans are a first charge on the Maritime Customs and Salt revenues, and the surplus is turned over by the foreign administrator (the chief of each service is English and subordinate officials are of various nationalities, including Chinese) to the Chinese Government for service of domestic loans and administrative expenses.

Most of the revenue is retained by the local authorities and little gets to the Central Government. The Peking Government was bankrupt and made no effort in its later years to meet its outstanding unsecured foreign obligations or such of its internal debts as were not secured in the surplus of customs revenues.

The Boxer indemnity payments resulting from the uprising in 1900 amounted to 450,000,000 Haikwan taels. Payments on these were suspended upon China's entrance into the World War in 1917, and resumed on Dec. 1, 1922. By act of Congress on May 11, 1924, the balance due to the United States, amounting to $6,137,553, was remitted and was turned over by President Coolidge on July 20, 1925, to the China Foundation for the Promotion of Education and Culture, a board composed of nine Chinese and five Americans. The United States had previously returned (act of May 25, 1908) $10,785,281 to be used for educational purposes, and later, a further sum of $1,175,836.

China's national debt as compiled by the Government Bureau of Economic Information in 1922 was as follows, amounts being stated in Mexican dollars:

	Mex. Dollars
General foreign loans	268,979,252
Foreign railway loans	334,802,631
Foreign indemnities	482,841,744
Internal long-term loans	275,226,738
Internal short-term loans	69,101,978
Treasury notes, etc	18,640,000
Total	1,449,592,343

The last items do not contain all the short-term loans and treasury note issues, as the amounts of some of these cannot be ascertained. The floating foreign debt on Jan. 1, 1923, was $486,741,512 Mex.

China, it is estimated, is in default of interest or principal on foreign loans totaling some $200,000,000 gold. No estimate is possible of the internal debt.

Imports and exports for eight years valued in gold dollars are:

Year.	Imports.	Exports.
1921	$709,433,000	$477,582,000
1922	799,236,000	561,393,000
1923	780,821,000	640,494,000
1924	838,082,000	635,256,000
1925	793,742,100	650,117,950
1926	854,407,960	656,864,000
1927	698,923,080	633,847,000
1928	825,218,710	684,032,950

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$100,357,041	$134,609,105
1923	108,594,778	187,602,172
1924	109,188,791	117,885,965
1925	94,442,189	168,939,009
1926	110,205,014	143,203,840
1927	83,470,655	151,679,897
1928	136,960,010	140,031,241

MANCHURIA.

AREA, 363,610 square miles.
POPULATION, 1927, estimate of the Southern Manchurian railway, 27,490,000.
CAPITALS. Mukden, pop., 1928, 400,000, Fengtien Province, Kirin of Kirin Tsitsihar, of Heilungkiang.

Manchuria is the extreme northeast territory of China, with Siberia on the northwest, north and east, Korea on the southeast, and Mongolia on the west. The Amur River flows along the northern border, the Ussuri on the east, and the Yalu forms the boundary with Korea.

Its topography is extremely varied. Much of the eastern portion is intensively agricultural. The soya bean, cultivated on about 20,000,000 acres, is a source of enormous wealth. The Chamber of Commerce at Dairen estimates that 81,719,000 acres are cultivated for all crops. The forests cover 45,500,000 acres. Wheat, beans, millet, rice and products of the soya bean are the chief crops. There are 50 flouring mills. There are rich deposits of coal, iron, lead, gold, silver and asbestos.

The output of anthracite coal in 1927 was 6,000,000 tons, and of iron ore 200,000. The production of soya beans in 1928 was 5,241,090 tons.

The Trans-Siberian railroad runs through Manchuria to Vladivostok. From Harbin the railroad runs to Mukden and then branches to Peking on the west, Port Arthur and Dairen on the south, and through Korea to Mokpo, and Fusan on the southeast. Railway mileage in 1926 was: South Manchuria, 686; Chinese Eastern, 1,078; Chinese Government and Provincial railways, about 1,800. Railroad development has been followed by an enormous influx of Chinese immigrants, mostly farmers with families, driven out by famine and by hardships and suffering incident to civil war. In 1927, 1,500,000 entered Manchuria and as many more in 1928.

Direct foreign imports in 1927 were valued at $105,670,825; and exports at $150,924,835.

Japanese capital invested in Manchuria is estimated to amount to $750,000,000; and about 200,000 Japanese are settled there.

MONGOLIA.

AREA, estimated, 1,367,600 square miles.
POPULATION, estimated, 1,800,000.
CAPITAL, Urga.

Mongolia, although nominally of China, was somewhat shaken loose from Chinese adherence during the late war, the status of Outer Mongolia being now that its autonomy is recognized by China, and it is recognized by Russia as under Chinese suzerainty. It is bounded on the north by Siberia, on the south by Sinkiang, on the southwest by Turkestan, on the east by China Proper and Manchuria.

Inner Mongolia, early in 1928, declared its allegiance to Nationalist China.

There is little agriculture, the great plains between the Tarbagatai and Kinghan Mountains being desert, with camels, horses and sheep as principal interests. The religion of the people is Buddhist Lamaism.

Motor transportation from Kalgan on the Great Wall of China, northwest of Peking, and at the terminus of the Kalgan-Peking railroad, with Urga, the capital of Mongolia, a distance of 650 miles across the plains, was established in 1921. The trip takes three to four days.

Mongolia has its own legal currency, adopted in 1915, equal to the gold par of the Russian ruble—50 cents.

SINKIANG (Chinese Turkestan).

AREA, 550,340 square miles.
POPULATION, estimated, 2,000,000.
CAPITAL, Ili.

Sinkiang, known as the New Dominion, comprises Chinese Turkestan, Kulja and Kashgaria and includes all Chinese dependencies between Mongolia on the north and Thibet on the south There are Turki, Mohammedan and Chinese people resident there. Along the Kashgar and Yarkand Rivers there is much irrigation, and cereals, fruits and vegetables are grown, with wool, cotton and silk production.

It is from Sinkiang that much of the jade comes.

THIBET.

AREA, 463,200 square miles.
POPULATION, estimated, 2,000,000.
CAPITAL, Lhasa; pop. 15,000 to 20,000.

Thibet, in Western China, is a country little known, situated between the Himalaya and Kwenlun Mountains, and hitherto practically shut to strangers. The trade is with India mostly, being carried on through lofty passes, some of which are 14,000 to 18,000 feet high, which are impassable in winter. China's hold on Thibet was visibly loosened when the 1911 revolution broke in China. The Thibetans expelled the Chinese garrisons, and the status of that country is indeterminate, although nominally part of the Chinese Republic.

The head of the Government is the Dalai-Lama, regarded as the reincarnation of Buddha.

The religion is Lamaism, a modified form of Buddhism, and also a faith known as Shamanistic. All economic phases are affected by the non-progressive character of the people, who are immersed in their religious traditions. Some agriculture is carried on, and livestock husbandry.

The highest grade musk is obtained from the musk-deer, now becoming very scarce, in Tsarung mountains in Southeastern Thibet.

Exports to India, mostly raw wool, in 1924-25 were valued at £330,900; and imports from India, mainly cotton piece goods, were valued at £418,900.

COLOMBIA, REPUBLIC OF

AREA, estimated, 482,400 square miles.
POPULATION, 1928, official estimate, 8,000,000.
CAPITAL, Bogota, population, census, 1928, 220,000; chief cities, Medellin, pop., 1923, 79,146; Barranquilla, 64,543; Cartagena, 51,382; Cali, 45,825; Cucuta, 29,490; Bucaramanga, 24,919.
President, Dr. Miguel Abadia Mendez, (1867), Conservative 1926-30. Inaugurated Aug. 7, 1926.
Premier, Gabriel Rodriguez Diego (Interior, War).

The Republic of Colombia, situated in the extreme northwest of South America, extends up the Isthmus of Panama to the Republic of Panama—boundary line to be determined by treaty by a joint commission. It has a coast line of 465 miles on the Pacific Ocean, and 640 miles on the Caribbean Sea. It has as neighbors Venezuela and Brazil on the east, and Ecuador and Peru on the south. Its area is equal to that of California, Oregon, Washington and Montana combined.

About 13,000 square miles of the province of Putumoyo, a tropic forested upland on the eastern flank of the Andes, was ceded to Peru in 1928 in adjustment of boundaries; Colombia obtaining a clear title to land reaching to the Amazon.

Three great ranges of the Andes, the Western, Central and Eastern Cordilleras, run through the country from north to south. The eastern range consists mostly of high table lands, cool and healthy, the most densely populated part of the country. The Magdalena River, in the east, rises in the high Andes and flows north into the Caribbean Sea, 18 miles from Barranquilla. It is navigable for river steamers for 930 miles, as far as Jiradot. Steamers ascend to LaDorado, 590 miles. In 1928 down river cargo amounted to 209,181 metric tons, and up river cargo to 387,154 tons. Low water greatly impedes navigation. Railroads serve to transport freight and passengers around the rapids and from Jiradot to Bogota. The total mileage of railroads was 1,470 in 1928, with 400 under construction and the bulk of the transportation in the interior is on mule back.

The population is mainly whites and half-castes, only 158,428 Indians being returned. Bogota, the capital, situated 8,600 feet above the sea, has a university, founded in 1572, a large library, a

museum and observatory. The Roman Catholic is the prevailing religion, but all are tolerated. The standing army consists of about 6,000 men, with a reserve of 362,700. Military service is compulsory. There is no navy.

The country is divided into 14 departments, 2 intendencias and 7 comisarias, with Governors appointed by the President. The Federal Congress consists of a Senate of 34 members, elected for a term of 4 years, and a House of Representatives of 92, elected directly by the people every two years.

There were in 1925, 6,514 primary schools with 413,508 pupils. The appropriation for education that year was 4,782,950 pesos.

The forests are extensive, much mahogany, cedar and dyewood being exported. Colombia contains the great emerald mines of the world, the chief mines being owned by the state. The country is rich in minerals—gold, silver, platinum, copper, iron, lead and coal are mined. The Government-owned salt mines at Zipaquira are a great source of revenue. Coffee, cotton, bananas, cocoa, vegetables, ivory, tobacco, and wheat are the chief agricultural products. Cattle raising is extensive. Some woolen and cotton stuff is manufactured for home consumption, also iron.

The coffee crop in 1926 from 331,301,000 trees, was 2,760,848 bags of 138 pounds each. Export in 1926 was 147,255 metric tons, valued at $83,080,000; in 1927, 151,730 metric tons valued at $79,808,000, and in 1928, 174,888 tons. Exports of bananas in 1926 was 238,820 metric tons (11,000,000 bunches) valued at $5,211,000, in 1927 196,624 metric tons (8,464,000 bunches) valued at $5,587,000, and in 1928, 230,368 metric tons (10,221,426 bunches) valued at $8,884,862. Sugar production in 1924 was 125,000 sacks.

The production of crude petroleum in 1924 was 444,744 barrels; in 1925, 1,006,708 barrels; in 1926, 6,443,527 barrels; in 1927, 15,760,797 barrels; and in 1928, 19,896,797 barrels. The oil wells are at Barranca on the Magdalena River, 360 miles from Cartagena. A pipe line with a daily capacity of 30,000 barrels of crude oil was officially opened May 1, 1926. Its capacity has since been increased to 50,000 barrels a day.

Export of gold was $2,078,739 in 1924; $1,610,095 in 1925; and $1,521,929 in in 1926; and $2,000,000 in 1927. Export of platinum was $3,600,000 in 1923; $5,338,126 in 1924; and $4,681,489 in 1926; and $3,500,000 in 1927, about one-half the world's supply. The yearly emerald output, a government monopoly, is about $250,000.

The country, originally conquered by Spain and ruled by her for 300 years, won its freedom in the revolt of the Spanish-American colonies in 1811-24, the liberator, Simon Bolivar, establishing the Republic of Colombia in 1819. Venezuela and Ecuador withdrew in 1829-30, and there were frequent uprisings during the century, culminating in the secession of Panama in 1903, since which the republic has been tranquil. Under the treaty with the United States adjusting the loss of Panama (ratified by the United States Senate April 20, 1921, and by the Colombian Congress Dec. 24, 1921), Colombia has received in compensation $25,000,000 from the United States, which was chiefly applied to railroad construction. It is estimated that $220,000,000 American capital is (1928) invested in the country.

An advisory commission of North American financial experts visited Colombia on invitation of President Ospina, and Congress put into effect in 1923 the reforms they suggested. The gold standard was adopted, the Bank of the Republic, a central issue bank, created with an authorized capital of 10,000,000 pesos, which has the exclusive privilege of issuing bank notes, new laws on banking and negotiable instruments; and a new model for the budget. This was followed by a law on Dec. 12, 1923, for the conversion and unification of the national debt. The banks had on June 30, 1926, a gold reserve of 37,468,972 pesos, and note circulation was 75,814,118 pesos. A land bank was also set up. Political and commercial stability followed.

The peso remained stable at or about par (=97.3 cents) throughout 1926, 1927 and 1922. The financial condition was excellent.

The Bank of the Republic on June 30, 1928, had $50,977,312, with a cover of gold in its vaults of $23,410,000, and gold held in banks abroad, $39,008,234, or total reserve of 103.92 per cent.

A $35,000,000 6% 33-year bond issue was floated at 95 in New York on April 1, 1928, the proceeds to be devoted to railway and highway construction. With the completion of this financing, Colombia's national debt, both internal and external, is approximately, $80,440,000, less than $11 per capita, requiring $7,238,807 for annual services.

Recent ordinary budgets are:

	Revenues.	*Expenditures.*
1923	$32,425,591	$21,440,345
1924	32,576,680	23,179,928
1925	45,005,038	29,874,067
1926	54,163,088	46,372,006
1927	63,287,288	48,923,664
1928	51,944,000	45,158,000
1929	65,653,668	60,097,804
1930	70,034,000	70,034,000

Foreign trade was:

	Imports.	*Exports.*
1922	$42,969,272	$51,323,547
1923	59,475,343	58,648,305

1928	58,595,919	94,619,472

COSTA RICA, REPUBLIC OF

AREA, 23,000 square miles.

POPULATION, census, May 1927, 471,524.

CAPITAL, San Jose, pop., census 1927, 50,580. Other cities, Limon, 15,624 Cartago, 14,883.

President, Sr. Don Cleto Gonzales Viquez, 1928-32. inaugurated May 8, 1928.

Premier, Sr. Don Tomas Soley Guell (Finance).

Costa Rica, the southern state of Central America, has Nicaragua for its neighbor on the north and Panama on the south. The lowlands by the Caribbean have a tropical climate. Bananas are cultivated, 8,561,000 bunches valued at $6,421,000 being exported in 1926, 7,852,490 bunches valued at $6,500,000 in 1927, and 7,307,858 bunches in 1928. The interior plateau, with an altitude of about 4,000 feet, has a temperate climate. Coffee is the chief crop; exports in 1928 amounted to 44,250,000 pounds. The export of cacao in 1928 was 43,005,172 kilos.

The forests are extensive, but little lumbering is done. Agriculture and stock raising are the chief industries. Gold and silver mining is an important industry on the Pacific slope. Port Limon is the center of the banana trade. In 1927, 696 vessels tonnage 1,321,637, entered the ports. There are 430 miles of railroads the line from Port Limon to San Jose, 103 miles, has unusual scenic charm. The Pacific railway is being electrified.

Congress passed Aug. 4, 1928, a law which nationalizes all electric power available to form a government electric service.

The Constitution, adopted Dec. 7, 1871, has been many times modified. The legislative power is vested in a Chamber of Deputies, 43 in number, with four-year terms, one-half elected directly every two years by manhood suffrage. The President, elected for four years, appoints a Ministry of six. The Roman Catholic is the religion of the state.

Primary education is compulsory and free. In the primary schools on March 1, 1926, 41,926 pupils were enrolled, and in the normal and secondary schools 518 women and 678 men. The Government spent 2,593,318 colones on education in 1923. Illiteracy in 1927 was 23.6%.

The National Police have taken over the duties of the army.

Budgets in colones, (equals 25.0 cents) were:

	Receipts.	Expenditures.
1924	23,259,050	20,433,661
1925	25,781,231	23,767,550
1926	27,417,348	22,611,489
1927	30,584,122	23,319,188
1928	33,318,699	28,406,444

The public debt on June 30, 1927 was: External, 68,993,444 colones; internal, 8,154,100 colones; floating, 12,785,100 colones.

The gold reserve of the International Bank, Feb. 26, 1928, was $1,494,643 (5,978,572 colones); notes in circulation Apr. 22, 1929, 22,025,450 colones.

Imports and exports, in dollars, were:

	Imports.	Exports.
1924	$12,003,017	$16,565,232
1925	13,820,944	16,416,095
1926	13,826,000	18,962,000
1927	16,310,781	18,058,332
1928	17,875,000	19,625,000

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$4,040,766	$5,495,430
1923	4,835,166	4,630,574
1924	5,975,384	4,688,519
1925	6,800,819	4,791,531
1926	6,312,416	7,052,187
1927	7,297,743	6,035,398
1928	8,087,118	5,569,734

CUBA, REPUBLIC OF

AREA, 41,634 square miles; including the Isle of Pines (1,180 square miles) and surrounding keys, about 44,164 square miles.

POPULATION, census of Dec. 31, 1925, 3,413,216 exclusive of the isle of Pines (4,817). White, 2,315,928; colored, 829,201; unclassified (includes Americans, Europeans, Chinese and all foreigners permanently resident), 268,087. By Provinces: Pinar del Rio, 276,206; Habana, 916,999; Matanzas, 332,277; Santa Clara, 713,882; Camaguey, 243,982; Oriente, 844,582; immigrants, 85,288. Census Bureau estimate, June 30, 1928, 3,579,507.

CAPITAL and chief port, Havana. Population, census of Dec. 31, 1925, 562,968; other cities, Santiago, 141,124; Camaguey, 82,042; Cienfuegos, 73,281; Guantanamo, 51,947; Santa Clara, 70,852; Matanzas, 66,767; Sancti Spiritus, 88,608; Manzanillo, 61,742; Pinar del Rio, 49,864; Trinidad, 45,229; Moron, 47,080.

President, Dr. Gerardo Machado (Liberal), born 1873, inaugurated May 20, 1925, for term of four years. Reelected, unopposed, Nov. 1, 1928 for a term of six years beginning May 20, 1929.

Premier, Dr. Rafael Martinez Ortiz (State).

Cuba, the "Pearl of the Antilles," largest island of the West Indies, lies between the Gulf of Mexico, the Strait of Florida and the Atlantic Ocean on the north and the Caribbean Sea on the south. Key West, Fla., is about 100 miles a little to the east of north of Havana. The Windward Passage, 50 miles wide, separates it from Haiti to the east, and Jamaica (British) lies 85 miles to the south. Yucatan is 130 miles to the west. From San Antonio, the western extremity, to Cape Maysi, the eastern, the length is 730 miles, and the breadth averages 50 miles, with a maximum of 160 miles. Its area nearly equals that of Pennsylvania. The coast line, including the larger keys, is about 2,500 miles in length. It has numerous safe and commodious harbors, notably that of Havana, one of the finest and safest in the world. Other first-class harbors are Bahia Honda, Matanzas, Cardenas, Nuevitas and Nipe on the north shore, and Santiago and Cienfuegos on the south; also Guantanamo, now a United States naval station.

Mountains rise in Pinar del Rio Province in the west, and in Camaguey and Oriente in the east, where they reach a general elevation of about 3,000 feet, with Monte Turquino (8,320 feet) as the highest point. Santa Clara is rough and broken, but Matanzas and Havana are flat and rolling. The uplands and mountains are covered with magnificent forests, the scenery is wild and very beautiful, and many points are inaccessible. Broad intervals of low upland are frequent. Near the coast runs a continuous belt of plantations. Grazing, tobacco and general farm lands cover the lower slopes of the hills. There are 13,000,000 acres of uncleared forest land.

The soil is alluvial, and under the tropical heat and humidity the vegetation is of rare richness. It is estimated officially that 8,628,434 acres are covered with dense forest, mostly primeval. The royal palm is the most characteristic tree, rising to 75 feet, sometimes 100 feet, in height, dominating every landscape. All tropical fruits and vegetables flourish. At Havana the mean temperature is 76° and the mean rainfall 40.6 inches. Hardly a decade passes without a destructive hurricane. The population is about 60 per cent. native white, 30 per cent. colored, and 10 per cent. foreign white.

In the winter of 1927-28, 62,547 tourists visited the Island and, it is estimated, spent $60,000,000.

Sugar has been the dominant crop for 150 years and its price is the barometer of prosperity for the island. Cuba exported raw sugar to the value of $724,150,000 in 1920; $276,062,549 in 1922, $368,497,830 in 1925; $254,393,000 in 1927; and $199,021,000 in 1928. The United States takes about 90 per cent. of the crop. The 1925-26 crop was 5,120,420 long tons; that of 1926-27, 4,508,920 tons; and that of 1927-28, 5,135,000 tons.

President Machado, on May 4, 1926, signed a sugar control law which provides a tax of $5 a bag upon sugar produced in excess of 90% of the crop of 1925, which was intended to limit production to 5,330,072 tons. To further control and restrict production the Sugar Defense Act passed Oct. 4, 1927 authorizes a commission of five to survey the situation on whose finding the President may act by decree, also the creation of the Cuban Sugar Export Corporation, to the stock of which every planter must subscribe, to market the crop.

Pres. Machado signed, Jan. 20, 1928, a decree fixing the Cuban sugar crop for 1927-28 at 4,000,000 long tons, of which 3,300,000 tons (with the 250,000 tons left over from the 1927 crop) is allotted to the United States, 150,000 tons to local consumption and the balance for export to other countries.

Rum, molasses and alcohol are important by products.

Tobacco raising and the manufacture of cigars and cigarets is the second industry of the island. The total value of the crop is between $70,000,000 and $80,000,000 annually; the tobacco manufactured in Cuba in 1925 was valued at $54,389,761. The total tobacco export trade was: 1925-26, $39,628,224; 1926-27, $38,341,547; 1927-28, $40,000,000.

The Cuban Chamber of Commerce in January 1928 estimated the investment of United States capital in Cuba as 90% of the total foreign investment and classifies it as follows:

Sugar industry	$800,000,000
Realty holdings	150,000,000
Railroads	120,000,000
Government bonds	110,000,000
Public utilities	110,000,000
Industrials	50,000,000
Tobacco	50,000,000
Commerce	40,000,000
Mines	35,000,000
Banks	25,000,000
Miscellaneous	15,000,000
Total	$1,505,000,000

Total of British investments in Cuba is officially estimated at £14,000,000.

From the Isle of Pines 220,000 cases of grapefruit valued at $554,800 were shipped to the United States in 1926, and 40,000 to England.

Stock raising is an important industry, the cattle Dec. 31, 1926, numbering 4,703,917. Mahogany and other valuable cabinet woods are produced and much cedar for the manufacture of cigar boxes. From the iron mines 50,000 tons of ore are exported monthly to the United States with reserves estimated at 3,221,000,000 tons. Copper is a valuable product, also asphalt.

Cuba had in 1927, 3,025 miles of railroads, excluding the private lines connecting the sugar plantations with the trunk lines.

The island has over 1,800 miles of automobile roads, and in October, 1926, was begun the building of an elaborate central highway system 705 miles long and 20.66 feet wide, the length of the island and without grade crossings to be completed by 1932 at a cost of $75,680,000, but including aqueducts and sewage systems for numerous towns, of $385,000,000. A $50,000,000 5% construction loan was negotiated with the Chase National bank of New York on June 22, 1928. President Machado on May 26, 1929 opened the Matanza section of the road 62 miles long. On June 30, 1927, 43,056 motor vehicles were registered.

In 1928, 6,500 vessels of 21,486,978 tonnage entered the ports in the foreign trade.

Cuba, discovered by Columbus in 1492 and first settled by the Spanish in 1511, attained independence of Spain by the Treaty of Paris, Dec. 1, 1898, which ended the Spanish-American War. A Constitution, modeled after that of the United States, was adopted Feb. 21, 1901. It provides for a President and Vice President, elected for four years by direct vote; a Senate of 24 members (four from each of the six provinces) and a House of Representatives of 115 members.

Amendments voted by Congress June 21, 1927, and approved by a Constitutional Convention May 9, 1928, provide that the president's term shall be six years and that he be ineligible for re-election; that the office of vice president is abolished with succession in case of death or disability devolving on the Secretary of State with a new election within 60 days; that the number of Senators is increased to 32 and their term of office to nine years; that the number of representatives is increased to 128 (one for each 25,000 inhabitants) and term increased to 6 years with national elections every 3 years and that the franchise is extended to all males over 21, a two-thirds vote in each house of Congress being empowered to grant the franchise to women. The provinces and municipalities have a large measure of home rule.

The Congress of the United States authorized the President to hand over the Government to the Cuban people on the condition that the so-called

Platt amendment, adopted by Congress March 2, 1901, be accepted. This provided that the Cuban Republic should never enter into any compact with a foreign power that would impair her independence; that she would contract no excessive debt; that the acts of the United States in Cuba during and after the war be validated; that the Cuban Government should carry out certain plans for the sanitation of the island; that certain lands necessary for coaling or naval stations be leased to the United States, and "that the Cuban Government consents that the United States may exercise the right to intervene for the preservation of Cuban independence and to maintain a Government capable of protecting life, property and individual liberty, and for discharging the obligations with respect to Cuba imposed by the treaty of peace on the United States, now to be assumed and undertaken by the Government of Cuba." This was made on June 12, 1901, a part of the Constitution. On Feb. 24, 1902, the election of President (Thomas Estrada Palma) took place and the United States formally transferred control of the island to the National Government. The coaling stations, Guantanamo Bay and Bahia Honda, were leased to the United States on July 2, 1903, at an annual rental of $2,000.

Notable work was accomplished by the United States Military Government under Gens. Brooks and Wood, especially the stamping out of yellow fever.

Political disturbances occasioned intervention by the United States in August, 1906, which continued until Jan. 28, 1909, when the National Government was resumed after the institution of electoral reforms, and the last American soldiers left the island April 1, 1909. A new electoral law, drawn with the assistance of Major Gen. Enoch H. Crowder, U. S. A., was passed in August, 1919. The election of Nov. 1, 1920, was very stormy, and interpretations put on the new laws brought about a deadlock. Gen. Crowder was sent to Cuba in January, 1921, again as personal representative of President Wilson, to straighten matters out, the result being the inauguration of Dr. Alfredo Zayas on May 20, 1921.

Under the influence of Gen. Crowder the Congress passed, during the summer session of 1922, five reform measures—the reorganization of the National system of accounting, the suspension of certain provisions of the civil service law to permit the President to shift the personnel of various Government departments in the interest of economy and efficiency, certain judiciary reforms, the clearing up of current indebtedness, and the flotation of a foreign loan of $50,000,000, the latter authorized Oct. 7. The issue in 30-year 5½ per cent. bonds was floated in New York in January, 1923, at 96.77.

The foreign debt on Feb. 28, 1929 was 93,720,674, all floated in New York; and the internal debt $10,064,200. The peso (equals $1.00) is the unit of currency. The country is on a gold basis.

Bank clearings in Havana amounted to $914,637,921 in 1926. Savings accounts on Dec. 31, 1926, amounted to $35,510,821 for 55,000 depositors.

Cuba is the sixth best customer of the United States, which sold her 62.1% of her imports in 1927 (61.4% in 1926). The United States took 79.1% of Cuba's exports in 1927 (80.4% in 1926).

Gen. Machado (Liberal) was elected President over Gen. Menocal (Conservative) Nov. 1, 1924, to succeed Dr. Zayas, the vote being: Liberal, 167,330; Conservative, 118,387; and Populars (thrown to Machado), 23,768. He was reelected, unopposed, Nov. 1, 1928, for a six-year term; and inaugurated May 20, 1929 in the handsome new $16,000,000 capitol.

The Isle of Pines treaty (Hay-Quesada), which had been before the United States Senate since 1904, was ratified by that body by a vote of 63 to 14 on March 13, 1925, and ratifications were exchanged on March 23. The treaty relinquishes in favor of Cuba all claim of the title by the United States to the Isle of Pines which might arise from the Spanish-American treaty of 1898, confirmed by grants of coaling and naval stations and protects the rights of American residents. American investments in the Isle of Pines amount to $21,000,000 and about 700 native Americans live there.

The army numbers 12,500 men; reserve, 300,000.

The Education Act of 1899 established a system of primary and secondary schools, with compulsory attendance, under which education has progressed greatly. A wide system of kindergartens and night schools has been added. In 1927 there were 6,952 primary schools with 449,478 pupils and 7,350 teachers. There were 525 private schools with 31,949 pupils and 1668 teachers. The University of Havana (founded 1721) in 1929 had 5,272 students. The Roman Catholic religion is dominant.

Recent budgets are:

Year.	Revenues.	Expenditures.
1921-22	$72,000,000	$64,422,665
1922-23	55,638,800	54,852,102
1923-24	68,500,000	61,672,169
1924-25	71,048,200	65,138,643
1925-26	84,791,649	83,787,590

CZECHOSLOVAKIA, REPUBLIC OF

AREA, 54,195 square miles; viz: Bohemia, 20,102; Moravia and Silesia, 10,336; Slovakia, 18,893; Carpathian Russinia, 4,864.

POPULATION, census of Feb. 15, 1921, 13,613,172; viz.: Czechoslovaks, 8,760,937; Germans, 3,123,568; Magyars, 745,431; Ruthenians, 461,849; Jews, 180,855; Poles, 75,853; others, 25,871; and 238,808 non-citizens. Est'd 1928; 14,523,186.

CAPITAL, Praha (Prague); pop., 676,657; other cities, Brno (Brunn), pop. 221,758; Plzen (Pilsen), 108,023; Bratislava (Pressburg), 93,189; Olomouc, 57,206; Kosice, 52,898; 78 others from 10,000 up.

President, Dr. Thomas G. Masaryk, born 1850; took office Nov. 14, 1918; re-elected May 28, 1920; reelected May 27, 1927.

Premier, Frantisek Udrzal (Agrarian), Feb. 1, 1929.

Minister for Foreign Affairs, Dr. Eduard Benes, National Socialist.

Czechoslovakia is a Central European republic, about the size of the State of Illinois, bounded on the north by Germany and Poland and on the south by Roumania, Hungary and Austria. Its extreme length from east to west is 600 miles and its width varies from 50 to 100 miles.

It comprises the territories of the ancient Bohemian kingdom (Bohemia, Moravia and a part of Silesia), and the upper parts of former Hungary known as Slovakia and Carpathian Russinia, the latter forming an autonomous part.

Czechoslovakia is one of Europe's richest countries agriculturally. It is becoming a land of peasant holdings, the number of farms being 3,791,621.

Immense quantities of foodstuffs are exported, the net food surplus being larger than for any other country in Europe. Agriculture has been restored to almost normal.

Sequestration of the land to be partitioned off began in earnest in 1923, when 465,000 acres, entirely agricultural, were partitioned; in 1924 350 estates were broken up and more than 500,000 acres distributed. In 1927 there were about 1,500,000 farms, 40% under 5 acres in size, 30% from 5 to 12 acres, and 25% from 12 to 50 acres.

Farming is unusually highly developed and is intensive, as indicated by the production in 1927 of 22,326,858 metric tons of wheat, oats, barley, rye, potatoes and sugar beets from about 3,960,885 hectares (9,783,384 acres). Beet sugar produced in 1926-27 was 1,045,819 metric tons, of which in 1927, 617,321 tons were exported; in 1927, 492 breweries' output was 9,997,213 hectolitres of beer, and in 1926-27, 875 distilleries, 515,858 hectolitres of spirits. Livestock Dec. 31, 1925 numbered: cattle 4,691,320; horses 740,202; pigs 2,539,201; sheep 861,128; and goats 1,244,701.

Forests cover 33 per cent. of the 34,685,248 acres of Czechoslovakia or 11,485,232 acres; the yield in 1926, 15,800,000 cubic metres (558,000,000 cubic feet.) They are so handled as to permit the use of only the annual increment, and produce at present more wood than the country can consume.

Mineral wealth is great, coal, iron, graphite, copper, lead, gold silver and garnets being abundant.

Coal production was anthracite, 1928, 15,171,403 metric tons; 1927, 14,669,977; 1926, 14,176,998; bituminous (lignite) 1928, 20,709,558 metric tons; 1927, 19,620,637; 1926, 18,515,666. There were, in 1928, 271 mines producing, employing 94,420 workers.

The production of iron ore was: in 1928, 1,779,000 metric tons; 1927, 1,590,527; 1926, 1,421,174; of pig iron in 1928, 1,592,000 metric tons; 1927, 1,260,363; of steel in 1928, 1,992,000 metric tons; 1927, 1,692,000; and of petroleum, 1928, 97,538 barrels; 1927, 115,318 barrels; 1926, 154,966 barrels.

Czechoslovakia joined the European Steel cartel in Jan. 1927. In July 1928 she was permitted unlimited domestic production but her export quota was fixed at 432,836 metric tons, which equals her exact export of 1927.

Unemployment reached its peak in January, 1923, with a total of 441,075. The situation steadily improved, the number on Dec 31, 1925, being 47,862; and on June 30, 1926, 68,044. It grew worse in the winter reaching 130,000 Nov. 1, but dropped to 80,000 May 1, 1927, 53,242 Jan. 1929. From 1918 to March 31, 1925, the state has paid out 1,201 million crowns in benefits to unemployed workers; payments in 1924 being 140 million crowns. State insurance against sickness and old age went into operation July 1, 1926. It applies to over 250,000 workers. Emigration was 39,429 in 1922; 32,341 in 1923, 54,373 in 1924, 19,350 in 1925, 26,129 in 1926, 23,596 in 1927.

Factories numbered in 1927, 11,738; textile, 1,996; glass and imitation prec ous stones, 2,155; foodstuffs, 1,849; furniture and wood, 1,383; machinery, 883; metal, 879; paper, 380; chemicals, 639.

The railroad mileage was in 1926, 8,530; 6,859 state owned. The railroads showed a surplus in 1926 of 65,128,161 crowns (about $1,930,000) of receipts over expenses. The peace treaty gave Czechoslovakia, which has no outlet to the sea, 200 miles distant, the right to certain wharves in Hamburg and Stettin. The Dunaj (Danube) is the principal waterway, its chief port being Bratislava (Pressburg). On the Labe (Elbe), which flows from Czechoslovakia through Germany the main ports are Usti (Aussig) and Decin (Tetschen).

The Czechoslovaks is a term for two branches of the same Slav nation. The beginning of the independent kingdom of Bohemia in Central Europe reaches to the fifth century. In 1526 the Habsburgs were elected to the throne of Bohemia, which thus became united through a common dynasty to Austria and Hungary. Religious persecution in the seventeenth century led to unsuccessful rebellions and to the loss of independence. The persecution of the Czechs by the Habsburgs left great bitterness. In its present form Czechoslovakia is a creation of the war coming into existence Oct. 28, 1918, on the break-up of the Austro-Hungarian Empire, of which it was the northwest portion bordering on Germany and Poland. The Constitution of the republic was adopted by the National Assembly on Feb. 29, 1920, providing for a National Assembly with legislative authority over the whole country, Carpathian Russinia to have autonomy. The Assembly, elected by universal suffrage, and with proportional representation, is composed of a Chamber of Deputies, six-year tenure, 300 members; and a Senate, eight-year tenure, 150 members; both in joint session to elect the President of the republic for a seven-year term; the President to be the head of the army, authorized to declare war with the consent of the Assembly, and appoint Ministers and officials. Freedom of speech and religion are guaranteed.

The election of Nov. 15, 1925, returned representatives of thirteen parties, the Government coalition, numbering 80 in the Senate and 159 in the Chamber. The composition of the Chamber was: Social-Democrats, 29; Agrarian, 45; Catholics, 54; National Socialists, 28; others, 32; German Social Democrats, 17; other German, 54; Communists, 41; and Senate, Social-Democrats, 14; Agrarian, 23; Catholics, 28; National Socialists, 14; others, 15; German Social Democrats, 9; other Germans, 27; Communists, 20. Nine women were elected to the Chamber and three to the Senate.

The religious distribution of the population by the census of 1921 was: Roman Catholics, 10,384,833; Protestants, 990,319; without confession, 724,507; Czechoslovak Church, 525,333; Jews, 354,342; Greek Catholics, 535,450; Russian Orthodox, 73,097; others, 25,291.

In 1920 the Reformed Clergy of Czechoslovakia decided to withdraw from the jurisdiction of the Pope and found a national church, called "Czechoslovak church," with a membership of over 500,000.

A modus vivendi was arranged with the Vatican in Jan. 1928 by which diocesan boundaries were rearranged to conform to National boundaries; it was agreed that bishops must be Czech, citizens and appointed only with consent of the Government; church dignitaries must take the oath of allegiance to the Czech state and free exercise of religious beliefs was guaranteed to all creeds.

Education is compulsory between the ages of six and fourteen. Literacy is almost universal, excepting in Slovakia and Carpathian Russinia.

There are 31 October, 1927, 14,333 elementary schools with 1 451,636 pupils, and 1 781 advanced schools with 277,541 pupils. Secondary Latin and technical schools (gymnasia and real-schools) were, in 1926-27, 356 with 102,366 students. There are four polytechnics with university rank, colleges of mining engineering, veterinary science, agriculture and fine arts. The Czech University of Prague is celebrated. Founded in 1348, students number 8,225; the German University at Prague having 3,651 and two other universities 3,524.

Universal military service for men between 20 and 50 was enacted in 1920, service to be for 14 months. When mobilization is decreed, all from 17 to 60 are liable for service. Peacetime army strength is according to the new law 140,000 men in the period from Oct. 1 to March 31, and only 100,000 men from April 1 to Sept. 30. Reserves number 1,524,000. The budget of the Ministry of National Defense for 1922 was fixed at 3,119,000,000 crowns; for 1923, 2,775,000,000; for 1924, 2,299,973 630; for 1925, 1,815,435,710; for 1926, 1,935,402,500; for 1927, 1,370,000,000; for 1928, 1,400,000,000, and for 1929, 1,400,000,000.

With Yugo-Slavia and Roumania, Czechoslovakia formed the "Little Entente," designed for protection against Magyar aggression, as a defense against Bolshevism should the Soviet armies pass the Russian frontier, and to promote trade on the Danube. These treaties were renewed at a conference in May 21, 1929. In February, 1924, France and Czechoslovakia signed a treaty to "safeguard their common interests in case they are threatened."

The public debt taken over from the former Austro-Hungarian bank under the treaty of peace amounted to 10,099 million Czechoslovakian crowns. This is being amortized by capital levies, which have so far brought in 4,048 million crowns. The total debt on Jan. 1, 1928 was 36,853,662,438 crowns of which 4,200,000,000 was the currency debt.

Czechoslovakia on Feb. 15, 1928 called the balance due, $21,700,000, of its 7½% loan which was floated on the New York Market in October 1925 at 96. Funds to meet the payment made in April were derived from revenues and the flotation of an internal 15 year 5% loan of 450 million crowns.

The new Czechoslovak National Bank began business on April 1, 1926, with a note circulation of 7,147,000,000 crowns and a metallic cover of 1,137,000,000 crowns, or 27 per cent. The note circulation on Aug. 31, 1929 was 7,500,000,000 crowns, and reserves 2,216,000,000.

The crown (=20.3 cents at par of exchange) is the unit of currency. It has been stabled at 2.96 cents since 1922, its gold value being fixed at 44.58 grams of pure gold or 33.75 crowns to the American gold dollar.

An agreement to fund Czechoslovakia's debt to the United States at $115,000,000 to be paid in instalments of about $3,000,000 annually representing interest of 3 per cent. for ten years and 3½ per cent. thereafter, was reached in Washington on Oct. 9, 1925.

The chief exports are sugar, lumber, wool, glass, and metal goods; the chief imports are foodstuffs, iron, rubber and dyes.

Recent budgets in thousands of Czech crowns are:

Year.	Revenues.	Expend.
1922	18,884,210	19,671,970
1923	18,812,391	19,377,881
1924	16,391,294	16,993,977
1925	9,301,334	9,573,386
1926	10,085,752	10,070,271
1927	9,723,914	9,703,505
1928	9,562,270	9,536,074
1929	9,569,908	9,534,383

Imports and exports in thousands of Czech crowns:

Year.	Imports.	Exports.
1921	22,432,293	29,311,386
1922	12,695,516	18,086,349
1923	10,222,288	12,573,315
1924	15,854,703	17,035,375
1925	17,594,246	18,798,953
1926	15,263,000	17,858,000
1927	17,961,632	20,135,438
1928	19,193,590	21,227,610

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$1,147,977	$16,606,242
1923	1,080,090	16,672,617
1924	1,950,685	22,423,210
1925	2,854,353	22,837,821
1926	2,967,516	28,301,826
1927	7,441,708	31,726,449
1928	5,340,709	36,800,185

DANZIG, FREE CITY OF

AREA, 754 square miles.

POPULATION, census Aug. 24, 1924, 386,000; 93 per cent. German, 6 per cent. Poles.

Senate President, Dr. Heinrich Sahm, elected 1920.

High Commissioner, Count Manfred Gravinas, appointed by the League of Nations, Sept. 22, 1928.

Diplomatic and consular representatives of Polano have charge of the interests of the Free City of Danzig in the United States.

The Free City of Danzig, the history of which goes back nine centuries, covers a territory of 729 square miles on the Baltic Sea, with the Polish corridor to the west, Poland to the south, and East Prussia, of which it was formerly a part, to the east. The River Vistula, coming from the extensive Polish hinterland, runs through the district to the Baltic. The bay is sheltered by a peninsula, and the port is of great importance because of its connection through waterways and railroads with the neighboring states. To the west the land is hilly and well wooded; to the east, flat and very fertile. The municipal part of Danzig, with its incorporated suburbs, had on July 1, 1925, a population of 226,000. The shipyards are important. There are 16,312 farms, with 47,375 farmers and agricultural workers.

The Free City of Danzig was established under the Treaty of Versailles (Article 102) to create a port for Poland, on Nov. 15, 1920. It is a sovereign and independent city and state, and in peace and in war is under the protection of the League of Nations, which guarantees her constitution that was proclaimed in its final form on July 12, 1922. This provides for a Volkstag of 120 members elected by proportional representation for four years. The vote is direct and secret, suffrage being exercised by all men and women over twenty. The Senate consists of twenty-two members elected from the Volkstag; the President and seven of these are Chief Senators, form the Ministry, and are elected for a four-year term. The Vice President and remaining Senators are elected for the life of the Volkstag. The Senate takes part in the passage of laws, but is at the same time the supreme authority and government of the Free City. It directs the policy of the state; is responsible to the Volkstag, and if a member should lose its confidence by an expressed resolution of the House, he must resign his office. Each administrative department is under a Senator.

In the election Nov. 13, 1927 the Socialists returned 42 deputies (vote 61,588), Centrists 15, (vote 26,090), Liberals 9 (vote 14,531). These combine to control the government. In the opposition are: German Nationalists, 25 (vote 35,820); German Racialists, extreme reactionaries, 2 (vote 4,671); Communists, 8 (vote 11,695), and minor parties, 19.

The Polish Republic has no sovereign rights in the Free City. The relations between the two states are determined by three treaties. Under the Treaty of Versailles Poland is charged with the conduct of the foreign affairs of the Free City; the two states have also formed, by treaty, a common customs and economic union under the Polish law; but the administration of the customs within the territory of the Free State is performed by Danzig authority. The management of the railways, save in purely local requirements, has also been undertaken by Poland, and is conducted by a special administration in which a Danzig delegate represents the city's requirements. The administration of the harbor and waterways is given over to a special board of Harbor Administration, consisting of an equal number of Danzig and Polish members, whose President is a Swiss subject.

The Polish Government has a diplomatic representative in Danzig to mediate between his country and the Free City. The League of Nations maintains a High Commissioner in Danzig, who, on appeal, decides all disputes which may arise between Danzig and the Polish Republic owing to their neighborly relationships or economic connections. Both parties have the right of appeal against his decisions to the Council of the League of Nations in Geneva.

Education is free and compulsory from 6 to 14 years. The Free City had 322 schools in 1927 with 51,177 pupils and 1,469 teachers.

Danzig suffered severely because of the collapse of the German mark and the disorganization in that country in 1923. In September, 1923, in agreement with Poland, the Free City adopted a new currency with a unit known as the gulden, to equal in value one-twenty-fifth of the English pound. A new bank of issue was established. On June 30, 1928 the bank had a reserve of 18,178,000 gulden in gold, 26,660,000 in foreign bills, etc., and a note circulation of 37,352,000. The year passed without incurring a deficit and the budget for 1924 was balanced at 86,054,570 gulden ($15,489,822 converted at one gulden = 18 cents); budget for 1925 balanced at 114,900,000 gulden, for 1926 at 117,857,180 gulden, for 1927, at 113,209,220 gulden, and for 1928 at 117,028,590 gulden.

A loan for $4,500,000 was floated in 1927 for port improvement. Traffic has grown from 2,453,000 metric tons of cargo in 1912 to 7,897,613 in 1927. The number of ships entered in 1927, was 6,950 vessels of 3,899,854 net tonnage.

The chief exports are now lumber, grain and sugar. Of grain 187,000 tons were shipped in 1925, 272,000 in 1926 and 56,000 in 1927. Sugar exports amounted to 185,000 metric tons in 1926; and 139,000 in 1927. Lumber exports in 1925 amounted to 901,916 tons; in 1926 to 1,391,000 tons, and in 1927, 1,749,000 tons.

DENMARK, KINGDOM OF

AREA, 16,570 square miles; including the Faroe Islands (540), 17,110 square miles.

POPULATION, census of Nov. 5, 1925, 3,434,555. Denmark gained 164,500 of population by the people of Schleswig voting in 1920 in the plebiscite to return from German rule to adherence to Denmark. Faroe Islands, population, 1925, 22,835.

CAPITAL, Copenhagen, 1925, pop. without suburbs, 587,150; with suburbs, 731,496.

King, Christian X., born Sept. 26, 1870; succeeded his father, Frederick VIII., May 14, 1912; married, April 26, 1898, Princess Alexandrine of Mecklenburg; *Heir*, Crown Prince Christian Frederick, born, March 11, 1899. The King of Denmark is also King of Iceland (which see).

Premier, Theodore Stanning, born 1873, (Socialist) April, 1929.

Denmark occupies the peninsula of Jutland, thrusting out to the north from Germany, which is its only land neighbor, between the North Sea and the Baltic Sea, with the adjacent islands. The Skagerrak separates it from Norway, and Cattegat from Sweden. It is a little smaller than the States of Massachusetts and New Hampshire together. The country consists of low, undulating plains.

The Faroe Islands in the North Atlantic, about 300 miles northwest of the Shetlands, belong to Denmark.

Denmark has attained great agricultural productivity. About 76% of its total area is under cultivation; from it, 35% of its population obtains a living and 92% of the farmers own the land they cultivate. Bumper crops brought prosperity in 1928. There were 6,871,540 acres under cultivation, 3,228,290 in grain, 1,267,110 in potatoes and roots, 79,040 in oil-seeds, 2,116,790 in green fodder and grazing and 180,310 fallow. The grain harvest yielded 3,500,000 metric tons (2,750,000 tons in 1927) an increase of 28%; potatoes double the 1927 crop. The export of bacon was 272,209 metric tons; of butter, 147,742 tons; of condensed milk, 23,858 tons; of cheese, 6,086 tons; and of fresh eggs, 31,195,000 score, all at greatly increased prices. The production of beet sugar was 165,000 tons.

The census of domestic animals in 1928 was 518,000 horses, 3,021,000 cattle and 3,360,000 pigs.

Since the first small-holdings act was passed in 1899, 13,800 small farms have been established (1929) aggregating 81,540 acres and loans and grants by the government amount to about 140,000,000 kronen ($37,380,000).

Normally there are about 82,000 industrial and shop plants, about 15,000 using power, employing 350,000 of whom 240,000 are skilled. The Danish fishing fleet of 15,350 boats took fish to the value of $11,500,000 in the same year.

There are 3,148 miles of railroads, of which 1,505 are state-owned. All showed a profit in 1923-24. In 1926 Denmark had 1,580 steam and motor vessels of 1,076,980 gross tons and 516 sailing vessels of 68,208 tons. There entered Danish ports in 1926 in foreign trade, 33,073 vessels of 10,431,000 tons.

The chief exports are dairy products, eggs, provisions and fodder, animals and animal products, fuels, metal and wood manufactures and textiles.

Danish activity of all kinds has been largely dependent on the purchasing power of the German people, whose normal purchases of 60 per cent. of their foodstuffs afforded Denmark a valuable market. Industry is normally stable in Denmark, attributed by many in part to the Permanent Court of Arbitration and the Public Mediation Institution. The first is representative of employers and employees and interprets agreements and legal points involved therein. The second anticipates industrial troubles, and when stoppage of work such as will affect the whole community is threatened takes steps to intervene and seeks to prevent it. The Court of Arbitration is national and no appeal lies against its findings to any superior court, being in themselves final and valid in law.

Unemployment, which had reached 48,000 June 1, 1926, rose to 92,000 in January and February, 1927,

but dropped to 54,000 July 1, 1927 and to 39,000 July 1, 1928. It rose to 61,000 Dec. 31, 1928, and to 76,000 March 31, 1929, but fell to 27,000 Aug. 31.

Denmark is a constitutional monarchy the succession being hereditary. The King and the Rigsdag (Diet) jointly hold legislative power. Executive authority vests in the King through his ten Ministers. The Rigsdag is of two bodies—the Folketing (House of Commons), with 149 members, and the Landsting (Senate), with 75 members. Men and women of 25 years of age and a fixed abode have the franchise.

The Evangelical Lutheran is the established religion. By the census of 1921 there were 3,221,843 Protestants, 22,137 Catholics and 5,947 Jews. The population is almost entirely Scandinavian.

Education is compulsory between seven and fourteen years of age. Intelligence is widely diffused. By the census of 1926 there were 4,493 lower schools, instruction mostly gratuitous, with 493,237 pupils, and 70,000 students in the higher institutions. The University of Copenhagen, founded 1479, has 4,400 men and women students.

Old age pensions are granted under the law of 1891, amended 1922, in effect April 1, 1923, to any person over 65 fulfilling certain conditions. It must be sufficient for maintenance and for medical attendance. It is paid by the commune of domicile and seven-twelfths is refunded by the State, in the fiscal year ending March 31, 1927, 106,000 persons were relieved. The total expenditure was 67,000,000 kroner.

The army is in the form of a national militia, every able-bodied male Dane being liable for service, excepting only those living in the Faroe Islands. Even clergymen must serve. In 1927, 8,625 recruits were called up for training. The permanent establishment is about 11,000, with 55,000 available on mobilization. The navy, for coast defense only, is mostly monitors.

The Socialist Cabinet in October, 1924, placed before the Rigsdag bills to abolish conscription, the army and navy and War Office and Admiralty. A corps of 7,000 trained frontier guards or constabulary enlisted for twelve years and a force of six armed vessels, three motor boats and twelve seaplanes, for policing Danish waters, was to be set up. The annual cost was estimated at 11,000,000 kroner, as against 60,000,000 now spent. The Lower House passed the Disarmament bill by a close vote on March 12, 1926. The Senate defeated it by a vote of 39 to 24 in June 1927.

Thomas Madsen-Mygdal's conservative government in power from Dec. 14, 1926, resigned after being defeated at the election on April 24 which returned a Folketing composed of 43 Agrarians, 25 Conservatives, 61 Social Democrats (Laborites), 16 Radicals, and 4 Independents. Theodore Stauning (Socialist), premier 1924-26, formed a Socialist-Radical Cabinet and again introduced the disarmament bill abolishing the army and navy and setting up a small land and coast patrol on a civilian basis. He served notice on the Landsthing, where the government is in a minority with but 36 supporters, not to block the radical reform measures lest a campaign be made to abolish it. The government plans to use the 40,000,000 kronen it expects to save on the military budget to finance increased social welfare legislation.

Denmark floated a loan of $55,000,000 4½% 34-year bonds at 95 on the New York market April 5, 1928. The total debt with this financing amounted to $358,628,200. A large part was contracted for the construction of revenue producing properties, railroads, telegraphs, telephones, harbors, etc. The government owns 48% of the railroad mileage. State assets were valued on March 31, 1927, at $415,400,000. The wealth of Denmark was officially estimated in 1927 at about $5,360,000,000.

The City of Copenhagen floated a loan of $12,000,000 4½% 25-year bonds at 94½ on the New York Market Apr. 25, 1928.

The kroner (=26.8 cents at par of exchange), averaged 21.13 cents in 1925 but has been stable at about par since 1926.

Gold redemption was restored Jan 1, 1927, the £3,000,000 stabilization credit was renewed but not the $40,000,000 American credit. A 50% gold cover was reestablished for the note issue which in December 1926 was 386,000,000 kroner, and on June 30, 1927, 368,000,000, with a gold reserve of 193,000,000 kroners. On July 23, 1929, circulation was 318,000,000 crowns with a gold cover of 57%.

Recent ordinary budgets in kroner are:

Year.	Rev.	Exp.
1923-24	389,709,000	402,285,000
1924-25	411,223,000	358,000,000
1925-26	455,500,000	455,000,000
1926-27	367,234,000	358,494,000
1927-28	341,600,000	340,200,000
1928-29	332,042,000	316,430,000

Imports and exports in kroner and in dollars are:

Year.	Imports.	Exports.
1923	2,030,975,000	1,693,974,000
	($371,668,000)	($309,997,000)
1924	2,360,675,000	2,151,701,000
	($394,233,000)	($359,334,000)
1925	2,082,000,000	1,959,278,000
1926	1,621,000,000	1,514,580,000
	($425,188,300)	($397,275,000)
1927	1,659,000,000	1,549,000,000
	($444,612,000)	($415,132,000)
1928	1,735,000,000	1,653,000,000
	($465,980,000)	($442,004,000)

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$35,639,373	$4,163,781
1923	38,768,318	6,629,770
1924	42,413,028	6,118,264
1925	55,746,756	4,327,503
1926	50,577,039	5,508,506
1927	58,605,052	4,144,642
1928	47,172,634	3,940,848

GREENLAND—COLONY.

AREA, 827,300 square miles; area of the Colony along the coast, 46,740 square miles. Interior a lofty plateau of 9,000 to 10,000 feet altitude, covered with glaciers.

POPULATION, census of 1923, 14,804, of which 248 were Europeans, the rest Eskimos.

CAPITAL, Godthaab, pop. 376, largest settlement; Sydproven; pop., 901.

Greenland, a huge island between the North Atlantic and the Polar Sea, separated from the North American continent by Davis Strait, Baffin Bay, etc. It extends from 60°-86° N. lat.

Greenland trade is a state monopoly for Denmark. Imports from Denmark in 1926 were valued at 1,865,000 kroner and exports at 8,301,000; chiefly fish, furs, whale oil and graphite. The deposits of cryollite are the largest in the world.

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$1,985	$194,000
1923	17,129	174,800
1924	....	311,300
1925	18,561	691,116
1926	7,561	518,885
1927	11,206	347,200
1928	8,386	448,898

DOMINICAN REPUBLIC

(SANTO DOMINGO.)

AREA, 19,325 square miles.

POPULATION, census of 1921, 897,405; estimated 1927, 1,022,485.

CAPITAL, Santo Domingo (founded 1496), pop census 1920, 45,007; Santiago de los Caballeros 17,152; Puerto Plata, 7,709.

President, Sr. Don Horacio Vasquez, 1924-30, inaugurated July 12, 1924.

The Dominican Republic occupies the eastern portion, about two-thirds, of the Island of Santo Domingo, the second largest of the Greater Antilles, situated between Cuba on the west and Porto Rico on the east. The boundary between it and the Republic of Haiti, which occupies the western part of the island, is 193 miles long. It has a coastline of 1,017 miles. The land is very fertile. about 15,500 square miles being cultivable; agriculture and stock raising are the principal industries. Sugar, cacao, and tobacco are the chief products.

The amount of sugar produced in 1926-27 was 347,649 short tons; in 1927-28, 412,380 tons; and in 1928-29, 383,000 tons; exported in 1927, 295,896 metric tons; and in 1928, 335,020 metric tons.

The country has gold, copper, iron, salt, coal and petroleum, but the mining industry is undeveloped.

Tobacco exports in 1927 were 44,750,000 pounds, valued at $2,582,000; and in 1928, 25,000,000 pounds The coffee exports in 1927 were 9,025,000 pounds; and in 1928, 9,993,456 pounds. The cacao exports in 1927 were 26,513 tons valued at $7,476,794; and in 1928, 19,301 tons valued at $4,250,415.

There are 153 miles of railroads, besides 255 of private lines on large estates. In 1928, 2,037 vessels of 2,739,784 tonnage, entered the ports.

The population is a race of mixed European, African and Indian blood. Spanish is spoken. The religion of the state is Roman Catholic, but religious toleration prevails. Education is free and compulsory, and great advance in methods of instruction has been made by the Military Government.

Continual internal disturbances from the "war of the restoration" (1863-65) to 1904, left the Do-

minican Republic under a crushing debt of $32,000,000. Her annual revenues were about $1,850,000 and her annual expenditures $3,900,000. Rumors were rife that European nations would intervene to collect debts due their citizens. To forestall armed and indefinite intervention Secretary of State John Hay, in February, 1905, negotiated a protocol with the republic, which provided that the United States should adjust her debts and administer her custom house receipts. Because a clause in the convention was interpreted as establishing a protectorate, the United States Senate refused to ratify the treaty. President Roosevelt, however, made an executive arrangement with the President of the bankrupt republic essentially on these lines, and on April 1, 1905, put that modus vivendi into force, and placed an agent of the United States in charge of her fiscal administration. Marked improvement followed; her debt was adjusted and credit restored.

A treaty was signed on Feb. 8, 1907, which provided that the United States Government should administer the customs of the Dominican Republic for the service of her debt, practically a receivership. Eight years of honest administration reduced the total debt to $21,500,000.

It was inevitable that the administration of the finances of the Dominican Republic by the United States could not proceed without friction and interference with the government of that country. Political troubles and serious disturbances followed, to suppress which the Dominican officials incurred fresh debts without the approval of the United States, which demanded a supplementary convention be arranged. The Dominicans refused to consent. A coup d'etat by Arias, deposing President Jimenez in April, 1916, was followed by disorders. The United States landed a detachment of marines and suppressed the insurrectionists; and on Nov. 29, 1916, Capt. Knapp, U. S. N., issued a proclamation announcing that the Dominican Republic was under the military administration of the United States, and declaring that his Government did not intend to destroy the sovereignty of the republic, but wished to enable her to restore internal order so that she might observe international obligations.

A Dominican commission, headed by Provisional President Henriques Carvaljal, in 1919 visited Paris and later Washington, seeking the restoration of individual liberty in the republic. Acting under orders from Washington, the Governor, Admiral Snowden, issued a proclamation outlining the plan of the United States Government for the conditional withdrawal of its military forces, the transfer of administrative responsibility to a native government duly elected, and the continuance of the fiscal arrangements of 1907 enlarged so as to include arrangements for a new loan.

Rear Admiral Samuel S. Robison, U. S. N., Military Governor of the Dominican Republic installed on Oct. 21, 1922, a provisional Government, headed by Provisional President J. B. Vicini Burgos, for the purpose of promulgating legislation, to regulate the holding of elections and to provide for the reorganizing of the provisional and municipal governments.

A Congress was elected which had a strong Nationalist majority; a convention recognizing the acts of the Military Government was ratified; and on March 19, 1924, Gen. Horacio Vasquez was elected President for four years. On July 12 he was inaugurated; and simultaneously the evacuation of the military forces of the United States followed.

A new convention superseding that of 1907 was signed at Washington, Dec. 27, 1924, and was promptly ratified by both countries. It provides for a loan up to $25,000,000 to refund and consolidate existing loans and provides $10,000,000 for public improvements. The customs receivership was extended until the amortization of the new loan.

A revised constitution was proclaimed June 16, 1927, which extends the term of office of President and Congress by two years,—from 1928 to 1930.

An advisory mission of American financial experts headed by former Vice President Charles G. Dawes, as private citizens and at the direct invitation of President Vasquez, after an intensive examination of the finances of the country (April 2-23, 1929) reported a budget law, a system of accounting, regulation of projected public improvements, and a modified law of finance. They suggested a reduction of the $4,127,000 deficit to $769,000 and estimated the internal debt at $2,650,000.

The military administration has built 500 miles of macadamized national highways, modernized the port of Santo Domingo, improved other ports, built schools, increased the enroiment of school children from 18,000 to more than 100,000. On highways alone from 1908 to Jan. 1927, $11,785,200 has been spent.

The customs receivership (William E. Pulliam, General Receiver) from its commencement April, 1905 to December 31, 1928, collected in all $96,294,734. The customs revenue for 1926 were $4,714,405; for 1927, $5 796,881; and for 1928, $5,191,481.

Final payment was made in 1926 on the service and liquidation of the $20,000,000 loan of 1908. In December, 1926, $5,000,000 5½% 14-year bonds were sold in the United States at 98.07 as part of the amount to be spent on public improvements. On Jan. 26, 1928, the second series, $5,000,000 5½% 14-year bonds were sold in New York for 99¼. With this the public debt amounted to $20,000,000.

The Dominican monetary standard is the United States gold dollar. Except for about $200,000 in Dominican coins (there is no Dominican gold or paper money) all currency in circulation is United States currency.

Recent budgets are:

Year.	Revenue.	Expenditure.
1922	$12,164,142	$11,353,686
1923	6,171,292	7,241,988
1924	5,804,941	5,617,485
1925	10,702,091	10,689,313

1928	16,826,981	9,374,145

ECUADOR, REPUBLIC OF

AREA, estimated, 118,627 square miles; boundaries are in dispute and the extreme claim is 275,000 square miles.

POPULATION, between 1,500,000 and 2,000,000, of which about 600,000 are of pure European blood.

CAPITAL, Quito, pop., 80,700; chief port, Guayaquil; population, estimated, 105,000.

President, Dr. Isidro Ayora, born Aug. 31 1879, assumed control July, 1926. Elected President (1929-1934) by Congress March 27, 1929; inaugurated April 17, 1929.

Premier, Dr. Teofilo Fuentes Robles (Government and Social Welfare) May 7, 1929.

Ecuador, on the Pacific Coast of South America, extends from about 100 miles north of the Equator to 400 miles south of it. It is bounded by Colombia on the north and Peru on the south. The boundary in the east is in dispute, much territory being claimed by each of these three countries. Two cordillera of the Andes cross the country, with a dozen peaks above 16,000 feet in height, of which Chimborazo (alt. 21,424 feet), Cotopaxi (19,550 feet), Cayambe (19,534 feet), and Antisana (19,260 feet) are the highest.

Mining has been but little developed, though the country is known to be rich in minerals. Most of the land is covered with virgin forest. Rubber abounds in the upper reaches of the Amazon in the disputed eastern territory. Panama hats are manufactured: cacao, ivory, nuts, coffee, hats, hides and rubber are the chief exports. Textiles, foodstuffs, machinery and clothing are the chief imports.

Ecuador produces about one-fifth of the world's supply of cacao. Exports in 1928 were 22,390,810 kilos of cacao valued at 29,055,339 sucres (23,314,322 kilos valued at 36,623,024 sucres in 1927); 8,784,143 kilos of coffee valued at 16,691,440 sucres (5,237,013 kilos valued at 8,671,199 sucres in 1927); and 176,763 kilos of panama hats valued at 4,370,526 sucres (222,186 kilos valued at 5,786,075 sucres in 1927).

Petroleum production in 1928, 1,090,000 barrels; in 1927, 450,000 barrels; 1926, 214,000 barrels; and in 1925, 160,000 barrels.

Guayaquil, the seaport, was long a hotbed of yellow fever. After a survey made by the Rockefeller Foundation in 1916, a scientific fight was made under the direction of Gen. Gorgas, and May 27, 1920, the Director General of Public Health announced that the disease had been stamped out. Guayaquil is connected with Quito by a railroad

(290 miles), a two-day journey. In all, Ecuador has 530 miles of railroads, control of which was bought by the Government on May 28, 1925.

In 1925-26 there entered the port of Guayaquil 488 steam vessels of 1,178,010 tons.

Ecuador's independence dates from the Battle of Pichincha, May 29, 1822, and its history has been stormy even for a Latin-American republic. It is estimated that three-fourths of its population are Indians, one-fifth mixed and only a small fraction white. Education is very backward. In 1927-28 there were 1,771 schools with 2,399 teachers and 111,699 pupils. Congress in 1929 made education secular and free. Only adults who can read and write can vote.

The constitution now in force was promulgated Dec. 28, 1906, and provides for a President, elected by popular vote for four years, a Senate of 32 members, elected for four years, and a House of 48 members, elected for two years.

Sr. Dr. Don Gonzalo Cordova, elected President and inaugurated Sept. 1, 1924, was ousted July 9, 1925, by a bloodless military coup d'etat headed by Gen. Francisco Gomez de la Torre, who with two others formed a Government with Modesto Larrea Jijon as Premier. Dr. Isidore Ayora was made President of the Council of Government, assisted by a council under the supervision of the military triumvirate on April 7, 1926, to hold office until the election of a President.

Ecuador returned to a constitutional form of Government on Sept. 10, 1928, when a National Assembly of 54 members, elected by the people in August, began its session. The Assembly by unanimous vote continued President Ayora in office, and on March 27, 1929 elected him Constitutional President (without right of reelection) for five years. He assumed office April 12. The new constitution was proclaimed March 29, and on May 7 the Assembly established a cabinet of six ministers appointed by the President.

Ecuador issued a decree Sept. 24, 1927, forbidding the entry into the country of all foreign clergymen, irrespective of religious faith.

An eight-hour labor law and a model child labor law were put in effect Jan. 1, 1929.

Ecuador has not joined the League of Nations.

By invitation of the Government, Prof. Edwin W. Kemmerer of Princeton University, with a staff of American experts went, in October, 1926, to Ecuador, and after four months study presented plans for reorganizing the finances of the country. As a result the Central Bank was opened June 1, 1927, with a capital of 10,000,000 sucres, to which is given the exclusive privilege of issuing banknotes for 50 years. The bank on April 30, 1928, had a note circulation of 37,444,378 sucres with a gold cover of 28,986,459 sucres, legal reserve being 52.83%.

A budget law, new taxation and revised customs duties were among the 25 reforms recommended and adopted. Four American advisers remain for three years. About $30,000,000 of American capital is invested in the country.

The sucre (=48.6 cents) had fallen to 20.08 cents; in February, 1927, it was stabilized at 20 cents gold (=0.300933 grain fine gold).

The budget for 1925 balanced at 35,833,080 sucres, that for 1926 at 41,988,000 sucres, that for 1928 at 55,393,069 sucres, and that for 1929 at 59,900,000 sucres.

The internal debt on June 30, 1928 was 17,018,666 sucres. The external debt was $19,404,000.

Trade in dollars ($1 = 5 sucres) was:

Year.	Imports.	Exports.
1923	$9,201,185	$9,596,590
1924	13,000,735	15,316,975
1925	13,500,000	17,500,000
1926	9,414,600	12,714,200
1927		13,414,678
1928		15,493,360

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$4,428,814	$7,492,460
1923	4,335,606	6,146,277
1924	5,537,621	6,699,667
1925	6,807,624	8,700,627
1926	4,662,159	6,757,104
1927	5,531,467	5,193,466
1928	6,594,723	5,345,429

EGYPT, KINGDOM OF

MISR.

AREA, estimated, about 347,840 square miles, exclusive of the Soudan (which see). Cultivable land are, 12,226 square miles: Sinai desert, 11,614; Libyan and Arabian deserts, 324,000.

POPULATION, Census of February, 1927, 14,186,898.

CAPITAL, Cairo, pop. census of 1927, 1,064,567; other cities, Alexandria, pop. 573,063; Port Said and Ismailia, 133,677; Tanta, 90,014; Mansura, 63,676; Asyut, 57,132; Suez, 40,309; and Damietta, 34,907.

King, Fuad I., born March 26, 1868, son of the late Khedive Ismail Pasha, succeeded his brother Hussein Kamil on his death as Sultan Oct. 9, 1917, proclaimed King March 16, 1922, on termination of British protectorate and recognition of the independence of Egypt. He married Princess Nazli, May 24, 1919. *Heir*, his son Prince Farik, born Feb. 11, 1920.

Premier, Adly Yeghen Pasha (Interior) Oct. 4, 1929.
Minister of Foreign Affairs, Ndhat Pasha.
British High Commissioner for Egypt and the Soudan, Sir Percy Loraine, Bt., appointed Aug. 7, 1929.

Egypt occupies the northeast corner of Africa with the Mediterranean Sea on the north and the Red Sea on the east. Beyond that, between the Gulf of Suez and the Canal and the Gulf of Akabah, lies the Sinai peninsula, 150 miles long, flat and sandy, on the north, like the Egyptian coast line but with granitic mountains rising to an altitude of 8,680 feet in the southern third. Along the west coast of the Red Sea is the Eastern or Arabian desert, with a great backbone of rugged mountains (highest altitude 7,150 feet) reaching to Abyssinia. On the south is the Soudan, the parallel of the 22° north latitude forming the boundary. To the west is the vast Libyan desert, which begins a few miles west of Cairo, where stand the Pyramids of Giza, of which the great pyramid is 451 feet high, and the Sphinx. This desert stretches to Tripoli, a vast monotonous limestone plateau with a few depressions where wells and springs furnish water to irrigate small areas. These oases support a population of several thousands. Egypt is about the size of Arizona, New Mexico and Colorado, but its fertile territory is about the size of Massachusetts and Connecticut.

The Valley of the Nile and the delta are the real Egypt of sixty centuries. Here are 12,226 square miles of cultivated area; 1,900 square miles are taken up by canals, roads, date plantations, etc., and 2,850 by the surface of the Nile, its marshes and lakes. The great river runs between sandstone cliffs from Haifa to Esna, with a stretch of granite near Aswan, where the valley narrows to half a mile, and limestone from there through Luxor to Cairo, the valley widening to over 10 miles. The fertile lands occupy the floor of the valley between the river and the cliffs, and north of Cairo they spread out in a silt-created delta, forming the richest soil of the country. The Nile has a total length of 3,470 miles from the Victoria Nyanza to the Mediterranean. In the 960 miles of its course through Egypt it receives no tributary stream. The river has a regular yearly rise and fall, attaining its maximum the end of May. The average rise at Cairo is 13 feet.

The great dam at Aswan (Assouan) 590 miles above Cairo, completed Dec. 10, 1902, is a mile and a quarter long. The width at the bottom was about 82 feet and height about 130 feet. It cost about $12,000,000 and added 1,408,000 acres to the arable soil of Egypt. The dam was raised 16½ feet and its thickness increased in 1907-12 at a cost of $7,500,000, and the storage capacity is 2,423 million cubic metres. The dam regulates the flow of the Nile, a task shared by smaller barrages at Erna, Assiut, Zifta and at the head of the delta. Irrigation canals distribute the silt-laden water to the fields.

Following up the recommendations of an International Technical Commission after reaching an agreement with Great Britain regarding the distribution of Nile waters, the Egyptian Government in May, 1929, set aside about $32,000,000 to begin in 1930 additional irrigation works calculated to cost ultimately over $100,000,000. It is proposed to spend $12,000,000 in heightening again the Aswan Dam by 30 feet to increase its storage capacity to 5,400 million cubic metres and permit 700,000 additional acres of land in the Nile valley to be cultivated,—an increase of value estimated at $180,000,000. Four barrages are to be strengthened, 300,000 acres to be converted from basin to perennial irrigation and $39,000,000 expended on delta canals and drains. The Sennar dam on the Blue Nile was completed in 1925 (see the Anglo-Egyptian Soudan).

Sixty miles south of Cairo to the west of the river is the fertile province of Fayum, with an area of 500 square miles, watered by the canal Bahr Yusef (attributed by tradition to Joseph, the son of Jacob), over 100 miles long, which takes its water from the river at Delrut.

The Nile irrigates 5,400,000 acres and this number may be increased to 7,600,000 by engineering improvements. King Mena (circa 4000 B. C.) is

credited with being the founder of the first scientific system of using the water of the Nile for irrigation purposes, and that plan, the basin system, is still used for all the land south of Deirut in Upper Egypt.

By this system the land is divided into rectangular areas from 5,000 to 50,000 acres in size and surrounded by banks; water is admitted to these basins during the flood period (August) to an average depth of 3 feet and is left on the land for about forty days; it is then run off and the seed sown broadcast on the uncovered land. A system of perennial irrigation by digging deep canals was introduced in 1820 by Mohammed Ali Pasha; this was restored and greatly improved during the British occupation. Two million acres of cultivable land were added, and under the basin system, cereals, beans and lentils are grown; under the new perennial system cotton, cereals, beans, sugar cane, vegetables and fruit are the chief crops. Two and three crops a year are grown. The yield of cotton in 1920-28, acreage and value of exports were:

Year.	Acres.	Pounds.	Value of Exports.
1920-21	1,760,951	603,505,400	£E28,375,249
1921-22	1,244,598	435,295,800	39,714,845
1922-23	1,734,161	671,300,000	49,516,369
1923-24	1,780,461	646,921,000	56,554,499
1924-25	1,856,024	720,482,033	51,659,806
1925-26	1,853,900	788,898,087	34,370,891
1926-27	1,573,815	593,956,000	38,999,000
1927-28	1,573,815	712,698,000	45,137,823

The drop in the value of exports in 1926 was due to the low price of cotton of which 41,000,000 pounds more were exported in 1926 than in 1925 but the value was £E51,659,806 in 1925, and only £E34,370,891 in 1926. The government bought cotton in 1926 to stabilize the market amounting to £E3,193,228; and also loaned £E1,938,406 to small cultivators up to March 31, 1927. On Jan. 10, 1927, Parliament restricted the area under cotton for 1927, 1928, and 1929 to one-third of each man's holding. This reduced the acreage planted by 350,000 acres.

The agricultural population (Fellaheen) forms about 62 per cent. of the whole, a large proportion of them (1,884,534 in 1925) being small land owners holding up to 5 acres each; 6,774 were foreigners.

Petroleum has been found in both the Arabian desert, west of the Red Sea, and on the Mt. Sinai peninsula. To what extent, however, no announcement has been made. Drilling is going on. Production in 1927 was 1,270,000 barrels; in 1926, 1,188,000; and in 1925, 1,220,000. 150,194 metric tons of manganese iron ore was produced in 1924, 80,589 tons in 1925, 121,868 in 1926, and 152,845 tons in 1927. Output of phosphate rock was 87,869 metric tons in 1924, 106,808 in 1925, 232,008 in 1926, and 279,389 in 1927.

The chief imports are textiles and yarns, machinery and hardware, tobacco (none is allowed to be raised in Egypt), chemicals and perfumes, coal, oil, cereals and animal food products and leather.

Egypt on March 31, 1926, had 2,272 miles of railroads (exclusive of sidings) owned and operated by the state, and 723 miles of light agricultural railroads owned by private companies, mostly in the delta. Cairo was connected by railroad with the Palestine system by the opening of the swing bridge over the Suez Canal. The line from Luxor to Assouan (124 miles) was opened on standard gauge Dec. 3, 1926, permitting through trains from Cairo to Shellal.

Commercial steamers entering Egyptian ports in 1927 numbered 8,393, with a tonnage of 29,669,639. Commercial steamers passing through the Suez Canal (103 miles long) in 1928 numbered 6,084 or 31,906,000 net tonnage, a new record, paying 221,000,000 gold francs in tolls. Daily transits averaged 16.27.

Four-fifths of the people are of the ancient Egyptian stock, whose forbears by their labor built the pyramids for alien Kings, and whose physical characteristics were pictured in the mural paintings of the temples and tombs and on the papyrus scrolls six thousand years ago. The Copts embraced Christianity in the first century of the Christian era, and hold the orthodox Patriarch of Alexandria as the successor of St. Mark. They numbered 854,778 in 1917. There are 155,168 Christians of other sects, and 59,581 Jews. The far larger part of that ancient stock embraced Mohammedanism on the conquest in the seventh century, and speak Arabic to-day. With the 32,663 Bedouins and 107,360 Soudanese and Berberins (of whom one-seventh are nomads), and including also some Nubians, the Mohammedans numbered in 1917 11,658,148. They have a famous seat of Moslem learning in the University at El-Azhar, in Cairo, founded in 972. In 1914 it had 405 professors and 9,719 students, and affiliated with it were the Mosque of El-Ahmed; at Tanta with 2,860 students, the Mosque of Damietta with 411, and the Meshia Khat Olama at Alexandria with 1,854. The Cabinet on Sept. 30, 1929 voted to modernize the curriculum of the University and substitute the teaching of modern languages and modern sciences. Under a new rector, the Sheik Mustapha al Moraghi, who has studied at Columbia University.

The percentage of illiteracy, 92 in 1917, has been greatly lessened: in 1928 children in school numbered 670,000, of whom 500,000 were in elementary schools, and the education budget has been increased from less than £500,000 in 1917 to more than £2,500,000 in 1927. The local Maktab Schools care for about 200,000.

By the census of 1917 the foreign residents numbered 209,998, of whom 30,796 were Turks, 56,735 Greeks, 40,198 Italians, 24,356 British, and 21,270 French and Tunisians.

During the forty-two years of British rule the population has doubled (census of 1882, 6,831,131). The irrigation system has been enormously improved and another great dam (the Sennar, opened in January, 1926) has been built far up in the Blue Nile to impound water. In the last eight years land has trebled in value. Motor trucks crowd camels from historic caravan trails.

The present King of Egypt is the ninth of the line founded by Mohammed Ali, who was appointed Governor (Vali) of Egypt by the Sultan of Turkey in 1805, made himself absolute master of the country, and became hereditary Governor by force of arms in 1811. Under the rule of Khedive Ismail revenues were wasted and debts were heaped up until bankruptcy resulted. Great Britain and France in 1879 assumed dual control, forced Ismail (1863-1879) to abdicate and appointed his son Tewfik (1879-92) to succeed him. Reforms were instituted. In 1882 Arabi Pasha headed a military revolt, which was quelled by a British expedition, the French Government declining to intervene. The dual control was abolished by decree Jan. 18, 1883, and Great Britain carried on alone, the expeditionary force remaining as an army of occupation, Egypt being technically a semi-independent tributary state of the Ottoman Empire.

This period of British occupation lasted until the World War broke out. The Khedive, Abbas II, was absent and declared himself for Turkey. He was deposed and his brother, Hussein Kamil Pasha, made Khedive. With a Turkish army headed for Gaza on Nov. 18, 1914, Great Britain declared a protectorate over Egypt which was thereupon taken from the Suzerainty of Turkey, and Hussein assumed the title of Sultan. He died in 1917 and his brother Fuad succeeded him. In the unrest following the war disturbances were many and serious, the Nationalists demanding complete independence. Great Britain promised an increased measure of self government and sent Lord Milner there in 1919 to investigate. Premier Lloyd George in the House of Commons on Feb. 28, 1922, announced that arrangements had been made whereby the British Protectorate was abolished. The British Government reserved to its discretion four subjects: Safety of the British Empire communications: defense of Egypt against foreign aggression, direct or indirect; protection of foreign interests in Egypt and of minorities; and guarantee for British interests in the Soudan. The House sustained this policy by a vote of 203 to 70. On March 27, Marquis Curzon, the British Foreign Secretary, sent dispatches to all British Ambassadors saying that the termination of the Protectorate involved no change in Egypt's status toward other powers and the British Government would regard as unfriendly any attempted interference in the affairs of Egypt by another power and would repel any aggression upon Egyptian territory.

Sarwat Pasha formed a cabinet on Mar. 1 and Fuad was proclaimed King on March 16. The United States recognized the new government on April 27 but declined to accept the abolition of the capitulations. A new constitution declaring Egypt a sovereign state free and independent, was signed by King Fuad on April 19, 1923. A new electoral law in August, 1925, raised the voting age to 25 and provided for restricting the franchise to men who paid £E2 tax of property annually, or an annual rent of £E24, or members of a learned profession.

The assassination in the streets of Cairo of Sir Lee Stack, Governor General of the Soudan, and Sirdar of the Egyptian Army on Nov. 19, 1924, produced a grave crisis. Parliamentary troubles followed, marked by the growing power of the Wafd party (extreme nationalists), whose leader was Zaghoul Pasha until his death in 1927.

The British Government protested against two bills presented to the Parliament in 1928 which they held would weaken seriously the administrative authorities responsible for the maintenance of order and for the protection of life and property in Egypt. Under pressure of an ultimatum on April 29, backed by the order of five war ships to Egyptian waters,

the Government postponed the bills. A scandal arose regarding members of the Coalition Cabinet and Mohammad Pasha Mahmoud, a graduate of Oxford and member of the Wafd party, was made Prime Minister. The new Cabinet was far from commanding a majority in Parliament. By Royal decree on July 19, the King dissolved the Chamber of Deputies and the Senate, and suspended Parliament and elections for three years. Legislation was by decree. The Government throughout maintained complete control of the Egyptian Army and the police.

During the visit of King Fuad and Premier Mahmoud Pasha to England in the summer of 1929, a new treaty was negotiated with Foreign Secretary Henderson, the draft of which was made public Aug. 6. It provides for the termination of the British military occupation and withdrawal of the troops to the Suez Canal for its military protection solely as soon as Egypt builds barracks there. Great Britain pledges its support when Egypt applies for admission to the League of Nations. Mutual support in foreign policy is pledged by the two governments with automatic alliance in time of war. Egypt pledges herself to the protection of foreigners, to employ British instructors for her army and British financial and judicial advisers should she need any foreign officials. Great Britain yields capitulatory rights and agrees that her subjects shall come within the jurisdiction of the international mixed courts. Ambassadors will be exchanged. The Soudan question was untouched. The Foreign Secretary declared the proposals the "extreme limit" to which Great Britain could go and Mahmoud Pasha promised to urge their acceptance by an Egyptian Parliament to be newly elected. He resigned in October and Adly Pasha was made Premier and formed a cabinet Oct 4, undertaking to call for the election of a parliament to consider ratification of the Treaty.

Lord Lloyd, out of sympathy with the government, resigned the High Commissionership on July 24 and Sir Percy Loraine, Minister to Greece, was appointed to the post.

The debt, which has been handled by Caisse de la Dette, a body representing the creditors of the Treasury, was as follows in April, 1928:

Guaranteed loan, 3%	£4,449,100
Privileged debt, 3½%	30,633,980
Unified debt, 4%	55,652,560
Total	£90,735,640

Of this sum the Government and the Debt Commission held £E10,169,000 of the bonds.

Charges on debts of all kinds £E3,529,187.

The Egyptian pound is worth £1 0s. 6.15d., or $4.943 at par of exchange.

The surplus in the treasury, April 30, 1928, amounted to about £E36,965,140.

Recent budgets are:

Year.	Revenues.	Expenditures.
1920-21 (April 1)	£E46,446,921	£E62,051,182
1921-22	41,863,166	37,742,112
1922-23	35,763,766	28,247,171
1923-24	34,905,000	34,355,000
1924-25	34,400,000	34,400,000
1925-26	36,870,000	36,288,266
1926-27	38,000,000	41,000,000
1927-28 (May 1)	38,566,805	35,389,036
1928-29	37,532,000	40,170,052

Imports and exports were:

Year.	Imports.	Exports.
1921	£E55,507,984	£E36,356,062
1922	43,333,938	48,716,418
1923	45,276,941	58,387,327
1924	50,736,918	65,733,935
1925	58,225,000	59,199,000
1926	52,400,059	41,759,391
1927	48,658,128	48,340,503
1928	52,043,969	56,165,256

For the period 1919 to 1928 the net balance in Egypt's favor is £E40,838,000.

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$7,966,995	$35,397,408
1923	6,173,741	38,805,840
1924	5,865,625	30,095,404
1925	7,394,169	41,045,099
1926	10,248,972	35,214,506
1927	11,182,149	33,292,149
1928	11,058,894	28,421,850

ESTONIA, REPUBLIC OF

EESTI VABARIIK

AREA, 18,355 square miles.

POPULATION, Jan. 1, 1929, 1,116,474.

CAPITAL, Tallinn (formerly Reval), population 126,000. Tartu (Dorpat) has 57,362.

State Head, Otto Strandmann, born 1875, (Reformist Labor) July 9, 1929.

President of the State Assembly, Karl Einbund (Agrarian).

Foreign Minister, Jaan Lattik (Christian Peoples).

Estonia comprises the former Russian province of Estonia, the northern part of Livonia, and western parts of the Governments of Pskow and Petrograd. It is bounded by the U. S. S. R. (Russia) on the east, Latvia on the south, the Gulf of Riga and the Baltic Sea on the west, and the Gulf of Finland on the north. Estonia is about the size of the States of Vermont and New Hampshire. The Estonians are of Finnish-Ugrian origin.

The country is a low plain interspersed with a series of rolling hills running from north to south with an average altitude of 100 to 400 feet. The coast line is 725 miles long. Agriculture is the occupation of 70% of the people. There are 126,560 allotments; 2,532,800 acres are under cultivation; 2,602,270 in meadows and 1,836,400 in pastures.

The principal crops in 1928 were: Wheat, 28,200 metric tons from 72,536 acres; rye, 140,600 tons from 356,600 acres; barley, 91,700 tons from 282,422 acres; oats, 98,900 tons from 342,382 acres; potatoes, 501,100 tons from 174,506 acres; flax, 7,800 tons and linseed, 5,800 tons from 91,335 acres.

Peat bogs cover 500,000 acres and furnish much of the fuel. The state owns 1,835,361 of the 2,224,000 acres of forests which contain 42% spruce, 21% pine, 19% birch, and 10% poplar. Forest products to the value of $7,446,000 were exported in 1928.

In 1927 there were 628,880 cattle on the farms and 665,510 sheep. There were 399 dairy factories of which 81% were cooperative and in 1928, 11,222 metric tons of butter were exported, 26% of the total exports.

Estonia has oil shale deposits distributed over an area of 2,000 square miles and amounting to 5,625,000 metric tons. The shale is of very high quality and yields from 23% to 40% of crude oil. The government's own distillery has a capacity of 5,000 tons of crude oil from 280,000 tons of shale annually and a Swedish company has been turning out gasoline for local automobiles.

Until 1919, 58 per cent. of the total area of Esthonia was held by a few hundred families of large landowners pre-eminently by nobles of German origin, and only 42 per cent. of land was held by the bulk of Estonian farmers. By the Land Law of Oct. 10, 1919, all the large estates of large landowners of the former Russian Crown and of the church were proclaimed to be the property of the state. For the inventory, as cattle, machinery, etc., the former owners were compensated at once; for the land itself the principle of compensation was admitted and after many discussions solved by Land Compensation Law of March 5, 1926. The amount of compensation for the alienated lands being fixed at approximately market prices on land in 1918-1919 in Estonia. This will be paid off in Governmental bonds, redeemable in sixty years, bearing 2.66% interest. The land reserves thus obtained were parceled out and created 37,997 new farms and over 10,000 homesites. The limit of new farms is set at 185 acres, but the average size is fifty-four acres of suitable land for cultivation. The main purpose of the land reform was to give land to the peasants, parceled out into farms small enough to work without hired help by an average family owning two horses, preference being given to demobilized soldiers and to landless peasants who had actually lived on and cultivated the parcel themselves under the former owners. In most cases a former large landowner was allowed to retain his dwelling and land not exceeding 185 acres. The law of June 16, 1925, allows the new farmers to have the land in freehold or to acquire it by buying it from State.

There is no state religion; 78.6 per cent. of the population are Lutherans, 19 per cent. Greek Orthodox. Illiterates above 10 years of age number 3 per cent. Education is free and compulsory. The famous Tartu University had in 1925, 5,000 students.

An eight-hour working day has been adopted; also public insurance of workmen; nightwork for women and children is prohibited.

The chief exports are dairy products, paper, flax, potatoes, and timber. The chief imports are cotton, machinery and metals.

Estonia declared her independence on Feb. 24, 1918, after the Bolshevist coup d'etat. The republic on June 15, 1920, adopted its Constitution, by which power is vested in the State Assembly (Riigikogu) of 100 members chosen for three years, with proportional representation by universal, direct and equal suffrage. The initiative of the people in legislation is an important feature. The State Head and the Ministers forming the Gov-

ernment are chosen and confirmed by the State Assembly. The State Head has no power of veto. Military service is compulsory.

The Ministry headed by Jaan Teennison resigned and was succeded by one headed by August Rei, Socialist, Dec. 5, 1928. This in turn was succeeded by a conservative coalition ministry headed by Otto Strandmann on July 9, 1929, which is supported by 69 out of 100 members of the Assembly.

Tallinn has a fine harbor. It should be classified among the non-freezing ports of the Baltic Sea, and only in few winters the port is inaccessible for small ships without the aid of ice-breakers for a period of about three weeks (Jan.-Feb.). During 1928, 1,601 vessels of 753,421 tons entered Tallinn in the foreign trade.

The state owned railway mileage is 1,160. Operating revenues in 1926 were $3,984,000.

Estonia reorganized its currency on Jan. 1, 1928. The new monetary unit is the Estonian kroon (=0.403226 grams of pure gold) the same as the Swedish krone, divided in 100 sents each equalling one Estonian mark. The kroon at the rate of exchange stabilized since 1924 equals $0.268. A 7% 40-year loan was floated in June 1927, $4,000,000 in New York at 94, and £700,000 in Europe. From the proceeds a Government controlled Bank for Long Term Credits was set up which took over the assets of long maturity from the Eesti Pank amounting to about 17,670,000 kroons for which the latter received £1,000,000. The state bank has the sole power of note issue. The note circulation on July 31, 1929 was 34,300,000 kroons covered by a gold reserve of 6,300,000 kroons and net foreign exchange holdings of 20,800,000 kroons, a reserve in excess of 75%.

The foreign debt on Jan. 1, 1928, totalled $21,581,769; and the internal debt $1,367,292.

Recent budgets in millions of Esthonian marks:

Year.	Rev.	Exp.
1923-24	7,434,7	7,097,2
1924-25	7,475,5	7,407,8
1925-26	7,749,0	7,422,0
1926-27 (actual)	8,571,2	8,307,1
1927-28 (actual)	8,940,0	8,690,0
1928-29 (actual)	9,110,0	9,010,0
1929-30 (actual)	9,380,0	9,380,0

Imports and exports were:

Year.	Imports.	Exports.
1922	$16,438,000	$14,117,000
1923	27,050,000	16,560,000
1924	22,686,600	22,804,000
1925	25,953,293	25,980,153
1926	25,485,000	25,663000
1927	25,882,000	28,348000
1928	35,107,964	34,065,212

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$3,103,275	$767,174
1923	1,416,961	492,076
1924	1,388,754	388,231
1925	1,583,993	320,225
1926	826,178	1,234,553
1927	918,434	431,767
1928	960,323	1,080,080

ETHIOPIA, EMPIRE OF

ABYSSINIA

AREA, estimated, 350,000 square miles.
POPULATION, estimated, 10,000,000.
CAPITAL, Addis Ababa; pop., estimated, 70,000.
Empress, Waizeru Zauditu, daughter of the late Emperor Menelik, born in 1876; elected Empress Sept. 27, 1916, after her nephew Lij Yaser was deposed. *Heir and Regent*, Menelik's grand nephew, Ras Taffari, born July 17, 1891; crowned *King of Shoa*, the chief province of Ethiopia, Oct. 1928.

Ethiopia, (or Abyssinia), is a mountainous volcanic country in northeast Africa, bounded by Eritrea (Italian) on the north, British Somaliland (Berbera) and Italian Somaliland on the east, Kenya on the South, and the Soudan on the west. The agricultural and mineral resources of the country are comparatively undeveloped, and its wealth of water power is unused. In the lower country and deep valleys, which are very hot, sugar cane, cotton, coffee and rubber are produced, while grain, fruit tobacco, potatoes, etc., are grown in the higher temperate country. The upper slopes are given over to cattle raising. Hides, skins, coffee and beeswax are the chief exports, and cotton goods the chief imports. The total trade is estimated at about $12,000,000. A railroad 495 miles long, built under French auspices, runs from Jibuti, its port on the Red Sea, to the capital. This road in 1924 carried 18,693 metric tons of Imports and 23,885 tons of exports. Imports through the Soudan route in 1927 were valued at $247,550 and exports at $902,800. Trade exports $13,656; in 1927, imports $18,381, exports, $27,866; and in 1928, imports $21,070, exports, $26,157.

The religion is Christianity of the Coptic sect. Education is for the clergy alone and the people are generally illiterate.

German scientists describe the Abyssinians as "a mixed Hamito-Semitic people," and other ethnologists assert that the "true Abyssinian type contains no Negro blood whatever and none of the Negro qualities, either physical or mental." The royal family claims descent from Menelik, the son of King Solomon and the Queen of Sheba. Ethiopia (or Abyssinia) is the only country in Africa that was neutral in the World War. It applied for membership in the League of Nations in 1923. After an investigation into the existence of slavery in the kingdom and the promulgation of a decree in June, 1923, making slave trading punishable by death, the country was admitted to the League, Sept. 28, 1923.

By diplomatic agreement in 1926 between Ethiopia Great Britain and Italy, made after a protest by Ethiopia to the League of Nations, the British are empowered to build a dam at Lake Tsana, the source of the Blue Nile for the irrigation of the Soudan, and the Italians to build a railway between Eritrea and Italian Somaliland. Lake Tsana is at an altitude of about 6,000 feet, is about 40 miles long and 30 wide, and an area of about 1,200 square miles. The Blue Nile flows out a relatively broad stream and 21 miles from the lake makes a plunge of 80 feet into a narrow gorge. In the next 30 miles it descends 2,000 feet in a series of falls, and near the Sudan-Plains there is an additional fall of 2,000 feet. Possibilities of easy power development are great.

The United States, after a lapse of 20 years reestablished diplomatic relations with Ethiopia in 1928, Addison E. Southard being sent to Addis Ababa as Minister and Consul General.

FINLAND, REPUBLIC OF

SUOMEN TASAVALTA

AREA, 149,641 square miles, including the new Province of Petsamo.
POPULATION, estimated Dec. 31, 1927, 3,582,406. Of the total, 3,366,507, census of 1920, 2,754,228 spoke Finnish; 340,963, Swedish; 4,806, Russian; 2,378, German; and 1,603, Lapponic.
CAPITAL, Helsingfors; population, 1927, 220,904. Other cities: Abo, (or Turku, which in 1929 celebrated its 700th anniversary), 62,599; Tammerfors, 53,121; Viborg, 49,912; and five others of more than 10,000.
President, Dr. L. K. Relander, (born 1883), 1925-31. inaugurated March 1, 1925.
Premier, Kyosti Kallio (Agrarian) Aug. 16, 1929.
Foreign Minister, Hj. J. Procope.

Finland, formerly an autonomous Grand Duchy of the Russian Empire, is bounded on the north by Norway, a narrow strip of land separating it from the Arctic Ocean, on the east by Russia, on the south by the Gulf of Finland, an arm of the Baltic Sea, and on the west by the Gulf of Bothnia, Sweden, and Norway. In territory it is as large as New England, New York and New Jersey.

Of its area, 11.4 per cent. or 17,099 square miles, consists of lakes; and 62 per cent. is covered by forests. Lumbering is the most important industry and scientifically carried on. The annual cut is 1,143 million cubic feet, and the annual growth is 1,568 million cubic feet, while it is estimated with further improvement in forestation the annual cut may be increased 50 per cent. Lumber export was valued at 2,839,184,973 Finnish marks. The state owns 24,823,500 acres of forests, of which 17,561,700 are productive. The net revenue in 1928 was $7,918,940.

Although extending far north into very cold latitudes, with rugged climate and topography, Finland is an agricultural country. Its total cultivated area in 1927 was 5,337,860 acres, and the capital invested in agriculture was estimated at $491,000,000. The value of the harvest in 1925 was 5,086,358,000 F. marks ($128,176,220.)

Under the Land Purchase Act of 1918-19 every farmer tenant was given the opportunity to own land through the payment of a redemption price in Government guaranteed bonds to the land owners. In 1901 only 110,000 farms were cultivated by their owners; in 1920 the number was 182,500. The total number of farms was 280,000, of which 130,000 were of less than thirty acres.

Production in 1928 was, wheat 24,000 metric tons; rye, 278,000; barley, 128,000; oats, 510,000; potatoes, 659,000. Butter exports amounted to 13,370 metric tons, (15,070 in 1927); and cheese, 1,648 metric tons (2,949 in 1927). The animal census of 1927 returned 1,871,865 cattle, 1,368,113 sheep, 11,021 goats, 417,723 pigs and 395,968 horses.

In 1927 there were 3,789 large factories with 159,141 workers and an output valued at 12,382 million marks, of which wood industries furnished 3,490 million marks, paper 2,210 million marks, textiles 1,197 million marks, and iron work and machinery 1,246 million marks.

The export of paper in 1928 aggregated 243,807 metric tons, (of which 171,564 tons was newsprint), valued at 706 million marks and of wood pulp 709,516 metric tons valued at 1,068 million marks.

The Evangelical Lutheran Church is the state religion, although there is absolutely free worship. All but 2 per cent. of the people are Lutherans.

Three universities have 4,500 students, and about 42,500 are in secondary schools. Illiteracy is less than 1%. There were on Jan. 1, 1928, 3,141 miles of railroads, of which 2,955 are state owned. These showed a profit of 151,700,000 marks in 1927.

Canal transportation is highly developed.

Finland had on Jan. 1, 1929, 511 sailing vessels of 79,351 tons, 548 steam vessels of 109,863 tons, and 92 motor vessels of 11,095 tons. In 1928, 8,151 vessels of 4,823,397 tonnage in the foreign trade entered Finnish ports.

Finland, after the downfall of the Czar, had representative government restored to her by the Provisional Government. Following the Bolshevist coup d'etat the Diet and Senate on Dec. 6, 1917, proclaimed the independence of the republic. Civil war between the "Reds" and "Whites" followed, with German intervention. The "Reds" were defeated and driven back into Russia in two battles at the end of April, 1918, and the German troops went home in December of that year. On July 17, 1919, the Finnish Diet resolved to establish a republic, and a peace treaty acknowledging the independence of Finland was signed with Russia at Dorpat, Oct. 14, 1920.

Finland is governed under the constitutional law of 1906 by a Legislative Chamber of 200 members elected directly on a proportional representative basis. Men and women of 24 years of age have the suffrage. The President is chosen for six years by an Electoral College of 300 chosen by proportional representation by direct vote and appoints the Cabinet.

The Electoral College chosen Jan. 15 and 16 1925, was composed of: Swedish Peoples Party, 35; National Coalition, 68 (these two being the "Right"); National Progressive, 33; Farmers' League, 69 (these two the "Centre"); Socialists, 79; and Communists, 16 the ("Left"). On Feb. 16 the college elected Dr. L. K. Relander President by 172 to 109 for Risto Ryti (Progressive).

The diet, elected July 1 and 2, 1929, is controlled by the Agrarians.

The Supreme Appeal Court in June, 1925, declared illegal the activities of the Communist Party, and forced its dissolution.

A loan of $10,000,000 was floated in the United States in 1925, of which half was for agricultural credits. A further loan (30-year, 6½ per cent.) for $15,000,000 was floated in New York, Sept. 1, 1926, to be used for productive purposes. A $15,000,000 6½% 30-year refunding loan was floated in New York at 92½ on Feb. 15, 1928.

The Finnish mark ($.193 at par of exchange), has been revalorized at $.0252 (39.7 marks to $1) and stabilized at that point. Resumption of gold payments was effected on Jan. 1, 1926. The gold reserve of the Bank of Finland then equalled 43,000,000 gold marks representing 330,000,000 Finnish marks. The circulation on July 31, 1929 was 1,448,000,000 F. marks, with a gold reserve of 301,000,000 F. marks, and foreign credits of 843,000,000 F. marks.

The national debt, all funded, on July 31, 1929, was 2,925,076,500 F. marks ($73,711,928); of which 2,579,691,000 F. marks ($65,008,213) was foreign. The national wealth is estimated at about $3,250,000,000.

Recent budgets in Finnish marks are:

Year.	Revenues.	Expenditures.
1924 (actual)	3,217,000,000	3,149,400,000
1925 (actual)	3,330,400,000	3,952,600,000
1926 (actual)	3,434,600,000	4,076,700,000
1927 (actual)	3,986,100,000	3,988,500,000
1928 (estimated)	3,954,000,000	4,233,100,000
1929 (estimated)	4,222,800,000	4,272,300,000

Imports and exports in both Finnish marks and dollars were:

Year	Imports.	Exports.
1925.....F. marks	5,512,974,000 ($138,926,945)	5,569,591,000 ($140,353,693)
1926.....F. marks	5,659,642,000 ($142,622,978)	5,634,289,000 ($141,984,083)
1927.....F. marks	6,385,900,000 ($160,925,000)	6,324,400,000 ($159,375,000)
1928.....F. marks	8,011,844,000 ($201,894,000)	6,242,800,000 ($157,320,000)

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$9,644,870	$5,926,658
1923	11,213,852	10,252,934
1924	9,377,761	8,228,468
1925	12,800,575	7,159,388
1926	12,915,562	9,108,267
1927	16,487,522	8,670,066
1928	18,741,541	9,901,292

FRANCE, REPUBLIC OF

AREA, pre-war, 207,054 square miles; present area, including Alsace-Lorraine (5,605), 212,659 square miles. This included the Island of Corsica, 3,367 square miles. *Colonies*—In Asia, 325,206 square miles; in Africa, 5,290,268; in America 33,166; in Oceania, 9,170; total colonies, 5,657,804 Grand total, 5,870,461 square miles.

POPULATION, census March, 1926, 40,745,874, military and naval forces and seamen abroad 192,973. Total, 40,938,847. *Colonies*—In Asia, 23,117,262; in Africa, 35,830,976; in America, 522,398; in Oceania, 79,160; total colonies, 59,549,796. Grand total, 100,488,643.

CAPITAL, Paris, population, census 1926, 2,871,429 (in the metropolitan district, 5,766,161). Other cities, 1926, Marseilles, 647,705; Lyons, 564,566; Bordeaux, 254,386; Lille, 200,633; St. Etienne, 194,549; Nice, 191,304; Nantes, 182,225; Toulouse, 178,457; Strasbourg, 174,105; Le Havre, 156,788; Rouen, 121,340; Roubaix, 117,459; Toulon, 114,610; Nancy, 113,572; Clermont-Ferrand, 108,740; Rheims, 99,274; Mulhouse, 98,134; Limoges, 97,520; Amiens, 89,939.

President of the Republic, Gaston Doumergue, 1924.

President of the Council, and Minister of the Interior, Andre Tardieu, formed a Cabinet Nov 2, 1929. Raymond Poincare resigned because of l'Iness July 26, 1929. Aristide Briand, who succeeded as Premier, retained the Poincare Cabinet of Nov. 11, 1928, entire. Defeated in the Chamber, all resigned Oct. 22.

Minister of Foreign Affairs, Aristide Briand.

Minister of Justice, Lucien Barthou.

Minister of Finance, Henri Cheron.

Minister of War, Andre Maginot.

Minister of Public Instruction, Pierre Marraud.

Minister of Marine, Georges Leygues.

Minister of Public Works, Georges Pernot.

Minister of Commerce, Pierre Flandin.

Minister of Agriculture, Jean Hennessy.

Minister of Labor, Louis Loucheur.

Minister of Colonies, Francois Pietri.

Minister of Pensions, Senator Gallet.

Minister of Air, Laurent Eynac.

France, a republic in Western Europe, is slightly smaller in area than a group of five Middle West States—Illinois, Indiana, Ohio, Kentucky and Tennessee. Belgium and Luxemburg are its neighbors on the north. On the east Germany lies beyond the Rhine, the boundary; the Jura Mountains and Lake Geneva separate it from Switzerland, and the Graian Alps and the Maritime Alps from Italy. On the south is the Mediterranean Sea and Spain, with the crest of the Pyrenees for the boundary line. On the west lies the Bay of Biscay and the North Atlantic Ocean, and on the north again the English Channel and the Straits of Dover separate it from England. From north to south its length is about 600 miles, and from the western extremity near Brest to Strasbourg on the Rhine it is about 560 miles wide. The coastline on the north is 700 miles long; along the Atlantic and the Bay of Biscay, 865; on the Mediterranean 384 miles.

In the French Alps it has the highest mountain in Europe, Mont Blanc (alt. 15,781 ft.). On the French side of the Pyrenees are several peaks of over 10,000 feet in height. Forming the western border of the Rhone valley rise the Cevennes, highest point being Mont Lozere (alt. 5,584 ft.). The Massif Central continues north as the mountains of Auvergne, where the Plomb du Cantal attains a height of 6,096 feet, to the Cote d'Or, containing Puy de Sancy (alt. 6,188 ft.). Further north are the Vosges, which run parallel with the Rhine; their crest formed the boundary line between France and Alsace. Thence the wooded highlands of the Argonne and the Ardennes bear off to the frontier. The western and northwestern part of France consists of fertile plains save for the hills of Normandy and the picturesque cliffs of Brittany.

On the North Sea and the Channel are the seaports of Dunkirk, Calais and Boulogne, with the great port of Havre at the mouth of the Seine, and Cherbourg, between Cape Hague and Cape Barfleur. In the extreme northwestern projection, sheltered by Cape St. Mathieu, is the roadstead of

Brest, the great naval station. Further down the coast is Lorient, St. Nazaire, at the mouth of the Loire, with Nantes further up the river, Rochefort and La Rochelle. Up the estuary of the Garonne is the important port of Bordeaux, fourth city of the republic; and at the mouth of the Adour, in the extreme southwest corner, is Bayonne with its neighboring seaside resort of Biarritz. On the Mediterranean coast, which on the west is low, with lagoons and sand dunes, there is no great port till the mouths of the Rhone are passed and Marseilles, the second city of the country, is reached. Beyond is the great naval base, Toulon, and from there by Nice and Monaco to the Italian frontier and beyond runs the beautiful Riviera the Cote d'Azure.

France has four important rivers, the Seine, the Loire, the Garonne and the Rhone, the left bank of the Rhine from Basle, Switzerland, to Lauterbourg, and a dozen others, some with new fame from World War battles, but all of great value because of canalization, which binds them together. The waterways total 7,543 miles in length, of which canals cover 3,031. They are the property of the state and are free from tolls. Traffic in 1926 amounted to 39,069,000 metric tons, 36,440,000 in 1925; 36,257,910 in 1924; 33,883,848 in 1923; and 30,373,401 in 1922.

The southern section of the Marseilles-Rhone Canal was completed when the tunnel Du Rove was opened in April, 1927. Through this the canal passes beneath a rocky ridge for 4½ miles; its greatest width is 72½ feet, and the width of the channel is 60 feet; the roof is 37½ feet above the water. Two 1,500-ton barges can pass. This connects the port of Marseilles to the Etang-de-Berre, a lake 14 miles northwest. The entire canal from the Rhone River at Arles, 50 miles long, runs at sea level except for one lock at Arles, and will be completed in three or four years.

THE FRENCH RAILROADS

France has six great railway systems constructed under various concessions which expire at various dates from 1959 to 1960, when they revert to the state. They represent an instalment cost of 25,000,000,000 francs. These lines with their mileage in 1928 were: Nord, 2,380; Est, 3,124; Paris-Orleans (P. O.), 4,641; Paris-Lyons-Mediterrane (P. L. M.), 6,078; Midi, 2,560; Ouest-Etat, 5,599; total, 24,382. The Alsace-Lorraine system of railway has a mileage of 1,384, making the grand total of the mileage 25,766. The Ouest-Etat and the Alsace-Lorraine system are operated by the state, through the Ministry of Public Works. There were in 1928, in addition, the Paris Belt Line, 20 miles; the Grand Belt Line, 78 miles; secondary lines, 839 miles, and non-concessionary road, 20 miles.

Electrification of the Paris-Orleans, the P. L. M. and the Midi is under way, the plants providing for completion in five to ten years. Part of the Midi is now electrically operated, the Soulom plant now furnishing 22,000 H. P., with an additional instalment of 35,000 already available in the same region. Electrification of the Paris-Vierzon section of the Orleans railroad, 127 miles, was completed Dec. 22, 1926. In all in 1928, 716 miles had been electrified which includes 56 miles of Ouest-Etat in the suburbs of Paris and about 500 miles of the Midi.

The deficit of the six great railway systems in 1920 was estimated as not less than 3,300,000,000 francs. Legislation consolidating the French railroads was passed on June 21, 1921, became operative Jan. 1, 1922. The financial reports for 1922 show that the operating deficits of 1912 and of 1920-21 had given place to a net surplus of 400,000,000 francs. Gross receipts increased 1,028,806,000 francs in 1925, but the operating deficit was estimated at 700,000,000 francs, to which should be added 215,000,000, representing capital charges for the payment of interest on foreign loans in the currency of creditor nations. An increase in both freight and passenger rates went into effect in March 1928 and improved the situation.

The 1927 budget carried an appropriation of 598,015,000 francs for the construction and maintenance of roads and bridges, and that of 1928 carried 566,515,000. The taxes paid on automobiles and gasoline amounted to 1,223,214,000 francs in 1926, and 1,511,810,000 francs in 1927. The road budgets of the departments, and of the communes, totalled each about 700 million francs. France has 25,000 miles of national roads, 11,400 of departmental roads, and 400,000 miles of local-interest roads. There are 32,000 grade crossings. France at the end of 1926 registered about 900,000 automobiles (721,306 in 1925 and 572,243 in 1924). There were also 7,112,818 bicycles registered in 1926, each paying an annual tax of 18 francs.

The city of Paris has two subways connecting with transfers at many points, constructed by the city and leased to the operating companies. The Metropolitan ("Metro") is 94.8 kilometers (60.8 miles) long and carried 689,000,000 passengers in 1927; the Nord-Sud 16 kilometers (10.4 miles) long carried 86,000,000. The Paris Tramway and Autobus Co. carried approximately 1,000,000,000.

The French merchant marine on July 1, 1929, included 1,422 steamers of 3,234,270 gross tons, and 56 motor ships of 68,414 gross tons.

There entered French ports with cargoes in 1928, 28,299 vessels of 52,361,757 tonnage, of which 9,058 of 13,412,813 tonnage were French. Marseilles held her place as the first of the Mediterranean ports, as 4,271 vessels of 11,574,657 tonnage entered in 1928. At Havre, 2,586 vessels of 6,249,237 tonnage entered; at Cherbourg, 1,163 of 11,298,112 tonnage; and at Rouen, 2,725 of 2,440,690 tonnage.

INDUSTRIAL CAPACITY.

France has made great advances in industrial power since the war. The industrial reconstruction of the devasted areas is virtually completed; 22,000 factories having been reconstructed, new and larger scale factories are everywhere gradually replacing those destroyed, with technical equipment of the latest type.

The industrial population is fully employed and output in most fields of production is limited only by the dearth of man power. Agricultural reconstruction has been great, although France suffers from an acute lack of agricultural labor, which has been partially met by the introduction of a considerable number of foreign workers and the extensive application of machinery.

Output of coal, iron ore, pig iron and steel, in thousands of metric tons for four years was:

	1925.	1926.	1927.	1928.
Coal	48,033	52,478	52,847	51,360
Iron Ore	35,740	39,480	44,678	48,100
Pig Iron	8,500	9,395	9,297	10,097
Steel	7,400	8,386	8,275	9,387

Since the war the machine tool industry has been greatly expanded and is producing a better grade of equipment over pre-war days.

In 1927, 190,000 automobiles and auto trucks were turned out.

France has extensive bauxite deposits estimated at 60 million metric tons. In 1927, 539,000 tons (409,000 in 1926) were mined.

The textile industry was very prosperous during 1924, 1925, 1926, and 1927. In the cotton trade 9,850,000 spindles and 185,000 power looms were busy with 250,000 workers and a shortage of labor. Pre-war figures were 7,600,000 spindles and 141,000 looms. Less than one per cent of the raw cotton (3,443 metric tons in 1925) comes from the French colonies. Persistent effort is being made to increase the cultivation which aims at the supply of 175,000 tons when development is completed. The woolen industry has been equally prosperous. The linen industry has not wholly recovered from the war when 310,000 of the 600,000 spindles in its 58 mills were destroyed. In 1926 there were about 500,000 spindles in 30 factories, nearly all in or near Lille, together with 20,000 power looms and 12,000 hand looms. The silk industry which escaped the havoc of war has enjoyed unprecedented prosperity.

Unemployment which reached 90,000 in March, 1921, was non-existent throughout 1922-26. The influx of foreign labor was large. It became serious, however, when curtailment of production, sales and expenses followed deflation and in the winter of 1926-27 it suddenly jumped, reaching 27,000 on Jan 13, 45,000 on Jan. 31, and 73,000 on Feb. 18, and touching 95,000 for a high mark. By Sept. 3 it had fallen to 28,000 with 15,000 of these on the dole. On Mar. 1, 1928, the number was 15,294. On Aug. 15 less than 1,300 were on the dole; and on Aug. 15, 1929 only 419.

The Social Insurance law which passed the Chamber on March 14, 1928, will apply to about half the population. Worker, employer and State will contribute to the insurance fund to the extent of about $200,000,000 annually. Benefits are provided for death, disability, old age, loss of employment and sickness; there are also maturity benefits.

Available water power is estimated at 5,098,000 kilowatts, without considering sites at which less than 500 kilowatts can be developed. Of this 2,500,000 kilowatts is available in the Alps and Rhone regions; 996,000 in the Pyrenees region; 700,000 in Massif Central; 506,000 in Vosges and Rhine, and 100,000 in the Jura region.

The equipment now in operation produces 683,000 kilowatts, 56 plants with a capacity of 461,000 kilowatts having been brought into operation since the war. By 1930 it is estimated that France will have equipment available with a capacity of 2,000,000 kilowatts, over 21% of the available water power. The government plans to install electric equipment

for railroads which will also supply light and power to cities and villages along the right-of-way. On July 1, 1928, only 18,000 communes out of 37,944 were electrified.

AGRICULTURE.

The returns of 1920 show that of the total area of France, including Alsace-Lorraine, 136,101,760 acres, 99,095,049 (of which 55,821,029 are arable) were under crops, fallow or grass; 25,521,108 were under forests, and 11,485,603 moorland or uncultivated.

Food requirements are estimated at 9.4 million tons of cereals. The acreage is about 13,750,000. Cereal crops for four years in thousands of metric tons were:

	1925.	1926.	1927.	1928.
Wheat	8,990	6,308	7,739	7,557
Mixed Corn	124	99	105	79
Rye	1,109	766	935	898
Barley	1,027	998	1,210	1,156
Oats	4,756	5,285	5,507	4,881
Potatoes	15,195	11,136	17,145	.....
Sugar Beets	5,371	4,860	5,573	.....

Wine production from 3,351,695 acres of vineyards in 1927 was 892,410,000 gallons (1,473,042,000 gallons in 1926), and cider, 270,534,000 gallons (217,338,000 in 1926).

The output of apples and pears other than for cider making, 308,560 metric tons; plums, 77,226 tons; peaches, 21,762 tons; apricots, 8,225 tons; chestnuts 218,984 tons; walnuts, 51,045.

Engaged in silk culture are about 65,000 producers and the output of cocoons 2,671 metric tons in 1928; 3,612 in 1927; 3,015 in 1926; 3,368 in 1925; 4,200 in 1924; and 4,180 in 1923.

There were on Jan. 1, 1928, of farm animals: Horses, 2,927,230; mules, 182,720: asses, 259,800; cattle, 14,940,960; sheep, 10,693,120; goats, 1,405,050; and pigs, 6,019,450.

RECONSTRUCTION.

A few figures will set forth the burden the war laid upon France. Her pre-war population, census of 1911, was 39,601,509. During the war the birth rate was less than one-half the normal, and in 1919 deaths (736,541) exceeded births (503,606) by 232,935.

The figures for the last nine years in contrast with 1913 are (population 1913, 41,486,272; for other years, 39,209,518):

Year.	Marriages.	Living Births.	B'th R'te	Deaths.	D'th R'te	Exc's of Births.
1913	312,036	790,355	19.1	731,441	17.6	58,914
1920	623,869	834,411	21.3	674,621	17.2	159,790
1921	456,221	813,396	20.7	696,373	17.7	117,023
1922	383,220	759,846	19.3	689,267	17.6	70,579
1923	356,501	761,861	19.4	666,990	17.0	94,871
1924	355,923	752,307	19.2	680,027	17.3	72,280
1925	353,167	768,983	19.6	708,919	18.0	60,064
1926	346,126	766,226	18.8	713,458	17.5	52,768
1927	337,864	741,707	18.9	676,666	17.2	65,042
1928	339,000	745,315	19.0	675,110	17.2	70,205

The number of men from nineteen to fifty mobilized for the defense of France was 8,501,045; the number of men killed, 1,364,000; the number mutilated, 740,000; the number wounded, 3,000,000. Of the killed 669,000 were farmers, 235,000 industrial workers, 159,000 in commercial pursuits, 21,000 were civil service employees, and 40,000 were members of the professions. One man in every 28 in France was killed, 1 in every 35 in Germany and 1 in every 67 in England.

Over 700,000 men are on the pension rolls because of permanent disabilities, of which 404,606 are either legless, or armless, or have but one leg or arm, 235,884 have consumption or lung trouble, and 14,502 are mentally deranged.

Alsace-Lorraine, redeemed, brought back to the tri-color, as shown by the census of 1921, 1,709,749. Yet this census of 1921 returned the total population of enlarged France as 39,209,766, a loss of 391,743. Moreover, France, always a most attractive country to foreigners, counted as residents in 1911, by 1,152,096 foreigners, and in 1921, 1,550,449, an increase of 398,353 (in Paris and its suburbs, 620,865). This would indicate a net loss of French citizens amounting to 790,696. Moreover, the loss to France was almost wholly of her workers.

In 1926 there was returned a foreign population of 2,845,000, of which 807,000 were Italians, 477,000 Spaniards, 460,000 Belgians, 310,000 Poles, 100,000 Russians, 84,000 British, 60,000 Germans, 50,000 Americans, and 11,000 South Americans.

The invading German Army for nearly five years occupied the ten departments of the Aisne, Ardennes, Marne, Meurthe-et-Moselle, Meuse, Nord, Oise, Pas-de-Calais, Somme and Vosges, a region bounded roughly by a line south from Dunkirk to Senlis, east to St. Die, thence north to the Belgian frontier. These departments were the most populous part of France, where industrial plants were most numerous, mines highly important and fields intensely cultivated. All were wrecked. Forests on 410,200 acres were totally destroyed, and on 1,200,300 acres, 25 per cent. of the trees were destroyed.

Immediately after the armistice France went steadfastly and courageously to work to clear the ruins and rebuild. (The progress of the enormous undertaking is told in The World Almanac for 1923, 1924, 1925, 1926, 1927, 1928 and 1929.)

By 1928 reconstruction was practically complete. The population, 4,690,000 in 1914, which had fallen to 2,075,000 in 1918, had increased to 4,645,000 in 1928. Out of 1,258,053 dwellings and farm buildings, 866,844 had been destroyed; 641,011 have been reconstructed, the difference being due to concentration in building. For the same reason 8,296 factories only have been reconstructed, and on most modern lines, to replace the 9,322 destroyed out of the 11,189 plants employing at least 10 workmen. Of the 17,616 public edifices destroyed out of the 20,824 which existed in 1914, 14,756 have been rebuilt. Summing up 663,053 buildings of much superior construction now replace 893,792 which were destroyed of the 1,290,066 in use in 1914.

In 1914 this war area had 2,236,227 hectares (5,523,470) acres of which 1,922,479 hectares (4,748,523 acres) were damaged; 1,862,252 hectares (4,601,264 acres) all that can be profitably restored are again fit for cultivation. The number of livestock, reduced almost to nothing, exceeds pre-war figures.

Of the railroads, 1,030 miles were destroyed in the war. All had been rebuilt by May 1, 1921. Of the local lines, 1,400 miles were destroyed; 1,262 were rebuilt by May 1, 1921; and now all have been restored.

Of 120,000 kilometers (81,920 miles) of roads one half were made unfit for use; all have been repaired. So too with the canals which have been lengthened also.

In 1914 the coal mines comprised 271 pits, 3,399 kilometers of galleries, 1,233 kilometers of track, and 220 machines for extraction of coal; the monthly production averaged 2,260,000 tons. Though all the pits were destroyed in 1918, the coal-mining facilities in 1928 comprised 295 pits, 3,788 kilometers of galleries, 1,321 kilometers of track, and 236 machines for extraction- the average production had increased to 2,706,000 tons per month. In the iron mines of the Briey and Longwy Basins, which were also destroyed, the facilities are now better than formerly and the output has increased much beyond the pre-war figure.

The work of restoration included the filling in of 310,675,000 cubic meters of trenches, the clearing of 379,000,000 square meters of barbed wire, the destruction of 22,134,000 tons of munitions found underground, and the pumping out of 107,000,000 cubic meters of water in the coal mines and 10,218,000 cubic meters in the iron mines.

The commissions for the evaluation of war damages have examined 3,092,884 demands and have rendered decisions covering indemnities totaling 77,752,750,000 francs. Of this amount the payments made cover 73,525,870,000 francs. It is estimated that the total indemnities due will reach 85,766,000,000 and that they will be entirely paid in 1930.

The Cathedral of Rheims, nearly destroyed by bombardment and fire, Sept. 19, 1914, has had a new roof put on by the generosity of John D. Rockefeller, Jr., and restoration of towers, walls and windows had proceeded so far that the edifice was rededicated May 26, 1927, though much remains to be done.

ALSACE-LORRAINE.

Alsace has rich potash fields, discovered in 1904, which gave Germany a monopoly of this product. The output under French hands for 1926 was 2,318,000 metric tons.

Petroleum output near Woerth n 1927 was 504,000 barrels, 478,000 in 1926. The state acquired these deposits in 1921 and turned them over to a private company for exploitation. The beds are estimated to contain 1,800 million tons of crude salts or about 300 million tons of pure potash, and will last for seven centuries at the present rate of production.

Lorraine is rich in iron ore, the reserves being estimated at over two billion tons. The production of pig iron in metric tons was: (1913) 3,863,000; (1921) 1,442,000; (1922) 2,261,000; (1923) 1,889,000; (1924) 2,984,000; (1925) 3,287,000; (1926) 3,574,000; (1927) 3,381,000; (1928) no report.

The production of steel ingots and castings in metric tons was: (1913) 2,286,000; (1921) 1,154,000; (1922) 1,673,000; (1923) 1,592,000; (1924) 2,379,000; (1925) 2,629,000; (1926) 2,800,000; (1927) 2,734,000.

Coal production which was 3,795,262 tons in 1913, in 1924 was 5,244,000 tons.

The exclusive rights of exploitation of the coal mines of the Saar Basin were given to France by the Treaty of Versailles as a compensation for the destruction of the coal mines in the north of France.

The Saar Basin lies north of Lorraine and contains about 738 square miles and 770,000 population (1926). For fifteen years it is to be governed by a commission of five, appointed yearly by the League of Nations, to whom as trustee Germany in the treaty renounced government of the territory. Then a plebiscite will decide whether it will have a continuance of that rule in a semi-autonomous form, union with France, or union with Germany. Free trade with Germany was given the district until Jan. 10, 1925. France becomes the sole owner of the coal fields and mining concessions and the value of the mines thus ceded was credited to Germany in the reparation account. The average pre-war production of the basin was 12,000,000 tons a year. The basin, it is estimated, will yield 16,250,000,000 tons.

The production of pig iron in metric tons was: (1913) 1,371,389; (1920) 643,715; (1925) 1,453,056; (1926) 1,638,051; (1927) 1,770,718; (1928) 1,936,184. The production of steel ingots and castings in metric tons was: (1913) 2,079,825; (1920) 740,978; (1925) 1,578,760; (1926) 1,736,762; (1927) 1,894,629; (1928) 2,073,051.

The coal output was: (1928) 13,106,718 metric tons; (1927) 13,595,824; and (1926) 13,680,874. The figures are for the mines operated by the French State and Frankenholz mine as well, which has an output of 1,000 tons daily. The average number of miners employed was 48,500.

The French took possession on Jan. 18, 1920, the Treasury advancing 39,325,000 francs as a working capital, which was paid back in March, 1922. The value of the property to be credited to Germany on the reparation account is likely to be put at about 350,000,000 gold marks, and on that estimate the experts figure that the mines have paid 7.25 per cent. in 1920; 6.68 per cent. in 1921, and 10.9 per cent. in 1922—the French Government having made about 250,000,000 francs in three years.

The French troops were withdrawn in 1927 and a railroad police force installed under direction of the Saar commission.

WELFARE AND EDUCATION.

France has an act passed in 1905 for the relief of the aged, poor, infirm, and incurable. The age limit, first placed at seventy, was five years later reduced to sixty-five. This act was supplemented by the Old Age Pensions Act of April 5, 1910, which provides a system by which both employers and workers contribute. On July 1, 1920, 8,349,744 persons were registered under it and on Jan. 1, 1925, 7,735,000.

The school system of France is highly developed. Primary instruction is free since 1881 and compulsory since 1882 for all children from six to thirteen. The teachers are, by the law of 1886, lay. The public schools, primary, secondary and superior, form the University of France, and are administered by the Ministry of Public Instruction, with the aid of a Superior Council and a force of seven Inspectors-General and Inspectors. There are seventeen circumscriptions called academies, each with a council to deal with instruction. Each department has a council, presided over by the Prefect, for primary school matters, with large powers regarding inspection, management and maintenance, and each department must maintain two primary normal schools, one for men and one for women.

The seventeen universities in France had, in 1927, 60,069 students; the largest, that of Paris (founded in 1150), had 26,108, 4,000 being foreigners.

John D. Rockefeller, Jr., in July, 1928, gave $2,000,000 to build a Central hall in the Cite Universitaire, Paris, also $170,000 for its upkeep. A $400,000 fund has been raised for an American dormitory to house 260 American students there.

The expenditure on the public schools and for technical schools, not including those under the Ministry des Beaux-Arts, was:

	Francs.
For public schools, 1921	1,261,620,729
1922	1,337,000,000
1923	1,403,000,000
1924	1,587,979,000
1925	1,850,007,000
1926 (est'd)	1,613,973,330
1927 (est'd)	2,056,514,080
1928 (est'd)	2,584,953,059
1929 (est'd)	3,091,516,850

For the third time since the war the Chamber of Deputies passed a bill granting a measure of women's suffrage; the last on April 7, 1925, was for municipal elections only. The vote was 390 to 183. This bill went to the Senate, which had killed the other two and (April, 1927) killed this also.

No religion is recognized by the state.

GOVERNMENT OF FRANCE.

The constitutional law under which France is governed was adopted in 1875 and was partially modified in 1879, 1884, 1885, and 1889. Legislative power rests in a Senate and a Chamber of Deputies. The 612 Deputies are elected by direct vote by manhood suffrage every four years. The 314 Senators are elected for nine years, one-third retiring every three years; the election is indirect and made by an electoral body in each district, made up of delegates chosen by the municipal councils of each commune, and of the Deputies, councillor-generals and district councillors of the department. The two Houses meet yearly on the second Tuesday in January and must remain in session at least five months out of the twelve.

The two Houses, united as a National Assembly, elect a President of the republic to serve seven years, meeting immediately whenever a vacancy occurs. The President selects a Ministry, generally from the two Chambers, but may go outside the membership. In practice the President summons a leader who can obtain a majority in the Chambers in support of his policies as President of the Council (Premier) and he makes up his list of Ministers and submits it for approval. The number of portfolios varies, numbering fourteen in the present Ministry. Each Minister is responsible to the Chambers for his acts and the Ministry as a whole is responsible for the general policy of the Government.

The unit of local government is the commune, of which the ninety departments (excluding the three in Algeria) had, in 1926, in all 37,944. Of these 22,024 have less than 500 inhabitants; 11,962 have between 500 and 1,500; 140 only have more than 20,000. Each commune elects by universal suffrage a municipal council which in turn elects a Mayor, who is both the representative of the commune, the agent of the central government, and the head of the police. Each department has representatives of all the Ministries and is placed under a Prefect nominated by the Government and having wide functions. The elected Consells d'arrondissement (385 in France) are charged with allotting the direct taxes.

The proportional representation system in use in 1924 was very complicated and an analysis of the popular votes indicates that candidates on the National Bloc tickets received 30,419,847 votes, while those of the Left Bloc received 28,139,831, and the Communists, 8,584,007.

The new election bill passed July 12, 1927, provides for a division of the country into 612 electoral districts of approximately 100,000 voters each. Each party may have but one candidate, and the one having a clear majority wins. If there is no choice a second election must be held within 8 days, when the candidate having a plurality wins.

Under this bill elections for a new Chamber of Deputies were held April 22 and 29, 1928. There were 3,687 candidates for the 612 seats. Many men new to the Chamber were elected and the group affiliations were difficult to determine. A reasonable estimate of the strength of the groups running from the extreme Right to the extreme Left is:

Conservatives (mainly Royalists)	18
Republican-Democratic (Marin's Nationalists)	153
Radicals of the Left (Moderate Nationalists)	98
Radicals (mainly independent voters)	63
Republican Socialists (party of Briand and Painleve)	47
Radical Socialists	111
Socialists	101
Communists	14
Communist Socialists	2
Alsatian Regionalists	3

On the first test vote of confidence, on the release of three Communist deputies from prison, Premier Poincare was supported, 342 to 167, and later votes showed about 430 deputies standing by him.

FINANCIAL RECONSTRUCTION.

The Poincare National Union Government took office July 23, 1926, when the franc was at its lowest (47.07 to the dollar on July 18). The cabinet lasted until Nov. 6, 1928, when the four Radical ministers were compelled, because of a trick vote of their party, to withdraw and in consequence Premier Poincare sent the President the resignation of the entire cabinet. He remade his cabinet on Nov. 11, without the Radicals, giving up the Treasury portfolio, to devote his special attention to the reparations problem.

During these two years and three months the cabinet had by resolute financial measures restored confidence. The franc regained all the ground it had lost in 1926 and was pegged by the Bank of France at 25.19 by Christmas. The budget for 1927 was balanced.

The final step in restoring the gold standard was

taken on June 24, 1928, when the Chamber by a vote of 450 to 32, and the Senate by a vote of 256 to 3 passed Premier Poincare's bill defining the new franc as 65.5 milligrams of gold nine-tenths fine which equals 3.92 cents or 25.52 francs to the dollar and 124.21 francs to the pound sterling.

The Bank of France is obligated to redeem its notes on sight and to keep a metallic gold reserve of 35% of the combined note circulation and deposits. On that day it held over 40%. The revaluation of its gold holdings completed the amortization of temporary advances to the State. The Bank granted the Treasury a loan of 3,000 million francs, without interest, maturing Dec. 31, 1945. The silver holdings were revalued at the current market price. All old coins of gold and silver lost their legal status and the Bank bought all horded gold presented amounting to 1,700 million francs by October, 1928.

The Treasury's indebtedness to the Bank for advances to Russia were transferred to the Autonomous Sinking Fund office. These pre-war bonds have a face value of 5,930 million francs and are non-recoverable.

The Bank of France had been accumulating gold and the reserves in its vaults which had been kept fairly constant since the end of the war, amounted to 5,542,861,000 gold francs on June 15, 1928. After complying with the law the Bank issued its first weekly statement in a new form on June 28, 1928. It showed a gold reserve of 28,935 million gold francs on the new valuation; gold balances held abroad amounting to 36,308 million; notes in circulation 58,772 million; the gold reserve in the vaults being 49.2% against the circulation, and 40,45% against the circulation and current liabilities. (For details see The World Almanac for 1929, page 613.)

On August 31, 1929, the Bank of France had gold in its vaults 389,30 million francs, gold abroad available at sight, 7,248 million francs; foreign exchange, 18.554 million francs as against note circulation amounting to 66,468 million francs.

THE WAR DEBTS.

Ambassador Berenger, Apr. 20, 1926, signed an agreement with the United States Debt Commission for settlement of the French war debt, which was adjusted at $4,025,000,000 ($3,340,000,000 principal and $685,000,000 accrued interest). The schedule provides for annuities commencing with $30,000,000 for the first two years increasing to $125,000,000 in the seventeenth year and continuing at that figure until the last payment in the sixty-second year, which is $117,675,000. The principal is thus to be paid in full. Interest to be paid after the first five years and for the next ten is 1%; for the next ten years, 2%; for the next eight, 2½%; for the next seven, 3%; and for the remaining twenty-two years 3½%. The total payments contemplated are $6,847,674,104.17, the present value of which on a 4½% basis is $2,008,122,624, or practically 50% of the debt funded as compared with the Italian settlement of 26%. The so-called safeguard clause was not included. The settlement was approved by the French Cabinet, and signed by President Coolidge on April 30.

Minister of Finance Caillaux and Chancellor Churchill July 12, 1928 in London signed an agreement on the French war debt to Great Britain amounting to £653,127,900. It provides that France shall pay annually £4,000,000, £6,000,000, £8,000,000 and £10,000,000 for the first four years, thereafter £12,000,000 annually for twenty-six years, and £14,000,000 annually for the remaining thirty-one years.

Both agreements were ratified by the Chamber of Deputies on July 21, 1929, and the Senate on July 26. Congress has not (Nov. 1, 1929) as yet ratified the agreements.

Besides these war debts to the United States and Great Britain the public debt of France on July 31, 1928 was: Internal, 275,205 million francs (of which Perpetual was 101,745 million francs, Amortizable, 105,751 million francs; Medium and Short Term, 22,029 million francs; and Floating, 45,680 million francs); Foreign commercial, 17,695 million francs, (of which loans floated in the United States are 17,280 million francs; loans floated in Great Britain, 124 million francs; Argentine bank credit, 251 million francs; and Uruguay bank credit, 40 million francs). The grand total of these debts is 292,900 million francs (approximately $11,481,000,000) and is about 7,160 ($280) per capita.

THE BUDGETS.

The normal budgets for nine years were:

	Revenues.	Expenditures.
	Francs.	*Francs.*
1921	29,160,155,234	29,120,541,626
1922	28,362,328,929	28,348,952,965
1923	23,437,954,832	23,402,487,556
1924	29,835,000,000	29,659,000,000
1925	33,150,844,678	33,137,180,618
1926	41,337,000,000	40,690,000,000
1927	43,297,000,000	42,491,000,000
1928 (provisional)	42,497,000,000	42,446,000,000
1929 "	45,431,000,000	45,336,000,000

To these figures there must be added the extraordinary expenses due to war, military pensions, and reconstruction to be repaid from receipts from Germany on the reparation account, which are provisionally covered in part by loans. The amounts were:

	Francs.
1921—Extraordinary expenditures	15,317,184,792
1922— " "	10,558,534,377
1923— " "	13,581,000,000
1924— " "	7,493,000,000

Direct taxation in 1927 brought in 10,024 million francs; customs, 2,618 million francs; business turnover, 8,620 million francs; and other indirect taxes and monopolies, 18,468 million francs.

In 1927, 348 persons had incomes of 1,000,000 francs ($39,200) or more; 1,484, from 500,000 to 1,000,000 francs; the number increased until the report showed 318,187 had incomes between 7,000 and 10,000 francs.

Estimates of pre-war French national income put the total for 1913 at about 35,870 million francs; and for 1924 at about 125,500 million paper francs. The tax burden in 1913 represented 11.6 per cent. of the national revenue; and in 1924 about 20 per cent.; the per capita tax then was for 1913, 104 francs gold, and for 1924, 650 paper francs or 177 francs gold. For 1926 the tax burden was about 1,240 paper francs (about $52) per capita.

Savings bank deposits in 558 savings banks on June 30, 1929, were 10,037,000,000 million francs. The number of depositors exceeded 9,000,000.

ARMY AND NAVY.

The cost to France of her army and navy in the last ten budgets was:

	Army.	Navy.
	Francs.	*Francs.*
1920	4,236,599,884	868,224,082
1921	4,462,003,675	951,542,607
1922	3,426,284,959	797,804,914
1923	3,939,000,000	977,804,914
1924	3,566,765,327	1,028,237,008
1925	3,466,900,000	1,252,000,000
1926	4,296,400,000	1,423,100,000
1927	5,299,619,645	1,915,432,377
1928	6,210,751,790	2,552,094,748
1929	5,746,000,000	2,485,000,000

The French Army, home and colonial, in 1926, numbered 31,028 officers and 647,434 men, of which about 390,000 were French conscripts. Under the reorganization law of 1928 to come into operation Nov. 1, 1930, the army was reduced to 523,769 men. The French conscripts whose term of service is reduced from eighteen months to one year number 240,000, the permanent army (seven-year enlistments) will be kept at 106,000 of which 38,000 will be employed for construction; the North African contingent will number 95,000 and the Colonial 84,000.

The Aviation Corps is to consist of 132 combat squadrons, 76 observation squadrons and 34 auxiliary service squadrons, with a personnel of about 32,866 in 1928. The French Air Force in August, 1926, had 3,500 planes, of which 1,542 were of first line type, all post-war models. The budget estimate for 1929 was 1,770 million francs.

The French Navy, under the allotment as to capital ships agreed to at the Washington Conference, is in proportion of 1.75 as against 5-5-3 for England, the United States and Japan.

The fleet in 1927 consisted of 6 first-class battleships, 3 second-class, 5 armored cruisers, 4 new fast cruisers, 4 old cruisers formerly German, 1 aircraft carrier, 48 dispatch boats, 64 destroyers and 58 submarines. Three 10,000-ton cruisers were under construction. The Redoubtable Vengeur, one of the most powerful submarines in the world was completed in 1928. It is 276 feet long with an underneath tonnage of 3,250, has a steaming radius of 8,000 miles and can remain at sea for 30 days. A sister submarine the Surcouf and 28 smaller ones were under construction in 1928. The program for 1929 includes one cruiser, six destroyers, seven cruising and four coast defense submarines, to cost over 1,000 million francs.

The Chamber, Mar. 7, 1928, by vote of 500 to 32, adopted a bill providing for the nationalization of all needful industry in time of war, a complete mobilization of every French citizen, man, woman and child into the national defense force, and authority to take over by decree all railways, factories, mines, electrical plants, and other industries, and all inventions useful for the conduct of the war without compensation. The Senate on Feb. 17, 1928, passed the bill

but struck the clause providing for the requisition of the services of women. The Government announced that each ministry would prepare, in peace time, complete plans for such mobilization.

France put into effect on Sept. 6, 1927, a new tariff superseding that of 1892 increasing the rates on over 400 items.

The French National Touring office estimated that 220,000 American tourists in 1925 spent 4,975,520,000 francs ($226,160,000 at average exchange for that year). The number in 1926 was even larger and their expenditures reckoned at between 8,000 and 9,000 million francs. During 1925, 759,000 left Great Britain, Ireland and the Channel Islands for France; 684,148 entered via the Spanish border; 38,588 came from Holland; and 13,545 from Switzerland.

FOREIGN TRADE.

The foreign trade of France, compared with that of 1913, the last year before the war, expressed both in francs and in dollars at the average exchange rate for the year, was:

Imports.	*Francs.*	*Equivalent in Dollars.*	*Exchange Rate.*
1928	53,448,265,000	2,094,367,750	25.52
1927	52,852,760,000	2,071,828,192	25.51
1926	59,514,725,000	2,361,933,000	25.19
1925	43,980,506,000	2,096,550,721	20.9
1924	40,132,574,000	2,076,180,000	19.53
1923	32,608,012,000	1,989,089,000	16.39
1922	23,930,328,000	1,962,287,000	12.20
1921	22,068,000,000	1,634,667,000	13.50
1920	49,904,897,000	3,441,717,000	14.50
1913	8,421,332,000	1,625,317,000	5.18

Exports.	*Francs.*	*Equivalent in Dollars.*	*Exchange Rate.*
1928	51,346,799,000	2,012,021,900	25.52
1927	55,224,717,000	2,197,943,737	25.51
1926	59,534,649,000	2,362,200,000	25.19
1925	45,413,555,000	2,162,864,167	20.9
1924	41,454,137,000	2,144,550,000	19.33
1923	30,431,510,000	1,856,322,000	16.39
1922	21,378,943,000	1,753,073,200	12.20
1921	19,772,000,000	1,461,639,600	13.50
1920	26,894,332,000	1,854,823,300	14.50
1913	6,880,217,000	1,327,881,900	5.18

The United States for six years has been France's principal source of supply, with Great Britain a close second, and Belgium and Germany alternating third and fourth. In 1924 and 1926 Great Britain was France's best customer, followed by Belgium, Germany and the United States in that order. France's trade by countries for the last four years in millions of francs was:

IMPORTS

ALGERIA.

AREA, Northern Territory, 222,180 square miles; Southern or Saharan Territory, about 849,000 square miles (included in Sahara in table printed above).

POPULATION, census of 1926: northern territory, 5,455,408; southern territory, 537,362; total, 5,992,770; of which 864,331 were Europeans, mostly French and Spaniards.

CAPITAL, Algiers, population, 1926, 226,218. Other cities: Oran, population, 150,301; Constantine, and seven other cities above 25,000.

Governor General, Pierre Louis Bordes, Nov. 20, 1927.

Algeria is in the northern part of Africa, extending for 650 miles along the Mediterranean Sea, between Tunis on the east and Morocco on the west. Both neighbors are French protectorates (see following). The northern territory extends inland approximately 350 miles; beyond, the four southern territories extend southward indefinitely into the Sahara Desert, merging into French West Africa. The boundaries have not been fixed but the 20° of north latitude may be considered as an approximate divisional line. These four southern territories form a separate colony, are sparsely peopled by nomads, and each is under a military commander.

Living quarters according to the census of 1926 comprise 378,605 houses, 372,188 native huts, and 151,625 tents.

The country is governed by a Governor General with the aid of a consultive council and a supreme council and three financial delegations (French colonists, French taxpayers other than colonists, and Mohammedan natives), whose especial care is the budget and the taxes. The Governor prepares the budget, which for seven years was:

	Revenues.	Expenditures.
1922-23	francs, 489,948,141	francs, 489,808,492
1923-24	francs, 595,523,431	francs, 595,262,638
1924-25	francs, 577,000,000	francs, 576,800,000
1925-26	francs, 642,526,262	francs, 642,374,842
1926-27	francs, 785,492,888	francs, 785,481,679
1927-28	francs, 997,778,028	francs, 997,600,458
1928-29	francs, 1,235,300,626	francs, 1,234,827,220

The debt is about 110,000,000 francs.

Algeria has prospered greatly under peace and French rule. The country has four marked divisions. On the coast is an area, the Tell, from 50 to 100 miles wide, of very fertile plains with valleys running out from the hills, mainly owned by Europeans, which is cultivated scientifically. Behind the Tell is the tableland of the Shat with an elevation of 3,000 feet, arid, or covered with salt lakes and swamp. The two chains of the Atlas Mountains, reaching to altitudes of 7,000 feet, divide the country from the Sahara.

The French have driven artesian wells and brought scientific irrigation and fertilizer to the land of the Tell. Agriculture has made great strides.

The chief crops in 1927 were wheat 767,877 metric tons from 3,513,158 acres; barley, 766,451 tons from

3,399,822 acres; oats, 158,947 tons from 530,790 acres; and tobacco, 26,550 tons from 87,024 acres. From 530,790 acres the yield of wine was 176,908,072 gallons; and of olive oil 3,457,762 gallons from 7,803,700 trees. Cotton was grown on 10,000 acres; 17,600 pounds of cocoons were produced. Cork trees cover 1,125,000 acres; Aleppo pines, 1,690,000 acres; and evergreen oak, 1,625,000 acres of the 5,590,000 acres of forests.

Algeria is rich in minerals as yet very little exploited. The mineral output in 1928 was as follows: Iron ore, 2,110,547 metric tons (2,382 242 tons in 1927); lead ore in 1927, 17,599 tons; zinc ore 44,797 tons; coal, 29,000 tons; phosphate of lime, 847,163 tons; copper ore, 1,455 tons; petroleum, 8,000 barrels; antimony, 131 tons.

The French have improved the ports, built 3,325 miles of excellent roads, and there were, in 1928, 2,716 miles of railroads. The three ports have also been improved. In 1928, 4,585 vessels of 8,283,606 tons entered the ports.

Imports and exports in francs were:

Year	Imports.	Exports.
1923	2,236,942,000	1,674,393,000
1924	2,793,725,000	1,990,475,000
1925	3,275,486,000	2,403,838,000
1926	4,119,000,000	4,015,000,000
1927	4,836,000,000	3,521,000,000
1928	4,968,146,000	3,995,682,000

The trade of Algeria and Tunis with the United States was:

Cal. Year	Imports.	Exports.
1922	$6,709,362	$1,789,408
1923	5,588,164	2,372,390
1924	5,525,362	1,974,036
1925	5,562,061	2,932,887
1926	6,669,165	3,154,148
1927	6,854,803	4,650,456
1928	8,723,859	4,932,199

TUNIS.

AFRIKIYA

(French Protectorate.)

AREA, about 50,000 square miles.

POPULATION, census of 1926, 2,159,758, of which 173,281 were Europeans (71,020 French, 89,216 Italians), and 1,986,427 natives (1,932,184 Arabs and Bedouins, 54,243 Jews).

CAPITAL, Tunis, population, 1926, 185,996, of which 27,922 were French and 44,076 Italians.

Bey, Sidi Ahmed, succeeded his cousin Sidi Mohammed el Habib, who died in February, 1929.

French Resident General, M. Manceron, appointed June 2, 1929.

Tunis, one of the former Barbary states under the suzerainty of Turkey, is situate on the northern coast of Africa, with the Mediterranean Sea on the north and east, on the southeast Italian Libya, on the south the Sahara Desert and on the west Algeria.

The French were obliged to send a military force into the country in 1881 to protect Algeria from the raids of the Khroumer tribes, which resulted in a treaty signed May 12, 1881, placing Tunis under the protectorate of France. Most of the tribes have settled down to agriculture and stock raising. Difficulties of administration which followed the old Turkish system have been great, but the French have met them admirably and have made the country properous.

There are large fertile valleys in the mountainous north, excellent land for fruit culture in the northeast peninsula, high tablelands and pastures in the centre, and famous oases and gardens in the south, where dates grow in profusion. The chief industry is agriculture; over 5,000,000 acres are devoted to cereals and vegetables; 420,000 to 16 million olive trees; 47,000 to 2,600,000 date palms; 75,392 to vineyards, 2,725,000 to cork and pine forests, and 11,535,000 acres to pasturage.

The output from the rich phosphate deposits in 1927 was 3,075,000 metric tons, (2,723,000 tons in 1926). Iron, zinc and lead mines are being developed, the output in 1927 of iron ore being 915,000 metric tons. Of lead ore, 40,000 tons; and zinc ore, 18,000 tons are produced annually. Of high qualities marine salt, 300,000 tons are produced annually.

The railway mileage in 1928 was 1,280. Motor transport is increasing rapidly and in 1928, 9,435 vessels entered the twenty-one ports, of which Sfax is the most important.

Recent budgets in francs are:

Year.	Rev.	Exp.
1924	285,304,087	336,624,389
1925	256,842,216	263,430,847
1926 (est'd)	262,139,600	262,055,579
1927 (est'd)	363,779,600	363,729,645
1928 (est'd)	439,542,956	439,430,489

The public debt, 1926, was 478,845,780 francs.

The foreign trade of Tunis in francs was:

Year.	Imports.	Exports.
1922	856,377,102	444,679,644
1923	817,459,200	554,014,384
1924	927,943,882	582,353,545
1925	1,086,271,000	846,226,000
1926	1,360,337,000	1,269,725,000
1927	1,772,000,000	1,027,000,000
1928	1,957,328,000	1,336,987,000

Tunis bou, ht from the United States, machinery kerosene and gasoline in 1927 to the value of $3,213,000 and sold olive oil, iron ore, cork, hides, etc., to the value of $776,000; and in 1928. $669,000.

FRENCH WEST AFRICA.

AREA, about 1,844,400 square miles, exclusive of the Sahara Desert, about 1,500,000 square miles.

POPULATION, census of 1926, 13,541,611, of which 15,399 are Europeans.

CAPITAL, Dakar, in Senegal; population, 1926, 40,152, of which 2,939 are Europeans.

Governor General, Jules Carde, Feb. 20, 1923.

French West Africa reaches from the Atlantic Ocean at about 17° west longitude across Africa to the Soudan at about 24° east longitude and from the southern desert boundaries of Morocco, Algeria, Tunis and Italian Libya to the Gulf of Guinea and the indeterminate boundary of French Equatorial Africa. It has been formed by consolidation of existing colonies as follows:

Colony.	Square miles.	Population.
Senegal	74,112	1,358,439
French Guinea	95,218	2,095,988
Ivory Coast	121,976	1,724,545
Dahomey	42,460	979,609
French Soudan	648,480	2,634,982
Upper Volta	154,400	3,240,147
Mauritania	345,400	289,184
Territory of Niger	404,914	1,218,717
	1,844,400	13,541,611

Of Togoland, the only German colony that was self-supporting, France received 20,200 square miles, about two-thirds. It is attached to French Dahomey.

The colonies are each under a Lieutenant Governor. There is a general budget for all, that for 1928 including local and supplementary budgets being: Revenues, 749,730,000 francs, and expenditures, 709,730,000 francs; and that for 1929 being: Revenue, 801,197,000 francs; expenditures, 771,879,000 francs.

The colonies export fruits, palm nuts and oil, rubber, cotton, cacao, timber, and most important, peanuts, of which 413,327 metric tons were shipped out through Senegal The chief imports are foodstuffs, textiles, machinery and hardware, and spirits.

Trade for seven years in francs was:

Year.	Imports.	Exports.
1922	351,508,480	311,353,650
1923	533,357,802	419,004,128
1924	764,370,275	653,740,634
1925	1,114,970,591	899,063,628
1926	1,550,729,015	1,412,028,809
1927	1,407,620,740	1,230,700,180
1928	1,485,376,000	1,184,645,000

The railroad mileage in 1928 was 2,300. There entered and cleared the ports 20,229 vessels of 16,466,259 tons in 1927.

FRENCH EQUATORIAL AFRICA.

French Congo.

AREA, 982,049 square miles.

POPULATION, census of 1926, 3,127,707, of which 2,502 were Europeans.

CAPITAL, Brazzaville, on the Congo.

Governor General, R. Antonetti, appointed 1924.

French Equatorial Africa extends from Spanish Guinea, just south of the Cameroon, to Belgian Congo. Its eastern boundary is the Ubangi and Congo Rivers and the Soudan. On the west is the Cameroon. French acquisition began in 1841 and its territory has since been extended by exploration and occupation, and the limits defined by international convention. That part (107,270 square miles) ceded to Germany as compensation for acknowledgment of the Morocco protectorate in 1911 was restored to France in the Treaty of Versailles and incorporated in this territory. France, on Jan. 15, 1910, renamed the French Congo French Equatorial Africa and subdivided it into three colonies under one administration, subsequently adding Chad as a colony. The four colonies are:

Colony.	Sq. M.	Pop. (1926)
Gabun	121,862	388,899
Middle Congo	150,292	688,753
Ubangi-Shari	208,219	1,066,444
Chad	501,676	973,611
Total	982,049	3,127,707

There are 30,000 square miles of tropical forest, rich in timber, but the output as yet is only wild rubber, of which 1,434 tons were exported in 1921. Palm oil output for export was 5,345 tons. Copper, lead and zinc are found. The import figures for 1927 were 172,819,683 francs; exports, 136,747,844 francs. A railroad to connect Brazzaville with Pointe Novie should be completed in 1930.

The general budget for 1929 was 54,500,000 francs; local budgets were: Gabon, 16,250,000; Middle Congo, 17,250,000; Ubangi-Shari, 14,240,000; Chad, 11,000,000.

CAMEROON.

(French Mandate.)

AREA, 166,489 square miles.

POPULATION, estimated, 1921, 1,500,000.

CAPITAL, Yaounde.

That part of the former German colony Cameroon not returned to France (see French Equatorial Africa) was by the Treaty of Versailles placed under a French mandate and by decree of March 28, 1921 has been constituted an autonomous territory. It has 369 miles of railroad. The products are tobacco, palm oil, coffee, and ivory. The budget for 1927 was balanced at 41,768,350 francs with a special railway budget of 16,000,000 francs and a special medical budget of 3,579,000 francs.

Imports 1926 were 192,000,000 francs, and 1925, 126,036,353 francs; Exports 1926, 155,000,000 francs, and 1925, 113,088,014 francs.

In 1925, 217 vessels entered the port of Douala.

FRENCH SOMALILAND.

AREA, 5,790 square miles.

POPULATION, 1921, estimated, 208,000.

CAPITAL, Jibuti; population, 1928, 9,414 (317 French).

French Somaliland lies between Eritrea (Italian) Abyssinia and British Somaliland and is separated by the Straits of Bab-el-Mandeb from Aden (British). Its port, Jibuti, is on the Gulf of Aden. A port was acquired by France in 1862, but active occupation did not begin until 1884. It is administered by a Governor. The colony has few industries; hides, coffee and ivory are exported, and textiles, food products, sugar and coal imported. The figures in 1926 were: Imports, 457,751,424 francs; exports, 401,543,750 francs, partly Abyssinian goods brought down to Jibuti by the railroad (485 miles long) from Addis Abeba. In 1926, 1,423 steam vessels of 1,145,271 tons entered Jibuti.

The budget for 1928 balanced at 13,002,000 francs.

Trade of French Africa with the United States not elsewhere specified was:

Cal. Year.	Imports.	Exports.
1922	$1,659,085	$364,783
1923	1,884,797	524,068
1924	2,599,523	928,690
1925	3,255,990	1,283,100
1926	4,066,310	1,199,001
1927	2,928,237	1,630,672
1928	3,297,028	1,061,745

MADAGASCAR.

AREA, estimated, 228,707 square miles.

POPULATION, census of 1925, 3,598,728, of whom 20,000 were French.

CAPITAL, Tananarive; population, 70,081. Forts: Tamatave, Diego-Suarez, Majunga and Tulear.

Governor-General, Marcel Achille Henri Raymond Olivier, appointed Jan. 31, 1924.

Madagascar, an island off the east coast of Africa, from which it is separated by the Mozambique Channel (240 miles wide at its narrowest part), is about 980 miles long and 360 miles wide at its greatest breadth. It is therefore nearly as large as the State of Texas. To it is attached for government the prosperous archipelago of the Comoro Islands with an area in all of about 838 square miles, and with in 1925, 119,305 inhabitants; also Nossi-Be (113 square miles).

Tamatave (population, 13,395), which has endured 100 cyclones during the last century, was destroyed by one in 1927.

Madagascar came under a French protectorate in 1885. Together with its dependencies, it was declared a French colony on Aug. 6, 1896. It is administered by a Governor-General with a Council of Administration. Over 3,000,000 acres are under cultivation, the chief crops being rice, manioc, beans, vanilla, corn, coffee, cloves, tobacco, sugar cane and cocoa. The forests are rich in cabinet and tanning wood, raffia, resins, gums and beeswax.

Agriculture and stock-raising are the chief industries. Graphite shipments in 1926 amounted to 15,903 metric tons as compared with 13,005 tons in 1925. The gold production amounted to 306 kilos in 1926, and 419 in 1925. Radium has also been found.

The railroad mileage in 1928 was 430 miles all state owned and operated. In 1927, 5,914 vessels of 2,554,619 tons entered the ports.

The 1927 budget balances at 289,991,138 francs. The public debt amounted to 145,224,591 francs on Jan. 1, 1928.

Trade for eight years was:

	Imports.	Exports.
1921 francs	225,921,791	108,308,097
1922 "	173,831,641	132,472,491
1923 "	209,818,297	191,840,791
1924 "	259,033,753	387,571,444
1925 "	491,854,000	443,923,818
1926 "	592,611,944	535,856,989
1927 "	579,860,066	375,035,956
1928 "	686,445,000	483,396,000

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$137,409	$19,811
1923	79,652	156,040
1924	138,658	231,172
1925	168,086	525,125
1926	286,449	271,072
1927	360,473	107 965
1928	313 106	216,627

REUNION.

AREA, 970 square miles; 48 miles long, 24 wide.

POPULATION, census of 1926, 186,637, of which 180,694 were of French European origin.

Reunion is in fact an integral part of France, as it is represented in Parliament at Paris by a Senator and two Deputies. It is an island in the Indian Ocean, about 420 miles east of Madagascar, and has belonged to France since 1643. It is administered by a Governor and an Elective Council. The chief products are sugar, rum, coffee, manioc, tapioca, vanilla, and spices. The chief imports, rice and cereals.

Imports were: 1927, 173,640,000; 1926, 164,883,000 francs; 1925, 147,291,000 francs; exports, 1927, 146,991,000; 1926, 164,896,000 francs; 1925, 111,557,000 francs; mostly sugar (63,000 tons, valued at 98,769,000 francs in 1926). There are eighty miles of railroad, state owned. In 1927, 143 vessels entered the ports. The budget for 1927 was: Revenue, 51,799,299 francs; expenditures, 48,759,085 francs. The debt was 566,000 francs in 1925.

FRENCH INDIA.

AREA, 196 square miles.

POPULATION, census of 1926, 273,081.

CAPITAL, Pondicherry; population, 47,087.

The French possessions in India lie along the Coromandel coast, on the Bay of Bengal, in the southeastern part, to the north of the island of Ceylon. The most important is Pondicherry, established by the French East Indian Company in 1674, and after changing hands eight times finally rested in the control of France in 1814. The colonies are divided in five dependencies: Pondicherry, population, 1924, 175,168; Karikal, 56,091; Chandernager, 26,506; Mahe, 10,321; and Yanson, 4,995. The administration is in the hands of a Governor, and there is a General Elective Council. The colonies send one Senator and one Deputy to Parliament at Paris. Agriculture is the chief industry and oil seed the chief export. Pondicherry has five cotton mills; 71,213 spindles. There are forty-three miles of railroad, and in 1926, 336 vessels entered the porte. The imports in 1926 were valued at 10,137,752 rupees, and the exports at 26,285,194 rupees.

FRENCH INDO-CHINA.

AREA, Cochin-China, estimated, 26,476 square miles; Annam, 39,758; Cambodia, 62,550; Tonkin, 40,530; Laos, 96,500; Kwangchow, 190; total 265,004.

POPULATION, Cochin-China, census of 1924, 4,001,093; Annam, 1924, 5,171,986; Cambodia, 1924, 2,465,581; Tonkin, 1924, 7,160,113; Laos, 1924, 837,364; Kwangchow, 208,044; total, 19,844,181. Of these about 25,770 were Europeans.

CAPITAL, Hanoi (Tonkin), population, 1924, 115,000. Chief port, Saigon (Cochin-China), population, 108,566, of which 8,444 were Europeans.

Governor-General, Pierre Pasquier, Aug. 22, 1928.

French Indo-China, situate in the southeastern part of Asia with China on the north, Siam on the west and the Gulf of Tonkin and the South China Sea on the east and south, comprises five states: The colony of Cochin-China, the protectorates of Annam, Cambodia, Tonkin and Laos, and also Kwangchow, leased from China (1898) and Battambang, ceded by Siam (1907). It is as large as Texas.

The whole country is under a Governor-General with a Secretary-General and a superior Council, and each state has a head, that of the colony being a Governor, and those of the protectorates being called Residents Superieur. There is a common budget for Indo-China, which in 1927, balanced at 78,850,000 piastres (par of exchange, 55 cents). The government reserve on Jan. 1, 1925, amounted to 21,950,000 piastres. The debt on Jan. 1, 1926, was about 500,000,000 piastres.

Annam has a King, Bao Dai (Than Thai), (born 1913, succeeded to the throne Nov. 6, 1925), who governs the country with the assistance of his Ministers under the guidance of the French Resident Superieur.

Cambodia has a King, Moniwong, who succeeded his father, Sisowath, on his death in 1927. The land is very fertile but only a part is cultivated. Some cotton is grown. Fishing is the principal native industry. The ruins of a former civilization which had developed a striking distinctive art, are very extensive; those of Angkor being especially famous.

Tonkin became a French protectorate in 1884. Its chief town, Hanoi, which was made the capital of Indo-China in 1902 instead of Saigon, is a fine, large, well-built modern city. Though its wealth is in agriculture, like the other provinces, it has valuable hard coal deposits, producing in 1925 1,363,000 tons. From the rich limestone quarries in 1925, 150,000 tons of cement were produced. There are also valuable zinc mines.

Exports of plantation rubber from Indo-China in 1923 amounted to 4,970 tons; there were 8,300,600 trees on 75,000 acres of plantations. Output in 1926 exceeded 7,000 tons.

Laos, a protectorate since 1893, has extensive teak forests, and gold, tin and lead are being worked. The Mekong River is its great highway.

Kwangchow, leased from China in 1899, has a free port.

The provinces have been a customs union since 1887, and in 1885, when France forced China to give entirely her sovereignty over Annam, agreements were made for a reduction in tariff rates for goods entering China from Tonkin. France in 1895 obtained special privileges for railroads in southern China.

The railroad mileage in 1925 was 1,292, two-thirds of which is Government-owned. The French have built 27,000 miles of remarkable roads through the jungles and rice fields. In 1926 there entered to port of Saigon 878 vessels of 1,959,577 tons. In 1926 imports were 1,835,375,255 francs; exports 3,067,682,872 francs.

Indo-China ranks second to Burma as the greatest rice exporting country in the world; 1,797,690 metric tons in 1928, a record.

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$827,679	$460,233
1923	2,041,050	365,923
1924	786,846	171,412
1925	1,371,232	99,684
1926	2,189,840	197,064
1927	1,429,361	141,939
1928	1,737,920	36,820

GUADELOUPE.

AREA, entire group of islands, 688 square miles.
POPULATION, census of 1926, 243,243.
CAPITAL, Basse-Terre; population, 1926, 8,379; Port Pointe-a-Pitre, 26,452.
Governor, L. Gerbinis, 1926.

Guadeloupe, consisting of two large islands, Basse-Terre and Grande-Terre, separated by a narrow channel, and five smaller islands, is a group of the Windward Islands in the West Indies, between Antigua and Dominica. They have been in the possession of France since 1634 and are represented in Parliament at Paris by a Senator and two Deputies. The Government consists of a Governor and an elected Council. The soil is very productive.

The hurricane of Sept., 1928, the worst in the history of the island, took a toll of 660 lives and damage to property was between 300 and 500 million francs.

The chief exports in 1926 were sugar, 33,847 metric tons; coffee, 593.5 tons; rum, 12,009,494 litres; cacao, 610 tons; vanilla, 34,888 kilograms; and bananas, 1,431,340 kilograms. Imports were valued at 144,849,469 francs, and exports at 167,663,138 francs.

The budget for 1927 balanced at 29,018,596 francs. The debt, Jan. 1, 1927 was 499,078 francs.

The trade of Guadeloupe and Martinique with the United States was:

Cal. Year.	Imports.	Exports
1922	$2,610,631	$82,068
1923	2,460,867	55,645
1924	2,528,967	217,779
1925	$2,664,794	$387,400
1926	1,958,073	162,446
1927	2,703,645	104,665
1928	2,597,766	161,991

MARTINIQUE.

AREA, 385 square miles.
POPULATION, census of 1927, 234,695.
CAPITAL, Fort-de-France, population, 43,358.
Governor, R. de Guise, 1926.

Martinique, one of the Windward Islands, in the West Indies, has been a possession of France since 1635. It is represented in the French Parliament by a Senator and two Deputies. It is administered by a Governor, a General Council, and elective Municipal Councils. It has the famous volcano, Mt. Pelee, which in eruption in May 8, 1902, destroyed the city of St. Pierre with all its 40,000 inhabitants. The island is the birthplace of the Empress Josephine.

Rum, sugar and cacao are the chief productions.

In 1928, 39,035 metric tons of sugar were produced; in 1927, 40,397; also in 1927, 5,224,021 gallons of rum. The foreign trade in 1927 was: Imports, $8,333,000; exports, $8,991,000; and in 1926, imports, $7,237,000; exports, $7,197,000. In 1927, 550 vessels of 1,040,764 tons entered the port. The budget for 1927 was balanced at 66,103,756 francs.

ST. PIERRE AND MIQUELON.

AREA, St. Pierre, 10 square miles; Miquelon, 83.
POPULATION, census of 1921, St. Pierre, 3,419; Miquelon, 499; total, 3,918.
CAPITAL, St. Pierre.
Governor, J. H. E. Bensch.

St. Pierre and Miquelon are two groups of rocky, barren islands close to the southwestern coast of Newfoundland, inhabited by fishermen. The Government is headed by an Administrator. The exports, cod, fresh and salt, and fish products in 1927 were valued at 127,409,172 francs, and the imports at 165,801,030 francs. The local budget for 1928 was balanced at 10,011,500 francs.

Trade with the United States was:

Cal. Year.	Imports	Exports.
1922	$155,186	$3,358
1923	194,196	2,488
1924	147,568	19,388
1925	230,681	151,832
1926	257,680	63,754
1927	280,409	57,878
1928	246,426	319,123

FRENCH GUIANA.

AREA, estimated, 32,000 square miles.
POPULATION, census of 1926, 47,341, excluding Indians.
CAPITAL, Cayenne; population, 1926, 13,936.
Governor, M. Juvanon.

French Guiana is on the north coast of South America on the Atlantic Ocean, with Dutch Guiana on the west and Brazil on the east and south. The country has lost heavily in population in the last decade, the census of 1911 returning 49,009 inhabitants. It sends one Deputy to the Chamber at Paris. The colony has a Governor and a Council General of sixteen elected members. France has had a penal colony there since 1885 and in 1926 it cared for 6,500 convicts. Only 8,800 acres are cultivated. Placer gold mining is the most important industry. The product in 1910 was 123,168 ounces, and in 1918, 80,477 ounces. The forests are large and rich in cabinet timber. Imports in 1927 were valued at 61,641,424 francs and exports at 29,769,728 francs. The budget for 1927 showed: Revenue, 11,000,000 francs; expenditures, 10,500,000 francs.

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$398,249	$334,988
1923	350,169	178,963
1924	245,708	150,677
1925	254,346	103,124
1926	150,622	65,635
1927	139,234	45,984
1928	157,551	66,347

OCEANIA—TAHITI, ETC.

AREA, estimated, 1,520 square miles.
POPULATION, census 1921, 31,655, of which 25,569 were natives, 2,656 French, 2,686 other Europeans, and 743 Chinese.
CAPITAL, Papeete, Island of Tahiti; population, 4,601, of whom 2,126 are French.
Governor, M. B. J. V. Siadous, 1928.

The French possessions, widely scattered in the southern Pacific Ocean, were grouped together in 1903 as one homogeneous colony under one Governor, with headquarters at Papeete, Tahiti, one of the Society Islands. The other groups are the Marquesas, the Tuamoti Group, the Leeward Islands, the Gambier, the Tubual, and Rapa Islands.

The chief exports are copra, mother of pearl, vanilla, cocoanuts and oranges.

The budget for 1927 was balanced at 15,167,573 francs. There is no debt but a reserve of 7,000,000 francs.

Imports in 1927 were valued at 50,596,237 francs, and exports at 49,032,248 francs.

Trade of French Oceania with the United States was:

Cal. Year.	Imports.	Exports.
1922	$792,032	$1,407,566
1923	1,044,214	1,456,591
1924	1,214,709	1,745,334
1925	1,215,273	1,870,700
1926	1,011,215	2,337,465
1927	917,150	2,164,202
1928	1,259,436	1,483,482

OCEANIA—NEW CALEDONIA, ETC.

AREA, 7,650 square miles.

POPULATION, census of 1921, 47,505.

CAPITAL, Noumea; population, census of 1921, 10,053.

Governor, M. Guyon, 1925.

France acquired New Caledonia in 1854. Its dependencies are: The Isle of Pines, the Wallis Archipelago, the Loyalty Islands, the Huon Islands, Fortuna and Alofi. A Governor administers the colony, assisted by an elective Council General. France has maintained a penal colony on Nou Island, but no convicts have been sent there since 1896.

Mining is becoming the chief industry, the export of nickel from the blast furnaces in 1925 was 4,400 metric tons, and the export of chrome ore, 20,715 tons, and of manganese, 3,574 tons.

Imports, 1926, 141,746,983 francs; 1927, 154,771,189 francs; exports, 1926, 90,652,759 francs, 1927, 87,195,849 francs. In 1927, 129 vessels of 198,019 tons entered the ports. The local budget for 1927 was balanced at 28,080,437 francs.

The New Hebrides since 1906 have been jointly administered by High Commissioners of Great Britain and France. Their area is about 5,500 square miles and population about 60,000.

GERMANY, REPUBLIC OF

DAS DEUTSCHE REICH

AREA; 185,889 square miles; land area, 180,976 square miles (excluding the Saar, 738).

POPULATION, census of June 16, 1925, 62,348,782 (excluding the Saar, 770,000).

CAPITAL, Berlin; area, 339 square miles (216,891 acres); population, census of 1925, 3,931,071 (with suburbs, 4,013,588).

President, Field Marshal Paul von Hindenburg, born 1847; elected April 26, 1925, for seven years.

Chancellor. Dr. Hermann Mueller, Socialist, June 28, 1928.

Minister of Foreign Affairs, (following death of Gustav Stresemann) Dr. Julius Curtius, People's Party.

Minister of Finance, Dr. Rudolf Hilferding, Socialist.

Minister of Defense, Gen. Wilhelm Groener, Non-partisan.

Minister of the Interior, Dr. Karl Severing, Socialist.

Minister of Justice, Theodore von Guerard, Centrist.

Minister of Communications and Transportation, Adam Stegerwald, Centrist.

Minister of Commerce, Dr. Paul Moldenhauer, People's Party.

Minister of Labor, Rudolf Wissel, Socialist.

Minister for Agriculture, Dr. Hermann Dietrich, Democrat.

Minister of Posts, Dr. G. Schaetzel, Bavarian People's party.

Minister of the Occupied Areas, Joseph Wirth, Centrist.

President of Reichstag, Paul Loebe.

The German Empire, on July 1, 1914, consisted of the Kingdoms of Prussia, Bavaria, Saxony and Wurttemberg; the Grand Duchies of Baden, Hesse, Meeklenburg-Schwerin, Mecklenburg-Strelitz, Saxony and Oldenburg; the Duchies of Brunswick, Saxe-Meiningen, Saxe-Altenburg, Saxe-Coburg, Gotha and Anhalt; the Principalities of Schwarzburg-Sondershausen, Schwarzburg-Rudolstadt, Waldeck, Reuss (Elder line), Reuss (Younger line), Schaumburg-Lippe and Lippe, the Free Cities of Hamburg, Bremen and Lubeck and the Reichsland of Alsace-Lorraine. Its total area was 208,780 square miles and its population, estimated on that date, was 67,812,000. The war cost Germany 27,275 square miles and 6,471,581 in population.

It lost Alsace-Lorraine, returned to France, 5,604 square miles, and 1,874,014 population; Eupen and Malmedy, ceded to Belgium, 386 square miles, and 60,924 population; part of Eastern and Upper Silesia, ceded to Poland, 17,787 square miles, and 3,853,354 population; Memel, ceded to the Allies, 1,057 square miles, and 140,746 population; Danzig, made a free city, 794 square miles, and 330,252 population; Schleswig northern zone, ceded to Denmark by the plebiscite, 1,537 square miles, and 166,895 population; part of Upper Silesia, ceded to Czechoslovakia, 110 square miles, and 45,395 population.

In addition, the Saar Valley, area 738 square miles, population, 1922, 713,100, is under the League of Nations and to be exploited by France for fifteen years, then submitted to plebiscite.

The plebiscite in Upper Silesia, March, 1921, resulted in a majority for retention in the Reich, but, notwithstanding, that territory of 1,255 square miles with a population of 891,669 was annexed to Poland.

The Ruhr, seized and held by France and Belgium under the "sanctions" of the Treaty of Versailles on Jan. 11, 1923, and extended subsequently, is a territory of approximately 965 square miles with 4,000,000 inhabitants. It was evacuated Oct. 14, 1925.

The Conference of Ambassadors, on Nov. 11, 1925, received a satisfactory reply from the German Government on the question of disarmament, and on Nov. 14 announced that the evacuation of the Cologne zone would begin at once. The British troops left Jan. 30, 1926, their soldiers accompanied by 800 German wives. The French evacuated Bonn soon after, and the Belgians Krefield, restoring the north Rhineland zone to Germany. Baron Langwerth von Simmern was appointed Reich Commissioner for the Rhineland.

The Inter-Allied Commission of Military Control, numbering 150 officers, left Berlin on Jan. 31, 1927, leaving the matter of oversight to the League of Nations. During the seven years of its control, 33,000 inspection trips were made and the Commission had ordered the destruction of 54,000 guns, 100,000 machine-guns, 14,000 airplanes, 27,000 aircraft engines, 174,000 gas-masks, 588,000,000 rounds of small ammunition, 39,000,000 shells and mines, 36,700 tons of gunpowder, 6,000,000 small arms, 28,469 mine-throwers, and 59,000,000 fuses.

An agreement had been reached on "regulation of the manufacture and export of munitions by the Reich," and for the destruction of 34 of the 88 concrete gun emplacements built around Koenigsburg and Custrin which was completed in May.

STATES AND PROVINCES.

Germany (Deutsches Reich), now a federation of republics in Central Europe, is bounded on the north by the North Sea, Denmark and the Baltic Sea, on the east by Poland, Czechoslovakia and Austria, on the south by Czechoslovakia, Austria and Switzerland, and on the west by France, Luxemburg, Belgium, Holland and the North Sea.

The states of the Reich, with the Provinces of Prussia and Bavaria enumerated under each, with their land area and populations as returned by the census of June 16, 1925, are:

States of the Reich.	*Land Area Sq. Miles.*	*Pop. in 1925.*
Prussia (Free State)	113,033	38,109,922
East Prussia	14,804	2,258,324
Greater Berlin	339	4,013,583
Brandenburg	15,072	2,538,688
Pomerania	11,663	1,877,324
Border Province (Grenzmark, Posen, West Prussia)	2,971	332,443
Lower Silesia	10,276	3,126,273
Upper Silesia	3,746	1,377,330
Saxony	9,753	3,279,145
Schleswig-Holstein	5,815	1,518,164
Hanover	14,897	3,188,086
Westphalia	7,806	4,319,061
Hesse-Nassau	6,063	2,383,799
Rhineland (excluding Saar)	9,474	7,221,675
Waldeck	503	55,750
Hohenzollern	441	71,773
Bavaria (Free State)	29,334	7,379,594
Upper Bavaria	6,437	1,684,766
Lower Bavaria	4,148	755,769
Palatinate (Exc. Saar)	2,124	931,775
Upper Palatinate (Oberpfalz)	3,726	629,262

Upper Franconia	2,898	757,515
Middle Franconia	2,935	998,386
Lower Franconia	3,260	762,744
Suabia	3,307	859,397
Saxony (Free State)	5,789	4,990,138
Wurttemberg (People's State)	7,532	2,579,453
Baden (Republic)	5,819	2,312,462
Thuringia (Federated State)	4,527	1,609,300
Hesse (People's State)	2,970	1,347,295
Hamburg (Free & Hanse State)	160	1,152,489
Mecklenburg-Schwerin (Fr. St.)	5,069	674,411
Oldenburg (Free State)	2,480	545,749
Brunswick (Free State)	1,418	501,675
Anhalt (Free State)	888	351,485
Bremen (Free Hanse State)	99	338,846
Lippe (Free State)	469	163,577
Lubeck (Free and Hanse State)	115	127,971
Mecklenburg-Strelitz (Fr. St.)	1,131	110,371
Schaumberg-Lippe (Free State)	131	48,044
Total—German Reich	180,976	62,348,782
German territory occupied by the Allies:		
Saar Basin	738	770,000
Complete total	181,714	63,118,782

The Free State of Waldeck was annexed to Prussia April 1, 1929.

GERMAN CITIES.

Germany has forty-six cities with over 100,000 inhabitants and forty-six between 50,000 and 100,000. The population of those over 100,000, by the census of June 16, 1925, was:

Berlin	4,013,588	Barmen	187,239
Hamburg	1,079,092	Altona	185,135
Cologne	698,064	Cassel	171,483
Munich	680,704	Elberfeld	167,025
Leipzig	679,159	Augsburg	165,522
Dresden	619,157	Bochum	156,762
Breslau	554,801	Aachen	155,222
Essen	468,696	Braunschweig	146,654
Frankfort-A-M.	461,849	Karlsruhe	145,694
Dusseldorf	431,096	Erfurt	134,973
Hanover	422,435	Crefeld	130,425
Nurnberg	392,494	Mulheim-A.-R.	127,195
Stuttgart	341,461	Hamborn	126,043
Chemnitz	333,851	Lubeck	120,788
Dortmund	320,256	Munchen Gladbach	115,066
Bremen	294,966	Plauen	111,398
Magdeburg	292,296	Mainz	108,552
Konigsberg	279,880	Munster	105,889
Duisburg	271,790	Oberhausen	105,121
Stettin	253,727	Wiesbaden	102,557
Mannheim	247,486	Ludwigshafen	101,869
Kiel	213,587		
Gelsenkirchen	207,153		
Halle-on-Saale	193,722	Saarbrucken	125,800

The climate of Germany is quite mild in summer and rather cold in winter, as in all western Europe. Its soil is not naturally fertile, being largely a glacial plain over which the action of the ice moved much sand; it has always demanded unusual artificial fertilization. The land naturally was heavily wooded, there being in the country about 112,000,000 acres, of which 31,769,686 acres were forested in 1922. Forestry is far advanced, perhaps more perfected as a science than in any other country. The Black Forest of Germany is famed for its timber and as a resort. The highest mountains are the Bavarian Alps in the south. The northern part is a plane sloping to the north and west.

NATIONAL WEALTH.

The national wealth of Germany on July 1, 1924, is estimated by the Bankers' Trust Company as approximately $55,000,000,000; the accepted pre-war estimate of Dr. Karl Helfferich was $73,000,000,000. The German Statistical Bureau in May 30, 1926, estimated the national wealth as between 52 and 60 billion marks.

Just before the World War there were, it is estimated, 15,547 mark millionaires in Germany. After deflation in 1923, the number was 3,917, but in 1928 that figure had been doubled. The former Emperor William is still the richest man, his wealth being placed at 430 million marks (about $103,200,000) of which roughly 200 million marks is in landed property including 81 castles. Frau Bertha Krupp von Bohlen is credited with more than $72,000,000, and Fritz Thyssen with an income of $720,000.

A correspondent of the London Economist figures that Germany lost 2,000,000 men in the World War, of which 25 per cent. were between the ages of 19 and 22, and 60 per cent. between the ages of 19 and 29; that 800,000 civilians died for lack of food; and that there was a decrease in births amounting to 3,500,000. The birth rate per thousand was 28.3 in 1913; 14.4 in 1917; 25.4 in 1922; 20.4 in 1925, 21.5 in 1926; and 18.3 in 1927. The death rate in 1925 was 11.9; 12.6 in 1926; and 11.9 in 1927. In the large cities in 1926 the birth rate was 14.7 and the death rate 10.8. The average duration of life is now 60 years, or 10 years more than before the war, according to the Statistical Bureau.

Pensions of one kind or another amount to $425,000,000 out of a budget of ab ut $2,000,000,000. The pension load is 70 per cent of all payments, including reparations, which Germany is making for losing the war. Of those pensioned, 768,660 are disabled soldiers, 370,981 war widows, 917,000 war orphans, 256,126 parents of war dead; also on the pension list are 31,000 widows of government officials, and 8,700 orphans; and in addition 36,900 army and navy officers of the old regime are drawing pensions and over 57,000 former civilian officials. The maximum amount of a pension was reduced to 12,000 marks a year by a law passed Feb. 19, 1929.

Germany has freedom of religious worship, and there is no state church. The census of 1925 returned Lutherans, 40,014,677 (64%); other Protestants, 87,580; Catholics, 20,193,334 (32%); Jews, 564,379 (.9%); other unclassified, 1,550,649.

The 1927 school census returned 52,320 public elementary schools, with 137,124 male and 43,149 female teachers, and 6,629,879 pupils. There were also 675 private schools with 35,584 pupils. There were 1,342 secondary schools for boys with 25,128 teachers and 453,229 pupils, and 823 high schools for girls with 14,831 teachers and 299,190 pupils. There were ten technical high schools with 1,923 teachers and 20,927 pupils in 1927.

There were, in 1927, 46 professional schools with about 15,000 students. There are 23 universities, with 5,175 professors and teachers in 1927, and 72,139 students; 65,024 in 1926.

Before the war Germany had a virtual monopoly of potash for the world. The return to France of Alsace-Lorraine divided the potash territory. Production in 1928 was 1,421,400 metric tons; in 1927, 1,239,406 tons; 1926, 1,099,872 tons; 1925, 1,202,957 tons; 1924, 809,112 tons; and 1923, 1,130,761 tons.

Industrial development in Germany is not only far advanced but also extremely diversified. The necessity of buying about half of the food consumed compelled large development of industry and mining, with effort to sell products in all foreign markets. Germany's pre-war foreign trade assumed large proportions and was growing rapidly.

At the end of October, 1926, there were in Germany 12,392 stock companies with an aggregate capital of 20,354,000,000 marks. Of that number, 1,967 companies with total capital resources of 13,242,000,000 marks were amalgamated in large concerns, which now includes 65% of all stock capital in Germany.

FOUNDING OF THE REPUBLIC.

Two days before the armistice, that is, on Nov. 9, 1918, the abdication of the German Emperor, William II., was announced. He had fled to Holland, where he has since been living under Dutch surveillance at Doorn. The self-constituted Council of People's Commissioners took over the Government and declared the existing Imperial Parliament dissolved and proclaimed the republic. The reigning Princes of the Federal states were either deposed or abdicated. A call was issued for the election of a National Assembly. Elections, at which all Germans, men and women over twenty years of age, voted, were held in January, 1919. The composition of the National Assembly thus chosen was: Majority Socialists, 165; Centre (Catholic) Party, 90; Democrats, 75; Conservatives, 42; Independent Socialists, 22; German People's Party, 22; scattering, 7; total 423. It met at Weimar, Feb. 6, 1919, and elected Friedrich Ebert President of the republic on February 11. His term was extended to June 30, 1925.

The National Assembly adopted a Constitution July 31, 1919. It was promulgated Aug. 11, celebrated as Constitution Day. Foreign relations defense, customs, taxation, and railway service are declared Federal matters; each component state must have a republican Constitution; universal suffrage, secret ballot, and proportional representation are provided for. Freedom of speech, of the press and of assembly is guaranteed. The Cabinet, appointed by the President, must have the confidence of the Reichstag. The Reichsrat consists of 66 members (Prussia 26, Bavaria 10, Saxony 7, Wurttemberg 4, Baden 3, and other states 16.)

In 1920 the German states surrendered to the Berlin Central Government the right to control direct taxes, hitherto held jealously by the several states. Increases of the direct tax rates followed, income taxes rising 50 per cent.

The President of the Republic is Field Marshal Paul von Hindenburg. Friedrich Ebert, the first President of the Reich, who was elected on Feb. 11, 1919, died following an operation for appendicitis on Feb. 28, 1925. Dr. Walter Simons was elected President ad interim by the Reichstag and a general election called for Mar. 29. This election was inconclusive, no candidate receiving a majority of the 26,856,002 votes cast, about 69 per cent of the qualified electorate. More than 21,000,000 German women have the right to vote and a little less than

19,000,000 men. The second election, held on April 26, resulted as follows: Field Marshal Paul von Hindenburg, 14,655,766; Dr. Karl Marx (Centre), 13,751,615; Ernst Thaelmann (Communist), 1,931,151; scattering, 13,146; total, 30,351,948. Hindenburg's plurality, 904,151.

The present Reichstag was elected for four years on May 20, 1928. The composition is: Socialists, 152; Nationalists, 73; Centrists (Catholic), 61; Communists, 54; People's Party, 45; Democrats, 25; Economic League, 23; Bavarian People's Party, 17; Christian Nationalist Peasants, 13; Fascists, 12; German Peasants, 8; Land League; 3; People's Rights, 2; Saxon Peasants, 2; Total 490. The total vote was about 30,500,000 of which the Socialists polled over 9,000,000, gaining 21 seats, and the Communists about 3,500,000, chiefly in Berlin, gaining 9 seats. The Nationalists lost 38 seats. In Berlin 1,310,011 women voted and 1,171,127 men. Thirty parties took the hazard of the polls. Chancellor Marx resigned on the opening of the Reichstag, June 12, 1928. Dr. Hermann Mueller, leader of the Socialist and a former Chancellor, was made Chancellor and completed his "Ministry of Personages" on June 28.

A commercial treaty with France went into effect Sept. 7, 1927. It is expected to greatly improve trade as the Germany exports to France were then only 34% of pre-war figures, and French exports to Germany only 63%. A commercial treaty with Japan was signed July 30, 1927.

The Tariff law of August, 1925, which put duties on food and heavily increased the duties on automobiles, typewriters, cash registers, calculating machines, and other similar products, expired on July 31, 1927, and was prolonged until January, 1930, with an increase of the duty on sugar of 150%, on potatoes, 100%, and on pork, 50%. German postal rates were increased by an average of 50% on Aug. 1, 1927.

A bill for local option in control of the liquor trade was introduced in the Reichstag in 1923. It came to a vote in 1925 and was rejected by 200 to 168; again introduced it was rejected by 191 to 164, again introduced and was rejected on May 11, 1926, by a vote of 24 to 163. The Socialists and Communists gave it their united party support.

FINANCIAL TROUBLES.

The financial, economic and industrial catastrophe that Germany faced with the occupation of the Ruhr, in January, 1923, reached its ultimate crisis in September, 1923, with the utter collapse of the mark, widespread unemployment and despair, producing a state bordering on social revolution. The paper mark reached an incredible depth and the output of paper currency reached its peak in December at this figure—496,507,424,771,973,774,000 paper marks.

The provisional gold mark budget for 1924-25, following the inflation period, as prepared for the London Conference where the Dawes's plan was worked out, was balanced at 5,274 million gold marks but with a special expenditure of 640 million marks for execution of the Versailles Treaty.

The revenue for 1924-25 was 7,713 million marks, the estimate having been 5,243 million; expenditures reached 6,664 million marks as compared with the budget's estimate of 5,710 million. Federal expenditures amounted to 3,057 million out of the total; provincial expenditures to 2,629 million; indemnities to Ruhr industrialists on account of the occupation of the Ruhr, to 518 million, and for reparation account to 460 million marks. The gross surplus remaining over expenditures amounted to 1,049 million marks.

The budget for 1925-26 was: Revenue, Rm.7,348,689,187; expenditures, Rm.7,419,538,859. The actual receipts were Rm.7,178,271,705 and actual expenditures, Rm.7,641,602,096. The deficit of Rm.462,000,000 is deceptive as certain items in fact belonged to the previous year and were paid out of that year's surplus of Rm.659,000,000. Reparation payments were Rm.299,000,000.

The total Federal, State and Municipal tax collections in the fiscal year 1925-26 were 10,101,000,000 marks, or 161.85 marks per capita. Corresponding figures in 1913 were 4,059,000,000 marks, and 70.21 marks per capita.

The ordinary budget for 1926-27 was balanced at Rm.7,326,081,455. There was also an extraordinary budget balanced at Rm.300,696,957, of which Rm.293,824,650 on the revenue side was from loans; and of the expenditure Rm.69,859,000 was a contribution of reparation, and Rm.104,166,667 was also for reparation payments; there was also an item of Rm.496,166,666 in the ordinary budget for reparations.

Final figures for the budget of 1927-28 showed: Ordinary—Revenue, Rm.10,277,600,000; expenditures, Rm.10,231,100,000; Extraordinary—Revenue, Rm.216,300,000; expenditures, R1,121,300,000.

The budget estimate for 1928-29 was: Ordinary—Revenue, Rm.9,563,331,000; expenditures, Rm.9,563,331,000. Extraordinary—Revenues, Rm.146,295,000; expenditures, Rm.142,595,000. The total receipts from taxation during the fiscal year amounted to Rm.9,023,000,000.

The budget for 1929-30 was balanced at Rm.10,079,148,000 ($2,398,837,000).

The National Debt as of March 31, 1929 was: Foreign, Rm.877,100,000; internal Rm.8,072,000,000, total, Rm.8,949,900,000 ($2,130,100,000).

The Union of German Cities (those whose population exceeds 25,000) had a total debt on June 30 1928 of Rm.2,466.8 million.

The Reichsmark (=23.82 cents) has fluctuated but slightly since 1924.

The Reichsbank on July 31, 1929 had gold reserves at home amounting to Rm.2,148 million, and gold reserves abroad amounting to Rm.334 million; its note circulation was Rm.4,727 million and rentenmarks, Rm.432 million, having a gold cover of about 48%. Its capital is Rm.300 million of which Rm.122,788,100 are paid in. The total turnover in 1928 was Rm.819,900 million.

The merger on Sept. 25, 1929 of the Deutsche Bank and the Disconto Gesellschaft with a combined capital of Rm.285 million, total resources of Rm.445 million and total deposits of Rm.4,300 million brought the new bank with its 300 branches the leadership in the German banking world.

Savings banks deposits rose from Rm.1,629 million Dec. 31, 1925 to Rm.3,381 million in Jan., 1927, to Rm.5,094 million in Jan., 1928, and to Rm.8,500 million, Sept. 30, 1929.

From 1914 to June 30, 1929, a study issued by the United States Department of Commerce says, reveals 168 bond and stock issues were publicly offered in the United States, the new nominal capital obtained from the sale of these securities amounting to $1,179,000,000. Of these, only seven, totaling about $20,500,000, were sold prior to October, 1924. During the earlier period, many more millions of American capital were invested in German securities and properties but these investments were not publicly offered.

German borrowings in the United States during 1924 amounted to $118,000,000, while for the four calendar years following they ranged from $220,000,000 to $295,000,000 annually.

German governmental loans amounting to about $383,000,000 account for slightly less than one-third of the total German borrowing in the American market during that period. The Central Government, with only three loans, including the $110,000,000 Dawes Loan of 1924 and two $10,000,000 issues of 1915 and 1916, respectively, received the largest portion obtained by any governmental entity. Seven different German States and Provinces obtained funds in the American market to a total of $121,000,000. Bavaria, with three loans totaling $43,000,000, was the heaviest borrower. German municipal loans had a total par value of about $132,000,000, representing loans to 13 individual cities and to four groups of cities.

The par value of publicly offered German corporate loans purchased in the American market to June, 1929 amounted to about $813,000,000, or over two-thirds the total German financing in this market. Of this total, $796,000,000 was no capital. Banking and credit companies were the heaviest borrowers among German corporations, receiving a total of about $251,000,000. German public utilities were a close second, obtaining a total of new capital of about $231,000,000. The iron and steel industry and the electrical equipment manufacturers also borrowed heavily, their respective totals being $113,000,000 and $61,000,000.

The fifth year of the Dawes' Reparation Plan ended on August 31, 1929, with the German obligations again promptly met. (For the Dawes' Plan see The World Almanac for 1925, pages 173-75; the Almanac for 1926, pages 169-70; the Almanac for 1927, page 181; the Almanac for 1928, page 183; and the Almanac for 1929, page 158. For the financial rehabilitation of Germany see The World Almanac for 1927, pages 622-24; for 1928, pages 621-22; and for 1929, pages 620-21. For the Young Reparation Plan consult Index.)

The German Railways Company (Deutsche Reichsbahn) organized by the Dawes's Commission, is the largest railroad system in the world, comprising 30,000 miles of track, and employs more than 700,000 men. It has Rm.881,000,000 preferred stock followed by Rm.13,000,000,000 common stock owned by the German Government. Prior obligations consist of Rm.11,000,000,000 5 per cent. Bonds held in trust for the Allied Governments, and an obligation imposed by the Dawes Commission to set aside annually out of the gross income a reserve of 2 per cent. until this fund totals Rm.500,000,000. The balance sheet of the company for 1927 showed operating revenue 5,039,269,222 marks, operating expenditure, 3,437,837,013; replacements, 720,926,556; surplus, 880,505,654; net profit, 234,830,875. Passengers carried

numbered 1,923,700,000 in 1927 (1,819,400,000 in 1926). The railroad by permission of the Arbitration Board raised freight rates 11% on Oct. 1, 1928, as was recommended by Reparations Agent Gilbert, though refused by the Cabinet. Dr. Julius Dorpmueller was elected Director General in June 1926.

According to the Treaty of Versailles, the strength of the German Army after March 1, 1920, was reduced to seven divisions of infantry and six divisions of cavalry, total strength, 100,000. Germany received permission from the Allies in January, 1921, to organize a "security police" (called Schupo) of 150,000 men. Conscription was forbidden and the men enlist for a period of 12 years. Lt. Gen. Wilhelm Heye commands the Reichswehr.

The navy under the Versailles treaty is purely a coast defense force and recruited on a volunteer basis. The fleet consists of 8 pre-war dreadnoughts of about 13,000 tons and all over 20 years old; 7 old light cruisers and one new one, the Emden, completed in 1925; 26 old destroyers, and 6 launched in 1926 to replace worn out vessels. No submarines are allowed. The personnel may not exceed 15,000 men. The construction of a 9,000-ton cruiser at a cost of 80 million marks was authorized by the Reichstag in April, 1928, and ordered by the Cabinet. It will have Diesel motors of 50,000 horsepower and 6 11-inch guns with a range of 15 miles. The speed is 26 knots.

IRON, STEEL AND COAL.

Previous to the disorganization of the German iron and steel industry by the occupation of the Ruhr, the manufacturers had profited from the inflation boom, which gave them extremely low production costs. In 1923 they were cut off from unoccupied Germany as well as from their foreign markets. Production of pig iron was; 1928, 11,804,330 metric tons; 1927, 13,102,582 tons; 1926, 9,643,519 tons; 1925, 10,177,000 tons; 1924, 7,812,000 tons; ingot steel, 1928, 13,310,000 tons; 1927, 16,305,000 tons; 1926, 12,342,000 tons; 1925, 12,193,000 tons; 1924, 19,835,000 tons; finished steel, 1928, 11,562,590 tons; 1927, 12,866,773 tons; 1926, 10,276,000 tons; 1925, 10,246,000 tons; 1924, 8,174,000 tons.

Germany lost 75.4 per cent. of the Upper Silesia output to Poland in May, 1922. The Saar Basin is forfeited to France for fifteen years more; the Lorraine fields are absolutely lost to France, Aix-la-Chapelle is in the territory occupied by Belgium.

Germany was forced to import 12,500,000 tons of coal in 1922 and 25,000,000 in 1923. In 1927, imports totaled 5,334,000 tons of which Great Britain furnished 3,267,000 and the Saar 1,167,000.

The output of coal was: 1928, 150,875,814 metric tons; and 1927, 153,595,443 tons; lignite, 1928, 166,224,159 tons; and 1927, 150,852,985 tons. The Ruhr mines employ an average of 880,000 miners and produce about 80% of the coal. Exports of hard coal and lignite (converted in terms of hard coal) amounted to 157,400,000 metric tons in 1928 and reparation deliveries to 10,263,000 tons of coal 72 000 tons of coal briquets, 3,926,000 tons of coke, and 437,000 tons of lignite briquets. Some petroleum is produced in Hanover, 96,883 metric tons in 1927.

To avoid the bitter competition which threatened ruin to the new steel industry of France and the reorganized steel interests of Germany, an international steel combine was formed by the big industrialists in September, 1926. By agreement, the annual output of the steel syndicate will have a minimum of 26,000,000 tons and a maximum of 30,000,000, to be apportioned among the members according to the following percentages: Germany, 43.50; France, 31.19; Belgium, 11.56; Luxemburg, 8.55; and Saar Valley, 5.20. These percentages are to be observed as closely as possible. For every ton of steel manufactured within the allotted quota each country is to deposit $1.00 in a common fund. In case a country fails in any one year to produce its alloted percentage of the total minimum of 26,000,000 tons, $2.00 per ton will be refunded of it. Invitation was extended to the British steel industry but it was unwilling to join.

Production in 1928 was: Germany, 14,500,000 metric tons (1,700,000 tons more than her allotment); France, 9,387,000 tons; Belgium, 3,821,000 tons; and Luxemburg, 2,571,000 tons. Production for 1929 was fixed on March 14 at 29,587,000 tons.

The Czechoslovakian, Austrian and Hungarian steel makers joined the Combine Dec. 11, on an annual quota of 2,000,000 metric tons of steel on a basis of 70%, 20% and 10% respectively. The Yugo-Slavian interests joined in 1927.

The United Steel Works, Germany's largest trust, began operations on May 14. The Thyssen, Phoenix, Rheinstahl and Deutsch Luxemburg steel works were joined to form the combine, which controls sixty-five furnaces and which can produce annually 3,700,000 tons of steel, 2,500,000 tons of pig-iron, 3,000,000 tons of coke and 30,000,000 tons of coal. Its capital is Rm.800,000,000 (about $200,000,000). Dr. Fritz Thyssen, son of the late August Thyssen, is Chairman of the Board of Directors.

Even larger, and the largest corporation in Europe is the "chemical syndicate," the I. G. Farbenindustrie A. G., which has just raised its capital to Rm. 1,100,000,000 (about $262,000,000). This covers practically the whole field of chemical industries and contemplates great development in fertilizers, motor fuels and other new lines. Net profits in 1926 were Rm.68,718,000. Germany's chemical exports in 1927 were valued at $310,664,970, and in 1928, $331,000,000.

The German textile industry according to the official census of 1926 had 10,417,000 spindles with an addition of 1,131,000 twisting spindles. Imports of all classes of cotton was 2,103,613 bales in 1927 and 1,466,000 bales in 1926. Shipments from America were 1,769,413 bales in 1927 and 1,243,887 in 1926. Germany in 1927 had 4,293 textile establishments employing over 50 hands; the total number of employees was 913,149 and the amount of primary horsepower used was 1,168,483.

UNEMPLOYMENT.

According to the industrial census of June 16, 1925, there were in Germany 1,842,913 industrial establishments, employing 12,482,442 workpeople, (9,609,629 males, being 77% of the total, and 2,872,813 females, being 23% of the total).

Although Germany lost in the World War 2,000,000 men, that loss has now (1928) been made up, says the Statistical Bureau which estimated that in 1927 the number of wage earners was 14,400,000 (of which 4,800,000 are women), an increase of 3,000,000 over 1807, the last labor census of this kind.

When the Ruhr was cut off unemployment increased greatly. The number of unemployed in unoccupied Germany in receipt of doles, April 1, 1923 was 222,410. By Oct. 1, with the collapse of the mark, the number had risen to 534,360, with 1,158,061 short time workers also receiving doles. On Nov. 1, the numbers were 954,664 and 1,719,738 respectively, and the highest figures were reached Dec. 1, with a total of unemployed and short time workers of 3,264,285, and the number of dependents of unemployed in receipt of doles was 1,449,738. At the same time there were estimated to be not less than 2,500,000 unemployed and short time workers in the occupied territories, making a total for Germany of 5,700,000, with about 2,400,000 dependents for the whole of Germany, so that the number receiving doles was 8,100,000 throughout the winter.

With improved conditions the number unemployed receiving doles was 475,000 on April 15, 1924, 588,000 on Aug. 1, 426,000 on Nov. 15, 591,667 on Feb. 1, 1925; 321,000 on May 1. Low mark was reached in midsummer, Aug. 1, 197,248; Nov. 1, 363,961; Feb. 1, 1926, 2,031,000; May 1, 1,782,000, July 1, 1,743,000; Nov. 1, 1,340,000; March 15, 1927, 1,438,000; July 1, 493,000; Oct. 15, 329,000; Jan. 1, 1928, 1,446,000; June 15, 598,000; Aug. 1, 564,000; Dec. 1, 1,030,000;aMay 1, 1929, 1,136,000; Aug. 1, 710,000. The cost of the dole in 1927 was 906,300,000 marks, and in 1926, 1,226,900,000 marks.

A new unemployment insurance law went into effect Oct. 1, 1927. By Jan. 1, 1928, the average number of workers contributing was 15,810,000 and the average number in receipt of unemployment relief or employed in relief work was 780,000. The average monthly payment per insured person was 4.02 marks. The receipts from insured persons and their employers during the first three months was 190 million marks, and emergency relief contributed by state and local authorities 33 million marks; expenditure was 146 million marks. In 1928 receipts amounted to 852 million marks, and expenditures totaled 914.4 million marks.

The cost of living during 1927 increased from an index average of 144.6 in January to 151.3 in December (1913 equals 100). The December index was the highest of the year; the average general index for 1926 was 141.2.

Emigration figures are: In 1913, 25,800; 1921, 23,451; 1922, 36,527; 1923, 115,416; 1924, 58,328; 1925, 62,828; 1926, 65,281; and 1927, 60,789.

The eight-hour day established by the so-called demobilizadecres of Nov. 22 and Dec. 1, 1918, and March 18, 1919, lapsed on Nov. 17, 1923, and were replaced by a decree of Dec. 21, in force Jan. 1, 1924, which re-established the eight-hour day, but with many exceptions. Many industrial battles had been fought, but all were short and ended in the defeat of labor. Government employees were put on a nine-hour day.

The Reichstag in 1926 created Labor Courts with jurisdiction for all disputes, individual or collective.

which were placed under State jurisdiction in each State. One employer and one employee will sit as assessors with the judges who may be non-professional.

The trades unions have made great strides since the war. The membership of the 35 national unions affiliated with the German Federation of Labor on Jan. 1, 1929 was 4,869,782, as compared with 8,068,935 on Sept. 1, 1922, and 3,500,000 in 1924. Receipts for 1928 were estimated at 200 million marks.

AGRICULTURE.

The areas under cultivation are still considerably less than in 1913. Production per acre decreased, due, it is believed, to a lessened use of fertilizers owing to the high prices. The census for farm stock in Dec. 1927, returned: Horses, 3,805,500; cattle, 17,989,900; pigs, 22,880,300; sheep, 3,813,400; goats, 3,217,800; geese, 5,481,300; ducks, 2,563,000; chickens, 71,033,100; and beehives, 1,630,400.

The harvest in 1928 was: Wheat, 3,464,000 metric tons from 4,326 800 acres; rye 7,935,000 tons from 11,613,272 acres; barley, 3,347,000 tons from 3,793,795 acres; oats, 6,996,500 tons from 8,783,595 acres; sugar beets, 11,011,000 tons from 1,058,160 acres; potatoes, 41,269,000 tons; and hay, all kinds, about 35,000,000 tons.

The output of beet sugar from the 250 factories in 1928 was 1,354,017 metric tons; and in 1927, 1,675,279 tons.

There were in 1928, 51,556,972 acres of arable land, 20,165,876 acres of grass, meadows and pastures, and 204,575 acres of vineyards. Production of wine in 1927 was 31,407,618 gallons.

The number of farms or agricultural inclosures of all kinds and acreage was:

Size of Farms.	No.	Acreage.
Under 5 acres	3,378,509	4,276,338
5 to 12.5 acres	1,006,277	8,163,049
12.5 to 100 acres	1,065,539	25,741,263
100 to 250 acres	262,191	23,025,549
250 to 1,250 acres	20,068	11,122,813
1,250 to 2,500 acres	3,129	5,073,039
Over 2,500 acres	369	1,229,993

The farms gave employment to 13,191,480.

Germany's agricultural co-operative societies had, on July 1, 1923, a total strength of 37,430, with a membership of 4,652,125 farmers. Although agricultural co-operation in Germany has had no phenomenal growth, it has increased since 1895 at a healthy and fairly constant rate. German agricultural co-operatives are united in thirteen major associations, the most important of which is the Federal Association of German Agricultural Co-operatives, with a membership of thirty-three state and provincial associations composed of 19,863 co-operatives with a turnover in 1921 of 181,000,000,000 marks.

Beer brewed in 1925 by 2,511 breweries with capacity exceeding 500 hectolitres, amounted to 47,560,000 hectolitres (1,255,584,000 U. S. gallons).

Germany's merchant marine has grown from the 600,000 tons, to which it was reduced, by the execution of the Versailles Treaty, to 4,057,657 gross tons, as of July 1, 1929, and of its ships 40% are less than six years old; of these 1,704 of 3,457,878 tons are steamships, and 401 of 589,799 tons are motorships. The Hamburg-American Line which before the war had 1,001,865 gross tonnage, now has 879,000, and the North German Lloyd which had in 1913, 815,535, now has 613,000 (1927).

The North German Lloyd Steamship Co. in 1928 launched sister ocean liners, at Hamburg on August 15 the Europa christened by the American Ambassador Dr. J. G. Schurman, and at Bremen on August 16 the Bremen christened by President von Hindenburg. Each is of 46,000 tonnage, 938 feet long, exceeding by 25 any steamship now afloat, and has accommodations for 2,200 passengers and a crew of 1,000. They are oil burners with four turbines. The Bremen, on her maiden voyage, clipped 9 hours off the Atlantic record.

In 1927 there entered German ports 85,971 vessels of 39,912,470 tonnage.

The port of Hamburg set a new record in 1927 when 16,332 ocean going vessels of 19,749,000 net tonnage entered the port as against 14,778 vessels of 17,428,000 tons in 1926. Hamburg passed Rotterdam and became the second port in the world in 1928, when 17,268 vessels of 21,448,203 gross tons entered. Through the Kiel Canal there passed in transit in 1928, 54,102 vessels of 20,308,000 net tons of which 27,171 were steamers and motor ships of 18,533,000 net tons.

FOREIGN TRADE.

In 1913 Germany's foreign trade formed 13.3% of the world's commerce; and in 1927 it had so far recovered as to reach 10.8%.

Trade for the last six years, in gold marks, including gold and silver, was:

	Imports.	Exports.
1923	6,081,391,000	6,079,154,000
1924	9,316,841,000	6,586,854,000
1925	13,146,000,000	8,838,000,000
1926	10,566,200,000	9,854,000,000
1927	14,142,900,000	10,797,100,000
1928	14,045,400,000	12,052,900,000

Trade with the United States was:

	Imports.	Exports.
1922	$316,113,877	$117,497,692
1923	272,131,786	149,612,687
1924	281,663,972	147,636,972
1925	470,344,233	164,250,508
1926	364,161,630	198,494,641
1927	481,680,921	200,554,291
1928	467,205,408	221,978,785

GREECE, REPUBLIC OF

THE HELLENIC STATE.

AREA, 49,022 square miles—Old Greece (1912), 25,223 square miles; territory added by the Balkan wars—Macedonia, Epirus, and the Aegean Islands—20,617 square miles; territory added by Lausanne Treaty, 3,182 square miles.

POPULATION, census of 1920, 5,447,077; divided, Old Greece, 2,800,164; new territories—Macedonia, 1,144,310; Epirus, 213,276; Crete and six other Aegean Islands, 619,630—total, 2,646,913. Official estimate May 16, 1928, 6,204,684.

CAPITAL, Athens; population, May 16, 1928, estimate, 452,919; Salonica (1925) 236,524; The Piraeus, 251,328; Patras, 61,278.

President (*Provisional*), Admiral Paul Koundouriotis.

Premier, Elentherios Venizelos, (Liberal) July 3, 1928.

Minister for Foreign Affairs, Andrew Michalakopoulos.

Greece occupies the southern peninsula of the Balkans, stretching down into the Mediterranean Sea, with the Ionian Sea on the west and the Aegean Sea on the east. On the northwest lies Albania, on the north Yugo-Slavia and Bulgaria, and on the northeast Turkey. It is about the size of New York State. The Indus Mountains, with many spurs, a continuation of the Balkans, runs through the country from north to south. Gulfs and bays are many, the Gulf of Corinth, connected by four mile canal (opened Nov. 9, 1893) with the Gulf of Aegina, practically cuts off the Peloponnesus from Attica and the northern part of the country.

The authentic history of Greece begins in 776 B. C. and it obtained its greatest glory and power in the fifth century B. C. It became a province of the Roman Empire in 46 B. C., of the Byzantine Empire 395 A. D., and was conquered by the Turks in 1456. Greece won its war of independence in 1821-29 and became a kingdom under the guarantee of Great Britain, France and Russia.

In 1912 Greece consisted of continental Greece and Peloponnesus, the island of Euboea, the Cyclades in the Aegean Sea (about 220 in number), the Sporades in the Aegean, and the islands in the Ionian Sea (Corfu, Zante, and others). The area was 25,223 square miles and the population of this territory in 1920 was 2,800,164. The Balkan wars (with Turkey, Oct. 17, 1912, to May 30, 1913, and with Bulgaria, June 30, to Aug. 10, 1913), added 20,617 square miles to her territory and 2,646,913 people, making the total area of Greece 41,933 square miles and the total population 5,447,077. This new territory consisted of Macedonia (pop., 1920, 1,144,310); Epirus (213,276); the Aegean Islands—Crete (345,149); Mytilene (146,852); Samos (65,756); and Chios (61,873).

By the Lausanne Treaty (1923) 3,182 square miles were added. In the exchange of nationals with Turkey it is estimated the population of Greece increased 1,136,000 by refugees who were largely settled in Macedonia and Thessaly.

As a result of the great war under the ill-fated and never ratified Treaty of Sevres, 1920, Greece obtained Western and Eastern Thrace, which stretched along the northwestern shore of the Dardanelles and the Sea of Marmora as far as the Bosphorus, Turkey being expelled from all except Constantinople and a triangular district, thirty by forty miles, about it. The Straits were placed under Allied control, the European shore to be under Greek sovereignty, but a neutral zone being established nine miles inland.

Part of the west coast of Asia Minor, of which Smyrna was the chief city and port, was also given by the treaty to Greece for administration, though under Turkish sovereignty. Greece also received the whole coastline of the Aegean Sea and the land back to the crest of the Rhodopian Mountains on the Bulgarian frontier.

As a result of the defeat of the Greek Army by

Mustapha Kemal in September, 1922, Greece was driven out of Asia Minor and Thrace. This was confirmed by the Treaty of Lausanne, which gave back to Turkey Eastern Thrace and Adrianople as far as the Maritza River from Adrianople to Enos on the Aegean. The Greek inhabitants were driven out of Turkey and for five months in 1922-23 the American Red Cross alone cared for 868,000 refugees, and the Near East Relief for thousands of others. Refugees from Constantinople alone in 1924 numbered 36,625. It is estimated that 1,500,000 Greeks were expelled from Turkey, the care of most of these refugees—largely penniless—was taken up by the League of Nations Settlement Committee, headed by ex-United States Ambassador Henry Morgenthau.

The Dodecanese Islands, off the Asia Minor coast (population, 100,187 in 1917), had been seized by Italy during her war with Turkey over Tripoli in 1912, though then claimed by Greece, whose claim was recognized by the powers. Italy has spent much money in developing the port of Rhodes.

Imbros and Tenedos, which commanded the entrance to the Dardanelles, had been occupied by Great Britain during the Gallipoli campaign and had been ceded to Greece, but these were turned over to Turkey on Sept. 21, 1923, under the provisions of the Treaty of Lausanne.

Greece, by treaty, 1923, formally ceded for fifty years to Yugo-Slavia a free zone in the magnificent harbor of Salonica, thus giving the Serbs an outlet to the Aegean, and free transit for her commerce. This was confirmed by three treaties signed Aug. 17, 1926, which enlarged the zone, gave Greece all Serbian rights in the railroad from the boundary in exchange for 20,000,000 French francs and provided for arbitral powers in a resident official of the League of Nations who will be a Frenchman. An agreement putting the Free Zone into effect was signed March 17, 1929 in Geneva.

Bulgaria was, by agreement in June, 1924, allowed a commercial outlet to the Aegean in the port of Kavala, joined to her frontier by a narrow corridor under the supervision of the League of Nations. But she has not been allowed possession (1929). The incident of the invasion of Bulgarian territory in October, 1925, by Greek troops was settled in December by the League of Nations which imposed an indemnity of 30,000,000 levas (about $219,000) which Greece paid in February, 1926

Following the Smyrna debacle a military revolution headed by Col. Plastiras forced out the Triantafyllakos Ministry and compelled the abdication of King Constantine on Sept. 27, 1922. He died in exile of heart disease in Palermo, Sicily, on Jan. 11, 1923.

His son and successor King George II was compelled by the National Assembly to quit the county Dec. 17, 1923, and on March 25, 1925 the National Assembly voted the overthrow of the monarchy and the establishment of a republic which was indorsed on April 13 by a plebiscite, 758,742 for to 325,322 against. The republic was proclaimed May 1, the regent Admiral Koundouriotis becoming temporary head of the state. He held this position through the viscissitudes of political turmoil until March 19, 1926, when Gen. Pangalos forced him out to be overturned himself Aug. 22 when Koundouriotis was again installed as president.

Former Premier Elentherios Venizelos emerged from his voluntary retirement in Crete to head the Liberal party—in May 1928—Premier Zalmis and his cabinet resigned and Venizelos was made Premier on July 3. He dissolved Parliament and the President by decree changed the electoral system so that each district elected its deputy or senator on the majority system instead of by proportional representation.

At the election on Aug. 19 the Venezelists won 227 of the 250 seats and the Royalists 22. The election for a new Senate of 92 members on April 21, 1929 returned 72 government supporters and 20 royalists. Alexander Laimis, eight times Premier, was chosen president of the Senate. The Senate and the Chamber on June 3 reelected Admiral Paul Kondouriotis, President of Greece, he receiving 259 votes out of a total of 309.

(See The World Almanac for 1925, page 629 for the Corfu incident; for 1926, page 630; for 1927, page 626; for 1928, page 624; and for 1929, page 623, for details of political happenings).

Greece proper is chiefly agricultural, with little manufacturing. Only one-fifth of the total area is arable; 13,350,000 of the total of 16,074,000 acres are covered by mountains and lakes and rivers. The forests have been seriously destroyed, but efforts are making to reforest.

The cereal harvest in 1928 was 865,000 metric tons as against 643,000 in 1927. The tobacco crop was 135,456,000 pounds (134,000,000 in 1927); figs, 16,000 tons (15,700 in 1927); currants, 283,000,000 pounds (296,000,000 in 1927); raisins, 22,600 tons (21,500 in 1927); olives, 50,000 tons (15,000 in 1927); olive oil, 107,000 tons (74,400 in 1927); and wine 225,000 tons (227,000 in 1927). About 865,000 acres are given over to ollves. The nut and fruit crops are large. The production of silk cocoons is increasing.

Mineral wealth is great. Production in 1927 was, iron ore, 123,310 metric tons; chromite, 17,314; iron pyrites, 100,050; magnecite, 84,484; zinc, 30,597; lead ore, 89,893; lignites, 143,346; and salt, 105,000.

Industrial output in 1928 was valued at 6,727,182,000 drachmas (6,115,620,000 in 1927).

An American engineering corporation began in 1926 the reclamation of the Vardar River marshes beyond Salonica which is estimated to cost $25,000,000 and will bring 326,000 acres under cultivation, and provide settlement for 25,000 families of refugees from Anatolia.

American engineers in 1928 patched up the aqueduct built by Emperor Hadrian 2,000 years ago to bring water from the plains of Marathon to Athens.

It is planned to convert Mount Olympus, the mythical home of the gods, into a National Park modeled on American lines. The region is wild and largely uninhabited. Olympus is a precipitous, broken mass fronting on the sea, in part forested, rising from the water's edge to an altitude of 9,800 feet.

Railway mileage in 1928 was 1770 miles, of which the state owned 885. The state railways showed a deficit in 1927 of $257,695.

The merchant marine in 1928 had 533 steamers of 1,298,000 tonnage. In 1927 20,885 steamers of 13,079,888 tons, and 4,937 sailing vessels of 267,464 tons entered Grecian ports, and in 1927 5,210 steamers of 2,700,657 tons and 3,288 sailing vessels of 91,729 tons passed through the canal across the Isthmus of Corinth.

The Greek Orthodox Church claims the great majority of the people, that being the state religion.

The bold rocky promontory of Mount Athos (121 square miles), is occupied by 20 monasteries of the Greek Orthodox Church, each a sort of little republic in itself. The monks number 5,140 (census of 1920). No females are allowed to enter the territory. The territory had a new constitution granted by the Greek Government received autonomous powers as a monastic republic under Greek sovereignty, but with an appointed Greek Governor. The lands are inalienable and all the property exempt from taxation. A council of 500 bishops of the Greek Orthodox Church has been called to meet there in 1930 to consider all outstanding questions of the church.

Instruction between ages of six and twelve is compulsory, but the law is not well enforced in rural regions.

Greece in 1927 funded her war debt to Great Britain at £21,411,500, and that to the United States at $19,659,836, each payable in 62 years. The United States agreed to advance a loan of $12,167,000 at par bearing 4% interest and to be repaid in 40 years; this being the balance of the war loan of $48,226,629 to complete the agreement of Feb. 10, 1918, and is now called for to care for the needs of the Greek refugees. Congress passed the authorization bill Feb. 9, 1929 and the money was paid to Greece on May 10.

Under approval of the Council of the League of Nations, Sept. 15, 1927, a $15,000,000 6% 40-year loan was floated (at 91) in New York; $2,000,000 in Switzerland; and £4,070,960 in England, Italy and Sweden, in addition to the American loan above. With the proceeds Greece was able to stabilize the drachma (= 0.01952634 grams of pure gold = 1.2977 cents). The Bank of Greece was organized in November, 1927, and started its operations May 14, 1928, with the sole privilege of issuing bank notes. On July 31, 1928, the note circulation was 5,131,000,000 drachmas with a gold reserve of 531,000,000, and net foreign exchange of 3,261,000,000 as a cover which by law must not be less than 50%.

The public debt on Jan. 31, 1929 amounted to 38,139,124,100 drachmas.

Recent budgets in drachmas are:

Year.	Revenues.	Expenditures.
1923-24	3,941,197,501	6,924,572,063
1924-25	4,780,475,698	5,771,066,306
1925-26—ordinary	6,452,723,318	4,861,656,943
extraordinary	557,677,550	2,158,743,925
1926-27—ordinary	6,462,723,318	4,861,656,943
extraordinary	557,677,550	2,158,743,925
1927-28	8,837,370.000	9,121,346,000
1928-29	11,114,652,300	11,114,652,300
1929-30	9,665,613,000	9,657,613,400

Imports and exports in drachmas (000 omitted) were:

Year.	Imports.	Exports.
1923	6,035,346	2,545,110
1924	8,053,783	3,276,972
1925	9,834,049	4,310,066
1926	10,004,939	5,429,751
	($126,062,000)	($68,415,000)
1927	12,601,948	6,037,411
	($166,346,000)	($79,694,000)
1928	12,488,122	6,282,075
	($162,346,000)	($81,667,000

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$11,132,947	$21,232,269
1923	11,899,763	14,388,294
1924	16,721,827	27,728,750
1925	16,633,212	26,186,500
1926	10,352,509	16,908,301
1927	15,028,376	29,645,573
1928	13,853,041	14,604,772

GUATEMALA, REPUBLIC OF

AREA, estimated 42,353 square miles.

POPULATION, census of October, 1921, 2,119,165; estimated, 1927, 2,454,000.

CAPITAL, Guatemala, pop., census 1921, 115,938. It was completely destroyed by earthquakes Jan. 3 and 4, 1917, and rebuilding has been slow.

President, Gen. Lazaro Chacon, 1927-1932, elected Dec. 5, 1926.

Premier, Senor Don Eduard Aguirre Velasquez. (Foreign).

Guatemala, the northern state of Central America, has Mexico for its neighbor on the north and west, British Honduras on the east, Honduras and Salvador on the east and south and the Pacific on the southwest. A range of mountains containing many volcanic peaks runs from northwest to southeast near the Pacific. The narrow west slope is well watered, fertile and the most densely settled part. It is about the size of New York State.

The Honduran boundary is in dispute.

The broad eastern slope is sparsely settled and its chief commercial importance is the production of bananas and timber and chicle (gum) in the Peten district. Coffee and sugar are the chief crops. Stock raising is an important industry. Though rich in mineral resources little is mined owing to lack of transport.

Over the five-year period 1921-25, the United States took 63.78% of the exports, and supplied 58.24% of the imports.

Principal exports in 1928 were: Sugar, 18,976,900 lbs. valued at $378,296 (13,900,000 lbs. valued at $413,000 in 1927); coffee, 966,122 lbs. valued at $23,048,385 (112,757,000 lbs. valued at $28,568,000 in 1927); bananas, 6,124,646 stems valued at $3,096,333 (6,354,419 stems valued at $3,011,000 in 1927); and chicle, 1,409,359 lbs. valued at $444,772 (1,535,000 lbs. valued at $484,000 in 1927). Lumber exports were valued at $328,603, and hides at $257,847.

Chief imports are textiles, machinery and petroleum.

Guatemala has over 700 miles of railroads, privately owned but subsidized by the Government. The new 80-mile link of the International Railways of Central America connecting Puerto Barrios on the East Coast with San Salvador on the West Coast was completed in 1929. A vast amount of construction is being done on the roads. In 1927 there entered into her ports 1,122 vessels of 1,889,992 tonnage.

Guatemala has a Constitution proclaimed in December, 1879, modified last on Jan. 1, 1928, that now provides for universal suffrage, a President elected for six years, who cannot be re-elected until 12 years have passed, a National Assembly elected for four years and a Council of State of thirteen members, partly elected by the Assembly and partly appointed by the President. The Roman Catholic is the prevailing religion. There is complete freedom of worship. Education is free and compulsory from 7 to 14. In 1927 there were 3,297 schools with 3,430 teachers and 113,308 pupils.

About 60 per cent. of the population is pure Indian and most of the remainder are half castes. Many are held on plantations under a system of peonage. The army numbers 6,200, with a reserve of 126,000.

Manuel Estrada Cabrera ruled the country as a dictator for twenty-two years. He was turned out in April, 1920, by a revolution which put Carlos Herrera in the President's chair. The latter was overthrown by a coup d'etat Dec. 6, 1921, and Gen. Orellana made Provisional President, being inaugurated for a six-year term March, 1922. He died Sept. 26 1926, and was succeeded by the first designate, Gen. Lazaro Chacon, who was elected for a full term on Dec. 5, 1926.

On Nov. 26, 1924, President Orellana issued a decree providing a new monetary system based on a gold standard with the quetzal as the unit representing 1.504665 grams of pure gold, to be equal to 60 pesos ($1).

A central bank with a capital of 10,000,000 quetzals was authorized on Dec. 23, 1925, and established July 1, 1926. It has the sole right to issue banknotes, and must carry a circulation reserve of 40% gold. Circulation Dec. 31, 1928, was 9,199,959 quetzals.

The public debt on Dec. 31, 1928 was $16,836,802

Recent budgets are:

Year.	Rev.	Exp.
1925-26	quetzals 11,555,352	11,715,949
1926-27	quetzals 12,411,182	12,259,067
1927-28 (actual)	quetzals 14,265,751	14,128,979
1928-29 (estimated)	quetzals 12,959,430	12,959,430

Imports and exports were:

Year.	Imports.	Exports.
1920	$18,344,463	$18,102,906
1921	13,616,438	12,140,826
1922	10,751,660	12,065,949
1923	13,763,499	14,743,323
1924	18,271,258	24,491,536
1925	23,393,876	29,661,959
1926	26,601,588	28,978,087
1927	19,785,332	33,915,225
1928	24,145,181	28,211,572

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$5,459,720	$8,783,650
1923	6,314,254	11,267,005
1924	8,823,542	10,089,156
1925	9,382,196	11,337,683
1926	11,088,204	14,491,461
1927	10,632,215	10,179,303
1928	13,317,431	9,563,778

HAITI, REPUBLIC OF

AREA, approximately 10,204 square miles.

POPULATION (estd.), January 1, 1927, 2,300,200.

CAPITAL, Port au Prince, population, census of 1929, 79,797.

President, Louis Borno, 1926-30, assumed office for second term, May 15, 1926.

Premier, Charles Fombrun (Interior).

Financial Adviser, Arthur C. Millspaugh.

American High Commissioner, Brig. Gen., John H Russell, U.S.M.C.

Haiti occupies the western third of the Island of Haiti or Santo Domingo, the second largest of the Greater Antilles, lying between Cuba on the west and Porto Rico on the east. The boundary which separates it from the Dominican Republic to the east is about 193 miles long. Copper is found, but is not worked commercially, and there are few other mineral resources. Certain parts of the island are very fertile. Coffee is the most important crop and the production of cotton, sugar and logwood are increasing. Sisal, tobacco, cattle, tropical fruits and cashew nuts are promising new industries. Haiti is nearly the size of Massachusetts and Connecticut together.

The majority of the population are Negroes, the remainder being mulattoes descended from former French settlers. There are about 3,000 white foreigners. Roman Catholicism is the state religion. Education is nominally compulsory. There were in 1927 1,060 schools with 71,503 pupils enrolled. Illiteracy is about 85%. French is the official language of the country, but a dialect known as French Creole is the language of the majority of the population.

Haiti, discovered by Columbus in 1492, and a French colony from 1677, attained its independence in 1804, following the revolution headed by Toussaint l'Ouverture in 1791. Revolutions and bloodshed characterized its early political history. From 1910 to 1915 there were seven presidents; the last, Gen. Sam, assumed office March 4, 1915, took refuge in the French Legation, July 26, 1915, after 167 political prisoners had been massacred in jail, and at the funeral of the victims he was dragged out and killed. Two hours later a United States cruiser landed marines at Port Au Prince. United States forces occupied the country and restored order.

Sudre Dartiguenave was elected President on August 12, 1915, by the National Assembly, which in November ratified a treaty with the United States (which ratified it May 3, 1916), by which the United States agreed to assist Haiti in the establishment of a responsible, orderly government, and Haiti agreed not to increase the public debt without consent of the United States.

The treaty provides for five American treaty

officers, appointed by the President of Haiti on nomination of the President of the United States who under supervision of the American High Commissioner (representing the President of the United States) have charge of the constabulary, finances, Public Works, Public Health and Agriculture. Under their supervision over 1,000 miles of roads have been constructed, trails have been improved, bridges built, public buildings erected, hospitals and rural clinics established, and during the year 1927 over 480,000 persons were treated by the Public Health Service.

The Agricultural Department is building up new crops for Haiti, and obtaining new markets, and in addition is in charge of the public educational system which consists of instruction given by rural farm schools and by urban industrial schools. Teachers for these schools are all trained at a center school near Port au Prince.

Railway mileage in 1928 was 158.

In 1927, 366 steamers of 882,532 tonnage in the foreign trade entered Port au Prince.

The Constitution of 1918 provides that until such time as a Senate and Chamber of Deputies are created, the legislative power shall be exercised by a Council of State composed of 21 members appointed by the President. The external debt consists of two 6%, 30-year loans floated in New York and payable in 1952 and 1953; the former, issued in 1922, amounted to $16,000,000 and was for the purpose of refunding two French loans, for making cash settlement of foreign and internal claims and for public works. The loan payable in 1953 amounted to $2,660,000 and was issued in exchange for the bonds of the National Railroad of Haiti, which were in default and bore a government guarantee. The internal debt comprises a 6% 30-year loan, due in 1953, and the portion of the fiduciary currency of the government uncovered by reserves. The loan was authorized in the amount of $5,000,000 and was to refund internal bonds and to make settlement in bond awards of foreign and internal claims. The public debt Dec. 31, 1928 was $17,990,800.

The average annual income for the past five years has been $8,321,487.51 and revenues for 1927-28 were $10,084,203. with expenditures of $8,195,593. The budget for 1928-29 provides for expenditures of $7,579,697.19. Total cash assets on Sept. 30, 1928 were $6,831,981.

Exports for 1927-28 include coffee, 90,712,000 pounds; valued at $8,229,361; cacao, 5,277,000 pounds; cotton lint 9,761,000 pounds; cotton seed 1,736,000 pounds; lignum vitae 1,331,000 pounds; logwood 80,163,000 pounds and sugar 26,500,000 pounds.

The unit of currency is the gourde (=20 cents), by law exchangeable for United States dollars at the fixed ratio of five to one.

Trade for seven years:

Fiscal Years.	Imports.	Exports.
1921-22	$12,350,271	$10,712,210
1922-23	14,157,963	14,591,012
1923-24	14,696,128	14,176,322
1924-25	20,237,565	19,403,762
1925-26	18,851,406	20,184,005
1926-27	15,751,320	15,299,088
1927-28	20,248,257	22,667,246

Trade with the United States was:

Fiscal Years.	Imports.	Exports.
1921-22	$10,359,613	$1,438,755
1922-23	11,524,566	1,976,572
1923-24	11,817,376	1,329,251
1924-25	15,567,869	2,318,619
1926-27	10,162,290	1,230,273
1927-28	12,716,338	1,643,521
1928-29	11,098,998	1,477,554

HONDURAS, REPUBLIC OF

AREA, 46,332 square miles.

POPULATION, census of Jan. 1, 1923, 773,408.

CAPITAL, Tegucigalpa, pop., 1926, 38,950.

President, Dr. Vicente Mejia Colindres, Liberal, 1929-33, inaugurated Feb. 3, 1929.

Premier, Fausto Davila (Foreign).

Honduras is an agricultural and cattle raising state of Central America, bounded on the north by the Caribbean Sea, on the east and south by Nicaragua, on the south and west by Salvador and on the west by Guatemala. The latter boundary is now being determined by a scientific party administered by the American Geographical Society. The coast line on the Caribbean is 400 miles long, the chief ports being Truxillo, Tela, Puerto Cortez, Omon, Roatal and La Ceiba. On the Pacific side it has a coast line of 40 miles on the Gulf of Fonseca, with a port, Amapala, on Tiger Island, three hours by motor boat from San Lorenzo on the mainland, connected with the capital, 82 miles by a good automobile road. The country is mountainous, very fertile, though mostly uncultivated, and covered with rich forests. It is about the size of Pennsylvania.

Mineral resources are abundant but undeveloped. The chief export is bananas, grown on the Caribbean coast, 27,462,142 bunches being exported in 1928; raw sugar 50,000,000 pounds; and coffee 5,000,000 pounds. Cattle and hides are also exported. Transport is very backward but is being improved. The country has 934 miles of railroads, laid mostly to provide for the fruit trade. The inhabitants are chiefly Indians with an admixture of Spanish blood.

By the 1926 census there were 11,497 land owners (671 foreign), having 4,112,616 acres (foreigners holding 1,712,891 acres). In coffee were about 98,000 acres; in sugar cane, 78,000 acres; in bananas, 19,000 acres; in other crops, 350,000 acres; and the rest in forest.

The country is governed under a Constitution, proclaimed Oct. 3, 1924, which provides for the direct election by the people of a President for a four year term, and a Chamber of Deputies of 43 members, chosen for four years. The President appoints a Cabinet of five Ministers. It provides for an eight-hour day and one day of rest a week; for state regulation of savings funds; and for an Institute of social reforms to promote co-operative associations, housing, insurance, public health, and protect women and children at work. The Roman Catholic is the prevailing religion.

Education is free and compulsory. There were in 1928, 2,909 primary schools, with 1,355 teachers and 38,725 pupils. A campaign against illiteracy was begun in 1927. There is a university at the capital. Military service is compulsory, with 2,900 in the regular army and 43,577 in the first line of the reserve. Of the export and import trade 95 per cent. is with the United States.

Constitutional government in Honduras ceased on Jan. 31, 1924, none of the three candidates for President having received a majority at the polls or in Congress. President Guiterrez held on as dictator, civil war followed involving property damage to foreigners amounting to $3,000,000. Disorder was not suppressed until November. At the elections held Dec. 28-30, 1924, Dr. Miguel Paz Barahona was elected President over Gen. Carias by 72,021 votes out of 78,491. His inauguration on Feb. 1, 1925, was marked by outbreaks and for the remainder of the year the country was under martial law.

Honduras sent a delegate to the Assembly of the League of Nations in September, 1929, after an absence of six years.

The budget for 1925-26 was balanced at 10,832,439 pesos; that for 1926-27 at 11,354,175 pesos; that for 1927-28 at 9,662,993 pesos; that for 1928-29 at 10,705,620; and that for 1929-30 at 13,101,923 pesos. Revenues in 1927-28 were 12,029,870 pesos and expenditures, 11,365,262 pesos. The peso is approximately 50 cents.

The foreign debt, of fifty years' standing, held in England with accrued interest (unpaid since 1872), amounts to approximately £30,000,000. An agreement was concluded with the Council for Foreign Bondholders in Washington, Oct. 29, 1925, and ratified by the Honduran Congress on March 8, 1926, for the liquidation of the debt by the payment of a total of £1,200,000 in semi-annual installments without interest over a period of 30 years. Honduras also floated a loan of $500,000 in the United States in 1926. The internal debt, Aug. 1, 1926, amounted to 19,166,355 pesos. On Sept. 1, 1926, 3% bonds to the amount of 10,000,000 pesos were issued to amortize the floating debt.

The Congress on April, 1926, adopted a law establishing the gold standard for the currency, which had been on a silver basis and fluctuated with the price of silver. The new unit will be called the lempira (=$0.50 gold). A law was passed providing for the establishment of a National bank, with a capital of 2,000,000 lempira; one-half to be subscribed by the state.

Imports and exports for eight fiscal years:

Year.	Imports.	Exports.
1921	$16,722,700	$5,428,587
1922	12,804,000	5,386,000
1923	14,342,000	10,016,000
1924	11,137,917	7,897,047
1925	12,752,761	11,983,051
1926	9,899,949	13,456,000
1927	10,630,000	17,546,000
1928	12,573,598	23,242,728

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$9,959,284	$5,249,268
1923	11,256,928	4,936,915
1924	9,100,974	5,959,626
1925	9,569,937	8,718,969
1926	7,540,286	8,719,834
1927	8,486,848	9,310,642
1928	9,728,645	12,288,574

HUNGARY, KINGDOM OF

AREA, 35,911 square miles. (Some boundaries to be determined.)

POPULATION, census of December, 1924, 8,160,000; estimated, Dec. 31, 1926, 8,454,500, of which 90% are Magyars and 7% German.

CAPITAL, Budapest. Population census 1920, 928,996 (with suburbs, 1,217,325), estimated 1927, 971,169; other cities, Szeged, 124,347; Debreczen, 107,796; and 10 others exceeding 40,000.

Regent, Admiral Nicholas von Horthy, born 1867 elected March 1, 1920.

Premier, Count Stephen Bethlen, born 1873, took office Apr. 14, 1921.

Hungary for a thousand years has been the abode of the Magyars. Formerly a kingdom forming an integral part of the Austro-Hungarian Empire, becoming an independent republic after the war, it was much reduced in size by the Treaty of the Trianon, June 4, 1920, losing Transylvania to Roumania, Croatia and Slavonia to Jugo-Slavia. Prewar it had 25,000,000 population on 125,608 square miles of territory, or about the size of the States of Ohio, Kentucky and Tennessee; now it is slightly smaller than Indiana. Hungary lost 68 per cent. of its territory and 59 per cent. of its population. The Yugo-Slavia and Roumania boundaries are to be determined by a mixed commission.

A treaty of friendship with Italy was negotiated in 1927 (ratified May 19). Hungary secured an outlet to the sea in free port privileges at Fiume, transit across Serbian territory having been agreed to by that government.

Hungary had the best harvest in a decade in 1923, a bad one in 1924, and good ones in 1925 and 1926. In 1927 wheat production was 76,333,000 bushels (74,908,000 in 1926); maize, 68,347,000 bushels (76,545,000 in 1926); sugar, 12,840,000 quintals (14,440,000 in 1926); and potatoes, 1,807,000 metric tons (1,874,000 in 1926).

In Hungary 60 per cent. is ploughed land and 23 per cent. forest and pasture.

Over 4,000,000 are directly or indirectly engaged in cultivating the soil. Under the land distribution law (No. 36), between June, 1921, and July, 1923, 33,000 building sites of about 2,809 square yards each, with a total area of 9,145 acres, were distributed in 886 villages. An area totaling 189,406 acres was also divided into agricultural "dwarf holdings" of 3.5 acres each, and "small estates" of 17.5 acres each. Similar proceedings were also carried out in 2,456 villages. The number of individual holdings under 11.5 acres is now estimated to be 331,882; of those between 11.5 and 115 acres to be 176,930; of those between 115 and 1,150 acres to be 9,264; and over 1,150 acres to be 1,458; and that a total of over 18,600,000 acres has been divided up. By Dec. 31, 1925, when the law lapsed, 901,193 acres had been distributed, 306,365 petitioners receiving land and 168,263 building sites.

The textile industry has made great progress, the number of establishments increasing from 125 in 1913 to 228 in 1927; operatives from 16,092 to 42,000, cotton spindles from 33,000 to 148,000, and cotton looms from 4,100 to 11,200. The total value of the product during 1927 of textile semi-manufactures was $73,615,000, and of finished textiles, $62,119,000.

Production of coal was 7,027,538 metric tons in 1927; and 6,649,210 tons in 1926. Production of pig iron in 1928 was 280,000 metric tons (in 1927 299,332); and of steel ingots in 1928, 450,000 metric tons (in 1927, 471,679).

Unemployment was 15,000 on Jan. 1, 1924, 30,918 on March 1, 1926, and 19,654 on March 1, 1927; and 17,244 on March 1, 1928.

There were 5,324 miles of railroads in 1927, of which 1,899 were state owned. Hungary has 687 miles of navigable rivers.

FINANCIAL REHABILITATION.

Hungary's financial position was most desperate in 1923. She appealed to the League of Nations, which, after investigation offered a 20-year 7½% loan of 250,000,000 gold crowns (about $50,000,000), and placed Jeremiah Smith, Jr., of Boston, Mass., in charge of her finances. He took up his duties at Budapest May 1, 1924. Rehabilitation proceeded so successfully that Hungary was released from supervision by the League June 30, 1926, and he went home, refusing to accept the proffered fee of $100,000. (See The World Almanac for 1927, page 629).

Allied military control was abolished on March 29, 1927 by the Conference of Ambassadors.

The Hungarian Parliament, by act of Nov. 21, 1925, established a new monetary unit of gold, the pengo (meaning "jingler") complete transition to be effected by Jan. 1, 1927. One pengo = $0.1748985 = 0.8631578 Hungarian gold crown = 12,500 paper crowns. It is divided into 100 fillers. Gold, silver and copper coins are to be minted. Banknotes are issued by the Hungarian National Bank only. The note circulation, July 31, 1929, was 480,000,000 pengos, with a gold cover of 163,000,000 pengos, and 40,000,000 pengos in foreign bills.

Saving deposits on July 1, 1927, totalled 308,500,000 pengos, about 30% of pre-war deposits, and in July 1, 1928, were 429,000,000 pengoes, about 43%.

Hungary completed the funding of her debt to the United States for relief supplies furnished just after the armistice by delivering to the Treasury on May 29, 1926, bonds for $1,939,000, which are to run sixty-two years. The public debt, 1928 was 1,577,300,000 pengoes ($274,932,000).

Hungary's national wealth is estimated at 15,676,000,000 gold crowns ($3,135,200,000) and her national income at 2,752,000,000 gold crowns ($550,400,000), two-thirds of which is from agriculture.

Recent budgets in thousands of pengoes are:

	State Administration		State Expend.

THE GOVERNMENT.

On the breakup of the Dual Empire, Oct. 31, 1918, a revolution began the movement for a republic, King Charles abdicating Nov. 13. Three days later the republic was proclaimed with Count Michael Karolyi as Provisional President. Disorder followed; a Bolshevik government with Bela Kun dominant was set up March 22, 1919, but was swept away with assistance of the Roumanian army. A national government was re-established on Aug. 7, 1919. Elections, with manhood suffrage, were held in January and February, 1920, a bloc of parties of the Right succeeding in control of a Provisional National Assembly which elected Admiral Horthy Governor of Hungary. On March 23, 1920, a Government order declared Hungary a monarchy. Horthy was styled Regent. However, two attempts of the late King-Emperor Charles to regain the throne in 1921 failed dismally.

The three possible Hapsburg claimants for the throne are Archduke Otto, born Nov. 20, 1912, son of the late Emperor-King Charles, and Empress Zita, Archduke Joseph Francis, born March 28, 1895, son of Archduke Joseph, and Archduke Albert, born July 24, 1897, son of the enormously wealthy Archduke Frederick. Premier Bethlen, on May 23, 1927, declared that he would not allow the question to be discussed, and that a king was "not possible in the next few years."

The lower house of the National Assembly has 245 members elected by a restrictive franchise extended to men over 24 and literate, and to women over 30, who had three children or earned an independent livelihood or had a diploma from an institution of higher education or were wives of secondary school or college graduates. The elections of Dec. 20, 1926, returned: National Unity Party (Bethlen's), 171; Christian Social Union, 35; Socialist, 14; other parties, 25.

The old House of Magnates, in abeyance since the war, was reconstituted by law of Nov. 11, 1926, with about 240 members as an Upper House. The nobles (151 voting of the 187 who sat in the previous House of Magnates), elected 38 members from their number (overwhelmingly for the government), 40 were named for life by the executive; 76 were elected for a five-year term, by county councils and municipalities; 40 elected for a ten-year term by Chambers of Commerce, industry and agriculture and academic institutions; 31 representative of the Catholic, Protestant and Jewish Churches; and 6 high dignitaries of the State. Parliament was opened in medieval state on Jan. 29, 1927. In case of disagreement a bill passed a second time by the Lower House becomes a law without assent by the Upper Chamber.

Freedom of religion is a fundamental tenet of the new state, with equality between the many divergent sects. Four state universities had 9,570 students in 1927. Education is compulsory for children from 6 to 12 and illiteracy is decreasing. The national army under the treaty is limited to 35,000 men and officers, all volunteers; other forces numbering 31,500 being police, gendarmerie and custom guards. Hungary has no air force and no navy.

A government decree on July 20, 1928, ordered all the gypsies (about 50,000) to forsake their nomadic life, settle down in fixed abodes, abandon their ancestral costumes, speak Hungarian and pay taxes. They are granted full suffrage, and the right to own

property. Foreign gypsies were given one month in which to leave Hungary.

Hungary became a member of the League of Nations in September, 1922.

Imports and exports were:

ICELAND, KINGDOM OF

AREA, 39,709 square miles.

POPULATION, census of 1927, 103,317.

CAPITAL, Reykjavik: population, 1927, 24,304.

King, Christian X. (See Denmark.)

President of the Council, Jon Thorlaksson (Finance), March 22, 1924.

Iceland is an island in the North Atlantic Ocean with an area nearly equal to that of Kentucky. It is of volcanic origin and has many geysers and hot springs. It is treeless. Agriculture engages 43,411 of the people, who produce hay, potatoes and turnips mostly. Domestic animals number 693,500, including 590,000 sheep (census of 1927), and furnish five-sixths of the exports. The fisheries exports in 1927 was valued at 50,000,000 krone, 87% of the total exports. Imports include all necessaries. There are no railways, but 379 miles of roads. Its mercantile marine in 1927 was 316 vessels, of 29,818 tons. Total fish catch, 1928, was estimated at 80,000 tons.

Rich discoveries of aluminum clay and of iron ore in Mt. Sodarnaes were made in 1927.

The winter climate is much modified by the Gulf Stream.

Iceland was an independent republic from 930 to 1263, when it joined with Norway. The two came under Danish rule in 1381. When Norway separated from Denmark in 1814, Iceland remained under Denmark. In 1918 Denmark acknowledged Iceland as a sovereign state, united with Denmark only in that the Danish King, Christian X., was also to be King of Iceland. Its permanent neutrality was guaranteed. Provisionally until 1940 Denmark has charge of its foreign affairs, and a joint committee of six reviews bills of importance to both states.

Iceland has evolved strange social customs and traditions; is admitted to have attained approximately absolute justice of the sterner sort, and in its constitutional monarchy to have developed an excellent democracy. Iceland has neither army nor navy, nor fortifications.

The Althing (Parliament) is composed of an Upper House of 14 and a Lower House of 28. Men and women over 25 enjoy the suffrage. The Althing was instituted in 930. Its millenium will be elaborately celebrated in June, 1930. Illiteracy is very low. The Icelandic language has maintained its puracy, as in Eddas and Sagas, for 1,000 years. Danish is also widely spoken.

Leif Ericson, the Norseman, sailed from Iceland in the year 1000 and discovered the American mainland, starting a colony called Vinland, probably at New Bedford, Mass.

The unit of currency is the krona—$0.268 at par of exchange, average value 1928, $0.215.

The budget for 1928 was Revenue, 10,452,000 krone; expenditures, 10,454,000 krone; and that for 1929 was: Revenue, 10,883,600 krone; expenditures, 10,850,958 krone. The national debt, which was 18,200,000 krone on Jan. 1, 1924, was 10,501,373 on Jan. 1, 1927.

Imports, 1922, krone, 52,032,438; 1923, krone, 50,738,690; 1924, krone, 63,781,000; 1925, krone, 70,190,913; 1926, krone, 50,500,000; 1927, krone, 48,000,000; 1928, krone 56,000,000.

Exports, 1922, krone, 50,698,968; 1923, krone, 58,005,206; 1924, krone, 86,340,000; 1925, krone, 78,640,218; 1926, 48,000,000; 1927, krone 57,500,000; 1928, krone, 74,300,000.

Trade with the United States was:

IRAQ, KINGDOM OF

MESOPOTAMIA.

(British Mandate.)

AREA, 143,240 square miles.

POPULATION, census of 1920, 2,849,282; divided. Sunni Mohammedans, 1,146,685; Shi'ah Mohammedans, 1,494,015; Jews, 87,488; Christians, 78,792; of other religions, 43,302. By vilayets, Bagdad, 1,360,304; Basra, 785,600; Mosul, 2,-849,282. Estimated, 1923, 3,000,000.

CAPITAL, Bagdad, population, 1920, 145,000, port, Basra, population, 50,000, Mosul (on the site of Nineveh), 60,000.

King, Feisal (born 1887), third son of El Husein ibn Ali, King of the Hejaz, crowned Aug. 23, 1921.

Premier, Taufiq Beg Suwaidi (Foreign and Religious Foundations) April, 1929.

High Commissioner of Great Britain, the Mandatory Power, Sir Francis H. Humphrys, G.C.V.O.

Mesopotamia (in classical days "the country from Mosul and Tikrit on the Tigris to the borders of Syria)" is the name now applied to the whole Euphrates country in southwest Asia—the former Turkish Vilayets of Basra, Bagdad and Mosul. The Arab name for this territory is Iraq. It is bounded on the north by Kurdistan, Turkey; on the east by Persia; on the south by the Persian Gulf and Kuwait and on the west by the Arabian and Syrian deserts. The boundary lines are indeterminate. It is as large as the States of New York, New Jersey, Pennsylvania and Ohio.

The country is a great alluvial plain stretching from the Persian Gulf 400 miles north, rising in rolling hills in Mosul and beyond to the limestone mountains of Kurdistan. The climate is subtropical and the rainfall (all in the winter months) is scanty, Bagdad averaging 6.64 inches in 29 years. The temperature varies widely; 120° in the shade is not uncommon, and severe frosts in the winter. The country is unhealthy, demanding extreme care. Mosquitoes and sand flies are pests, and malaria and "Bagdad boils" are common. Dysentery and fever are prevalent; cholera, the bubonic plague and typhus fever have frequently scourged the country.

The soil is of extraordinary fertility, and engineers estimate that the Tigris-Euphrates Rivers could irrigate 7,000,000 acres in winter and 3,000,000 of varied crops in summer. Half of this area, the report of Sir William Willcocks, engineer, says, could be immediately reclaimed if the ancient system of canals and drains were restored. Only regulatory work is attempted at present and about 1,500,000 acres are under water and improvements in methods of cultivation are urged. Wheat, barley, rice and millet are the chief crops, with tobacco in the Kurdish hills. Cotton growing is on the increase, 5,400 bales being produced in 1928. Dates are grown in the tidal stretches of the Shatt el Arab and the hundred miles from Fao to Qurna on both sides of the river is a continuous date grove. Dates are a staple food of the Arabs; in 1926, 151,020 tons, and in 1925, 147,853 tons, valued at about $6,000,000, were exported.

Large flocks of sheep (over 5,000,000 in 1924) are raised in the north, and wool and skins form a considerable export. In 1925, 12,750 tons of wool (9,844 tons in 1926), and 3,500 bales of cotton was exported. Industries, weaving, silk spinning, leather working, etc., are for the local market only.

The chief port is Basra, 70 miles up the Shatt el Arab from the Persian Gulf. A railroad runs from Kalat just south of Mosul to Bagdad (designed to be part of the Berlin to Bagdad railroad) and the English have connected Bagdad and Basra by rail (opened Jan. 13, 1920). The control of the Bagdad railroad passed into British hands in 1923. The railroad mileage on March 31, 1926, was 811.

The great value of the country to Great Britain is its petroleum. In southeastern Mesopotamia, Great Britain has built great refineries to handle the product of the country and of Persia, which is now comparatively small, but the reserve is great. The Government has awarded concessions in the Bagdad and Mosul Vilayets to the Turkish Petroleum Co. and test drilling began April 5, 1927 to explore 96 square miles. In this company the Anglo-Persian (British), the Royal Dutch Shell, a

French group and an American group (the Standard Oil Co. of N. J., the Standard Oil Co. of N. Y., the Pan-American, the Gulf Refining Co. and the American Refinery Co.) each has a one-quarter interest.

The mandate under the Treaty of Peace with Turkey, 1920, for Mesopotamia as an independent state was intrusted to Great Britain by the Allies, British and Indian forces having conquered the country during the World War, occupying Basra on Nov. 22, 1914, and Bagdad March 11, 1917. A British High Commissioner set up a provisional Arab Government with the Naqib of Bagdad at the head, in November, 1920. Emir Feisal, third son of the Grand Sherif of Mecca, then King of the Hejaz, who made a notable reputation as a soldier during the war and as a diplomat at the Paris Peace Conference, presented himself as a candidate for the throne. He was chosen ruler by acclamation as a constitutional democratic sovereign, a choice subsequently ratified by a referendum, and was crowned at Bagdad Aug. 23, 1921. Since then the British garrison was gradually reduced; in March, 1927, the last English battalion was withdrawn, leaving one Indian battalion and five air squadrons, each of 12 planes.

The Iraq army numbers about 10,000 men.

A treaty of alliance between Iraq and Great Britain was signed on Oct. 10, 1922. Under it King Feisal agreed to be guided by the advice of King George on international and financial obligations and interests for the whole period—twenty years—of the treaty. Great Britain agreed to give such support and assistance to the armed forces of the King of Iraq as may be necessary.

By a protocol announced May 3, 1923, it was provided that the treaty would terminate upon Iraq becoming a member of the League of Nations, and in any case not later than four years from the ratification of peace with Turkey. A supplemental treaty extending the duration of the treaty for twenty-five years from Dec. 16, 1925, with the same proviso, was signed Jan. 13, 1926, and ratified by Parliament, 260 to 114, on Feb. 19.

The Mosul question was placed before the League of Nations by Great Britain in agreement with Turkey and a status quo agreed to in October, 1924. Following an exhaustive report by the League Commission on the boundary, Great Britain, Iraq and Turkey signed at Angora June 5, 1926 a treaty fixing the boundary line running approximately due east from Kamik in Syria on the Tigris to the Persian frontier (see The World Almanac for 1929, p. 628, for details).

A revised treaty between Great Britain and Iraq was signed Dec. 14, 1927. In it Iraq is recognized as an independent sovereign state and Great Britain promises to support its candidature for admission to the League of Nations in 1932 if all goes well.

It met with much opposition in Iraq where nationalist sentiment demanded entire withdrawal of the British force and objected to its cost of maintenance.

The first Iraq Parliament which met July 16, 1925 was dissolved Jan. 19, 1928, a fortnight after Jafar Pasha had given way as Premier to Abdul Aziz Beg al Sa'dun. The general election for the second Parliament in May gave the Government about 66 seats of the total of 88.

Finally the Sa'dun cabinet resigned Jan. 22, 1929, and Taufiq Beg Suwaidi formed a new one in April, 1929.

During the year a certain measure of autonomy was granted to the Kurdish and to the Assyrian communities; also the British government recommended to the League of Nations in September that Iraq be admitted to membership in 1932. The council of the League approved on March 9 a proposal from Great Britain to establish a judicial system in Iraq which would place foreigners and natives on the same legal basis.

Frontier fighting over Arab raids that had caused much friction in 1928 continued in 1929. A severe Wahabi raid in March was beaten off by the bombing of the British Royal Air Force with heavy casualties.

Sir Gilbert Clayton, the British High Commissioner who had negotiated successfully with Ibn Saud, King of Nejd, died Sept. 11; and Sir Francis Humphrys, late Minister to Afghanistan, was appointed on Oct 3 to succeed him.

Revenues and expenditures in lakhs of rupees were:

Year.	Rev.	Exp.	Surp.	Def.

The share of the Ottoman public debt claimed from the Iraq is £T6,791,151, plus £T1,596,975 arrears, payable in 20 yearly installments. The surplus is about 145 lakhs of rupees.

The rupee is stable at $0.363 which is par of exchange.

Foreign trade in rupees and dollars, excluding goods in transit, was: Imports, 1925-26, 10,12,00,000 ($36,938,000); 1926-27, 9,87,00,000 ($36,025,500); 1927-28, 10,58,00,000 ($38,617,000); 1928-29, 9,50,06,000 ($34,500,000). Exports, 1925-26, 5,03,00,000 ($18,359,500); 1926-27, 4,61,00,000 ($16,826,500); 1927-28, 6,15,00,000 ($22,387,500); 1928-29, 5,57,41,000 ($20,300,000).

Trade with the United States was:

	Imports.	Exports.
1926	$982,836	$2,483,486
1927	637,571	4,308,462
1928	703,685	5,746,036

ITALY, KINGDOM OF

AREA, Pre-war Italy, 110,660 square miles; territory added by the war, 9,084 sq. m.; present total, 119,744 sq. m. Colonial possessions, Eritrea, 45,534 sq. m.; Italian Somaliland, estimated 245,000 sq. m.; Libya, estimated (southern boundaries undetermined) 580,000 sq. m.; the Dodecanese Islands, 981 sq. m.; total, 871,416 sq. m. Grand total, 991,160 sq. m.

POPULATION, census of December, 1921, pre-war boundaries 37,142,886; present boundaries 38,.710-576. Official estimate, present boundaries, Dec. 31, 1927, 40,796,000. Population Colonial possessions, Eritrea, census of 1920, 402,893; Somaliland, estimated 650,000; Libya, estimated, 1,000,000. Dodecanese Islands, 104,523; total in colonies, 2,157,416. Grand total, estimate of Dec. 31, 1927, 42,953,416. The number of departments was increased in 1927 from 76 to 92 and some boundaries changed; these are grouped in 18 provinces of which by the official estimate of 1927 was: Piedmont, 3,527,847; Liguria, 1,338,023; Lombardy, 5,184,763; Veneto, 4,133,837; Venezia Guilia and Zara, 949,045; Venezia Tridentina, 663,545; Emilia, 3,077,292; Tuscany, 2,805,959; The Marches, 1,197,580; Umbria, 664,371; Latium, 1,989,482; Abruzzi and Molise, 1,523,752; Campania, 3,352,701; Apulia, 2,353,312; Basilicata, 492,132; Calabria, 1,627,117; Sicily, 4,223,160; Sardinia, 885,467.

CAPITAL, Rome, population, official estimate of June 30, 1928, 877,289. Other cities, Naples, 966,423; Milan, 941,070; Genoa, 624,659; Turin, 570,173; Palermo, 444,861; Catania, 285,644; Florence, 277,688; Venice, 253,608; Trieste, 252,517; Bologna, 240,020; Messina, 203,609; Bari-delle Puglia, 174,619; Verona, 151,707; Reggio de Calabria, 129,294; Leghorn, 129,098; Padua, 125,159; Tarentum, 120,881; Ferrara, 117,221; Brescia, 113,489; Spezia, 110,401. There are also 37 cities with between 50,000 and 100,000 population.

King, Victor Emmanuel III., born Nov. 11, 1869, succeeded his father, King Humbert I., July 29, 1900; married Helena, daughter of Nicholas, King of Montenegro, Oct. 24, 1896; children, Crown Prince Humbert, Prince of Piedmont, born Sept. 15, 1904; Princess Yolande, born June 1, 1901, married April 9, 1923, Capt. Count Carlo Calvi di Bergolo (has one daughter and one son); Princess Mafalda, born Nov. 19, 1902, married Prince Philip of Hesse, Sept. 23, 1925 (has two sons); Princess Giovanna, born Nov. 13, 1907, and Princess Maria, born Dec. 26, 1914. The betrothal of the Crown Prince to Princess Marie Jose of Belgium was announced Oct. 24, 1929, the wedding to take place in January, 1930.

Premier, Benito Mussolini (Interior) took office Oct. 30, 1922.

Minister of Foreign Affairs, Dino Grandi, (1929).

The Kingdom of Italy occupies the entire Italian peninsula, stretching from the Alps southeast into the Mediterranean, with the islands of Sicily, Sardinia, Elba and about seventy smaller ones. On the east is the Adriatic Sea, which it dominates; on the south, the Mediterranean, on the west between the mainland, Sicily and Sardinia is the Tyrrhenian Sea, and further north the Ligurian Sea. The Maritime Alps on the west separate it from France, the Swiss Alps in the north from Switzerland, and the Dolomites Alps from Austria, and the Carnac and Julian Alps on the east from Jugo-Slavia. The great plain shut in by these huge mountains, and the Ligurian Apennines, and watered by the Po (220 miles long) and the Adige, shared by the provinces of Piedmont, Lombardy, Emilia and Venetia, stretches across the top from the Maritime Alps to the head of the Adriatic. Its maximum length is 360 miles. The Ligurian Mountains, circling the Gulf of Genoa,

run down the middle of the peninsula as the Apennines, with many summits like Monte Cimone (altitude 7,103 feet) in the northern part, and the Gran Sasso d'Italia (9,560 feet) in Central Italy, nearing the western coastline in Campagna and running down (with altitudes of about 6,000 feet), through the southern province, Calabria, to the "toe of the boot" at Cap Spartivento. Across the narrow Strait of Messina the mountain range continues through the Island of Sicily with its famous volcano, Mt. Etna (altitude 10,755 feet), having a record of more than 120 eruptions. The active volcano Mt. Vesuvius, with a record of 50 known eruptions, rises to the altitude of about 4,000 feet on the Bay of Naples, and north of the Strait of Messina is the island volcano of Stromboli (3,040 feet).

The length of the peninsula is 760 miles, while its breadth nowhere exceeds 150 miles and does not generally measure more than 100 miles. Italy is slightly larger than New England and New York together, and has more than twice their population.

Two rivers, having the greatest historic importance, rise in the Apennines, and flow west to the sea—the Tiber, which flows through Rome, and the Arno, which waters the Florentine plain. The rivers in the south are unimportant. Between the spurs of the Alps lie seven beautiful Italian lakes, especially noteworthy being Como, Lugano, Maggiore and Garda, the largest, and the last two over thirty miles long. All are of great depth.

The Adriatic coastline from Rimini to Otranto is flat with but one indentation, and with no harbors worthy of the name save Brindisi. The silt brought down by the Po, the Adige and the eastern streams, also rising in the Alps, has built out the land from Ravenna to the Gulf of Trieste, with marshes and lagoons so marked a feature of the mouths of the Po and of Venice. Trieste on the western side of the Istrian peninsula, and Fiume on the eastern side, were Austro-Hungary's seaports on the Adriatic. Trieste has been joined to Italy as a prize of war, and Fiume, after a bitter quarrel, occupation by d'Annunzio's troops and much negotiation, was annexed to Italy in the presence of the King on March 16, 1924, in accordance with the treaty with Yugo-Slavia signed Jan. 27, 1924. Port Barros (the Slav part of Fiume) and the Delta remain in Yugo-Slavia, which has the Basin Thaon de Revel for its shipping and lumber trade, though subject to Italian supervision.

By treaty signed April 5, 1925, Hungary obtained free port rights in Fiume. On the same day the Cabinet authorized the Government to declare 14 free ports, in whole or in part, for 30 years beginning Jan. 1, 1928 at Ancona, Bari, Brindisi, Catania, Cagliari (Sardinia), Fiume, Genoa, Leghorn, Messina, Naples, Palermo, Savona, Trieste, and Venice.

The climate of Italy is sunny, although northern Italy has a cold winter; snow is rarely seen in Naples, and olives, oranges, lemons, figs, sugar cane, cotton and pomegranates flourish in Calabria. The soil is fertile and the people industrious and frugal. Italy, though drained before the war by emigration, is one of the most densely populated states in Europe, having 341.1 people to the square mile.

The population is unusually homogeneous. In pre-war Italy there were about 85,000 of French origin, 10,000 Teutonic in the Val d'Aosta, 81,000 Albanian in Calabria and Sicily, 29,000 Greek, 43,000 Slav, mostly in Cividale, and 12,000 Spanish (Catalans) in Sardinia. In the "redeemed" provinces, formerly Austrian, annexed after the war, there are 215,345 Germans, 326,715 Slovenes, and 141,663 Croats.

The legal age for marriage was reduced May 1, 1929, from 18 to 16 for boys and from 15 to 14 for girls. Under the new concordant with the Vatican, in effect August 8, 1929, a church marriage is sufficient and a civil though permitted is no longer complusory.

The birthrate for 1927 was 26.9; 1926, 27.0: 1925 27.46; 1924, 28.18; 1923, 29.27. The death rate for 1927 was 15.7; 1926, 16.68; 1925, 16.58; 1924, 16.61; 1923, 16.56.

The per capita meat consumption in 1925 was 18.12 kilos (40 pounds).

The religion of the great majority is Roman Catholic, the census of 1921 reporting 123,253 Protestants; 34,324 Jews, and 847,532 of no religion.

Emigration has been very heavy. The United States census of 1920 reported 1,610,109 Italian-born in the United States alone. In the decade before the war about 650,000 emigrants left Italy annually, and about 500,000 returned each year, being a net loss to Italy of 1,500,000 in that period. In 1914 there were about 1,500,000 residing in Brazil, 1,000,000 in Argentina, 450,000 in France, 220,000 in Switzerland, 120,000 in Germany, and 150,000 in Northern Africa. The war checked emigration greatly, but it reached 230,000 in 1919, 412,000 in 1920, 279,000 in 1921, 277,000 in 1922, 395,000 in 1923, 364,614 in 1924, 312,038 in 1925, 283,442 in 1926, and 228,052 in 1927.

The Government statistical bureau in June, 1928, estimated the number of Italians residing outside the Kingdom at 9,250,000.

Tourist trade has fallen off greatly from pre-war figures and tourist expenditures in 1928 were estimated at about 2,700 million lire.

Unemployment has been severe. On Jan. 1, 1922, the number of persons out of work was 541,775; on July 30, 1923, 213,590; on Dec. 31, 1923, 258,000; on Aug. 31, 1924, 118,000; on Nov. 30, 1924, 136,000; on May 31, 1925, 101,000; on Aug. 31, 1925, 74,517; on Oct. 31, 1915, 85,770; on May 31, 1926, 98,000; on Aug. 31, 1926, 78,300; on Nov. 30, 1926, 149,000; on Jan. 31, 1927, 225,000; March 31, 228,000; June 30, 214,600; Dec. 31, 414,283; June 30, 1928, 297,000; Sept. 30, 268,000; Dec. 31, 363,000; March 31, 1929, 294,000; June 30, 192,000.

Italy has ten universities dating from the thirteenth century or the first years of the fourteenth. Famous among these are Bologna (founded 1200), with 2,408 students; Genoa (1243), 1,696 students; Naples (1224) 5,920 students; Padua (1222), 2,679 students; Pavia (1300), 1,580 students; Pisa (1338), 1,400 students; Rome (1303), 5,790 students; and Turin (1404), 2,250 students. The total number of students at the twenty-five universities in 1927 was 37,175.

Much progress has been made in combating illiteracy, which has been very great, especially in Calabria and other southern provinces. The percentage has been reduced in 50 years from 69% in 1871 to 27% in 1921. The census of 1871 returned but 31 out of 100 above the age of six that knew how to read. In 1881 the number had increased to 38; in 1901 to 51; in 1911 to 62; and in 1921 to 73 (76 among males and 70 among females).

Primary grade education is compulsory. Primary schools in 1927 numbered 7,076 with 12,715 teachers and 607,091 pupils; public and private elementary schools, 35,420, with 98,679 teachers and 3,821,539 pupils; secondary schools, Government, 1,024, with 12,607 teachers and 181,066 pupils, private 641 ,with 5,573 teachers and 46,517 pupils.

Agriculture is the chief industry. The total land area now comprises 76,617,691 acres, of which in 1928 but 8.3% were unproductive. Of the cultivated area, 17,559,971 acres are given over to cereals; 5,273,191 to temporary grass and forage; 10,032,526 to other arable and fallow; 16,792,295 to meadows and permanent pastures; 3,686,969 to horticulture; 13,790,504 to forests, including chestnuts; and 3,089,970 productive, but uncultivated. The number of peasant proprietors is about 4,000,000, mostly in Northern Italy. The Government is speeding land reclamation schemes and intensifying technical training and has created an agricultural credit bank.

The wheat acreage in 1928 was 12,262,911 (production 6,221,480 metric tons); maize, 3,854,400 (2,219,500 tons); oats, 1,286,138 (702,710 tons); rye, 310,600 (166,000 tons); barley, 560,168 (240,020 tons); rice, 351,322 (696,100 tons); beans, 1,356,931 (470,940 tons); potatoes, 874,228 (1,945,300 tons); and sugar beets, 218,606 (2,015,400 tons). There were 5,631,480 acres given over to olives (production 1927, 35,240,000 gallons of olive oil), and 10,581,400 to vineyards (production 1927, 784,206,000 gallons of wine).

Silk culture flourishes; the production of cocoons in 1928 was 155,716,000 pounds and about 111,778,000 in 1927. Dairy farming and cheese making is important in Northern Italy. Livestock in 1926 numbered, horses, 1,000,000; asses, 952,000; mules, 503,000; cattle, 7,100,000; pigs, 2,750,000; sheep, 11,000,000; and goats, 3,000,000. The total value is estimated at 23,000,000 lire.

Italy has suffered greatly from deforestation, but a determined effort has of late been made to reafforest the country. The chestnut crop is of great value. There are about 30,000 vessels and boats and about 110,000 men engaged in fishing.

Italy is not rich in mineral deposits and is especially lacking in coal. Much hydroelectric power is going to waste in the mountains, but in 1925 over 2,000 generating stations produced 3,200,000 h. p. (2,860,000 h. p. in 1924). The total consumption of energy in 1926 is estimated at 9,000 million k. w. h. The total investment was about $254,800,000. Italy is a large producer of sulphur, chiefly in the volcanic regions of Sicily. The output of sulphur ore (refined and ground) in 1927 being 338,000 metric tons.

Italy is now equipped with nine powerful coke blast furnaces, 113 electric steel furnaces of large and medium capacity and sixty small ones. Production was 467,000 metric tons of pig iron in 1925; 522,000 tons in 1926; 596,100 tons in 1927; and 396,000 tons in 1928; and 1,685,000 tons of raw steel in 1925, 1,712,000 tons in 1926; 1,530,600 tons in 1927; and 1,756,000 tons in 1928.

Zinc ore production in 1927 was 178,790 metric tons and of lead ore 52,330 metric tons. The posses-

sion of the quicksilver mines of Idria in the territory taken from Austria, north of Fiume, makes Italy the foremost producer in the world, the output being 1990 metric tons in 1927. The quarry industry is important. Bauxite production in 1927 was 90,000 metric tons, and of aluminum 2,300 tons.

Italy had in 1928, 123 cotton spinning mills with 5,300,000 spindles, and 381 mills with 150,000 looms. Employees numbered 65,000. The artificial silk (rayon) industry is increasing rapidly. Production was 10,000,000 pounds in 1923; 32,297,000 in 1925; 37,478,000 in 1926; and 50,265,000 in 1927.

The economic census taken October, 1927, returned 731,447 industrial establishments employing 3,939,960 persons, and 821,666 commercial establishments employing 1,640,290 persons.

The deficit in operation of the state railroads (mileage 9,794), which was nearly 1,000 million lire in 1922-23 and nearly 500 million lire in 1923-24, was wiped out in 1924-25 by rigid economics and 175,800,000 lire earned. The surplus reached 378,000,000 lire in 1925-26. Traffic has increased 30% since the war. The railroad staff, which on June 30, 1923, numbered 205,470, was reduced to 171,937 on June 30, 1926. The government has electrified 531 miles and will electrify 4,000 miles in all. The deficits in the postal and telegraphic service which was 500 million lire in 1920-21, 448.2 million in 1921-22, 340 million in 1922-23, and 66.5 million in 1923-24, was also wiped out and 29,879,549 lire earned in 1924-25, and 65,500,000 lire in 1925-26.

The telephone system was handed over on July 1, 1925, to five private enterprises, the country being zoned and the government retaining the interurban and grand trunk lines. The government receives from 3% to 4% of the gross receipts and a proportion of net profits above 7%.

The number of steamships in the Italian merchant marine July 1, 1929, was 948, with a gross tonnage of 2,742,594; and of motor ships, 157, with a gross tonnage of 472,733. In 1928 there entered her ports 245,106 ships of 72,747,963 net tons, of which 235,429 of 56,270,529 net tons were Italian. The chief ports in order of tonnage entered were Genoa, Naples, Palermo, Leghorn, Venice, Messina and Catania. Genoa was the first port in the Mediterranean in 1924 and 1925, but yielded place to Marseilles again in 1926 when 5,058 vessels of 8,982,539 net tons entered and discharged 6,192,142 tons of cargo. The amount of ship subsidies payable from 1926 to 1946 on 20-year "indispensable" service contracts is 2,600,050,000 lire; on 10-year "useful" service contracts, 507,300,000 lire; and on 5-year "useful" service contracts, 97,429,500 lire.

Italy has 111,613 miles of highways of which 12,640 are first class. An extensive program of modern reconstruction that may ultimately reach 5,000 million lire was undertaken on October 1, 1928, with an initial appropriation of 300 million lire. Italy had, in 1927, 216,710 automobiles, the ratio being one car to 245 persons.

For a public works program chiefly for farm land reclamation or improvement $24,670,000 is to be spent from July 1, 1929 to June 30, 1930. The Pontine Marshes and the Campagna will be the first to be drained.

WORLD WAR LOSSES.

Italy, divided, dismembered even for centuries, began to take shape as a unity when, following the war of 1859, Lombardy, by the peace of Zurich, came under the crown of King Victor Emmanuel II. of Sardinia of the house of Savoy. By plebiscite in 1860 Parma, Modena, the Romagna and Tuscany joined, to be followed at once by Sicily and Naples, and by The Marches and Umbria. The first Italian Parliament assembled in February, 1861, and on March 17, 1861, declared Victor Emmanuel King of Italy. Mantua and Venetia were added in 1866, an outcome of the Austro-Prussian war. The Papal States were taken possession of by Italian troops on Sept. 20, 1870, after the withdrawal of the French garrison in the Franco-Prussian war (see Vatican State), and by plebiscite on Oct. 2 were annexed to the kingdom, thereby rounding out United Italy. Italy suffered heavily in the World War, her northeast provinces having been overrun by the Austrians and Germans after a crushing defeat at Caporetto. Her loss in men was 650,000 killed and missing, and the total expenditure arising from the war, according to the report of the Parliamentary Commission of Inquiry, issued in March, 1925, was approximately 144,000,000,000 lire ($27,792,000,000 at par of exchange).

The total expenditures to July 1, 1923, for reconstruction of the devastated provinces was 12,148 million lire, out of a total requirement of 18,718 million lire.

The air force June 1926, consisted of 89 squadrons with about 150 airplanes. By royal decree of May, 1925, is to be expanded during the next five years to 182 squadrons with a personnel of 31,566.

The appropriations for the navy for five years from 1926 amounted to 3,392 million lire, with 1,219 million in the budget for 1927-28, and 1,152 million for that of 1928-29. The avowed purpose is complete naval equality with France. The Trento, a swift 10,000-ton cruiser and sister to the Trieste, was begun at Leghorn on Feb. 9, 1925. A new navy building program was adopted on Jan. 25, 1929. It calls for two 10,000-ton cruisers of the Trento class, two 5,000-ton scout cruisers in addition to four already authorized, five destroyers and five submarines. The cost is about 1,828 million lire.

The army numbered 17,684 officers and 283,200 men in 1927. The reserve numbers 2,350,000. Service is compulsory and universal.

GOVERNMENT UNDER FASCISM.

The country was governed under an expansion of the Constitution granted to Sardinia in 1848. The executive authority is exercised by the King, acting through a Minister. The legislative power rests with the King and a Parliament of two Houses. The Senate is composed of nine Princes of the Blood and eminent men nominated for life by the King; the number in 1926 was 393. The electoral law of 1920 provided for universal suffrage of all men and women 21 years old, and the electoral reform of 1919 provided for proportional representation.

Fascism has been in power since the march to Rome, Oct. 22, 1922.

Partial municipal suffrage was granted to women in a law passed May 16, 1925. It was restricted to women over twenty-five who had been decorated, or were mothers or widows of war dead, guardians over children, literate and paying annual taxes of not less than forty lire.

The duration of Parliament is five years, but the King has power to dissolve the Lower House at any time; a new election must follow within four months. All money bills must originate in the Lower House. Premier Mussolini forced through a bill, Nov. 18, 1923, reforming the electoral law so as to assign two-thirds of the seats in the Chamber of Deputies to the party obtaining the largest number of votes in the elections, the remaining third being distributed proportionately among the minority lists. In the election of April 6, 1924, the Fascista therefore won 356 seats in a bloc; the Catholic Party won 39 seats; other constitutionalists, 45; Socialists, 46; Communists, 19; Republicans, 7; Slavs and Germans, 6.

Municipal self-government was taken away from Rome in October, 1925, and the city administration placed in the hands of a Governor appointed by the Government by royal decree. Don Francesco Boncompagni, Prince of Piombino, was appointed mayor Sept. 9, 1928. He has full powers hitherto possessed by the mayor, aldermen and council.

There are 9,148 Communes. All had been self-governing. By the law of Feb. 4, 1926, the administration of all with less than 5,000 inhabitants (over 7,000 in number), was vested in a "podesta," appointed by the Government for five years. By decree of Aug. 30 this was extended to all Communes.

A drastic press censorship law, passed in July, 1924, was put vigorously into effect on Jan. 1, 1925.

In five years Premier Mussolini has concluded treaties of conciliation and arbitration with these nations: Great Britain, Yugo-Slavia, Switzerland, Austria, Germany, Spain, Roumania, Albania, Turkey and Hungary.

The obligatory eight-hour day and forty-eight hour week established by decree in April, 1923, gave way on June 29, 1926, to another decree extending the working day to nine hours. Further decrees (which by act of Parliament in December, 1925, have the force of laws), on that day restricted daily newspapers, already under extreme Fascist censorship or control, to six pages, only one newspaper to be permitted to each province; prohibited the opening of new bars, cabarets, cafes, hotels, pastry shops and all-night resorts; prohibited construction of houses of a luxurious type, and indefinitely suspended all provincial, communal and municipal elections. By laws approved May 18, only Fascist labor unions are recognized and all labor disputes must be submitted to compulsory arbitration.

Premier Mussolini before the Fascist Grand Council at Rome, April 21, 1927, promulgated the "Fascist Charter of Labor," which asserts the State's undisputed right directly to control all forces of production, acting as guardian of both capital and labor, establishing equalities of rights and duties between them, compelling both to carry out their tasks for the common good, punishing infractions, and maintaining peace between them at any cost. Capital and labor are organized in legally reorganized units called associations or syndicates, all relations (including social welfare), between them being carried out through broad collective contracts. Strikes, lockouts, sabotage, etc., are absolutely forbidden and

especially created labor courts are given final authority to settle disputes. The charter guarantees a six-day week, holidays on pay, indemnity on discharge, but does not fix hours and declares against the minimum wage.

NEW FASCIST ELECTORAL LAW.

Premier Mussolini, Il Duce, condemned and rejected popular sovereignty and representative government in a report presenting to the Chamber of Deputies on March 2, 1928, the new Fascisti electoral bill. This bill was passed on May 12 by the Senate by a vote of 161 to 45 with over 100 absentees; and by the Deputies almost unanimously May 16; and received royal approval May 21. The law abolished the principle of geographical representation. It provides that a list of 800 candidates for the Chamber of Deputies shall be chosen by certain Fascist syndicates and trade unions selected by a committee of 10 and from these the Fascist Grand Council will select 350 and add 50 of their own choosing to form the list of 400 which will then be submitted to the voters. The electorate must accept or reject the list as a whole. The age limit for deputies was abolished and so was universal suffrage. The franchise was revised. It was granted to all men between the age of 18 and 21, provided they are married and have sons; to men over 21 who pay at least 100 lire yearly in taxation or are owners of at least 500 lire of state bonds; to civil servants; and to the Catholic clergy and ministers of other cults admitted by the State.

The Fascist Grand Council by this law is elevated to the dignity of an integral part of the government, a move to perpetuate the Fascist regime. The Grand Council is composed of the presidents of the Senate and the Chamber, all the ministers, and the chief leaders of the Fascist organization. The premier names the members who are responsible to him alone; they in their turn will name his successor when his post becomes vacant. To the Grand Council Mussolini announced in February the political program for 1928-1929; the Chamber to be dissolved in December, the new list of deputies to be submitted to the electorate on March 24, 1929, and the new Chamber to convene April 21; the November, 1928, sitting is to formally approve the law laying down the functions and prerogatives of the Fascist Grand Council, the promulgation of the Charter of Labor, the law on the new administrative system of the provinces, and the law for the integral reclamation of the national territory. It was carried out.

The list containing the names of the 400 deputies to the first "Corporative Parliament" was submitted to the electorate March 24, 1929. Of the 9,650,570 qualified voters 8,506,576 voted "yes", 136,198 voted "no", and 999,830 (10.37%) abstained. Of those who voted 98.22% voted affirmatively. In the 1924 election only 63% of the electors voted. The active membership of the Fascist party was 1,051,708. In the chamber are 191 former deputies and 209 new men. Every region is represented. The largest group is the professional and artistic confederation with 82 deputies.

Premier Mussolini reorganized his cabinet on September 12, 1929, retaining for himself the Interior portfolio. He turned over five of the eight portfolios he had held,—foreign, war, marine, aviation and corporations,—to the men who had been serving as the under-secretaries, and made General de Bono, former Governor of Tripolitania, his successor as governor for the colonies, and Michele Bianche his successor as Minister of Public Works. Giacomo Acerbo was made Minister of Agriculture and Forests, and Balbino Giuliano Minister of Public Education.

(For the treaty with the Vatican see article on the Vatican State).

The thirteen National Fascist Organizations are divided into two groups, Employers—subdivided into six National Confederations, Industry, Agriculture, Merchants, Maritime and Aerial Transport, Land Transport and Inland Navigation, and Bankers; and Labor—subdivided into seven National Syndicates—Industry, Agriculture, Commerce, Maritime and Aerial Transport, Land Transport and Inland Navigation, Banks, and Intellectuals.

The various Fascist organization had 6,814,703 enrolled members on Oct. 31, 1928. In the party proper there are 1,027,010 men and 88,006 women, 66,253 "Young Italians," 365,781 "Little Italians," and 16,965 members of the university group, a total for the party of 1,564,015. Nearly 30,000 were expelled during the year. The Avanguardisti, or youth's organization on military lines, has 325,127 members and the Balilla or boys' organization has 780,937 members. There are 3,577,128 members of the syndicate confederations group and 567,496 members in other associations.

The Fascist Militia numbers 23,326 officers, 252,902 rifles and 16,313 revolvers, under command of General Bazan. Premier Mussolini announced Feb. 21, 1928, that the Fascist Militia would be incorporated in the regular army as an independent unit in case of war. Eighty thousand youths on reaching the age of 18 took the Fascist oath on March 25.

Under orders from Premier Mussolini, Prefect Mori of Palermo, Sicily, given a free hand, succeeded in 1927-28 in breaking up the notorious Mafia, which had for years terrified the island. After a trial that lasted three months, 147 members of the band were convicted of various crimes from larceny to murder in January, 1928. The second great trial lasted nine months and ended may 1, 1929, with a conviction of 150 of the 161 prisoners of crimes ranging from murder to cattle maiming.

The Fascist Government reduced the number of wine shops from 20,000 to 11,000 in 1927.

There has been much friction in Alte Adige (South Tyrol) owing to laws prohibiting the use of the German language, etc., by the inhabitants of this former Austrian province. On Oct. 1, 1929 Premier Mussolini announced that its Italianization was completed.

STABILIZATION OF THE LIRA.

Italian currency was reestablished on a gold basis by royal decree, Dec. 22, 1927, on a basis of 5.26315 cents, 19 lire to the dollar, 92.46 lire to the pound sterling, and 3.66 lire to the former gold lire, which had a value of 19.3 cents. (See The World Almanac for 1929, page 631, for details.)

The note circulation of the Bank of Italy on Aug. 31, 1929 was 16.701 million lire, with a cover of 5,159 million lire gold, and 6,794 million lire credits and balances abroad. The Bank of Italy increased its capital on May, 1928, from 240 million lire to 500 million lire (about $26,250,000).

The public debt on July 31, 1928, was 86,382 million lire. The chief items are: Pre-war debt, 12,352 million lire; national loans, 35,938 million lire; Lictorial national loan, 27,500 million lire; and 9-year treasury bonds, 7,640 million lire.

Recent budgets in million lire are:

	Effective Revenue.	Capital Receipts.	Effective Expenditure.	Capital Expenditures.
1926–27	21,450	5,168	21,014	3,578
1927–28	19,513	21,269	18,747	6,989
1928–29	17,643	547	17,372	866
1929-30	18,539	884	18,201	1,133

Foreign trade figures are (lira = $0.046 in 1923 $0.0436 in 1924, $0.0398 in 1925, and $0.0389 in 1926):

Imports,	1922... lire	15,764,764,872	($709,414,419)
"	1923... "	17,225,041,858	($790,977,000)
"	1924... "	19,388,445,000	($884,566,000)
"	1925... "	26,157,437,186	($1,041,066,000)
"	1926... "	25,871,360,000	($1,006,395,570)
"	1927... "	20,374,100,000	($1,075,752,480)
"	1928... "	22,103,853,000	($1,163,325,780)
Exports,	1922... "	9,302,367,061	($418,600,517)
"	1923... "	11,058,888,807	($510,456,000)
"	1924... "	14,318,299,000	($626,283,000)
"	1925... "	18,265,427,135	($726,964,000)
"	1926... "	18,670,600,000	($726,286,340)
"	1927... "	15,815,400,000	($824,493,120)
"	1928... "	14,529,132,000	($763,468,220)

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$150,894,442	$63,930,031
1923	167,531,956	92,268,339
1924	187,040,152	75,004,095
1925	205,150,463	102,240,930
1926	157,401,862	102,525,888
1927	131,650,544	108,970,260
1928	162,135,329	101,811,061

Italian Colonial Possessions

ERITREA.

AREA, 45,435 square miles.
POPULATION, census of 1921, 405,681; of which 3,900 are Italians.
CAPITAL, Asmara; population, 14,711.
Governor, Corrado Zoli (1928),

Italy's colonial venture in Africa began in 1870 when the port of Assab, in the extreme southern part of Eritrea was purchased. Lagging interest was revived in 1885, when the colonial project was vigorously pushed. An effort to establish a protectorate over Abyssinia was made in 1889, but was upset by King Menelek, who, with an army of 80,000, annihilated a force of 12,000 Italians at the Battle of Adowa in 1896. Eritrea was constituted a colony in 1890.

Eritrea stretches for 620 miles along the African coast of the Red Sea from Cape Kasar to Cape Dumeireh. To the west it is bordered by the Soudan and on the south by Abyssinia. The lowlands along the coast are very hot, but the uplands are cool, sometimes cold. Irrigation is necessary to supplement rainfall for the crops, and the soil is poor. Agriculture and stock raising are the chief industries. There is a railroad 75 miles long connecting the seaport Massawa (population, 2,275) with the capital, Asmara (altitude 7,765 feet), which

is being extended via Keren to Agordat (109 miles) to open up a cotton-growing district. Gold is mined in Hamassen and petroleum is found, but there has been as yet no development.

Italy in 1928 gave Ethiopia free port facilities at Assat at the extreme southern end in return for a concession to an Italian syndicate for the immediate construction of a 500-mile motor road from Assat via Dessia to Addis Ababa, the capital of Ethiopia. It will open up a rich territory.

Efforts to settle large numbers of Italians in the uplands, the only part of the country where Europeans can live permanently, have been abandoned.

The budget for 1927–28 balanced at 42,455,250 lire; and that for 1928–29 at 42,482,300 lire. Military expenditure is about 16,000,000 lire yearly.

Imports, 1927, were 201,360,446 lire, and exports, 80,198,371 lire.

ITALIAN SOMALILAND.

AREA, estimated 254,000 square miles.

POPULATION, about 1,000,000.

CAPITAL and port, Mogadishu; population, estimated, 14,000.

Governor, De Guido Corri (1928).

Italy's African colony, the Italian Somaliland, extends along the Indian Ocean from the Gulf of Aden to the Juba River. The coast line runs in a northeast-southwest direction, is 1,100 miles long, with no indentation of importance. Jubaland, the valley of the Juba River, was taken from Kenya (German East Africa) and added to the colony to balance British and French acquisitions of former German possessions. This is called Transjuba and has an area of about 33,000 square miles and a population officially estimated at 12,000. Agriculture and cattle and camel raising are the chief industries. In 1927, 363 vessels entered the ports.

The budget for 1927-28 balances at 80,505,250 lire; this includes a state contribution to the receipts of 55,515,250 lire; the budget for 1928–29 balances at 76,255,250 lire.

The imports for 1927 were 156,246,673 lire, and exports 25,300,950 lire.

TRIPOLITANIA AND CYRENAICA.
(Italian Libya.)

AREA, Tripolitania, est., 350,000 square miles; Cyrenaica, 230,000 square miles.

POPULATION, estimated, Tripolitania, 570,700, including 20,716 Europeans, of which 18,093 were Italians; Cyrenaica, 229,700, including 9,719 Europeans, of which 9,402 were Italians. In all Italian Libya the population is 30 per cent. Arabs, 40 per cent. Negroes, 23 per cent. Jews, 7 per cent. Europeans.

CAPITALS, Tripoli, pop. 55,243, of whom 11,651 are Italians and Benghazi, pop., 30,056.

Governor, Marshal Pietro Badoglio (Dec. 1928.)

Tripolitania and Cyrenaica, or Italian Libya in North Africa, extend along the Mediterranean Sea from Egypt on the east to Tunis (French) on the west. On the south they extend into the desert, to French West Africa, and the Sudan, the 22° parallel being the boundary line. The boundary on the east begins at El Sollum, Egypt, a somewhat irregular line south to a point 30 miles west of Siwa Oasis, thence due south on the 25° east meridian, as arranged with Egypt in 1925.

Tripoli, formerly one of the Barbary States and independent since 1714, was reconquered by Turkey in 1835. During the Turko-Italian war of 1911-12, Italy proclaimed the annexation of Tripoli, which was recognized in the Treaty of Ouchy, Oct. 18, 1912.

The territory was divided into two independent districts for administrative purposes May 17, 1919. In both provinces natives had equal rights with Italians and there was a certain amount of local autonomy by elected local Parliaments, but on March 9, 1927, the organic law of 1919 was repealed. The legislative power is reserved to Rome, and the governors have purely administrative functions. Italian courts have full jurisdiction.

The prevailing religion is Mohammedan, and Arabic is generally spoken.

The country is rather barren, but has date palm orchards, olive groves, lemon, almond and fig trees, and vineyards. Some cereals, chiefly barley, are grown. Pasturage is abundant in Cyrenaica. Sponge fishing is important; the value of the product in 1926 was 11,965,335 lire. There is considerable caravan trade to the south. The total railroad mileage is 132.

Tripolitania budget for 1928-29 was: Revenue, 73,300,000 lire; State contribution, 150,419,250 lire; total, 223,719,250 lire; expenditure, civil, 56,163,000 lire; military, 167,556,250 lire.

Cyrenaica budget for 1928-29 was: Revenue, 46,400,000 lire; State contribution, 159,096,250 lire; total, 205,096,250 lire; expenditure, civil, 59,237,000 lire; military, 146,259,250 lire.

The trade of Tripolitania in 1927 was: Imports, 246,056,377 lire; exports, 24,259,201 lire. The trade of Cyrenaica in 1927 was: imports, 178,238,196 lire; exports, 14,908,800 lire.

Trade of Italian Africa with the United States was:

Cal. Year.	Imports.	Exports.
1922	$41,109	$7,869
1923	47,324	83,047
1924	30,687	917
1925	95,384	1,697
1926	14,998	1,443
1927	54,597	10,595
1928	80,746	22,010

Fourteen Aegean Isles were occupied by Italy during the war of 1912 with Turkey and though claimed by Greece have been retained by Italy. Rhodes has been fortified. The other islands just off Asia Minor are Egeo and the Dodecanese. The area is 981 square miles, and population (1922), 104,523.

Tientsin—The Italian concession (June 7, 1902) lies on the left bank of Hai-Ho and is about 130 acres with a population of 4,675 Chinese, sixty Italians, and 413 other Europeans in 1925.

JAPAN, EMPIRE OF

AREA, Japan proper, 148,756 square miles, Korea (Chosen), 84,738 square miles; Formosa (Taiwan), 13,944 square miles; Pescadores (Hokoto), 47 square miles; Japanese Sakhalin (Karafuto), 13,253 square miles. Total, 260,738 square miles.

POPULATION, census of Oct. 1, 1925, Japan proper, 59,736,822; Korea (chosen), 19,522,945; Formosa, (Taiwan), 3,994,884; Japanese Sakhalin (Karafuto), 203,754; total, 83,458,405. Kwantung (leased territory in Manchuria), 1,054,074; Mandate territory (Islands in the South Seas, 26,294; grand total, 84,568,773). Japanese subjects residing abroad, June 30, 1925: Asia, 263,690; Europe, 2,934; America, 221,444; Oceania, 137,298; Africa, 64; total, 625,430. Foreigners residing in Japan, Dec. 31, 1925, 28,598, of which 319 are attached to diplomatic and consular corps.

CAPITAL, Tokio, pop. of city proper (1925 census): 1,995,303 (metropolitan district, 3,359,674). Other cities with population over 100,000 (1925 census): Osaka, 2,333,800; Nagoya, 768,560; Kyoto, 679,976; Kobe, 644,212; Yokohama, 405,888 (enlarged to 518,902 on April 1, 1927, by addition of nine towns with 112,204 pop.); Hiroshima, 195,731; Nagasaki, 189,071; Hakodate, 163,972; Kanazawa, 147,420; Kumamoto, 147,174; Fukuoka, 146,005; Sapporo, 145,060; Sendai, 142,894; Kure, 139,380; Otaru, 134,470; Kagoshima, 124,734; Okayama, 124,511; Yawata, 118,376; Nigata, 108,941; Sasai, 105,009; Yokosuka, 101,792.

Emperor, Hirohito (the 123th of his line), born Apr. 29, 1901; succeeded his father, Yoshihito, Dec. 26, 1926; and crowned in Kyoto November 10-14, 1928. He was constituted Regent Nov. 25, 1921, because of his father's ill health; married to Princess Nagako Uni, Jan. 26, 1924; children; Princess Shigeko, born Dec. 6, 1925; Princess Tachiko Hisa, born Sept. 10, 1927, died March 7, 1928; a Princess, born Sept. 30, 1929. *Heir presumptive*, his brother, Prince Yasuhito Chichibu, born June 25, 1902, married Miss Setsu Matsudaira, Sept. 28, 1928.

Premier, Yuko Hamaguchi, July 2, 1929.

Finance Minister, Junnosuke Inofye.

Foreign Minister, Baron Kijuro Shidehara.

The island empire of Japan lies in the north Pacific Ocean off the coast of China and Siberia from 21° 45′ north latitude, the southern point of Formosa (Taiwan), due east of Hong Kong, to 50° 56′ north latitude, the last of the Kurile Islands, a few miles south of Kamchatka. It includes also the southern half of the island of Sakhalin, and the ancient Kingdom of Korea, annexed May 25, 1915, on the mainland. Japan also holds the Kwangtung peninsula (Port Arthur and Dairen) on a 99-year lease, and has the mandate for the Marshall, Caroline, Ladrone and Pelew Islands, former German possessions in the Pacific.

The southernmost island is subtropical; the northernmost subarctic. Were the empire stretched out in the Atlantic off the coast of the United States at the same latitudes, Formosa would lie across Cuba and Southern Florida. Tokio would be due east of Norfolk, Hakodate due east of New York, and Sakhalin would lie athwart Newfoundland with the northernmost island, Paramushir, off Labrador. In area Japan proper is about the size of New York, New Jersey, Pennsylvania and Ohio combined.

Japan proper, the ancient empire, bears a strong likeness to the British Isles, similarly separated from the continent of Europe; its 148,756 square miles compares with Great Britain and Ireland's 121,633, and its 59,736,822 inhabitants with the United Kingdom's 47,307,601. The Japanese coast is even more deeply indented, its coast line measuring 17,150 miles. Few places in Japan are far removed from the mountains or really distant from the sea. The northern islands are a continuation of the Russian Karafuto chain running down through Yezo and the mainland. The continuation of the Kuentun mountain range of China appears in the southern islands, the ranges meeting in the grand Japanese Alps. In the vast transverse fissure crossing the mainland from the Sea of Japan to the Pacific rises the group of volcanoes, mostly extinct or dormant, with the majestic sacred mountain Fujisan lifting its white cone 60 miles west of Tokio to an altitude of 12,425 feet. The earthquake zone—where the average is said to be four slight ones a day, with very serious ones only every six or seven years—has its greatest centre along the Pacific Coast near the Bay of Tokio.

A severe eathquake on March 9, 1927, destroyed or wrecked 10,000 houses, killed 2,275 persons, and injured 3,440, about 50 miles north of Kyoto.

THE GREAT EARTHQUAKE.

Japan suffered the worst disaster in its history on Sept. 1, 1923, when a great earthquake shock, followed by a tidal wave and fire, destroyed the capital city, Tokio, the third largest city in the world, Yokohama, the chief port, and many other towns and health resorts.

The total number of casualties was 246,540, of which 103,733 were wounded, 99,331 killed and 43,476 missing and probably all killed. Houses destroyed by fire numbered 447,128; completely destroyed by collapse, 128,266; washed away by tidal wave, 868; in addition, 126,233 houses half collapsed. The property loss is placed officially at 5,500,000,000 yen. The government spent approximately 400,000,000 yen on reconstruction work.

The vast reconstruction work was near completion on the sixth anniversary of the earthquake, 90% so in Yokohama. Under the supervision of the Municipal Reconstruction Bureau Tokio has been zoned and broad paved streets suitable to modern traffic have been constructed, requiring the moving of 203,000 houses. The road budget calls for 257,458,000 yen.

A new canal is being constructed, an old one filled, and eleven repaired. Of the 583 bridges in Tokio, 69 were shaken down by earthquake shocks, and 289 destroyed by fire; 97 main bridges are being built, and 329 others.

Tokio plans the construction of electrically operated subway systems, the first section 1.5 miles, has been built and the program calls for 41 miles of subways at a total cost of 187,000,000 yen.

The reconstruction of the sewer system requiring about 43.5 million yen, is about 75 per cent. completed.

Building construction has been in keeping with the dignity befitting a modern imperial capital, with a great reduction of fire hazzards, and the creation of wide streets and parks.

Reconstruction work in Yokonama has been slower. On Oct. 1, 1924, the city had 389,700 inhabitants, which increased to 405,888 on the 1925 census. On Apr. 1, 1927, nine towns and villages were incorporated with the city, making its population 518,902, and trebling its area. Port conditions have been greatly improved.

Separating the islands of Shikoku and Kiushiu from the mainland is the wonderfully beautiful Inland Sea, opening both into the Sea of Japan and the Pacific. It is 255 miles long and 56 wide, with a coast line of 700 miles and a surface expanse of 1,325 square miles.

Heavy snowfalls are frequent on the Japan Sea slopes of the mountains of Yezo, while the Pacific side, by which flows the Japan Current, enjoys delightful winter weather. There is an abundant rainfall. The streams are short, swift and often unruly, of little value for transportation, yet offering a vast but as yet little developed supply of hydroelectric power, estimated at 10,000,000 kilowatts. Myriads of waterfalls add their charm to the magnificent scenery. The "Splendor of the Sun" at Nikko makes an unbroken plunge of 350 feet. There are a thousand mineral springs.

Three-fourths of the mountain land is uncultivatable, and the soil of the rest is only moderately fertile, yet by intensive cultivation, hard work and great frugality more than half the people wrest their living from the soil. There is a rich supply of fish of many kinds in the sea, and fish is a staple diet, so a hardy, daring, self-reliant race of fishermen has been developed.

About three-fifths of the arable land is owned by small peasant proprietors, with holdings of an acre, more or less, each. More than half the land is used for growing rice, the staple food of the country. The number of acres planted in 1928 was 7,282,480. The crop in 1926 was 284,572,925 U. S. bushels, and in 1927, 317,893,483 bushels, the largest since 1920, yet it was necessary to import 21,607,000 bushels in 1927 to the value of $37,481,000.

Large crops are raised of wheat, barley, rye, millet, buckwheat, maize, beans and potatoes, also tobacco and tea. Mulberry trees are widely grown and in 1926 the number of families engaged in silk culture was 2,060,351, with an output of 867,688,830 pounds of cocoons valued at 661,404,737 yen. There were 259,842 boilers used in the silk industry employing 23,822 men and 286,096 women. Production in 1928 was 764,515,837 pounds.

Raw silk was exported in 1927 to the value of $352,675,000 ($345,005,000 in 1926) and silk textiles to the value of $66,317,000 ($62,543,000 in 1926).

INDUSTRIES.

In the decade 1908-18 the number of industrial establishments doubled, increasing from 11,390 to 22,391, with horsepower increased from 379,556 to 2,006,098; men operatives increased from 248,751 to 646,115, and women operatives from 400,925 to 763,081. By the end of 1924 the number of factories had again doubled—48,394—with 1,977,000 employees.

The government census returned on Dec. 31, 1924, 4,245,616 industrial workers; 1,835,991 in privately owned factories; 151,304 in government factories; 308,178 in mines; and 1,950,146 in other factories. Of these male operatives numbered 2,882,983 and female, 1,362,636. The largest number were in the Osaka district, 499,636; in Tokio, 381,583; in Fukuoka-Ken, 340,048; in Kobe, 229,706.

The cotton mills also prospered greatly during the war; the capital was increased 288 per cent. by June, 1920, over the pre-war figure, with 3,689,000 spindles as compared with 2,409,900 in 1914. At the end of 1918 there were 6,710 factories with 65,316 men and 218,041 women operatives. The loss in the earthquake was about 15 per cent. (680,000 spindles). Production had recovered in 1928, when the spindles numbered 6,289,174, and the looms 79,777; the mill consumption of cotton was 2,083,905 bales of 500 pounds, of which were American.

The new factory law in effect July 1, 1929 abolished late night work by women and children, and put in effect two 8½-hour shifts from 5 a.m. to 2 p.m. and 2 p.m. to 11 p.m.

In 1928, 1,418,450,000 square yards of cotton textiles were exported, and 70,309 bales of cotton yarn.

Export of toys in 1925 amounted to 10,788,702 yen.

Japan has become a heavy producer of coal, 31,271,000 metric tons were mined in 1919; 29,245,384 in 1920; 26,220,517 in 1921; 27,701,711 in 1922; 28,948,820 in 1923; 30,287,590 in 1924; 31,459,415 in 1925; 31,426,549 in 1926; and 33,400,000 in 1927. Export in 1927 was 2,173,000 tons. Her total resources are estimated at 9,259 million tons, of which the workable resources are 1,238 million tons. With the exception of one field of sixty million tons of anthracite, all the coal is bituminous. Of petroleum, 1,789,000 barrels were produced in 1923, 1,959,000 in 1924; 2,000,000 in 1925; 1,760,000 in 1926; and 1,700,000 in 1927. The value of Japan's chief mining products in recent years will be found in a large table accompanying this article.

The difficulty of getting iron during the war compelled Japan to increase its foundries from twenty to 250, and in 1919 these produced 219,537 tons of pig iron and 299,437 tons of steel. Pig iron production in 1927 was 1,254,550 metric tons, and 1,507,764 tons in 1928. Steel kept up better in tonnage, rising to 790,735 in 1926; 1,613,733 in 1927; and 1,867,053 in 1928. Imports of steel and steel products in 1920 were 1,024,743 metric tons; in 1926, 923,028; and in 1927, 817,647. About 4,033 factories were engaged in machine making, etc., in 1925.

Shipbuilding enjoyed an enormous boom during the war. The number of shipyards increased from 6 to 57, with over six times the amount of capital, and in 1914-18 the twelve leading yards built 233 steamers of a gross tonnage of 972,807. In 1919, Japan's boom year in shipbuilding, 136 vessels with a gross tonnage of 619,000 were launched. In 1922 only 16 vessels of over 1,000 with a total tonnage of 59,000 were launched. This slump was the cause of extensive unemployment, 100,000 being out of work. General distress was avoided by a grant of liberal bonuses to workmen on dismissal.

Japan in 1927 had 7,837 miles of state owned railroads and 3,047 privately owned, a total of 10,884. Announcement has been made of plans to make the standard guage 4.85 feet and to complete

Total value of all mineral production, in yen, (1920), 635,391,637; (1921), 339,379,072; (1922), 416,187,030; (1923), 439,694,104; (1924) 452,924,863; (1925), 450,926,393; (1926,) 425,954,356; (1927), 476,138,438.

the work of rebuilding in 20 years. Comprehensive plans have been made for the electrification of the Government railroads, the first section to be the Tokaido line, 408 miles, from Tokio to Kobe. A railway tunnel 7 miles long is under construction between the islands of Kiushu and Honshu under the Moji Shimonoseki Straits. It is expected that it will be completed in 1933 at a cost of 20,000,000 yen.

The Japanese in continental United States, by the census of 1920, numbered 111,010 (in 1910 there were 72,157). Of these there were 71,952 in California (an increase of 30,000), 17,387 in Washington, 4,151 in Oregon, and 2,686 in New York. In Hawaii they number 109,274, of which about 17,000, in Honolulu, are tradesmen and the rest labor on the sugar and pineapple plantations or are farmers. In the Philippines there are 10,000. There are about 16,000 in Canada, 3,000 in Mexico, 7,000 in Peru, 30,000 in Brazil, 3,000 in Argentina, 18,000 in Malaysia, 12,000 in Australasia. In Manchuria, according to the official reports, there were 181,206 in 1919, and in China proper, 31,987. Total number of Japanese subjects residing abroad, Oct., 1926, was 640,099. The foreign visitors to Japan number about 30,000 yearly. Foreign residents in 1926 were 31,140.

Of 12,000,000 families 93.1% in 1926 lived on a monthly income not exceeding 100 yen each. The birthrate in 1927 was 33.61, and the death rate 19.80.

The Government subsidizes five shipping companies for foreign trade. In the fiscal year 1922-23 the total subsidy was 6,668,605 yen, for 1923-24, 6,825,787 yen; for 1925-26, 6,787,726 yen, for 1926-27, 6,902,243 yen; for 1927-28, 6,838,639 yen; and for 1928-29, 6,832,731 yen.

The merchant marine July 1, 1929, included 1,826 steamers of 3,958,317 gross tons and 233 motor ships of 228,335.

There entered Japanese ports in 1927, 16,899 steamers of 49,294,455 tonnage.

From the sea in 1927 came 2,750,000 metric tons of marine products valued at 350,953,000 yen, of which 75,001,000 yen were exported. Fishing boats number 350,000.

There are 41 ports open to foreign trade, the most important being Yokohama, Kobe and Osaka on the Pacific Coast of the main island, and Niigata on the Japan Sea Coast, the port of transshipment for Vladivostok. Nagasaki, on Kiushu island, Tamsui, in Formosa, and Fusan, in Korea, are the important ports.

Dual nationality was abolished by the Diet July 15, 1924, by an act providing that Japanese born in foreign countries, where birth gives nationality, shall lose their Japanese nationality from birth, unless formal action be taken to preserve their rights to Japanese citizenship.

An alien land law passed March 23, 1926, went into effect on Nov. 10, 1926; it liberalizes conditions under which foreigners may obtain land in Japan, and bars from land ownership citizens of countries in which Japanese are prohibited from owning land.

Japan adopted the metric system as the official standard by imperial ordinance, effective July 1, 1924.

FOREIGN TRADE.

The chief exports are raw silk, silk waste and silk tissues, cotton yarns and tissue, coal, earthenware and glassware, matches, refined sugar, machinery, copper, tea, toys and camphor. The chief imports are raw cotton and textiles, machinery and iron products, oilcake, wool and woolen tissues sugar, rice, beans and peas, petroleum, crude rubber coal, flax, hemp and dyes.

The United States is Japan's best customer, taking between 40 and 45 per cent. of her exports, chiefly raw silk, and supplying from 25 to 30 per cent. of her imports. China is second, taking 25 per cent. of the exports.

A luxury tax of 100% was placed on about 250 articles in 1924.

The foreign trade of Japan not including Chosen (Korea) and Taiwan (Formosa) was:

Year.	Exports.	Imports.	Total.
	Yen.	*Yen.*	*Yen.*
1870.....	14,543,013	33,741,637	48,184,650
1880.....	28,395,387	36,626,601	65,021,488
1890.....	56,663,506	81,728,581	138,332,087
1900.....	204,429,994	287,261,846	491,691,841
1910.....	458,428,996	464,233,808	922,662,804
1920.....	1,948,394,611	2,336,174,781	4,284,569,397
1921.....	1,252,837,715	1,614,154,832	2,866,992,542
1922.....	1,637,451,818	1,890,308,232	3,527,760,057
1923.....	1,447,750,720	1,982,230,570	3,429,981,290
1924.....	1,800,233,000	2,453,390,000	4,260,623,000
1925.....	2,305,587,000	2,572,653,000	4,878,240,000
1926.....	2,044,727,891	2,377,484,493	4,422,212,384
1927.....	1,992,000,000	2,177,000,000	4,169,000,000
1928.....	1,909,140,000	2,133,504,000	4,042,644,000

The "invisible" trade balance for 1925 is estimated at 179,000,000 yen by the Government, at 211,000,000 yen in 1925, at 420,000,000 yen in 1924, and at 384,000,000 yen in 1923. The cumulative import balance for fifty-six years (including 1923) was 1,123,000,000 yen. In forty-two years Japan's exports to the United States aggregated 7,164,514,000 yen; with imports from the United States of 5,939,378,000 yen the balance in favor of Japan being 1,225,136,000.

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922.....	$218,403,482	$354,298,198
1923.....	264,228,134	346,939,531
1924.....	250,320,008	340,061,299
1925.....	229,642,212	384,155,998
1926.....	260,754,079	400,692,948
1927.....	257,569,702	402,105,134
1928.....	288,054,175	384,346,123

PUBLIC FINANCES.

Japan faced a financial crisis in March, 1927, caused by some 30 bank failures. It brought about the fall of the Watasuki government. The situation was strongly handled by the Tanaka cabinet with Baron Takahashi as Minister of Finance. New laws to strengthen banking conditions were passed, going into effect Jan. 1, 1928, and the crisis safely weathered as the public finances of Japan which are fundamentally sound were unaffected.

The yen (par of exchange 49.84 cents) averaged 47.41 cents in 1927, 47.12 cents in 1926, 41.04 cents in 1925 and 41.19 cents in 1924. In March 1929 it averaged 44.52 cents and in June 43.88 cents, but it stiffened and was 47.75 on Oct. 22nd.

Recent budgets in yen are:

Fiscal Year Apr. 1 to Mar. 31.	Revenue.	Expenditure.
1920-21 (actual).....	2,000,652,322	1,359,978,255
1921-22 (actual).....	2,065,711,186	1,489,855,613
1922-23 (actual).....	2,087,345,435	1,429,689,622
1923-24 (actual).....	2,045,298,267	1,521,050,305
1924-25 (actual).....	2,127,391,324	1,625,024,073
1925-26 (actual).....	2,071,369,312	1,561,272,295
1926-27 (actual).....	2,056,361,361	1,678,826,425
1927-28 (actual).....	2,062,755,337	1,765,713,120
1928-29 (estimated)....	1,709,126,249	1,709,126,249
1929-30 (estimated)...	1,671,000,000	1,752,000,000

(For budgets from 1886-87 see The World Almanac for 1929, page 634.)

The national debt on June 30, 1929, was 5,661 million yen, an increase of 116 million yen in the year. Of this amount 1,453 million yen are for foreign obligations.

The note issue of the Bank of Japan on June 30, 1929, amounted to 1,585 million yen, with a gold cover of 1,063 million yen.

Postal savings deposits were 1,918 million yen, June 30, 1929, with 36,000,000 depositors.

The national wealth of Japan as estimated by a government bureau and made public July 7, 1928, is approximately 102,300 million yen, of which land is valued at 33,000 million yen and buildings at 16,000 million yen. This makes the per capita wealth 1,731 yen.

The per capita tax is about 13 yen, and the per capita debt is about 80 yen.

A treaty was signed with Soviet Russia in Peking on Jan. 20, 1925, restoring Northern Sakhalin to Russia and dividing the oil territory half and half on a checkerboard basis. The output of petroleum in 1927 was 200,000 barrels, and in 1926, 181,000 barrels. Japan retains the oil fields as a naval reserve. The last Japanese troops evacuated Northern Sakhalin on May 20, 1925. It is believed that a rich coal and oil shale field of twenty-four square miles with a coal seam 130 feet thick has been discovered about twenty-five miles from Mukden, on the Manchurian railway. Development began in October, 1929.

(For the development of the Japanese Empire see The World Almanac for 1925, page 638).

GOVERNMENT.

Japan, previously an absolute monarchy, is now governed under a constitution promulgated Feb. 11, 1889. The Emperor, who is declared to be "sacred and inviolable," exercises the whole of the executive powers with the advice and assistance of the Cabinet Ministers, whom he appoints and who are responsible to him. He declares war, makes peace and concludes treaties; he "exercises the legislative powers with the consent of the Imperial Diet;" he has supreme command of the army and navy; and he "determines the organization and peace standing of the army and navy." The Emperor has a privy council to consult with on important affairs of state and which interprets the Constitution.

Every law requires the consent of the Imperial Diet, which consists of two Chambers. The House of Peers numbers (1929) 402 members—15 Princes of the Blood, 13 Princes, 31 Marquises, 18 Counts, 64 Viscounts, 66 Barons, 125 Imperial nominees, 4 Imperial academy members, and 66 representatives of the largest taxpayers. The House of Representatives has 466 members, elected for four years. The Cabinet has an entirely free hand to formulate policies of state quite independent of the political parties and of the House, and has often been organized independent of it. When it can't control the House it dissolves the Diet. Every law requires consent of the Diet.

The power of the Diet is growing steadily, and it has now become an absolute necessity for the Cabinet to control a majority of the Diet, for without its approval no important matter of state can be carried out. The power and influence of the military men, it is said, are declining.

An extra-constitutional but hitherto most influential body was the Genro or Elder Statesmen, consulted on grave matters of policy by the Emperor. Death has reduced their number to one—Prince Saionji, now about eighty years old, who was consulted by the Emperor at the last Cabinet crisis.

A bill removing property qualifications, enfranchising all males over twenty-five years and broadening the office holding qualifications was enacted on March 26, 1925, and proclaimed on May 5. It raised the former electoral body of about 3,500,000 to about 14,000,000.

In the first election under the new franchise, Feb. 20, 1928, 9,711,000 (81% of the 11,987,000 registered) cast their ballots. The government party, the Seiyukai, filled but 221 seats, 16 independents holding the balance of power, but allowing the Premier Baron Tanaka, to carry on. The membership of the House includes 318 professional men of whom 243 are university graduates.

Governors and sheriffs of prefectures are appointed by the Government. The Mayor is that one of three candidates elected by the municipal assembly who obtains the Emperor's approval. The elected Chief Magistrates of towns and villages must obtain the Governor's approval.

Japan on October 1, 1928 had its first trial by jury, the government bill setting up the system in criminal cases only having been passed in April, 1923. Every jury must consist of 12 jurymen who must be citizens, about 30, taxpayers and literate. Certain officials, and professional men, army and navy officers, and religious workers are exempt.

There is absolute religious freedom. The chief forms of religion in Japan are Shintoism and Buddhism. Neither has state support.

Japan has twelve sects of Buddhism, 71,750 Buddhist temples, 181,100 Buddhist priests and 51,511,100 believers. The thirteen sects of Shintoism, which originated in the combined spirit of Japanese ancestor worship and Imperial veneration, centre in the shrines, which number 171,725, but the Shinto priests number only 14,900. There are twelve forms of Christianity in the empire. The Greek communicants number 65,615, with 131 churches; the Roman Catholics, 14,200, with 189 churches; the Anglican and American Episcopalian Mission, 16,215, with 213 churches; the Methodist Mission, 13,356, with 181 churches, and the Congregational Mission, 15,847, with 151 churches.

Elementary education is compulsory. In 1924 there were 801 kindergartens with 66,687 pupils, and 25,462 elementary schools with 198,663 teachers and 9,137,160 pupils. Japan had in 1924 five imperial universities, and eleven other institutions of university rank; the total number of teachers was 1,868 and 32,434 students. The most influential is the Tokio Imperial University, established in 1877, which has 417 teachers, and 5,283 students.

The language of commerce is English, and it is a required study in the secondary schools.

The budget estimates of both ordinary and extraordinary expenditures in the Ministry of Public Instruction are: 1926-27, 134,838,000 yen; in 1927-28, 140,300,000 yen; and in 1928-29, 118,648,000 yen.

ARMY AND NAVY.

Service in the army is universal and compulsory; actual service begins at twenty and is to be for sixteen months. The peace strength of the active army in 1928 was 15,540 officers and 198,800 other ranks, with a reserve of 2,350,000.

The air personnel for the army in 1927 was 5,325 in eight flying regiments and a balloon corps. The four flying corps of the navy had about 200 planes.

The Japanese naval program under the Washington Naval Treaty provided for this fleet:

Class.	*Completed at the End of* 1921.	1926.	1928.
Dreadnoughts	11	10	10
Pre-dreadnoughts	8	..	..
Armored cruisers	12	7	7
Light cruisers	11	24	27
Torpedo gunboats, etc	4	4	8
Destroyers (60 modern in 1923)	95	100	106
Torpedo boats	20		
Submarines	37	68	71
Aircraft carriers	..	1	3

The existing building program will be completed in 1929, when the Japanese will have 8 scout cruisers, 21 light cruisers, 100 destroyers, and 77 submarines in full commission. Of these, 4 cruisers, 20 destroyers and 8 submarines will then be due for replacement. Between 1929 and 1935, 91 vessels of all classes will fall due for replacement.

Japan has carried out the scrapping of warships called for under the Washington Naval Treaty and reduced the personnel of the navy, which was 74,200, by about 12,000. The shipyards discharged 6,000 workmen and the naval arsenals about the same number.

The Japanese Cabinet in November, 1926, approved of a 5-year naval shipbuilding program calling for the expenditure of 261,308,000 yen for the construction of 4 cruisers, 15 destroyers, 4 submarines, 3 river gunboats, one aerial depot ship, and one mine layer. The appropriation was apportioned by years as follows: 1927-28, 4,725,000 yen; 1928-29, 11,926,000 yen; 1929-30, 88,000,000, yen; 1930-31, 88,000,000 yen; 1931-32, 68,557,000 yen. Two 10,000 ton cruisers armed with ten 8-inch guns, the Nachi and the Myono, were commissioned in 1927, and a third, the Haguro, was launched March 24, 1928.

Expenditures for the army and navy for five years with the budget estimates for two years (in 1,000 yen):

	Army.		Navy.	
	Ord.	Ext.	Ord.	Ext.
1921-22	169,070	77,907	140,718	342,870
1922-23	178,713	52,194	130,379	243,512
1923-24	176,223	47,403	124,834	150,309
1924-25	179,331	27,403	124,628	123,829
1925-26	170,875	28,514	122,349	105,016
1926-27	168,116	31,716	126,673	112,356
1927-28	173,614	38,741	135,978	120,428
1928-29	224,300		262,400	
1929-30	232,000		268,000	

KOREA (CHOSEN).

AREA, 84,738 square miles (including islands).

POPULATION, census of 1925, 19,522,945, including about 337,000 Japanese and about 46,000 Chinese.

CAPITAL, Seoul; population, 1925, 302,711 (77,811 Japanese); other cities, Fusan, pop., 1925, 103,522 (39,756 Japanese); Pingyang, 109,285 (22,527 Japanese); Taiku, 72,127 (22,143 Japanese).

Governor General, Admiral Saito, 1929.

Korea is an ancient kingdom with a history extending back to the twelfth century B. C. but dur-

ing recent centuries the "Hermit Kingdom." It occupies a peninsula in northeastern Asia dividing the Yellow Sea from the Sea of Japan. The boundaries on the mainland are the Yalu River and the Tamean River. The mainland is as large as the State of Minnesota. Its coastline is over 6,000 miles long. Southern Manchuria lies along its northwest frontier for 500 miles and it touches Siberia for a few miles, a scant 100 miles from Vladivostok, in the extreme northeast. Situated between that Russian port and Port Arthur, then a Russian leasehold and subject to diplomatic control and penetration by Russia, Korea became to Japan "a dagger pointed at her heart"—the chief immediate cause of the Russo-Japanese War of 1904-1905. After this war the "complete independence" of Korea that had been recognized in the treaty following the Chino-Japanese War of 1894-1895 (which also was for the control of Korea) gave way to a recognition by Russia of Japan's paramount interest in Korea. Japan continued her military occupation of the country, and in 1910 annexed Korea outright.

The administration of the country has been in the hands of a Military Governor of high rank directly responsible only to the throne.

Recent reforms, following nationalist disturbances, make the Governor General responsible to the Premier of Japan, open the office to civilians, and promise steadily increasing measures of local autonomy and reduction of military rule.

Korea had no system of education when brought under Japanese control. Only about 10 per cent. of the children of school age, and these all of the upper classes, attended school, where they learned something of the Chinese classics.

At the end of 1926 there were 1,767 public common schools, with 446,911 pupils. Besides, there were 67 vocational schools with 7,364 attendants; 14 teachers' schools with 2,031 students; 9 colleges with 1,714 students. The Japanese Government completed the establishment of the new Imperial University in Seoul which has (1927) 149 Korean students and 318 Japanese.

Confucianism and Buddhism are the chief religions and Christianity has gained a great vogue among all classes. The mission force numbers about 2,500 with about 300,000 Korean converts.

The country is mountainous, especially in the north, where the forests are of great value, and there is much mineral wealth awaiting development. There are extensive fertile plains well watered by good rivers in the south and west, where are the five excellent harbors of Fusan, Mokpo, Chemulpo and Chinnampo. The larger rivers in the west can at full tide float boats far up the streams. At Ninsen is a tide of 33 feet.

The climate is dry and bracing. The mulberry tree thrives, 60,000 acres being planted with them. Silkworm culture has been much encouraged by the Japanese and the quality of the cocoons improved. Some 400,000 families are engaged in the industry. The cultivation of tobacco is also fostered. Stock raising is everywhere an important industry. Afforestation and irrigation are being systematically carried on by the Government. The cultivated area in 1926 was 11,276,115 acres.

Mining concessions covering 270,000 acres, mostly gold-bearing, which had been in the hands of about fifteen foreign corporations (four American) and individuals (four Americans) before annexation are respected, but a new law (April 1, 1916) prohibits foreigners from acquiring mining rights. Gold, silver, zinc, copper, lead, iron, tungsten, graphite, anthracite coal and kaolin are present. In 1926 the value of gold produced was 7,485,811 yen. The output of Pyongyang coal, anthracite (Government owned), in 1923 was 115,249 tons; of pig iron, 81,779 tons were produced.

The trade of Korea is almost entirely in the hands of the Japanese, who also have provided 85 per cent. of the capital for the 1,500 factories already established.

The total value of the principal agricultural crops in 1925 was about 600,000,000 yen, of which 31,400,000 yen was for cotton, and 10,000,000 yen for silk. The value of the industrial output was 200,298,000 yen, and mineral, 25,000,000 yen.

The mileage of the Government owned railroads in 1928 was 1,456. The chief line is the trans-peninsula line (585 miles), from Fusan, where the Fusan-Shimonoseki ferry service connects with the Imperial Japanese railroads, to Antung, at the mouth of the Yalu River, across the Manchurian boundary, where it connects with the Antung-Mukden line of the South Manchurian Railway, thus forming part of the two international through traffic lines—Japan to China, and Japan to Europe via the Trans-Siberian Railway. The latter's regular (twice-a-week) service from Tokio to Paris, which had been suspended since the Russian revolution, was resumed in May, 1927, the trip takes about two weeks. The total investments in the Government railroads amount to over 150,000,000 yen, and the annual profit is over 10,000,000 yen.

Vessels entering Korean ports in 1927, in the foreign trade, had a tonnage of 6,421,752, 85 per cent. being Japanese.

Korea was a drain on the Japanese Imperial Government, with an exception of 1919 when they received no grant from the central government of Japan, of over 10,000,000 yen annually. In 1925-26 revenues were 184,901,080 yen and expenditures 171,763,081 yen. The budget for 1928-29 balanced at 222,674,042 yen and that for 1927-28 (actual) was: Revenues, 234,243,270 yen; Expenditures, 210,852,949 yen. The debt March 31, 1927 was 298,619,147 yen.

Imports and exports in yen, about 80 per cent. of which is with Japan, were:

Year.	Imports.	Exports.
1921	232,381,584	218,277,223
1922	256,044,807	215,404,403
1923	265,790,727	261,665,732
1924	309,593,336	329,339,094
1925	340,011,781	341,630,533
1926	372,169,783	362,954,800
1927	383,417,000	358,925,000
1928	413,991,000	365,978,000

Trade with the United States was:

Year.	Imports.	Exports.
1920-21	$2,417,677	$84,112
1921-22	2,858,032	29,112
1922-23	2,924,763	60,297
1923-24	2,606,299	47,651
1924-25	2,175,900	70,039
1925-26	3,951,626	72,341

KWANGTUNG.

(Leased for 99 years from China.)

AREA, 1,304 square miles.

POPULATION, census of Oct. 1, 1925, 1,054,074, of which 846,543 are Chinese, and 241,248 Japanese.

CAPITAL, Dairen (formerly called Dalny); population, 1922, 137,354; Port Arthur, population, 22,649; Kinchow, 92,128.

Governor General, Count H. Kodama.

Kwangtung is the southern part of the Liaotung peninsula, the southernmost portion of Manchuria, which has the Bay of Korea on the east, the Yellow Sea to the south and the Liaotung Gulf on the west. Japan had taken it as spoils of war from China by the Treaty of Shimonoseki but was forced to turn it back by diplomatic pressure from Russia, Germany and France. Russia then leased it for 25 years from China, and constructed the strongly fortified city of Port Arthur and the nearby commercial ice-free post of Dalny (now Dairen).

Japan took Port Arthur by siege ending with a brilliant assault in 1905, and at the conclusion of the Russo-Japanese War took over the lease in the Treaty of Portsmouth, 1905. In May, 1915, the lease was extended to 99 years by China. Kwangtung by Imperial Ordinance of April 12, 1919, was given a civil government superseding the former military government.

Dairen is a free port, the chief seaport of Manchuria and the southern terminus of the South Manchurian Railroad, which connects with the Peking and Korean lines at Mukden and with the Trans-Siberian at Changchun. It is a well-built well-governed modern city with varied industries.

The railway zone comprises 55,895 acres or 87.3 square miles, and is highly developed. The railway mileage, 1927, was 694 and its net earnings, 68,008,345 yen.

The budget for 1928-29 balanced at 20,874,254 yen and included a grant from the National Treasury of 4,000,000 yen.

The number of steamships that entered and cleared the port in 1925 was 6,465 with a tonnage of 10,361,560. Beans, bean cake and cereals furnished the bulk of the exports.

Imports and exports in yen were:

Year.	Imports.	Exports.
1921	83,076,104	100,930,840
1922	76,231,419	112,235,143
1923	95,742,008	131,421,703
1924	110,770,893	112,183,553
1925	114,503,398	168,364,631
1927	131,143,126	203,298,434

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$5,716,630	$2,062,315
1923	8,759,653	4,386,017
1924	3,614,316	2,441,114
1925	5,266,838	3,527,182
1926	6,465,742	3,465,692
1927	6,697,760	2,687,589
1928	6,244,989	3,020,369

FORMOSA (TAIWAN).

AREA, 13,944 square miles.

POPULATION, census of Dec. 31, 1923, 3,757,838 Japanese, 166,621; natives, 3,481,833; aborigines 84,548; foreigners, 24,836. Census 1925, 3,994,884

CAPITAL, Taihoku, pop., 1922, 180,362; Tainan, pop., 77,026.

Governor General, Mitsunoshin Yamakami.

Formosa is an island the size of Massachusetts and Connecticut, lying between the Philippines on the south and Japan to the north, with the China Sea on the west and the Pacific Ocean on the east. A range of mountains from north to south forms the backbone of the island (highest peak, Mt. Niitaka, 14,500 feet); the eastern half is exceedingly steep and craggy, but the western slope is flat, fertile and well cultivated, yielding two rice crops a year. The temperature rarely falls below 96° F. Rain is abundant. Production of rice in 1927 was 12,444,614 hectoliters; tea, 11,880,524 kilos; sugar, 411,140 metric tons; salt, 113,400 metric tons; coal, 1,800,440 metric tons; petroleum, 228,270 hectoliters. Gold, silver and copper are also mined. Ramie and jute are exported.

Formosa has been the world's chief source of camphor, the high mark of product being in the war years. In 1915, 2,772,110 kilos of camphor and 4,128,745 kilos of camphor oil were produced; in 1925 production declined to 837,750 kilos of camphor and 4,413,080 kilos of oil. Camphor since 1899 has been a monopoly of the Government, which, keenly alive to reckless destruction of the trees, began an extensive planting in 1917, and in Opium is another Government monopoly, handled with the policy of suppressing the smoking by gradual prohibition. The number of licensed smokers, which in 1900 was 169,064, by Jan. 1, 1928 had been reduced to 29,043.

Formosa was ceded by China in 1895 after the China-Japanese War and Japan has made it a source of profit. Japanese colonists were encouraged, schools established, 396 miles of railroads built, telegraph and telephone lines laid, harbors improved, industries encouraged and much done in public works. The aborigines, who in the north are savage head-hunters, gave much trouble, and in 1910 the Government began a thorough subjugation program with an appropriation of 9,750,000 yen to extend over five years. Out of a total of 697 tribes of 160,000 persons, 551 tribes of 116,744 have vowed allegiance.

The budget for 1928-29 is balanced at 109,246,305 yen; the actual budget for 1927-28 was: Revenue, 138,626,830 yen, and Expenditure, 101,533,286 yen. The public debt July 1, 1928 was about 111,000,000 yen.

Trade with Japan and foreign countries in yen, largely in favor of Formosa, was:

	Japan.		Other Countries.	
Year.	Imports.	Exports.	Imports.	Exports.
1924.	86,602,060	211,098,223	46,424,036	42,575,953
1925.	129,906,280	215,248,807	56,489,060	47,965,844
1926.	121,404,784	202,109,583	62,007,666	49,315,487
1927.	121,107,991	202,078,577	65,840,396	44,597,707

The Pescadores, twelve islands with an area of fifty square miles, stretching northward toward Japan, are under the Formosan Government.

Japanese Sakhalin (Karafuto) is the southern half of the island of that name, below the 50th parallel, which was ceded by Russia in October, 1905, in the Treaty of Portsmouth. The area is 13,253 square miles, and the population, Dec. 31, 1925, was 203,504. The country is mountainous, and primeval forests cover 70 per cent. of the land. Coal output in 1927 was 357,046 tons and in 1926, 275,823 tons. The fisheries are important, the product in 1927 being valued at 15,704,310 yen. In an effort to colonize the island, 9,988 families, numbering 42,683 persons, have been placed on the land. The cultivated area amounts to 59,515 acres, with 65,000 acres of pasture. The budget for 1928-29 balanced at 27,340,205 yen, and includes a grant of 2,027,635 yen from the National Treasury. The budget for 1927-28 (actual) was: Revenue, 26,877,316 yen; Expenditure, 19,982,341 yen.

Japanese Mandates in the Pacific extend for 1,200 miles north from the equator and for about 2,500 miles from east to west. The total area of land in this immense expanse of sea is only 833 square miles. The islands, formerly German possessions, number 1,450; the groups are the Marianne, or Ladrone (except Guam, U. S.), pop. 3,300 (Chamorros), in 1922; the Marshall Islands, pop. 9,700 (Kanakas); and the Caroline Islands, pop. 36,328 (Kanakas). There are also 3,338 Japanese and 59 foreigners (June 30, 1924), chiefly in the Marianne Islands. The native population is increasing. Each group has a language of its own. The principal resources are phosphorus ores (chiefly in the Carolines), cocoanut and copra. The seat of government is in Parao in the Carolines.

LATVIA, REPUBLIC OF

AREA, 40,856 square miles.

POPULATION, census of 1927, 1,870,520; of which 1,779,593 were citizens.

CAPITAL, Riga; population, 1925, 337,700; other cities, Libau, population 60,700; Dvinsk, 40,600; and five with more than 10,000.

President, Gustav Zemgals, born 1871, elected April, 1927, for three years.

Premier, H. Celmins, (Agrarian) Nov. 30, 1928.

Latvia, formerly a Russian province, became a republic Nov. 17, 1917, final elections being held on April 17, 1920, and the Legislative Assembly meeting first on May 1, 1920. It is bounded on the north by the Gulf of Riga and Estonia, on the east by Russia, on the south by Lithuania and Poland, and on the west by the Baltic Sea. It is one of the three Baltic states of North Central Europe. It is about the size of Virginia.

About half the people engage in agriculture, dairying, livestock and other food producing industries. Flax is the important product. Pre-war flax acreage was 275,000, and annual crops were 35,000 tons of fibre and 25,000 tons of seed, exported mostly to Germany, Holland, Belgium and England. War devastation reduced the flax acreage to 70,000, and another cause was the flight of 500,000 farmers as refugees. Production in 1927, however, approached normal. Principal crops were: Flax, 41,013,000 pounds (and 654,000 bushels of linseed) from 158,060 acres; rye, 258,800 tons from 640,750 acres; barley, 130,080 tons from 463,250 acres; oats, 177,160 tons from 763,000 acres; and potatoes 717,350 tons from 213,750 acres.

The census of 1927 returned: horses, 369,300; cattle, 996,600; sheep, 1,127,500; pigs, 534,500.

Forests cover 4,399,000 acres of the total in the country of 16,000,000. Lumber is the chief export and in 1928 amounted to 1,032,754 metric tons valued at $17,940,000.

By the land reform law of 1919, amended 1922; the estates of both the noble and the wealthy non-noble landlords were declared state property in Latvia. The principle of compensation was admitted, but neither terms nor payment had been arranged by 1925. The large estate owners were allowed to retain their dwellings and about 125 acres of their property. They could lease from the state, but not own, their former sub-estates when the units were less than 250 acres. The peasants to whom the farms were given under the lease from the government, could quite easily acquire freehold rights. By October, 1925, over 3,385,900 acres had been allotted, and 889,200 acres remained as the state land. In addition to the 87,634 farms, that had been established plans were under consideration for 19,400 more.

Industry is beginning to count in the national wealth, the paper, match, wood distilleries and woodwork output having already attained large proportions. On Jan. 1, 1926, there were 2,839 industrial establishments with 49,900 employes.

Latvia's importance is enhanced by the fact that it is the natural route for through international trade between Russia and western nations—pre-war, 20.6% of all Russian imports and 28% of all exports passed through Latvian territory. Three Russian main railway lines converge at Riga, Windau and Libau, Latvia's ports, all with excellent harbors. Riga has 5 ice breakers that keep the port open during the winter.

In January, 1928, Latavia's merchant marine numbered 119 vessels of 62,045 net tons. In 1928, 4,335 vessels of 2,014,962 tons entered the ports.

The 1,736 miles of railroads are state owned, and made a net profit of 4,932,565 lats in 1927.

Latvia is Protestant by 76.54 per cent., Roman Catholic by 18.49 per cent., and there are Baptists, Moravians and other faiths.

In 1910 only 3.2 per cent of the people were illiterate, and the native Letts form 80.41 per cent. of the total population.

The Latvia constitution was adopted on Feb. 15, 1922, by the Constituent Assembly. It provides for a Parliament (Saeima) of 100 elected for three years by citizens of both sexes over 20 years old, by direct vote on proportional representation. It elects the president for a three-year term. He selects

the Prime Minister who appoints a Cabinet responsible to Parliament. After the election of the third parliament of many parties in October, 1928, H. Celmins, leader of the Agrarians, formed a coalition cabinet from seven party with 54 votes in Parliament.

The unit of currency is now the lat (= 50 Latvian roubles = one gold franc = $0.193 at par of exchange).

The Latvian rouble was stabilized at that point, and on Nov. 1, 1922, the Bank of Latvia, the chief shareholder of which is the Latvian Government, began operations; now only this bank has the right to issue currency notes. The amount outstanding July 31, 1929, was 45,000,000 lats, with a gold cover of 24,000,000 lats, and 46 000,000 lats of foreign exchange.

The internal debt amounted on Jan. 1, 1928, to 580,816 lats. The war debt due the United States was funded by agreement signed Sept. 24, 1925, at $5,775,500. Latvia owes Great Britain £2,150,000.

Recent budgets in lats are:

Year.	Rev.	Exp.
1923-24	208,900,000	173,200,000
1924-25	223,000,000	211,888,863
1925-26	152,909,000	151,400,000
1926-27	165,129,000	160,547,000
1927-28	159,097,000	159,097,000
1928-29	164,110,000	164,110,000

Imports and exports in lats were:

Year.	Imports.	Exports.
1922	170,449,459	101,992,000
1923	211,857,296	161,978,356
1924	256,364,731	170,523,762
1925	280,324,400	179,598,010
1926	260,263,510	188,444,207
1927	249,600,000	220,200,000
1928	308,071,000	258,714,000

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$6,804,049	$853,781
1923	5,285,134	3,714,297
1924	1,126,162	4,562,915
1925	1,304,920	3,708,600
1926	726,927	5,982,256
1927	1,028,697	4,469,412
1928	1,070,889	3,847,488

LIBERIA, REPUBLIC OF

AREA, estimated 45,000 square miles.

POPULATION, estimated 1,500,000 to 2,000,000.

Capital, Monrovia, population, estimated, 1925, 6,000.

President, Charles D. B. King, 1928-32 (third term).

Receiver of Customs and Financial Adviser (designated by the United States Government), John Loomis.

Liberia lies on the southwest (Guinea) coast of Africa between Sierra Leone (British) on the west and the French colony of the Ivory Coast on the east, with a coast line on the South Atlantic of about 350 miles. It extends inland 75 to 150 miles. Beyond 25 miles there is no civilized settlement. Most of the country is covered with tropical forests, rich in timber and oil nuts but lacking in transportation. There is one motor road, 20 miles long.

Harvey Firestone of Akron, Ohio, announced on Oct. 14, 1925, that the Firestone Tire and Rubber Company, of which he is President, had leased from the Liberian Government 1,000,000 acres of land for an elaborate plantation for raising rubber, planning to produce ultimately 250,000 tons a year. By 1929 30,000 acres had been planted with 6,000,000. 10,000 of the finest bud-grafted rubber stumps having been brought 12,000 miles from Sumatra. On the payroll were 10,000 Liberians under a white staff of 90, and eight modern plantations built up and connected by motor roads.

The population is entirely of the African race; about 100,000 of the dwellers along the coast may be considered civilized. The number of American Negroes is estimated at 20,000. Liberia was founded in 1822, when a settlement was made at Monrovia by Negro freedmen from the United States with the assistance of American colonization societies. It was declared a free and independent republic on July 26, 1847. Its Constitution is modelled on that of the United States. Electors must be of Negro blood and owners of land. The Government rests with a President elected for four years, a Senate of eight, elected for six years, and a House of Representatives of fifteen, elected for four years.

The control of customs since 1912 has been in the hands of General Receiver and Financial Adviser, designated by the United States.

Government schools are supplemented by mission schools, mostly of Protestant denomination. In 1928, $100,000 was expended on schools. The Methodists maintain a college at Monrovia. There is an organized militia of 650 men, with reserves of 2,500.

Liberia was a signatory of the Versailles Treaty and is a member of the League of Nations.

Coffee, rubber, oil, nuts, raffia, ivory and ginger are the chief exports; and textiles, hardware, glass and earthenware, tobacco, spirits, rice and foodstuffs are the principal imports. In 1925 there entered and cleared at Monrovia 904 vessels of 2,062,852 tons.

Liberia was the second nation to pay its entire war debt, with interest, to the United States—$35,610, which it paid on July 6, 1927. Liberia negotiated a loan of $5,000,000 in New York in 1927, and paid off its 1912 bonds and its floating debt.

Recent budgets are:

Year.	Revenues.	Expenditures.
1922-23	$493,889	$381,258
1923-24	699,728	681,000
1924-25	943,208	943,208
1925-26	962,570	939,978

Imports and exports were:

Year.	Imports.	Exports.
1922	$1,501,515	$1,645,382
1923	1,361,700	1,166,735
1924	1,319,719	1,303,722
1925	2,115,021	1,715,060

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$157,745	$31,248
1923	175,032	17,790
1924	209,167	4,751
1925	328,446	77,074
1926	389,281	280,040
1927	755,615	362,117
1928	597,316	103,521

LIECHTENSTEIN

(Principality).

AREA, 65 square miles.

POPULATION, 1921, 11,500.

CAPITAL, Vaduz; population, 1,405.

Prince, Francis I., born Aug. 28, 1853, succeeded, Feb. 11, 1929, on the death of his brother, the 89 year old Prince John II., who had ruled for seventy-one years. He married on July 22, Frau Elsa von Eroes, nee Baroness Guttman of Vienna.

Administrator, appointed by the Prince, Gustav Schaedler (1922).

Liechtenstein is on the Upper Rhine between Austria and Switzerland. It was a member of the German Confederation until 1866. Since that time it had practically been a dependency of Austria, but on Nov. 7, 1918, the Diet declared its complete independence. By treaty with Switzerland in 1921 that country administers its posts and telegraphs and it is included in the Swiss customs union.

The principality is but little larger than Staten Island; and for five miles the Orient express from Zurich to Vienna passes through it.

The population is agricultural, stock raising is highly developed. The monarchy is hereditary. By the Constitution, October, 1921, legislative powers rest in a Diet of 15 members, elected for four years by direct vote, on a basis of universal suffrage and proportional representation. The budget for 1927 was: Revenue, 859,033 Swiss francs; expenditures, 859,871 francs; debt, 1,956,319 francs.

LITHUANIA, REPUBLIC OF

LIETUVA

AREA, about 20,550 square miles, exclusive of Memel and the Vilna district. Polish boundary undetermined.

POPULATION, census of Sept. 1923 (exclusive of Memel and Vilna) 2,011,173; of which 1,696,158 are Lithuanians; 153,332 Jews; 64,015 Poles; 48,392 Russians; 23,973 Germans; 14,318 Letts; and 4,656 other racial groups. Estimate, Jan. 1, 1928, 2,286,368.

CAPITAL, Kovno, temporarily; population, 94,405.

President, Antona Smetona, 1926-33, put in office Dec. 17, 1926, by an army coup d'etat.

Premier, Jonas Tubelis (Finance) Nationalist, Sept. 25, 1929.

Lithuania, a Baltic state, is bounded on the north by Latvia, on the east by Russia, on the south by Poland and East Prussia and on the west by East Prussia and the Baltic Sea.

Lithuania was a Grand Duchy under the Russian Empire, having shared the fate of Poland. After the Bolshevists captured the Russian Government, the republic proclaimed its independence on Feb. 16, 1918. It was recognized by most of the powers and by Russia in the Treaty of Moscow, July 12,

1920. The dispute with Poland, relative to whetner or not certain Lithuanian areas were to be left as a part of the country or become part of Poland, was under consideration by the League of Nations when on Oct. 9, 1920, General Zeligowski, with 15,000 Polish troops, occupied Vilna, historic Lithuanian capital, and declared it annexed to Poland. The Polish Government proclaimed Zeligowski a rebel, but he remained there many months. Vilna, by a decision of the League of Nations in 1923, with its strip of territory was awarded to Poland.

Lithuania and Poland remained technically at war for seven years. A crisis brought the situation before the League of Nations in December, 1927. After a dramatic session when the Lithuanian foreign minister and Marshal Pilsudski both declared for peace, the matter was referred back to the two nations for settlement by diplomatic negotiations. These were without success and brought a warning from the League in September, 1928. No agreement so far (November, 1929) has been reached.

Memel and its territory (area 1,520 square miles, population 145,000), a seaport on the Baltic between Lithuania and East Prussia, was detached from Germany under the Treaty of Versailles and placed under the control of the Council of Ambassadors. Irregular bands of Lithuanians rushed the city in 1923. The city and territory was on Feb. 16, 1923, handed over to Lithuania subject to certain conditions to regulate the use of the port by both Lithuania and Poland. Under the sovereignty of Lithuania the Memel territory is a unit enjoying legislative, judicial, administrative and financial autonomy according to convention signed with the great powers. Ratification was secured May 17, 1924, by a commission headed by an American, Norman H. Davis appointed by the League of Nations.

At the Memel Parliamentary elections in October, 1925, the parties favoring autonomy and a plebiscite to decide the sovereignty of the territory polled 47,466 votes, winning twenty-nine seats, to the pro-Lithuanians' 3,677 votes, winning one seat.

Lithuanian elections of May, 1926, gave Populists and Socialists a parliamentary majority.

The Socialist government of President Grinius and Premier Slezevicius was overthrown by a military-nationalist coup d'etat on Dec. 17, 1926 at Kovno. Parliament was summoned to meet that night and receive their resignations. It then elected former President Smetona president for a three-year term.

Much unrest marked the year 1929. Plotting had been met by martial law. An attempt to assassinate Premier Valdemaras May 6 caused the death of an aide and wounding two others. In September he gave way to Jonas Tubelis.

Legislative power is vested in a constituent Assembly of 112 members, elected directly on a basis of proportional representation by universal equal suffrage. The Assembly elects the President.

A new constitution, proclaimed May 26, 1928, fixed the age of the electors at 24 years, the term of the President at seven years, and the term of Parliament at five years. It also declared Vilna the capital.

Eighty per cent. of the people engage in agriculture, cultivating in 1926, 6,527,654 acres, of which 208,000 were in flax. Rye and potatoes are the chief crops. Chief exports are flax and linseed, wood pulp, lumber, and butter.

About half of the total area of Lithuania consisted of estates exceeding 500 acres, but the landlords had unusual popularity and in 1919, when land reform was uppermost, there was practically no agitating in favor of expropriation without fair compensation. Before the passage of the Land Reform Act on April 3, 1922, a large number of the larger estates had been broken up by purely economic causes under mutually satisfactory arrangements. Under the act all private holdings exceeding 197 acres were declared subject to expropriation and all holdings exceeding 375 acres were declared the property of the state. The price fixed for the land and equipment was determined by the average prices during 1910-14 and compensation made by 3 per cent. 36-year Treasury certificates. The land was parceled out to peasants in plots not exceeding fifty acres, and payment extending over thirty-six years was to be made in rye. In three years private holdings increased from 168,000 to 214,000. Of this number 31 per cent. comprised less than 28 acres; 50 per cent. from 20 to 25 acres, and 15 per cent. from 50 to 110 acres.

Forest wealth also gives export of timber. Forests cover a fourth of the total area, pine, fir and hardwood. By the peace treaty with Soviet Russia 250,000 acres of timber land, largely on the Nieman river, was given to Lithuania for exploitation. Exports of lumber in 1928 were valued at $7,073,120.

Lithuania is on the through railway route from Paris, Berlin, Warsaw to Riga, Dvinsk and Leningrad, and regards the international rail traffic as one of the principal points of importance, it being the intention to develop facilities for its proper care.

There were 1,213 miles of railroads in 1926, all state owned. In 1927, 826 steamers of 426,634 tons entered Memel, the only port. The Niemen is navigable for nine months.

A state university was opened in Kovno, Feb. 16, 1922. It had in 1928, a faculty of 258, and 3,580 students; there were 2,401 primary schools with 124,578 pupils and 159 secondary schools with 23,112 pupils.

The unit of currency is the lit (= 10 cents at par of exchange). The Bank of Lithuania, established 1922, has the sole right to issue banknotes. The note circulation July 31, 1929, was 87,000,000 lits with a gold cover of 34,000,000 lits and foreign currency of 42,000,000 lits.

Lithuania on Oct. 8, 1925, gave the United States $6,030,000 in bonds in final settlement of her war debt. Other debts, Dec. 31, 1927, consist of $1,846,350 5% Liberty Loan subscribed by Lithuanian-Americans, and £150,000 due Great Britain.

Remittances from the United States sent by emigrants were 26,008,000 lits in 1928; 26,175,100 lits in 1927; and 28,908,700 lits in 1926.

Recent budgets in lits are:

Year.	Rev.	Exp.
1923	199,276,346	199,276,346
1924	201,297,163	201,337,154
1925	258,625,300	254,837,100
1926	235,160,000	228,160,000
1927	270,528,800	230,903,400
1928	253,000,000	253,000,000

Imports and exports in lits were:

Year.	Imports.	Exports.
1922	74,884,600	76,892,400
1923	156,627,000	146,794,700
1924	206,530,000	266,580,000
1925	252,703,000	342,715,000
1926	240,760,000	253,300,000
1927	265,694,000	245,929,000
1928	291,091,400	256,881,300

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$35,272	$79,576
1923	105,113	160,849
1924	102,427	313,584
1925	43,094	767,171
1926	88,455	946,593
1927	218,220	520,397
1928	334,525	410,772

LUXEMBURG, GRAND DUCHY OF

AREA, 999 square miles.

POPULATION, Dec. 1927, 285,524.

CAPITAL, Luxemburg, population, 1927, 52,440.

Grand Duchess, Charlotte, born Jan. 23, 1896; succeeded on the abdication of her sister, Marie Adelaide, Jan. 9, 1919; married Prince Felix of Bourbon-Parma on Nov. 6, 1919; *Heir*, their son, Prince Jean, born Jan. 5, 1921. They have four daughters and another son.

President of Government, Joseph Bech, July 16, 1926.

Luxemburg is a European Grand Duchy fourfifths the size of Rhode Island, situated between Germany on the east, Belgium on the west, and France on the south. Its integrity and neutrality were guaranteed by the Treaty of London, May 11, 1867, having been previously, since 1815, a part of the Germanic Confederation. It, however, remained in the German Customs Union, formed in 1842. German capital built its railroads, and its iron and steel furnished material before and during the war to the Germans, who occupied the country throughout the war.

A referendum (under universal suffrage) taken Sept. 28, 1919, to settle some of the problems brought to the front by the World War resulted in the following vote out of a total of 90,984: For the reigning Grand Duchess, 66,811; for a continuation of the dynasty under another Grand Duchess, 1,286; for another dynasty, 889; for a republic, 16,885; for an economic union with France, 60,133; for an economic union with Belgium, 22,242. France declined the union in favor of Belgium. A treaty was then negotiated between Luxemburg and Belgium eliminating the customs barrier and providing for the use of Belgian money in the Grand Duchy. The agreement came in force April 1, 1922, and is for fifty years.

The Grand Duchy is governed under the Constitution of 1868 as amended in 1919. Legislative power rests with a Chamber of forty-eight Deputies, elected by universal suffrage (men and women over twenty-one). Executive power rests with a Minister of State and President of Government

and a Cabinet of four Directors-Generals. The population is almost entirely Catholic. Education is compulsory for children between the ages of six and thirteen.

Luxemburg is a country of small landowners; 430,000 of the 500,000 acres devoted to agriculture are farmed by resident owners. Individual farms number about 40,000, of which 15,000 are less than 1¼ acres; 9,800 from 1¼ to 6 acres, and 7,000 from 6 to 12 acres.

The output of iron ore from 55 mines in 1928 was 6,998,252 metric tons; in 1927, 7,244,278 tons; and in 1926, 7,756,240 tons; of pig iron in 1928, 2,770,061 tons; in 1927, 2,732,495 tons; of steel ingots in 1928, 2,567,080 tons; in 1927, 2,407,128 tons.

There were in 1928, 330 miles of railroads.

On Jan. 1928, the Luxemburg State Savings Bank reported 146,796 depositors (more than half the Duchy's population) with deposits of 253,841,000 francs.

Luxemburg's trade with the United States is included in that of Belgium. Exports to the United States in 1927 amounted to $3,717,708.

The Belgian franc is the unit of currency (rate of exchange Oct. 15, 1929, 2.789 cents). Recent budgets in francs are:

	Revenues.	Expenditures.
1924-25	fr. 127,398,513	fr. 124,525,967
1925-26	168,477,347	165,804,434
1926-27	204,821,891	193,104,482
1927-28	270,249,172	261,335,689
1928-29	313,388,414	294,071,796

The consolidated debt, 1929, was 361 million francs; the floating debt, 53.6 million francs.

MEXICO, REPUBLIC OF

AREA, 760,290 square miles.

POPULATION, census of 1921, 14,308,753; Indians, 4,179,499; mestizos, 8,504,561; White, 1,404,718; foreigners, 246,052.

CAPITAL, Mexico City, population, census of 1923, 632,367 (of which 12,063 are Spanish, 2,382 Americans, 1,652 French, 1,223 Germans, 803 chief cities, Guadalajara, pop. 150,000; Puebla, Cubans, 610 English, 6,322 other nationalities); 110,000; Vera Cruz, 48,633; Tampico, 80,000; San Luis Potosi, 85,000; and Monterey, 85,000.

President (*Provisional*) Dr. Emilio Portes Gil, born 1891, elected by Congress, Sept. 25, 1928, inaugurated Dec. 11, 1928, to serve until Feb. 5, 1930.

Mexico is bounded on the north by the United States, on the east by the United States (Texas), the Rio Grande forming the boundary line, and the Gulf of Mexico; on the south by Guatemala and on the southwest and west by the Pacific Ocean. The Gulf of California, 739 miles long with a maximum width of 190 miles, makes a huge indentation in the western coast, completely separating the narrow, mountainous, sterile and sparsely inhabited peninsula of Lower California, 760 miles long, from the mainland. On the east the province Yucatan juts out into the Gulf of Mexico, connected with the main territory of the country by a narrow strip northwest of the Guatemala frontier. The coast line on the Pacific is 4,574 miles long and 1,727 on the Caribbean. The northern boundary is 1,600 miles long.

The Sierra Madre range runs north and south near the western coast, turning near Colina and continuing nearly due east, paralleling the coast into the Central American countries. Near the Gulf Coast a range of mountains—a continuation of the eastern range of the Rocky Mountains—runs down nearly to Vera Cruz. Loftiest of the dormant volcanoes are Popocatepetl, altitude, 17,888 feet; Ixtaccihuatl, altitude, 17,343 feet, and Orizaba, altitude, 18,209 feet.

Between the two ranges lies the vast tableland of Mexico, altitude from 5,000 feet to 8,000 feet with a delightful climate (like New York in September) and with the vegetation and products of the temperate zone varying with the altitude. The lowlands along the coast are tropical, rising to sub-tropical in the foothills; hot and unhealthy with a heavy rainfall on the Gulf side. Along the Pacific slope and in the interior irrigation is needed and natural streams from the mountains are put to use with increasing zeal.

Agriculture and stock-raising are the chief industries. The country is marvelously rich, but the land is barely scratched except on the larger ranches; primitive methods of cultivation prevail. The cultivable lands are estimated at one-fourth of the total area, or 120,417,760 acres, of which only 30,000,000 acres are cultivated, much of which require irrigation. The grazing lands cover about 120,500,000 acres and forests 44,000,000 acres, of which 25,000,000 are estimated to be rich in pine, spruce, cedar, mahogany, rosewood and logwood. The principal products are corn, cotton, henequen (sisal), wheat, coffee, beans, tobacco, and sugar.

In 1926 corn was grown on 7,480,684 acres; wheat on 1,166,724; garbanzos (chick-peas), 370,500; beans (frijoles), 2,210,729; alfalfa, 109,836; potatoes, 35,906; coffee, 135,858; sugar cane, 227,734; cotton, 566,818; tobacco, 36,487; and rice, 118,293. The yield was: Corn, 2,077,002 tons; wheat, 278,8811, garbanzos (chick-peas), 81,190; beans (frijoles); 173,920; alfalfa, 1,620,490; potatoes, 42,971; coffee, 27,349; sugar cane, 4,640,439; cotton, 85,869; tobacco, 9,188; and rice, 38,125.

Cotton production in 1928 was 60,375 metric tons, wheat, 300,211 metric tons; and corn, 2,132,000 metric tons.

The 1926 census returned 5,121,000 cattle, 2,693,000 swine, 2,381,000 sheep, 4,899,000 goats, 964,000 horses, 622,000 mules and 732,000 asses.

President Obregon in August, 1923, issued a new land decree opening to all Mexicans over eighteen years of age (including citizens by naturalization) Federal lands for agricultural uses. One plot only may be taken by one owner, who is forbidden to sell to a foreigner or to any Mexican owning as much or more acreage. Lands which may be irrigated are limited to 25 hectares (1 hectare = 2.47 acres), dry lands up to 100 hectares and pasture lands up to 500 hectares. The Government's fee is $25 gold.

President Calles told Congress Sept. 1, 1925, that through the National Agrarian Commission 2,074,072 acres of land had been previously distributed among 76,549 Mexican families, and that a total of 1,449,270 acres had been definitely distributed among 76,549 Mexican families, and that a total of 1,432,480 acres of national lands had been distributed among 2,537 farmers. By Dec. 31, 1928 5,401,019 hectares (13,340,517 acres) had been distributed. The National Farm Credits Bank with a capital of 50,000,000 pesos was set up in March, 1926, to make loans to small farmers; regional associate banks with a minimum capacity of 500,000 will be established in every state.

Next to agriculture, the chief wealth of Mexico is in its minerals, and mining has been the most highly developed of her industries since the days of the Spanish conquest. The total value of silver mined from the first year of the Spanish conquest (1521) to January, 1922, was $3,000,000,000, somewhat more than 155,000 tons in weight, according to figures compiled by the Bureau of Mines of the Mexican Department of Commerce and Industry, being two-thirds of the world's silver production for the past 400 years. About $500,000,000 American capital is invested in mining. Mexico now yields over one-third of the world's production of silver and about 5% of its gold.

Mineral production in kilos for three years was:

	1926.	1927.	1928.
Gold	24,033	22,586	21,343
Silver	3,057,268	3,252,683	3,374,016
Lead	210,794,394	243,348,390	234,726,664
Copper	58,763,192	58,746,607	65,102,893
Zinc	105,336,568	136,471,434	162,022,801
Mercury	45,416	81,115	84,771
Antimony	2,614,404	1,707,000	3,342,222
Graphite	4,434,548	6,510,000	4,972,051
Arsenic	6,458,224	8,205,000	

The estimated value of mineral production in 1928 was 320,699,131 pesos; and in 1927, 332,981,595 pesos. About 50,000 metric tons of pig iron and 75,000 metric tons of steel ingots are produced annually, all for home consumption.

Mexico has an abundance of low grade coal, much like that of Texas, with 300,000,000 tons in sight. In Coahuila, 800,000 tons were mined in 1926.

PETROLEUM PRODUCTION

The petroleum industry in Mexico, which, in 1920, produced 23.5 per cent. of the world's output, in 1924, 13.8 per cent., and in 1925, 10.8 per cent., became a commercial factor in 1910. The total production from 1901 to 1927 has been 1,465,048,422 barrels with a commercial value of about $1,250,000,000. Oil had been discovered in 1901 in the Tampico district. In 1910, the famous Juan Casiano No. 7 well was drilled, and the equally famous Potrero del Llano No. 4 came in later with an initial flow of 10,000 barrels daily, increasing to 160,000 barrels, establishing itself as the largest producer up to that time. These were in the southern part of the Tampico district.

In 1925, 299 new wells were brought in and 498 abandoned; in 1924, the figures were 296 and 403; and in 1923, 259 and 208. In 1926, 853 wells were drilled of which 318 were producers with an initial production of 1,170,248 barrels a day, an average per well of 3,680 barrels. The average daily initial output of the new wells in 1925 was 3,668 barrels, and in 1924, 3,384. Total exports in 1926 were 82,587,681 barrels (96,517,050 in 1925); 67% went to the United States.

Mexican Government engineers reported, in 1926, that Mexico had approximately 14,820,000 acres of oil lands, of which only 14,820 have been exploited; these were valued at 386,388,000 pesos. They estimated that the total investment of the 85 oil companies operating in 1924 was 780,000,000 pesos, of which Mexican capital had furnished 23,528,000 pesos. Mexico had in 1920, 19 refining plants with a daily production capacity of 461,360 barrels. Storage capacity for all companies was 83,806,356 barrels.

The value of the 1926 product was $112,561,621; and the revenue to the state was 34,892,202 pesos from the production and the export taxes. The revenue in 1927 was 13,053,403 pesos and in 1928, 6,780,307 pesos.

The petroleum production of Mexico from 1908 to 1928 was as follows:

	Barrels.		Barrels.
1908.....	3,932,900	1919.....	87,072,954
1909.....	2,713,500	1920.....	163,620,551
1910.....	3,634,080	1921.....	193,397,587
1911.....	11,552,798	1922.....	182,712,000
1912.....	16,558,215	1923.....	149,584,856
1913.....	25,696,291	1924.....	139,497,476

Clothing and shoes...	920	7,232	2,639,275
Printing, etc.....	134	2,432	2,060,825
Construction mats...	65	2,028	1,529,875
Wood products, furniture, etc.....	—	4,488	1,269,860
Carriages, wagons....	19	346	444,100
Leather goods.....	38	157	91,650
Miscellaneous.....	3,485	134,347	165,946,384
Total.....	6,658	269,272	303,788,313

Official estimates of capital invested in 1925 are: Agriculture, $540,585,143; petroleum, $532,774,055; railways, $1,026,438,000; mines, $407,029,065; manufacturing, $303,788,313; light and power, $70,500,000; total, $2,881,114,576.

American investments in Mexico as estimated by the United States Department of Commerce approximate $1,325,000,000. Of this $475,000,000 are invested in oil properties and is about 57.8% of the capital invested in them, while the British share is 33.4% and the Mexican about 1%. Of the remaining investments, $340,000,000 is in mining; $240,000,000 in railroads; $200,000,000 in plantations and timber; $80,000,000 in manufacturing and public utilities; $25,000,000 in merchandising, and $10,000,000 in banking.

In 1928, 14,007 citizens of the United States were registered as residents of Mexico.

The Government in 1926 reported the value of all city property at 1,878,656,290 pesos; and of all rural property at 1,350,279,521 pesos. The number of rural holdings is 679,553 of all classes; and 595,519 were returned as owners of small holdings worth not more than 1,000 pesos; 12,550 holdings were valued at over 15,000 pesos; and 60 at from 500,000 to 1,000,000 pesos.

Mexico had, in 1927, 16,714 miles of railroads, of which 13,670 miles were under Federal control. The mileage open to traffic is 12,691. In 1909 the main lines were united in one Government-controlled corporation—the National Railways of Mexico, the operation of which, with virtually all the private lines, was taken over in 1914 and operated by the Government under the name of the Constitutionalist Railways of Mexico. The National Railways of Mexico own 6,818 miles of track and control 1,708 more; the Mexican Railroad has 550 miles of track; the Tehuantepec, 184; the Mexico Northwestern, 494; the Southern Pacific Railroad of Mexico, 1,307; and the United Railroads of Yucatan 530. Vera Cruz, Tampico, Puerto Mexico, Salina Cruz, Manzanilla and Acapulco are the chief ports. In 1927, 4,882 vessels of 8,869,159 tons, engaged in foreign trade entered.

The Federal Government has begun a comprehensive program for 7,125 miles of main highways and 13,000 miles of branches calling for an expenditure of nearly $40,000,000 in six years. For 1930 the budget carries 12,000,000 pesos.

There were, in 1922, 564 federated labor unions with 640,000 members, besides certain strong unions such as the railroad brotherhoods, with 47,600 members and the port workers with 15,000 on the outside. The new Constitution in Article 123 decrees: The eight-hour working day; the seven-hour working night; the six-hour day for working children twelve to sixteen; no night work for women and children; one day of rest in seven; a vacation on pay for child-bearing; a living wage; no garnishment of the living wage; enforced profit-sharing; cash wages; double pay for overtime; housing for workingmen; accident compensation; safe and sanitary work places; right to organize; right to strike or shut down; three months' wages for unwarranted dismissal; worker's lien; immunity of wages from attachment; free employment bureaus; no contracting out of workmen's rights; social insurance, and co-operative building associations.

CIVIL WARS AND INSURRECTIONS.

Mexico has been much torn by civil war and insurrections since achieving its independence from Spain (proclaimed Sept. 15, 1810, and effected in 1821). Conditions resulting almost in a state of war with the United States followed the *coup d'etat* by which, in February, 1913, Gen. Victoriano Huerta replaced Francisco I. Madero (murdered Feb. 22, 1913) in the Presidency. The United States did not recognize his Government (he resigned July 15, 1914), but, on Oct. 19, 1915, did recognize that of Gen. Carranza, who had driven Huerta's successor, Carbajal, from the capital and assumed executive power, Aug. 20, 1915. Carranza held power until May, 1920, when he fled from the capital before an uprising, and was killed trying to reach Vera Cruz. Adolfo de la Huerta, then Governor of Sonora and later Secretary of the Treasury, was made Provisional President in May, 1920, and Gen. Alvaro Obregon was chosen President at a general election in September, being inaugurated Dec. 1, 1920. The United States did not recognize his Government until Aug. 31, 1923; it then followed a three-months' conference between personal representatives of the two Presidents, held in Mexico City (see The World Almanac for 1926, page 644), and the preliminary signing of a convention covering boundary disputes, claims and the stipulation that Article 27 of the new Constitution of May 1, 1917, is not to be interpretated retroactively.

Article 27 affirmed that the title to mineral and other subsoil deposits was vested in the people of Mexico, and stipulated that only Mexicans and Mexican companies had the right to acquire concessions to develop mineral fuel in the republic. A foreigner might secure that right only if he renounced the privilege of recourse to his Government for redress through diplomatic channels. The intent to safeguard future concessions in the interest of the commonwealth is clear, but whether or not the article is retroactive has been the subject of much debate.

The Mexican Petroleum Law to put in effect Article 27, which was passed in December, 1925, and became effective Dec. 31, 1926, vests in the nation the direct ownership of all petroleum deposits. Owners who acquired titles prior to May 1, 1917, were called upon, under penalty of forfeiture, to apply before midnight of Dec. 31, 1926, for "confirmation" of their titles and then to exchange them for "concessions of fifty years' duration, counting from the time when the exploitation work began. This statute has been held by Secretary of State Kellogg to be both retroactive and confiscatory, on the ground that "it converts exclusive ownership under positive Mexican law into a mere authorization to exercise rights for a limited period of time.

When the time for filing registrations expired the Government cancelled drilling permits previously issued to companies, including a number of American ones which had not complied with the law. The Mexican Minister of Industry, Commerce and Labor, announced on Jan. 21, 1927 that of the 147 oil companies operating in Mexico, all but 22 (operating 1,660,579 acres, 5.83%) had accepted the petroleum law. It was reported from Washington that the companies opposing the law represented 88% of the oil production.

Following further diplomatic negotiations Congress, on recommendation of President Calles, passed an amended petroleum law in Dec. 1927. Executive regulations signed by President Calles on March 27, 1928, denied more liberally the terms of the law and replacing the objectional fifty-years "confirmatory concessions" offered by the old law in exchange for valid titles acquired prior to Mar. 1, 1917 by titles issued without time limitations. The time for applying for confirmations of pre-constitutional titles was extended to Jan. 11, 1929. Practically all companies by that date had complied with the law. This action was regarded by both governments as the final step in adjusting the controversy.

The Alien Land Law promulgated Jan. 21, 1926, went into effect Jan. 21, 1927, by which date between 8,000 to 10,000 foreigners had registered declarations of land ownership. The law enacts an article in the Constitution of 1917 which permits only Mexicans to own land in Mexico except that foreigners owning property prior to the promulgation of the law may retain it until death, or, in the case of corporations, for 10 years.

AGREEMENT ON THE DEBT.

The Secretary of Finance, Adolfo de la Huerta, signed an agreement in New York, June 16, 1922, with the International Committee of Bankers, designed to settle the eight-year-old question involving the Mexican external and internal debt. This agreement was approved by the Mexican Congress and signed by President Obregon.

The plan of adjustment relates to all external Mexican Government debts, direct or guaranteed, the National Railways debt and certain so-called internal Government debts largely held outside Mexico; the total face value of the securities covered being over $500,000,000 gold, on which the interest in arrears amounts to approximately $200,000,000.

This $700,000,000 includes Mexico's direct debt and guaranteed railroad bonds, totaling approximately $322,000,000 gold; the railroad debt, not guaranteed, amounting to about $230,000,000 back interest on bonds, and railroad debt amounting to about $115,000,000; sinking fund defaults amounting to about $28,000,000.

This agreement was declared operative on Dec. 8, 1923, and the $15,000,000 payment for 1923 was duly made. Further execution, however, was held up by the abortive revolution in 1924 of de la Huerta, which President Obregon told Congress cost $30,000,000 to put down.

The agreement was revised on Oct. 23, 1925, and the debt and service charges divided between Government debt and railroad debt, the latter being 45 per cent. The National Railways passed under private control on Jan. 1, 1926, with B. F. Holloway as Executive President. The defaulted payments of interest on the debt were spread over eight years; payment for 1926 was duly made, $11,021,999 on the direct debt, and $2,029,943 on the debt of the National Railways which the latter were unable to meet. Arrears for 1927 were paid up by June 30, 1928.

OBREGON ASSASSINATED.

Gen. Alvaro Obregon was elected without opposition on July 1, 1928, receiving 1,381,000 votes, president of Mexico for a six-year term, beginning Dec. 1, to succeed President Plutarco Elias Calles. He was assassinated while at a dinner in Mexico City on July 17, by Jose de Leon Toral, a young artist, who proved to be under the influence of certain rather obscure clerical plotters headed by Mother Superior Concepcion of the Espiritu Santo Convent, a suppressed institution. The two with 15 alleged accomplices were tried in November, Toral was found guilty and executed by a firing squad in Mexico City Penitentiary, Feb. 9, 1929. Mother Superior Concepcion was sentenced to 20 years imprisonment.

President Calles at the opening of Congress Sept. 1 emphatically refused to continue in office as Provisional President after his term of office, and pledged himself never again to be president. The Chamber of Deputies numbered 280, of which 234 were Obregonists. On Sept. 25, Congress in joint session unanimously elected Emilio Portes Gil, Provisional President, to serve from Dec. 1 to Feb. 5, 1930. Election of a constitutional president to serve the balance of the full six-year term (Feb. 5, 1930 to Nov. 30, 1934) was set for Nov. 17, 1929. (See Chronology for results).

Dr. Gil is 37 years old, a lawyer, and from 1925 until his appointment as Minister of the Interior was Governor of the State of Tamaulipas. He pledged himself to continue to policies of Calles and Obregon.

THE ESCOBAR REBELLION

A rebellion, purely political-military, well organized and led by Gen. J. Gonzales Escobar, broke out on March 3, 1929 in Vera Cruz and in Sonora and six of the northern and western states. The Vera Cruz uprising was put down within a week. President Portes Gil made ex-President Calles Minister of War. He made the campaign with between 30,000 and 35,000 troops against the rebels, who with about 12,000 to 15,000 soldiers formerly of the regular army held strong positions in Sonora, Chihuahua and Sinaloa. March and April saw many sanguinary engagements with continuing success of the Federal forces and the first days of May witnessed the complete collapse of the rebellion. Gen. Escobar escaped to the United States. Fifty-two deputies were expelled from Congress. Forty-four generals were deprived of their rank, some were captured and shot and the property of all the leaders confiscated, about $4,500,000, and given to the National University. The immediate expense to the Government amounted to $7,500,000; loss of revenue was about $3,500,000; damage to railroads was about $6,500,000 and certain property loss was estimated at $10,000,000.

President Hoover announced on March 5 that he would continue the Coolidge policy of supporting the constitutional regime in Mexico, declined to recognize the belligerents on March 11, and on March 15 surplus arms, ammunition and material of the War Department was sent the Mexican Government on their request. Little damage was suffered along the border.

Minister of War Gen. Amaro in his annual report Sept. 1, 1929, gave the personnel of the army as: 27 generals of division, 115 generals of brigade, 1,770 other high ranking officers, 5,664 junior officers and 55,646 troops of the line. Military education is compulsory in the schools.

CHURCH CONTROVERSY SETTLED

The long standing controversy between the Church and the State, which became acute in 1926, was adjusted in 1929. Announcement was made on June 21 by President Portes Gil and the Apostolic Delegate Archbishop Leopold Ruiz y Flores in a joint statement. By the settlement priests, duly named by their superiors, are to register under the laws; it is accepted that the church edifices are national property and as such under government control with duly appointed custodians, the church having the right to designate the priests in charge of the churches; religious instruction in public schools is prohibited by the constitution but permitted within church confines by ministers of any religion; and the constitutional right of petition guaranteed. Much credit was given the American Ambassador, Dwight W. Morrow, for his good offices. Churches that were closed on July 31, 1926 when the heriarchy ordered the suspension of all religious services were reopened and masses celebrated on June 27 amid universal rejoicing. Bishop Pascual Diaz of Tabasco was made Archbishop of Mexico City and Primate by the Pope in succession to the late Archbishop Mora y Del Rio, who died in exile in San Antonio on April 22, 1928.

(For the controversy with the church see the World Almanac for 1928, pages 642-43, and the Almanac for 1927, pages 643-44.)

THE NEW CONSTITUTION.

Mexico is now governed under a new Constitution promulgated Feb. 5, 1917, replacing the Constitution of 1857. By it Mexico is declared to be a federated republic of 28 states, each with a large measure of home rule and with Governor, Legislature and judiciary elected by popular vote; two territories and a Federal District, whose Governors are appointed by the President. Interstate customs duties are not permitted. The legislative power rests in a Congress consisting of a Chamber of Deputies and a Senate of fifty-eight members, two for each state, all elected for two years by universal suffrage. The President is elected for four years by direct popular vote and cannot be re-elected until after an intervening term (Amendment of 1927). He appoints a Cabinet of ten Secretaries. Article 33 confers on the President the right to expel from Mexico without "judicial process" any foreigner whose presence he might deem "inexpedient."

The Constitution was amended in 1928, making the president's term six years, reducing the number of Federal deputies to 150, providing that Supreme Court judges be appointed by the President instead of being elected, and establishing Federal commissions instead of mayors and boards of aldermen to rule Mexico City and other towns in the Federal District.

A new income tax law and a profits tax law were promulgated March, 1924.

A new penal code promulgated by President Portes Gil under extraordinary plans given him by Congress became effective Dec. 15, 1929. The death penalty is abolished and also trial by jury in criminal cases gives way to investigation by a commission of alienists and other experts whose findings cannot be appealed from. A Supreme Council of Social Protection and Prevention made up of five specialists takes charge of the defendant on conviction on an indeterminate sentence and decides on treatment and reform, and under their authority will be placed all penal and preventative institutions. The carrying of arms is prohibited.

Education is under Federal control and is free and compulsory from six to sixteen. The percentage of illiteracy as shown by the census of 1921 was 62.29. There are many Indian tribes, about 20

per cent. of the population, quite uncivilized. In 1926, of 2,652,199 children of school age, only 1,040,521 were attending school—35.57 per cent. The number of schools supported by the Federal Government in 1926 was 2,690; and by the several states, 4,635. Appropriation by Federal, state and local governments for education in 1925, totaled about 43,250,000 pesos. The present administration is making every effort to extend elementary education to all classes of the people; 2,000 volunteer teachers of illiterates were enrolled in 1921.

Vocational education, particularly in agriculture, is being promoted. There are normal schools for both sexes throughout the country and some hundred technical schools. The National University of Mexico, founded in 1553, is famous among Latin-American universities, and in the capital are many higher institutions of learning and culture and scientific institutions and societies.

Mexico is not a member of the League of Nations.

REVENUE AND EXPENDITURES.

Recent budgets in pesos are:

Year.	Rev.	Exp.
1923	237,876,206	246,837,134
1924	241,664,624	
1925	309,306,101	291,863,677
1926, est'd	315,000,000	305,000,000
1927, est'd	334,300,000	326,900,000
1928, est'd	290,000,000	289,900,000
1929, est'd	290,000,000	291,117,789
1930, est'd	287,000,000	280,000,000

The highest expenditure in any pre-revolutionary year was in 1910-11, 100,913,924 pesos.

The Bank of Mexico, Inc., began operations Sept. 1, 1925, with a capitalization of 100,000,000 pesos—51 per cent. of the stock owned by the Government—for the issuance of paper currency, none of which had been in circulation since 1920. Note circulation (old and new) Dec. 31, 1927 amounted to 31,830,000 pesos.

The public debt of Mexico is as follows:

Internal Debt:	
Consolidated 3% internal debt, 1886	$21,191,925
5% internal redeemable bonds, 1894	46,455,850
State loans guaranteed by Mexican Gov't.	1,750,000
Total	$69,397,775
External Debt:	
Customs secured Government loans	$128,080,837
Other secured Government guaranteed loans	31,719,675
Unsecured Government loans	37,037,500
Railway loans	241,894,778
Total	$438,732,790
Grand total	$508,130,565

The peso (=$0.50) had an average exchange value of $0.4939 in 1925, of $0.483087 in 1926, of $0.472 in 1927, and $0.481 in 1928.

Imports and exports were:

Year.	Imports.	Exports.
1920	$197,731,525	$427,652,497
1921	247,001,594	378,614,591
1922	151,404,180	472,273,009
1923	157,553,764	369,776,415
1924	152,232,778	355,746,501
1925	192,761,000	338,456,000
1926	184,188,000	329,129,753
1927	163,495,000	296,124,201
1928	167,629,000	269,636,000

The total trade balance in favor of Mexico for seven years was about $1,246,700,000 or $168,000,000 a year.

The trade between the United States and Mexico exceeded a million dollars a day in the final half of 1925. The United States took about 90% of Mexico's exports for 1922, 1923 and 1924; 75.77% in 1925; and 71% in 1926; and supplied 58% of her imports in 1922, 72% in 1923, 85% in 1924; 70.20% in 1925; and 70.45% in 1926.

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$109,884,917	$132,087,840
1923	120,196,238	140,141,888
1924	135,076,703	167,087,305
1925	144,720,323	178,835,454
1926	134,994,277	169,306,142
1927	109,148,365	137,815,044
1928	115,651,922	124,521,996

MONACO, PRINCIPALITY OF

AREA, 8 square miles.

POPULATION, census of 1928, 24,927.

CAPITAL, Monaco, population 1928, 2,085; other towns, La Condamine, 11,787; Monte Carlo, 11,055.

Prince, Louis II., born July 12, 1870, succeeded his father, the late Prince Albert, June 26, 1922.

The Heiress Apparent is the Hereditary Princess Charlotte Louise Juliette (Duchess of Valentinois), born Sept. 3, 1898, married, March 19, 1920, Prince Pierre of Monaco (Count de Polignac) and has issue a daughter, Princess Antoinette, born Dec. 28, 1920; and a son, Prince Rainier, born May 31, 1923.

Monaco is a small principality on the Mediterranean surrounded by the French Department of the Alpes Maritimes. An independent Principality for 800 years, the reigning Prince was dispossessed by the French Revolution. The line was re-established in 1814 and placed under the protectorate of the Kingdom of Sardinia. In 1861 King Charles III, ceded his rights to France. The Prince of Monaco was an absolute ruler until Jan. 7, 1911, when a Constitution was promulgated which provides for a National Council of 21 members, elected by universal suffrage for four years. The revenue is mainly derived from the gaming tables of the Casino at Monte Carlo. The annual grant for the concession was £80,000 in 1917; in 1927 it was £90,000, and in 1937 will be £100,000. The yearly average of visitors is over 1,500,000.

The "take" in 1928 was $5,766,104, expenditures, $2,538,891, profits, $3,227,213.

The Monegasque voters, about 700 in number, demanded of Prince Louis in December, 1928, constitutional and administrative reforms, threatening if denied a referendum to call his abdication, and declare a republic allied to France. Finally, on Sept. 12, 1929, the Prince agreed to the reforms.

The late Prince established an important oceanographic museum and laboratory at Monaco.

MOROCCO, SULTANATE OF
EL MOGHREB
(French and Spanish Protectorates.)

AREA, about 231,500 square miles; viz., French Protectorate, 213,000; Spanish Protectorate, 18,360; Tangier (internationalized), 140.

POPULATION, census of March, 1926, French zone, 4,229,146; Spanish zone, estd., 744,000; Tangier zone, estd., 80,000.

CAPITAL, Fez, population, census of 1921, 70,540. Seat of government French zone, Rabat, population, 30,953; residence of French Resident General. Seat of government Spanish zone, Tetuan, population, 30,000; administrative headquarters of the Caliphs and the Spanish High Commissioner. Other cities, Marrakesh, or Morocco, population, 1921, 139,874; Casablanca, 101,690 (39,283 Europeans); Tangier, 80,000, (12,000 Europeans); Mekines, 36,592; Mazagan, 21,630; Mogador, 20,309; Sale, 24,202; Safi, 26,396; and Melilla, 42,590.

Sultan, Moulai Mohammed, third son of Moulai Yusef, succeeded his father Nov. 18, 1927.

French Resident General, Lucien Saint, appointed Jan. 2, 1929.

Khalifa of the Spanish Zone, Sidi Muley Hassan Mehedi (born 1910), younger son of Sultan Muley-el-Mehedi (died 1923), installed Nov. 9, 1925.

Spanish High Commissioner, Gen. Conde de Jordana.

United States Agent and Consul General, at Tangier, Maxwell Blake.

Morocco of to-day is the remnant of the great Shereefian Empire founded by the Arab invader, who carried the crescent of Islam west at the close of the seventh century and ruled all northwestern Africa and most of the Iberian peninsula. It is bounded on the east by Algeria, on the north by the Mediterranean, the extreme point opposite Gibraltar being Ceuta, a city which, with its four-mile-long peninsula (dominated by Jebel Musa, one of the Pillars of Hercules), has belonged to Spain since the close of the sixteenth century. This narrow northern strip, about 60 miles wide, from the Atlantic nearly to the Algerian border, is one of the Spanish zones. Ceuta is, politically, part of the Spanish province of Cadiz.

On the west is the Atlantic Ocean and on the south Rio de Oro (Spanish) and the Sahara Desert. The extreme southern end forms a second Spanish zone, and a strip 50 miles long by 15 deep on the Atlantic Coast, inclosing the town of Ifni, the third.

Along the 200 miles of the Mediterranean littoral run the Riff hills, still unexplored. Through the country from northeast to southwest run the Atlas Mountains in five great ranges rising to an altitude of 12,000 feet (Mt. Ayashiu, altitude 14,150 feet). Between these ranges lie fertile, well-watered plains and the northern slopes of the mountains are well wooded. Irrigation is much used, though all agricultural methods and implements are primitive.

The climate is good and healthy, especially on the

Atlantic Coast, which is shielded from the hot winds of the Sahara by the Atlas Mountains, and where there is a "tell" or fertile region. Tangier is a recognized health resort, also Mogador, where the temperature never rises above 80 or falls below 40.

The most numerous of the inhabitants are the aboriginal Berbers, mountain dwellers, whose forebears thrice conquered Spain, and who so long maintained the independence of their country. The plains are mostly occupied by Arabs and a mixture of the two races, known to foreigners as "Moors." The latter are also town dwellers. The third race is Jewish, in two sections, one settled there from time immemorial, and the other driven from Europe in comparatively modern times, who live near the ports, are progressive and have much of the foreign trade. The European population in 1926 numbered about 106,000, of which two-thirds are French.

The people are agricultural and pastoral. Eggs and poultry have become the chief articles of export, reaching even to England. In 1926 the value of eggs exported was 113,897,667 francs, and in 1927, 82,040,363 francs. Other important exports are skins, hides, wool, beans, barley, linseed and wheat, almonds, cummin and gums. The chief imports are textiles, sugar, tea, machinery and hardware, candles and spirits. Fruit and vineyards are abundant and dates a regular crop. Under proper cultivation Morocco should become a rich, cereal-producing country. Carpets, leather goods, fezzes, woolen and silk stuffs are among the manufactures, chiefly for domestic consumption. Mineral deposits are undeveloped, but much copper, lead and tin are known to exist. An oil field extends from Fez to Laraish. Phosphate exists in great aburdance, estimated at 100,000,000 metric tons, with a yield of 65 per cent., and a decree of 1920 reserves to the Sultan's Government the right of exploitation. Export of phosphate from Casablanca, in the French zone, in 1928 amounted to 1,337,100 metric tons; and in 1927, 1,183,469 tons.

The country had no roads or bridges, transportation being by mule and camel back, but the French have built, 1927, 1,779 miles of first class roads and 669 miles of second class roads. Little has been done in the Spanish zone. In the French zone, in 1924, there were 914 miles of railroads, those of narrow gauge being rebuilt at standard gauge. The Spaniards have a narrow gauge road from Ceuta, to Tetuan, to Rio Martin. The French use aeroplanes for mail, passengers and freight.

In 1927, 1,713 vessels of 2,421,088 tonnage entered the ports of French Morocco, and 1,615 vessels of 1,557,188 tonnage entered Tangier. Imports at Tangier in 1926 were valued at 145,936,000 francs (138,061,614 in 1925), and exports at 28,595,000 francs (18,096,725 in 1925). Imports into the Spanish zone in 1924 amounted to 123,600,000 pesetas, and exports to 18,000,000 pesetas.

French interests in Morocco had been steadily growing because of its proximity to Algeria for years and had been recognized in the agreements of 1906 and 1909. A general rising of the tribes in October, 1910, culminating in the siege of Fez called out a French expedition of pacification, which occupied Fez in 1911. The need of this had been notified to the powers, but was resented by Spain, who in June suddenly occupied two towns, and by Germany, who on July 1, 1911, sent the gunboat Panther to Agadir, a seaport on the Atlantic, ostensibly to safeguard German subjects in the Sus but really to challenge the extension of French influence. The crisis became acute and war seemed inevitable. Great Britain, however, stood by the Entente and made formal objection to Germany's acquiring territorial influence in Morocco. Diplomatic conversations followed, which resulted in the Franco-German treaty of Nov. 4, 1911, by which France ceded to Germany some territory in French Equatorial Africa on the southern and eastern borders, the Cameroons, in return for recognition of her political protectorate over Morocco. A treaty with Spain adjusted the limits of their respective spheres. On March 30, 1912, the Sultan Mulai Hafid signed a treaty with France accepting the protectorate, which was recognized by the powers, who withdrew their diplomatic representatives. Gen. Lyautey was appointed Resident General, and his advice the Sultan, an absolute despot, and his six viziers have to follow. Risings occurred later in the year and Mulai Hafid abdicated in favor of his brother. The rebellious tribesmen made much trouble and were stirred up to more by the Germans during the World War. An outbreak, in October, 1920, was crushed by the French capture of Wazzan, who thus consolidated their rule in most of the districts.

A severe outbreak near Melilla in July, 1921, seriously threatened the Spanish rule in its protectorate, but was suppressed only to be followed by a more serious one under the Riffian leader, Mohammed ben Abd-el-Krim el Khattabi, who organized an army in 1923 to fight the Spaniards. He sought the independence of the Riff. It was technically a rebellion against the Sultan of Morocco. The frontier of the spheres of influence were shadowy and the tribes given to raiding, so the French found themselves in April, 1925, attacked and compelled also to defend their prestige in Africa.

After much severe fighting and heavy losses on both sides, Abd-el-Krim found himself defeated and surrendered to the French May 28, 1926. He was later exiled to Reunion with a pension and establishment of an ex-Sultan.

Gen. Lyautey's wise administration of the protectorate, to which he returned in 1917, after service in 1916 as Minister of War in Paris, had been one of peaceful penetration, extension of railroads and roads, public works and social welfare. Agricultural and industrial enterprises have been fostered, public health and education improved. The country has become safe and orderly. Able army officers and civilians have assisted him. Colonization is encouraged. Economic opportunity, the "open door," is guaranteed to all.

Tangier, a seaport of 80,000 inhabitants, including 11,700 Europeans and 12,000 Jews, which occupies the extreme northwest corner of Africa on the Atlantic, was temporarily internationalized in the negotiations of 1911-12, with a hinterland of about 140 square miles. A convention was signed on Dec. 18, 1923, and a protocol in July, 1925, by Great Britain, France and Spain, providing for its permanent neutrality, security and internationalization. Spain, however, reopened the question in 1926 by a demand for full control and the incorporation of Tangier within the Spanish protectorate. Great Britain and France withheld consent and Italy declared her interest in the matter as a Mediterranean power. Italy's right to intervene in all questions affecting the balance of power in the Mediterranean was recognized. A new accord was signed July 25, 1928 and went into effect Jan. 18, 1929. Spain was given control of policing. A committee of control, consisting of the eight consular officers of the Algeciras signatory powers, and an international legislative assembly of twenty-six members, forms the government.

The budget of the French protectorate for 1929 was balanced at 687,768,968 francs. The Moroccan debt (five French loans), amounted on Jan. 1, 1927, to 705,624,000 francs.

The budget for 1928 in Spanish Morocco was balanced at 59,913,441 pesetas by including a grant of 37,349,941 pesetas from the Spanish treasury. The Tangier budget for 1929 was: Revenues, 23,971,500 francs, and expenditures, 00,000,000 francs.

Imports into the French Zone in 1927 were valued at Frs. 1,789,597,755, and exports at Frs. 851,390,410. Imports into the Spanish Zone in 1926 were valued at 94 million pesetas, and exports at 17,000,000 pesetas. Imports into Tangier in 1927 were valued at Frs. 129,445,605, and exports at Frs. 33,543,730.

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$3,017,126	$212,616
1923	2,112,144	357,865
1924	1,569,690	465,062
1925	2,391,479	737,364
1926	2,313,311	542,485
1927	3,296,217	731,794
1928	3,668,926	1,141,355

NEPAL, KINGDOM OF

AREA, estimated, 54,000 square miles.

POPULATION, 5,639,092.

CAPITAL, Kathmandu, population, 80,000.

Sovereign, Maharajah Tribhubana Bir Bikram, born June 30, 1906, succeeded his father Dec. 11, 1911.

Prime Minister, Maharajah Sir Chandra Shumshere Jung, Bahadur Rana, appointed June 26, 1901; he holds the rank of General in the British Army.

Nepal is an independent state on the southern slope of the Himalayas, bounded by Thibet on the north, by Sikkim and Bengal on the east and by Bengal and the United Provinces of British India on the south and west. Though friendly, a policy of seclusion is followed and travel discouraged. The Ghurkas, whose Aryan ancestors from Rajputana mixed with the Mongolic aborigines, overran the country in the latter half of the eighteenth century, and are the dominant race. From their ranks the British Indian Government recruits regiments of most valuable soldiers. The kingdom maintains a well-drilled and efficient army of 32,000 infantry and 2,500 artillery. There are many fertile valleys lying in the slopes of the bleak and lofty mountains (which include Mt. Everest, altitude 29,141 feet), and its territory runs into the Teral on the plains of India. It has rich forests. Nepal exports rice, grain, hides and cattle, and imports textiles, sugar, salt, hardware, etc. The capital is in a most fertile valley, cultivated from end to end, 15 miles long

and twenty miles wide, which supports 300,000 inhabitants and is noted for its 2,700 Buddhist shrines, nearly all lavisnly decorated examples of Nepalese art. Paton is the largest city and Pashpoti a holy centre for pilgrims.

The Maharajah, whose rule is absolute, declared in a humanitarian speech on Dec. 3, 1924, a decree for the abolition of slavery. The General Council put it into effect immediately, completing the manumission in August, 1926. Out of 15,719 owners of slaves only 467 desired the retention of slavery. The number liberated with compensation was 51,782. Their masters freed 4,651 without compensation, 1,984 died; 1,342 fled and 114 paid for their own release, thus accounting for a total slave population of 59,873. The cost was $1,366,250, an average of $25 a slave. Rates paid ranged from $7 for a female and $5 for a male under three years to $35 for a female and $26 for a male between the ages of thirteen and forty. Tracts of cultivable land were thrown open and suitable cash advanced to the freedmen.

The first railway, 24 miles long, was opened in February, 1926. It runs from Raxaul, on the Indian frontier, to Kathmandu.

Exports to India in 1925 amounted to £2,095,760 (£2,106,562 in 1924); and imports, £4,365,011 (£4,554,799 in 1924).

NETHERLANDS, KINGDOM OF
HOLLAND.

AREA; 12,582 square miles, land only; 13,208 square miles including inland waters. Colonia possessions: Dutch East Indies, 733,642; Dutch Guiana, 54,291 square miles; Curacao Islands, 403 square miles; total, 788,336 square miles, Grand total, 801,544 square miles.

POPULATION, official estimate Dec. 31, 1927, 7,625,938. Colonial—Dutch East Indies, 49,534,618; Dutch Guiana, 128,822; Curacao, 56,038. Grand total, 57,345,516.

CAPITALS, The Hague (seat of the Court), population, est. Dec. 31, 1927, 416,179; Amsterdam (legislative), population, 734,884. Other cities: Rotterdam, 571,842; Utrecht, 151,660; Groningen, 101,310; Haarlem, 113,304; and 40 others with between 20,000 and 80,000.

Queen, Wilhelmina, born Aug. 31, 1880, succeeded on the death of her father, Willem III., Nov. 23, 1890; crowned Sept. 6, 1898. Married Prince Henry of Mecklenburg-Schwerin (Prince Consort), Feb. 7, 1901. *Heir*, her only daughter, Princess Juliana, born April 30, 1909.

Premier, Jonkheer Charles J. M. Ruys Van Beerenbrouck (Interior and Agriculture) Catholic, Aug. 7, 1929.

The Netherlands (Holland), a kingdom in northwestern Europe, 196 miles long by 109 miles wide, is bounded by Germany on the east, Belgium on the south and the North Sea on the west and north. Its surface is flat, with an average height above sea level of 37 feet and with about one-fourth of its land below sea level, reclaimed and protected by dikes, of which there are 1,500 miles. Drainage of half of the shallow Zuyder Zee, which covers 1,350 square miles with an opening into the North Sea about nineteen miles wide, designed to add 900 square miles to the cultivable land (polders), adopted June 14, 1918, is now under way. One part of the great dam (1½ miles long) connecting the west coast with the island of Wieringen, was completed in 1925. The other (17½ miles long), to connect the island with the eastern shore, will have huge tidal sluices to discharge the waters of the "Lake" Yssel, which will be left as a huge freshwater reservoir fed by the River Yssel, a branch of the Rhine, and will be finished by 1935. The cost of the dam will be $35,000,000, and the entire expenditure for thirty years on dikes and drainage will be about $190,000,000. The added value of fertile soil will be $210,000,000.

Of the country's 5,563,960 acres given over to agriculture, (including gardens, orchards and pastures), 90 per cent. are in holdings of less than 50 acres and more than 50 per cent. of less than 12 acres, with 361,392 employed on the land in 1921. There are 615,165 acres of well cared for forests. Great crops of cereals, potatoes, etc., are raised. Dairy products are an important industry, her cheese products being famous, and her cattle high grade; tulips and other flowering bulbs and roots are grown and exported extensively.

The livestock census of 1921 returned 2,062,771 cattle, 668,211 sheep, 363,688 horses, and 1,519,245 pigs.

Beet sugar produced in 1926 was 259,115 tons.

Fisheries engage about 6,500 vessels and 18,000 men, and the product of the herring fisheries alone in 1926 was $4,144,400, and of all fresh fish, $9,086,600.

Shipbuilding and sugar refining are important industries, also brewing and distilling. Amsterdam is famous for diamond cutting. Coal is found in Limburg, where 5,882,254 metric tons were mined in 1924; 6,848,000 in 1925; 8,643,272 in 1926; 9,323,110 in 1927; and 10,694,000 in 1928.

There were 106 cotton mills in 1928 with 1,112,740 spindles and 52,026 looms.

Unemployment, which reached 102,225 on Jan. 1, 1924, steadily declined to 50,850 on June 21, rose to 76,000 on Jan. 1, 1925, fell to 51,000 on May 3, 1926, and to 47,200 on July 30, 1927. A new labor law providing for compulsory arbitration in labor disputes went into effect May 4, 1926. Government payments for unemployment doles in 1926 amounted to 5,783,000 guilders (5,051,600 in 1925), and municipalities expended in 1926, 1,670,100 guilders (1,765,700 in 1925).

Canals, of which there are 2,000 miles, are most important in internal communication; elaborate systems are in the cities and feed the harbors. The Rhine and the Scheldt reach the sea through the Netherlands and carry enormous traffic.

The roads and streets, narrow and old, have suffered the very heavy wear and tear of ever increasing automobile traffic. The government has made up a comprehensive program for highway and bridge construction and maintenance which will involve expenditures up to 300 million guilders ($120,600,000) in the next 25 years. The first part, a five-year program was begun in 1927, about 10 million guilders being expended that year, and 26.6 million in 1928. There are 15,530 miles of roads of which 1,240 are under direct control of the National Government, and 1,860 under direct control of the several provinces.

Over 1,500,000 bicycles are in use and 47,000 motorcycles.

The railway mileage in 1927 was 2,284, and tramway mileage 1,909.

Holland's merchant marine on July 1, 1929, consisted of 988 steamers of 2,545,221 gross tons, and 332 motor ships of 387,119 gross tons. In 1927, 24,710, vessesl of 33,716,000 tonnage entered the ports of The Netherlands, 59.4% entering Rotterdam and 15.6% entering Amsterdam.

The first Constitution after the reconstruction of the Netherlands as a sovereign state was promulgated in 1814, and revised in 1815, after the addition of the Belgian provinces, and in 1840, 1848, 1887, 1917 and 1922. It assures a hereditary constitutional monarchy. Executive power rests exclusively in the sovereign and the States-General of two Chambers: First Chamber, fifty members, elected for nine years (one-third each third year) by the provincial states, and the Second Chamber, 100 Deputies, elected for four years directly. Universal suffrage for citizens of both sexes over twenty-five years of age and proportional representation is in force. The Sovereign exercises the executive authority through a Council of Ministers, the President thereof corresponding to a Prime Minister. There is a State Council of fourteen members, named by the Sovereign, of which she is President, to be consulted on all legislative and some executive matters.

Under the revision of 1922 the Dutch East Indies have been abolished as a colony and made an integral part of the Kingdom. All laws adopted by the government of the islands are to be approved by the States-General.

Compulsory voting brought 3,380,217 to the polls at the election of the Second Chamber of the States-General, July 1, 1929. The Catholic party polled 1,001,574; the Socialists, 804,818; the orthodox Communists, 37,622; and the secessionist Communists, 29,860; but electing their leader, David Wijnkoop. The make-up of the Chamber, practically unchanged, is: Catholic, 30; Socialists, 24; Anti-Revolutionists, 12; Christian-Historicals, 11; Liberty Leaguers, 8; Democrats, 7; Others, 4.

The first chamber elected in 1926 stands: Catholics, 16; Anti-Revolutionists, 7; Protestants, 7; Social Democrats, 11; Liberals, 6; and Democrats, 3.

The kingdom has a unique system of frontier defense besides the fortresses, inasmuch as two-thirds of the total area is surrounded by the sea with dikes to hold back the waters. An advance by an enemy may be stopped by inundating the lands. Army service is partly compulsory and partly voluntary. Every Dutchman is liable for service from ages nineteen to forty. Actual service may be by lot, substitution being prohibited. Annually 25,500 are recruited, with 600 for sea service. The strength on April 1, 1928 was 8,651 officers, and 364,142 men. The army budget is about 58 million guilders annually, and the navy 40 million.

Entire liberty of worship and conscience is guaranteed. The royal family belong to the Dutch Reformed Church. The state budget for 1927 con-

tains allowances for different churches: Protestant, 1,791,000 guilders; Roman Catholic, 704,000; Jansenists, 12,000, and Jews, 35,000.

Education is obligatory from ages six to thirteen. Instruction is free in both public and denominational schools and teachers are paid by the state. The state expenditure in 1928 was 148,836,000 guilders. Intelligence is most widely diffused. Conscripts called in 1927 showed only 0.17% unable to read. There are universities at Amsterdam (2), Utrecht, Leyden, Delft, Groningen, Wageningen (Agriculture), Rotterdam (Commerce), and Nijmegen (Roman Catholic), with 627 professors and 9,808 students in 1928.

The guilder (or florin) is the unit of currency, par 40.2 cents. It has been on a gold basis since April 28, 1925.

Recent budgets in guilders were:

Year.	Revenue.	Expenditure.
1925 (actual)	782,896,000	750,259,000
1926 (actual)	835,716,000	750,321,000
1927 (actual)	767,420,000	704,327,000
1928 (estimated)	760,735,000	932,758,000
1929 (proposed)	645,961,706	783,219,792
1930 (proposed)	648,892,849	708,735,461

The budgets for colonial possessions were: 1929, Revenues in mother country, 14,694,600 guilders; in the colonies, 759,819,633 guilders; total, 774,514,233 guilders. Expenditures, home government, 153,438,959 guilders; in the colonies, 643,574,792 guilders; total, 827,013,751 guilders; in 1928, total revenues, 747,194,826 guilders; total expenditures, 798,110,550 guilders. The 1930 budget proposed by the Dutch East Indies Government was: Revenues, total, 848,637,000 guilders; expenditures, total, 908,690,000 guilders.

The consolidated debt on Sept. 1, 1929, was 2,505,279,000 guilders, the net floating debt about 222 million; and the amount of capital invested in state industries was about 209 million. The limit of direct taxation is believed to have been reached, excise duties have been increased and some adjustment made in custom duties. Note circulation of The Netherlands Bank on July 31, 1929, was 812,000,000 guilders, with a gold reserve of 449,000,000 guilders (55.3% of cover).

Imports and exports, exclusive of gold and silver, in guilders (000 omitted) were:

Year.	Imports.	Exports.
1922	2,027,599	1,221,231
1923	2,009,226	1,303,221
1924	2,363,532	1,660,656
1925	2,456,000	1,808,000
1926	2,441,903	1,749,205
1927	2,548,913	1,899,711
1928	2,683,892	1,986,185

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$117,806,225	$63,794,944
1923	109,172,753	77,521,178
1924	151,734,170	74,041,925
1925	141,518,151	92,538,892
1926	135,795,044	101,855,118
1927	148,219,960	87,241,834
1928	142,269,936	83,617,678

DUTCH EAST INDIES

AREA, 733,642 square miles; viz., Borneo, 206,810; Molucca Islands, 30,168; Celebes Islands, 72,679; Java and Madura, 50,557; Sumatra, 163,128; Timor Archipelago, 26,410; Rian-Lingga Archipelago, 12,506; New Guinea, 160,692; rest of the Archipelago, 10,494.

POPULATION, census of 1920, 49,534,618. Est. Dec. 31, 1925, 51,014,000; viz., Java and Madura, 1920, 34,984,171 (est. 1925, 36,404,000); Borneo, 1,682,922; Sumatra, 5,848,868; Celebes Islands, 3,108,337; rest of the Archipelagos, 475,000; New Guinea, est. 195,000.

CAPITALS, Batavia, Java, population, 290,408; Banjermasin, Borneo, 65,074. Other cities, Surabaya, 248,961; Surakarta, 151,273; Semarang, 150,952; Bandoeng, 136,016; and Djokjakarta, 110,120.

Governor General, Dr. A. C. D. de Graeff, 1926.

The colonial possessions of the Netherlands in the East Indies consist of great islands and archipelagoes lying along the Equator from about 6° north latitude to 10° south latitude, between the Asiatic mainland and the Philippines, and Australia. They form the bulk of Malaysia. The estimate of 1925 gave the native Malay population as 49,848,600; Europeans, 210,000, and Orientals, chiefly Chinese and Arabs, 955,300. Java is the most densely populated land mass in the world (689.4 to the square mile). The great majority of the natives are Mohammedans. Much attention is given to education.

The islands are luxuriant, even for the Tropics, of enormous natural and annually productive wealth. Dense forests abound in valuable timber. Besides raising sufficient food for the dense population, there is produced for export in Java and Madura alone, sugar (2,938,829 metric tons in 1928, 2,046,000 in 1927, and 2,514,000 in 1926); coffee, tea, cocoa, indigo, spices, cinchona, tobacco, rubber, copra, tin and petroleum. Of coal, the mines of Java, Sumatra and Borneo produced in 1927, 1,620,205 long tons, and in 1926, 1,466,359 tons.

The export of rubber in 1927 was 280,244 metric tons, and in 1926, 249,021 tons. The production of tin from the state owned mines in their fiscal year 1927-28 was 21,063 metric tons.

Petroleum production in 1928 was 28,500,000 barrels (25,698,000 in 1927, and 21,243,000 in 1926).

Of the world's supply of quinine (cinchona), 10,700,000 kilos (99% of the world's supply) comes from Java, the first trees having been brought from Peru.

There are 4,416 miles of railroads, 3,368 in Java and 1,019 in Sumatra; 2,550 are state owned. In 1927, 11,757 steamers of 9,086,926 tonnage, and 9,026 sailing vessels of 524,028 tonnage, entered the ports. The Colonial army numbers 40,000, about one-quarter European, with 20,000 in the reserve.

The guilder (=40.2 cents) is the unit of currency which has been on a gold basis since Apr. 28, 1925.

The budget for 1929 is shown above in the Netherlands article.

The debt, Dec. 31, 1928, was about 1,079,700,000 guilders.

Imports and exports, including for both government and private account and gold and silver in guilders:

Year.	Imports.	Exports.
1921	1,245,480,271	1,196,658,528
1922	782,783,456	1,148,395,818
1923	651,631,000	1,388,189,000
1924	703,386,000	1,557,308,000
1925	862,584,000	1,813,348,000
1926	923,989,000	1,598,656,000
1927	927,041,000	1,643,664,000

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$8,096,203	$34,424,253
1923	12,089,786	54,889,320
1924	14,479,265	57,520,320
1925	19,204,364	95,834,007
1926	27,608,882	119,616,454
1927	32,137,012	91,388,340
1928	34,444,703	86,151,996

DUTCH GUIANA (Surinam).

AREA, 54,291 square miles.

POPULATION, Dec. 31, 1926, 142,896, exclusive of Negroes and forest Indians.

CAPITAL, Paramaribo; population, 1925, 45,554.

Governor, Dr. A. A. L. Rutgers, 1928.

Dutch Guiana (about the size of New Jersey and Pennsylvania) is situated on the north coast of South America, between French Guiana on the east and British Guiana on the west; inaccessible forests and savannas on the south stretch to the Tumuc Humac Mountains. The chief products are sugar (13,964 metric tons in 1926, and 15,573 in 1927), cacao coffee, bananas and rum. Placer mines produced in 1927, gold to the amount of 239,796 grams; in 1926, 258,608 grams. In 1927, 235 vessesl of 209,784 tonnage entered its ports.

The Dutch by the Treaty of Breda, 1667, gave New Netherlands (NewYork) to England in exchange for Surinam.

The guilder (= 40.2 cents) is the unit of currency

Local revenues in 1929 were estimated at 5,951,000 guilders (1928, 4,604,000); and subvention from home, 2,463,000 guilders (1928, 2,928,000); expenditures, 8,414,000 guilders (1928, 7,896,000).

Imports and exports were:

Year.	Imports.	Exports.
1921	$4,228,304	$2,109,972
1922	3,894,402	2,097,094
1923	3,154,064	3,355,355
1924	2,998,581	2,963,776
1925	3,808,613	3,992,787
1926	4,028,247	3,091,253
1927	3,734,131	4,757,413

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$843,761	$695,859
1923	810,475	820,931
1924	801,717	613,050
1925	1,219,660	742,517
1926	1,577,935	360,356
1927	1,183,419	1,412,396
1928	1,034,074	1,090,623

CURACAO (Dutch West Indies)

AREA, Group, 403 square miles; Curacao, 210.

POPULATION, Jan. 1, 1926, 58,931.

CAPITAL, Willemstad; population, 1926, 17,889.

Governor, K. L. A. Fruytier, 1928.

A group of six islands in the Caribbean Sea, off the coast of Venezuela, constitute the colony.

Products are maise, dulse, cattle, salt and phosphates; chief industry is the refining of oil.

In 1927, 8,645 vessels of 25,148,479 tonnage entered the ports.

Imports, 1925, 70,507,241 guilders; 1926, 107,178,462 guilders; 1927, 142,238,750 guilders; exports, 1925, 59,646,517 guilders; 1926, 95,487,238 guilders; 1927, 134,553,894 guilders.

Budget of 1927—Revenue, 2,697,650 guilders; expenditures, 2,732,685 guilders; 1928—Revenues, 3,597,600 guilders; expenditures, 3,535,824 guilders; 1929—Revenues, 5,464,500 guilders; expenditures, 5,363,689 guilders. The deficit is supplied by the home government.

Trade with the United States was:

Cal Year	Imports	Exports.
1922	$2,233,374	$2,760,108
1923	2,720,014	3,592,203
1924	3,710,051	4,139,501
1925	4,206,938	9,298,067
1926	4,866,463	24,835,832
1927	6,431,670	29,933,288
1928	13,622,457	54,372,797

NICARAGUA, REPUBLIC OF

AREA, 49,200 square miles.

POPULATION, census of 1920, 638,119.

CAPITAL, Managua; population, census of 1926, 32,536; Leon, 23,565.

President, Gen. Jose Moncada, elected Nov. 4, 1928; inaugurated January 1, 1929.

Premier, Cordero Reyes (Foreign).

Nicaragua lies between the Caribbean Sea, with a coastline of 280 miles, and the Pacific (200 miles), with Honduras on the north and Costa Rica on the south. In area it is a little larger than the State of New York. The Cordillera range of mountains, including many volcanic peaks, runs from northwest to southeast through the middle of the country. Between this range and a range of volcanic peaks to the west lie Lake Managua, thirty miles long by fifteen miles wide, and Lake Nicaragua, 100 miles long and forty-five miles wide, of great importance in the transport system of the country; and with the San Juan River, on the Costa Rican boundary the latter forms the route for a trans-isthmian ship canal planned to connect the Atlantic and Pacific. The right to construct a canal over this route for 99 years, together with a naval base in the Gulf of Fonseca on the Pacific and Corn Island in the Caribbean, was acquired for $3,000,000 by the United States in a treaty ratified Feb. 18, 1916; the United States was to supervise the expenditure of that money. The Pacific Railroad, running from Corinto to Leon and from Managua to Granada (171 miles), the only one in the country, was Government-owned, but 51 per cent. of the stock was sold to New York bankers, who also held the rest of the stock in escrow for a loan of $1,060,000 This the Government repaid out of surplus revenue in 1924, thereby regaining possession of the rail road.

At the November, 1924, election, Carlos Solorzano, National Liberal, received 48,072 votes, defeating Gen. Emiliano Chamorro, Conservative, 28,760; and Luis F. Corea, Republican Liberal, 7,264.

On Aug. 3, 1925, the 100 United States marines who had served as guard at the United States Legation for thirteen years were withdrawn.

By a coup d'etat in October, 1925, Gen. Emiliano Chamorro forced President Solorzano to make him Minister of War and Commander of the Army, and oust other Liberal Ministers. He also had himself elected Senator and forced Congress to replace nineteen Liberal members with candidates defeated at the election. His subservient Congress then banished the elected Vice-President Juan B. Sacasa, and named Chamorro "First Designate." On Jan. 17, 1926, the resignation of the constitutional President, Dr. Solorzano, was presented to Congress and Gen. Chamorro assumed executive power.

The United States and the other Central American states refused to recognize Chamorro under the terms of the Central American Treaty of Peace and Amity of Feb. 7, 1923, as having obtained control of the Government by force.

A revolution by the Liberals broke out on May 2, 1926, when they captured Bluefields; on May 7 United States Marines landed from the U. S. S. Cleveland and declared the port a neutral zone. They withdrew early in June. Fighting was frequent throughout the summer.

Senator Adolfo Diaz, Conservative, was designated as President by Congress Nov. 14, 1926, and recognized by the United States Nov. 17, 1926. Dr. Juan B. Sacasa returned and set up a government backed by the Liberals at Puerto Cabezas. He was recognized by Mexico. Civil war broke out and again marines were landed under the command of Rear Adm. Julian L. Latimer to protect American interests.

President Coolidge sent Col. Henry L. Stimson, former Secretary of War, to Nicaragua on April 9, 1927, as his personal representative and peace emissary. He induced both the Conservative and Liberal leaders (except Gen. Sandino) to accept peace terms, which were given to the pubic by the State Department on May 6. These were: Complete disarmament on both sides, a general amnesty, return of occupied or confiscated property to owners; participation of Liberals in Diaz's Cabinet, a constabulary organized on a nonpartisan basis commanded by American officers, the continuation of about 1,500 marines in the country till the constabulary could function, and American supervision of the election in 1928. These terms were carried out Dr. Sacaso left for Guatemala City May 20. By June 6 about 15,000 rifles, with 338 machine guns 41 cannon and about 5,000,000 small arm cartridges were delivered to Adm. Latimer. The withdrawal of marines not needed for police duty began on June 17, Lt. Col. R. Y. Rhea, U.S.M.C., was made Chief of the Constabulary. Gen. Frank R. McCoy, U.S.A., was appointed by President Coolidge on July 2, as chairman of the commission to supervise the election of 1928.

Perfect order prevailed at the elections on Nov. 4, 1928. Gen. McCoy had an American representative in charge of the polls in each of the 432 election districts under the decree of President Diaz signed March 21, 1928. Gen. Jose Moncada, Liberal, was elected President, receiving 76,676 votes to 56,987 for Adolfo Benaro, Conservative. The composition of Congress, meeting Dec. 25, 1928, was: Senate, Conservatives, 12; Liberals, 12; Chamber of Deputies, Conservatives, 24; Liberals, 19. About 89.7% of the registrants voted.

The cost of the revolution to Nicaragua was estimated at over $20,000,000 which includes unjudicated claims, and from 1,500 to 2,000 Nicaraguans lost their lives.

The force of United States Marines in Nicaragua July 1, 1928, was 302 officers and 5,318 men. Casualties were 21 killed and 45 wounded. Although the insurgent Gen. Sandino kept the field, his forces suffered greatly in depletion. The extra cost of maintaining the marines from May 4, 1927, when the Stimson agreement was signed to June 30, 1928 was reported to the United States Congress as $1,607,290.

The marine force was reduced in January, 1929 to 231 officers and 3,330 men, and further reduced to 2,300 in July.

The rebellion was declared suppressed Feb. 3, 1929, and Gen. Sandino and a few faithful followers went to Mexico in exile in June, 1929.

By permission of the Nicaraguan Government, Secretary of War Good on Sept. 5, 1929, named a picked engineering battalion of 400 officers and an Interoceanic Canal Board of three military and two civilian engineers, headed by Lt. Gen. Edgar Jadwin, U.S.A., Retired, to survey a route for the proposed new interoceanic canal.

The country has valuable forests, some gold is mined, but it is essentially an agricultural and stock raising community. On the broad tropical plains of the east coast, bananas and sugar cane are cultivated, and coffee is grown on the mountain slopes. In 1928, 39,857,811 pounds of coffee was exported, 15,000 short tons of sugar, and 2,750,000 bunches of bananas.

The chief exports are coffee, sugar, bananas, timber and hides. Textiles, machinery, etc., chemicals and flour are the chief imports.

In 1927, 812 ships with a tonnage of 650,137 entered her ports.

By agreement between the United States, Nicaragua and Colombia in 1928 the islands Old Providence and San Andres off the coast in the Caribbean Sea are recognized as Colombian, and Great Corn and Little Corn Islands as Nicaraguan, the latter being under lease to the United States, while the United States obtains the Roncador Reef group as light house stations, Colombia having the fishing rights.

The Constitution of March 12, 1912, amended in 1913, provides for a Congress of two Houses, a Senate of thirteen members elected for six years, and a House of forty Deputies elected for four years by universal suffrage. The President is elected for four years and has a Council of five Ministers. The Roman Catholic is the prevailing religion. The army numbers 2,000 men, selected by conscription,

The debt on March 31, 1928, was approximately $23,526,067.

Recent budgets in cordobas (=$1.00) are:

Year.	Rev.	Exp.
1922	2,257 000	1,882,000
1923	2,097,286	1,580,000
1924	2,211,706	1,580,000
1925	2,772,640	2,772,640
1926	4,443,630	4,443,630
1927 (actual)	4,865,601	4,919,295

Imports and exports in cordobas were:

Year.	Imports.	Exports.
1922	5,123,505	7,903,446
1923	7,268,432	11,028,309
1924	8,806,896	12,990,025
1925	10,376,290	12,359,585
1926	10,254,512	13,028,726
1927	10,208,242	9,025,677

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$4,116,709	$3,174,117
1923	4,989,709	5,428,276
1924	6,250,499	5,453,167
1925	7,434,539	6,188,436
1926	6,264,272	5,975,837
1927	6,949,830	4,226,835
1928	7,357,105	5,482,913

NORWAY, KINGDOM OF

AREA, 124,964 square miles (exclusive of Spitzbergen, estimated, 25,000).

POPULATION, census of 1920, 2,649,775; est'd 1925, 2,772,000.

CAPITAL, Oslo (formerly until Jan. 1, 1925, Christiania), population, 258,520; Bergen, 97,495; Trondhiem (Nidaros), 56,523; Stavanger, 47,370; Drammen, 26,174; and twelve others above 10,000.

King, Haakon VII., born Aug. 3, 1872, second son of Frederick VIII., King of Denmark, elected King of Norway by the Storthing Nov. 18, 1905 and crowned June 22, 1906; married July 22, 1896, to Princess Maud, third daughter of King Edward VII. of Great Britain. *Heir*, Crown Prince Olaf, born July 2, 1923, married March 21, 1929 to Princess Martha of Sweden, daughter of Prince Charles.

Premier, J. L. Mowinckel (Foreign), Radical, Feb. 13, 1928.

Norway occupies the west part of the Scandinavian Peninsula in Northwest Europe from the Skagerrack, which separates it from Denmark, to the North Cape in the Arctic Ocean, where on the east it meets Finland. The Kjolen Mountains, which separate Norway from Sweden to the east, give to Norway in the northern part but a narrow fringe of country washed by the Arctic and North Atlantic Oceans, and cut deep by fjords of scenic grandeur. The climate is mild and moist, like England's, on the west coast, but cold and dry in the interior and in the north and east sections.

Norway in 1929 annexed the Island of Jan Mayen in the Polar Ocean between Spitzenbergen and Greenland, also Bouvet and Thompson Islands in the South Atlantic, 1,200 miles southeast of Tristan de Cunha. The islands have value as bases for whalers.

Norway has but 4,300 square miles of land under cultivation; rivers and lakes occupy 5,000; and forests 27,500; three-fourths of the land is unproductive. Norway is essentially a maritime-country. Her merchant fleet, though neutral, suffered heavily in the World War by sinking and torpedoing, the total loss being 831 vessels with a total of 1,238,300 registered tons, and 1,200 men killed. She dropped from fourth place to sixth in the mercantile tonnage. Norway's merchant marine on July 1, 1929 included 1,488 steamers of 2,254,268 gross tons and 304 motor ships of 963,527 tons. The gross revenue from shipping in 1927 was $115,000,000. Her sailors are known the world over. Fisheries constitute a leading industry and provide a large part of the exports. In 1921 more than 112,000, 17 per cent. of the entire male wage earning population (660,000), earned their living directly or indirectly by the sea. In 1928, 801,500 barrels of whale oil were produced, 704,212 in 1927, 660,000 in 1926, 597,690 in 1925, and 377,553 in 1924.

The forests have an estimated value of a billion kronen (approximately $250,000,000) and about three-fifths of the acreage is covered in pine and fir trees. The Norwegian Afforestation Association has planted since 1906 between ten and fifteen million new trees annually. Export of wood pulp was: In 1928, 264,676 metric tons; and in 1927, 229,777 tons. The export of newsprint paper in 1928 was 224,836 metric tons as against 221,509 tons in 1927.

Agriculture is limited, only about 3% of the total area being under cultivation, and the country imports much food supply.

The number of farms is about 250,000, of which 165,000 are less than 5 acres and 65,000 between 5 and 25 acres. The importation of grain and flour has been monopolized by the Government Food Commission since 1916; it is obliged to purchase all wheat, rye and barley of good quality offered by home producers at the same prices for which it can deliver foreign grain. All grinding is done in Norway for the account of the state.

Livestock census, June 30, 1925, returned 183,887 horses, 1,150,617 cattle, 1,528,819 sheep, 275,783 goats and 252,759 pigs.

The country lacks coal but has become a great power producing country by utilizing by electrical transmission its greatest natural asset—water power, which is estimted to amount to 15,000,000 horse power day and night. Of this the Government owns 2,000,000 and has developed 75,000. Private enterprise has developed about 1,750,000 horse power. Engineering plans are under way to transmit hydro-electric power to Central Europe. Already Norway is feeling the impulse on its industries, which on Jan. 1, 1927, numbered 10,475 establishments, giving employment to 119,845 workers, and which have been developing on an export basis.

The chief mineral products are pyrites, copper ore, iron ore, nickel ore, silver and feldspar.

Norway, in 1928, had 2,282 miles of railroads, of which 1,960 are state-owned; the work of converting these to electrical power is going on rapidly. The number of ships entering Norwegian ports in 1927 was 9,094, with a net tonnage of 7,027,453.

The population of Norway is singularly homogeneous, there being numbered of non-Norwegians only about 1 per cent., 20,000 Lapps or Finns and 8,000 Quains, both of Mongolian ancestry. This excludes about 50,000 foreign-born residents of the country before the war, many of whom returned to their native countries. Norwegians have emigrated in great numbers, chiefly to the United States and Canada. The United States census of 1920 returned 363,862 residents of the United States as born in Norway. Emigrants in 1925 numbered 9,326 as contrasted with 18,287 in 1923.

Norway under its Constitution, adopted May 17, 1814, is a constitutional hereditary monarchy. Independent for centuries, Norway entered into a union with the Kingdom of Denmark in 1381. By treaty of Jan. 14, 1814, the King of Denmark ceded Norway to Sweden, but the Norwegian people declared themselves independent and elected a Danish Prince as their King. The foreign powers refused to recognize this election; as a result a convention on Aug. 14 proclaimed the independence of Norway in union with Sweden, and on Nov. 4 elected Charles XIII. of Sweden King of Norway. This union lasted until 1905. Disagreements having arisen, culminating in Norway's claiming the right to maintain its own consular service, Norway declared the union dissolved on June 7, and after negotiations a repeal of the union by mutual agreement was signed Oct. 26, 1905. After a plebiscite Prince Charles of Denmark was elected King and ascended the throne, taking the name of Haakon VII. A treaty guaranteeing the integrity of Norwegian territory was signed in October, 1907, by Norway, Great Britain, France, Germany and Russia. This was denounced Jan. 8, 1924.

The legislative power is vested in the Storthing, the members numbering 150, elected for three years' by direct vote on universal suffrage of citizens, both male and female of twenty-three years of age. The Storthing divides itself into two sections, one-fourth of the membership forming the Lagthing, and three-fourths the Odelsthing, which consider the legislation separately, sitting in joint session on failure to agree separately, when decision is made by a two-thirds majority. The King may exercise the veto twice, but if the same bill is passed a third time it becomes law. The King appoints an executive Cabinet of at least eight Ministers, who may speak in the Storthing, but have no vote. There is a large measure of home rule throughout the country through local governing bodies elected by universal sufferage.

The elections of November, 1927, returned a Storthing composed of: Laborites, 59; Conservatives and Moderate Liberals, 31; Liberals, 31; Agrarians, 26; Communists, 3.

A majority of Norwegians voted in 1919 for a partial prohibition under which the sale of wines and beer was permitted. The authorities succeeded in stopping nearly all smuggling of alcohol but proved quite unable to prevent home manufacture of liquor which became very large. The new Government proposed and the Storthing voted

a new plebiscite which was held on Oct. 18, 1926. The vote against prohibition was 531,425 (gain of 229,869 over the vote of 1919); and the vote for prohibition was 421,292 (a loss of 62,626).

Parliament repealed the Act of 1919 on April 4, 1927. New regulations adopted went into effect May 2, under which a certain amount of local option is permitted; liquor may not be sold or served to minors, may be sold only between 3 and 11 p. m., and may not be sold on important holidays, the day before or the day after. Importation of spirits is a monopoly, and 13 official stores were set up in which liquor is purchasable. The budget for 1927-28 estimated receipts from liquor taxes at 25,100,000 kroner.

By April, 1927, 16,000 workmen were on strike against a proposed reduction in wages and as many more threatening to strike. In the *impasse* the Storthing over the solid vote of Labor and the Communists, passed a law that had been bitterly opposed by both the trades unions and the employers making arbitration compulsory for all labor conflicts until April, 1929. The court functioned, important wage readjustments were made without friction, and unemployment declined to 23,000 by July 31, 1927. It rose to 32,000 June 30, 1928, but was 12,400 on July 31, 1929.

The Evangelical Lutheran religion is endowed by the state and its clergy are nominated by the King. All religions are tolerated.

Education is compulsory from seven to fourteen, and the school system is highly organized. There is, so to speak, no illiteracy. The University at Oslo, founded 1811, has 2,500 students and is subsidized by the state.

The army is a national militia with universal and compulsory service. The peace strength is 40,000 men, with a reserve of 315,000. The navy is designed for coast defense only and numbers about 1,200 officers and men, with all seafaring men between the ages of twenty and forty-four enrolled on the active list and liable to conscription.

The krone (= 26.8 cents) is the unit of currency. The average rate of exchange was 17.88 cents in 1925, 22.33 in 1926, 26.05 in 1927, and 26.69 in 1928. On May 1, 1928, restrictions on gold exports ceased and the Bank of Norway resumed specie payments.

Note circulation of the Bank of Norway on July 31, 1929, was 315,000,000 kroner, with a gold reserve of 147,000,000 kroner and foreign balances of 39,000,000 kroner, a cover of 59%.

Recent budgets in thousands of kroner are:

Year.	Revenues.	Expenditures.
1922-23 (actual)	376,983	550,305
1923-34 (actual)	376,191	477,770
1924-25 (actual)	449,220	486,239
1925-26 (actual)	419,965	448,184
1926-27 (actual)	398,822	405,770
1927-28 (actual)	416,700	414,700
1928-29 (estimated)	372,100	372,100
1929-30 (estimated)	366,500	366,500

A $25,000,000 6% loan was floated at 97½ in the United States in August, 1924, for foreign debt adjustments and to meet deficits.

A $30,000,000 5½% 40-year loan was floated at 96¾ in New York on June 1, 1925, to refund the 8 per cent loan.

A $30,000,000 5% 35-year loan was floated in New York at 97½ on March 7, 1928, the proceeds to be used to consolidate short term indebtedness.

The public debt after giving effect to this financing was 1,704,857,000 kroner ($456,751,676). The government owns properties valued in excess of $360,000,000, most of which are revenue producing such as railroads, telegraph and telephone lines, forests, mines and hydro-electric plants. The wealth of the country in 1928 was estimated at 7,957,000,000 crowns, and the income of all Norwegian subjects at 2,140,000,000 crowns, with state and commune taxes totaling 630,000 crowns.

Norway's international balance of payments as of Jan. 1, 1927 showed an estimated surplus of $25,000,000 kroner, which it may be noted was exactly the amount credited to "tourist receipts."

Imports and exports in kroner and dollars at current rate of exchange for four years:

Year.	Imports.	Exports.
1923	1,342,000,000 ($224,114,000)	831,000,000 ($138,777,000)
1924	1,548,000,000 ($216,720,000)	1,063,700,000 ($148 918,000)
1925	1,378,504,430 ($280,620,300)	1,047,112,936 ($209,714,100)
1926	1,092,838,000 ($243,066,900)	811,127,754 ($181 096,300)
1927	976,584,000 ($254,399,632)	684,737,685 ($175,374167)
1928	1,012,787,000 ($270,311,750)	682,129,438 ($181,060,710)

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$31,242,518	$14,705,932
1923	27,609,740	20,099,195
1924	23,236,926	21,391,252
1925	26,199.708	23,289,084
1926	24,880,050	25,055,248
1927	23,361,290	22,230,823
1928	21,179,066	21,846,012

SPITZBERGEN.

(Svalbard).

AREA, about 30,880 square miles.

POPULATION, 1921, 1,503.

Spitzbergen, a mountainous group of islands in the Arctic Ocean between 76° 26′ and 80° 50′ north latitude and 10° 20′ and 32° 40′ east longitude, the largest being West Spitzbergen (12,000 square miles), lies about 370 miles due north of Norway, half-way to the Pole. Discovered by Norsemen in 1194 and rediscovered by Barents in 1596, the Islands had been the resort of whalers of several nations. Ever since 1261 Norway has periodically asserted her claims to the islands, and from 1870 the demand became more insistent, increasing as Norwegian exploration discovered rich outcropping seams of coal—a necessity which Norway lacks. International conferences were held without result, the islands remaining a No Man's Land. The war put an end to negotiations, but, following action by the Peace Conference in 1919, a treaty was signed in Paris, Feb. 9, 1921, by the United States, Great Britain, Denmark, France, Italy, Japan, the Netherlands, Sweden and Norway, which put Spitzbergen under the flag of Norway, but not with unlimited sovereignty, as they set certain specified guarantees—no naval base to be established, the ships of all signatories to enjoy hunting and fishing privileges there, and equal treatment must be shown to all.

Soviet Russia accepted the treaty in February, 1924. The Norwegian flag was formally hoisted on Aug. 14, 1925.

The development of the coal fields has proceeded rapidly. The resources are estimated at 9,000,000,000 tons. Norwegians own the two largest mining companies. The coal exported has been good steam coal; the output in 1926-27 was 291,211 metric tons; in 1925-26, 153,000 tons; and in 1924-25, 162,000, practically all of which went to Norwegian ports. There are large deposits of low-grade iron ore and gypsum, and signs of oil have been reported.

The population in the summer of 1923 was 1,522; and during the winter 1923-24, 1,197.

PALESTINE

FLSTIN

(British Mandate in force Sept. 29, 1923.)

AREA, estimated, 9,000 square miles.

POPULATION, census of Oct. 23, 1922, 757,182; divided 590,890 Mohammedans, 83,794 Jews, 73,026 Christians, 7,028 Druses, 163 Samaritans, 265 Bahais, 1,454 Hindus, 408 Sikhs, and 156 Metawilehs. Estimated April 30, 1926, 852,268.

CAPITAL, Jerusalem, population, census 1922, 62,678; other towns: Jaffa, 47,709; Haifa, 40,000; Gaza, 17,486; Hebron, 16,577; Nazareth, 7,424; Bethlehem, 6,658; Acre, 6,420.

British High Commissioner, Lt. Col. Sir John R. Chancellor, G. C. M. G., took up duties Dec. 6, 1928.

Palestine, the Holy Land, lying between the Mediterranean Sea and the River Jordan, was formerly a vilayet of the Turkish province of Syria. It was conquered during the World War by British troops under General, now Field Marshal, Viscount Allenby, Jerusalem being surrendered Dec. 9, 1917. Jerusalem had been in Moslem hands since 1244, had been conquered and reconquered in the Crusades, and had been under the rule of the Turk since 1517. It remained under British Military Administration until July 1, 1920, when Sir Herbert L. Samuel was appointed High Commissioner and a civil government set up. The announced policy of Great Britain is to accord equal treatment to the people and to provide a national home for the Jews, permitting them to return to Palestine only as the development of that country guarantees the normal absorption of immigrants for rising industries and reclaimed agricultural lands.

Sir Herbert Samuel, British High Commissioner, at the conclusion of his term of office in 1925, reported a surplus of ££600,000 had been accumulated, taxes somewhat reduced, 600 miles of new roads built, 200 village schools opened, and that Palestine then had nearly 150 industries with an investment of ££1,200,000, of which all but ££100,000 is Jewish. The total number of schools was 711 (314 Government conducted), with 2,373 teach-

ers and 53,467 pupils. Of the privately supported schools about 125 were Christian, 175 Jewish, and 30 Moslem. The educational budget for 1926-27 was £E113,000, for Apr. 1 to Dec. 31, 1927, £E106,502, and for 1928, £E143,619.

Palestine was a country infested by malaria. This has been largely stamped out, and an active campaign waged also against trachoma. Good water supply has been brought to Jerusalem. An ordinance enacted in July, 1920, forbids absolutely all billboards that mar the landscape.

Both civil and religious courts have been established. A new code of commercial law has been enacted, and many laws modernized. A survey has been initiated and a definite registration of land titles begun.

Between Sept. 1, 1920, and March 1, 1925, the total number of immigrants into Palestine were 46,225 Jews and 2,027 non-Jews. On June 1, 1925, the Jewish population had increased according to Government figures to 115,151 (84,000 in 1914 and 57,900 in 1920). In 1925, 34,641 immigrants, of whom 33,801 were Jews, were admitted compared with 13,553 (12,856 Jews) in 1924. Ninety per cent. came from Europe; 47 per cent. from Poland alone; 594 came from the United States. In 1926, 13,910 (13,081 Jews) arrived and 9,429 left. In 1927, 3,595 (2,713 Jews) arrived, and 6,978 (5,071 Jews) left. In 1928, 3,086 (2,178 Jews) arrived and 3,122 (2,168 Jews) left. In 1928, 63,319 and in 1927, 59,305 tourists visited the Holy Land, 75% from the United States.

The Arab population has increased by 80,000 since the end of the war. The birth rate was 49.3 in 1925.

The Palestine Foundation Fund in seven years, April, 1921, to September, 1928, spent £3,510,721 in various constructive features for the upbuilding of Palestine; more than 55 per cent. was contributed by Jews in the United States. On education was spent £642,642, on the promotion of immigration, £343,328; on public works, £484,700; on public health, £225,295; and on agriculture colonization (forty-three being established, with an experimental station at Tel-Aviv), £1,081,332. In Tel-Aviv, newly built, near Jaffa, a modern town with a population of 40,000, seventy industries have been established.

John D. Rockefeller, Jr., has given $2,000,000 to build, equip and endow an archaeological museum in Jerusalem. It is to be completed by Jan. 1, 1931.

The Syrian boundary line was adjusted in April, 1924, in accordance with the Anglo-French Convention of March, 1923, and the ancient district of Dan, seventy-five square miles with twenty villages, brought within the frontiers of Palestine the re-establishment of the Biblical boundaries, "from Dan even unto Beersheba."

A new constitution was promulgated on Sept. 1, 1922. It provides for a high commissioner, commander-in-chief and executive council. A legislative council is created consisting, in addition to the high commissioner, of ten official and twelve unofficial members, the latter to be elected and to include not less than two Christians and two Jews. This council has authority to pass ordinances, which must be approved by the high commissioner, who may reserve any ordinance for the consideration of the mandatory power. Freedom of conscience and of worship is assured and discrimination on the grounds of race, religion or language forbidden. English, Hebrew and Arabic are the official languages. All male Palestinians over twenty-five years of age are entitled to vote.

The Jewish population have an internal organization through an elective assembly which has chosen a national committee to represent them in dealing with the administration. This split, June 16, 1925, the Orthodox Jews bitterly opposing the demands of the progressives for woman suffrage. The World Zionist Organization is recognized by the British Government and Palestine Administration as the agency of the Jewish people in all matters pertaining to the upbuilding of the Jewish National Home. A Moslem council controls Moslem Wakf affairs.

An earthquake on July 11, 1927 shook the Holy Land, killing 670, injuring 3,000, and causing a property loss of $2,000,000. Nablus (Shecham of old), was razed, Jericho badly damaged and Jerusalem less so. There was a somewhat less severe earthquake Feb. 22, 1928.

Work was begun in 1927 on the harnessing of the River Jordan by the Palestine Electric Corporation, which has a £2,000,000 concession from the High Commissioner. The falls of the River Jordan between Lake Tiberias and Jis-el-myamjieh, where there is a fall of 130 feet in an eight-mile stretch, will be utilized together with the water of the Yamuk, and will provide, it is estimated, 130,000,000 kilowatts of power. The government plans to electrify the railroads and the Jaffa, Haifa and Tiberias sections are already completed.

Bids were submitted on Dec. 31, 1926, for a concession to exploit the salts which in solution make up one-fourth of the Dead Sea water. Dr. Thomas H. Norton of New York estimates that obtainable are notably 1,300 million tons of potash, 853 million tons of bromine, 11,900 million tons of salt (unusually pure), and 22,000 million tons of magnesium chloride, which he estimates as worth $1,182,000,000,000.

The concession for 75 years was granted May 22, 1929 to Moses A. Novomeysky, a Jewish engineer, Russian born but a citizen of Palestine, and Major T. G. Tulloch by the London Crown Agent of Palestine and Transjordania. A company with capital of at least £100,000 is to be formed within a year, required minimum production of potassium chloride in the third year is 1,000 tons with output rising to 50,000 after the tenth year, and a royalty of 5% to be shared by the governments of Palestine and Transjordania.

Jerusalem, the Holy City, is visited annually by large pilgrimages of Orthodox Greek Christians. The Mosque of Omar occupies the site of Solomon's Temple. It contains the sacrificial stone of Abraham and a relic of Mahomet. Bethlehem is also visited, the Church of the Nativity being reputed the oldest Christian church in existence.

Clashing of the several sects of Christians, the Moslems and the Jews over the control and use of the holy places has been constant and persistent. An Arab mob of perhaps two thousand with banners raided and subjected to indignities the Jews worshipping at the Wailing Wall on the fast commemorating the destruction of the Temple, Aug. 16; 1929. Rioting continued. A Jewish boy was killed and his funeral Aug. 21 was a great Jewish demonstration. August 23 brought violent attacks by armed Arabs on Jews in Jerusalem followed by attacks on the Slodoka Talmud school at Hebron and on towns and villages. The disorders spread. Martial law was proclaimed. British troops were brought in from Egypt by air and marines from warships, and airplanes used on Bedouin raiders. Before order was restored these casualties were reported: killed—Moslems, 870; Christians, 4; Jews, 119; seriously wounded—Moslems, 121; Christians, 11 Jews, 175.

Palestine proper is about the size of the State of Vermont with twice as many inhabitants. On the west is the coastal plain a hundred miles long and fifteen wide, fertile and well watered. In the centre is the plateau of Judea. The eastern border drops sharply into the depressed valley of the River Jordan and the Dead Sea, forty-six miles long, with an average width of eight miles, 1,292 feet below sea level. The country is capable of great agricultural development, dependent on irrigation. Olives, figs and grapes are grown in large quantities.

Wheat production in 1927 was 99,406 metric tons (99,023 in 1926); barley, 44,524 tons (69,358 in 1926); durra, 37,441 tons (23,913 in 1926); olives, 1,866 tons (2,093 in 1926); olive oil, 3,737 tons (4,560 in 1926); and lentils, 3,155 tons (3,321 in 1926). In 1928, 2,202,432 cases of oranges valued at £P648,678 were exported and in 1927, 2,658,249 cases valued at £P813,574.

In 1928 there were 226,611 sheep, 367,730 goats, 23,850 camels and 600 buffaloes.

Over five million trees have been planted in a Government effort to reforest the country and to protect the fisheries in the Sea of Galilee, not now so prolific as of old.

There were 756 miles of railroads in 1928, with a net operating surplus of £P166,117, and in 1928, 2,290 vessels of 1,811,571 tons entered the seaports,—Jaffa, Haifa, Acre and Gaza—in the foreign trade.

The principle imports are cotton textiles, sugar, petroleum, cigarettes and rice; and the chief exports are oranges, soap, wines, melons, apricot port and almonds.

A new unit of currency, the Palestine Pound (= 1 pound sterling = $4.866 = 97.5 Egyptian piasters) and divided into 1,000 mils replaced the Egyptian currency on Nov. 1, 1927. New notes and coins were put in circulation.

Budgets in Egyptian pounds (£E = $4.95 at par of exchange) and after April 1, 1926 in the new £P were:

Year to Mar. 31.	Revenue.	Expenditure.
1920-21	£E1,108,528	£E1,228,097
1921-22	2,312,243	1,881,108
1922-23	1,764,585	1,837,173
1923-24	1,633,893	1,633,227
1924-25	2,101,072	1,806,660
1925-26	2,739,091	2,040,332
1926-27	£P2,390,081	£P2,070,479
1927, Apr. 1 to Dec. 31	1,739,380	1,944,397
1928 (cal.)	1,944,397	3,381,993

The total revenues from July 1, 1920, when the civil government was formed, to Dec. 31, 1928, was £P18,733,433; total expenditures, £P18,143,903; surplus balance, £P589,530.

Palestine's share of the Ottoman debt allotted by the Treaty of Lausanne amounts to £T3,284,429. (Gold value = about $14,500,000). The annual service charge is £E92,047. The advance from Britain on March 31, 1926, was £E660,075.

A Palestine loan of £4,475,000 (35-year 5%) approved, by the British Government in December 1926, was made by the Bank of England in December, 1927; of this, £1,640,000 will go for railway construction, £1,115,000 for harbor works at Haifa, £745,000 for other development works, and £1,000,000 for repayment of capital work, mostly reconstruction, done by the British. Expenditure incurred in anticipation of the loan totaled about £E1,800,000.

Trade in Egyptian pounds and dollars was:

Year, Apr. 1 to Mch. 31.	Imports.	Exports.
1922-23	£E5,124,945	£E1,834,118
	($24,036,000)	($8,601,000)
1923-24	5,589,679	2,120,931
	($25,318,000)	($9,608,000)
1924-25	7,603,923	1,588,157
	($37,640,000)	($7,861,000)
1925-26	6,513,331	1,497,921
	($32,566,655)	($7,489,505)
1926-27	£P6,447,113	£P1,903,189
	$31,339,416	$9,251,400
1928 (Cal.)	£P6,770,818	£P1,487,207

(Exchange rates used: 1923, $4.69; 1924, $4.53; 1925, $4.95; 1926, $5; 1927 and 1928, £P = $4.86).

Trade with the United States was:

	Imports.	Exports.
1925	$3,619,705	$179,013
1926	1,192,981	187,869
1927	1,088,462	248,080
1928	1,506,309	306,199

The cost of Palestine to the British Exchequer was announced by Prime Minister Macdonald to the House of Commons as: 1920-21, £8,000,000; 1921-22, £3,155,000; 1922-23, £1,874,000; 1923-24, £1,400,000; and for 1924-25, estimated, more than £1,000,000. The estimate for 1925-26 was £624,000, which includes the cost of the air squadron, the British gendarmerie (£206,000), and the maintenance of the Ninth Lancers (£40,600). Since then the British grants in aid from April 1, 1926 to Dec. 31, 1928 amounted to £152,618.

TRANSJORDANIA

Emir, Abdullah, second son of King Husein of the Hejaz, and brother of King Feisal of the Iraq; became ruler April, 1921.

Transjordania is an Arab state set up within the Palestine Mandate yet separate from Palestine (Sept. 1, 1922). It is under the responsibility of the High Commissioner for Palestine, who has a British agent there, Lieut. Col. C. H. F. Cox. The Emir administers the country under a council of advisers. The first legislative assembly of 22 elected deputies was opened by the Emir April 2, 1929.

Plans are under way for transformation into a principality resembling the government of the Iraq, with the present Emir as Sultan or King, to be assisted by a ministry of his own choice. A British resident will advise him and control finance and the British financial subsidy will continue.

The boundaries have not been determined, but roughly, on the west the line separating it from Palestine runs from the Lake of Tiberias down the Jordan to the Dead Sea and thence south across Wadi el Araba to Marashash on the Gulf of Sinai; on the north it is separated from Syria by the River Yarmuk, thence eastward to Imtar and thence a straight line northeast toward Abu Kamal on the Euphrates; on the east the boundary between it and the Iraq runs south from Abu Kamal to the junction of the boundaries of the Iraq and Nejd; on the south lies Nejd and the Hejaz. No estimate of the area is available, but the population was estimated in 1926 at 240,000, chiefly nomad Arabs, of whom about 220,000 are Mohammedan, 10,000 Christian and 10,000 Circassians.

The King of the Hejaz, in 1924, transferred Akaba, Maan and Tebuk to Transjordania.

The country is largely desert except for a thirty-mile strip between the Jordan and the Hejaz railroad which transverses the country from Dera to Maan, its present terminus. A road fit for motor traffic runs from Jerusalem to the capital, Amman, where there is a British aerodrome and air-force detachment.

The Transjordania frontier force numbers 40 officers and 640 men and cost in 1928, £P151,909, of which the British Government paid one-sixth.

Recent budgets were:

Year (fiscal).	Revenues.	Expenditures.
1926-27 (actual)	£P302,516	£P274,910
1927-28 (actual)	282,073	318,260
1928-29 (estimated)	280,916	301,430

British grants in aid for these years were £66,000, £45,000, and £40,000. For schools the expenditures were £P18,232, £P19,738, and £P22,274. There are 57 Government schools with 4,437 pupils, 57 Christian schools with 2,400 pupils, and 43 Moslem schools with 1,172 boys.

PANAMA, REPUBLIC OF

AREA, 33,667 square miles.

POPULATION, 1923, 442,522; excluding the Canal Zone. Whites, 52,069; Negroes, 85,970; Indians, 33,425; Orientals, 3,061; Mestizos, 267,961.

CAPITAL, Panama, population, 1921, 59,458; Colon, 31,230.

President, Don Florencio Harmodio Arosemena, 1928-32, inaugurated Oct. 1, 1928.

Premier, Sr. Adriano Robles (Government and Justice).

The Republic of Panama, formerly a department of Colombia, declared its independence Nov. 3, 1903, and was recognized Nov. 13 by the United States. It occupies the entire isthmus of that name connecting North and South America, lying between the Caribbean Sea on the north and the Pacific on the south. The Costa Rican boundary line on the west has been a matter of dispute. The Colombian boundary line to the east was determined in 1921 by the Thompson-Urrutia Treaty.

By treaty Nov. 18, 1903, ratified Feb. 23, 1904, and with a supplemental (Taft) agreement of 1904, the United States acquired the right to construct the Panama Canal across the Isthmus, a strip (the Canal Zone) extending for five miles on each side of the Canal, the terminal cities of Cristobal, adjacent to Colon, and Balboa, adjacent to Panama, and islands for defensive purposes in the bay, in perpetuity and exclusive control for police, judicial, sanitary and other purposes. The United States also has complete jurisdiction over sanitary and quarantine matters in the two cities of Colon and Panama and owns and operates the Panama Railroad, forty-seven miles long, connecting these cities. In return the United States paid Panama $10,000,000, and $250,000 a year, beginning after nine years.

The Taft agreement was abrogated, June 1, 1924, and a commercial treaty supplanting it was signed July 28, 1926. The United States agreed not to set up in the Canal Zone any business which would compete with the commerce of Panama. The United States Commissioners for the civil and military personnel in the Canal Zone will be maintained as usual.

It stipulates moreover, that "Panama agrees to cooperate in all possible ways with the United States in the protection and defense of the Panama Canal. Consequently, Panama will consider herself in a state of war in case of any war in which the United States should be a belligerent, and in order to render more effective the defense of the Canal will, if necessary in the opinion of the United States Government, turn over to the United States in all the territory of the Republic of Panama, during the period of actual or threatened hostilities, the control and operation of wireless and radio communication, aircraft, aviation centers, and aerial navigation . . . and the United States shall have the direction and control of all military operations in any part of the territory of Panama."

The National Assembly of Panama, Jan. 27, 1927, rejected the pact, asking for further negotiations. The United States Senate took no action. Former Foreign Minister Morales at Geneva in September appealed to the Assembly of the League of Nations to intervene and determine the status of the Canal Zone, but without effect.

(For Canal Zone and for the Panama Canal, see Index.)

The soil of Panama is very fertile, but of the whole area more than half is wholly uncultivated. Immigration is encouraged. The forest resources are great. Stock raising is extensively carried on. The chief exports are bananas (from Almirante), cocoanuts, balata, hides, gum and tortoise shell.

A discovery of gold within a concession of 4,600 square miles in the Sierras made to a British company was reported in April, 1926.

The Constitution, adopted Feb. 13, 1904, and amended Dec. 26, 1918, provides for a Chamber of Deputies of forty-six members (election to be held every four years beginning with 1924) and a President, also elected by direct vote for a four-year term, and not eligible for re-election. He appoints a Cabinet of five Ministers. There are nine provinces, each under a Governor appointed for a term of one year by the President. The Roman Catholic religion prevails, but religious freedom is guaranteed. Primary education is free and compulsory. A university has been opened. There is no army; the national police numbers 69 officers and 750 men.

Spanish is the official language and its use is compulsory.

Panama authorized a loan of $16,000,000 in 1928, of which $4,000,000 was reserved to refund 30-year 5½% bonds of 1923 redeemable June 1, 1933. The rest, $12,000,000 5% 35-year bonds, were floated in New York June 25, 1928, at 96¾; three issues totalling $6,218,913 were redeemed and the remainder will be used for public works. After this financing the external funded debt of the Republic will amount to approximately $16,446,000 and the internal debt to $2,975,588.

The budget for 1927-29 was balanced at $14,302,488; and that for 1929-31 at $17,031,908. For the service of the debt $4,126,174 is appropriated, and for education, $3,327,937.

The unit of currency is the balboa (= $1.00).

Imports and exports were:

Year.	Imports.	Exports.
1921	$11,372,370	$2,495,407
1922	10,268,549	2,437,479
1923	12,675,249	2,389,728
1924	13,769,434	3,008,014
1925	14,605,962	3,530,800
1926	14,289,000	3,438,936
1927	14,516,000	3,785,660

Trade with the United States was:

Cal. Year.	Imports.	Exports
1922	14,517,059	3,607,014
1923	21,769,332	4,267,047
1924	26,365,846	5,003,663
1925	28,236,618	6,430,796
1926	32,412,669	5,548,522
1926	31,921,269	5,548,522
1927	34,051,031	5,383,941
1928	34,200,568	6,457,692

PARAGUAY, REPUBLIC OF

AREA, estimated from 122,000 to 172,000 square miles. Northwest boundary undetermined.

POPULATION, Census of 1927, 791,469, exclusive of the Chaco region the estimate of which is: whites 7,500, Indians 30,000.

CAPITAL, Asuncion, population, official estimate, 1929, 142,519.

President, Dr. Jose P. Guggiari, 1928-32, born Mch. 17, 1884; inaugurated Aug. 15, 1928.

Premier, Don Belisario Rivarola (Interior).

Paraguay is an inland agricultural and pastoral country of South America, communicating with the South Atlantic by the Paraguay River and the Parana, a tributary of the River Plata, and navigable by vessels of light draft up to Asuncion. A railroad, British owned, 272 miles long, connects the capital with the Argentine railroad system. It is bounded on the north by Bolivia and Brazil, on the east by Brazil and Argentina, on the south by Argentina, and on the west by Argentina and Bolivia. In area it is about the size of Wisconsin, Minnesota and Iowa, if its right is granted to the Chaco territory (62,000 square miles) in dispute between Paraguay and Bolivia. The high plateaus are suitable for cattle raising of which there are 5,000,000 head. The chief exports are hides, quebracho, timber, cattle, yerba mate and tobacco.

The cotton crop for 1928 was 8,000,000 kilos.

The Constitution of 1870 is modelled on that of the United States, but more centralized. The history of Paraguay since its declaration of independence from Spain in 1811 has been one of constant dissensions, dictatorships, revolutions and wars. The Roman Catholic religion is established, but others are tolerated. Education is free and nominally compulsory. The university at Asuncion had 279 students in 1921. Enrollment in the 633 primary schools in 1927 was 58,300 with 1,755 teachers.

The number of vessels entering Asuncion, which is 800 miles from the sea, in 1926, was 2,836 of 323,587 tons.

Paraguay has a standing army of 1,900 and a reserve of 100,000.

Paraguay uses the Argentinian gold peso = 96.5 cents, average exchange value in 1925 91.3 cents, and in 1926, 92.1 cents. The paper peso was exchanged at the fixed rate of 42.61 to the gold peso.

Recent budgets converted into paper pesos are:

	Revenues.	Expenditures
1923-24	185,467,956	178,451,462
1924-25	235,048,668	177,643,999
1925-26	236,517,067	227,693,654
1926-27	220,985,856	219,289,703
1927-28	220,986,178	219,290,660
1928-29	263,477,727	263,475,754

The foreign debt on Nov. 30, 1928, was 4,535,872 gold pesos. Paraguay after defaulting on its payments for several years, came to an agreement with its creditors in 1924, since when remittances have been made fully and promptly. The total floating debt was 14,585 gold pesos and 4,379,906 paper pesos. American capital invested in Paraguay is estimated at $15,000,000.

Foreign trade in 1926 was: Imports, 12,205,280 gold pesos; exports, 15,497,504 gold pesos; and in 1927: Imports 11,977,766 gold pesos, exports 14,282,040 gold pesos.

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$388,841	$1,064,332
1923	585,999	544,876
1924	820,543	113,730
1925	902,479	380,476
1926	905,407	540,954
1927	1,316,632	913,421
1928	1,353,678	555,247

PERSIA, KINGDOM OF

IRAN

AREA, 628,000 square miles.

POPULATION, estimated 10,000,000.

CAPITAL, Teheran, population, estimated, 250,000; other cities, Tabriz, 200,000; Ispahan, 100,000; Mesnad, 80,000, and 42 cities of above 10,000.

Shah, Mirza Reza Pahlevi, born March 16, 1878, proclaimed Dec. 6, 1925. *Heir*, his eldest son, Crown Prince Shahpur Mohammed Riza, born Oct. 26, 1919.

Premier, Mehdigholi Khan Hadayat, the Mokhbar es-Saltaneh, June 21, 1927.

Persia (Iran) is an ancient kingdom occupying the western and larger half of the great Iranian plateau, between the rivers Indus and Tigris in Southwestern Asia. It is bounded on the north by Transcaucasia (Russia), the Caspian Sea and Turkestan; on the east by Afghanistan and Beluchistan (British India); on the south by the Arabian Sea and the Persian Gulf; on the southwest by Mesopotamia (the Kingdom of Iraq); and on the west by Armenia. The boundaries are indeterminate—a cause of much friction. In size it equals the States of Idaho, Colorado, Utah, Nevada, Arizona and New Mexico combined. It is described as a "vast and miserable poor country with scanty population." The people are Moslems, mostly of the Shi'a sect, and education is largely limited to reading the Koran.

Across this plateau, which lies at an altitude of 4,000 to 8,000 feet, in the north central part, from northwest to southeast, stretches a desert, 800 miles long, varying from 100 to 200 miles wide. There are many peaks from 9,000 to 10,000 feet high. Fine forests cover the maritime plains and mountain slopes. Mineral deposits are undeveloped, but known to be considerable. Turquoise mines are worked crudely in Nishapur. Oil is produced near Ahwaz in Karan Valley, at the head of the Persian Gulf. The Anglo-Persian Oil Company holds the concession, covering nearly 500,000 square miles, and has large refineries at Abadan in the Shatt el Arab on the Persian side of the Tigris below Basra. The British Government bought control in this company in 1914 and increased its holdings in 1917 to $25,000,000. Prospecting is vigorously pushed.

Petroleum production in 1928 was 42,080,000 barrels; in 1927, 39,688,000; in 1926, 35,842,000; in 1924, 32,373,000; and in 1923, 28,793,000. The export value in 1926-27 was $63,868,000 and in 1927-28, $58,766,288.

Agriculture is the chief industry, wheat, barley, rice, fruits, gums, drugs, wool and cotton being the chief products. Some wines are famous. Persian carpets, all made on hand looms, are produced in Tabriz, Sultanabad and Kerman. The chief exports in 1928 were petroleum, cottons, carpets, fruits, opium and rice; the chief imports were textiles, sugar, tea and manufactures of metals. The British Empire, Russia, Egypt and Turkey are the best customers. There are fifteen regular trade routes along which goods are carried by caravans.

A railroad 1,500 kilometers long was authorized by Parliament to be constructed from Khormusa, a deep water port on the Persian Gulf, passing north through Dizful, Burujird, Hamadan and Kazvin, thence east to Teheran and Firuzkuh (or Semnan where valuable iron and coal deposits have been discovered) and northeast to Bendergaz on the Caspian Sea. It will cost roughly $100,000,000, and the revenue from the sugar and tea monopoly (about $7,000,000 annually) was set aside for the project. Preliminary surveys for the route were completed in 1927 and contracts for construction were awarded in April, two in the north to an American and a German firm; and four in the south, two to American firms, one to a French firm, and one to a British company. It is hoped to complete

the railroad in eight years, as well as building a foundry at Semnan. Persia had in 1927, 231 miles of railroads.

The Road Administration spent $2,014,000 on roads in 1927-28, building 600 kilometers of gravel roads and 50 kilometers of macadam and Persia now has 8,750 kilometers of dirt and gravel roads and 1,850 kilometers of macadam. For 1928-29 the road budget is $2,686,400.

Tonnage of vessels entering the Persian Gulf in 1925-26 amounted to 7,335,204, the bulk of it British; at the Caspian Ports, 473,126, mostly Russian.

Persia has been in political turmoil for twenty years. A Constitution was forced from the Shah in 1906 that provides for a National Assembly, which has been convened three times. Government is in the hands of a Cabinet. In 1907, Great Britain and Russia, by a convention, while mutually engaging to respect the integrity and independence of Persia, marked off special "spheres of influence" for each, Russia taking about two-fifths or her territory in the north and Great Britain about one-quarter in the south, the remainder being a buffer zone. Persia, though a neutral in the World War, was constantly fought over, suffered heavily and the northwest provinces brought nearly to famine. The province of Azerbajan, peopled by Tartars, in the extreme northwest, adjoining Armenia and Transcaucasia, with Baku, the great oil port on the Caspian as its capital, declared its independence in 1917, after the Russian debacle, and later became a Soviet republic.

On Aug. 9, 1919, Great Britain and Persia signed a treaty by which the former agreed to furnish expert advisers, military officers, munitions and modern military equipment, a loan of $10,000,000 to be secured by customs duties, and to build certain railroads. This agreement was never put in force and was denounced by Persia with the consent of Great Britain in February, 1921. Immediately (in March) Persia signed a treaty with the Russian Soviet Republic as a substitute for all previous Russo-Persian treaties, which established diplomatic relations, restored Firuzeh and Ashurada to Persia, annulled all concessions previously granted to Russians in Persia, turned over the Russian Discount and Loan Bank to the Persian Government, cancelled all Persian debts to Russia and abolished the capitulations.

Persia sent a delegation to Paris in 1919 to lay its claims before the Peace Conference, but was denied a hearing.

Agitation for the overthrow of the monarchy and the establishment of a democratic republic was very great but when success seemed assured on the Mohammedan New Year (March 21), 1924, veering public sentiment made the move abortive. The National Assembly, however, deposed the Shah, Ahmed Mirza (born June 29, 1898, succeeded his father, Mohammed Ali, who abdicated July 16, 1909, who was absent in Paris and installed his two-year old son on the throne with Mirza Reza Khan, Prime Minister as regent. Parliament, early in 1925, made him Supreme Chief of all Persian forces, an army numbering 40,000 men.

The Constituent Assembly (Majlis) on Oct. 31, 1925, proclaimed the disposition of the Shah and abolished the Kajar family as a governing dynasty. Seven Shahs of this line had ruled Persia since 1779. On Dec. 13, 1925, the Assembly elected Mirza Riza Khan hereditary Shah. He was proclaimed Dec. 16, and crowned April 25, 1926.

All capitulations granting extraterritorial rights to other governments and their citizens were canceled on May 10, 1928 and replaced by provisional agreements mostly for one year following in general the treaty with Russia.

Dr. A. C. Millspaugh, the American who has been Administrator General of the Finances since November 1922, refused on July 25, 1927 to accept a new contract because in it his powers were curtailed. In his June 1926 report he announced the conversion in three years of a heavy deficit into a small surplus, the reduction of the debt, and the accumulation of cash in the treasury sufficient to repay the entire funded debt of Persia. In his December 1926 report he noted that in the four years expenditure for public works had increased from $100,000 to $2,500,000; for education from $700,000 to about $1,500,000; and for public health from $120,000 to about $275,000.

The unit of currency is the kran. It averaged $0.1101 in the fiscal year 1925-26; $0.0976 in 1926-27; $0.0980 in 1927-28.

Recent budgets for fiscal years ending March 20, in krans, are:

Year.	Revenues.	Expenditures.
1925-26	292,364,228	235,277,913
1926-27	323,416,863	253,556,721
1927-28	267,866,000	243,131,000
1928-29	276,857,000	276,828,000
1929-30	301,124,000	349,430,000

The public debt on March 20, 1928 was: Funded, £1,637,845; floating, 7,214,000 krans. Treasury resources on that date were £1,488,000 and 299,363,000 krans.

The new national bank authorized by Parliament May 5, 1927, was opened in September, 1928 with Dr. F. Lindenblatt, a German, in charge, and an initial capital of 5,000,000 krans, government appropriation, for capital.

Royalties from petroleum produced by the Anglo-Persian Oil Co. were: in 1923-24, £341,996; 1924-25, £755,660; in 1925-26, £728,780; in 1926-27, £1,389,612; and in 1927-28, £1,488,000.

Imports and exports for fiscal years ending in March:

Year.	Imports.	Exports.
1922	$55,428,548	$45,635,890
1923	61,920,000	73,398,000
1924	68,132,000	76,839,000
1925	77,144,514	100,016,314
1926	97,000,000	116,639,000
1927	76,850,000	107,762,000
1928	79,128,000	103,920,000

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$756,076	$3,346,673
1923	244,686	5,180,645
1924	886,931	5,455,049
1925	438,991	7,211,930
1926	753,904	8,400,851
1927	1,568,819	7,526,586
1928	1,513,047	9,308,194

PERU, REPUBLIC OF

AREA, 533,916 square miles, with about 100,000 square miles in dispute.

POPULATION, estimated, 5,500,000, besides unenumerated savage tribes.

CAPITAL, Lima, population, census of 1920, 176,476; estimated, 1928, 250,000; chief port, Callao, population, estimated, 60,000. Other cities are Arequipa, population, estimated, 48,000; Iquitos, 15,000; Cuzco, 23,000.

President, Dt. Augusto B. Leguia, 1929-1934, by coup d'etat July 4, 1919, legalized by Congress; he took the oath Oct. 15, 1919, for full term of five years; re-elected, 1924, for five years; re-elected Aug. 5, 1929, for five years from Oct. 12, 1929.

Premier, Dr. Benjamin Huaman de los Heros (Government and Police) May, 1929.

Peru is situated on the Pacific Coast of South America, bounded on the north by Ecuador and Colombia on the east by Brazil and Bolivia, and on the south by Chile. In area it equals the combined area of Texas, Arizona, Nevada and Utah. The territory, amounting to 100,000 square miles, in the northeast corner in the Amazon basin has been in dispute between Colombia, Ecuador, Brazil and Peru. The boundaries between Peru, Colombia and Brazil were adjusted (subject to ratification) through the good offices of Secretary of State Hughes in Washington on March 4, 1925. Colombia recognizes Peru's title to certain disputed territory north of the Pulumayo River and Peru admits Colombia's ownership of a strip of territory adjacent to the line between the confluence of the Apaporis and Yapura Rivers, and the village of Tabatinga on the Amazon, which has been recognized as the common boundary of Brazil and Peru. The Peruvian Congress ratified the treaty on Dec. 21, 1927. The territory has about 13,000 square miles.

The Province of Tarata (1,922 square miles, with a population about 15,000) was restored by Chile to Peru on Sept. 1, 1925. The Province of Tacna, 4,786 square miles, was restored by Chile in 1929; (For Tacna-Arica Settlement see Index).

The Andes reach their highest altitudes in Peru, which contains seven peaks towering above 19,000 feet, of which Huascaran (altitude 22,187 feet), Coropuna (21,700 feet), Huandoy (21,088 feet), Misti (20,013 feet) and Huaican (19,945 feet) are among the loftiest. The thirty mile wide strip of land along the Pacific is a desert except as it is irrigated from streams from the mountains; the uplands or western slopes of the Andes are well watered and also the eastern descent to the Amazon basin, tropical lowlands, very fertile, thickly wooded in parts with much wild rubber, and thinly populated. Iquitos, the capital of this district, is over 2,000 miles up the Amazon.

The mountains are rich in minerals and many valuable mines, some dating back to the Incas, are being worked. The total production in 1927 was valued at £P22,453,627 (£P18,060,782 in 1926). Peru produces 95% of the world's vanadium (858,327 kilos in 1926).

The output of copper, chiefly from the very rich Cerro de Pasco mines, was 52,272 metric tons in 1928; 47,805 in 1927; 42,939 in 1926, 36,844 in 1925; 33,937 in 1924; and 44,166 in 1923. Peru is third in production of silver, 18,296,000 troy ounces in 1927; and 23,589,000 in 1926. Lead production was 13,107 metric tons in 1928.

Petroleum output was 11,970,000 barrels in 1928; 10,135,000 in 1927; 10,519,000 in 1926; 9,164,000 in 1925; and 7,812,000 in 1924, giving Peru ninth place as a producer.

The cotton production in 1926, 230,769 bales (from 28,600 acres), of which 215,769 were exported. In 1927, 224,915 bales were exported and in 1928, 203,112. Sugar production in 1927 was 374,852 tons from 141,020 acres (375,973 tons in 1926).

There are estimated to be 10,000,000 sheep, 1,500,000 alpacas and 500,000 llamas and the annual clip is about 14,200,000 pounds, more than half alpaca.

From the islands in the Pacific 75,458 tons of guano were taken in 1926-27.

Manufacturing is increasing; 533 establishments with a total production of £P23,855,000 ($95,420,000) being reported in 1928.

There were in 1928, 2,725 miles of railroads, 1,481 miles being state railroads under control of the Peruvian Corporation. At Callao, in 1926, in the foreign trade there entered 758 steamers of 2,470,505 tons.

Under the new Constitution, Jan. 18, 1920, the Government is highly centralized. The President, the Senate (35 members), and the House of Representatives are all elected for five years.

Absolute political and religious freedom is guaranteed. The Catholic religion is the state religion.

The law of Feb. 5, 1921, makes elementary education compulsory and free. In 1928 there were 3,461 public elementary schools with 272,490 pupils and 6,012 teachers; and 492 private schools with 28,402 pupils. At Lima is the University (with, in 1928, 1,418 students), founded by Charles V. in 1551.

Over 50% of the population are full-blooded Indians, including many uncivilized and unenumerated tribes; 40% are Mestizos, or of other mixed blood, and but 2% entirely of Caucasian blood. The lot of the Indians has been very bad.

President Leguia put in motion an elaborate series of reforms to modernize the country, including the sanitation of thirty-one Peruvian cities, the reorganization of the army and navy, the reconstruction of the educational system, huge irrigation works, and the stamping out of yellow fever.

Military service is compulsory, the standing army numbers 7,500, with 90,000 in the reserved. The navy is small. Four 800-ton submarines, 200 feet long, built at Groton, Ct., have been added to the navy.

Foreign capital invested in Peru is estimated at $320,000,000, of which $100,000,000 is American. Prof. Edwin W. Kemmerer of Princeton University undertook, in 1926, to advise the Government on financial and economic matters. The customs, Reserve Bank, naval and educational services are administered by American missions; the army by a French mission; the police by a Spanish mission; the postal and telegraph and 80% of the railway by English, and electric power in the capital by an Italian company.

Congress in 1927 created two national banking institutions, the Reserve Bank of Peru, with a capital of £P1,500,000 of which Willard J. Bloomer of New York was made the head; and the Agricultural Credit Bank, with a capital of £P750,000. The note circulation of the Reserve Bank on July 31, 1928, was £P6,210,000; the gold reserve, £P4,126,000; and foreign exchange reserve, £P1,487,000.

The unit of currency is the libra, or Peruvian pound (at par of exchange = $4.8665) which, though fluctuating considerably, had an average rate for 1925, 1926 and 1927 of $3.83, but rose to $4.00 on Nov. 1, 1928.

Peru floated two series of 6% 33-year bonds in New York, the first of $50,000,000 at 91½ on Dec. 21, 1927, and the second of $25,000,000 at 91 on Oct. 24, 1928. The purpose was to refund the entire external debt of the republic and certain short term debts; the construction of dock and shipping facilities at Callao; and other public works.

The total debt of the republic, June 30, 1928, was approximately $128,521,695 of which $97,274,562 was external funded debt.

Recent budgets were balanced: for 1923, £P6,895,603; for 1924, £P7,879,489; for 1925, £P8,862,245; for 1926, £P9,412,619; for 1927, £P10,371,542; for 1928, £P11,113,650; for 1929, £P12,583,636. Actual revenues in 1928 were £P12,198,103, and expenditures £P12,075,467.

Imports and exports in gold dollars were:

Year.	Imports.	Exports.
1922	$40,887,000	$72,154,000
1923	58,084,000	98,439,000
1924	73,019,000	101,713,000
1925	73,457,000	87,437,000
1926	72,761,000	89,190,000
1927	71,354,000	105,337,000
1928	79,000,000	112,585,600

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$14,036,990	$15,872,125
1923	19,775,789	24,401,758
1924	23,837,124	22,895,470
1925	23,032,431	17,174,278
1926	29,352 521	21,796,710
1927	24,869,505	20,091,158
1928	23,409,469	20,775,920

POLAND, REPUBLIC OF

AREA, 1923, 149,140 square miles; of this the former Prussian portion was 17,789 square miles; Russian, 43,804, and Austrian, 30,481. Plebiscites in Silesia and East Prussia added more, and in 1923 the Vilna section in Lithuania with about 5,200 square miles was added. Some boundaries are indeterminate.

POPULATION, Dec. 31, 1922, Poland in the boundaries of September, 1921, 27,372,447; Polish Upper Silesa, 980,296; Central Lithuania, 488,968; army, 312,452; total, 29,160,163. Official estimate, Jan. 1, 1928, 30,212,962.

CAPITAL, Warsaw, population, 936,713. Chief cities, Lodz, 451,813; Lemberg (Lwow), 219,193; Cracow, 183,706; Posen (Poznan), 184,756; Vilna (Wilno), 128,954; and sixteen others with population between 40,000 and 100,000.

President, Prof. Ignatz Moscicki, elected June 1, 1926.

Prime Minister, Casimir Switalski, April 14, 1929.

Minister of War, Marshal Joseph Pilsudski.

The Republic of Poland was formed following the World War of reunited parts of the old kingdom dismembered about 150 years ago by Russia, Austria and Prussia. It is about the size of the States of West Virginia, Ohio, Kentucky and Tennessee, and in population is the sixth state in size in Europe.

Poland is bounded by Germany on the north and west; Latvia and Lithuania, north; Czechoslovakia and Roumania, south; Ukraine and Russia, east. Of the population 18,820,000 are Catholic Poles and Slavs; 2,111,300 Jews; 3,900,000 Ruthenians; 1,060,000 White Ruthenians; and 1,059,000 Germans. Absolute freedom of worship is guaranteed.

Poland is, except in the extreme south, an unbroken plain, across which three glacial movements have swept; average elevation, 480 feet; average rainfall, 21 to 23 inches; snowfall, 10 to 20 per cent. of total precipitation lasting 40 to 100 days.

The Allied Ambassadors' Conference, March 14, 1923, decided to recognize the eastern frontier of Poland, as established in the Treaty of Riga between Russia and Poland; also that the whole of East Galicia, which Poland had been allowed to occupy for four years, should pass to Polish sovereignty; and that Poland be confirmed in possession of Vilna (Wilno), the old capital of Lithuania, which Polish Gen. Zeligowski had seized in the lawless raid in October, 1920, and handed over to Poland. (See Lithuania).

Access to Free City of Danzig (Gdansk), formerly of the German Empire, as a port on the Baltic Sea, was granted by the Treaty of Versailles, and in 1922 Danzig was brought within the Polish customs frontier. Poland has begun to develop its own Baltic port, Gdynia, on Polish soil, in the "corridor" granted her just west of Danzig. It has been partially opened to navigation since 1927. In 1928, vessels arriving and departing totaled 2,201 of a total of 1,977,795 net tons; 23,282 passengers were carried and 1,957,348 metric tons of freight. The population in 1929 was nearly 30,000. A naval port has been started there with a harbor depth of forty feet.

The Vistula River gives navigation from Danzig south through Poland. A trans-European trade route is projected by canalizing the Vistula, cutting a canal to the Dnieper, and canalizing that river to the Black Sea at Odessa.

Sixty-five per cent. of the population engage in agriculture. There are approximately 44,478,000 acres arable; 13,000,000 pastures; 22,153,000 forests; 9,000,000 gardens and other uses.

Crop yield in 1928 was: Wheat, 1,460,000 metric tons from 2,665,130 acres; rye, 5,900,000 metric tons from 11,245,910 acres; barley, 1,900,000 metric tons from 3,164,070 acres; oats, 3,650,000 metric tons from 6,659,120 acres; potatoes, 27,900,000

metric tons from 5,098,430 acres; and sugar beets, 5,000,000 metric tons from 575,510 acres.

Under the Land Reform Act of Dec. 17, 1920, some 1,000,000 acres, of which 625,000 were private property, have been taken over by the state; of this, 380,000 acres were distributed to private individuals and private institutions, 295,000 in the eastern provinces were distributed among 5,000 war settlers; and 276,000 acres were assigned to the Polish Land Distribution Offices, which parcelled out 51.6 per cent to small farmers, 26 per cent. to non-farmers, 8.5 to employees on estates, 6.4 to large farmers and 7.5 to invalids and soldiers. The greater portion of the land taken over by the state consisted of extensive private properties which had been neglected. The maximum holdings were 400 hectares (988 acres), but the greater part were less than half that size, with a maximum of sixty hectares (148 acres), in industrial districts.

Polish Galicia has been a large producer of petroleum, but the production in 1922-23 has been only 60 per cent. of the pre-war average and is below the refining capacity. The output in 1928 was 5,830,000 barrels; in 1927, 5,342,000; in 1926, 5,844,000; and in 1925 5,960,000. The production of natural gas in 1928 was 456,209,000 cubic metres (454,139,000 in 1927). French capital is heavily invested and at present controls more than half the production.

Forests cover 23 per cent. of area; total 22,153,000 acres; state-owned, 29.5 per cent.; private, 70.5 per cent. Coniferous trees predominate, mostly Scotch pine, spruce, fir, larch; deciduous trees, beech, oak, alder, birch, elm, aspen, etc. Woodworking industries are important. Annual regrowth is estimated at 9,000,000,000 feet board measure, permitting exportation of about 5,500,000 tons, or about 8,000,000,000 feet, with constant demand.

In Upper Silesia, Poland acquired 1,300 square miles of the 4,100 involved. Most of mineral and industrial values were in Polish-acquired territory, which contains enough coal to mine annually 50,000,000 tons for 300 years. The normal coal production in Poland proper, Dumbrowa district, is 10,000,000 tons. Poland acquired virtually all the zinc mines, whence annually 180,000 tons are taken —18 per cent. of world's zinc; most of iron industry; twenty-two out of thirty-six blast furnaces. Railways there, which are nationalized, are to remain undivided for fifteen years with a Polish-German commission to supervise them and the industries The major part of steel industry remains German.

The transfer of the southeastern part of Upper Silesia to Poland, which became effective in the summer of 1922, brought a wealth of coal. In 1928 that territory produced 30,250,000 tons, as compared with a pre-war annual average production of 32,500,000 tons. Total production from all fields in 1928 was 40,609,652 metric tons (38,084,086 in 1927) of which 13,406,000 tons was exported.

Production of pig iron in 1928 was 683,811 metric tons (618,327 in 1927); of steel ingots and castings, 1,437,047 tons (1,243,691 in 1927); of finished rolled products, 1,044,903 tons (918,327 in 1927). The number of workmen engaged in 1928 was 53,036 (44,716 in 1927). Production of zinc in 1928 was 138,000 metric tons (129,830 in 1927).

Of the sixty-two coal mines in the district forty-nine became Polish and eleven remained in Germany, two being part German and part Polish. It is estimated that 90 per cent. of the undeveloped coal fields are in Polish territory. Poland received all the twenty-four zinc works and eleven of the fourteen zinc mines with 82 per cent. of the output.

Iron and steel industries are highly developed; also chemicals and glass. Lwow (Lemberg) is the centre of the textile industry, with approximately 900,000 spindles. The output of the forty-seven mills in the Polish textile industry in 1922 exceeded pre-war production by 40 per cent. The cotton mills in Oct. 1927 had 2,473,192 spindles, and 39,793 looms, and the woolen mills 732,368 spindles and 2,752 looms.

Industrial establishments in operation on Dec. 31, 1925, totaled 2,870 with 298,857 workmen, and on Nov. 30, 1926, 3,582 with 429,828 workmen. Unemployment which had been 218,368 on Jan. 1, 1922, 81,000 Jan. 1, 1923, 67,581 Jan. 1, 1924, 161,940 Jan. 1, 1925, 311,090 Jan. 1, 1926, 233,057 Jan. 1, 1927, 190,546 on June 30, 1927, 116,000 on May 31, 1928, 78,300 on Oct. 31.

Poland had on Dec. 31, 1926, 10,534 miles of railroads, all state-owned. The railroad administration showed a profit of 20 million zlotys in 1924, whereas there was a deficit of over 300 million in 1923.

Poland is governed under a Constitution adopted March 17, 1921, which calls for a two-chamber legislative body. Senate of 111 members, and House (Sejm) of 555 members (in 1922 reduced to 444), elected by universal suffrage, on a system of proportional representation which takes care of minorities. Freedom of press, religion, etc., is guaranteed. The President of the Republic is chosen by Parliament for a seven-year tenure, and appoints a Cabinet of Ministers responsible to Parliament. The Voyvodships have a considerable measure of home rule. There are a score of political parties. Blocs must combine to furnish a working majority. A new constitution giving much greater power to the President was placed before the Sejm in February, 1929.

Marshal Josef Pilsudski by a military coup d'etat overturned the government May 12, 1926. He refused an election to the presidency but on Oct. 1 took the premiership himself.

Two thousand candidates representing 34 parties sought the 444 seats in the Sejm in the election of March 4, 1928. The government secured 111 seats and about the same proportion in the Senate.

A concordat with the Vatican was arranged in February, 1925, and laws were passed to improve the condition of the Jews.

The Polish Army, which numbered more than 1,000,000 during the Soviet-Polish war of 1920, was reduced to 270,000 by Sept. 1, 1923. Military service for two years is compulsory.

Poland is making a strong fight to eradicate illiteracy and its educational program provides for compulsory education for all children under sixteen years. Sufficient school buildings and trained teachers have yet to be provided. Elementary schools in 1925 numbered 27,414 with 3,237,340 pupils and 66,176 teachers; there were 778 secondary schools, with 219,978 pupils and 14,681 teachers There are six important universities—Warsaw, with 8,939 students in 1923; Lwow (Lemberg), 5,646; Cracow, 5,235; Poznan (Posen), 3,416; Wilno (Vilna), 2,260; and Lublin, 1,120. Warsaw and Lwow have Polytechnic Institutes.

The Polish Government in April, 1923, adopted a new unit of value, the "zloty," equivalent to a gold franc (=19.3 cents). The Polish mark fell heavily in sympathy with the German mark, but was stabilized on April 28, 1924, at 1,800,000 paper marks to the zloty.

The zloty dropped, reaching 12.87 cents on Jan. 1, 1926; 9.58 on May 1; but recovered until the average for 1926 was 11.18; for 1927, 11.22; and for 1928, 11.21.

The Bank of Poland was opened Apr. 28, 1924, with a capital of 100 million zlotys. It has the sole right to issue notes for 20 years. Circulation July 31, 1929, was 1,293 million zlotys with a cover of gold at home 432 million, gold abroad 219 million, and foreign exchange 441 million zlotys.

Poland floated a 7%, 20-year, $72,000,000 stabilization loan on Oct. 18, 1927, at 92. Of this, $47,000,000 was taken in the New York market; £2,000,000 in England, $6,000,000 in Switzerland; $4,000,000 in Holland; $2,000,000 in France; $2,000,000 in Sweden, and $1,000,000 in Poland. Under the provisions of the loan an American citizen was to be named for three years as adviser to the government and the Bank of Poland with suitable powers. For that post Charles S. Dewey, assistant Secretary of the Treasury was selected. In addition the Federal Reserve Bank, the Bank of England, the Bank of France and the Central banks of eleven other countries joined in a credit of $20,000,000 for protection of exchange.

Poland's debt for post-war food credits and relief work to the United States was funded on Dec. 15, 1924, at $178,000,000, to be paid within 84 years, and her debt to Great Britain of £5,000,000 was refunded on a 16½-year basis. A most favored nation trade agreement with the United States was signed in Washington on Feb. 10, 1925. A $35,000,000 25-year 8 per cent. loan was floated in New York in March, 1925.

The City of Warsaw floated a $10,000,000 7% 30-year loan at 89 in New York March 12, 1892; and the province of Silesia a $11,200,000 7% 30-year loan at 89¼ in New York on June 9, 1928.

The external debt on Jan. 1, 1928, was 3,862,265,000 zlotys ($433,962,000), and the internal debt 293,900,029 zlotys ($33,022,470).

Recent budgets in zlotys are:

Year.	Revenues.	Expenditures.
1924 (calendar)	1,703,000,000	1,631,300,000
1926 (calendar)	1,856,200,000	1,971,518,000
1926 (calendar)	1,905,722,000	1,852,072,000
1927-28 Apr. 1 (Fiscal)	3,046,685,000	2,853,934,000
1928-29	3,007,643,000	2,808,463,000
1929-30	2,954,967,000	2,787,788,000

Trade for six years (000 omitted) was:

Year.	Imports.	Exports.
1923 gold zlotys	1,116,482	1,195,587
1924 " "	1,478,378	1,265,862
1925 " "	1,602,823	1,272,072
1926 " "	896,232	1,306,040
1927 new "	2,891,972	2,514,740
1928 " "	3,362,164	2,507,990

Trade of Poland and Danzig with the United States was:

Cal. Year.	Imports.	Exports.
1922	$16,371,317	$1,943,751
1923	12,110,515	3,632,895
1924	4,580,881	2,848,397
1925	6,556,154	2,527,197
1926	3,938,887	4,146,739
1927	9,260,839	4,825,078
1928	15,875,960	3,594,026

PORTUGAL, REPUBLIC OF

AREA, 35,490 square miles, which includes the Azores, 922 square miles, and Madeira, 314, islands in the North Atlantic Ocean. Colonial possessions in Africa—Cape Verde Islands, 1,480 square miles; Guinea, 13,940; Principe and St. Thomas Islands, 360; Angola, 484,800; Mozambique, 426,712; total Africa, 927,292; in Asia—Goa, India, 1,469; Damao, India, 169; Timor, Malaysia, 7,330; Macao, China, 4; total Asia, 8,972. Grand total, 965,754.

POPULATION, census of 1920, 5,628,610, exclusive of the Azores, 1920, 232,012, and Madeira, 1920, 179,002; total, 411,014. Colonial possessions—Africa, 7,736,700; Asia, 1,001,153; total colonial possessions, 8,737,853. Grand total, 14,777,477.

CAPITAL, Lisbon, population, 1925, 529,524. Other cities, Oporto, population, 1925, 215,625; Setubal, 37,074; Funchal (Madeira), 24,687.

President, Gen. Antonio Oscar de Fragoso Carmona, assumed office Nov. 29, 1926. Elected President Mch. 25, 1928.

Prime Minister, Gen. Ivens Ferraz (Interior) July 8, 1928.

Portugal occupies the western part of the Iberian Peninsula, being bounded on the north and east by Spain and on the south and west by the Atlantic Ocean. Its area is 34,254 square miles, a little larger than the State of Maine. The Azores and Madeira Islands, in the North Atlantic, are politically an integral part of the republic. The country is mountainous and well watered to the north. About one-third of the land is cultivated. Vineyards abound, and wines, olive oil and fruit are largely produced. Wine-making is the chief industry. Forests of pine, oak, cork and chestnut cover 19 per cent. of the country, and cork, of which 85,000,000 pounds were produced in 1925, is the second largest industry. Portugal has much mineral wealth, but is undeveloped because of a scarcity of coal and poor transportation. The sardine fisheries are important. Hides and wool are also exported.

Portugal had in 1926, 2,040 miles of railroads, of which 843 were state owned. The merchant marine in 1927 had a total tonnage of 258,698; in 1927, 2,058 steamers of 5,457,385 tonnage entered Lisbon.

Portugal, an independent state since the twelfth century, was a kingdom until Oct. 5, 1910, when a revolution drove King Manuel II. from the throne and proclaimed a republic. It is governed under a Constitution, adopted Aug. 20, 1911, which provides for a National Council of 164 members, elected by direct vote for three years, and an Upper Chamber of 71 members, elected by the Municipal Councils, half renewable every three years. The President is elected by both Chambers for a four-year term; he appoints the Ministers, who are responsible to the Chamber. Voters must be able to read and write. The army is raised by conscription and numbers 40,000, with reserves of 620,000. The navy personnel is 6,000.

The dominant religion is Roman Catholic; there is freedom of worship. Primary education is free and nominally compulsory; the republic has been showing increased interest in education, but the percentage of illiteracy is about 75. There are three universities.

After more than a year of political unrest the Government was overthrown on May 29, 1926, by a bloodless revolution led by military and naval officers. President Bernardino Machado, who had been elected on Dec. 11, 1925, to succeed President Teixeira Gomez, resigned, himself resigned. Disagreements among the triumvirate of officers who assumed power resulted in a second "bloodless revolution" on June 17, and a third on July 9, headed by Gen. Carmona. A violent attempt in February, 1927, failed to unseat him.

The country has suffered greatly in the last two years from the depreciation of the escudo.

The escudo is the unit of currency, gold par being $1.0805. Average of exchange in 1927 was $0.0503; and in 1928, $0.0447.

Recent budgets in escudos are:

Year.	Revenues.	Expenditures.
1923-24	666,576,163	802,415,872
1924-25	1,237,986,167	1,324,188,853
1925-26	1,306,193,612	1,369,758,769
1926-27	1,289,032,232	1,555,304,830
1927-28	1,459,377,587	1,848,045,029
1928-29	1,919,388,000	1,917,811,000
1929-30	2,033,433,000	2,024,855,000

The British war debt, some £21,000,000, was funded at £5,500,000 in Dec. 1926, to be paid before Dec. 31, 1927. The National debt July 1, 1927, amounted to £101,946,871 gross and about £63,762,871 net. Banknotes in circulation July 31, 1929, amounted to 1,921 million escudos with a gold reserve of 9 million.

Trade in 1925 was: Imports, 2,561,000,000 escudos; exports, 1,158,000,000 escudos; in 1926, imports, 2,685,384,805 escudos, exports, 1,072,573,562 escudos; and in 1927, imports, 2,662,107,700; exports, 722,569,900.

Trade of Portugal with the United States was:

Cal. Year.	Imports.	Exports.
1922	$6,733,066	$5,110,403
1923	8,597,614	3,788,701
1924	8,085,109	3,040,950
1925	8,733,119	3,651,372
1926	11,634,029	5,559,772
1927	10,672,262	4,564,825
1928	12,711,562	5,327,189

Trade of the Azores and Madeira Islands with the United States was:

Cal. Year.	Imports.	Exports.
1922	$675,975	$2,552,759
1923	495,242	2,335,167
1924	885,991	2,964,281
1925	1,144,423	1,742,892
1926	1,280,316	1,594,775
1927	1,945,517	1,814,209
1928	730,887	1,619,102

Portug uese Colonial Possessions

Asiatic.

Portuguese India includes Goa (capital, Panju) on the Malabar coast; Damao, near Bombay; and Diu, a small island 140 miles from Damao; area 1,638 square miles; population, 548,472. Salt is produced in Goa and Damao, and manganese near Mormugao, where there are twenty mines. Manganese is imported into the United States for steel-making as an essential. The 1928-29 estimated revenue of this group was 5,596,746 rupees. The 1927 imports were valued at 16,823,589 rupees; and exports, chiefly cocoanuts, copra, fish, spices and salt, 4,047,150 rupees.

Macao, China, is on an island of the same name at the mouth of the Canton River; it has 160,000 population (1927), 3,864 of which were Portuguese; the rest Chinese; a military force of 488 natives; and had (budget of 1926-27) a revenue of 3,029,210 escudos, and expenditures of 3,321,742. The trade is mostly transit and reached a total of 50,000,000 dollars Mex. in 1927.

Portuguese Timor is the eastern part of the Malay island of that name, off the north coast of Australia. Holland having the western part. The population in 1926 was 451,604. The 1926-27 budget balanced at 1,882,527 escudos. Imports, 1925, 604,123 escudos; exports, coffee, sandalwood, sandal root, copra and wax, 711,757 escudos.

African.

The Cape Verde Islands, in the North Atlantic longitude 25°, latitude 15°, fourteen in number Praia, capital, had a population of 149,793 in 1922 of which 4,799 were white. Chief products are coffee, medicinal products, hides and millet. The budget of 1926-27 was: Revenues, 17,504,815 escudos; expenditures, 17,111,699 escudos.

Portuguese Guinea, on the coast of Senegambia, chief port Bissau, has a population Census of 1924 770,791. In 1927 imports were 34,322,414 escudos; exports, chiefly rubber, wax, oils, ivory and hides, 34,309,015. The budget for 1928-29 was balanced at 34,970,000 escudos.

The Islands of S. Thome (pop. 58,907) and **Principe** (pop. 4,938), about 125 miles off the west coast of Africa in the Gulf of Guinea, form a province under a Governor. Chief products are cacao, coffee, rubber and cinchona; exports being valued at 91,776,486 escudos in 1927 and imports at 36,271,746. The budget for 1926-27 balanced at 10,213,658 escudos.

Angola, Portuguese West Africa, has a 1,000-mile coast line stretching south from the mouth of the Congo. It is governed by a High Commissioner, with large powers. The Portuguese have owned it since 1575. Its area is 484,800 square miles.

In 1928 the capital was moved from unhealthy Loanda where it had been for 350 years to Nova

Lisboa, nearly a mile above sea level and 225 miles inland on the railway.

The native population, census of 1926, was 2,481,956. There were fifty-two Government schools with 4,752 pupils. The budget for 1927-28 estimated revenues at 167,559,760 angolares, and expenditures at 166,217,050 angolares. The debt is about $21,500,000.

Exports in 1927 were valued at £1,814,000, and imports at £2,420,600.

Chief products are coffee, rubber, wax, sugar, oil seeds, cocoanuts, ivory, cattle, fish, tobacco for local use, cotton, petroleum and asphalt. There are large deposits of malachite, copper, iron and salt, and gold has been found. Diamond output was 180,334 carats in 1927. Railway mileage is 1,436.

Mozambique, Portuguese East Africa, extends from Cape Delgado (10° 40′ south latitude) to the Union of South Africa just below the capital, Lourenco Marques. To the west lies the Union of South Africa and Rhodesia (British). On the north is Tanganyika, formerly German East Africa, but surrendered to the British November, 1919; over 400 square miles of that territory, the Kionga Triangle, was transferred to Mozambique in 1919.

Mozambique has 428,132 square miles, and a population in 1925 of 3,652,000 natives and 25,000 whites. The budget estimate for receipts and expenditures for 1927-28 was 399,701,814 escudos ($19,985,090). Chief products are sugar, cocoanuts, beeswax and coal deposits exist. It has vast natural resources practically untouched. The principal ports are Lourenco Marques and Beira. In 1926 imports were valued at $12,098,420, and exports $9,012,995; in 1927, imports, $13,484,000; and exports, $7,270,000.

Railroads are being pushed, the most important line being the Delagoa Bay to Pretoria, 347 miles, of which 57 miles is in Portuguese territory; 460 miles are under State Administration; 425 miles are in Mozambique Company's territory.

In 1927, 774 vessels of 3,693,320 tonnage entered the port of Lourenco Marques, and 594 vessels the Port of Beira.

Trade of Portuguese Africa with the United States was:

Cal. Year.	Imports.	Exports.
1922	$2,986,716	$5,876,439
1923	3,859,641	11,036,798
1924	4,642,302	15,634,554
1925	5,620,378	13,528,204
1926	6,451,632	11,703,645
1927	6,045,847	1,473,310
1928	6,852,837	3,115,888

ROUMANIA, KINGDOM OF

AREA, 122,282 square miles; divided, Old Roumania, 53,489; additions confirmed by the 1919 peace treaties, Bessarabia, 17,146; Bukovina, 4,030; Transylvania, 22,312; Crisana, 8,038; Maramuresh, 6,258; Banat, 11,009.

POPULATION, 17,393,149; divided, Old Roumania, 7,904,104; Bessarabia (joined March, 1918), 800,098; Transylvania (joined December, 1918), 2,678,367; Crisana, 1,316,981; Maramuresh, 766,666; Banat, 1,582,133 (Census of 1917). Roumanians by race number 13,000,000.

CAPITAL, Bucharest; population, official estimate Dec. 31, 1927, 875,000. Other cities, Kishinev, (Chisinau), 175,000; Cernauti, 175,000; Galati, 130,000; Ploesti, 115,000; Timisoara, 110,000; Jassy (Iasi), 100,000; and Klansenberg (Clug), 100,000.

King, Michael, (Mihai), born Oct. 25, 1921, son of Crown Prince Carol, born Oct 15, 1893, who renounced his right of succession Dec. 31, 1925, and of Princess Helen of Greece, married March 10, 1921 and divorced June 21, 1928. He succeeded his grandfather, King Ferdinand I, born in Prussia Aug. 24, 1865, came to the throne Oct. 11, 1914, died July 20, 1927. The Dowager Queen is Marie, Princess of Saxe-Coburg and Gotha, granddaughter of Queen Victoria, born Oct 29, 1875, and Married Jan. 10, 1893.

Regency, Prince Nicholas, second son of King Ferdinand, born Aug. 18, 1903, the Patriarch Miron Christea, and M. Saratzeanu.

Premier, Dr. Julio Maniu, Peasants' Party, Nov. 10, 1928.

Roumania, whose history began as a Roman colony, was formed within Turkey-in-Europe by the union of the Danubian principalities Wallachia and Moldavia, in 1861; proclaimed its independence May 21, 1877, during the Russo-Turkish War, and was so confirmed by the Treaty of Berlin in 1878, losing Bessarabia, however, to Russia. The World War resulted in the return of Bessarabia, the addition to Transylvania from Hungary and of Bukovina with part of the Banat, Crisana and Maramuresh from the Austro-Hungarian Empire, based on ethnological grounds.

The treaty of the powers ratifying the union of Bessarabia to Roumania concluded by Great Britain, France, Italy and Japan, Oct. 28, 1920, which had been ratified by Great Britain and France, was ratified by Italy March 9, 1927, and thereby became effective. Soviet Russia promptly announced that not having been a party to the treaty, she declined to admit its validity of power.

Roumania is bounded on the north by Hungary, Czechoslovakia and Poland, on the east by the Ukraine (Russia) and the Black Sea, on the south by Bulgaria and Serbia, and on the west by Yugo-Slavia and Hungary. It is about the size of New England, New York and New Jersey. For 300 miles the Danube forms its southern boundary; the last 250 miles of its course (from Oltenitza to the Black Sea), it flows through Roumania. The Dneister forms its northeast boundary for 300 miles. The Carpathian Mountains extend from north to south to the middle of the country, whence the Transylvanian Alps extend 200 miles due west. These mountains formed the old western boundary.

The forests are extensive (18,750,000 acres), and the timber industry important. The soil is very fertile, making the country a granary of Europe. Four-fifths of the population engages in agriculture and stock-raising.

Cereal production in 1928 was: Wheat, 3,551,590 metric tons from 8,015,920 acres, (2,634,465 tons from 7,752,882 acres in 1927); maize, 2,536,937 tons from 11,113,730 acres; barley, 1,646,575 tons from 3,397,525 acres; rye, 300,579 tons from 739,260 acres; and oats, 932,768 tons from 2,790,402 acres. There were 394,355 acres planted to sunflowers.

The livestock census in 1928 showed: Horses, 1,944,700; oxen, 4,435,697; buffalo, 189,641; sheep, 12,800,576; goats, 386,045; and pigs, 2,831,524.

Of the forest land 7,390,000 acres are State property of which 2,194,000 are in the Government administration and 5,196,000 are managed by private companies under State supervision. Public institutions own 3,301,000 acres while 7,531,000 are private property. The Ministry of Agriculture places the value of the Roumanian forests at $347,421,000, the value of arable land at $412,654,000, and the value of livestock at $496,000,000. Fisheries produce annually about $121,954,000; mineral products yearly output is about $73,898,000; of which crude oil is about $45,835,000.

Under the land reforms carried through since the armistice 13,099 properties, totaling 14,461,995 acres, had undergone expropriation by Feb. 15, 1923. By Nov. 15, 1924, nearly half had been allotted. In Old Roumania, the peasants who had received land numbered 413,932; yet to receive land, 599,529; in Transylvania, 335,073 and 503,694; in Bukovina, 19,166 and 36,890; while in Bessarabia 357,016, all entitled to it, had received land.

Lignite output in 1927 was 2,850,011 metric tons; in 1926, 2,731,362; pig iron production was 63,203 metric tons; in 1926, 62,976; salt, a state monopoly, output 1926, 344,062 metric tons.

The output of petroleum in 1928 was 31,690,391 barrels; in 1927, 27,263,300; in 1926, 23,314,000; and in 1925, 16,646,000. Exports of oil products in 1928 were 17,394,462 barrels.

In 1928, 1,113 vessels of 2,482,767 net tonnage entered Constanza (the chief Black Sea port, population, 30,000); and tonnage clearing Danube ports totaled 825,524 (1,662,932 in 1926). The European Commission of the Danube, established in 1856 with sovereign powers over the navigation of that river, had its seat at Galatz.

The Government in June, 1929, let a contract to a Swedish engineering firm to construct a navigable canal 52 miles long from Bucharest to the Danube with harbor works there, which, with electric works, will cost about $12,000,000.

A new Constitution on March 27, 1923, replaced the Constitutions of the several countries which before had Constitutions—Old Roumania, Bessarabia, Transylvania and Bukovina. It provides for a Senate, partly composed of ex-officio members and partly of others indirectly elected, and for a Chamber of Deputies elected by "universal, equal, direct, compulsory and secret suffrage, on the basis of the representation of minorities." Mineral and other subsoil products are nationalized. Special franchises and monopolies are forbidden. The administration is centralized. It carries a sweping bill of rights.

A new mining law was promulgated July 4, 1924, whereby foreign companies are given ten years to transfer up to 55 per cent. of their stock to Roumanian nationals. This especially concerns the oil fields and has been protested. Very considerable increases in the tariffs for protection have been

made. The capital invested is estimated at $170,000,000, of which 75 per cent. is foreign.

Military service is compulsory. In 1927 the effective strength of the army was 12,293 officers and 128,483 men.

The navy consists of a small cruiser, six destroyers, two scout boats, and four gun boats, with a special Danube River naval force of twelve gunboats, nine sloops, four river monitors, eight destroyers and seven torpedo boats.

Of the population in 1918 there were 9,695,000 of the Orthodox Greek Church, 1,456,000 of the Greek Catholic Church, 1,483,000 of the Roman Catholic Church, 1,334,000 Protestants, 17,000 Armenians, 834,000 Jews and 44,000 Mohammedans Liberty of worship is assured. Orthodox clergy are paid by the state, other clergy being subventioned. The Jews in 1928, received for the first time a State subsidy of $60,000.

Instruction is free and compulsory "wherever there are schools." In 1925-26 there were 13'439 primary schools with 30,645 teachers and 1'460,408 pupils, and 816 secondary schools with 10,995 teachers and 195,995 students. There were 20 universities with 704 professors and 21,442 students.

The Parliamentary elections on May 25, 1926, were held under a law passed in March on the Italian Fascist model. The Government had an absolute majority of 200,000, the total popular vote for its candidates being 1,243,909; the National Peasant Party having 707,263; the Bratiano Liberals, 179,763; the Anti-Semites, 100,889; the Socialists, 35,570; and the Communists, 26,180. The distribution of deputies under the new law was: Government, 280; National Peasants, 82; Liberals, 15; Anti-Semites, 8.

In the election of a new Chamber, July 7, 1927, Jon Bratiano, who had been called to the Premiership again on June 22, gained control of 80% of the seats.

Jon died and his brother, Vintila, was made Premier, Nov. 24, 1927. During 1928 the National Peasants' party made powerful demonstrations, finally demanding of the Regents that Premier Bratiano be removed. The Regency yielded and made the Peasants' leader, Dr. Julio Maniu, Premier, Nov. 10, 1928.

The election of Dec. 12, 1928, returned this Chamber of Deputies: National Peasants, 333; Liberals (Bratiano party) 13; Hungarian minorities, 10; Social Democrats, 8; German party, 9; others, 10. The Peasant party polled 78% of the popular vote. The Senate election Dec. 16, returned: National Peasants, 157; Liberals, 26; Hungarian minorities, 6; Independents, 1; in addition to 22 ex-officio Senators.

The Government announced a policy of democratizing the country and decentralizing administration and the encouragement of foreign investments by putting them on a common basis with domestic investments.

The leu is the unit of currency. The pre-war gold par was 19.3 cents; the exchange in 1926 was 0.46 cents; 0.60 cents in 1927; and 0.61 cents in 1928. On Oct. 15, 1929, it was 0.594 cents. The rate of stabilization voted by Parliament Feb. 7, 1929 was, Leu ten milligrams of gold, nine-tenths fine; the dollar = 167.18 lei; the pound sterling = 813.58 lei; the French franc = 6.55 lei, and the Swiss franc = 32.25 lei.

Recent budgets in thousands of lei, are:

Year.	Revenue.	Expenditure.
1926 (actual)	29,933,161	29,250,000
1927 (actual)	36,700,000	34,640,000
1928 (estimated)	38,350,000	38,350,000
1929 (estimated)	37,700,000	37,700,000

The bank note circulation on Aug. 31, 1929, was 20,340 million lei, with a gold reserve at home of 5,158 million lei, gold held abroad, 3,952 million lei, and other foreign assets of 5,793 million lei.

The public debt as of Jan. 1, 1928, totaled $716,299,884, composed of an equivalent of $552,271,500 payable in various foreign currencies, and $164,028,384 (26,559 million lei of internal and foreign debts payable in paper lei). The service of the debt was $33,624,000.

A loan of $101,000,000 7% 30-yr. bonds was floated at 88 in New York and eleven European countries on Feb. 14, 1929. It was called the Monopolies Institute Loan and of it the Swedish Match Co. bought $30,000,000 at par.

Imports and exports in thousands of lei were:

Year.	Imports.	Exports.
1923	19,455,044	24,610,469
1924	26,192,449	27,823,602
1925	30,098,000	29,025,000
1926	34,700,000	38,011,000
1927	33,428,547	37,703,178
1928	32,145,101	26,919,257

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$2,436,415	$499,941
1923	1,177,758	336,440
1924	1,192,165	99,427
1925	2,199,064	302,259
1926	3,111,261	1,097,933
1927	4,924,642	649,412
1928	9,430,970	677,174

RUSSIA

(Union of Soviet Socialist Republics.)

AREA, Land area, 8,144,228 square miles (21,352,572 square kilometers).

POPULATION, census of 1926-27, 147,013,600 (males, 71,024,300; females, 75,989,300). Density, 18.1 to the square mile.

CAPITAL, Moscow, population, census of Dec., 1926, 2,025,947. Other cities, Leningrad, 1,614,008; Kiev, 513,789; Baku, 452,808; Odessa, 420,888; Kharkov, 417,186; Tashkent, 323,613; Rostov-en-Don, 308,284; Tiflis, 292,973.

Council of People's Commissars, selected by the Central Executive Committee, April, 1927.

Chairman of the Council, Alexis I. Rykov.

Vice Chairmen of the Council, J. E. Rudzutak, V. V. Kuybyshev, and V. V. Schmidt.

Commissar for Army and Navy, K. E. Voroshilov.

Commissar for Trade, A. I. Mikoyan.

Commissar for Foreign Affairs, George Tchitcherin.

Commissar for Transportation, J. E. Rudzutak.

Commissar for Posts and Telegraphs, N. K. Antipov.

Commissar for Finance, N. P. Briukhanov.

Commissar for Labor, N. A. Uglanov.

Commissar for Peasants' and Workers' Inspection, G. K. Ordjonikdze.

Chairman of the Supreme Economic Council, V. V. Kuybyshev.

Director of Central Statistical Board, V. P. Milutin.

Chairmen of the Central Executive Committee, U. S. S. R., M. I. Kalinin, G. I. Petrovsky, A. G. Chervlakoy, Gazanfar Mussabekov, Netyrbay Altakov, and Faizulla Khodzhayev.

Russia stretches across two continents, from the North Pacific to the Baltic. It occupies the northern part of Asia and the eastern half of Europe, from the Arctic to the Black Sea.

On March 12, 1917, the day of the revolution that destroyed Czardom, Imperial Russia comprised 8,764,586 square miles of territory, with 182,182,600 (official "revision" estimate of 1915) of population; this included 131,796,800 in European Russia; 13,229,100 in the Caucasus, 10,377,900 in Siberia; and 11,254,100 in the Central Asiatic provinces.

The changes wrought by the World War, the revolutionary movements in minor regions, treaty decrees of the Allied and Associated Governments and negotiations of the Russian Socialist Federal Soviet Republic as to political and economic relations brought dismemberment to the old empire and great modifications of territory and relationship toward the new federation (U. S. S. R.) of many of the old districts and provinces. Five independent states have risen in the west. In 1920 the Russian Soviet Government concluded treaties of peace with each: Esthonia, Feb. 2; Lithuania, July 12; Latvia, Aug. 11; Poland, Oct. 12; and Finland, Oct. 14; which recognized the territorial limitations of each or provided for further settlement. That same year agreement was reached by the Allied Powers whereby Roumania received Bessarabia, taken from her in 1878, subject to later discussion by Russia. The former Turkish province of Kars, also taken in 1878, was renounced by the Soviet in the treaty of Brest-Litovsk, March 3, 1918. The area and population lost were:

	Square Miles.	Population.
Poland (independent)	43,804	12,247,600
Finland (independent)	125,689	3,241,000
Esthonia (independent)	16,000	1,750,000
Latvia (independent)	27,000	2,500,000
Lithuania (independent)	22,890	2,246,000
Bessarabia (to Roumania)	17,330	2,213,000
Kars area (semi-autonomous)	7,780	492,000
Total	260,493	24,689,600

The present territory of the U. S. S. R. is 93% of the Czarist Empire; the present population 82%.

RUSSIAN STATES IN 1929.

Many political reassignments have been made under Bolshevik control. The composition, area in square kilometers, population and capitals of the Union of Soviet Socialist Republics, as established

by the Treaty of Union July 6, 1923, with the addition of the Uzbek S. S. R. and the Turkoman S. S. R. in 1924, and Tajikistan in October, 1929, according to the census of December, 1926, are as follows:

Constituent Republics	Area, Sq. K.	Pop. 1926
Russian S. F. S. R.	19,757,953	100,858,000
White Russian S. S. R.	126,792	4,983,900
Ukrainian S. S. R.	451,731	29,020,300
Transcaucasian S. F. S. R.	184,492	5,850,700
Turkoman S. S. R.	491,216	1,030,500
Uzbek S. S. R.	240,388	4,447,600
Tajikistan S. S. R.	100,000	822,600
U. S. S. R., Total	21,352,572	147,013,600

In the above list the Transcaucasian S. F. S. R. represents a union of three Soviet Socialist Republics as follows:

Name.	Population.	Capital City.
Azerbaijan	2,312,000	Baku
Armenia	870,700	Erivan
Georgia	2,668,000	Tiflis

The eleven Autonomous Soviet Socialist Republics in the R. S. F. S. R. with their capitals and total populations, are as follows:

A. S. S. Republic	Population	Capital City
Bashkir	2,695,000	Ufa
Buryat-Mongol	491,300	Verkhneudinsk
Chuvash	894,500	Cheboksary
Crimean	714,100	Simferopol
Daghestan	788,100	Makhach-Kala
German-Volga	571,900	Pokrovsk
Karelian	269,700	Petrozavodsk
Kazak	6,491,700	Kzyl Orda
Kirghiz	993,100	Frunze
Tatar	2,594,000	Kazan
Yakut	278,800	Yakutsk

The twelve Autonomous Areas in the R. S. F. S. R., with the administrative center and total population of each, follow. The Adigeh-Circassian Area, the Chechen Area, the Circassian Area, the Ingush Area and the North Ossetian Area have no urban settlements, and their administrative centers are towns outside their own borders. The areas are:

Adigheh	114,200	Krasnodar
Votyak	956,300	Izhevsk
Chechen	309,900	Grozny
Ingush	75,200	Vladikavkaz
Kabardian-Balkar	204,000	Nalchik
Kalmuk	141,600	Elista
Karachai	37,000	Batalpashinsk
Kara-Kalpak	304,600	Chimbai
Komi	207,800	Ust-Sysolsk
Mari	482,100	Yoshkar-Ola
North-Ossetian	152,400	Vladikavkaz
Oirat	99,900	Ulala

The Autonomous S. S. R., in the Ukrainian S. S. R. is:

Moldavian	572,000	Balta

The three Autonomous Republics in the Transcaucasian Federation follow:

Nakhichevan (Azerbaijan)	105,100	Nakhichevan
Abkhasian (Georgia)	200,500	Sukhum
Adjar (Georgia)	131,300	Batum

The two Autonomous areas in the Transcaucasian Federation are:

Mountain Karabakh (Azerbaijan)	125,200	Stepanakert
South Ossetian (Georgia)	87,300	Tskhinvaly

The census of December, 1926, showed that the U. S. S. R. was composed of 182 different nationalities with 149 languages. Russians form 52.9 per cent of the population and Ukrainians 21.2 per cent. Growth of population is about 3,500,000 annually.

The population of three important regions (parts of other political organizations) for 1926 are as follows: Ural, 6,786,800; North Caucasian, 8,363,100; Siberia, 8,691,000.

THE CONSTITUENT REPUBLICS.

The Russian Socialist Federated Soviet Republic, Capital Moscow, (Soviet Russia proper) contains nearly 70% of the population of the Soviet Union and includes 92% of its territory. The population, census of December, 1926, was 100,858,000 and the area 19,757,953 square kilometers. Its territories stretch from the Latvian and Finnish borders and the White Russian and Ukrainian lines on the west, to the shores of the Pacific Ocean, and from the Arctic Ocean on the north to the shores of the Black and Caspian seas and the borders of Persia, Afghanistan, Mongolia and Manchuria on the South. It includes forty former provinces of European Russia, three provinces of the Northern Caucasus, the greater part of Siberia and the Far East. Its eleven autonomous republics and thirteen autonomous areas are representative of its principal minor national groups.

The White Russian Soviet Socialist Republic, capital Minsk, was proclaimed January 1, 1919. It has a population of 4,983,900 census of December, 1926, and an area of 126,792 square kilometers. It occupies six former counties of the Minsk province and parts of the old Smolensk, Vitebsk and Gomel provinces.

Under the Czars White Russia was the pale of settlement of the Jewish population. It suffered greatly from periodical pogroms and from interracial struggles. Between 1914 and 1920 it was a field for military operations. The racial composition is White Russians 72.2%, Great Russian 14.1%, Jews 10.6%, Poles 2%, other nationalities 1.1%.

The country is agricultural, the soil largely marshy and lacking in fertility. The lack of land was so great that it could not be solved by the expropriating the large holdings. Some 250,000 acres have been added to the farm lands by drainage, and it is planned to increase this to 5,400,000 acres during the next three years.

The principal industries are wood-working, linen, matches, leather, confections, oil pressing, glass, paper, foodstuffs.

The Ukrainian Soviet Socialist Republic, capital Kharkov, is the most densely populated of the Constituent Republics having 19.7% of the U. S. S. R. population in 2% of the area, its population, census of December, 1926, being 29,020,300, with an area of 451,731 square kilometers. The Ukrainian S. S. R. was proclaimed in December 1917 and formed in December, 1919. It borders on the Black Sea, with Poland and Rumania on the west and southwest.

Of the population 80% are Ukrainians, 9.5% Russians, 5.4% Jews, 1.6% Poles, and 3.5% Greeks, Bulgarians, Rumanians, Gypsies, etc. There are also about 800,000 Ukrainians living in other portions of the Soviet Union. The city population includes 47.5% Ukrainians, 25% Russians, and 22.7% Jews. Three-fourths of the schools teach in the Ukrainian language. Workers form 85.2% of the population, farmers 6%, and office employes 4.2%.

The Ukraine contains the famous black soil belt, the chief wheat-producing section of the Soviet Union. Sugar beets and oil seeds are important crops and livestock breeding is rapidly advancing.

In the Donetz Basin the Ukraine has a huge storage of coal, iron and other metals. Here are produced 75% of the coal mined in the country, 70% of the iron and a large proportion of the manganese. There are heavily developed chemical and dye industries, salt mines, etc. Electric power development is making rapid advances and in the rural districts over 200,000 farms are supplied with current. On the Dnieper River the largest hydro-electric development in Europe is under construction, with an ultimate capacity of 455,000 kilowatts.

The Transcaucasian Socialist Federal Soviet Republic, capital Tiflis, represents the union of Azerbaijan, formed April, 1920, Armenia formed December, 1920, and Georgia, formed February, 1921, joined in December, 1922, in a single Constituent Republic. The population, census of December, 1926, was 5,850,700, and the area 184,492 square kilometers. Azerbaijan has a population of 2,313,200, capital Baku. Armenia has a population of 875,000, capital Erivan. Georgia has a population of 2,660,900, capital Tiflis. Azerbaijan contains one autonomous republic and Georgia two.

In addition to Armenians, Azerbaijan Turks, Georgians, Russian, Germans, Greeks and Persians, the conglomerate population includes many small nationalities such as Abkhages, Adjarians, Aisors, Jews, Kurds, Ossetes, Talishes, Tats, etc. Each of the nationalities maintains its own language, customs and habits. Some like the Georgians and Armenians, have a civilization over a thousand years old, while others until recently have had no written language.

Azerbaijan has at Baku the most important oil field in Russia, Georgia in Chiaturi possesses the greatest known deposits of manganese. Other industries include copper mining, cotton ginning, silk spinning, leather factories, tanning plants, saw mills, dairies. Many new electrification projects are recently completed or in construction. Newly discovered natural riches include deposits of lead, zinc, silver, asbestos and pumice stone. Cotton is the principal crop.

The Uzbek Soviet Socialist Republic and the Turkoman Soviet Socialist Republic in Central Asia were organized in 1924. The Uzbek S. S. R., capital Askabad, had a population of 5,270,200, census of December, 1926, and an area of 340,388 square kilometers. The Turkoman S. S. R., capital Samarkand, had a population of 1,030,500 and an area of 491,216 square kilometers. The area includes a new regrouping of Khiva and Bokhara. The Tsarist Government conquered this territory at the beginning of the nineteenth century and suppressed all national independence and culture.

Cotton is the chief crop. Vineyards, fruit orchards

and silk growing are also important. Irrigation is a necessity to agriculture and many large projects are under way. The five-year plan calls for an extension of the irrigated area to 3,400,000 dessiatins (9,180,000 acres). There is a marked development in cotton textile plants, ginning, coal mining, the oil industry, the salt industry.

Tajikistan was raised from an Autonomous Republic in Uzbekstan to a Federal State in October, 1929. Its area is about 100,000 square miles and its population, census of 1926, is 822,600. It is in the extreme south of Central Asia and borders on Afghanistan and China. The Tajiks speak Farsit. The mineral resources of the country are believed to be great. The Soviet authorities have done their utmost to develop Tajikistan, having spent about 90 million rubles up to 1928 and the country's budget has risen to 40 million rubles. The area under cotton in 1929 was about 250,000 acres.

The flag of the U. S. S. R. is red, bearing in the upper left canton a golden sickle and a golden hammer crossed, surmounted by a red star edged with gold. The canton is separated by a gold band from the field.

THE NEW FEDERAL CONSTITUTION.

The All-Russian Central Executive Committee (of 286 members) on July 4, 1923, in Moscow, unanimously approved of a new Federal Constitution for the Union of Socialist Soviet Republics. The committee on July 6, acting as a temporary Federal Parliament, elected Federal Commissars according to its provisions.

The Soviet republics that "united in a Federal state" in the agreement were the Russian Socialist Federated Soviet Republic, which now includes Siberia and the Far Eastern Republic, The Ukraine, White Russia, and the Transcaucasian Federated Socialist Soviet Republic (Azerbaijan, Georgia and Armenia). The constitution was drawn up on the assumption that other states and dependencies will adhere to it and provides that "each federated republic has the right of freely withdrawing from the union." There is no Bill of Rights.

Universal suffrage of all citizens above eighteen years is provided in the Constitutions of the six Constituent Republics, save that employers of labor for profit (except farmers employing labor), persons who do no socially useful work, and members of the clergy may not vote. There is no provision for a direct vote. District Soviet Congresses choose delegates to the Soviet Congress of the Union on a new basis of one delegate for every 25,000 voters in the city Soviets, and for every 125,000 inhabitants in the provincial Soviets.

The supreme organ of authority is the All-Union Congress of Soviets, of upwards of 2,000 members, which meets at least once in two years. It is composed of representatives of town and township Soviets, and of provincial councils of Soviets.

During intervals between the All-Union Congresses supreme authority devolves upon the Central Executive Committee, consisting of the Council of the Union and the Council of Nationalities. The Council of the Union (450 members, originally 371) is elected by the All-Union Congress from representatives of the six constituent republics, in proportion to their population. The Council of Nationalities (139 members) is formed of representatives of the Constituent and Autonomous Republics, 5 delegates from each, and of representatives of autonomous areas, one delegate from each. Members of the Council are elected at the Republican and regional congresses of Soviets.

The Central Executive Committee selects a Presidium of 27 members, to which the powers of the Committee are delegated while the Committee is not in session. The Presidium consists of nine members representing the Presidium of the Council of the Union, nine representing the Presidium of the Council of Nationalists and nine elected by the two Councils in joint session.

The Central Executive Committee selects the members of the Council of People's Commissars which serves as the executive body of the Soviet State, responsible to the Executive Committee and its Presidium. The Council has a chairman and three vice-chairmen, and eight members with portfolios (commissars) as follows: Foreign Affairs, Army and Navy, Transport, Posts and Telegraphs, Trade, Workers' and Peasants' Inspection, Labor and Finance. In addition the Chairman of the Supreme Economic Council and the Director of the Central Statistical Board have seats in the Council. The six Constituent Republics similarly have their Councils of Commissars, reduplicating the Government portfolios of Workers' and Peasants' Inspection, Labor, Finance and Supreme Economic Council, and in addition having Commissariats for Agriculture, Internal Affairs, Justice, Education, Health and Social Welfare.

The Central Executive Committee, which must meet three times a year, issues legal codes, decrees, ordinances and orders, combines the legislative and administrative work of the Union and defines the activities of the Presidium, and of the Council of People's Commissars. It has the right to annul and suspend the decrees, etc., of the Presidium and of the Soviet Congress of the several states, and of other authorities.

All decrees, dispositions, etc., must be published in the six principal languages current in the Federated Republics (Russian, Ukrainian, White Russian, Georgian, Armenian and Turkish-Tartar).

Each participating state has also its own Commissars of Agriculture, the Interior, Justice, Public Education, Sanitation and Social Welfare.

The Supreme Court of the Union, attached to the Central Executive Committee, gives the Supreme Courts in the Constituent Republics guiding interpretations on Federal legislation, and the legislation of the Constituent Republics; decides legal conflicts between Constituent Republics, and examines cases of accusation against high officials of the Union.

Land and natural resources are held in trust by the Government for the general population, and may not be acquired by private title. Every citizen is entitled to secure land for cultivation, the form of tenure being that of perpetual leasehold. Natural resources are exploited by the state trusts, by mixed companies, under concession, in which the state has a participating interest, or by private companies under concession. Such private concessions run for a limited period of years (generally fifteen). The transport system as well as posts, telephones and telegraphs, are operated as Government departments. Industry is conducted largely by state trusts. Private factories employing not over twenty persons may be operated without formality. For enterprises employing from twenty-one to one hundred persons permission of local authorities is necessary, and for larger enterprises a special leasing or concession agreement from the Government is required. Many industrial enterprises are conducted by the cooperatives. Universal military service is incumbent. Non-producers (i.e., persons not engaged in socially useful work) may not vote and are exempt from army service.

The united governmental Political Department of the union is established to "unite the revolutionary efforts of the Federated Republics in the struggle against the political and economic counter-revolutionaries and against espionage and banditry" and to direct the activities of the local organs which will function under a special law.

This new Constitution was ratified with some minor changes by the Second Soviet Congress, January 30, 1924.

The fifth All-Union Congress of Soviets met in May, 1929. There were 1,678 voting delegates and 887 consulting delegates. The delegates included 374 women, of whom 258 were voting delegates. Of voting delegates 1,199 were members of the Communist Party and 164 of the Communists Youth League. More than half of the delegates, or 52%, were industrial workers, 23% were peasants, 25% intellectual workers, including members of the professions. Over two-thirds of the delegates were under forty years, only 5% over fifty. Fifty-eight different nationalities within the Soviet Union were represented in the Congress. The Congress meets biennially.

THE POLITICAL BUREAU.

No mention of the all-powerful Central Committee of the Communist Party appears in the Constitution. This committee, elected, or revised, yearly, numbers fifty-two members, thirty-four substitutes, chooses from its members the Political Bureau, who are the real rulers of Russia.

Members of the Political Bureau of the Communist Party elected December, 1927, were as follows: Bukharin, Voroshilov, Kalinin, Molotlov, Rykov, Stalin, Tomsky, Kuybyshev and Rudzutak. Substitutes—Petrovsky, Uglanov, Andreyev, Kirov, Mikoyan, Kaganovich, Kosior, Chubar. Elections were for two years. The Secretary-General is Joseph Djugashvili Stalin.

The Third (Red Communist) International was founded by Lenin in the Kremlin, March 5, 1919. Bukharin was chairman of the Presidium until removed in August, 1929. No successor was then appointed. It is an international labor organization and supplied the machinery through which Russian Communists kept in touch with Communists of other countries and sent out revolutionary propaganda.

The membership of the Communist Party in the Soviet Union on Oct. 1, 1928, was given as 1,360,489 full members and 397,980 candidates on probation. Oct. 1, 1927 it was 785,298 members and 425,746 candidates.

Normal diplomatic relations have been estab-

lished between the Soviet Union and the following countries: Afghanistan, Arabia, Austria, China, Danzig, Denmark, Esthonia, Finland, France, Germany, Great Britain, Greece, Italy, Japan, Latvia, Lithuania, Mexico, Mongolia, Norway, Persia, Poland, Sweden, Turkey, Uruguay. Great Britain, however, broke off diplomatic relations in May, 1927, following a raid, May 12, on Soviet House, the headquarters of Arcos, Ltd., the trading corporation in London. Negotiations for a resumption of relations were begun in the summer of 1929, and on Sept. 27 the British Foreign Office announced that diplomatic relations would be restored, followed by a settlement of the points in dispute between the two Governments. Czechoslovakia has a trade treaty but no diplomatic relations.

The Administration made known on Sept. 13, 1926, that the attitude of the United States toward the recognition of Russia had not been modified. The status of the Russian debt to the United States as shown by the Treasury ledgers on Aug. 1, 1926, was: Net, $187,729,750; sales of war material, $406,082; obligations on account of relief supplies, furnished under the act of Feb. 25, 1919, $4,465,465. Total net principal, $192,601,297. As of Nov. 15, 1925, unpaid interest due aggregated $68,390,105, bringing the total debt as of that date to $260,991,402. There was also $75,000,000 of bankers' loans overdue and unpaid, and the value of American property confiscated in Russia was estimated as over $400,000,000. Russia is not a member of the League of Nations.

The Soviet Government on August 19, 1928, authorized its representative to sign the Kellogg Pact in Paris and on the same day the Pact was ratified by the Presidium of the Central Executive Committees.

On the initiative of the Soviet Government a protocol was signed in Moscow, Feb. 9, 1929, with representatives of the Governments of Esthonia, Latvia, Poland and Roumania making the Kellogg Pact immediately effective as among the five signatory Governments. All five Governments ratified the protocol, which was also adhered to by Turkey (Feb. 27), Persia (April 3) and Lithunia (April 5).

The Communist Party faced bitter opposition in its ranks at the Fourteenth Party Congress, December, 1925, when Trotzky, Gregory Zinoviev, Leon Kamenev and others bitterly criticized Stalin, Bukharin, Kalinin and their supporters, charging that the latter were leading the party away from communism into capitalism and intensifying the New Economic Policy. The Congress upheld Stalin and the Government bloc headed by Kalinen and Rykov by an overwhelming majority. Trotzky, Kamenev, Sokolnikov and others, after a period of quiet, persisted in their agitation despite the party's decision against them and were eventually removed from their Government positions and finally expelled from the party, as was also Zinoviev. In January, 1928, the leaders of the opposition, some 30 in all, were ordered to leave Moscow to reside in various designated more or less remote points until further notice. Since that time most of Trotzky's associates have composed their differences with the party majority and been restored to responsible positions. The intransigeant Trotzky was exiled from the country in the spring of 1929 and has since been living in Turkey. In the spring of 1929 another smaller schism in the party arose among leaders who opposed the majority plan for the rapid industrialization of the country. Bukharin and Tomsky were mentioned as leaders of this new opposition. After the party decision on the program, Bukharin was relieved of his posts as Chairman of the Presidium of the Third International and as editor of the party organ Pravda, and Tomsky of his position as Chairman of the Central Council of Trade Unions.

Education in the Soviet Union follows the general American plan of being a charge against the Constituent Republics and against local budgets. About two-thirds of the appropriations are local.

Expenditures under both budgets for popular education were $317,200,000 in 1926-27, $425,330,000 in 1927-28, and about $500,000,000 in 1928-29.

Statistics for elementary and secondary schools are as follows:

Year.	Elementary. Schools.	Pupils.	Secondary. Schools.	Pupils.
1913-14	104,600	7,235,988	1,790	563,480
1925-26	101,193	9,437,110	1,640	706,804
1926-27	108,424	9,903,439	1,708	784,871
1927-28	116,373	10,502,964	1,819	805,369

There were 137 universities with 143,100 students in 1927-28, as compared with 124 universities with 160,000 students in 1926-27. In 1927-28 there were 105 workers' faculties with 54,700 students, as compared with 109 workers' faculties with 45,702 students in 1926-27.

An average of about 50,000 schools for adult illiterates have been operated during the past three years. In these about 1,500,000 persons annually have been taught to read and write.

Under the census of 1926-27 the percentage of literacy among males over 7 years was 65.4 and females 36.7. Under the census of 1897, the last general census before the war, the figures were respectively 37.9 and 12.5%.

Military service is compulsory. The Red Army, according to Commissar Voroshilov numbers 562,000 men, including territorial cadres and frontier guards. About 84 per cent. are peasants and 11 per cent. workmen. The budget of 1929-30 carries $438,100,000 for national defense.

Each division contains three infantry regiments and numbers 8,700 if on the frontier, or 6,721 if in the interior, with 48 guns in the first instance and 16 in the latter. The allotment is: Russian, 39 divisions; Turkestan, 4; Georgian, 1; Azerbaijan, 1; Armenian, 1; Far Eastern Republic, 2. There are between 40 and 60 batteries of heavy artillery, and 14 cavalry divisions. Much attention is given to aviation and the corps has (1926) 2,000 good machines. The navy is being built up but is at present inconsiderable, and accurate figures of its strength are not available.

(For the growth of Bolshevik control see The World Almanac for 1925, pages 660-61.)

CHANGES IN POLICIES.

During the past few years there have been certain modifications of internal policy. In 1925 existing restrictions on private trade were ameliorated, the taxes on private enterprises lowered and credit made easier. For a time there was a revival of private trading, but this is now steadily decreasing under the increased competition of the cooperatives. In the retail trade turnover in 1927-28 the cooperatives handled 62.4%, private traders 24.2% and State organizations 13.4%. In wholesale trade most of the business is done by wholesale distributors of the Government trusts and syndicates, with private trade playing a negligible part.

An important decree of April 1925 permitted farmers to employ hired labor the year round under the established regulations on wages, social insurance, etc. During the rush seasons the working day may be increased beyond the legal eight-hour limit for such labor.

In September, 1928, the Soviet Government announced a program of extension and liberalization of the policy of granting concessions to foreigners. The new policy included the importation of construction materials duty free and simplification of the taxing scheme. Fields thrown open for concessionaries included mining, production of machinery, paper pulp, artificial silk, automobiles, tanned leather, fuel, electric plants, timber, cotton and sugar growing, dairying, building construction. Earlier in the month it had been announced that the W. A. Harriman Company was giving up its concession to exploit the manganese fields of Chiaturi, begun in 1925. The steady fall in the world price of manganese had made the venture unprofitable. The concession was taken over by a Soviet trust. The Harriman investment of $3,450,000 in the enterprise was to be repaid in the course of 15 years, with interest at 7%. There were 68 foreign concessions in operation on Feb. 1, 1929 eight held by Americans.

FIVE-YEAR PLAN.

An ambitious five-year plan for economic development in the Soviet Union was finally adopted by the Soviet Congress in May, 1929, after several revisions upward. The plan had been in tentative operation since Oct. 1, 1928, the beginning of the fiscal year 1928-29. The plan as adopted provides for an increase of 133 per cent. in the industrial output during the period and an increase of 55 per cent. in agriculture. The plan provides for total new investments of some $33,300,000,000 during the period, including $8,500,000,000 for industry and $12,000,000,000 for agriculture, with large sums for transport, electrification and housing. Imports for the period are set at $3,200,000,000, mostly machinery and raw materials, and exports about $400,000,000 higher.

Under the plan production of key products in industry, in 1927-28 and 1932-33 respectively, is projected as follows (in metric tons): Coal 35,400,000 and 75,000,000; oil 11,600,000 and 21,700,000; iron ore 5,900,000 and 19,000,000; pig iron 3,300,000 and 10,000,000. Production of electrical energy is scheduled to expand from 5,050 million kwh. in 1927-28 to 22,000 in 1932-33; railway mileage from 77,000 kilometers to 90,000. In agriculture the plans involve a great expansion of highly mechanized state grain farms, some of over 100,000 acres, and of collective farms, so that by the end of the period nearly 20 per cent. of the grain crops will be produced in the "Socialized Sector." State farms will be 15,000,000 acres and collective farms upwards of 50,000,000 acres.

At the close of 1928-29 it was announced that the plan schedule for the year had been exceeded. Industrial production, as compared for the previous year, had increased 24 per cent., as compared with 21.4 per cent. provided under the plan. In agriculture, acreage under both State and collective farms was well above the program, collective farms alone aggregating over 10,500,000 acres.

In connection with the intensive development of industry under the five-year plan, the Council of People's Commissars on Aug. 26, 1929, issued a decree for the installation of an unbroken working week. Under this plan factories will operate 360 days in a year, while labor will operate under a stagger system by which the weekly day of rest will be distributed among the days of the week for various groups. In addition to the weekly rest days there will be five national holidays during the year. This plan, it was stated, had been put in tentative operation in several hundred plants, with a resultant increase of 10 to 20% in weekly production. The general extension of the 7-hour working day is part of the new plan. At the end of 1928-29, thirteen per cent of Soviet industrial workers were on a 7-hour schedule.

The Soviet Academy of Sciences has sponsored an alternative plan for the continuous working week which involves a revision of the calendar. Under this scheme each month would consist of six weeks of five days each, one day out of five being a rest day arranged on the stagger system. In addition there would be five general holidays distributed through the year. The All-Union Council of Trade Unions and the Commissariat for Labor have indorsed the five-day week.

Under the five-year plan hundreds of foreign engineers and technicians are being engaged to contribute to the upbuilding of Soviet industry, under so-called technical assistance contracts. By October 1, 1929, thirty of such contracts had been concluded with American firms, some of which were furnishing as many as thirty-five technical men. The firms included General Electric Company, Ford Motor Company, Radio Corporation of America, Hugh L. Cooper & Co., Freyn Engineering Company.

The five-year plan envisages the completion of three major economic projects. These are: 1—The Dnieprostroy hydroelectric development, the largest hydroelectric plant in Europe, begun in 1927, to cost $115,000,000. 2—The Turkestan-Siberian Railway, 950 miles, begun in 1927, to cost $100,000,000. 3—The Volga-Don Canal, which will give Russia's chief inland waterway a deep-water port on the Black Sea, to cost $85,000,000. In September, 1929, it was reported that the Dnieprostroy construction was proceeding under schedule and the Turkestan-Siberian Railway, then two-thirds completed, would be finished a year ahead of schedule. Construction on the Volga-Don Canal is slated to begin in 1930.

Trade union membership was 11,060,400 in December, 1928, as compared with 10,441,100 at the beginning of that year.

Unemployment on Jan. 1, 1928, was reported as 1,352,000. On Oct. 1, 1928, it was 1,374,000.

Membership in cooperative societies Oct. 1, 1928, was upwards of 38,000,000, as compared with 9,892,900 on Oct. 1, 1924. The cooperatives handled 62.4% of the retail trade in the country in 1927-28 and about 10% of the foreign trade. The trade turnover of the consumers', agricultural and handicraft cooperatives in 1927-28 was $11,093,099,000, as compared with $7,388,000,000 the previous year.

The Consumers' Cooperatives Oct. 1, 1928, included 28,616 societies operating 85,028 stores. Membership was 22,561,000, and the turnover for 1927-28 was $7,499,945, as compared with $5,000,000,000 the previous year. The agricultural Cooperatives represented 128,200 societies with 15,000,000 members. The turnover for 1927-28 was $2,400,414,000, as compared with $1,544,485,000 the previous year. The Handicraft Cooperatives had 11,047 societies with 616,000 members Oct. 1, 1927. Their turnover for 1927-28 was $1,192,740,000.

During the past few years the metric system has been put in general use.

Realizing that prohibition had failed and had brought about the almost universal illicit distilling of strong and bad home brew, the Government on October 4, 1925 authorized the distilling of 40% vodka by the Government monopoly. Production in hectoliters was 1,804,000 in 1926-27, 1,577,000 in 1925-26. It was 4,636,000 in 1913. In 1929 the sale of vodka on Sundays and holidays was forbidden.

RESOURCES OF RUSSIA.

The Russian domains comprehend every phase of climate except the distinctly tropical, and have varied topography. It has vast plains, some virtually desert, some actually or potentially productive; many high mountain ranges, and a distinctive geologic feature is the Russian steppes — broad plains of shifting sandy formation.

In the main, however, Russia proper begins in the centre with a series of low tablelands, and slopes in the direction of the Baltic, Black and Caspian Seas, and toward the White Sea and the Arctic Ocean to the north.

The Ural Mountains form the boundary between Russia proper and the main body of Asia; the Caucasian Mountains are on the southern line, between the Black Sea and the Caspian. Extensive forests occupy much of the central portions, total forest area being about 500,000 square miles.

The rivers are important as actual or potential channels of commerce—the Dneiper and Dniester, flowing into the Black Sea, the Dneiper being part of the proposed trans-European waterway from the Black Sea at Odessa to the Baltic Sea at Danzig; the Volga and Ural flowing into the Caspian Sea; the Neva flowing into the Gulf of Finland; and the Petchora flowing into the Arctic Ocean. There are 42,091 miles of rivers, lakes and canals navigable for steamers.

The areas controlled by Russia comprehend nearly every material natural resource of modern civilization—minerals of all kinds, base and precious; every variety of timber, excepting tropical, every character of cereals, vegetable and fruit lands; being as near to self-contained, economically, as any other power, excepting the British Empire.

Approximately 500,000,000 acres of forested areas are to a large degree potentially agricultural when the timber has been removed. The by and large estimate is that, under development such as has been attained in other civilized countries, Russia would have close to 700,000,000 acres of cultivable lands, or the equivalent of more than 1,000,000 square miles of actually tilled lands, which is more than like areas in the United States.

There are very large mineral resources in the Ural Mountains. Gold and silver are mined there, also salt, zinc and copper. Discovery of rich graphite deposits in Northwestern Siberia was reported in 1925. In 1927 the Geological Committee reported huge deposits of potash in the Solikamsk district of the West Ural region. The supply in a surveyed area of four square miles was estimated at 68,000,000 metric tons. Exploitation was begun in 1928.

Undeveloped hydraulic resources are estimated at 62,380,000 horse power, coal reserves at 475,000,000,000 metric tons, oil reserves 2,883,800,000 metric tons, iron 2,782,000,000 metric tons exclusive of the Kursk anomaly of 26,000,000,000 tons.

What Russia was capable of producing before the war and the Bolshevik revolution was shown in the official statistics of the former empire printed in The World Almanac for 1923.

AGRICULTURE.

During the revolution over 1,080,000,000 acres of and belonging to the landowners were acquired by the peasantry. In addition the peasants seized and distributed among themselves over 48,000,000 acres belonging to the richer strata of the peasantry. In 1922 the People's Commissariat for Food reported that 50 per cent. of the farms having arable lands and meadows, were less than 14.5 acres and 45 per cent. between 14.5 and 35.7 acres.

Upwards of 85% of the people live by agriculture. In the European section from 96% to 99% of the arable land is in the hands of the peasants for use.

The total sown area in 1929 was 117,960,000 hectares, (hectare=2.47 acres), as compared with 112,980,000 hectares in 1928. Area sown to grain was 95,790,000 hectares, as compared with 92,120,000 hectares in 1928. The gross grain crop in 1926, 1927, and 1928, in thousands of metric tons (peasant farms only):

	1926.	1927.	1928.
Rye	23,510	23,994	19,199
Wheat	24,206	20,464	21,316
Barley	5,345	4,408	5,335
Oats	15,100	12,858	15,843
Buckwheat	1,419	1,752	1,661
Millet	2,218	3,312	2,946
Corn	3,266	3,398	3,379
Other grains	1,598	1,532	1,863
Total	76,562	71,718	71,541

Other crops in thousands of metric tons:

	1926.	1927.	1928.
Potatoes	42,969	41,218	39,304
Sugar Beets	6,358	10,097	9,398
Sunflower Seeds	1,545	2,131	2,180
Hemp (fiber)	431	511	489
Hemp (seeds)	529	596	534
Flax (fiber)	315	292	346
Flax (seeds)	536	518	578
Tobacco	157	126	102
Raw cotton	559	718	891

Live stock estimate for 1928 (peasant farms only) was: Horses, 31,978,600, cattle, 66,791,800 sheep and goats 136,190,200, hogs, 25,233,500.

Grain exports for the fiscal year 1927-28 fell to less than 300,000 tons as compared with over 2,500,000 tons the previous year. Before the war they averaged 10,740,000 tons.

Fur exports in 1927-28 were $58,400,000 as compared with $41,400,000 in 1926-27.

The catch of fish in 1927 was 787,900 metric tons as compared with 758,500 tons in 1926. Exports of fish were valued at $6,417,000 in 1927-28 as compared with $3,811,000 the previous year.

PETROLEUM PRODUCTION.

Petroleum deposits constitute one of the most important of the many natural resources of the country. The entire industry is nationalized. Production in the three principal fields, Baku, Grozny and Emba, is organized under three trusts. Marketing is in the hands of the Federal Naphtha Syndicate. During the world war and the revolutionary period much damage was done to the oil properties, and after peace was restored the industry was hampered for a time by inadequacies of equipment and of transport. Widespread adoption of American machinery and drilling methods, and a rapid increase in electrification, have placed the industry on a higher productive basis than before the war.

The Soviet Union stands third among the oil-producing countries. The new pipe line between Grozny and the Black Sea port of Tuapse (391 miles) was completed in November, 1928, and the new Baku-Batum pipe line was nearing completion in 1929. England became the principal country for oil export in 1929, followed by Italy, Germany, Spain and Turkey. Oil production and exports (in metric tons):

	Production.	Exports.
1913	9,215,911	947,700
1926-27	10,184,000	2,038,800
1927-28	11,502,000	2,683,700
1928-29 (preliminary)	13,700,000	3,500,000

Coal production was 41,300,000 metric tons for 1928-29 (preliminary figures), as compared with 35,400,000 in 1927-28 and 30,950,000 in 1926-27.

Iron ore produced in 1928-29 was 7,100,000 metric tons (preliminary), as compared with 5,977,000 in 1927-28 and 4,815,000 in 1926-27. Output of manganese ore was 1,406,000 metric tons in 1928-29 (preliminary). Output of pig iron for 1928-29 was 4,100,000 metric tons (preliminary), as compared with 3,281,000 in 1927-28 and 2,963,000 for 1926-27. Output of steel for 1928-29 was 4,800,000 metric tons (preliminary), as compared with 4,156,000 in 1927-28 and 3,586,000 in 1926-27.

Platinum production in 1927 was 100,000 troy ounces. Gold output in 1926-27 was 23,152 kilograms.

Output of finished cotton cloth in 1928-29 was 2,952 million meters (preliminary), as compared with 2,695 in 1927-28 and 2,343 in 1926-27.

Cement output for 1928-29 was 14,400,000 barrels (preliminary), as compared with 11,900,000 in 1927-28.

Timber exports increased from 351,803 metric tons in 1926-27 to 402,840 metric tons in 1927-28.

The total output of industry in 1928-29 was estimated at 160 per cent. of that of 1913, the increase for the year being 24 per cent.

STATE INDUSTRY.

About 90 per cent. of the industrial output comes from the system of State Trusts. Net profits of the large-scale State industry have averaged upwards of $300,000,000 for the past three years. Expenditures for capital improvements (not including electrification) for 1928-29 were $855,440,750, as compared with $650,700,000 in 1927-28. The funds were derived from profits, depreciation account and Government budget appropriations. The wholesale price index, with prices of 1913 taken as 100, was 178.1 for the nine months ending June 30, 1929, as compared with 170.8 for the same period of the previous year. The figures for the retail price index for the same periods were respectively 207 and 196.

Average number of workers employed in large-scale State industry for the first nine months of 1928-29 were 2,309,000 as compared with 2,150,000 for the same period of the previous year.

The major industries are combined in syndicates (Textile Syndicate, Oil Syndicate, etc.) of federal scope for development and marketing. Each syndicate is a combination of operating trusts. The division into trusts is according to geographical or other economic reason. Virtually all the larger syndicates operate under the general control of the Supreme Economic Council. The managing boards of the syndicates and trusts are held responsible by the Council for profitable operation, efficiency and quality of output.

Total railway mileage at the close of 1927-28 was 47,941 miles, as compared with 47,320 miles at the close of 1926-27 and 42,500 miles before the revolution. Operating revenues for 1927-28 were $887,305,800, net profits from operation $188,944,700, as compared with $117,317,000 the previous year. Average daily freight car loadings for the first nine months of 1928-29 were 35,208, as compared with 30,675 for the same period of the previous year. Air transportation in 1928 embraced 11,981 kilometers of lines in regular operation.

Electrical power plants in 1927-28 had a capacity of 2,130,000 kilowatts as compared with 1,690,000 kilowatts the previous year. Power output in 1928-29 was 6,500,000,000 kwh. as compared with 5,000,000,000 kwh. in 1927-28 and 4,112,000,000 in 1926-27. A total of $180 000,000 was spent for electrification in 1928-29, including $100,000,000 by the federal Government on super-power development.

A fifty-year concession to the Lena goldfields of Siberia, estimated to contain $100,000,000 of gold, was granted to an Anglo-American company, the British Lena Goldfield Corporation, on Aug. 12, 1925. The minimum output of gold for five years is put at 14,428 pounds. Copper, zinc and lead are by-products.

Direct taxes are imposed in the form of a single agricultural tax, a trading tax, a realty tax, and taxes on incomes and assessments. Indirect taxes consist of excise taxes and customs duties. Excise taxes are levied on sugar, tobacco, textile products, fermented and distilled spirits, oil products, salt, tea and coffee, matches, yeast. The Soviet Union has a moderate system of tariff duties on imports, supplemented by duties on a limited number of exports. There are separate schedules for the European and Asiatic frontiers. Import taxes on all luxuries are very high.

A new single tax on the land, levied on a sliding scale, depending on how much land is farmed, the yield of crops, etc., was put in effect in May, 1924. It yielded $181,609,500 in 1926-27 and $179,884,800 in 1927-28. Next in importance as yielders of revenue are the trading tax, income and property tax, excise and local taxes, in that order. Income taxes collected in 1927-28 aggregated $118,748,700.

THE BUDGET.

In a country where State economic enterprises play a dominant role, the growth of the federal budget is regarded as an important gauge of economic progress. The first "firm" budget, that of 1923-24, balanced at 1,460,000,000 rubles; that of 1928-29 at 7,640,600,000 rubles, and the preliminary draft fixed the budget for 1929-30 at 9,497,200,000 rubles ($4,891,058,000). The budget for 1913 was 3,605,000,000 rubles. The budget for 1923-24 was the first post-revolutionary budget to be balanced. Since that year each budget has produced a surplus of revenues over expenditures.

Receipts in classified form in budgets of the past three years (1928-29 is estimated), in thousands of rubles (par value one ruble equals $0.5146) are:

	1926-27.	1927-28.	1928-29.
Taxes and Excise..	2,477,400	3,255,900	3,836,600
State Properties and Establishments...	602,100	803,900	906,000
Transport and Communications..	1,712,100	1,984,900	2,098,000
Credit Operations and other.....	409,700	726,400	800,000
	5,201,300	6,761,100	7,640,600

Actual receipts for 1928-29 were provisionally estimated at 7,925,000,000 rubles.

Annual receipts and expenditures, in millions of rubles (figures for 1928-29 are preliminary):

	1925-26.	1926-27.	1927-28.	1928-29.
Receipts.....	3,948.0	5,201.3	6,761.1	7,925.0
Expenditures.....	3,867.8	5,151.3	6,588.9	7,755.6

Expenditures for the past two years (figures for 1928-29 are preliminary), in thousands of rubles:

Departments and Institutions (including army and navy).	1,773,900	1,979,600
Financing National Economy.	1,327,400	1,960,100
Service on Loans.....	299,000	293,000
Subventions to local budgets..	836,000	999 800
Transport and communications	2,241,500	2,455,600
Other.....	111,100	67,500
	6,588,900	7,755,600

The total internal debt as of July 1, 1929, was 2,101,400,000 rubles ($1,083,221,000). On October 1, 1928 it was 1,422,100,000 rubles and on October 1, 1927, it was 933,700,000 rubles. During 1927-28 bonds sold amounted to 1,018,000,000 rubles, bonds refunded to 531,400,000 rubles.

Negotiations were resumed in 1927 with France regarding the adjustment of the Czarist pre-war debt, amounting April 30, 1926, to 6,738 million pre-war gold francs. No settlement has been reached.

The State Bank on Oct. 1, 1929, reported a note issue of 1,460,279,950 rubles, with a cover of gold, platinum and foreign currency of 369,189,340. The corresponding figures for Oct. 1, 1928 were: note issue 1,058,621,050 rubles, cover 259,584,930 rubles. Total resources of the State Bank as of July 21, 1929, were 4,891,631,000 rubles. Since June 15, 1927, the bank's capital has been 250,000,000 rubles.

The Government monopoly of foreign trade was firmly maintained during the year. It is controlled through the Commissariat for Trade and Commerce and conducted by agencies of the Commissariat, of the trading bureaus of the six constituent Republics, by the Consumers' Co-operatives, by trading agencies of some of the large industrial syndicates, by a few mixed companies operating under license in which the Government holds a participating interest (generally 50 per cent.), and by a few foreign firms operating under special agreement.

The Soviet Government has been exercising a rigid control over imports, and any one desirous of purchasing goods in that country or selling goods to it must deal with the proper Soviet institution, either directly or in the last instance.

FOREIGN TRADE.

The principal countries taking Soviet exports in 1927-28 were: Germany 24.0%, England 19.5%, Latvia 10.3%, Persia 9.2%, France 5.2%. The principal countries furnishing Soviet imports were: Germany 26.3%, United States 19.9%, Persia 6.6%, Argentina 5.1%, England 5.0%.

For the Soviet fiscal year 1928-29 ending Sept. 30, the Soviet trading organizations in the United States reported purchases of $109,000,000 for shipment to the Soviet Union and sales of Soviet products in the United States of $40,000,000. For the previous year the figures were respectively $91,230,000 and $22,000,000. The principal purchases here included cotton, agricultural machinery and industrial and electrical equipment. In 1913 the total of Russian-American trade was $48,000,000.

The foreign trade turnover for recent years:

Year (Fisc.)	Exports.	Imports.	Total.
1924-25	$296,125,000	$370,800,000	$666,925,000
1925-26	348,449,000	389,546,000	737,995,000
1926-27	396,807,500	366,989,000	763,796,500
1927-28	398,554,000	486,523,000	885,087,000
1928-29 (9 mos.)	321,051,000	308,021,500	629,072,500

Foreign trade turnover in 1913 was $1,490,495,000.

Trade for 1927-28 was divided as follows:

	Exports.	Imports.
European frontiers	$327,458,000	$422,344,000
Asiatic frontiers	71,106,000	64,179,000
Total	$398,564,000	$486,523,000

Trade with the United States for all Soviet Russia both in Europe and Asia was:

Cal. Year.	Imports.	Exports.
1922	$28,814,025	$522,877
1923	7,308,389	1,481,699
1924	41,948,578	8,030,465
1925	68,906,060	13,236,673
1926	49,905,642	14,121,992
1927	64,921,693	12,876,790
1928	74,091,235	14,023,189

EL SALVADOR, REPUBLIC OF

AREA, 13,173 square miles.

POPULATION, estimated Jan. 1, 1928, 1,688,129.

CAPITAL, San Salvador, population 85,300. Other cities: Santa Ana, 60,679; San Miguel, 30,406.

President, Dr. Pio Romero Bosque, 1927-31, inaugurated, March 1, 1927.

Premier, Dr. Reyes Arrieta Rossi (Foreign).

El Salvador lies along the Pacific Ocean with Honduras as its northeast boundary, and Guatemala on the northwest. Its coast line is 160 miles long and its average breadth 60 miles. It is about the size of the State of New Jersey. Along the sea is a narrow, low alluvial plain, and the interior is a plateau about 2,000 feet above sea level, containing a number of volcanic cones. Earthquakes are frequent; that of June 8, 1917, destroyed much of the capital and three other towns; even greater damage was done to the capital on April 28, 1919. It has luxuriant forests and abundant mineral deposits, which are undeveloped. Mestizos and Indians form two-thirds of the population.

El Salvador is a one-crop country. Its prosperity depends on coffee which is grown on about 150,000 acres. The product in 1928-29 was 86,335,000 pounds; in 1927-28, 120,125,000; in 1926-27, 78,275,000; and in 1925-26, 110,360,000. Sugar exported was 9,720 metric tons in 1928 and 7,744 in 1927.

Tobacco, indigo, henequen, lumber, rice, balsam and hides are also exported.

Under the Constitution of 1924, modified last in 1886, a President for four years and single chamber of 70 deputies for a year are elected by universal suffrage. The President appoints a ministry of four members. The dominant religion is Roman Catholic.

The army numbers 3,000 with reserves of 25,000.

There are 349 miles of narrow gauge railroads.

The government is carrying on an intensive campaign to reduce illiteracy. In 1926 there were 847 schools with 1,555 teachers and 52,000 pupils. Education is free and compulsory.

A three-power agreement pledging the Governments of El Salvador, Guatemala and Honduras to a common policy in matters of general concern in Central America was signed in May, 1927.

The colon (=50 cents) is the unit of currency.

In 1927, 7,684 steamers, tonnage, 13,525,071, entered its ports.

Of a well planned system of arterial surfaced highways totaling 1,000 miles, 684 were completed in 1928.

Recent budgets, (in colones), were:

Year.	Revenues.	Expenditures.
1925	20,320,309	20,271,674
1926	22,314,798	21,922,930
1927	20,514,491	21,799,526
1928	25,546,291	25,367,254
1929-30	25,490,000	25,755,398

The public debt Dec. 31, 1927 was: External, 43,058,538 colones; internal, 1,161,161 colones; floating, 4,292,003 colones; total, 48,511,702 colones.

Imports and exports were:

Year.	Imports.	Exports.
1922	$7,639,296	$16,213,807
1923	8,771,000	17,057,877
1924	11,175,000	24,367,500
1925	19,383,000	16,885,000
1926	26,035,000	24,636,000
1927	14,864,384	14,152,164
1928	19,188,643	24,463,860

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$4,850,781	$2,618,716
1923	5,214,250	4,523,663
1924	6,491,955	3,912,310
1925	9,193,916	2,323,424
1926	9,556,521	4,237,149
1927	6,869,147	1,545,353
1928	7,617,353	3,205,768

SAN MARINO, REPUBLIC OF

AREA, 38 square miles.

POPULATION, census of 1928, 13,013.

San Marino, situated in the Apennines near Rimini, in the heart of Italy, claims to be the oldest state in Europe and to have been founded in the fourth century. Its treaty of friendship with the Kingdom of Italy, concluded June 28, 1907, was revised in 1921. It has an extradition treaty with the United States and other countries. Agriculture and stock raising are practically the only industries. It is governed by a Great Council of 60 members elected by popular vote, two of whom are chosen to exercise executive power for a term of six months. It maintains a military force of 39 officers and 950 men. Revenue and expenditures for 1927-28 balanced at 4,053,072 lire, and that for 1926-27 balanced at 4,145,179 lire. There is no debt.

SIAM, KINGDOM OF

AREA, 200,148 square miles, of which about 45,000 is in the Malay Peninsula.

POPULATION, census of 1919-20, 9,207,355. Official estimate, 1926, 9,831,000.

CAPITAL, Bangkok, population, 1923, 745,640.

King, Praja Dhipok, born Nov. 8, 1893, succeeded on the death of his brother Rama VI., on Nov. 26, 1925.

Foreign Minister, Prince Dewawongse.

Siam is situated in Southeastern Asia, with Burma (British India) on the northwest and west and French Indo-China on the northeast and east, and the Gulf of Siam, which is part of the China Sea, on the south and east. It also occupies the neck of the Malay Peninsula as far as the Federated Malay States (British). It is of rolling topography, with large areas susceptible to irrigation, of which about 250,000 acres have been under water since 1922.

Bangkok, the capital, in the delta of the Menam, is a convenient modern city, drained and cleaned, well lighted and beautified with spacious parks.

There are many large forests, teakwood being an important article of export. Labor is higher than in almost any other Oriental country.

The chief product is rice, the national food, and heavily exported. The yield in 1928-29 was 2,618,000 metric tons from 4,187,000 acres; and in 1927-28, it was 3,153,500 tons from 4,266,000 acres. In 1927-28, 1,706,587 metric tons valued at 201,156,349 bahts was exported; and in 1926-27, 1,297,592 tons valued at 165,226,234 bahts.

The livestock census of March 31, 1927, returned 4,128,000 cattle; 4,366,000 buffaloes; 8,800 domesticated elephants and 265,000 horses.

Teakwood exports in 1927-28 amounted to 70,231 metric tons valued at 9,947,249 bahts (59,339 tons in 1926-27 valued at 8,218,583 bahts).

Mineral resources are extensive and include coal, iron, manganese, tungsten, antimony and quicksilver; the export of tin and tin ore in 1927-28 was 10,844 metric tons valued at 22,423,979 bahts (10,140 tons valued at 22,839,806 bahts in 1926-27).

In 1927-28, 1,183 vessels of 1,277,485 tonnage entered the port of Bangkok. There were in 1927, 1,701 miles of railways and 211 miles under construction, the southern line gives through traffic via Padang Besar to Singapore, 1,188 miles away.

Executive power vests in the King. The new King, who was educated in England, restored the Supreme Council of State, composed of five princes of government experience, to be advisory to the Sovereign and to co-ordinate the work of the various ministries. There is a Legislative Council of Ministers and others, appointed by the King. Present membership is forty. It supervises the legislation of the Kingdom, being charged with the task of perfecting the statutes. Laws must be signed by the King.

Siam attained full legal equality among the nations on March 25, 1927, when the last of the consular courts was closed, and two days later a new customs tariff, controlled no longer by treaty limitations, went into effect.

Buddhism is the prevailing religion. In 1926 there were 16,185 temples, with 129,206 priests. Schools are controlled by the Minister of Education, excepting those for military, naval, and legal training, and some which are under royal patronage. In 1925 there were 343 Government schools, with 1,958 teachers and 47,268 pupils; 4,707 local schools, with 9,872 teachers and 527,603 pupils; and 573 private schools, with 1,446 teachers and 27,435 pupils. About 11 per cent. of the people were literate in the last census.

Every able-bodied man serves in the army. The navy has 5,000 active and 20,000 reserve men. In 1920 there were over 15,000 Boy Scouts. Siam is a member of the League of Nations.

The baht (called the tical until 1928) is the unit of currency and equals 44.24 cents at par; rate of exchange 1926 was 44.78; 1927, 43.0; 1928, approximately par.

Recent budgets in bahts were:

Year (fiscal, Mar. 31.)	Revenues.	Expenditures.
1924-25 (actual)	91,960,236	96,452,497
1925-26 (actual)	92,712,662	94,651,651
1926-27 (actual)	100,590,765	100,551,546
1927-28 (estimate)	100,550,416	100,016,132
1928-29 (estimate)	100,627,805	99,981,836

Capital expenditures incurred for 33 years up to March 31, 1927, were: Railways, 147,201,188 bahts; irrigation, 23,964,854; Bangkok water works, 4,969,189 bahts; mining research, 606,525, bahts; other items, 8,439,459 bahts; total, 185,181,215 bahts. Estimated capital expenditures for 1927-28 amounted to 7,807,678 bahts; and for 1928-29 to 7,801,300 bahts.

The public debt on March 31, 1929 was 11,639,640. Note circulation July 31, 1929 was 131 million bahts with a silver reserve of 52 million bahts and foreign assets of 7.9 million bahts.

Foreign trade through the port of Bangkok which handles over 85% of the trade, in bahts, was:

Year (fisc.)	Imports.	Exports.
1924-25	153,006,580	158,167,555
1925-26	161,244,004	187,486,612
1926-27	196,520,429	276,269,963
1927-28	201,080,535	276,269,363

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$871,196	$141,794
1923	798,541	222,028
1924	925,368	306,800
1925	1,444,122	769,652
1926	1,852,088	633,324
1927	1,940,055	570,092
1928	2,637,733	254,013

THE ANGLO-EGYPTIAN SOUDAN

(Condominium.)

AREA, 1,014,600 square miles.

POPULATION, estimated, 1923, 5,852,729.

CAPITAL, Khartoum, including Khartoum North, on the Blue Nile; population, 1923, 32,211. Below on the White Nile, Omdurman, the old Dervish capital, population, 78,732.

Governor General, Sir John L. Maffey, K. C. V. O.

The Soudan is bounded by Libya and Egypt on the north, the line being the 22° north latitude; the Red Sea and Eritrea (Italian) and Abyssinia on the east Uganda (British) and the Belgian Congo on the south, and French Equatorial Africa on the west. Its greatest length north and south is 1,650 miles, and its greatest breadth east and west is about 1,200 miles. The northern zone consists of the Libyan desert, on the west, and the mountainous Arabian desert, extending to the Red Sea on the east, separated by the narrow valley of the Nile; the central zone has large areas of fertility, including the rainlands of Kassala and Tokar, the Gezira plain and the pastures and gum forests of Kordofan; and the southern equatorial belt where the soil is richest and watered by tropical rains.

The White Nile flows north through the middle of the country; the Blue Nile, rising in the mountains of Abyssinia, flows northwest to its junction at Khartoum with the White Nile to make the Nile that flows on in a huge S curve to enter Egypt at Wadi Halfa.

The Sennar Dam, at Makwar, 170 miles south of Khartoum, was opened officially by Lord Lloyd, Jan. 21, 1926, with its canalization of 300,000 acres of the plain. The dam impounds the water of the Blue Nile, for irrigation of the Gezira country between the rivers. Another dam is under construction at Gebel Aulia in the White Nile, 24 miles south of Khartoum. These will hold double the quantity of water stored by the Aswan Dam for the benefit of Egypt.

The amount of land-producing cotton in 1925 was 87,475 acres; and in 1927, 218,546 acres. The crop for 1927-28 was 17,578 tons of lint and 40,000 tons of cotton seed; in 1926-27, 28,370 tons of lint and 54,900 tons of cotton seed. The export of cotton in 1928 was 23,486 tons, valued at £E3,589,480; and in 1927, 28,891 tons, valued at £E3,190,289; and of cotton seed in 1928, 47,960 tons, valued at £E398,484; and in 1927, 57,847 tons valued at £E359,415.

The new Kassala railway (217 miles) opens up a new region. It is expected the Gash Delta, when fully developed, will produce a minimum of 100,000 bales of good Egyptian cotton yearly.

The population, which was estimated at 9,000,000 in 1884, decreased to 2,000,000 under Dervish misrule through war, famine and disease. The inhabitants are partly Arabs, partly Negroes and partly Nubians of mixed Arab and Negro blood; the Arabs and Nubians are all Mohammedans. The Mahdist rebellion in 1884, culminating in the fall of Khartoum and the death of Gen. Gordon Jan. 26, 1885, forced the Egyptian Government to withdraw from the Soudan, retaining only Wadi Halfa on the Nile and Suakin on the Red Sea as frontier ports. The Dervishes were overthrown by Lord Kitchener with the Anglo-Egyptian army at Omdurman, Sept. 2, 1898. On the reconquest of the Soudan an agreement was signed Jan. 19, 1899, between Egypt and Great Britain, which fixed the boundary, provided for the administration of the territory by a Governor General appointed by Egypt with the consent of Great Britain (aided since 1910 by a council) who should make laws by proclamation, and providing that the British and Egyptian flags should fly together. Free trade with Egypt was provided for also and the import and export of slaves was forbidden, together with the import of arms, ammunition and spirits. The civil and criminal codes are based on those of Egypt and India.

While Egypt claims the Soudan as an integral part, the British Government has officially announced as a fixed policy that Great Britain will never abandon the Soudan nor tolerate any attempt to disturb the administration.

The country has prospered under the Anglo-Egyptian rule, though suffering agriculturally during seasons of low water in the Nile and by depression consequent on the past years of the war when the exports of grain and cattle almost entirely ceased. Cotton can be grown successfully with increased irrigation and transportation facilities. Rich forests are of great extent and the Soudan is the chief source of the world's supply of gum arabic, the exports being 22,425 tons, valued at £E1,006,625 in 1923; 18,956 tons in 1925, valued at £E791,931; 22,744 tons in 1926 valued at £E844,198; 21,239 tons in 1927 valued at £E680,887; 22,777 tons in 1928 valued at £E724,468. Of ivory, 45 tons, valued at £E78,819, were exported in 1920; 38 tons, £E32,000, in 1921; 56 tons, £E63,308, in 1922; 41 tons, £E56,112, in 1923; 32 tons, £E47,808, in 1924; and 43 tons, £E69,849 in 1925.

The Soudan railroad reached Khartoum in 1899.

A line from Atbara across the Arabian desert to Port Soudan and Suakin on the Red Sea was opened in 1906. A bridge has been built over the Blue Nile at Khartoum and another over the White Nile near Hillet Abbas. The total length of railroads Jan. 1, 1929, was 1,852 miles.

A fleet of Government passenger and freight steamers is maintained on the Nile and its tributaries with a scheduled service covering over 2,500 miles. In 1928, 922 vessels entered Port Soudan.

The unit of currency is the Egyptian pound, £E1=$4.943 at par of exchange; rate of exchange, in 1924, $4.53; and in 1925, $4.95.

The budgets for six years are:

Year.	Rev.	Exp.
1922	£E3,498,595	£E3,496,999
1923	3,766,133	3,392,470
1924	4,298,856	3,453,273
1925	4,833,640	4,410,519
1926	5,857,988	5,482,388
1927	5,929,945	5,550,493
1928	6,646,833	6,045,286
1929	6,451,000	6,451,000

The reserve fund on Jan. 1, 1929 was £E592,939.

The funded debt Jan. 1, 1926, was £12,514,412 all for public works, the Sennar dam and canalization alone requiring about £10,000,000.

The foreign trade, in dollars, was:

Year.	Imports.	Exports.
1922	$19,308,120	$9,050,199
1923	21,897,628	12,016,206
1924	25,638,720	16,872,230
1925	26,190,000	19,005,000
1926	27,872,000	24,381,180
1927	30,425,717	24,497,953
1928	32,315,000	28,175,000

Trade with the United States, the chief item of export being gum arabic, was:

Year.	Imports.	Exports.
1922	$481,122	$797,619
1923	446,526	1,431,472
1924	363,591	987,187
1925	326,339	1,215,374
1926	229,088	1,455,282
1926	594,072	1,156,519

SPAIN, KINGDOM OF

AREA, Continental Spain, 190,050 square miles; including the Balearic and the Canary Islands, 194,783 square miles; Spanish Colonies in Africa, including Spanish Morocco, 140,000 total, 334,783.

POPULATION, census of Dec. 31, 1923 (including the Balearic Islands, 338,894; and the Canary Islands, 473,497), 21,763,147; (estimated Dec. 31, 1925, 22,127,700). Colonies, estimated, 980,000; total, 22,743,147.

CAPITAL, Madrid; population, census of Dec. 31, 1923, 813,991; other cities, Barcelona, 760,572; Valencia, 256,263; Seville, 226,969; Malaga, 159,535; Zaragoza, 153,570; Murcia, 146,517; Bilbao, 120,369; Granada, 103,783; and twenty-seven others larger than 30,000.

King, Alfonso XIII.; born May 17, 1886, after the death of his father, King Alfonso XII.; succeeding on birth; married May 31, 1906, Princess Victoria Eugenie, daughter of Prince Henry of Battenberg and Princess Beatrice, youngest daughter of Queen Victoria of Great Britain; *Heir*, his eldest son, Prince Alfonso, born May 10, 1907. There are three other sons and two daughters.

Premier, Gen. Miguel Primo de Rivera, Marquis d'Estella; assumed control Sept. 13, 1923, as head of the military directorate; made Premier on restoration of civil government, Dec. 3, 1925. He took Foreign portfolio Nov. 5, 1928.

Spain is bounded on the west by Portugal and the Atlantic Ocean, on the north by the Atlantic and by France, on the east and south by the Mediterranean Sea, the British fortified station Gibraltar being at the southernmost tip, guarding the entrance to the Mediterranean from the Atlantic. The Balearic Islands in the Mediterranean (capital, Palma; area, 1,935 square miles; population, 338,894) and the Canary Islands (area, 2,807 square miles; population, 473,497), in the Atlantic, are provinces of Spain; Ceuta, a fortified post in Africa, opposite Gibraltar (area, 5 square miles; population, 34,708), is part of the Province of Cadiz.

Spain occupies the entire Iberian peninsula with the exception of Portugal. The lofty Pyrenees separate it from France. The interior is a high inclosed plateau traversed east and west by mountain ranges and deficient in rainfall. However, 88.45 per cent. of the soil is regarded as productive or potentially so, crops and fruit being gathered from more than one-third of the productive area, and a quarter of it is given over to grazing.

The national wealth is estimated (1925) by the Banco Urquijo at 218,150 million pesetas (approximately $31,000,000,000 at current exchange) and the annual income at 24,293 million pesetas. Agriculture has first place in income, the annual yield of the cereal and vegetable crops being valued at 4,501 million pesetas; root crops at 830 million; vines at 792 million; olives at 648 million; pasture at 644 million; fruit trees at 446 million; and hay and fodder at 437 million.

The land is largely held by small proprietors. Of the 3,426,083 paying land taxes the large estates number 277,188. About 10,770,000 acres are planted to wheat, the product in 1927 being 3,941,518 metric tons; about 9,000,000 acres were given to other cereals; 3,412,310 acres of vineyards in 1927 produced 4,611,729 metric tons of grapes, yielding 28,325,192 hectolitres of wine.

Spain leads as a producer of olives. The yield from 4,127,130 acres in 1927 was 3,516,582 metric tons of olives and 6,656,388 hectolitres of oil. Oranges and nuts are largely exported; also exports flax, hemp and pulse.

Silk culture is carried on in Valencia, Murcia and other localities. There are seventy sugar factories, 1927 production 219,235 metric tons.

Domestic animals in 1926 numbered 697,678 horses; 1,286,360 mules; 1,077,377 asses; 3,794,029 cattle; 20,067,200 sheep, 4,749,463 goats; 5,267,328 pigs and 3,923 camels (in the Canary Islands). The investment in stock raising is 10,119 million pesetas, with an annual income of 1,214 million.

Spain has large mineral wealth. Iron abounds with coal, lead, copper, asphalt, tin, wolfram, manganese, quicksilver, silver, sulphate of soda, salt, sulphur, and phosphorus. Platinum has lately been discovered. Mining industries employed in 1926, 136,408 men, 3,774 women and 18,684 boys and girls under eighteen years of age.

The 1926 metal output was valued at 918,979,850 pesetas (896,020,150 in 1925), and the ore output at 475,598,411 pesetas.

Coal production in 1928 was 6,534,872 metric tons (6,992,540 in 1927); anthracite production in 1927 was 429,896 metric tons; iron ore, 4,971,705 tons; copper ore, 3,983,853 tons; lead ore, 195,626 tons; zinc ore, 132,178 tons; sulphur, 75,830 tons, quicksilver ore, 51,353 tons; and manganese, 36,871 tons.

Cotton and woolen goods for domestic use are manufactured to a considerable amount, the normal employment of cotton spindles being 2,614,000, and woolen spindles, 662,000. The Government encourages cotton cultivation. Industries represent a total capital value of 48,247 million pesetas and give an annual return of 7,237 million.

Fisheries in 1921 employed 17,875 boats and 130,000 men, the catch being valued at 344,438,920 pesetas, the most important products being sardines, tuna fish and cod.

Railway mileage in 1927 was 10,010, privately owned, but subsidized by the Government. The state has agreed to furnish needed new capital as a co-partner to regroup the railways and ultimately to nationalize them on a valuation based on the earnings of each company for the past fifteen years, capitalized at 4¼ per cent. The great majority of the companies have assented.

The Government has begun the building, or rebuilding, of 6,287 kilometres of highway during the next ten years.

The merchant marine July 1, 1929 was composed of 697 steamships of 1,058,245 gross tons, and 85 motor ships of 78,081 gross tons. Bilbao and Barcelona are the principal ports. In 1926 vessels entering numbered 18,820 of 24,804,418 tonnage.

The Government by decree on Aug. 20, 1925, has provided an annual subsidy of 10,000,000 pesetas for the shipping industry, and of 8,000,000 pesetas for shipbuilding.

Conservatively estimated, Spain has available undeveloped hydro-electric sites capable of developing 2,000,000 horsepower. Existing plants have a capacity for 858,422 horsepower (1929).

Spain was once overrun by the Moors, who swept across the Mediterranean and went even into France. They were expelled from Europe in 1609, having entered Europe in 711, and for those centuries dominated that part of the European continent, leaving many marks in customs and habits impressed to this day on the Spanish people. However, the language remains in general Castilian, with variations in each separate region. Spain's colonial period was brilliant and extended to the Americas and the Philippines. She lost Mexico and her Central and South American colonies by revolution a hundred years ago, and in 1898 Cuba secured her independence, and she lost the Philippines, Guam and Porto Rico to the United States as a result of the Spanish-American War. Now her colonial possessions are confined to Morocco

in North Africa, Spanish Guinea and a few islands along the Guinean coast. In the north there are 400,000 Basques, of a distinctly different race and language; and there are 50,000 gypsies.

The Government is that of a constitutional monarchy, the Constitution dating from 1876. It provides for a sovereign and the Cortes, composed of two Houses, the Senate and the Congress, equal in authority, 360 Senators and 417 Deputies in the Congress. The last twenty years have seen a very marked tendency toward democracy, numerous disturbances having occurred, with Socialists as the moving force. The country had twenty Premiers in six years, and only one budget was approved by Parliament. Reverses in Morocco roused Spain.

Leading officers of the army, headed by Gen. Primo de Rivera, then Governor-General of Barcelona, rose against the government of Premier Alhucemas on Sept. 13, 1923. The revolt spread without bloodshed throughout the country. King Alfonso refused to support the cabinet, which fell, and obnoxious ministers hurried into exile. King Alfonso called on Gen. Primo de Rivera to form a cabinet and dissolved the Cortes, leaving him president of a military directorate charged with the government of the state and whose decrees would have the force of laws. The country was under martial law from Sept. 15, 1923 till May 17, 1925, and again from Sept. 5, 1926 to Jan. 1, 1927. The military directorate resigned Dec. 5, 1925, and Gen. Primo de Rivera was immediately appointed Premier with a new cabinet called civilian because it had some ministers who were not army men. The dictatorship remained and the King by decree gave full legal status to all acts signed henceforth by the new government.

The National Assembly was summoned on a selective basis, and only in an advisory capacity, and met on Oct. 10, 1927.

The draft of a new constitution was submitted by the government on July 5, 1929 to the National Assembly for study and examination. It proposed to curtail the power of the Certes and strengthen that of the King and the government. It met bitter opposition from Labor.

Suffrage has been granted to women householders; the voting age has been reduced to 23 years for both men and women.

The Roman Catholic is the national religion, all the people adhering excepting about 30,000 (Protestants, 7,000; Jews, 4,000). The Constitution requires state support of the church. In 1928 the state expended 62,900,000 pesetas.

There is a heavy percentage of illiteracy—in 1900, 64; in 1910, 59, and in 1920, 45—showing steady improvement. Although there has been a compulsory education law since 1857, it has not been rigidly enforced. There were, in 1926, 3,098,840 pupils in the public schools, with about 63,100 in secondary institutions. Spain has 11 universities, attended by 31,500 students. Budget for education in 1929 was 172,200,000 pesetas.

In 1923, 93,246 emigrated, including 42,000 farmers, who went to Cuba and Argentina. In 1926, the number was 80,739, and in 1927, 76,883, while each year half a million Spaniards were working in France. About 542,000,000 pesetas are remitted to Spain yearly by Spaniards domiciled abroad.

Military service is compulsory, the peace establishment being set at about 185,000, with reserves in addition. Many far-reaching reforms have been made by the Directorate.

The navy has nine vessels of from 2,134 to 15,700 tons and 51 auxiliaries. A building programme for six years from 1915 called for 59 additional vessels, but the work was delayed.

Spain was neutral in the Great War and was a member of the League of Nations, but resigned on Sept. 11, 1926, because she was refused a permanent seat on the Council. The resignation was reconsidered in 1928.

The unit of currency is the peseta, its gold par being 19.3 cents; average of exchange in 1926, 14.9 cents; in 1927, 17.06 cents; in 1928, 16.5 cents. The rate on Oct. 15, 1929 was 14.85 cents.

The Spanish Government on June 30, 1928, when the peseta reached its lowest point for the year, 16.28 cents, by royal decree was authorized to intervene in the international exchange market to control the quotation of the peseta and prevent speculation. A committee headed by the Minister of Finance was put in charge with a fund of 500,000,000 pesetas in gold and gold credits at its disposal. On Aug. 6, J. P. Morgan & Co., announced that American bankers had arranged a private banking credit (reported to be $25,000,000) for the Bank of Spain in connection with these plans; a private credit of a similar amount was arranged also by the Midland Bank of England.

The consolidated debt on March 31, 1929 was officially given as 19,272.7 million pesetas, (about $2,918,400,000).

Note circulation of the Bank of Spain July 31, 1929 was 4,289 million pesetas, with a gold reserve of 2,563 million pesetas and a silver reserve of 720 million pesetas and a balance abroad of 96 million pesetas.

A new agricultural credit bank, capitalized at 100,000,000 pesetas, was put in operation in April, 1925, by the Government. The Exterior Bank of Spain with a capital of 150,000,000 pesetas was established in Aug. 1928.

Recent budgets in pesetas are:

Year.	Revenues.	Expenditures.
1924 (actual)	2,862,700,000	3,612,100,000
1925 (actual)	2,822,800,000	3,315,300,000
1926 (actual)	2,967,200,000	3,746,400,000
1927 (actual)	3,218,200,000	3,544,700,000
1928 (actual)	3,522,300,000	3,784,500,000
1929 (proposed)	3,329,800,000	3,524,300,000

Extraordinary expenditures largely of a capital nature for 10 years from Jan. 1, 1927 are budgeted at 3,538,900,000 pesetas.

Imports and exports were:

Year.	Imports.	Exports.
1922	pesetas 3,036,880,000	1,453,264,000
1923	pesetas 3,062,678,000	1,596,020,000
1924	pesetas 2,945,419,000	1,790,775,000
1925	pesetas 2,249,550,629	1,584,736,000
1926	pesetas 2,153,523,000	1,605,588,000
1928	pesetas 2,576,097,000	1,887,199,000
1929	pesetas 3,005,000,000	2,183,500,000

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$70,901,364	$28,668,681
1923	61,861,685	31,461,062
1924	71,162,469	28,992,107
1925	79,202,892	32,797,730
1926	68,205,700	41,369,439
1927	73,776,303	34,351,200
1928	86,613,191	35,105,988

Trade of the Canary Islands with the United States was:

Cal. Year.	Imports.	Exports.
1922	$2,173,273	$244,403
1923	1,884,739	234,779
1924	2,001,305	192,821
1925	1,985,711	281,666
1926	3,832,953	464,377
1927	2,343,129	651,944
1928	2,758,858	835,374

SPANISH COLONIES IN AFRICA.

AREA, 140,000 square miles; divided, Rio de Oro and Adrar, 109,200; Ifni, 965; Spanish Guinea, 10,810; Fernando Po and others near Guinea, 795; and Spanish Morocco (Protectorate), 18,350.

POPULATION, Estimated, 980,000; Morocco, 744,000; others near Guinea, 236,000.

The colonies of Spain are now relatively unimportant, in sharp contrast with those which she held in the sixteenth, seventeenth and eighteenth centuries. The Guinean lands are undeveloped, and small values are taken therefrom. All figures are mere estimates.

Spain has given France the right of pre-emption in case of the sale of any of these African colonies or the adjacent islands.

Morocco, over a part of which Spain exercises a protectorate and where she has suffered severe military setbacks, is less developed than the French Algerian and other African possessions. (See Morocco.)

Imports from the United States into Spanish Africa for 1922 were valued at $1,279,425; for 1923, $556,025; for 1924, $601,979; for 1925, $681,684; for 1926, $798,554; for 1927, $1,414,420; and for 1928, $1,076,362.

SWEDEN, KINGDOM OF

AREA, 173,157 square miles. (Land surface only 158,500 square miles.)

POPULATION, estimate Dec. 31, 1927, 6,087,923.

CAPITAL, Stockholm; population, Jan. 1, 1928, 464,699, other cities, Goteborg, 233,303; Malmo, 117,197, and 30 with more than 10,000 population.

King, Gustaf V.; born June 16, 1858; succeeded on the death of his father, Oscar II., on Dec. 8, 1907; married, Sept. 20, 1881, Princess Victoria, daughter of Friedrich, Grand Duke of Baden.

Heir, Crown Prince Gustaf Adolf, born Nov. 11, 1882; married, June 15, 1905, Princess Margaret (died May 1, 1920), daughter of the Duke of Connaught and granddaughter of Queen Victoria; has four sons and one daughter; married, Nov. 3, 1923, Lady Louise Mountbatten.

Premier, Adm. S. A. A. Lindman, Conservative Sept. 27, 1928.

Sweden occupies the eastern and largest part of

the Scandinavian peninsula in northwest Europe. The Kjolen mountain range separates it from Norway on the west, and the Gulf of Bothnia and the Tornea River from Finland on the east. The Baltic Sea separates it from the Baltic states and Germany on the southeast and south and the Cattegat from Denmark on the southwest.

Lakes and rivers are more numerous in Sweden than in any other European country except Finland. The amount of hydroelectric development in 1925 was 1,416,000 horse power, with 6,500,000 more available. Electrification of the state railroads is being carried on rapidly. About 45 per cent. of the farms were in 1927 equipped with electricity.

Although of broken, mountainous topography, it contains much productive land, well watered, on which the Swedes have attained high efficiency in agriculture. Half the people are on farms, which number about 430,000; of which 120,000 are under 5 acres, and 270,800 between 5 and 50 acres. Sweden's total area divides 9.4 per cent. arable, 2.3 per cent. meadows, 59.4 per cent. forests, which are largely susceptible of cultivation after removal of the trees and which yield large annual timber cuts.

The export of timber and lumber in 1927 was 1,755,285,000 board feet; of wood pulp, 1,229,238 metric tons; of newsprint, 171,737 tons; and matches, 42,562 tons.

The crops in 1928 were valued at 1,153 million kroner; and in 1927 at 1,112 million. The wheat harvest in 1928 was 529,878 metric tons from 373,176 acres; rye, 435,947 tons from 561,940 acres; barley, 208,358 tons from 272,565 acres; oats, 1,268,769 tons from 1,806,358 acres; potatoes, 1,793,085 tons from 336,590 acres; sugar beets, 1,096,002 tons from 105,650 acres; fodder roots, 2,895,458 tons from 209,359 acres; and hay, 5,334,372 tons from 4,712,513 acres.

Pig iron production in 1928 was 393,100 metric tons (417,800 in 1927); and steel ingots, 595,100 tons (530,900 in 1927).

About 450,000 tons of coal and 65,000 tons of sulphur pyrites are mined annually. Iron ore mining is most extensive north from the Arctic Circle. The iron and steel industries—Swedish steel being of especial value for tool making—are mostly in the central part. Much machinery is manufactured, with considerable porcelain production. In 1925 the value of the industrial output was about 4,197,991,000 kroner, with 292,714 men, 61,177 women, 28,119 boys and 9,682 girls under eighteen years of age employed in 11,493 factories.

The number of emigrants in 1923 was 29,238; in 1924, 10,671; in 1925, 11,948; in 1926, 13,043; and in 1927, 12,849, about 70% going to the United States.

On July 1, 1928, the Swedish merchant fleet included 1,027 steamships of 1,071,080 gross tons and 232 motor ships of 409,109 gross tons. In 1927 there entered Swedish ports 29,791 vessels of 16,252,600 tonnage. In 1922, 140,274 ships and boats passed through the canals of Sweden.

The gross income from the merchant marine in 1927, 294,603,000 kroner (278,188,000 in 1926).

In 1927 Swedish railways were 10,193 miles, of which 3,865 were state-owned and earned $9,671,000.

The Government is a constitutional monarchy, executive power being vested in the King, advised by a Council of State, headed by the Minister of State or Premier. The Legislature has two Chambers, the first of 150 members and the second of 230 members. Suffrage is universal for all over twenty-four years of age of both sexes. Proportional representation has been in effect since 1909.

The standing of the second Chamber elected on Sept. 15-21, 1928 is: Social Democrats, 90; Conservatives, 73; Liberal Prohibitionists, 28; Agrarians, 27; Communists, 8; Liberals, 4.

A plebiscite was taken in Sweden, Sunday, Aug. 27, 1922, on a consultative referendum on prohibition. The offical result of the vote was 922,122 against prohibition, 886,232 for, a majority of 37,890 out of 1,808,354 votes cast. Fifty-three per cent. of the Stockholm vote was cast by women. Of this 53 per cent. 44 was against and 9 in favor of prohibition. At Gothenburg, the second city in Sweden, 23,355 women voted against prohibition and 11,904 in favor. In Malmo, the third city, 15,141 women voted against and 4,511 for.

The present system of restricted liquor traffic, devised by Dr. Ivan Bratt, was put into effect in 1914, replacing the Gothenburg system, which abolished the saloon and established certain hours when liquor could be sold.

Briefly, the Bratt system is this: All wine and spirits in Sweden containing over 3.6 per cent. alcohol are sold through the Wine and Spirits Central, the only organization in Sweden having the right to manufacture and to sell liquor wholesale. This organization sells to 120 local companies in as many local districts throughout Sweden, and these in turn supply individuals as well as hotels and restaurants. Individual buying is controlled by the "motbok," a booklet with detachable slips on which its owner must sign his name every time he buys strong liquor. The "motbok" entitles its owner to four litres of spirits a month, although in some parts of Sweden, such as the northern provinces, where the prohibition forces are strong, the quantity is two litres. Applying for a "motbok" is like applying for a passport. Usually only one member of a family may have one of these books, exception being made in the case of sons who have reached the age of twenty-five.

In public places, such as hotels and cafes, the amount of spirits to be sold is based on the amount of food consumed, with a certain maximum quantity permitted from noon to midnight.

The Wine and Spirits Central has bought out all the private wine merchants in Sweden, and the shareholders of it and of the local companies which it serves are entitled to only 5 per cent. on their money. The balance of the profits go to the Government. Three main ideas run through the Bratt system: Reduction of the general ration of distilled and spirituous liquors through a central control, denial of liquor to alcoholics and persons who are known to abuse drink, and elimination of all private interest in the liquor traffic. Under this law Sweden now derives a revenue of 110,000,000 kroner from the liquor traffic. "Bootlegging" is unknown. There is no enforcement problem.

In 1913, before the present restrictive measures went into effect, the total Swedish consumption of distilled and spirituous liquors was 38.7 millions of litres. In 1926 the total consumption was 30 millions of litres, a reduction of 23 per cent. But even these figures are far too modest, for in 1913 distilled liquors were sold by scores of private dealers, the figures for which are lacking. Arrests for drunkenness in Sweden have gone down 49 per cent.

The population is very homogeneous, being entirely of the Scandinavian branch of the Aryan family, except about 30,000 Finns and 10,000 Lapps. Emigration has sent about 2,200,000 Swedes abroad, of whom 1,500,000 are in America and 370,000 in Finland. Most of the people are Lutheran Protestant, which is the state religion, but complete freedom of worship exists. Education is compulsory from seven to fourteen years of age, and besides the many higher institutions of learning (including two universities) which attain great culture, schooling is so general that army recruits in 1910 were only 0.16 per cent. illiterate.

Compulsory military service is required, with volunteering permitted, 655,000 men being on the army rolls, with 400,000 reserves. The peace establishment in 1926 was reduced to 15,000. A draft of conscriptives totaling 25,000 is called up for regimental training each year. The navy has 13 vessels of from 3,600 to 7,180 tons, with 10 destroyers, 4 torpedo gunboats, 27 torpedo boats and 14 submarines. The active personnel is 5,500.

Treaties outlawing war for twenty years have been signed with Norway, Denmark and Finland and an arbitration treaty with Germany.

The unit of currency is the krona (=26.8 cents).

Sweden resumed gold payments on April 1, 1924, having a gold reserve then in the Riksbank of 270,700,000 kroner and a note circulation of 503,600,000 kroner on April 15. Note circulation, July 31, 1929, was 522,000,000 kroner, with a gold reserve of 234,000,000 kroner, and foreign assets of 207,000,000 kroner.

The public debt on Apr. 30, 1929 was 1,831,600,000 kroner ($480,868,800), nearly all funded, contracted mostly for productive purposes, therefore representing, not net liability but investment, the interest on state investments covered by this debt being more than the interest thereon. Assets of the Nation were valued at 3,102 million kroner on June 30, 1927.

Recent budgets were balanced at:

1923-24	kroner 737,561,400	($197,666,348)
1924-25	kroner 648,891,700	($173,902,976)
1925-26	kroner 728,800,000	($195,118,000)
1926-27	kroner 633 274,000	($167,034,069)
1927-28	kroner 709,200,000	($190,065,600)
1928-29	kroner 744,746,400	($199,592,000)
1929-30	kroner 769,400,000	($206,199,200)

Imports and exports in both kroner and dollars for seven years:

Year.	Imports.	Exports.
1922	kroner 1,114,760,900 ($298,595,416)	1,152,376,732 ($309,194,548)
1923	kroner 1,294,528,000 ($343,050,000)	1,142,095,000 ($302,655,000)
1924	kroner 1,424,490,413 ($371,462,000)	1,260,953,593 ($331,667,000)
1925	kroner 1,436,051,000 ($395,679,609)	1,357,093,000 ($364,379,470)
1926	kroner 1,492,787,000 ($398,256,916)	1,416,883,000 ($379,724,644)
1927	kroner 1,575,000,000 ($432,257,500)	1,611,457,000 ($433,031,621)
1928	kroner 1,710,078,000 ($458,300,904)	1,566,935,000 ($419,938,580)

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$32,468,343	$33,350,235
1923	42,402,949	36,183,925
1924	42,265,628	40,001,440
1925	42,465,366	41,033,410
1926	40,854,478	44,017,955
1927	44,689,426	47,896,333
1928	57,322,423	46,118,949

SWITZERLAND, CONFEDERATION OF

AREA, 15,976 square miles.

POPULATION, census of Dec. 1, 1920, 3,886,320; official estimate, Dec. 1, 1927, 3,987,000.

CAPITAL, Berne, population, 1927, 109,020; other cities, Zurich, population, 215,460; Basel, 141,650; Geneva, 126,350; St. Gall, 64,850; Lausanne, 76,200; and 19 above 10,000.

President, for 1930,

Switzerland is bounded on the west by France, the north by Germany, the east by Austria and Italy and the south by Italy. It is mostly mountainous, having many high peaks of the Swiss Alps, with many fertile and productive valleys between, in which dairying flourishes, and much foodstuff is produced. The German language is spoken by a majority of the people in nineteen of the twenty-five cantons, French in five, and Italian in one. In 1920, there were 402,385 foreigners in the country; and in 1910 German was spoken by 2,594,298 persons, French by 793,264, Italian by 302,578, Romansch by 40,122; and other languages 23,031. There were in 1920, 212,300 peasant proprietors.

Of the total area, 28.4 per cent. is unproductive. Of the productive area, 35.8 per cent. is devoted to meadows, 29 per cent. to forests; 18.7 per cent. to fruits, and 16.4 per cent. to crops and gardens. In 1926 there were 123,667 acres under wheat and 49,725 acres under rye. Dairy products are the chief agricultural interest, vast quantities of condensed milk and of various forms of chocolate being produced. Wine and tobacco also are produced. In the last census, 1926, there were 139,283 horses, 3,843 mules, 891 donkeys, 2,460,403 cattle, 169,252 sheep, 635,349 swine, and 287,083 goats.

The Swiss Confederation has enacted that the forest area, 3,744 square miles, or 2,396,270 acres, shall never be reduced; the law applying to national cantonal and private forests, replanting being provided for. Over 16 million trees, chiefly coniferous, have been planted yearly for three years.

Switzerland has important clock and watch works, and large embroidery works. In 1925 there were 8,147 factories with 363,730 employees. Exports of clocks and watches in 1928 were valued at 300,437 francs.

For the relief of unemployment 469 millions of francs had been expended between Oct. 29, 1919, and June 1, 1923. The number unemployed reached a maximum of 146,302 on Feb. 28, 1922; by May 1, 1924, it had declined to 23,195, and on Jan. 1, 1925, to 11,419. In 1926 the average was 14,118, and in 1928 unemployment was probably non-existent. Government aid was suppressed by Federal decree on June 30, 1924.

In February, 1924, a referendum was taken on an amendment permitting the Federal Council to prolong the working week from forty-eight hours to fifty-four in times of serious economic crisis. It was rejected by a vote of 431,341 to 314,009.

In 1922, 5,787 Swiss emigrated; in 1923, 8,008; in 1924, 4,140; in 1925, 4,334; in 1926, 4,947; in 1927, 5,272; and in 1928, 4,800.

In a referendum late in 1922 a proposal for a capital levy was heavily defeated—the vote being 735,894 to 109,686.

The state owned railways have a mileage of 1,889, about 55% of the whole. By Jan. 1, 1929, 1,032 miles carrying about 85% of the traffic were operated by electricity, the completion of a ten-year program requiring an investment of 618 million francs computed to yield a return of 8%. The savings are computed to be 20 million francs on coal (550,000 tons, 17.5 millions on staff expenditure and 16 millions on maintenance and upkeep). The net profits of the railways in 1928 was 17 million francs.

By Jan. 1, 1929, the hydro-electric plant installed was rated at about 2,142,000 horsepower, distributed on 6,012 power stations of which 56, of more than 10,000 h.p. each, accounted for 1,675,500; eight with a rating of 539,000 h.p. were being constructed. Production in 1928 was nearly 5,000 million kwh., and capital investment about 1,200 million francs. About 95% of all Swiss towns and villages are served by electricity. Per capita consumption exceeds 900 kwh. annually.

In 1928, 103,630 foreign tourist automobiles entered Switzerland (78,693 in 1927). Tourist travel in 1927 exceeded 1926 by 13½%, and showed a further increase of from 7% to 10%. The hotel industry employs about 65,000 persons and realizes an annual profit of about 200 millions of francs. Automobiles registration, end of 1928, 65,000; motorcycles, 40,788, and bicycles, 750,277.

The Government is a confederation of the twenty-five cantons, which are joined under a Federal Constitution (that of May 29, 1874, being now in force), with large powers of local control retained by each canton. The national authority vests in a parliament of two chambers, a Standerat" or States Council, and a "Nationalrat" or National Council—the first of forty-four members, the second of 189 members. There is universal suffrage, and in many cantons the people meet in popular assemblies to vote directly under absolute democratic methods. Switzerland has maintained its unity since the men of the three cantons of Uri, Schwyz, and Lower Unterwald formed a defensive league in 1291, and became formally independent of the Holy Roman Empire in 1648.

The election on Oct. 27, 1928 returned a National Council, practically unchanged in complexion, composed of 58 Radical Democrats, 50 Socialists, 46 Catholics, 31 Agrarians, 6 Liberals and 7 others.

There is complete freedom of worship. In 1920 there were 2,218,589 Protestants, 1,586,826 Roman Catholics, and 20,955 Jews. Protestants are in a majority in twelve of the cantons, and Catholics in ten.

Instruction is obligatory, about 600,000 pupils being taught in the lower schools, with many technical schools and seven universities with about 7,000 students. The percentage of illiteracy is low.

A referendum in the interest of prohibition, calling for an extension of the state liquor monopoly and placing a big import duty on all foreign liquors, was rejected at the polls on June 3, 1923, by a vote of 352,772 to 259,741.

A bill to authorize local option as to whether the sale of hard liquor should be permitted in any city or town was presented to the voters by a "dry" petition of 150,000 citizens. At a referendum on May 12 it was overwhelmingly rejected in every Canton, the total vote being impressively negative.

The national defense depends on the National Militia, with compulsory service. Fortifications defend the St. Gothard Pass on the south and the Rhone River valley. The army always has been efficient and for many generations has been constantly in effective condition. The peace establishment normally under training is 46,200.

Switzerland was neutral in the great war and is a member of the League of Nations, of which Geneva is the seat.

A constitutional amendment adopting the principle of old age insurance was accepted by referendum, 406,063 to 192,209 on Dec. 6, 1925.

The budget deficits, uninterrupted since 1913, have been: 1924, 21.6 million francs; 1925, 9 million; 1926, 9.4 million; 1927, 5.2 million; 1928, 9.3 million. That for 1929, however, shows a surplus of 2 million due to increased revenues.

Subsidies for sick insurance rose from 3,999,000 francs in 1919 to 7,060,000 in 1928: accident insurance from 4,344,000 francs to 6,300,000; unemployed relief from 509,000 francs to 2,500,000. Old age pensions in 1928 are estimated at 19,000,000 francs, and the fund for Government employees 19,764,000 francs. In 10 years the outlay for these services increased from 8,852,000 francs to 54,624,000 francs. None of these subsidies existed in 1913. In additional the professional training courses call for 7,329,000 francs in 1928. The social insurance fund on Jan. 1, 1929 was about 60 million francs but still inadequate.

The consolidated debt Dec. 31, 1928, was 1,987,303,000 francs, and the debt of the Federal railways 2,681,683,000 francs.

The Swiss bank estimates the invisible balance of trade in 1926 thus: Tourists, 200 million francs; services (transit traffic, etc.), 105 to 110 million; investments abroad, 320 to 330 million; total, 625 to 640 million. The balance of trade against Switzerland in 1926 was 487 million francs, leaving a favorable invisible balance of trade of 138 to 153 millions of francs. The Bank estimates the National wealth in 1925 at 60 to 64 billion francs.

The unit of currency is the gold franc = 19.3 cents. The Swiss National Bank had outstanding July 31, 1929, banknotes amounting to 900 million francs with a reserve of 507 million francs in gold, 210 million francs of foreign balances, and 34 million francs in silver. The cover was about 88%. Metal currency in circulation amounted to 551.6 millions of which 380 millions were in gold.

The Swiss franc has been on a gold exchange basis for several years though no technical declaration to that effect has been made.

Recent budgets in francs are:

Year.	Revenue.	Expenditure.
1924	282,900,000	304,500,000

SYRIA.

(French Mandate.)

AREA, estimated, 60,000 square miles.

POPULATION, census of 1923: Lebanon, 628,863; Aleppo, 604,000; Damascus, 594,000; Alouite, 261,000; Jebel Druse, 50,000; Bedouin nomads (estimated), 250,000. Total, 2,981,863.

ADMINISTRATIVE CAPITAL, Beirut, population, 80,000. Chief cities, Damascus, population, estimated, 170,000; Aleppo, 140,000; Homs, 60,000; Hama, 35,000; Alexandretta, chief port, *French High Commissioner*, Auguste Henri Ponsot, Oct. 4, 1926.

Syria is a former province of Turkey lying south of Anatolia with Mesopotamia on the east, Transjordania and Palestine on the south and the Mediterranean on the west. It is about the size of the State of Georgia. It was made an independent state by the Treaty of Sevres, Aug. 10, 1920, and the mandate given to France by the Supreme Council of the Allied Powers. It came in force Sept. 29, 1923.

The French development of Syria provided for a federative state of three provinces, Aleppo (the district around Latakia), Damascus, and Alouite. Aleppo and Damascus were united in 1925 to form the single territory of Syria. Damad Ahmed Namy Bey, a Turk, was appointed President of Syria in April, 1925, to hold office until a regularly elected Parliament met. The council of Alouite that year passed a resolution favoring independence under the French mandate and an economic union with the rest of Syria.

Great Lebanon was proclaimed a state Sept. 1, 1920, with Beirut as its capital and given a flag, the French tri-color with a cedar on the white ground. It was reorganized into the Republic of Lebanon and in May, 1926, its National Assembly elected Charles Debbas, an Arab, as President. He was re-elected May 27, 1929, for three years. A revision of the constitution in the summer increased the term to six years and enlarged his powers.

On Dec. 7, 1924, a new state, Alexandretta, was set off from Aleppo and Damascus. In March, 1926, the Representative Council, meeting as a Constituent Assembly, proclaimed the independence of the region as a separate state and voted a constitution. They asked the High Commissioner to appoint M. Durieux, his delegate there, President.

An outbreak in Jebel Druse, a mountainous district about fifty-five miles southeast of Damascus, Aug. 5, 1925, gave the French serious trouble. The French Government recalled Gen. Sarrail, the High Commissioner, and on Nov. 6, 1925, appointed Henri de Jouvenel.

The Druses, under Sultan el Atrash, waged a guerrilla warfare with great bitterness, which brought fierce reprisals. Damascus, a wealthy city of 140,000, of venerable age in the time of the Apostles, had been first bombarded in October, 1925. It suffered great damage by a second bombardment by the French troops on May 6, 1926, and many civilians were killed. France put about 30,000 troops in the field and by March, 1927, announced the situation had become quiet.

About 1,500,000 of the population are of the orthodox Mohammedan faith.

Ahmed Namy Bey, President of Syria, resigned in February, 1928, and the Kadi of Damascus, Taj-ed-din was made Prime Minister of Syria and head of the Provisional Government, pending the action of a Constituent Assembly, duly elected, which met in Damascus June 9 to draw up a constitution to be followed by a treaty between France and Syria which should define their relations. The 69 delegates were nearly all Nationalists and elected as president Hashim Bey Atassi, once deported for his extreme Nationalist activities.

Despite the statement of the High Commissioner that there was no question whatever of France's giving up her mandate, the Assembly's draft of a constitution declared Syria an "independent sovereign State" containing all the lands ceded by the Ottoman Empire; that the President may negotiate and ratify international treaties, may appoint ministers, diplomatic representatives, civil officials, and judges, and may declare martial law; and provided for a national army.

The High Commissioner requested the Assembly to modify these articles as in conflict with the Mandate. The Assembly rejected this proposal by a vote of 44 to 6 whereupon the High Commissioner on Aug. 12 dismissed the Assembly for three months. He, after a visit to Paris, delivered on Jan. 11, 1929, a general reservation that nothing can be acceptable to France which is or can be in opposition to obligations contracted by France concerning Syria, particularly toward the League of Nations. The Assembly was obdurate and M. Ponsot dismissed it *sine die*.

The unit of currency is the Syrian pound (which in gold = 20 gold francs = $3.86). The paper Syrian pound was $0.648 in 1926, but since 1927 has been fairly stable at $0.785. The budget for 1928 in the Mandated Territory shows: Revenue, £Syr 21,639,000 ($16,943,300). expenditure £Syr.18,177,000 ($14,232,600). The budget for 1929 is estimated to balance at £Syr.19,254,020 ($15,075,100). For 1929 the balanced estimate for the State of Syria is £Syr. 11,259,520 ($8,816,200).

In 1928, 918 steam and 2,859 sailing vessels of 1,923,593 aggregate tonnage visited Syrian ports.

Automobile traffic from Beirut and Damascus to Bagdad and Teheran across the Syrian desert is on the increase, 2,519 automobiles making the trip in 1928.

The important railroad lines are Beirut to Damascus, with connections at Royak to Homs, Homa and Aleppo and from Tripoli, a promising seaport, to Aleppo, where connection is made with the Bagdad railroad. Beirut, the capital, is the seat of the Syrian Protestant College (1,217 students) founded by the Rev. Dr. Daniel Bliss in 1874, which shares with Robert College in Constantinople American educational honors in the Levant.

Schools in 1927 numbered 552 public, with 38,873 pupils, and 990 subsidized private, with 86,648 pupils.

The eastern part of the country is dry, being cut off from the sea-moisture-laden winds by mountains. Irrigation is essential to cultivation. Tobacco, wheat, fruit, wine and silk are the chief products. Mineral wealth is unimportant. Great Lebanon, which extends along the Mediterranean for 120 miles, with an average width of thirty miles, produced olives, wheat, grapes, oranges and mulberry trees, and also supports much livestock. Tobacco production is about 3,000,000 pounds per annum

The cultivable acreage of the country is estimated at about 12,500,000 acres but only one-fifth is under cultivation. The cotton production of 61,500 bales in 1928 was from 60,000 acres and by irrigation the acreage could be profitably increased to 2,000,000 acres. The yield of silk cocoons in 1928 was about 3,500,000 kilos.

Trade in dollars was:

Years.	Imports.	Exports.
1922	$41,164,000	$9,020,000
1923	33,550,000	14,640,000
1924	41,704,000	17,796,000
1925	46,404,000	21,953,000
1926	41,055,000	17,652,000
1927	50,308,000	21,486,000
1928	51,782,000	20,980,000

Trade of Syria with the United States in 1926 was: Imports, $2,165,962; exports, $2,756,860; in 1927, imports, $2,547,350; exports, $3,984,367; in 1928, imports, $3,078,378; exports, $4,683,345.

TURKEY, REPUBLIC OF

AREA; approximately 282,627 square miles, but boundaries are indeterminate. In Europe, 8,819 square miles; in Asia, 273,808.

POPULATION, census of Oct. 26, 1927, 13,660,275.

CAPITAL, Angora, in Anatolia, population, census Oct. 1927, 74,789. Chief city, Constantinople, population, census Oct. 1927, 673,029.

Istanbul Constantinople

Other cities: Smyrna, population census of 1927, 153,845; Konia, 47,286; Brussa, 61,450; Adana, 72,052; Adrianople, 34,669; Caesarea, 39,544; Aintab, 39,571.

President and Commander-in-Chief, Mustapha Kemal Pasha Ghazi, born 1880, elected August, 1923, re-elected for four years Nov. 1, 1927.

Premier, Ismet Pasha, Mar. 4, 1925.

Governor of Constantinople, Emin Bey.

Grand National Assembly at Angora has complete control. The Assembly on Nov. 2, 1922, declared itself invested with sovereign rights, that the Sultanate be abolished, that the present Sultan be deposed as Caliph (spiritual head of Islam), and that a suitable member of the house of Osman be appointed to that place. The Sultan, Mohammed VI., on Nov. 17 boarded the British battleship Malaya and was taken to Malta. He died at San Reno, May 16, 1926. On the 18th the National Assembly elected to the Caliphate the heir to the Sultanate, Abdul Medjid Effendi (born May 25, 1868), the cousin of Sultan Mohammed VI. On March 2, 1924, the Grand National Assembly deposed the Caliph (who fled to Switzerland) and declared the Caliphate vested in the Assembly.

Up to the beginning of the World War Turkey, or the Ottoman Empire, included European Turkey, Anatolia, Arabia, Syria, Palestine, Mesopotamia, Armenia and Kurdistan, also groups of islands in the Aegean Sea.

So late as 1916, the areas of the Turkish Empire totalled about 710,224 square miles, with about 21,273,900 of population. Cyprus and Egypt had passed to British domination—Cyprus annexed, and Egypt under a protectorate. There remained, therefore, in the Turkish Empire, 10,882 square miles of area with 1,891,000 of population in and around Constantinople and Adrianople on the north of the Straits; in Asia Minor, including Ismid (opposite Constantinople), Brussa, Bigha, Smyrna, Kastamuni, Angora, Konia, Adana, Sivas and Trebizond, 199,272 square miles, with 10,186,900 of population; Armenia and Kurdistan, 71,900 quare miles, with 2,000,000 of population; Mesopotamia, 143,250 square miles, with 2,000,000 of population; Syria, 114,530 square miles, with 3,675,100 of population; and the Hejaz and Yemen in Arabia, 170,300 square miles, with 1,050,000 of population; a total of 710,224 square miles, with 21,273,900 of population.

In Asia, a part of Armenia has adopted a Soviet government and is at least in harmonious agreement with Soviet Russia. Syria has passed under the mandate of France (which see), Mesopotamia has been created the dependent kingdom of the Iraq (which see); Palestine under the mandate of Great Britain (which see); and Arabia (which see) has asserted its independence as the Kingdom of the Hejaz and the Nejd, the Imamate of Yemen and other divisions.

The Balkan wars of 1913 had reduced the European area dominated by Turkey, leaving her only that part of Thrace from Adrianople east to the Black Sea and south to Enos on the Aegean; but it left her completely the mistress of the Straits of the Dardanelles.

The Treaty of Sevres (Paris), following the World War, further diminished Turkish territory, giving all Thrace to Greece except a triangle thirty miles by forty, containing a neutral zone, along the immediate border of the Dardanelles, the Sea of Marmora and the Bosphorus on both the European and the Asiatic sides, to secure equal passage rights to all nations. All fortifications were to be demolished. The Straits were to remain open in peace and in war for all craft and to be neutral in time of war. They were not to be subject to blockade or other hostile acts.

A Commission of the Straits was named to have complete control of the navigation of the Straits, but Constantinople was to return to Turkish administration.

The Allied occupation of Constantinople became complete on March 16, 1920.

The real power in the Turkish Empire was seized by the Grand National Assembly and a responsible Ministry set up by the Nationalists at Angora, in Anatolia, which was the most genuinely Turkish section of the old Ottoman Empire, after the last Chamber of Deputies, sitting at Constantinople, was dissolved April 11, 1920. The Assembly voted on Jan. 20, 1921, a Fundamental Law, which was in fact a new Constitution for Turkey. It declared that all sovereignty belonged to the people and that all power was vested in its representatives—the Grand National Assembly. It provided for universal suffrage without religious or race distinction and recognized the right of minorities to freedom and protection. It contained a programme of social reform.

The success of Mustapha Kemal Pasha, soldier and able diplomatist, who was chosen President of the Assembly and Commander-in-Chief, in driving out the Greeks in 1922 from Smyrna (formerly with a population of 225,000, now about 98,000) and its hinterland, establishing his army on the Straits, negotiating the Lausanne Treaty (which the United States Senate failed to ratify on Jan. 18, 1927), to replace the discarded Treaty of Sevres, will be found in the article on Turkey in The World Almanac of 1925.

The *modus vivendi* was extended to June 1, 1928, by an agreement between Turkey and the United States on Feb. 17, 1927, and provision made for resuming diplomatic and consular relations. Joseph C. Grew was appointed Ambassador to Turkey May 20, 1927.

Turkey in Europe is now slightly larger than Massachusetts, and the entire Turkish Republic is slightly larger than California and New Mexico combined. On the west the Bulgarian boundary runs from the mouth of the Rezvaya River on the Black Sea to the Maritza River, fifteen miles northwest of Adrianople; and the Greek boundary follows that river to Enos on the Aegean, except for the Town of Karagatch. On the east the Russian boundary runs from just south of Batum to the northwest corner of Persia. The Persian boundary continues from near Mount Ararat to the Iraq at the Mosul line delimited in 1926 by treaty agreement with Great Britain. (See Iraq.) The southern (Syrian) boundary runs from Payas on the Gulf of Alexandretta to the Iraq, and, with the Mosul line, runs practically due east and west. There are seventy-two vilayets or provinces.

REPUBLIC WITH NEW CONSTITUTION.

In October, 1925, a new Constitution was adopted proclaiming the Republic of Turkey with a President elected for four years. The National Assembly, composed of 283 Deputies elected for four years, will have legislative powers only, the executive power being intrusted to a Cabinet responsible to the Assembly. A Council of State, the members appointed by the President, will fulfil the functions usually cared for by a parliamentary Upper House.

The basic revised Constitution had been adopted by the Assembly on April 20, 1924. It contained clauses designed to limit the citizenship of non-Turks and non-Moslems, and limited the franchise to males over eighteen. A strict prohibition law passed in 1923 had so disastrous an effect on production and brought such a loss of revenue that a new law was passed on April 8, 1924, continuing the liquor traffic under heavy taxes and a measure of Government control.

New laws enacted in 1925 abolished polygamy, enforced registration of marriages, and gave the power to grant divorces to the President. This, Kemal Pasha promptly took advantage of by divorcing his wife, Latife Hanoum, twenty-two years old, an advanced feminist. Turks generally have followed his advice and adopted hats in place of the fez, held an emblem of the old regime, and the turban.

The National Assembly in 1926 adopted three new codes of law: the civil code was taken from Switzerland, the criminal code from Italy, and the commercial code from Germany, all with but little change. The codes are independent of religion, and the civil code replaces the various bodies of laws and codes that had grown up based on the Koran, it deals with the law of persons, of the family, of inheritance, and of property. It abolished both polygamy and slavery by tacit omission. As Turkey denounced the Capitulations on entering the war and as this act was incorporated in the Lausanne Treaty, the adoption of these codes is of the utmost importance. The Swiss civil code was chosen, said Mahmoud Essad, Minister of Justice, because it was "the newest and most perfect and democratic." Switzerland adopted it after seven years of discussion, Dec. 10, 1917, and it went into effect there Jan. 1, 1921.

The Gregorian Calendar was adopted, also the twenty-four-hour clock. Civil marriages were made obligatory after Sept. 1, 1926, though a religious ceremony may follow if desired. The legal marriage age under the new law is seventeen for women and eighteen for men. Public declaration of intention must be made fifteen days before the ceremony.

The National Assembly unanimously passed in April 1928 a bill amending the constitution by eliminating the article declaring that Islam is the religion of the Republic. In April 1928 the Assembly enacted the substitution of the Roman alphabet and characters for the Arabic in all official documents. Kemal Pasha declared the Arabic characters "respon-

sible for 80% of Turk illiteracy." A new dictionary will be prepared and new textbooks for schools. Fifteen years will be allowed the people to become accustomed to the new system before its use becomes compulsory. The change from Turkist figures to the so-called Arabic figures used in the West has already been widely made. The new alphabet omits Q and W and X. It adds a C and an S each with a cedilla, a G with an accent, and I, O, and U, each with two dots above like the umlaut. A reform following the census experience in October 1927 is being worked out to compel Turks to adopt surnames. Also it is proposed to scrap old titles and substitute Western ones, like "General" for "Pasha."

The National Assembly in 1929 consolidated the public works program for the next 12 years by appropriating $120,000,000 to be used exclusively for the construction of a network of railways, ports and breakwaters, and in irrigation and reclamation projects. Supervision of the work was given to Swedish engineers. Highway reconstruction is being studied.

A mutual guarantee and neutrality treaty for three years was signed by Turkey and Russia on Dec. 17, 1925.

NATURAL RESOURCES.

Agriculture is the chief industry of the Turks, products being tobacco, which goes to almost all world marts; cereals, cotton, figs, nuts, fruits of almost all varieties, opium and gums. About 17 million acres are in forests. The export of tobacco in 1927 was 41,562 tons and of cotton 17,000 tons.

In 1927 there were 9,745,088 sheep, 6,853,356 goats, 2,616,089 cattle, 1,096,422 asses, and 178,116 horses.

Turkey has large mineral resources, not yet developed, chrome ore, zinc, manganese, antimony, copper, borax, emery, asphalt, meerschaum, some coal and lignite, salt, some gold and silver, and petroleum on lands bordering the Marmora Sea.

Turkish fisheries are regarded as important, but manufactures are small and methods crude.

Turkey suffered severely during the twelve long years of war. The destruction of Smyrna, devastation of cultivated areas, lack of transportation and the deportation of the skilled Christian workers kept the output of the country in 1923 far below pre-war average. The Government has made efforts to assist the peasant and is undertaking the building of railroads; but in its efforts to build up a purely Turkish Moslem state many prohibitive duties and restrictive laws and regulations have been put into force. In the compulsive exchange of population 1,000,000 Greeks and Armenians left the country, and by May, 1924, 300,000 Moslem refugees had been brought in.

The majority of the Turkish refugees had some capital and were settled upon land vacated by the Greeks. Reconstruction is proceeding, but slowly. In 40,000 villages in January, 1926, there were reported 4,800 primary schools with 9,000 teachers and 302,500 pupils; 71 secondary schools, 56 for 4,800 boys, and 15 for 1,000 girls; 20 high scoools for 4,500 boys and 1,100 girls; 85 per cent. of the population is illiterate. The budget of the Ministry of Education for 1928-29 is £T6,558,000. The strength of the active army in 1927 was 120,000.

Railway mileage of standard gauge in use Dec. 31, 1927, was 4,296 kilometers (2,668 miles), with 2,205 kilometers (1,369 miles) under construction. In 1927, 2,255 vessels of 1,775,059 tonnage called at Smyrna and at Constantinople; the number clearing and in transit was 13,195 of 11,321,654 tonnage.

The unit of currency is the piaster (par of exchange = 4.4 cents), of which 100 = 1 pound Turkish. Average exchange rates for the Turkish pound were: 1923, $0.6967; 1924, $0.529; 1925, $0.5449; 1926, $0.5231; 1927, $0.515; 1928, $0.5006; and May 31, 1929, $0.4953.

According to the Lausanne Treaty, the pre-war Ottoman debt, amounting to £129,000,000, will be distributed between Turkey and the territories detached after the Balkan War and World War. Turkey's share is 62.25%. Agreement was reached in 1928 whereby Turkey's annual payments were fixed at from 1928 to 1935, £T1,980,000 gold; to 1941, £T2,380,000; to 1946, £T2,780,000; to 1951, £T3,-180 000; then till paid £T3,400,000. This agreement was ratified by the National Assembly May 15, 1929, and from June 1, payments began to be made through the Ottoman bank.

The treasury bonds are to be consolidated in one loan paying 5% and redeemable in 20 years, and partial cancellation of interest on the long-term debt and unified loans" were arranged.

Finance Minister Shurky Bey in his budget speech Apr. 18, stressed the need for a State Bank for which funds are being accumulated. A $500,000 government gold reserve will be used for this purpos augmented by the sale of Turkish state jewels having no historic interest and the net profit about $15,000,000 from the replacement of the old currency by the new which was put out to the amount of £T453,-000,000 in 1928.

Recent budgets in Turkish pounds were:

(Ending May 31.)	Revenues.	Expenditures.
1924-25	£T129,214,610	£T140,433,370
1925-26	153,060,000	167,000,000
1926-27	190,158,864	190 105,544
1927-28	194,580,554	194,454,619
1928-29	207,173,199	207,169,388
1929-30	220,546,000	220,408,481

Foreign trade figures are:

	Imports.	Exports.
1923	£T144,789,000 ($57,844,000)	£T 84,651,000 ($51,538,000)
1924	£T193,611,000 ($102,420,000)	£T158,868,000 ($84,041,000)
1925	£T242,314,118 ($132,000,000)	£T193,119,456 ($105,000,000)
1926	£T234,591,722 ($120,814,737)	£T187,742,801 ($96,887,542)

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$15,980,548	$21,682,492
1923	3,464,034	12,888,639
1924	3,387,240	14,582,009
1925	3,379,038	14,648,177
1926	2,927,980	16,834,463
1927	4,027,174	20,009,551
1928	4,241,708	18,386,586

URUGUAY, REPUBLIC OF

AREA, 72,153 square miles.

POPULATION, estimated, Dec 31, 1928, 1,808,286.

CAPITAL, Montevideo; population, Dec. 31, 1928, 458,784.

President, Dr. Juan Campisteguy; 1927-31, born 1859; inaugurated March 1, 1927.

President of the Administrative Council, J. Batlley Ordonez.

Uruguay, the smallest republic in South America, is bounded on the north and east by Brazil, on the south by the South Atlantic Ocean and the River Plata, and on the west by Argentina, the boundary line being the River Uruguay, which is navigable from the Plata to Salto, 200 miles north. In area it is slightly larger than the combined States of New York, New Jersey, Vermont, Massachusetts, Rhode Island and Connecticut. Lying between latitudes 30° and 35° south and consisting of rolling grassy plains, it enjoys an extraordinarily healthy climate with a uniform temperature. It is agricultural and pastoral. Over 2,150,000 acres are under cultivation. Recent production figures are:

	1926-27. *Acres.*	1927-28. *Acres.*	1926-27. *Met. T.*	1927-28. *Met. T.*
Wheat	959,548	1,220,904	278,641	337,944
Maize	424,154	480,220	84,940	125,890
Barley	4,888	8,853	1,524	1,734
Oats	98,928	149,085	20,940	38,398
Linseed	170,085	207,668	50,029	52,007

For grazing 41,500,000 acres of fertile land are used. The official live stock census of 1924 returned 8,431,673 cattle and 14,514,060 sheep; the wool clip for 1925 was 110,000,000 pounds. The export of animal products in 1927 was valued at 85,513,232 pesos, and of agricultural products at 6,410,684 pesos.

In 1928 there entered the port of Montevideo 7,684 steamers of 13,525,071 tonnage.

Great Britain is the best customer, with the United States second. American capital invested in Uruguay in 1928 was estimated at $67,000,000.

Uruguay declared her independence of Spain Aug. 25, 1825. The present Constitution, as amended, came into force March 1, 1919. It provides for universal franchise for males over 18 and for proportional representation. The President is elected for four years by direct vote. He shares executive power with the National Administrative Council, which consists of nine members, six of the majority party and three of the largest minority—three retiring every two years—all elected by direct popular vote. The President appoints the Ministers of Foreign Affairs, War and the Interior and has supreme control of these departments. The Council appoints the Ministers of Finance, Public Work, Industry and Education and has control. Congress has two Houses—the Senate of nineteen members, chosen for six years by an electoral college one-third retiring every two years; and a House of Representatives of ninety members, chosen for three

years by direct vote. There are nineteen departments, which have ample home rule.

In the election of Feb. 8, 1925, the Nationalists were victorious for the first time in fifty years.

Church and state are separated and there is complete religious tolerance. The majority of the people are Roman Catholic. Primary education is compulsory and free. In 1928 there were 1,508 primary schools with 4,582 teachers and 133,588 pupils. The educational system is highly progressive. The university at Montevideo had 10,250 students in 1928. Schools and hospitals are plentiful, and the prison at Montevideo is a model penal institution. The death penalty was abolished in 1907.

Uruguay had, in 1928, 1,819 miles of railroads mostly British owned, of which 1,060 miles are under state guarantee. The Bank of the Republic has a paid-up capital of $20,335,955. Its President and directors are appointed by the Government. It has the exclusive right to issue notes. Circulation June 30, 1928, was 67,647,000 pesos with a gold reserve of 66,065,000 pesos. The peso (=$1.0342) is the unit of currency; average of exchange for 1923, 79.06 cents; 1924, 82.27 cents; 1925, 98.4 cents; 1926, $1.015; 1927, $1.0134; and for 1928, $1.029. The Government in 1912 created a National Insurance Bank and gave it a monopoly of issuing insurance. The standing army, in which service is voluntary, numbers 18,500, with a reserve of 157,439 in the National Guard service, which is compulsory.

Uruguay has made great advances in social welfare legislation and administration during the last twelve years. Expenditure for old age pensions in 1924 was 2,224,385 pesos (2,040,843 in 1923) and on Dec. 31, 1924, 22,144 pensions were in effect. In 1927, 3,879,006 pesos were paid out.

The public debt on Dec. 31, 1928, amounted to 213,999,318 pesos of which 141,496,844 pesos was external and 2,545,501 pesos shared with Brazil both for public works. This includes an issue of $30,000,000 6 per cent. gold bonds floated at 96.5 in New York, in April, 1926. The official estimate of the national wealth is 2,521,508,643 gold pesos (approximately $2,597,000,000); over $1,547 per capita.

Recent budgets in pesos are:

Year.		
1923-24	42,364,000	42,435,000
1924-25	45,535,000	45,215,000
1925-26	53,497,613	52,457,620
1926-27	53,824,000	54,613,538
1927-28 (actual)	59,986,472	55,946,243
1928-29	54,061,384	54,227,929
1929-30	58,041,562	58,547,252

Foreign trade in pesos was:

Year.	Imports.	Exports.
1923	55,102,000	100,786,901
1924	80,897,378	106,826,282
1925	72,438,663	98,709,015
1926	73,271,830	94,303,490
1927	81,829,873	96,674,131
1928	93,729,483	101,203,145

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$11,419,076	$16,502,049
1923	15,077,188	21,811,424
1924	18,222,114	7,069,513
1925	21,269,743	16,100,470
1926	23,015,149	18,502,363
1927	25,060,001	10,894,565
1928	26,016,798	11,757,009

STATE OF VATICAN CITY.

THE SEE AND CHURCH OF ROME.

AREA, 108.7 acres.

POPULATION, 523.

Supreme Pontiff, Pius XI. (Achille Ratti), born at Desio May 31, 1857, made Papal Nuncio to Poland and named titular Archbishop July 3, 1919, translated to the Archbishopric of Milan and created Cardinal, June 13, 1921, elected Pope (261st) in succession to Benedict XV., Feb. 6, 1922.

Secretary of State, Cardinal Gasparri.
(For members of the College of Cardinals and list of Popes consult the Index.)

Governor, Commendatore Camillo Serafini.

Director of the Vatican Treasury, Commendatore Bernardino Nogara.

Papal Nuncio to Italy, Mgr. Francisco Borgongini-Duca.

Ambassador from Italy to Vatican City, Count Cesare Maria de Vecchi.

Apostolic Delegate to the United States, Archbishop Pietro Fumasoni-Biondi.

The Popes for many centuries, with some slight breaks, held temporal sovereignty over mid-Italy (the so-called Papal States), extending from sea to sea, comprising an area of some 16,000 square miles, with a population in the nineteenth century of over 3,000,000. This territory in the reign of Pius IX. was incorporated in the Kingdom of Italy, the sovereignty of the Pope being confined to the palaces of the Vatican and the Lateran in Rome and the villa of Castel Gandolfo, by the Italian law of May 13, 1871. This law also guaranteed to the Pope and his successors in the chair of St. Peter a yearly indemnity of 3,225,000 lire ($622,425 as part of exchange), which allowance, however, remained unclaimed and unpaid.

Final settlement of the Roman question came after negotiations begun Oct. 4, 1926, when the Treaty of Conciliation, the Concordat and the financial convention were signed at the Lateran Palace on Feb. 11, 1929, by Cardinal Gasparri and Premier Mussolini. The treaty was duly ratified by the Pope and by the Italian Parliament May 14 and 25 and signed by the King May 27; and became effective June 7 by exchange of ratification at the Vatican.

THE LATERAN TREATY.

The Lateran Treaty is composed of a preamble and twenty-seven articles. After stating that the two high contracting parties recognize the advisability of eliminating every reason for enmity between them, it begins by reaffirming the principle contained in the first article of the Constitution of the Italian Kingdom by which the Catholic Apostolic Roman religion is the only State religion in Italy. It then recognizes the full property and exclusive dominion and sovereign jurisdiction of the Holy See over the Vatican as at present constituted.

For this purpose, the "State of Vatican City" is created, declaring that in its territory no interference by the Italian Government will be possible and that there will be no authority but the authority of the Holy See. St. Peter's Plaza, though forming part of the Vatican territory, will continue to be normally open to the public and subject to the police powers of the Italian authorities. The boundaries of the Vatican City include St. Peter's, the Vatican palace and museum covering more than 13 acres, the Vatican gardens, the Holy office and neighboring buildings between Viale Vaticano and the church.

All public services with which the Vatican City will be endowed shall be by Italian connection with other States, such as telegraph, telephone, wireless broadcasting and postal service.

Another agreement provided for: The circulation on Italian territory of terrestrial vehicles and aircraft belonging to the Vatican City is provided for, also the water supply, and the prevention of airplanes flying over the territory.

The sovereignty of the Holy See over those having stable residence in the Vatican City is provided for as well as the immunity which will be enjoyed by those who do not reside there, namely, all dignitaries of the Church, persons belonging to the Pontifical Court and Vatican officials declared indispensable by the Holy See.

Territorial immunities also are provided for the patriarchal basilicas and certain edifices situated outside of the Vatican City in which the Holy See has housed or will house its congregations or offices and services necessary for its administration.

Italy recognizes the Holy See's right to send its own diplomats to foreign countries and to receive foreign diplomats. The agreement provides for diplomatic relations between Italy and the Vatican.

It is also agreed that the artistic and scientific treasures existing in the Vatican City and the Lateran Palace shall continue to remain visible to students and visitors.

If the Holy See requests it, the Italian Government will see to the punishment in its own territory of crimes committed in the Vatican City. Similarly, the Holy See will deliver to Italy persons who have taken refuge on Vatican territory accused of acts which are held criminal by the laws of both States.

The Vatican wishes to remain, and will remain, extraneous to temporal competitions between other States and from international congresses convened for the purpose, unless the parties in conflict appeal unanimously to its mission of peace, and reserves the right, in any case, to exercise its moral and spiritual power. As a consequence the Vatican territory will always be considered neutral and inviolable. This declaration follows:

The Holy See considers that with the agreements today signed it possesses guarantees necessary to provide with due liberty and independence the spiritual government of the Diocese of Rome and of the Catholic Church in Italy and the whole world;

declares the Roman question definitely and irrevocably settled and therefore eliminated, and recognizes the Kingdom of Italy under the dynasty of the House of Savoy, with Rome as the capital of the Italian State. Italy on its side recognizes the State of Vatican City under the sovercignty of the Supreme Pontiff. The law of guarantees and any other law or act contrary to the present treaty is abrogated.

The Italian State recognizes matrimony as a sacrament regulated by canon law in its relation to civil law. The banns of marriage must appear in the parish church as well as in the municipality. The parish priest must send within five days the marriage certificate to the municipality and have it copied in the registers there. (In effect Aug. 8, 1929.)

Cases concerning the nullity of marriage and the dissolution of marriages celebrated but not consummated, are reserved to the ecclesiastical courts. There decisions, before becoming definite, must be brought before the Supreme Tribunal of Segnatura to pass upon the legality of the action, and its decision will be sent to the Court of Appeal of the Italian State, which will enforce the decisions of the ecclesiastical authority. With regard to cases of separation, the Holy See consents to judgment being given by the Italian civil authorities.

The teaching of religion becomes compulsory, not only in the elementary schools but also in the secondary schools of Italy. Catholic organizations, according to the instruction of the Holy See, must keep their activity outside of any political party and under the immediate control of the hierarchy of the Church.

The financial convention establishes that the Holy See, as a definite settlement of all its financial relations with Italy in consequence of the fall of temporal power, accepts 750,000,000 lire in cash and 1,000,000,000 lire in Italian State consols at 5%. This sum is inferior to what Italy would have paid if the Holy See had accepted the allowance granted by the law of guarantees of May 13, 1871.

The Italian Government declares the person of the Pope sacred and inviolable, and binds itself to punish attempts against him exactly in the same way as attempts against the person of the King. It agrees also to punish anyone unlawfully wearing clerical dress in the same way it punishes persons unlawfully wearing a military uniform.

GOVERNMENT OF VATICAN CITY.

The new fundamental law of the State of Vatican City came into force with no radical departures, on June 10. It vests all powers, executive, legislative and judicial, in the Supreme Pontiff. He may delegate some to others who will be responsible to him alone. During the interregnum between the death of one Pope and the election of his successor, the power is vested in the College of Cardinals whose acts, to be valid, must be ratified by the new Pope.

Civil cases will be tried by a special court and the Sacred Tribunal of the Rota will act as a court of appeal. Penal cases will be tried by a judge or judges appointed by the Governor. Any person who believes his rights or interests have been injured can appeal to the Pope through the Councilor General of State.

The Vatican City legal system is based on canon law and pontifical constitutions and rules. In all cases not covered the Italian law of Rome will apply. The flag of the State is white and yellow charged with the crossed keys and triple tiara.

Pope Pius XI. left the Vatican where for 59 years each successive Pope had been a "Prisoner of the Vatican," on Sunday, July 25, and with medieval and ecclesiastic splendor was borne around St. Peter's Plaza on a richly decorated platform followed by Cardinals and high prelates and bestowed the Apostolic benediction on a kneeling throng of 300,000 people.

The central administration of the Roman Catholic Church is carried on by eleven committees called Sacred Congregations, viz: Holy Office, Consistorial, Discipline of the Sacraments, Council, Religious, Propaganda Fide, Eastern Church, Sacred Rites, Ceremonial, Extraordinary Ecclesiastical Affairs, Seminaries and Universities; and the three Tribunals, Sacred Penitentiary, Sacred Roman Rota, and the Apostolic Segnatura; and various offices.

The Holy See maintains diplomatic relations with Austria, Bavaria, Belgium, Czechoslovakia, France, Germany, Great Britain, Hungary, Japan, Monaco, the Netherlands, Poland, Portugal, Prussia, Roumania, Spain, Switzerland, Yugo-Slavia, together with most of the American republics except the United States, Cuba, Mexico and Uruguay. The Concordat with Prussia was negotiated in 1929.

The London Catholic Directory gives the number of Catholics in British Empire in 1926 as 15,289,660 souls; in world, 334,664,791, of whom 328,158,020 are of the Latin rite.

VENEZUELA, REPUBLIC OF

AREA, approximately 393,976 square miles.
POPULATION, census of 1926, 3,026,878.
CAPITAL, Caracas; population, 1920, 92,212. Chief cities, Maracaibo, population, estimated 1925, 100,000; Valencia, 29,466; Varquisimeto, 23,943; chief port, La Guaira, 22,000.

President, Dr. Juan Bautista Perez, 1929-36, elected May 30, 1929.

Commander-in-Chief, Ex-President Juan Vicente Gomez, 1929-36, elected May 30, 1929.

Premier, Dr. Ruben Gonzales (Interior).

Venezuela is the northermost state of South America and is bounded on the north by the Caribbean Sea, on the east by British Guiana, on the south by Brazil and Colom and on the west by Colombia. It stretches from 12° 26′ north to within two degrees of the Equator. The climate is tropical hot and unhealthy in the coastal and river regions. In area it is as large as the States of Texas, Louisiana and Arkansas combined. The spurs of the Eastern Andes and the foothills are covered with dense forest, and the high plateaus provide excellent grazing. The River Orinoco (over 1,600 miles in length) flows through many stretches of level prairies (llanos) and is navigable for 700 miles for large steamers and for 200 miles further for smaller vessels. A natural river or canal, the Casiquiare, unites its upper reaches with the Rio Negro, a tributary of the Amazon. The island of Margarita (area of 400 square miles), noted for its pearl fishing, with Tortuga and seventy other islands, belongs to Venezuela, but Trinidad, at the mouth of the Orinoco, is British and Curacao and others off the coast are Dutch.

Agriculture and cattle raising are the chief industries, and the chief exports are coffee, cacao, balata, chiefly textiles, machinery and hardware. The country is rich in metals, but is mostly undeveloped.

Gold valued at $813,767 was exported in 1927.

The production of petroleum for 1928 was 107,235,094 barrels, making Venezuela the second in the list of oil producing countries; in 1927, 64,436,926; 1926, 37,226,019; 1925, 19,771,000; 1924, 9,042,000; 1923, 4,201,000; 1922, 2,201,000; and 1921, 1,433,000. The value of petroleum exported in 1927 was $52,293,000; and in 1926, $46,590,000. To Oct. 1, 1927, 800 wells had been drilled; 685 were producers. The law concerning hydrocarbons, promulgated June 30, 1929, states clearly the rights and privileges of foreigners in the development of oil lands. Both British and American oil interests have secured possessions in the rich Maracaibo district. American capital invested in Venezuela in 1928 was estimated at $172,000,000.

Coffee exported in 1927 was valued at $19,666,000 and in 1926 at $18,871,000; Cocoa exported in 1927 was valued at $5,146,000, and in 1926 at $3,630,000.

There were in 1928, 661 miles of railroads. Caracas (altitude 4,017 feet), the capital, being connected with its seaport, La Guaira, by a railroad twenty-two miles long which is famous for its magnificent views The roads of the country have been greatly improved of late years.

In 1926, 1,963 vessels of 2,459,938 tonnage in the foreign trade entered Venezuelan ports.

Venezuela was the first of the Spanish colonies in South America to formally declare her independence (July 5, 1811), following the disturbing conditions in Spain caused by Napoleon. After severe fighting, the Republic of Colombia, of which the present states of Colombia, Venezuela and Ecuador, formed the three departments, was established Dec. 17, 1819, under the Presidency of the Liberator, Gen. Simon Bolivar. In May, 1830, a convention recreated the Republic of Venezuela and adopted a constitution. Separation from Colombia was amicable, but the boundary separating the two countries was not determined until 1923.

The centenary of the death of Bolivar will be commemorated on Dec. 7, 1930.

Venezuela has had many revolutions and many revisions of its Constitution since the first was adopted in 1819. That now in force was adopted June 24, 1925. It provides for a President, elected by Congress for seven years; a Senate of forty members, elected for three years, and a House of Deputies of about seventy-seven members, elected for three years. There are twenty autonomous states, a federal district and two territories. Gen. Juan Vicente Gomez, who has been President since Castro quit in 1908, declined a re-election. The Constitution was amended in May, creating the office of Commander-in-Chief, and Gomez was elected to that office. Certain of the President's functions may now be exercised only in conjunction with the Commander-in-Chief; these include the appointment and removal of Cabinet Ministers, the power

to declare war, authority to convoke Congress in special session, authority to suspend civil rights when necessary and other powers incident to a state of war or rebellion. The Commander-in-Chief is head of all national armed forces.

The Roman Catholic is the state religion, but religious freedom is guaranteed. Primary education is free and nominally compulsory. There are 1,860 public elementary schools with 2,369 teachers and 111,939 pupils. Higher education has been much improved under recent administrations. Military service is compulsory. A standing army of 8,000 is maintained with 87,000 in the reserve.

The bolivar ($0.193) is the unit of currency.

The National debt, which totaled 233,096,493 bolivars on Jan. 1, 1909, when Pres. Gomez took office, was on Jan. 1, 1929, 67,564,605 bolivars, with 92,922,911 bolivars in the National treasury. In 1928, 48,512 bolivars was spent on public works.

Recent budgets in bolivars are:

Year.	Revenues.	Expenditures.
1924-25	66,167,000	63,354,500
1925-26	95,300,400	92,800,000
1926-27	94,992,000	92,785,600
1927-28	112,000,000	111,457,000
1928-29	204,345,961	195,450,000
1929-30	193,189,750	192,450,000

Imports and exports were:

Year.	Imports.	Exports.
1921	$18,415,335	$25,777,067
1922	18,401,548	26,603,959
1923	29,469,617	30,243,910
1924	33,132,063	35,377,722
1925	58,548,000	62,327,000
1926	78,600,000	75,364,000
1927	69,005,000	84,288,000

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1922	$8,664,189	$13,929,464
1923	11,918,570	13,111,757
1924	17,642,530	16,462,636
1925	25,157,087	19,564,227
1926	39,690,084	23,315,607
1927	34,744,133	28,597,511
1928	37,819,979	38,863,226

YUGO-SLAVIA.

KINGDOM OF THE SERBS, CROATS AND SLOVENES.

AREA, 96,134 square miles.

POPULATION, Census of 1921, 12,017,323.

CAPITAL, Belgrade, population, 1921, 111,740; estimated, 1928, 240,000; other cities, Zagred (Agram), 108,338, estd. 1928, 150,000; Ljubliana, 53,306; Sarajevo, 66,317; Novi Sad, 39,147; Split, 25,042; Nish, 25,000.

King of the Serbs, Croats and Slovenes, Alexander I., born Dec. 17, 1888; Prince Regent from June 24, 1914, to Aug. 16, 1921, when his father, King Peter I., died; married June 8, 1922, at Belgrade, Princess Marie, second daughter of the King and Queen of Roumania. *Heir*, their son, Prince Peter, born Sept. 6, 1923. A second son, Prince Tomislav, was born Jan. 19, 1928; a third, Prince Andreja, was born June 29, 1929.

Prime Minister, Gen. Pera Zhivkovitch (Interior), Jan. 6, 1929.

By a royal decree signed Oct. 3, 1929 by King Alexander, the name of the Kingdom of the Serbs, Croats and Slovenes was changed to the Kingdom of Yugo-Slavia, an appellation long in popular use. The 33 provinces were replaced by nine banats which with their new capitals are: Save, capital Zagreb; Danube, capital Neusatz; Vardar, capital Skoplje; Drina, capital Sarajevo; Morava, capital Nisch; Drave, capital Ljubljana; Vrbas, capital Banjaluka; Coastal Banat, capital Spalato and Zeta, capital Cetinje. Each banat will be governed by banus appointed by the King.

The new names correspond generally to those of the great rivers of Yugo-Slavia and the frontiers roughly conform to those of the old provinces. No estimate of area and population of the banats is as yet (Oct. 15, 1929) available.

Serbia, which had since the Battle of Kossovo, in 1389, been a vassal principality of Turkey, was established as an independent kingdom by the Treaty of Berlin, July 13, 1878. By the Balkan wars of 1913 her boundaries were enlarged by the annexation of Old Serbia. The Government of Austria-Hungary laid the assassination of the Archduke Franz Ferdinand (June 28, 1914) to a Serbian plot and by invasion following her ultimatum brought on the World War of 1914-18. Serbia was overrun and suffered enormously, but in October, 1918, her army again occupied Nish and on Nov. 3, 1918, reoccupied the capital, Belgrade. At the dissolution of the Austrian-Hungarian Empire, the National Assembly of the former Hungarian provinces of Croatia and Slovenia proclaimed their independence and a National Council was established, to which representatives of other Slav states of the old empire, including Bosnia and Herzegovina, were admitted, and union with Serbia as the Kingdom of the Serbs, Croats and Slovenes (Yugo-Slavia) became effective on Dec. 29, 1918, when a Ministry was formed.

On Nov. 29, 1918, the National Parliament of Montenegro, which had been recognized as an independent state by the Treaty of Berlin in 1870, deposed King Nicholas, who was then in exile, and decided to unite with Serbia. This union became a fact on the death of King Nicholas, March 1, 1921, and Montenegro officially disappeared from the map of Europe on July 13, 1922, when the Council of Ambassadors sitting in Paris to ratify the boundaries of Yugo-Slavia and Albania recognized that its union was an accomplished fact.

Yugo-Slavia is bounded by Italy and the Adriatic Sea on the west, by Austria and Hungary on the north, by Bulgaria and Greece on the east, and by Albania and Greece on the south. Its area and population by provinces is approximately as follows:

Districts.	Area, Sq. Miles.	Popul'n Census of 1921.
North Serbia	19,286	2,655,078
South Serbia	17,651	1,474,560
Montenegro	3,733	199,857
Bosnia and Herzegovina	19,768	1,899,929
Dalmatia	4,916	621,429
Croatia and Slavonia	16,920	2,739,593
Slovenia	6,253	1,056,464
Voyvodina	7,607	1,380,413
Total	96,134	12,017,323

According to nationality there are approximately 9,730,000 Slavs, 500,000 Germans, 490,000 Hungarians, 480,000 Albanians, 180,000 Roumanians, and 10,000 Italians. According to religion there are approximately 5,460,000 Greek Orthodox (the state religion), 4,475,000 Roman Catholics, 1,337,000 Mohammedans and 300,000 of other religions.

The Constitution, adopted June 28, 1921, provides for a single Legislative Chamber of 315 members elected for four years, one deputy to every 40,000 inhabitants. The Chamber (Skuptchina), contains about a dozen parties. The government since Feb. 8, 1925, has been made up of a coalition of Radicals and Croatian Peasants that was so unstable that Premier Uzunovitch seven times placed the resignation of the cabinet in the hands of the King. On April 17, 1927, Velja Voukitchevitch (Radical) became Premier, adding the Democrats to the coalition. At the election Sept. 11, 1927, the Government won 201 of the 315 seats. The Radicals lost 30, but the Democrats gained 40. One Socialist Deputy was elected, but all the Communists failed.

The bitter clashes between the Serbian and Croatian parties provoked bloodshed on June 20, 1928. During a debate in Skuptchina,—a Montenegrin deputy in the Government party, Punica Ratchitch, shot down a group of opposition delegates, mortally wounding Stefan Raditch, the Croatian leader of the peasant party, killing his nephew Paul Raditch and Dr. George Basaritchik, the vice president of the Croatian party, and wounding the secretary, Dr. Pernar and two others. Stefan Raditch died on Aug. 8. The 85 Croatian deputies left the Skuptchina and later met in protest at Zagreo. Premier Vukitchevitch's cabinet fell and it was not until July 27 that a new cabinet was formed by the Rev. Dr. Anton Korosec, a Slavonian and a Catholic priest—the first non-Serbian to head the government. The Croatians remained obdurate and bitter.

The new government secured on Aug. 13 the ratification of the Nettuno Treaty signed with Italy on July 20, 1925, which had been held up because of the fierce uncompromising opposition of the Croatians. This act was considered an essential preliminary to the consummation of the £50,000,000 stabilization loan to Serbia by a consortium of London and American bankers signed in March 1928, and awaiting ratification.

The Croatians remained obstinate and bitter. Father Korosec found it impossible to reconcile the factions and resigned in December. King Alexander on Jan. 6, 1929, in a royal decree announced the dissolution of the Skuptchina, suspended the constitution, and declared that laws would be repealed or altered by royal decree only. He proclaimed immediately four laws declaring himself the sole source of power and making the ministers responsible to the sovereign alone; prohibiting communism and declaring that any political party of a nationalistic or Chauvinist character will be instantly dissolved;

severely limiting freedom of comment in the press; and abolishing all local elected and self-governing bodies. The capitals were given municipal councils nominated by the King.

A new cabinet, headed by Gen. Pera Zhivkovitch, commander of the Royal Guard, was appointed.

The *coup d'etat* was taken calmly by the country and the orthodox Christmas festivities went on.

The Croatian Peasant party was dissolved Jan. 21, and the police closed the party headquarters at Zagreb, confiscating the records. Three days later like treatment was meted out to the Radical, Independent Democrat, Serbian, Peasant and Socialist parties, and student clubs ordered to disband. On Feb. 18, the King decreed the creation of a legislative council of seventeen (11 Serbs, 4 Croats and 2 Slovenes), replacing parliament but with advisory duties only, and, later, new and heavier penalties were decreed against those who offend the State. In May two Croat leaders were interned.

Ratchitch, who murdered Raditch, was found guilty June 7, and sentenced to sixty years and six months in prison, a sentence automatically reduced to twenty years (the maximum) by the Serbian law.

Elementary education is nominally compulsory and is free. In 1926 there were 7,208 elementary schools with 17,576 teachers and 786,324 pupils. There are three universities, Belgrade with 3,115 students in 1926; Zagreb, 3,175; and Ljubliana, 1,031.

The army has been reorganized on a peace strength of 116,000. Service is compulsory.

Agriculture is the basic industry, closely followed by cattle raising and forestry, and furnishes occupation for 85% of the population. About 27,200,000 acres, 45% of the Kingdom, is devoted to agriculture and 80% of this to cereals. Corn is the leading crop, product 3,410,100 metric tons from 5,366,751 acres in 1927—and wheat second, 1,943,950 tons from 4,440,036 acres. Drought badly affected the crops in 1927. The sugar production in 1926 was 70,018 metric tons. Tobacco production in 1926 was 14,821 tons. Livestock census, Jan. 1927, was: 1,227,707 horses, mules and asses; 3,737,538 cattle; 7,932,825 sheep; 2,806,182 pigs; and 1,721,263 goats.

The principal exports are grain, cattle, timber, and prunes; imports, agricultural and animal products, machinery and chemicals. Serbia is an agricultural country of small peasant holdings. Nearly one-third of its area, 18,200,000 acres, is covered with forests. There are valuable coal and iron mines and some lead and copper.

Coal production in 1928 was 5,051,800 metric tons (4,745,000 in 1927); iron ore, 439,480 (336,900 in 1927); copper ore, 327,800 (288,000 in 1927); and bauxite, 49,260 (101,000 in 1927).

The state owns 3,482 and operates 1,168 more of the 6,231 miles of railroads.

The tonnage of the merchant marine had increased to 300,000 gross tons at the end of 1928. From 1922 to 1928 the shipping companies have received subsidies totaling 171,567,694 dinars, and will receive 40 million a year for 1929 and 1930. The river navigation of the Danube and the Save is important. The new free zone is Saloniki, Greece, was opened July 1, 1929.

Susak, the eastern part of Fiume, with excellent docks, is Serbia's seaport on the Adriatic. Of the new loan floated in New York in April, 1927, $15,000,000 are to be expended for the construction of the Belgrade Adriatic Railway.

The unit of currency is the dinar or crown (par of exchange = 19.3 cents); exchange is nearly stable having averaged 1.71 cents in 1925, 1.76 cents in 1926 and 1927. The dinar was stabilized at this point March 30, 1928.

The budget for 1927-28 was: Revenues 10,772,036,400 dinars, and expenditures 10,513,128,300 dinars. The budget for 1928-29 provides for revenues, 11,555,794,000 dinars; expenditures, 11,592,794,000 dinars. The budget for 1929-30 is balanced at 12,000,000,000 dinars (approximately $204,000,000.)

The foreign debt on Nov. 1, 1927, including the war debt of $62,850,000 to the United States funded May 3, 1926, and the gold $30,000,000 7% 40-year loan floated at 92½ in New York in April, 1927, was about $534,442,924, or approximately $43 per capita. In addition is the funded war debt £25,591,428 to Great Britain and the unfunded war debt to France, about 1,500,000,000 francs.

The internal debt was 3,825,269,000 dinars, equal at current exchange to about $38,250,690; and is mostly non-interest bearing. The amount of paper money in circulation on July 31, 1929, was 5,659 millions of dinars, with a gold reserve of 94 millions.

Imports and exports were:

	Imports.	Exports.
1923.....paper dinars	8,309,635,472	8,048,843,930
1924.....paper dinars	8,221,743,552	9,538,774,432
1925.....paper dinars	8,752,900,000	8,904,500,000
1926.....paper dinars	7,631,800,000	7,818,100,000
1927.....paper dinars	7,286,201,000	6,400,153,000
1928.....paper dinars	7,835,338,000	6,444,700,000

Trade with the United States was:

Cal. Year.	Imports.	Exports.
1924	$491,375	$686,054
1925	1,001,327	1,431,090
1926	789,078	1,154,925
1927	996,330	984,849
1928	1,782,280	1,768,925

BEGINNINGS OF FAMOUS FOREIGN UNIVERSITIES.

The rise and spread of universities in Europe was a characteristic of the Middle Ages. For a long time these institutions were ecclesiastic.

When they began to specialize, there was a separate faculty for each great branch of instruction.

Later, the branches were called colleges, and the modern university is a collection of colleges and specialized schools under one common management.

Often, one or more colleges of a university are widely separated therefrom, as in the cases of medicine and law schools.

The University of Pavia, Italy, was founded by Lothaire, grandson of Charlemagne, in 825 and celebrated its eleventh centenary on May 5, 1925. Its renaissance began in 1361 under Galeazzo II.

The University of Oxford is said to have been founded by King Alfred in 872.

Winchester School, in Hampshire, England, was founded by Bishop William of Wykeham, 1382-1387.

The first college of the University of Cambridge was founded by Hugo, Bishop of Ely, in 1257.

Eton College, in Buckinghamshire, England, was founded by Henry VI in 1440 and was intended as a preparatory school for King's College, Cambridge. Henry took many ideas for Eaton from the Casa Giacosa, the great school near Mantua, Italy, founded by its Marquis about 1429.

The University of Paris was founded by King Philip II. about 1200.

The first university in the German Empire was at Prague, Bohemia, 1348.

Upsala University, in Upsala, the ancient capital city of Sweden, was founded in 1477.

The University of Moscow was founded in 1755 by the Empress Elizabeth, and the University of St. Petersburg in 1819 by Czar Alexander I.

The first Hungarian University was founded by King Louis the Great at Pecs in 1367. It was in its prosperity attended by 2,000 students, but passed out of existence in 1543 at the time of the occupation of Pecs by the Turks. In 1635 the University of Nagyszombat, now the University of Budapest, was founded by Peter Pazmany, Archbishop of Estergom.

The oldest Spanish university is that of Salamanca, founded in 1240.

The University of Copenhagen, Denmark, was founded in 1479.

Other old Italian universities are Bologna, founded 1200; Padua, 1222; Naples, 1224; Genoa, 1243; Perugia, 1276; Macerata, 1290. There were nine more founded between 1300 and 1550. Italy was the greatest resort of students for the higher education in the middle ages.

The University of Leyden, in the Netherlands, was founded by Prince William (the Silent) of Orange in 1575 as a reward for the heroic defense of the city against the Spaniards. Grotius, "father of international law," is one of its famous scholars.

Trinity College, Dublin, was incorporated by royal charter in 1591.

St. Andrews University, in Scotland, was founded by Bishop Wardlaw in 1411.

The University of Glasgow was founded by Bishop Turnbull in 1451.

The University of Edinburgh was founded in 1582 by a charter granted by King James VI. of Scotland.

The Royal College of Physicians, London, dates from letters patent granted under Henry VIII in 1518 to his physician, Dr. Linacre, who became the first president. The College of Physicians at Dublin was created in 1667; that at Edinburgh in 1681; the College of Surgeon's, London, in 1745; and that at Dublin in 1786.

The University of Jagielle, of Cracow, Poland, where Copernicus received his education, was founded in 1364 by the Polish King Kazimiers the Great, and endowed by a later Polish King, Jagielle, in 1400.

Note—The dates of founding of the higher institutions in the United States and Canada will be found in the tables of American colleges and universities.

RULERS OF PRUSSIA.

A. D.	Name.	A. D.	Name.	A. D.	Name.
1134	Albert I (1st Elector of Brandenburg).	1688	Frederick.	1840	Frederick William IV.
1616	John, Sigismund (Elector, Duke of Prussia).	1701	Frederick crowned King of Prussia.	1861	William I. (made German Emperor, Jan. 18, 1871).
1619	George William.	1713	Frederick William I.	1888	Frederick.
1640	Frederick William ("The Great Elector").	1740	Frederick II ("the Great").	1888	William II. (abdicated as German Emperor Nov. 9, 1918).
		1786	Frederick William II.		
		1797	Frederick William III.		

NOTE TO GERMANY AND PRUSSIA—The German Empire was restored on Jan. 1, 1871, and King William I. of Prussia was proclaimed German Emperor, at Versailles, Jan. 18, 1871. On his death he was succeeded by King Frederick of Prussia, and the latter in turn by William II.

William II. (Kaiser Wilhelm) abdicated as German Emperor, Nov. 9, 1918, all the rest of the sovereigns of the German states quit too, one by one, and the German Empire became a Republic, under the Presidency of Frederick Ebert, who died Feb. 28, 1925, and was succeeded by the former Field Marshal Paul von Hindenburg. The Constitution was adopted July 31, 1919.

Russian Emperors—(1689) Peter the Great; (1725) Catherine, his widow; (1727) Peter II, grandson of Peter the Great; (1730) Anne, Duchess of Courland, daughter of Czar Ivan of Muscovy, whose reign began in 1682; (1740) Ivan VI, grand-nephew of Peter the Great; (1741) Elizabeth, daughter of Peter the Great; (1762) Peter III, son of Anne, Duchess of Courland; (1762) Catherine II, wife of Peter III; (1796) Paul, son of Catherine II; (1801) Alexander I; (1825) Nicholas I; (1855) Alexander II; (1881) Alexander III; (1894) Nicholas II, who, with his family was assassinated in 1918. Meantime, in 1917, he had abdicated and a Provisional Government ended the Romanoffs and the Empire.

Kings of Modern Italy—(1805) Napoleon, Emperor of the French; he abdicated in 1814; (1861) Victor Emmanuel II of Sardinia; (1878) Humbert I; (1900) Victor Emmanuel III.

Rulers of Austria-Hungary—(1804) Francis I, who reigned as Francis II of Germany until 1806; (1835) Ferdinand, his son; (1848) Francis-Joseph, son of Francis-Charles, who was a brother of Ferdinand. The Dual Monarchy dissolved in the World War, Austria becoming a republic and Hungary a kingdom.

Kings of Belgium—(1831) Leopold I; (1865) Leopold II; (1909) Albert, nephew of Leopold II.

Kings of Spain—(1512) Ferdinand V.; (1516) Charles I; (1556) Philip II; (1598) Philip III; (1621) Philip IV; (1665) Charles II; (1700) Philip V; (1724) Louis I; (1746) Ferdinand VI; (1759) Charles III; (1788) Charles IV; (1808) Ferdinand VII; (1808) Joseph Bonaparte; (1813) Ferdinand VII; (1833) Isabella II; (1870) Amadeo I; (1873) a republic; (1874) Alphonso XII; (1886) Alphonso XIII.

Kings of Denmark—(1839) Christian VIII, son of Frederick VI (who was King of Denmark and Norway); (1848) Frederick VII; (1863) Christian IX; (1906) Frederick VIII; (1912) Christian X.

ROMAN RULERS.

B. C.	Name.
752	Romulus.
715	Numa Pompilius.
672	Tullus Hostilius.
640	Ancus Martius.
616	Tarquinius Priscus.
578	Servius Tullius.
534	Tarquinius Superbus.
509	Tarquins, expelled.
498	Lartius, 1st Dict.
488	Tribunes created.
483	Quaestors instit.
456	Cincinnatus, Dict.
453	Tribunes incr., 5 to 10.
445	Milit. Trib. created.
437	Censorship instit.
391	Marcus F. Camillus, Dict.
325	Papirius Cursor, Dict.
301	Fabius Maximus and Valerius Corvus.
260	Provin. Quaestors inst.
217	Fabius Maximus, Dict.
183	Cato, the Elder, Censor.
82	Sylla, Dict.
70	Crassus and Pompey, Cons'ls.
59	Pompey.
49	Julius Caesar.
43	Octavius Caesar, Mark Antony and Lepidus, 2nd Triumvirate.
31	Octavius (Caesar) Emp.

A. D.	Name.
14	Tiberius.
37	Caligula (Caius.)
41	Claudius.
54	Nero.
68	Galba.
69	Otho.
69	Vitellius.
70	Vespasian.
79	Titus.
81	Domitian.
96	Nerva.
98	Trajan.
117	Adrian (or Hadrian.)
138	Antoninus Pius.
161	Marcus Aurelius Antoninus and Lucius Verus.
171	Marcus Aurelius (alone).
180	Commodus.
192	Pertinax; Julianus.
193	Septimius Severus.
211	Caracalla and Geta.
212	Caracalla (alone).
217	Macrinus.
218	Heliogabalus.
222	Alexander Severus.
235	Maximinus.
238	Gordianus I.; Gordianus II.
238	Pupienus and Balbinus.
238	Gordianus III.
244	Philip the Arabian.
249	Decius.
251	Gallus.
254	Valerianus.
260	Gallienus.
268	Claudius II.
270	Aurelian.
275	Tacitus.
276	Probus.
282	Carus.
283	Carinus and Numerianus.
284	Diocletian.
305	Galerius and Constantius.
306	Constantine the Great.
330	Constantine removes seat of Empire to Constantinople.
337	Constantine II., Constans and Constantius.
361	Julian the Apostate.
363	Jovian.
364	Valentinian (West), Valens (East).
367	Gratian (West).
375	Valentinian II. (West).
379	Theodosius the Great (East).
394	Theodosius (East and West).
395	Arcadius (East), Honorius (West).
408	Theodosius II. (East).
425	Valentinian III. (West).
450	Marcian (East).
455	Petronius Maximus (West).
455	Avitus (West).
457	Leo the Great (East).
457	Majorianus (West).
461	Severus (West).
467	Anthemius (West).
472	Olibius (West).
473	Glycerius (West).
474	Julius Nepos (West).
474	Zeno (East).
475	Augustulus Romulus (West).
476	Rome taken by Odoacer, King of Italy; extinction of Western Empire.

ROMAN EMPIRE OF THE EAST.

A. D.	Ruler.
491	Anastasius.
518	Justin I.
527	Justinian I.
565	Justin II.
578	Tiberius II.
582	Maurice.
602	Phocas.
610	Heraclius.
641	Constantine III.
641	Constans II.
668	Constantine IV. (Pogonatus)
685	Justinian II.
695	Leontius.
698	Tiberius III.
705	Justinian II. (again).
711	Philippicus Bardanes.
713	Anastasius II.
716	Theodosius III.
718	Leo (the Isaurian).
741	Constantine V. (Copronymus)
775	Leo IV.
780	Constantine VI. (Porphyrogenitus).
797	Irene
797	Nicephorus.
811	Michael (Curopalatts).
813	Leo V. (the Armenian).
820	Michael (Balbous).
829	Theophilus.
842	Michael III.
867	Basilius.
886	Leo VI. (the Philosopher).
911	Constantine VII.
919	Constantine and Romanus.
959	Romanus II.
963	Nicephorus Phocus.
969	John Zemisses.
976	Basilius.
1025	Constantine VIII.
1028	Romanus Argyrus.
1034	Michael IV.
1041	Michael (Caliphales).
1042	Constantine (Monomachus).
1054	Theodora (Empress).
1056	Michael VI.
1057	Isaac (Comnenus).
1059	Constantine X. (Ducas).
1068	Romanus Diogenes.
1071	Michael Ducas.
1078	Nicephorus (Boton).
1081	Alexius I. (Comnenus).
1118	John (Comnenus).
1143	Manuel (Comnenus).
1180	Alexius II. (Comnenus).
1183	Andronicus (Comnenus).
1185	Isaac Angelus.
1195	Alexius Angelus (the Tyrant)
1203	Alexius IV.
1204	Alexius V.
	At Nicaea.
1204	Theodore Lascaris I.
1222	John III. Ducas.
1255	Theodore Lascaris II.
1259	John IV. Lascaris.
	Restored to Constantinople.
1261	Michael VIII.
1282	Andronicus II.
1295	Michael IX. (Regent).
1328	Andronicus III.
1341	John Palaeologus I.
1347	John Cantacuzenus (Regent).
1376	Andronicus IV.
1379	John Palaeologus I. (restored).
1391	Manuel II.
425	John Palaeologus II.
1448	Constantine XIII. (Palaeologus).
1453	Constantinople taken by the Turks, extinction of the Eastern Empire.

Kings of Sweden—Before 1001 the Swedish rulers were known as Kings of Upsala. The sovereigns since 1389 when Margaret of Denmark was called to the throne, have been: (1412) Eric XIII; (1440) Christopher III; Charles VIII (Canuteson); (1483) John II; (1520) Christian II; (1523) Gustavus I (Vasa); (1560) Eric XIV; (1569) John III; (1592) Sigismund III; (1604) Charles IX; (1611) Gustavus II (Adolphus the Great); (1633) his daughter, Christina; (1654) Charles X; (1660) Charles XI; (1697) Charles XII; (1718) Ulrica Eleanora and her husband, Frederick I; (1741) Frederick I; (1751) Adolphus Frederick; (1771) Gustavus III; (1792) Gustavus IV; (1809) Charles XIII; (1818) Charles XIV (John Bernadotte of France); (1844) Oscar I; (1859) Charles XV; (1872) Oscar II; (1907) Gustavus V.

Norway, which had been united with Denmark and Sweden, in 1389, under Margaret, declared independence in 1814, but the union of Norway and Sweden was not finally dissolved until 1905, when Prince Carl of Denmark was elected King of Norway as Haakon VII.

THE IMPERIAL GERMAN CROWN.

(From a communication in the London Times.)

Mr. G. A. H. Samuel's statement that the Iron Crown of Lombardy was regarded as the symbol of Imperial Power cannot be accepted.

It was the crown of the Longobards, and was used by Charlemagne and the German emperors, as well as by Napoleon I., for their coronation as King of Italy.

This crown is still kept at Monza, near Milan.

When the Emperor Otto III. opened the tomb of Charlemagne in the Minster of Aachen in 1000 Charlemagne was found sitting on a marble throne, with sword and Bible, but probably without crown, though that is not certain.

In 813 Charlemagne (who died 814) made his son Lewis crown himself Emperor of Aachen; similarly Napoleon crowned himself Emperor of the French in 1804, though Pope Pius VII. was present by his invitation.

The Imperial Golden Crown of the Holy Roman Empire dates from the tenth century; the arch was added by Conrad II., 1024-1039.

This crown, the Royal Crown (probably the gift of Richard of Cornwall, brother of Henry III. of England, who was crowned German King at Aachen in 1257 during the interregnum after the ruin of the Hohenstauffen), the sword and other insignia, were kept at Nurnberg in Dürer's time.

POPES, CHRONOLOGICAL LIST OF.

The list is that of the *Annuario Pontificio* with Anti-Popes inserted in italics. The Popes who resided at Avignon are marked with (A.). c. = circa (about).

615	St. Deusdedit I.						

Pius XI (Achilles Ratti) was born at Desio, Italy, May 31, 1857, and on June 13, 1921 was made a Cardinal and became Archbishop of Milan.

All the Popes have been Italian since 1591, when Innocent IX (Facchinatti) ascended the throne.

The Pope is known as the Bishop of Rome or Roman Pontiff.

The temporal power of the Pope, which covered 16,000 square miles until the reign of Pius IX, and which was altogether extinguished by the Italian Government in 1871, was re-established by the Lateran Treaties of 1929, which create the State of the Vatican City, including St. Peter's Square.

APOSTLES, DEATHS OF.

It is generally believed that only one of Christ's Apostles, John, escaped martyrdom.

Matthew is supposed to have been slain with a sword in Ethiopia.

James, son of Zebedee, was beheaded at Jerusalem.

James, the brother of the Savior, was thrown from a pinnacle of the Temple and then beaten to death with a fuller's club.

Philip was hanged up against a pillar at Hieropolis, a city of Phrygia.

Bartholomew was flayed alive at Albanapolis, in Armenia.

Andrew suffered martyrdom on a cross at Patrae, in Achaia.

Thomas was run through the body with a lance at Coromandel, in the East Indies.

Thaddeus was shot to death with arrows.

Simon Zelotes was crucified in Persia.

Peter was crucified, head downward, it is said, during the Neronian persecution.

Matthias was first stoned and then beheaded, and Paul was beheaded at Rome by the tyrant Nero.

Judas Iscariot, after the betrayal of his Lord, hung himself.

FORM OF ADDRESS FOR PERSONS OF RANK.

The *President* of the United States is usually, and properly, spoken to as "Mr. President"; in writing to him, "My dear Mr. President" is good usage, and so is "Dear Mr. President."

A member of the *American Cabinet* may be addressed as "Dear Mr. Secretary"; the head of a bureau may be written to as "Dear Mr. Commissioner."

A member of the *upper branch of the Congress* is "My dear Senator," or "Dear Senator"; *a member of the lower branch* may be written to as "My dear Congressman," or "Dear Mr. Representative."

A member of the *Supreme Court* of the United States is "Dear Mr. Justice," adding his family name if preferred.

An *Emperor* is to be addressed, in a letter, as "Sire," or "Your Imperial Majesty."

A *King or Queen* is to be addressed, in a letter, as "Sire" (or "Madam"), or "Your Majesty." The envelope is to be addressed, "The King's (or Queen's) Most Excellent Majesty."

Princes and *Princesses* and other persons of royal blood are addressed as "His (or Her) Royal Highness." Here, as in the cases above, a letter may begin "May it please," following with the words "Your Majesty" or "Your Royal Highness." "May it please" goes well at the start of any letter.

A *Duke* or *Marquis* is "My Lord Duke" (or "Marquis"), a Duke is "His (or Your) Grace."

Wives of any peer may be addressed as "Madam," with the further alternative of "Your Ladyship," or "Your Grace," if she is of high rank. Women of peers may be addressed also as "the Right Honorable," or "the Honorable," according to the rank. The wife of an Earl is a *Countess*.

Abroad, a *Cardinal* is "Your (or His) Eminence," An *Archbishop* is "My Lord" or "His Grace." A *Bishop* is "My Lord." An *Archdeacon* is "Venerable Sir."

In the U. S. a *Cardinal* is "Your Grace," and so is an *Archbishop* — or, "Most Reverend" can be used to any high church official.

An *Ambassador* is "Your Excellency." A *Minister Plenipotentiary* is "Sir."

SHORT DICTIONARY OF AMERICAN BIOGRAPHY.

Born.	Died.	Name.	Occupation.
1807	1873	Agassiz, L. J. R.	Scientist.
1763	1848	Astor, John Jacob	Merchant.
1810	1891	Barnum, P. T.	Showman.

ROBERT BURNS NOT A DRUNKARD.

(From the Medical Journal and Record, N. Y.)

Those who achieve fame excite envy, and if great men are not otherwise crucified it is whispered that they were either tuberculous, insane or alcoholic.

When one considers the frequency of tuberculous infection, the not uncommon use of alcoholic drinks and the fact that we all get off the hooks at times, such simplicity in accounting for genius loses all its intended force in belittling greatness, but, as Carlyle said, very few persons think and the distinguished are, therefore, often looked upon as altogether abnormal and more or less pariah.

In this centenary of the death of Schubert attention is called by some writers to his habits of living as connected with his early death. Others, in better business, have pointed to the most extraordinary amount, as well as quality, of work he turned out, which could only be the product of a person of unusual vigor.

In fact, his friends were so accustomed to his exuberance that they did not appreciate his condition when he was taken with typhus fever, a disease not particular in respect to its choice of victims.

It is worth noting that two other great persons, Raphael and Mozart, were also carried off in their thirties by this same disease.

Typhus is the "disease of human wretchedness" and at least two of these celebrated persons were allowed by the society which they benefited to live more or less wretchedly.

Tuberculosis and insanity not fitting the case, Robert Burns (another genius who died before forty) was, of course, alcoholic. Dr. H. B. Anderson of Toronto in the *Annals of Medical History* for March has looked into his case and decides that the poet died of rheumatism and heart disease dating from early life, with which alcohol had nothing more to do than in any ordinary man of his time.

Not too much was known of heart lesions in the days of Burns. He had a bodily vigor that might seem to preclude the possession of a bad heart, but every clinician knows that these may exist together, and we know of one professional strong man, capable of holding up six other men, who had a badly leaking blood pump.

Dr. Anderson gives an interesting account of Burns's relation to members of the medical profession, some of whom were fully appreciative of his genius and did much to aid him.

He quotes several credible witnesses to the effect that Burns might have drunk as much as the average run of men of his day, but not more than they, and "it is difficult to believe that a man who rode thirty or forty miles daily as a gauger, of whose work in the Excise no complaint was ever made; who superintended his farm, watched over the education of his children, interested himself in libraries, kept up a large correspondence, collected, rewrote or composed some two hundred and sixty songs with accompanying letters, the last less than a fortnight before his death, was debased and dying from alcoholism."

Dr. Anderson traces the evidence of Burns's illness and states that at the age of 36 he had an attack of rheumatic fever which confined him to bed for over three months.

"Beyond this point the case was an ordinary one of rheumatism with heart complications, shortness of breath, faintness, weakness, rapid irregular pulse and, toward the end, fever, parched tongue and delirium, presumably due to a bacterial endocarditis which developed as a terminal infection."

FAMOUS POEMS AND THEIR AUTHORS.

"Elegy Written in a Country Churchyard," Thomas Gray (1716-1771).

"The Minstrel," James Beattie (1735-1803).

"Rock of Ages," Augustus Montague Toplady (1740-1778).

"The Farmer's Boy," Robert Bloomfield (1766-1823).

"The Burial of Sir John Moore," Charles Wolfe (1791-1823).

"Woodman, Spare that Tree," George P. Morris (1802-1864).

"The Buccaneer," Richard Henry Dana (1789-1879).

"Star Spangled Banner," Francis Scott Key (1790-1843).

"La Marseillaise," Rouget de L'Isle (1760-1836).

"Home, Sweet Home," John Howard Payne (1792-1852).

"From Greenland's Icy Mountains," Reginald Heber (1783-1826).

"Battle Hymn of the Republic," Julia Ward Howe (1819).

"Ben Bolt," Thomas Dunn English (1819).

"Rocked in the Cradle of the Deep," Emma C. Willard (1847-1870).

"Hail, Columbia," Joseph Hopkinson (1770-1842).

POETS-LAUREATE OF ENGLAND.

There is no authentic record of the origin of the office of Poet-Laureate of England. According to Warton, there was a *Versificator Regis*, or King's Poet, in the reign of Henry III. (1216-1272), and he was paid 100 shillings a year. Geoffrey Chaucer (1328-1400) assumed the title of Poet-Laureate, and in 1389 got a royal grant of a yearly allowance of wine. In the reign of Edward IV. (1461-1483) John Kay held the post. Under Henry VII. (1485-1509) Andrew Bernard was the Poet-Laureate, and was succeeded under Henry VIII. (1509-1547) by John Skelton. Next came Edmund Spenser, who died in 1599; then Samuel Daniel, who died in 1619, and then Ben Jonson (app't'd 1619). Sir William Davenant was appointed in 1638. John Dryden was appointed in 1670 but was deposed at the Revolution. The others, with the date of appointment, when known, have been: Thomas Shadwell, 1689; Nahum Tate, 1692; Nicholas Rowe, 1715; the Rev. Laurence Eusden, 1718; Colly Cibber, 1730; William Whitehead, 1758, on the refusal of Gray; Rev. Thomas Warton, 1785, on the refusal of Mason; Henry J. Pye, 1790; Robert Southey, 1813, on the refusal of Sir Walter Scott; William Wordsworth, 1843; Alfred Tennyson, 1850; Alfred Austin, 1896; Robert Bridges, 1913.

BLUEBEARD.

The hero of the well-known nursery tale is so named from the color of his beard. The story is widely known in Western Europe, but the form in which it has become familiar is a free translation of that given by Perrault in 1697.

In this story Bluebeard is a Signeur of great wealth, who marries the daughter of a neighbor in the country, and a month after the wedding goes from home on a journey, leaving his wife the keys of his castle, but forbidding her to enter one room.

She can not resist her curiosity, opens the door, to find the bodies of all Bluebeard's former wives, and at once sees the fate to which she herself is doomed. Bluebeard, on his return, discovers from a spot of blood upon the key which could not be cleaned off, that his wife had broken his command and tells her that she must die.

She begs for a short respite to commend herself to God, sends her sister Anne to the top of the tower to seek for help and finally is just on the point of having her head cut off, when her two brothers burst in and dispatch Bluebeard.

There are many versions of the story, all agreeing in essential details. It is found in the German, French, Greek, Tuscan, Icelandic, Esthonian, Gaelic, and Basque folklore.

Memorable Dates.

Note—Consult also the various other collections of dates, such as English Channel Swimmers, Fast Ocean Passages, Fast Train Records, Fast Trips Around the World, Coal Mine Disasters, Polar Explorations, Troops Engaged in U. S. Wars, Union Army Losses in the Civil War, Confederate Troops in the Civil War, World War Casualties, Chronology of the Year, Marine Disasters, Chief Political Assassinations, Tables of Rulers, Authors, etc.

THE YEAR 1 B.C.

The year 1 B.C. is the first year before the beginning of the Christian Era, and the year 1 A.D. is the first year of the Christian Era; so that January 1, 1 B.C. is just one year before January 1, 1 A.D.

The elapsed number of years between a date B.C. and the same date A.D. is one less than the sum of the years.

Because of this fact, astronomers use a different method of designating the years before the Christian Era, calling the year 1 B.C. the year 0, the year 2 B.C. the year 1; so that, in astronomical reckoning, the year 70 B.C. is the year —69, and the year 2000 years later will be A.D. 1931 = —69 + 2000.

B. C.

3400 Beginning of the Royal Dynasties in Egypt (Breasted)
3000-1800 (Breasted) Egyptian pyramids built, extending for 60 miles south from Gizeh nearly opposite Cairo.

1920 The U. S. transport Buford (Soviet Ark) took to Finland Emma Goldman, Alexander Berkman and 200 other Reds (Dec., 1919-Jan., 1920).

—— The Eighteenth Amendment to the U. S. Constitution, providing for Nation-wide Prohibition, was proclaimed in effect Jan. 16.

—— Frederick A. Parmenter, shoe factory paymaster at South Braintree, Mass., was robbed of $15,000 and shot to death. Nicola Sacco and Bartolomeo Vanzetti, anarchists from Italy were convicted, July 14, 1921, of the murder of Parmenter and were executed Aug. 23, 1927.

—— International Court of Justice adopted by League of Nations, Aug. 2.

—— The Nineteenth Amendment, giving suffrage to women, was proclaimed in effect, Aug. 26.

—— Wall St., N. Y., bomb explosion, killed over 30; injured over 100; did over $2,000,000 property damage, Sept. 16.

—— Earthquakes and landslides in Kansu Province, in western China, bordering Tibet, killed over 100,000 persons.

1921 President Harding signed joint resolution (passed by House, June 30, by Senate July 1) of Congress declaring peace with Germany and Austria, July 2. The treaty was signed Aug. 25, at Berlin, by United States and German representatives; was ratified Sept. 17 by the German National Council; ratified by the United States Senate (66 to 20) on Oct. 18.

—— America's Unknown Soldier was buried at Arlington National Cemetery, near Washington, Nov. 11

—— Sinn Feiners burned Custom House, Dublin, May 25.

—— Arkansas River floods and rain swept away 665 houses at Pueblo, Col., property loss over $20,000,000; 1,500 dead or missing, June 3-4.

—— Collapse and explosion of dirigible balloon, ZR-2, over Hull, England; 42, including U. S. Naval men, were killed, Aug. 24.

—— Explosion of a new gas plant at Oppau, on the Rhine, Germany, killed hundreds and destroyed property worth millions, Sept. 21.

—— Gerald Chapman and George ("Butch") Anderson, on Oct. 24, held up a mail wagon at Broadway and Leonard St., N. Y. City, and stole 4 sacks of registered mail, containing $1,454,129, of which $100,000 was cash or negotiable securities. They escaped, but were caught and convicted, and on Aug. 23, 1922, were sentenced to 25 years in the Federal prison at Atlanta, Ga. They escaped, on Mch. 27, 1923. Anderson, at the time unrecognized, was shot to death in the midwest. Chapman was hanged at the Conn. State Prison, Wethersfield, on April 6, 1926. He had been convicted of killing a policeman in a store robbery at New Britain.

—— Limitation of Armaments Conference met at Washington, Nov. 11; it adjourned Feb. 6, 1922.

1922 Roof of Knickerbocker (movie) Theatre collapsed at Washington, D. C.; 98 died from injuries, Jan. 28.

—— Dirigible balloon Roma exploded descending at Hampton, Va.; 34 died of injuries, Feb. 21.

—— Irish Free State established, Dec. 6.

—— Fourteen republics of Russia combined, in convention at Moscow, as the Union of Soviet Socialistic Republics, Dec. 20.

1923 French and Belgian troops began occupation of the Ruhr, Jan. 11.

—— The World's friendship airplane S-C II, reached Rio Janeiro, from New York, Feb. 8.

—— Earthquake, followed by fires and tidal waves, destroyed part of Tokio and Yokohama, over 100,000 were killed, Sept. 1.

1924 Allies and Germany, in Agreement of London, accepted Dawes Reparation Plan, Aug. 16; French troops began evacuation of Ruhr Aug. 18; the Agreement was formally signed Aug. 30 at London by Germany and the powers concerned, and Owen D. Young of the United States assumed duties as Agent General of Reparation Payments.

—— Nikolai Lenin (V. I. Ulianov), 54, Premier of Soviet Russia, died of apoplexy, near Moscow, Jan. 21.

—— Former President Woodrow Wilson died at his home, Washington, Feb. 3.

—— U. S. Senate, 47 to 34, adopted resolution asking President Coolidge to call for resignation of Sec'y of Navy Denby on account of oil leases, Feb. 11; he resigned, Feb. 18, as of March 10.

—— President Coolidge asked Atty. Gen. Daugherty by letter to resign, which he did March 28.

—— Twenty were killed, sixty injured, and property was destroyed for miles around where explosion destroyed nitration works at Nixon, N. J., on Raritan River.

—— Earthquake partly destroyed San Jose, Costa Rica, March 4.

—— U. S. Senate ratified treaty with Britain on searching of rum running ships off U. S. coasts, March 13.

—— Three army airplanes left Santa Monica, Cal., March 6, on trip around the world; they reached N. Y. City on the return trip, Sept. 8, and landed at Seattle, Wash., Sept. 28.

—— The U. S. Senate adopted the Reed amendment to the Immigration Bill, which bars from ad-

mission to the U. S. any Japanese except Ministers, members of the professions and arts, and students and their wives and children, Apr. 15.

—— Republic of Greece inaugurated at Athens, May 1.

—— N. F. Leopold, jr., 19, and Richard Loeb, 19, kidnapped for ransom and killed Robert Franks, 13, at Chicago, May 22; they pleaded guilty, July 21, and were sentenced to prison for life.

—— The German Reichstag, 247 to 183, accepted the Dawes reparation plan, June 6.

—— President Millerand of France resigned, June 11.

—— Th Prince of Wales began his American tour at N. Y., Aug. 29; and left there for England, Oct. 25.

—— The ZR-3, dirigible, left Friedrichshafen, Germany, Oct. 12, 12:35 A. M.; arrived at New York, Oct. 15, 8:40 A. M.; reached Lakehurst, N. J., 9:55 A. M.

1925 President Coolidge handed down his arbitral award in the controversy between Chile and Peru over possession of Tacna and Arica, calling for a plebiscite by which these provinces shall determine their own nationality, and holding that the town and Province of Tarata shall revert to Peru, March 9. Gen. John J. Pershing was made head of the Plebiscite Commission, but the entire proceedings were abandoned in 1926.

—— Th U. S. Senate ratified, March 13, a treaty recognizing Cuban sovereignty over the Isle of Pines; in effect, March 23.

—— A storm in Missouri, Southern Illinois and Indiana killed over 830 persons, injured 3,800 and destroyed property valued at $10,000,000.

—— 200 were killed by the explosion of bombs in the Cathedral of Sveti Kral, at Sofia, at the funeral of Gen. Georghieff, who was assassinated April 14. The dead included Police Prefect Kissoff, Mayor Paskaleff, ex-War Minister Davidoff, Gens. Naidenoff, Nezrezoff, Loloff, Zlatereff, and Popoff; Dept. Prefect Medelecheff, April 16.

—— Great Britain, by act of Parliament, restored the gold standard, May 5.

—— Earthquakes in Japan killed 381, and caused $50,000,000 property loss, May. 23.

—— Earthquakes partly destroyed the City of Santa Barbara, Cal., June 29.

—— John T. Scopes was found guilty at Dayton, Tenn., of having taught evolution in the high school and was fined $100.

—— The U. S. war fleet visited Australia and New Zealand in July-Oct.

—— The 2 Chinese Nine Power Treaties of the Washington Arms Conference were ratified at Washington by the U. S., France, Japan, Italy, Great Britain, China, Portugal, Belgium and Holland, Aug. 5.

—— The U. S. Navy rigid dirigible airship Shenandoah (which had left Lakehurst, N. J., on Sept. 2, bound for St. Paul) was torn to pieces at 5 A. M., Sept. 3, by a thunder squall while passing over Ava, Ohio; 14 of the crew were killed, including Lieut. Com. Zachary Lansdowne, Sept. 3.

—— The Persian Nat'l Assembly deposed the Shah, head of the Kazar dynasty which had ruled since 1779.

—— Germany ratified the Locarno treaties, Nov. 27. They were ratified by Great Britain, Germany, France, Belgium, Italy, Poland, and Czechoslovakia, at London, Dec. 1. They went into effect on Sept. 14, 1926.

1926 The anthracite coal strike, which began Sept. 1, 1925, was secretly settled, at Philadelphia, Feb. 12; work resumed Feb. 18.

—— Gerald Chapman was hanged at Connecticut State Prison, April 6.

—— A general British strike, due to coal miners strike and lockout, and involving 2,500,000 workers, began May 3; called off May 12, but the coal miners stayed out for months.

—— Lieut. Com. Richard E. Byrd, U. S. N., with Floyd G. Bennett, pilot, in the airplane Josephine Ford, left Kings Bay, Spitzbergen and flew to the North Pole and back, in 15 hours, 51 minutes, May 9. Thence west to Amsterdam Island and home.

—— The airship Norge, carrying the Amundsen-Ellsworth-Nobile expedition from Spitzbergen to Alaska, left Kings Bay at 4.55 A.M. N. Y. time, and crossed the North Pole, May 11, 10.30 P. M. The balloon landed and ended her journey May 14, at Teller, Alaska.

—— The Sesquicentennial Exposition, at Philadelphia, opened, May 31. It closed Nov. 30.

—— The Eucharistic (Roman Catholic) Congress opened, at Chicago, June 20, and closed on June 24.

—— A great earthquake destroyed more than 2,000 houses in the island of Rhodes in the Aegean Sea, June 26.

—— The N. Y. State Baumes anti-crime laws, imposing life sentences on hardened offenders went into effect, July 1.

—— 21 were killed, 80 buildings wrecked, and $85,000,000 of property and ammunitions destroyed by explosions and fires when lightning struck the navy munitions reservations at Lake Denmark, N. J., July 10.

—— The Assembly of the League of Nations, at Geneva, Sept. 8, unanimously admitted Germany to the League and to a permanent Council seat and increased the non-permanent members of the Council from 6 to 9.

—— A tropical hurricane from the ocean swept the east coast of Florida, and into Alabama, and Mississippi, Sept. 18, killing 372; 6,281 were hurt, 17,884 families temporarily made homeless. 5,000 homes were destroyed. The greatest damage was at Miami and its suburbs, Fort Lauderdale, Hollywood, Dania and Hialeah, where the dead numbered 250. 110 bodies were found at Moore Haven. In the Bahamas, at Turks' and Calcos Islands 17 were killed; over10 died at Bimini.

—— Queen Marie of Roumania began, at New York City, on Oct. 18, a tour of the United States and Canada. She left New York for Bucharest, Nov. 24.

—— A hurricane killed over 600 at Havana and other places in Cuba, Oct. 20. On the Isle of Pines, 40 were killed.

—— An earthquake partly destroyed Managua, and Leon, in Nicaragua, Nov. 5.

—— Mrs. Frances Stevens Hall and her brothers, Henry Stevens and Willie Stevens, were acquitted, at Somerville, N. J., on Dec. 3, of the murder of Mrs. Eleanor R. Mills. The charges against Mrs. Hall, Henry Stevens, Willie Stevens and H. de la B. Carpender, in connection with the murder of the Rev. E. W. Hall, were quashed on Dec. 4 and all defendants freed. Hall and Mrs. Mills were found slain, Sept. 14, 1922, in a country lane near New Brunswick, N. J.

1927 600 U. S. marines and several war vessels were ordered to Nicaragua, Jan. 6, to protect American interests; on Jan. 12 Secretary of State Kellogg told the Senate Committee on Foreign Relations that Mexico was stirring up revolution in Nicaragua; fighting began actively there, Feb. 5, between the Government (Conservative) troops and the Liberals; president Coolidge sent more marines, and dispatched ex-Sec. of War. H. L. Stimson with an ultimatum to the so-called Liberals, who laid down arms—all except Gen. Sandino, who in July, began a guerrilla warfare on the marines which lasted through the year.

1927, In Mexico, scattered revolutionary outbreaks against the government of president Calles began early in January in the State of Coahuila, and spread to several other states during the summer. Roman Catholics were charged by Calles with taking part, due to his action in closing churches, convents and schools in accordance with a provision in the constitution separating Church and State. Many Catholics were killed in local clashes and many others were executed by troops and officials. The expulsion of the archbishops and other prelates began in April. Gen. Francisco Serrano, Oct. 3, headed an army revolt, but by Nov. 4, Serrano, Gen. Quijano, Gen. Gomez and a score of other rebel chiefs had been captured and shot.

—— Telephone connection between New York City and London was established, Jan. 7.

—— Gounod's "Faust," sung in the Auditorium, Chicago, was heard by radio at New York City, Jan. 21.

—— Civil war in China caused over 400 British troops to be landed at Shanghai, Jan. 27; 1,200 U. S. marines got there on March 5, and Japan, France, Spain, Portugal and Holland put over 15,000 soldiers ashore. At Nanking, March 23, Cantonese troops shelled the burning Standard Oil plant, and killed several foreigners, including Dr. J. E. Williams of Shawnee, O., Vice President of Nanking University. Bombardment of the city by foreign warships is said to have killed 20,000 Chinese. The northern Chinese troops, April 6, raided the Soviet Embassy at Pekin and executed many Chinese and Russian communists. By April 9, there were 172 foreign warships at

Chinese ports. The civil war continued through the summer, and the end of the year saw no centralized government established.

—— President Coolidge signed the bill establishing a Federal Radio Commission, Feb. 18.

—— The U. S. Supreme Court voided the Doheny leases Feb. 28. President Coolidge cancelled the Naval Reserve oil leases, March 17.

—— The British Privy Council awarded Newfoundland 120,000 square miles of Labrador.

—— Earthquakes in Central Japan killed over 2,500, March 7.

—— The $1,000,000 libel suit of Aaron Sapiro, a Chicago lawyer, against Henry Ford, begun March 15, was settled out of court, at Detroit, Ford later withdrew all charges of his paper the Dearborn Independent, against Jews, and other libel suits against him ended.

—— Albert Snyder, art editor of "Motor Boating" was killed, March 20, at his home, Queens Village, L. I., N. Y. His wife, Ruth Brown Snyder, and her lover, Henry Judd Gray, married, a corset salesman, of E. Orange, N. J., confessed, and were convicted, May 9, of murder. They were executed at Sing Sing, Jan. 12, 1928.

—— The Massachusetts Supreme Court, April 5, refused a new trial to Nicola Sacco and Bartolomeo Vanzetti, who in 1920 killed and robbed. it was alleged, a paymaster and his guard at So. Braintree, Mass. They were executed, Aug. 23, at the State Prison, Charlestown, Mass. Anarchist bomb demonstrations and protest strikes in North and South America, and Europe, preceded and followed the execution.

—— Floods in the Mississippi River and its lower branches began early in April and for six weeks inundated 20,000 square miles in Arkansas, Louisiana, Mississippi, Missouri, Tennessee and Kentucky. The property loss was put at $270,000,000; over 4,400,000 acres of crops were destroyed, also 25,000 horses, 50,000 cattle, 148,000 hogs, 1,300 sheep, and 1,300,000 poultry; 600,000 persons were made for a time homeless, and several hundred were drowned. Tornadoes killed 22 in Illinois, April 19, and 250 on May 9 in Arkansas, Illinois, Iowa, Kansas, Louisiana, Missouri, Texas and Wyoming.

—— Capt. C. M. Nungesser and Maj. Francois Coli left Paris, May 8, in a biplane, bound for New York. They never were heard from. They may have reached the Newfoundland coast.

—— Capt. Charles A. Lindbergh, alone in his monoplane, the Spirit of St. Louis, hopped off, May 10, at San Diego, Calif. He reached St. Louis May 11; left there May 12 and landed the same day at Mineola, N. Y. He left there on May 20, reached Paris May 21, flew to Brussels, May 28; Brussels to London, May 29; England back to Paris, June 3; Paris to Cherbourg, June 4, where he boarded the U. S. Navy Cruiser, Memphis, on the deck of which was the boxed-up Spirit of St. Louis. The ship arrived on June 10 at the Virginia Capes; Lindbergh was welcomed June 11, by President Coolidge, at Washington, at New York City on June 13 by Mayor J. J. Walker and Gov. A. E. Smith; he returned to Washington and on June 16 flew his Spirit of St. Louis to Mineola, N. Y. and was welcomed at Brooklyn. On June 17 he flew to St. Louis. On July 20 he began a 22,350-mile flight from Mineola over the United States in a transcontinental tour in the interest of aviation, backed by the Guggenheim Fund, returning in his plane to Mitchel Field on Oct. 23.

On Dec. 13-14 he made a non-stop flight in his monoplane from Washington to Mexico City, where his mother, going from Detroit by plane, joined him on Dec. 22. Thence he flew to Guatemala City, Dec. 28; to Belize, British Honduras, Dec. 30; to San Salvador, Salvador, Jan. 1, 1928; to Tegucigalpa, Jan. 3; to Managua, Nicaragua, Jan. 5; to San Jose, Costa Rica, Jan. 7; to Panama City, Jan. 9; to Colon, Jan. 12; to Cartegena, Colombia, Jan 26; to Bogota, Jan. 27; to Caracas, Venezuela, Jan. 29; St. Thomas, Virgin Isles, Jan. 31; San Juan, Porto Rico, Feb. 2; Santo Domingo, Feb. 4; Port au Prince, Feb. 6; Havana with mail, Feb. 8; St. Louis, Feb. 13.

—— Andrew Kehoe, a tax-crazed farmer, killed his wife, then blew up the school house at Bath, Mich., and killed 44 and himself, May 18.

—— Clarence D. Chamberlin and Charles A. Levine left Mineola, N. Y., in the monoplane, Columbia, June 4, and landed, out of gas, June 6, near Eisleben, Saxony.

—— Col. Francesco de Pinedo reached Ostia, Italy, June 16, ending his airplane trip to South and North America.

—— Army Lieuts. L. J. Maitland and A. F. Hegenberger left Oakland, Calif., June 28 in an airplane and landed on June 29 at Wheeler Field, Hawaii.

—— Naval Commander R. E. Byrd, Lieut. G.O. Noville, Bert Acosta and Bernt. Balchen, left Mineola, N. Y., June 29, in th monoplane, America, and descended, June 30, on the French sea coast at Ver Sur Mer.

—— Earthquakes in Palestine and Transjordania killed several hundred, July 11.

—— Communists at Vienna, Austria, burned the Palace of Justice, July 15.

—— The International Peace Bridge over Niagara River, Buffalo, N. Y. to Fort Erie, Can., was opened to vehicles, June 6, and was dedicated and officially opened, Aug. 7.

—— The Woolaroc and the Aloha, airplanes in the $35,000 Aerial Derby, left Oakland, Calif., Aug. 16, and landed Aug. 17 at Hawaii. The planes, Miss Doran and Golden Eagle were lost at sea.

—— Paul Redfern left Brunswick, Ga., Aug. 25, in a monoplane, for Brazil; never heard from.

—— Princess Lowenstein-Wertheim, Capt. Leslie Hamilton and Lieut. Col. F. F. Minchin, in the airplane, St. Raphael, left England for New York; never heard from.

—— Capt. Jerry Tully and Lieut. James Medcalf in the monoplane, Sir John Carling, left Harbor Grace, Newfoundland, Sept. 7, for London; never heard from.

—— Philip A. Payne, L. W. Bertaud, and J. D. Hill, left Old Orchard Beach, Maine, Sept. 6, for Rome; never heard from. A part of the plane was found at sea off Newfoundland.

—— A tornado at St. Louis killed 87, injured 1,500, and destroyed 1,000 houses, Sept. 29.

—— Ruth Elder and George Haldeman left Mineola, N. Y., in the airplane, American Girl, Oct. 11, and on Oct. 13 descended to the sea, 350 miles northeast of the Azores, and were rescued.

—— Rains and floods, beginning Nov. 2, and lasting several days, devastated the river valleys of New England, particularly in Vermont, and the Canadian Province of Quebec. Over 120 persons were killed at Montpelier, Barre, Bellows Falls, Brattleboro and other places. Roads and railways, hundreds of houses and thousands of cattle were destroyed.

—— Mrs. Frances W. Grayson, Lieut. Oskar Omdal; Brice Goldsborough, and Fred Koehler, in the hydroplane, The Dawn, left Mineola, N. Y., Dec. 23, for Europe; never heard from. May have fallen into sea off Cape Cod, Mass.

—— Marion Parker, 12, kidnapped and slain at Los Angeles, by W. E. Hickman, 19. Dec. 15-17. He was hanged on Oct. 19.

1928 Pan-American Conference, at Havana, Cuba; opened by President Coolidge, Jan. 16; adjourned Feb. 20.

— Trotsky, Kameneff, Zinovieff, Rakovsky, and Radek exiled by the Soviets from White Russia, Jan. 16.

—— The St. Francis winter-supply dam, 40 miles north of Los Angeles, collapsed; 450 lives lost, 700 houses swept away.

—— The airplane Bremen (Capt. H. Koehl, J. E. Fitzmaurice, and Baron von Huenefeld) left Dublin, April 12, and landed, April 13, on Greenely Island, Straits of Belle Isle, Canada, south of Labrador, where they were rescued, and reached N. Y. City April 27.

—— Capt. G. H. Wilkins and Lieut. C. B. Eielson, went by airplane, from Point Barrow, Alaska, April 15, and in 20 hours and 20 minutes landed on Dead Man's Island, near Spitzbergen.

—— Earthquakes in Bulgaria killed 103 and destroyed 14,000 houses, April 14-28.

—— On her second trial, Mrs. Florence E. S. Knapp, Sec. of State of N. Y., was convicted, May 26, of larceny of the 1925 census funds and was sentenced to 30 days in prison.

—— Gen. Umberto Nobile and his balloon crew left King's Bay, Spitzbergen, on May 23rd. crossed the North Pole on May 24. On the way back the balloon went down on the ice and was destroyed; 7 were lost, the others, Nobile included, were rescued. Roald Amundsen, South Pole discoverer, was lost in one of the rescue expeditions.

—— Capt. C. Kingsford-Smith and 3 others left Oakland, Calif., by airplane, on May 31; and after landing at Hawaii and Fiji, arrived at Brisbane, Australia, June 8.

—— Miss Amelia Earhart and two others left Trespassey, Newfoundland, in a monoplane, June 17, and on June 18 alighted in the harbor of Durry Port, Wales.

—— Capt. Arturo Ferrarin and Maj. Carlo del Prete, in an airplane, left Rome, July 3, made a non-stop flight across the Atlantic, landing on the Brazil coast, on July 5.

—— Capt. Alfred Loewenstein, Belgian financier, jumped or fell from his plane into the English Channel and died, July 4.

—— A hurricane swept over the West Indies and Florida, Sept. 12-17, killing 60 on the Leeward Isles, 660 on Guadeloupe, 200 on Porto Rico, and 1500 to 2500 in Florida. Damage, $85,000,000 in Porto Rico, $25,000,000 in Florida, $7,000,000 elsewhere.

—— The balloon, Graf Zeppelin, under Capt. Hugo Eckener, with crew of 38, and 20 passengers, left Friederichshaven, Germany, on Oct. 11, and on Oct. 15, reached N. Y. City an anchored at Lakehurst, N. J. She left there Oct. 29 and reached Friederichshaven on Oct. 31.

—— Capt. C. B. D. Collyer and Harry Tucker flew by airplane, non-stop, N. Y. City to Los Angeles, Oct. 24, 25—24 h. 51 min.

—— Arnold Rothstein, sporting man, was shot at N. Y. City, Nov. 4, and died Nov. 6.

—— Lava eruptions from Mt. Etna, Sicily, overwhelmed 3 towns, with $18,500,000 loss.

—— The Italian Senate, 181 to 19, made the Fascist Grand Council a part of the Government, Nov. 15.

—— U. S. President-elect Herbert Hoover, wife and party, made a tour of Latin America. They left San Pedro, Calif., on the battleship Maryland, on Nov. 19; on Nov. 26 they visited Honduras and Salvador; Corinto, Nov. 27; San Jose, Nov. 28; Guayaquil, Dec. 1; Callao and Lima, Dec. 5; Valparaiso and Santiago, Dec. 10; thence they crossed the Andes, reaching Buenos Aires on Dec. 13; Montevideo, Dec. 16; boarded the battleship Utah there on Dec. 18; at Rio de Janeiro on Dec. 21, leaving there on Dec. 23, reaching Norfolk and Washington on Jan. 6, 1929.

—— Earthquakes in Chile, on Dec. 1, killed 300, of whom 77 were at Talca, and 78 at Constitucion; loss $20,000,000.

—— King George of England having been sick from pneumonia since Nov. 21, the Cabinet got him to create, on Dec. 4, a Council of State, headed by the Queen, to rule temporarily. The Prince of Wales got back from Africa on Dec. 11, followed on Dec. 21 and Dec. 24 by the two other absent sons.

—— Bolivia and Paraguay fought with troops over their border land, Gran Chaco, Dec. 7-10; but, on request of the Pan-American Conference at Washington, agreed to arbitration.

DIMENSIONS OF THE EARTH; OCEAN DEPTHS.

The superficial area of the earth is 196,950,000 square miles—139,440,000 square miles of water and 57,510,000 square miles of land.

The approximate area, in square miles, by continents, is Africa, 11,500,000; America (North) 8,000,000; America (South); 6,800,000; Asia, 17,000,000; Europe, 3,750,000; Oceania, 4,000,000; Polar Regions, 6,205,000.

Asia, the largest continent, is about 6,000 miles from East to West, and over 5,300 miles from North to South. Africa is 5,000 miles from North to South. Europe is 2,40(miles from North to South, and 3,300 miles from East to West. South America is 4,600 miles from North to South, and 3,200 miles from East to West. North America is 4,900 miles from North to South, and over 4,000 miles from East to West.

The three great oceans comprise the Atlantic, 41,321,000 square miles; Pacific, 68,634,000 square miles, and Indian, 29,340,000 square miles.

There are about 1,000,000 square miles of lake and river surface on the land, and 1,910,000 square miles of islands in the seas.

The equatorial circumference of the earth is 24,902 miles; the meridinal circumference, 24,860 miles.

The length of one degree of longitude along the equator is 69.2 miles. Each degree of longitude represents four minutes of time. The lines of longitude are termed *meridians*.

According to Keith Johnston, a degree of latitude measures 68.7 miles at the equator and increases to 69.4 in the vicinity of the poles.

The weight of the earth has been estimated at six sextillion, 592 quintillion tons, not including the atmosphere, whose weight has been estimated at more than five quadrillion short tons.

The diameter of the earth at the equator is 7,926.677 miles, and through the poles, 7,899.988 miles.

The difference between these two diameters is 26.689 miles, and the ratio for the earth's flattening at the poles is thus 1 part of 297.

The average elevation of the land above sea level is approximately 2,800 feet.

The average depth of the ocean below sea level is 12,500 feet.

The deepest place in the ocean yet found is in the Mindinao Deep, between the Philippines and Japan, where soundings of 35,410 feet have been reported.

The highest mountain is Mount Everest, in the Himalayas, 29,141 feet.

This gives a range of 63,591 feet or more than 11¾ miles between the bottom of the oceans and the top of the land.

The greatest depth in the Atlantic Ocean is near Porto Rico, 27,972 feet; in the Indian Ocean, 22,968; in the Arctic, 13,200; in the Malay, 21,342; in the Caribbean, 20,568; in the Mediterranean, 12,276; in the Bering, 13,422.

The latest estimates of the earth's area place the fertile regions at 33,000,000 square miles; steppes at 19,000,000 square miles; deserts at 5,000,000 square miles.

Areas in square miles of seas; Okhotsk, 580,000; Yellow, 480,000; Japan, 405,000; Andaman, 300,000; North, 220,000; Red, 178,000; Baltic, 160,000; Hudson Bay, 472,000.

POPULATION OF THE EARTH, BY CONTINENTS AND RACES.

All estimates of population are guesses, more or less, based on official or unofficial censuses in the principal countries.

Following are approximate figures—Africa, 145,000,000; America (North) 138,000,000; America (South) 66,000,000; Asia, 950,000,000; Australia, 10,000,000; Europe, 480,000,000; Polar Regions, 50,000 (Rasmussen estimates that there are 33,000 Eskimos); other countries and regions, 167,000,000.

This would give a total world population of 1,906,000,000, which is the figure set in May, 1927, on the basis of data prepared by the secretariat of the League of Nations.

Of the total population approximately 1,580,000,000 persons occupy territory "within the orbit of the league."

According to statistics gathered by Prof. E. M. East of Harvard University, 150,000 persons are born every day, and 100,000 die.

He says United States population will become stationary at 200,000,000 before 2000 A. D.

THE RACES OF MANKIND.

According to Dr. Ales Hrdlicka, curator, Division of Physical Anthropology, United States National Museum, Washington, D. C., three main human races are recognized to-day, which are: 1, the whites; 2, the yellow-browns; and 3, the blacks. Each one of these shows a number of sub-races or types which are often called "races" also. The principal of these are:

Whites: The Mediterraneans, the Alpines and the Nordics.

Yellow-browns: The Mongoloids, the Malays and the American Indian.

Blacks: The Negrito, Negrillos and Bushmen, the Melanesian Negroes and Australians and the African Negroes.

Population of the world by races under a slightly different classification is estimated as follows—Indo-Germanic or Aryan (white), 821,000,000; Mongolian or Turanian (yellow-brown), 645,000,000; Semitic (white), 75,000,000; Negro and Bantu (black), 139,000,000; Malay and Polynesian (brown), 40,000,000; American Indian, north and south (red, half breeds), 28,000,000.

CHIEF POLITICAL ASSASSINATIONS SINCE 1865.

1865—April 14. Abraham Lincoln, President of the United States; died April 15, 1865.
1870—Dec. 28. Prim, Marshal of Spain.

—May 19. Brig Carrick, foundered in St. Lawrence River; 170.
—Nov. 19. Steamers Talisman and Tempest in collision on Ohio River; 100.
—Nov. 21. Immigrant (Holland) steamer Phoenix burned on Lake Michigan; 240.
—Dec. 20. British steam frigate Avenger, wrecked off north coast of Africa; 200.
1848—Jan. 8. Boilers of steamer Blue Ridge on Ohio River explode; 30.
—Aug. 24. American emigrant ship Ocean Monarch, from Liverpool, burned off Carnarvonshire, North Wales; 200.
1849—Nov. 15. Steamer Louisiana explodes at New Orleans; 60.
—Nov. 16. Emigrant ship Caleb Grimshaw burned at sea; 60.
1850—March 7. Steamer Orville St. John, burned near Montgomery, Ala.; 30.
—March 30. Steamer Royal Adelaide wrecked off Margate; 400.
—April 27. Steamer Anthony Wayne, Sandusky to Buffalo, on Lake Erie, explodes boiler and sinks; 38.
—June 15. Steamship Orion strikes rock on seashore north of Portpatrick; 50.
—June 17. Steamer Griffith burned on Lake Erie; 300.
—Nov. 12. Emigrant ship Edmund, Limerick to New York, wrecked off coast of Ireland; 100.
1852—Jan. 24. Steamer Amazon burned off Scilly Islands; 100.
—Feb. 26. Troopship Birkenhead, Queenstown to Cape of Good Hope, wrecked; 454.
—July 27. Steamboat Henry Clay, burned on Hudson River; 70.
—Aug. 20. Steamer Atlantic sunk by collision on Lake Erie; 250.
—Sept. 4. Steamboat Reindeer, blew up on Hudson River; 38.
1853—Feb. 15. Steamship Queen Victoria, wrecked near Dublin; 67.
—Feb. 16. The Independence burned off coast Lower California; 140.
—May 3. Immigrant ship William and Mary, sunk in Bahamas; 170.
—May 20. Ship Aurora, from New York, vanished at sea; 25.
—Sept. 29. Emigrant ship Annie Jane wrecked off coast of Scotland; 348.
—Dec. 24. Steamer San Francisco, bound for California with 700 passengers, including 500 of Third Reg., U. S. Artillery, foundered at sea; 240.
—Dec. 30. Ship Staffordshire, Liverpool for Boston, grounded near Seal Island; 178.
1854—Jan. 20. Emigrant ship Tayleur wrecked off Lambay; 380.
—Jan. 28. Steamer Georgia, burned at New Orleans; 60.
—March 5. Steamboat Caroline, burned on Mississippi at mouth of White River; 45.
—March. Steamer City of Glasgow, Liverpool to Philadelphia, with 450 passengers, never heard from.
—April 15. Steamer Secretary blew up in San Pablo, Cal. Bay; 50.
—April 16. Ship Powhatan, Havre to New York, grounded on Long Beach, N. Y.; 311.
—May 10. Troopship Lady Nugent, from Madras, foundered in a storm; 400.
—Sept. 27. Steamer Arctic, from Liverpool, sunk in collision in fog, 40 miles off Cape Race, N. F.; 350.
1855—May 1. Emigrant ship John wrecked off Falmouth; 200.
1856—Jan. 30. Chilian warship Cazador wrecked; 314.
—Sept. 23. Steamer Pacific, Collins Line, vanished at sea; 288.
—Sept. 24. Steamer Niagara, burned on Lake Michigan; 60.
—Nov. 2. Steamer Lyonnais sunk off Nantucket in collision; 260.
1857—Feb. 26. Steamer Tempest, Anchor Line; 150 on board; never heard from.
—May 31. Steamer Louisiana, burned near Galveston, Tex.; 55.
—June 26. Steamer Montreal, Quebec to Montreal, burned; 250.
—Aug. 20. Ship Dunbar wrecked near Sydney, Australia; 120.
—Sept. 12. Steamer Central America, Havana to New York, sunk; 400.
1858—June 13. Steamboat Pennsylvania exploded on Mississippi River, near Memphis; 160.
—Sept. 13. Steamer Austria, Hamburg to New York, burned in midocean; 471.
1859—April 27. American ship Pomona, Liverpool to New York, wrecked; 400.
—Oct. 25. Steamer Royal Charter wrecked on the Anglesea coast; 446.
1860—Jan. 6. Steamer Northerner, wrecked near Cape Mendocino; 38.
—Feb. 19. Steamer Ondine, sunk in collision with Heroine, at Biddeford; 60.
—Feb. 19. American ship Luna wrecked off Barfleur; 100.
—Feb. 19. Steamer Hungaria wrecked near Cape Sable, N. S.; 205.

1860—June 24. Steamer Ben W. Lewis, blew up at Cairo, Ill.; 50.
—Sept. 8. Steamer Lady Elgin sunk by collision on Lake Michigan; 300.
1861—June 4. Steamer Canadian, sunk by ice, Strait of Belle Isle; 35.
1863—Feb. 7. British steamer Orpheus wrecked off coast of New Zealand; 190.
—April 27. Steamer Anglo-Saxon wrecked in fog off Cape Race, N. F.; 237.
1864—Nov. 4. British steamship Racehorse, wrecked off Chefoo, China; 99.
